loose, adj. **Loose, relaxed, slack, lax** are here compared as meaning not tightly bound, held, restrained, or the like. **Loose** is the widest of these terms in its range of application. It is referable, for example, to persons or things that are free from a usual or a temporary restraint, whether that restraint be a rope, a bond, a fetter, a prison, or the like, or a rule, a principle (especially a moral principle), or a law having for its object the order, discipline, or well-being of the group and the individuals which compose it; as, we found the boat *loose* after the storm; the bull is *loose* in the field; finally he worked his hand *loose*; some sheets of this book are *loose*; *loose* thinking (i.e., thinking unrestrained by concern for logic or accuracy); *loose* talk (i.e., talk that pays scant attention to the truth of its statements); *loose* principles, *loose* habits, *loose* living (i.e., principles, habits, living which are definitely immoral because opposed to or ungoverned by moral or ethical principles). **Loose** is also applicable to that which is not firmly or tightly held by, attached to, connected with, or fitted to, that which supports or guides, or that which it is intended to cover; as, to drive with *loose* reins; a *loose* belt; a *loose* coat; *loose* joints; a *loose* sense of a word; *loose* skin. Often, the word applies to a substance, fabric, or the like, the particles or filaments of which are not close or compact in arrangement; as, *loose* soil; a *loose* weave or texture. **Relaxed** implies a loss of some tightness, tension, strictness, or rigidity, rather than a freedom from restraint

A colon (:): groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

of any kind or even a considerable departure from discipline, fitness, firmness, etc.: not only does it never suggest wildness, lawlessness, or immorality, but it rarely, if ever, suggests anything worse than an easing up, a mitigation, an alleviation of strain, or a softening; as, *relaxed* discipline; a *relaxed* enforcement of law; *relaxed* nerves; "Augustus during these months was suffering from the *relaxed* and surfeited mood which always attends success" (*Buchan*). **Slack** (as here compared: see also **NEGLIGENT**) comes close to *relaxed* in its limitations and implications, but it stresses lack of firmness or steadiness rather than a release from strain or severity; thus, a *slack* rope is one that is not taut, usually one that is not as taut as is necessary or desirable; a *slack* hold is a weak, unsteady hold. **Slack** is applied both to business, work, or the like, that is subject to periods of lessened activity, and to the periods or seasons when business is dull or work is hard to find; as, "It'll be play to me after I've done my day's work, or any odd bits o' time when the work's *slack*" (*G. Eliot*); the *slack* season for milliners or carpenters. **Lax** (see also **NEGLIGENT**) usually implies undue relaxation, with consequent loss of the tension, or firmness, or tone essential to health, discipline, proper functioning, or the like; as, *lax* discipline; *lax* morals; "a . . . *lax* state of the bowels" (*J. M. Good*); "That neither the faculties of the one [the mind] nor of the other [the body] be suffered to grow *lax* or torpid for want of use" (*Johnson*).

Ana. *Limp, flabby, flaccid, flimsy: *free, independent: disengaged, detached (see **DETACH**): casual, desultory, hit-or-miss, happy-go-lucky, *random, haphazard: *negligent, remiss, lax, slack: *careless, heedless, thoughtless.

Ant. Tight: strict. — **Con.** Taut, tense (see **TIGHT**): *rigid, stringent, rigorous: precise, exact, *correct: tied, bound (see **TIE**, *v.*): restrained, curbed, checked, inhibited (see **RESTRAIN**).

loot, n. Booty, plunder, *spoil, pillage, swag, prize.

loot, v. *Rob, plunder, rifle, thief, burglarize.

Ana. Sack, pillage, despoil, *ravage, spoliage, devastate, waste: *steal, pilfer, filch, purloin.

lope, v. 1 *Skip, bound, hop, curvet, lollip, ricochet.

2 Trot, pace, single-foot, walk, gallop, run, canter, rack, amble. See under **TROT**, *n.*

lope, n. *Trot, pace, single-foot, walk, gallop, run, canter, rack, amble.

loppy. *Limp, flabby, flaccid, flimsy, sleazy.

Ana. Loose, relaxed, lax, slack.

Con. *Firm, hard: *stiff, inflexible, rigid, tense, stark: taut, *tight, tense.

loquacious. Garrulous, voluble, *talkative.

Ana. Fluent, *vocal, articulate, glib, eloquent, voluble: chatting or chatty, gabbing or gabby, chattering, prating, jabbering (see corresponding verbs at **CHAT**).

Con. Reserved, taciturn, uncommunicative, reticent, *silent: laconic, succinct, terse, *concise: curt, brusque (see **BLUFF**).

loquacity, loquaciousness. Garrulity, volubility, talkativeness. See under **TALKATIVE**.

Ana. Chattering or chatter, chatting or chat, gabbing or gab, prating, jabbering (see corresponding verbs at **CHAT**): fluency, articulateness, glibness, volubleness (see corresponding adjectives at **VOCAL**): *readiness, ease, facility.

Con. Taciturnity, reservedness or reserve, reticence, silence (see corresponding adjectives at **SILENT**): curtness, brusqueness (see corresponding adjectives at **BLUFF**).

lordly. Haughty, arrogant, overbearing, *proud, insolent, supercilious, disdainful.

Ana. Pompous, pretentious (see **SHOWY**): *dictatorial,

magisterial, authoritarian: imperious, domineering, *masterful.

Con. Meek, modest, *humble, lowly: submissive, *tame, subdued: gentle, mild (see **SOFT**): abject, *mean.

Lord's Day. *Sunday, Sabbath.

lore. *Knowledge, science, learning, erudition, scholarship, information.

lorn. Forlorn, lonely, lonesome, lone, *alone, solitary, desolate.

Ana. See those at **FORLORN**.

lot. Destiny, portion, *fate, doom.

Ana. Fortune, luck, hap, *chance, hazard.

loth. Variant of **LOATH**.

lour, v. Variant of **LOWER**.

lout, n. *Boor, churl, clown, clodhopper, bumpkin.

Con. *Gentleman, patrician, aristocrat.

loutish. Boorish, churlish, clownish. See under **BOOR**.

Ana. Clumsy, gauche, maladroit, inept, *awkward: burly, brawny, husky, *muscular: *rude, rough, crude, raw, callow, green.

lovable. **Lovable**, **amiable** come into comparison only when the latter means, as the former invariably means, capable of inspiring affection or liking. **Lovable** is the more positive term, and implies warmth and sincerity of feeling and a definitely personal reaction. "I have never been able to love what was not *lovable* or hate what was not hateful out of deference for some general principle" (*Conrad*). "The wide sympathy with all that is human which is so *loveable* in Chaucer and Shakspeare" (*J. R. Green*). **Amiable** (here compared only as applied to persons or things in their effect on another) often, especially in modern use, connotes little more than a definitely pleasant or agreeable (as opposed to a *distasteful* or *forbidding*) impression. "The philosopher Herbert Spencer . . . had the *amiable* trait in his character of an intense dislike to coercion" (*Shaw*). "Our modern appreciativeness is often only the *amiable* aspect of a fault—an undue tolerance for indeterminate enthusiasms and vapid emotionalism" (*Babbitt*).

Ana. Admired, respected, esteemed (see under **REGARD**, *n.*): idolized, adored, worshiped (see **ADORE**): attractive, alluring, charming, enchanting (see under **ATTRACT**): responsive, sympathetic, warm, warmhearted, *tender.

Ant. Hateful. — **Con.** Detestable, odious, abominable, abhorrent (see **HATEFUL**): *repugnant, repellent, distasteful, obnoxious.

love, n. *Attachment, affection.

Ana. Devotion, piety, *fidelity, allegiance, loyalty: adoration, worship, idolatry (see corresponding verbs at **ADORE**): *passion, fervor, ardor, enthusiasm, zeal.

Ant. Hate. — **Con.** Aversion, *antipathy: *enmity, hostility, animosity, rancor, animus: hatred, abhorrence, detestation (see under **HATE**, *v.*).

love, v. *Like, enjoy, dote on or upon, relish, fancy.

Ana. *Adore, worship, idolize: cherish, treasure, value, prize, *appreciate.

Ant. Hate. — **Con.** Abhor, detest, abominate, loathe (see **HATE**, *v.*): *despise, condemn, scorn, disdain.

lovely. *Beautiful, fair, comely, pretty, bonny, handsome, beauteous, pulchritudinous, good-looking.

Ana. Alluring, enchanting, charming, taking, attractive (see under **ATTRACT**): *delightful, delectable: exquisite, delicate, dainty, rare (see **CHOICE**).

Ant. Unlovely: plain.

loving. **Loving**, **affectionate**, **devoted**, **fond**, **doting** are comparable when they mean feeling or showing love or strong liking. **Loving** stresses the inward emotion and usually implies sincerity and depth of feeling; as, a *loving* father; *loving* friends. "Looking at it with eyes at

once critical and *loving*, as if recalling the glow with which he had created it" (*Galsworthy*). *Affectionate* often stresses demonstrativeness or implies need of expression; as, she is a very *affectionate* child. "He had an *affectionate* heart. He must love somebody" (*Austen*). "His [Augustus's] *affectionate* care for his people was winning him love" (*Buchan*). *Devoted* emphasizes attentiveness, sometimes implying little more than assiduousness, sometimes connoting self-dedication or active loyalty to the person or thing one loves or likes; as, a *devoted* lover; a *devoted* disciple. "I did everything for him that the most *devoted* mother could do" (*Shaw*). *Fond* implies affectionate attachment; in its earlier use it connoted, and still often connotes, foolish tenderness. "A loving husband is a very amiable character. A *fond* one I think is not so" (*J. Wesley*). "Her preoccupation with petty things of no importance whatever was worthy of the finest traditions of *fond* motherhood" (*Bennett*). When *fond* (of) and *devoted* (to) imply a strong predilection or addiction, they are not often clearly distinguished. However, one is *fond* of the theater who welcomes every opportunity to see a play; one is *devoted* to the theater who spends much of his time in seeing plays or in efforts to further the development of the drama. One may be *fond* of the country and yet not go there often, but if one is *devoted* to it, one prefers to spend most of one's time there. *Doting* implies excessive fondness that leads to overindulgence in parents, fatuousness in lovers, or the like. "Thou child'st me oft for loving Rosaline"—"For *doting*, not for loving" (*Shak.*).

Ana. Amorous, amatory, *erotic; *enamored, infatuated; attentive, considerate, *thoughtful; *impassioned, passionate, ardent, fervent; leal, true, constant, *faithful.
Ant. Unloving. — **Con.** *Indifferent, unconcerned, aloof, detached; *cold, chilly, frigid; *faithless, false.

low. *Base, vile.

Ana. Abject, ignoble, *mean, sordid; *coarse, vulgar, gross, obscene, ribald; *crooked, devious, oblique.
Con. Decent, seemly, proper, *decorous, comme il faut; noble, *moral, ethical; lofty, *high.

lower or low, v. Glower, *frown, scowl, gloom.

Ana. Glare, stare, peer (see GAZE).

lowly. Meek, *humble, modest.

Ana. Submissive, subdued, *tame; retiring, withdrawing (see GO); reverential, deferential, obsequious (see corresponding nouns at HONOR).

Ant. Pompous. — **Con.** Pretentious, ostentatious, *showy; arrogant, lordly, overbearing, haughty, *proud.

loyal. *Faithful, leal, true, constant, stanch, steadfast, resolute.

Ant. Disloyal. — **Con.** False, *faithless, perfidious, traitorous, treacherous; disaffected, alienated, estranged (see ESTRANGE); rebellious, mutinous, seditious, *insubordinate, factious, contumacious.

loyalty. *Fidelity, allegiance, fealty, devotion, piety.

Ana. Lealness or lealty, truthfulness or truth, faithfulness, constancy, stanchness, steadfastness (see corresponding adjectives at FAITHFUL); *attachment, affection, love.

Ant. Disloyalty. — **Con.** Faithlessness, falseness or falsity, perfidiousness or perfidy, treacherousness or treachery, traitorousness (see corresponding adjectives at FAITHLESS).

lubricate. Grease, *oil, anoint, inunct, cream, pomade, pomatum.

luculent. *Bright, brilliant, radiant, luminous, lustrous, effulgent, refulgent, beaming, beamy, lambent.

Ana. Glowing, blazing, flaming (see BLAZE, v.); *splendid, resplendent, glorious.

lucid. 1 Pellucid, *clear, transparent, translucent, diaphanous, limpid.

Ana. Luminous, *bright, brilliant, lucent.

Con. Murky, gloomy, opaque, darkling, dusky, *dark; *turbid, muddy.

2 *Clear, perspicuous.

Ana. Distinct, plain, manifest, *evident.

Ant. Obscure, vague, dark. — **Con.** Enigmatic, cryptic, ambiguous, equivocal (see OBSCURE).

luck. Fortune, hap, accident, hazard, *chance.

Ana. Break, chance, occasion, *opportunity; lot, portion, destiny, *fate.

lucky. *Lucky, fortunate, happy, providential* come into comparison when they mean meeting with or producing a favorable outcome or an unforeseen or unpredictable success. *Lucky* implies that the person or persons involved have been favored by chance and that the success has not been the result of merit or merits; as, a *lucky* player; "some *lucky* hit, which took with everybody" (*Locke*); "Said he was a *lucky* fellow not to be sent to school" (*Meredith*); it was a *lucky* day for him when he met the girl who later became his wife. *Fortunate*, although it is often indistinguishable from *lucky* in its implications, is less colloquial and often less suggestive of fortuitousness or of a favorable accident; sometimes, it even carries a hint of a higher power (cf. *fortune*, under CHANCE, n., 1) that watches over one or of a being blessed beyond one's deserts; as, "In friendships I had been most *fortunate*" (*Shelley*); "We are aware, too, that the critical discrimination which comes so hardly to us has in more *fortunate* men flashed in the very heat of creation" (*T. S. Eliot*); "If Wee Willie Winkie took an interest in any one, the *fortunate* man was envied alike by the mess and the rank and file" (*Kipling*). *Happy* (in its original sense, fortuitous) differs from the preceding words, especially in its current use, chiefly in its combining the meaning of *lucky* or *fortunate* with that of its more common sense of being blessed or made glad (see GLAD); thus, a *happy* outcome is not only one that is fortunate but one that makes the person affected feel happy; a *happy* accident by which a rare book is discovered is an accidental event or circumstance that brings to light something that proves a treasure; so, "giving them patience under their sufferings, and a *happy* issue out of all their afflictions" (*Bk. of Com. Prayer*); "Chemists have been more *happy* in finding experiments than the causes of them" (*R. Boyle*). *Providential* often carries an implication of good fortune resulting from the help or interference of Providence; as, a *providential* escape; they declared that the delay, which made them miss the ship that was later torpedoed, was nothing short of *providential*. Often, however, the word carries no trace of this implication and means little more than *lucky* or *fortunate*; as, "It was *providential*: the sisters had made no remark that the Critchlaws might not hear" (*Bennett*).

Ana. *Favorable, benign, auspicious, propitious; advantageous, *beneficial, profitable; happy, felicitous, meet (see FIT).

Ant. Unlucky. — **Con.** *Sinister, baleful, malefic, malign.

ludicrous. *Laughable, ridiculous, comic, comical, farcical, risible, droll, funny.

Ana. Absurd, preposterous, *foolish, silly; grotesque, bizarre, antic, *fantastic; amusing, diverting, entertaining (see AMUSE).

Con. Lugubrious, doleful, dolorous, *melancholy; solemn, grave, *serious.

luggage. *Baggage, impedimenta.

lugubrious. Doleful, dolorous, *melancholy, rueful, plaintive.

Ana. Depressing, oppressing or oppressive (see corre-

sponding verbs at **DEPRESS**): sorrowful, woeful (see corresponding nouns at **SORROW**): gloomy, saturnine, dour, morose, glum, *sullen.

Ant. Joyous: facetious. — **Con.** *Merry, blithe, jocund, jolly, jovial: cheerful, *glad, joyful.

luminous. *Bright, brilliant, radiant, lustrous, effulgent, lucent, refugent, beaming, beamy, lambent.

Ana. Glowing, blazing, flaming (see **BLAZE**, *v.*): gleaming, glittering, flashing, scintillating, shimmering (see **FLASH**, *v.*): resplendent, glorious, *splendid.

Con. Dim, dusky, obscure, murky, gloomy, *dark.

lunacy. *Insanity, psychosis, mania, dementia.

Ana. Alienation, derangement, *aberration: *mania, delirium, frenzy, hysteria.

lunatic, adj. *Insane, mad, crazy, crazed, demented, deranged, maniac, wood, non compos mentis.

lure, *n.* **Lure, bait, decoy, snare, trap** come into comparison when they denote something that leads one, literally and originally an animal, figuratively a person, unwittingly or inveigles such an animal or person into a particular place or situation, especially one from which it or he cannot easily escape. **Lure** (originally a device carrying raw meat and resembling a bird, which was employed by falconers in training young hawks for hunting) in extended use suggests something that always attracts and often deceives, yet does not necessarily lead one into evil or into danger. "How many [men] have with a smile made small account Of beauty and her lures. . . on worthier things intent!" (*Millon*). In current extended use, the connotation of deception is growing increasingly rare, and that of drawing power or seductiveness is being heightened; as, "What is this *lure*, this attraction, that cricket exercises" (*Lucas*); "how can they resist. . . the *lure* of so adventurous, so enchanting an invitation?" (*L. P. Smith*); "the *lure* of the simple life" (*Buchan*). **Bait** (literally a morsel of food tempting to a fish or, by extension, any animal, so placed that, if the fish or animal bites, it finds itself hooked, netted, or otherwise caught) in extended use is applied to something, often in itself something relatively insignificant, which is held out as a temptation or as a suggestion of an inviting prospect, in the hope (or with the result) of inveigling another into a desired act, position, or situation; as, shop windows filled with *bait*s to shoppers; in spite of her shyness, the girl's beauty was sufficient *bait* to attract many suitors. "But to quote Seneca is not criticism; it is merely to offer *bait*s to a possible reader" (*T. S. Eliot*). **Decoy** (originally a pond or pool with a net-covered channel into which ducks or other wild fowl were enticed, but now, in literal use, a wild fowl or the likeness of one which is used to lure other wild fowl into shooting range or into a net) in extended use is applied chiefly to a person, but sometimes to a thing, that leads one to go somewhere or to do something that exposes one to the danger of being detected in crime, of being swindled or robbed, of being found in compromising or in merely unpleasant circumstances, or of being used to further another person's ends; as, marked bills sent through the mails as *decoys* were found in the pocket of one postal employee; pretty young girls were the unconscious *decoys* by means of which she assembled numbers of men at her receptions; the troops were led into ambush by a *decoy*. **Snare** (literally a string with a running noose or a similar inconspicuous device in which a foot or the head of a bird or small animal may be caught and by which it is more and more firmly held the harder the victim tries to extricate itself) in extended use is applicable to any danger one may run into accidentally or unexpectedly or through lack of caution or wariness and from which, once involved, one cannot

easily extricate oneself. "The path to bliss abounds with many a *snare*" (*Cowper*). "Thou [God] know'st the *snare*s on ev'ry hand, Guide Thou their steps alway" (*Burns*). "Trial by jury itself, instead of being a security to persons who are accused, will be a delusion, a mockery, and a *snare*" (*Baron Denman*). Oftentimes the word implies malevolence or trickery on the part of another who is responsible for the danger. This use is commonly a figurative extension of the literal sense. "She meant to weave me a *snare*. . . To entangle me when we met, To have her lion roll in a silken net And fawn at a victor's feet" (*Tennyson*). **Trap** (literally a device that shuts with a spring for capturing game or destructive animals, either fatally injuring the animal or causing its mutilation if it escapes) in extended use is, like *snare*, applied to that which is a danger to the unwary or incautious. The two words are often used interchangeably as though they were indistinguishable in meaning; however, *trap* is preferred to *snare* when disastrous effects, or deliberate setting for the purposes of capture, or trickery beyond detection are implied; thus, the army feared a *trap* (not a *snare*), but rather than retreat, they advanced into it; a *trap* (not a *snare*) for speedsters; knowing the examiner's methods, he was certain that there would be a *trap* set for him but he could discover none. "Thou laid'st a *trap* to take my life" (*Shak.*).

lure, *v.* **Lure, entice, inveigle, decoy, tempt, seduce** agree in denoting to draw one into danger, evil, a false position, or the like, by exerting an attracting influence or by practicing deception. **Lure** implies a strong or irresistible, and usually a baleful, attraction. "Good wine *lures* back the winebibber" (*Arnold*). "It was not money that *lured* the adolescent husbandman to the cities, but the gay life" (*Mencken*). To **entice** is to lure artfully and adroitly. "She appeared to be playing with the bird, possibly amusing herself by trying to *entice* it on to her hand" (*Hudson*). To **inveigle** is to entice by beguiling and cajoling. "Many of them are *inveigled* to enlist by drink, or by bounty money" (*A. Tucker*). To **decoy** is to entrap or lead into danger by artifice, especially by false appearances; as, a small body of troops *decoyed* the enemy into action, while the main body lay in ambush. To **tempt** is to exert an attraction so strong that one is inclined to act in defiance of one's conscience or better judgment. "I am forbidden tea. I mustn't drink it." She looked at the cup, tremendously *tempted*. She longed for tea. An occasional transgression could not harm her" (*Bennell*). To **seduce** is to lead astray, usually by overcoming scruples, from rectitude, propriety, or duty. "The hideous beast whose craft had *seduced* me into murder" (*Poe*). "That quaintness, into which your admiration of Tacitus sometimes *seduced* you" (*Gibbon*). **Ana.** Ensnare, snare, entrap, trap, capture, *catch, bag; bewitch, fascinate, allure, captivate, take, *attract; blandish, wheedle, cajole (see **COAX**).

Ant. Revolt, repel.

lurid. *Ghastly, grisly, gruesome, macabre, grim.

Ana. Livid, *pale, pallid, wan, ashy, ashen: *sinister, malign, baleful, malefic.

lurk, *v.* **Lurk, couch, skulk (or sculk), slink, sneak** do not carry a common denotation, but they come into comparison because the major implication of each word is furtive action intended to escape the attention of others. To **lurk** is to lie in wait, as in an ambush: the term sometimes implies only a place of concealment (as, "his faithful Tom. . . with his young master's mare. . . was *lurking* in a plantation of firs"—*Meredith*) but it often also suggests an evil intention, or quiet, stealthy movements, or a readiness to spring upon a victim (as, "There. . . ugly treasons *lurk*"—*Shak.*; "in the corners of

the old building shadows lurked"—S. Anderson; "the latent scepticism which lurks behind all faith"—H. Adams). To couch (now archaic in this sense) is to hide oneself from view for any reason but sometimes, like *lurk*, it suggests a malign motive or intention. "There's not a hollow cave or lurking-place. No vast obscurity or misty vale. Where bloody murder or detested rape Can couch for fear, but I will find them out" (Shak.). To skulk is usually to move furtively but sometimes to lurk: it carries a stronger implication than any of the preceding words either of a sinister intention or of cowardice or fear; as, "[Adulterers] skulking in corners" (Shak.); "Gaming and Grub-street skulk behind the King" (Pope); "Disdainful Anger, pallid Fear, And Shame that sculks behind" (Gray); to come home late and skulk to bed. To slink is to move stealthily or slyly in order not to attract attention; as, "like beasts of prey slinking about a camp fire" (Conrad); "by skirting out-houses and slinking under walls, [they] escaped" (Meredith); "After a while I slunk away out of the great circle of firelight into the thick darkness beyond" (Hudson). To sneak is to get oneself out of or into a place by slinking, or out of a difficulty or the like by methods that are lacking in straightforwardness or are definitely underhand; as, he sneaked out of the house after his parents had gone to bed; "meanly to sneak out of difficulties into which they had proudly strutted" (Burke). **Ana.** *Hide, conceal, secrete: ambush, waylay, *surprise.

Con. *Appear, emerge, loom.

luscious. Delicious, delectable, *delightful.

Ana. Sapid, saporous, flavorful, toothsome, *palatable, appetizing: grateful, gratifying, pleasing, *pleasant.

Ant. Austere: tasteless.

lush. Luxuriant, *profuse, lavish, prodigal, exuberant.

Ana. Abounding or abundant, teeming, swarming, superabounding or superabundant (see corresponding verbs at TEEM): sumptuous, opulent, *luxurious.

lust. Concupiscence, *desire, appetite, appetence, passion, urge, yen.

Ana. *Cupidity, greed, avarice, rapacity: yearning, longing, hankering, thirsting or thirst, hungering or hunger (see corresponding verbs at LONG): craving, coveting (see DESIRE, v.): gusto, zest, *taste.

luster or lustre. Luster (or lustre), sheen, gloss, glaze, glare come into comparison when they denote a smooth shining surface that is the natural property of a thing or is given to it by some process such as polishing, burnishing, coating, or the like. Luster always implies a shedding of light, often of iridescent light, and always, in very precise use, of reflected light; as, the silvery or satiny luster of the finest pearls; the soft luster of rubbed and waxed mahogany; "Cut a piece of lead or of zinc, and observe the lustre of its fresh surface" (T. H. Huxley); "The sun...shining on her...hair...gave it a metallic lustre" (Watts-Dunton). In literary use, luster is often more loosely used to imply radiance or brilliance (see BRIGHT, 1); as, "The sun was shining with uncommon lustre" (Dickens). Sheen suggests more glittering or gleaming than luster, and seldom, if ever, connotes iridescence: it is applicable chiefly to highly polished or brightly finished metals (as, "The sheen of their spears was like stars on the sea"—Byron), to fabrics with a shining surface, such as satin, some alpacas, and the like (as, "the sheen of his poplin and velvet"—Cather), or to the shiny surface produced on certain fabrics by long wear (as, the sheen of his old blue serge suit), or to anything that emits or reflects brilliant or dazzling light (as, "Throned in celestial sheen"—Milton; the sheen of the river under the noonday sun; "the sheen of gardenia

...leaves"—Stark Young). Gloss carries a stronger implication of superficiality than luster or sheen, and therefore applies chiefly to something that shines through being coated with a shining substance (as, the gloss of a newly varnished floor or of freshly blackened shoes) or through being given a bright finish as by polishing, dressing, or the like (as, only very hard woods can be given a gloss that lasts more than a few days; the gloss on this chintz will wash off). Consequently in extended use, gloss often implies speciousness, plausibility, extraneousness, or the like; as, "Beauty is but a...shining gloss" (Shak.); "National claims can always be given the gloss of moral sanction" (Times Lit. Sup.). Glaze applies particularly to a glasslike coating which provides a glossy surface on earthenware or porcelain, but it is also applicable to other similar coatings, such as one made on cooked meats by pouring over them broth boiled until it forms a gelatinous paste, or on pies, rolls, and the like by various substances such as beaten egg or sirup, or on flat paint by the use of an enamel, or on the ground by rain that freezes on the smooth surface of roads, walks, and the like; as, some chinaware have an especially beautiful glaze; the bright glaze of the candied sweet potatoes; to apply a fresh glaze to the surface of an old car; the glaze on the sidewalks is very bad this morning. Although glaze (or glazed frost) is the technical meteorological term for a coating of freezing rain, glare is common in general use. The latter term also applies to any surface coating or sheet of clear ice.

Ana. Polishing or polish, burnishing or burnish, shining or shine (see corresponding verbs at POLISH): iridescence, opalescence (see corresponding adjectives at PRISMATIC): brilliancy, radiance, luminosity, effulgence, refulgence (see corresponding adjectives at BRIGHT).

lustful. Lascivious, libidinous, lecherous, wanton, lewd, *licentious, libertine.

Ana. *Carnal, fleshly, sensual, animal, animalistic: *immoral, unmoral, amoral.

Con. Pure, modest, decent, *chaste: *moral, virtuous.

lustration. *Purification, ablution, purgation, catharsis.

lustre. Variant of LUSTER.

lustrous. Luminous, radiant, brilliant, *bright, effulgent, refulgent, beaming, beamy, lambent, lucent.

Ana. Polished, burnished, shining (see POLISH): glorious, resplendent, *splendid: glowing, blazing, flaming (see BLAZE, v.).

lusty. *Vigorous, energetic, strenuous, nervous.

Ana. Robust, sound, *healthy, hale: stout, sturdy, *strong, stalwart: husky, brawny, *muscular, sinewy, athletic.

Ant. Effete. — **Con.** *Sick, ill: *weak, infirm, feeble, decrepit.

luxuriant. Lush, exuberant, *profuse, lavish, prodigal.

Ana. Fruitful, fecund, *fertile, prolific: *rank, rampant: abounding or abundant, superabounding or superabundant, teeming (see corresponding verbs at TEEM).

Con. Barren, *sterile, unfruitful, infertile: *meager, scanty, scrimpy, skimpy: arid, *dry.

⚠ Do not confuse luxuriant with luxurious.

luxurious. 1 Voluptuous, sybaritic, epicurean, *sensuous, sensual.

Ana. Self-indulging or self-indulgent, self-pampering (see primitive verbs at INDULGE): languorous, languishing (see LANGUID).

Ant. Ascetic. — **Con.** Austere, stern, *severe: self-denying, self-abnegating (see corresponding nouns at RENUNCIATION).

2 Luxurious, sumptuous, opulent come into comparison

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

when they are applied to things and mean ostentatiously or obviously rich and magnificent. That is **luxurious** (as here considered: see also **SENSUOUS**) which is exceedingly choice and costly; as, her *luxurious* sable coat; the *luxurious* appointments of their drawing room; *luxurious* wines; *luxurious* table linens. That is **sumptuous** which is extravagantly rich, splendid, gorgeous, luxurious, or the like: the word usually suggests a grandeur or magnificence that almost overwhelms the senses; as, "The *sumptuous* life of the Court provided material for some painters" (*Binyon*); "Venice, soon to be known as the most beautiful and *sumptuous* city of Europe" (*H. Ellis*); "the too *sumptuous* note of the entertainment" (*M. Austin*); "for the most *sumptuous* masques in England, Italian managers, engineers and artists were brought over" (*T. S. Eliot*). That is **opulent** (as here considered: see also **RICH**) which flaunts or seems to flaunt its luxuriousness, or luxuriance, and, in some cases, costliness; as, "[Cleopatra] offered [Antony] the bribe not only of her person but of an *opulent* and glittering eastern throne" (*Buchan*); "The diction of poetry became, with notable exceptions, *opulent*, *sumptuous*, lavish, rather than pointed, terse, concrete" (*Loues*). "It [the beauty of the countryside] was an ample, rolling *opulent* beauty;

Georgian, somehow, with a suggestion of full-bottomed wigs and old port. A trifle oppressive to live with, perhaps" (*Jan Struther*).

Ana. Ostentatious, pretentious, pompous, *showy: magnificent, stately, imposing, majestic, *grand: *costly, expensive, valuable, precious.

Con. Frugal, thrifty, economical, *sparing: *meager, scanty, scant, skimpy, scrumpy, spare, exiguous.

⚠ Do not confuse *luxurious* with *luxuriant*.

luxury. *Amenity, pleasance.

Ana. *Pleasure, joy, delight: agreeableness, gratification, gratefulness (see corresponding adjectives at **PLEASANT**).

Ant. Hardship. — **Con.** *Difficulty, rigor, vicissitude.

lycée. College, gymnasium, *academy, seminary, institute.

lying. Mendacious, untruthful, *dishonest, deceitful.

Ana. *False, wrong: deceptive, *misleading, delusive, delusory.

Ant. Truth-telling. — **Con.** Honest, just, *upright, conscientious, scrupulous, honorable: true, *real, actual: candid, *frank, open, plain: *reliable, dependable, trustworthy.

M

macabre. Gruesome, *ghastly, grisly, grim, lurid.

Ana. Horrifying, daunting, appalling, dismaying (see **DISMAY**): horrific, horrendous, *horrible, horrid.

macaroni. Buck, spark, dude, elegant, exquisite, coxcomb, beau, *fop, dandy, swell, nob, toff

machination. Intrigue, conspiracy, *plot, complot, cabal, frame-up.

Ana. *Trick, ruse, stratagem, maneuver, artifice, feint, wile.

machine. **Machine, engine, apparatus, appliance** are here compared as denoting a device (particularly a device involving a more or less complicated mechanism) for doing work that exceeds human capacity or that can be accomplished by human power only with a comparative waste of time and effort. **Machine** and **engine** in their early use in English were applied to any contrivance that evidenced human ingenuity, but **machine** usually suggested a marvel of construction and **engine** a device that exerted force. Although the words were occasionally applied to the same things, they diverged in meaning when **machine** came to denote specifically a vehicle and **engine** a contrivance used in propelling, pulling, pumping, and the like; thus, a sedan chair, a carriage, a coach were called **machines**, and a battering ram, a cannon, a pump, **engines**; as, "You mortal *engines* [cannon], whose rude throats The immortal Jove's dread clamours counterfeit" (*Shak.*); "now that the *machine* [dogcart] is at the gate" (*Barrie*). This distinction is still apparent in current use; we still call certain vehicles (the automobile, the airplane, etc.) **machines** (though not for the same reasons) and that unit in their structure which generates or supplies power, the **engine**. The words, however, are usually distinguished more broadly. A machine is a construction the parts of which are so formed and so connected with each other that it can be set in motion and made to accomplish work, such as shaping or fabricating materials (as a lathe, a sewing machine), hoisting (an elevator, a crane), printing (a

printing press), and the like. An engine is a machine also, but in its specific sense, a machine which turns one form of physical force into another and more usable form, such as pressure on a piston or torque on a crankshaft; thus, a turbine of a vessel is an **engine**; the motor of an automobile or a motorboat is usually a **gasoline engine**. **Engine** is sometimes applied to the machine which combines both the power-developing and the working units; as, a railway **engine**; a fire **engine**. In extended and figurative use, **machine** is usually applied to something that is like a machine, as in organization (complexity of parts, a specific function for each part, ability to move or act only in obedience to an external force or a prime mover; as, a political **machine**) or in its automatism (as, "in short, I have no feelings; I am a mere *machine*"—*Dickens*). In extended use, **engine** is applied rather to the person or thing that supplies the motive power or the driving force than to the thing moved; as, unenlightened public opinion is an **engine** of destruction; "O, for an *engine* to keep back all clocks" (*B. Jonson*). "Wit's an unruly *engine*, wildly striking Sometimes a friend, sometimes the engineer" (*Herbert*). "Never... had the press been turned into an *engine* of such political importance" (*Prescott*). **Apparatus**, as applied to a thing rather than to a collection of things (see **EQUIPMENT**), is the most general and the least specific in its implications of any of these words. Like the other words, it denotes a more or less complicated mechanism for effecting a given kind of work, but the parts may be either numerous or very few; they may be adjusted to each other either crudely or delicately; as, a radio receiving **apparatus**; the boy rigged up an **apparatus** consisting of an alarm clock and pulleys for closing his bedroom windows on winter mornings; a machine is an **apparatus** for applying mechanical power; "people... in whom the sensory nervous **apparatus** is highly developed" (*H. Ellis*). **Appliance** is often used in place of **apparatus** for a simple, often portable, machine useful in

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

household work, in laboratories, hospitals, and the like, especially when the intent is to indicate that the power for operation can be supplied readily, as by attaching it to an electrical outlet (electrical *appliances*); thus, vacuum cleaners, washing machines, mechanical refrigerators and sterilizers, etc., come under the description of *appliance*, whether the power is supplied by hand, gas, electricity, heat, or the like.

Ana. Contrivance, *device, contraption, gadget: *implement, tool, instrument, utensil, appliance.

machinery. *Equipment, apparatus, paraphernalia, outfit, tackle, gear, matériel.

Ana. *Means, instrument, instrumentality, agency, medium, vehicle, organ, channel, agent: *machine, engine, apparatus, appliance: *device, contrivance, contraption, gadget: *implement, tool, instrument, utensil, appliance.

macrocosm. Cosmos, universe, world, *earth.

mad. 1 *Insane, crazy, crazed, demented, deranged, lunatic, maniac, wood, non compos mentis.

Ana. Frenzied, hysterical, delirious (see corresponding nouns at MANIA): *irrational, unreasonable.

2 *Angry, irate, wrathful, indignant, acrimonious.

Ana. Maddened, incensed, infuriated, enraged (see ANGER, *v.*): inflamed, fired, enkindled (see LIGHT, *v.*).

Con. Collected, composed, *cool, nonchalant, imperturbable.

madden. *Anger, incense, enrage, infuriate.

Ana. Vex, *annoy, irk: exasperate, provoke, roil, aggravate, *irritate.

Con. *Pacify, placate, mollify, appease, propitiate, conciliate: assuage, allay, mitigate, *relieve.

magazine. 1 *Armory, arsenal.

2 *Journal, periodical, review, organ, newspaper.

magic, *n.* Magic, sorcery, witchcraft, witchery, wizardry, alchemy, thaumaturgy are allied rather than synonymous in meaning, especially in their literal senses. Figuratively, they are often employed indifferently, without regard to the implications of their primary senses and with little distinction from the most inclusive term, *magic*. Magic literally designates any of the arts or the body of arts whose practitioners claim supernatural or occult powers, as in calling spirits to their assistance, in performing miracles, in divining the future, and in fixing the destinies of men. Figuratively, the word denotes a power or influence that produces effects akin to those of magic. Discriminating writers, however, give it specific implications. Most commonly it stresses the power to call forth an image, an emotion, a response, or the like, from, or as if from, a void. "His *magic* was not far to seek.—He was so human!... Where'er He met a stranger, there he left a friend" (J. R. Lowell). "The faint significance of [certain] words...for a common dullard, or their evocative *magic* for a Keats" (C. E. Montague). Less often it is applied to an art or an artist transcending the natural or explainable. "But Shakespeare's *magic* could not copied be; Within that circle none durst walk but he" (Dryden). Sorcery is the form of magic practiced by those who use incantations and charms and cast spells in order to work their ends, usually harmful ends. Consequently, in careful figurative use, it suggests an attempt to overpower or enthrall by glamour or artful enchantment. "To fence my ear against thy sorceries" (Milton). "Virtues pushed to extremes, And sorceries of talent misapplied" (Wordsworth). Witchcraft, witchery, wizardry, in their primary senses, suggest powers derived from evil spirits or the use of human beings as the instruments for the accomplishment of Satanic ends, the only difference being that the first

two are chiefly applied to the work of women, and the last to that of men. Figuratively, however, they vary in implications. Witchcraft is sometimes indistinguishable from sorcery, but it more often suggests guile rather than enchantment and wiles rather than spells. "There is something more than *witchcraft* in them [women], That masters ev'n the wisest of us all" (Rowe). Witchery, on the other hand, seldom implies either sorcery or guile, and stresses rather a winning grace or an alluring loveliness. "The soft blue sky did never melt Into his heart; he never felt The *witchery* of the soft blue sky!" (Wordsworth). Wizardry suggests a more virile and compelling power to enchant and, in modern use, usually connotes abnormal skill, talent, or creative power in the person who exerts such an influence; as, the *wizardry* of a Kreisler. "That white-winged legion through whom we had ploughed our way were not, could never be, to me just gulls...; there was the *wizardry* of my past wonder, the enchantment of romance" (Galsworthy). Alchemy is properly classed as magic only because its practitioners claimed mastery of secret forces in nature and the power to work miracles, such as the changing of base into precious metals. In discriminating figurative use, therefore, it implies transmutation, sometimes transfiguration. "Gilding pale streams with heavenly *alchemy*" (Shak.). "By happy *alchemy* of mind They turn to pleasure all they find" (M. Green). "The vast majority of those who write verse are unendowed with the assimilating *alchemy* of genius" (Loves). Thaumaturgy, which is literally applied to the art of all wonder-workers, especially to that of conjurors or of those who profess the power to work miracles, is in figurative use applied to that which mystifies and dazzles. "The *thaumaturgic* powers, of Virgil, or...of Shakespeare" (Pater).

magisterial, magistral. Authoritative, authoritarian, *dictatorial, dogmatic, doctrinaire, oracular.

Ana. *Masterful, domineering, imperious, imperative, peremptory: directing, controlling, conducting, managing (see CONDUCT, *v.*).

magnificent. Imposing, stately, majestic, august, noble, grandiose, *grand.

Ana. *Splendid, resplendent, glorious, sublime, superb: opulent, sumptuous, *luxurious: ostentatious, pretentious, *showy.

Ant. Modest. — **Con.** *Mean, abject, ignoble, sordid: trifling, trivial, *petty, paltry: *humble, meek, lowly.

magnify. *Exalt, aggrandize.

Ana. Extol, *praise, laud, acclaim, eulogize: enlarge, *increase, augment: *expand, amplify, distend, swell, inflate, dilate.

Ant. Minimize, belittle. — **Con.** *Decry, depreciate, detract from, derogate from: reduce, lessen, diminish, *decrease: *contract, shrink, deflate.

magniloquent. Grandiloquent, aureate, flowery, *rhetorical, euphuistic, bombastic.

Ana. Turgid, tumid, *inflated, flatulent: theatrical, histrionic, melodramatic, *dramatic.

magnitude. Volume, *size, extent, dimensions, area.

Ana. Amplitude, *expanse, stretch, spread: *bulk, mass, volume.

maiden, adj. *Youthful, juvenile, virgin, virginal, puerile, boyish.

Ant. Experienced.

maim. Maim, cripple, mutilate, batter, mangle come into comparison when they mean to injure the body (or the object) so severely as to leave permanent or long-lasting effects. Maim implies the loss of a limb or of a member or the destruction of its usefulness by war, accident, the deliberate act of oneself or another, or the

like; as, thousands were killed in the three days' battle but tens of thousands were *maimed*; automobiles *maim* large numbers of persons every year; blinded, legless, armless, and other *maimed* men were carried from the wreck. *Cripple* (as here compared: see also *WEAKEN*) is more restricted than *maim* because strictly it implies the loss of, or the deprivation of the use of, a leg or arm or part of one; as, he is *crippled* as a result of an amputation following blood poisoning; *crippled* by a congenital hip disease. *Mutilate* (for specific sense of this word, see *STERILIZE*, 1) implies the cutting off or removal of a part essential to completeness, not only of a person but also of a thing, and to his or its perfection, beauty, entirety, fulfillment of function, or the like; as, "like a company of dolls a cruel child has *mutilated*, snapping a foot off here, tearing out a leg here" (*Jefferies*); "Windows...darkened by time and *mutilated* by wilful injury" (*H. Adams*); "The last twelve pages of this codex have been *mutilated* by...a [burning] brand which fell upon the book...destroying many lines of the text" (*Modern Language Notes*). *Batter* and *mangle* do not suggest loss of limb, member, or part, but they do suggest injuries which excessively disfigure the person or thing. *Batter* implies a pounding (literal or figurative) that bruises deeply, deforms, or mutilates; as, he emerged from the fight *battered* and dazed; "The first time he made a helmet, he tested its capacity for resisting blows, and *battered* it out of shape" (*B. Russell*); "[the captain's unworldliness] must have appealed straight to that bruised and *battered* young soul" (*Conrad*). *Mangle*, on the other hand, implies a tearing or hacking, and a covering (literally or figuratively) with deep wounds or lacerations; as, "Mangled with ghastly wounds through plate and mail" (*Milton*); "reckless people who have disregarded the warnings and been *mangled* by sharks" (*V. Heiser*).

Ana. Mar, spoil, damage, *injure: *deface, disfigure.

main, adj. Principal, leading, *chief, foremost, capital. **Ana.** Cardinal, vital, *essential, fundamental: prime, *primary, primal.

Con. *Subordinate, secondary, dependent, subject, collateral.

maintain. *Maintain, assert, defend, vindicate, justify* come into comparison when they mean to uphold as true, right, just, valid, or worthy of notice or acceptance in the face of opposition or indifference. *Maintain* always implies a firmness of conviction. When this implication is the only one, *maintain* usually means to argue in the spirit of one who does not admit any weakness in one's contention. "The artisan, for example, ranks no doubt lower than the professional man; but no one *maintains* that he is a different kind of being" (*G. L. Dickinson*). "There is...a Philosophic Doctrine—...I know that many serious people believe it—which *maintains* that all men, in spite of appearances and pretensions...live alike for Pleasure" (*L. P. Smith*). Often, however, the term additionally implies persistency or insistency in upholding in defiance of all opposition. "Before this Court ought to intervene the case should be of serious magnitude clearly and fully proved, and the principle to be applied should be one which the Court is prepared deliberately to *maintain* against all considerations on the other side" (*Justice Holmes*). *Assert* (see also *ASSERT*, 1) so strongly implies a determination to make others accept or recognize that which one puts forward as the truth, or as a claim, or as a right, or the like, that it often suggests aggressiveness or obtrusiveness. "The provision of the constitution never has been understood to embrace other contracts, than those which...confer rights which may be *asserted* in a court of justice" (*Ch. Just. Marshall*). But *assert* does not always imply the use of

argument to force conviction or recognition. "Any one...can feel the sustained dignity of the sculptor's work, which is *asserted* with all the emphasis he could put into it" (*H. Adams*). "On the whole New Zealand was lavish with money and attention, and used force only to *assert* her sovereignty" (*V. Heiser*). *Defend* implies a maintaining in the face of attack with the intention of demonstrating the truth, rightness, etc., of what is questioned; thus, one *defends* a thesis who, as a candidate for a high degree, submits himself to examiners who assail the weak or dubious points of his argument. "The independence of the Supreme Court of the United States should be *defended* at all costs" (*Lippmann*). *Defend*, in this sense, does not imply as it so often implies in its more common sense (see *DEFEND*, 1), that the defender is in a weak or dubious position; however, it seldom suggests as much aggressiveness as does *assert*, and often connotes the aim of an apologist. "I have not adopted my faith in order to *defend* my views of conduct" (*T. S. Eliot*). *Vindicate*, as here compared (see also *EXCULPATE*), implies an attempt, usually a successful attempt, at defense or assertion. It presupposes that whatever is being defended or asserted has been, or is capable of being, challenged, questioned, denied, contemned, or the like. When the emphasis is on defense, then argument or something which has the force of argument is usually implied, and an aim not only to make one's point but to confute and confound one's opponents is often connoted. "Writers who *vindicated* our hereditary House of Lords against a certain Parliament Act" (*Quiller-Couch*). "We find him [Mark Twain]...*vindicating*, frantically *vindicating*, causes...which he was constrained to consider just" (*Van W. Brooks*). When the emphasis is upon assertion, *vindicate* usually implies an effort to resist triumphantly the force of encroachment or interference, or to overwhelm those who deny or doubt, not so much by argument as by appropriate action. "Arise, and *vindicate* Thy Glory; free thy people from their yoke!" (*Milton*). "The doctrine of Apostolical Succession, which is not held in this form by any other Church in Christendom, gave them the weapon which they wanted, *vindicating* against Rome their title to be Catholic priests" (*Inge*). "What was it that stood in his way? His unfortunate timidity! He wished to *vindicate* himself in some way, to assert his manhood" (*Joyce*). *Justify* (as here compared: see also *EXPLAIN*, 2; *JUSTIFY*, 3) implies that the thing concerned can no longer be opposed or ignored, because it has been conclusively shown to be true, valid, proper, or the like, by irrefutable arguments or on inescapable grounds, such as its consequences, its successful operation, or the like. "If the Germans are to *justify* the high claims they make for Lessing as a critic, they must rest them on other grounds than his intellectual originality" (*Babbitt*). "Fate persists in *justifying* the harsh generalizations of Puritan morals" (*Bennett*). "It isn't by the materials you use that your claim to originality will stand *justified* or condemned; it is solely by the thing you do with them" (*Lowes*).

Ana. Affirm, aver, protest, avow, declare, avouch (see *ASSERT*): *contend, fight, battle, war: persist, *persevere.

Con. *Oppose, combat, resist, withstand: *deny, gainsay, contradict, traverse.

maintenance. Sustenance, support, *living, livelihood, subsistence, keep, bread.

majestic. Stately, august, noble, magnificent, imposing, *grand, grandiose.

Ana. Lofty, *high: sublime, superb, glorious, *splendid, resplendent: monumental, tremendous (see *MONSTROUS*): *exceptional.

Con. *Mean, abject, sordid, ignoble: lowly, *humble, modest, meek: *ordinary, common.

major-domo. Seneschal, *steward, reeve, bailiff, agent, factor, oeconomus.

majority. *Age.

Ant. Minority. — **Con.** *Infancy, nonage.

make, v. **Make, form, shape, fashion, fabricate, manufacture, forge** are synonymous in so far as they mean to cause something to come into being or existence. This is the underlying meaning of **make**, the most general and the most widely applicable of all these terms. **Make** may imply the operation either of an intelligent agent or of a blind agency, and either material or immaterial existence; as, to **make** a chair, a poem, a bargain, a choice, a nest; this factory **makes** bicycles; he is unable to **make** friends; God **made** the world; the spider **makes** webs; the liver **makes** bile; your statements **make** sense. **Form** adds to **make** the implication that the thing brought into being has a definite outline, design, structure, or the like; as, the sculptor **forms** hands with exquisite delicacy; we are ready to **form** a plan; to **form** a federation of states; character is partly **formed** by training. **Shape**, though often interchangeable with **form**, is much more restricted in its application because it characteristically connotes an external agent or agency literally or figuratively impressing a particular form upon something as by molding, beating, carving, cutting, or the like; as, the blacksmith **shapes** (better than **forms**) a horseshoe on his anvil; to **shape** a hat on a block; events that **shaped** (not **formed**) his career; "Every life is a work of art **shaped** by the man who lives it" (G. L. Dickinson). **Fashion**, as here compared, means to form, but it implies an intelligent agent (sometimes, a purposeful agency) and more or less inventive power or ingenuity; as, he **fashioned** a table out of an old box; "like the sculptor, who never can **fashion** a hair or a thread in marble" (C. E. Montague); legislative committees often **fashion** strange bills out of miscellaneous suggestions. **Fabricate** stresses a making that unites many parts or materials into a whole; it usually connotes either a making according to a standardized pattern (as, to **fabricate** doors, windows, and other parts of a house; cf. *prefabricated* houses), or skillfulness in construction; as, to **fabricate** a good plot for a novel; "a dramatist . . . who **fabricates** plays so well knit" (T. S. Eliot). Very commonly, however, **fabricate** implies a making or inventing of something false as by the exercise of the imagination. "The particulars of that genealogy, embellished with every detail that memory had handed down or fancy **fabricated**" (Stevenson). "His feats of legerdemain sounded so improbable that many people considered his experiences **fabricated**" (V. Heiser). **Manufacture** emphasizes the making of something (usually something objective) by labor, originally by hand but now more often by machinery. The term is now applied to any making in which raw materials are used and a definite process or series of processes is followed; as, to **manufacture** wool, or cloth, or utensils, or machines, or automobiles. In extended use, **manufacture** often is preferred to any of the preceding words when laboriousness or the knowledge of the mechanics of a process, rather than skill or ingenuity, is connoted; as, to **manufacture** paintings by the dozen; "**manufactured** sensations" (Brownell). **Forge** literally suggests the operation of a blacksmith or other smith who heats metal and beats or hammers it into shape; as, to **forge** a horseshoe; to **forge** a chain. In its extended sense, it carries a strong implication of devising, concocting, or the like, by physical or mental effort, so as to give the appearance of truth or reality; as, "The proud have **forged** a lie against me: but I will keep thy precepts with my whole heart"

(Psalms cxix. 69); "Whate'er I **forge** to feed his brain-sick fits, Do you uphold and maintain in your speeches" (Shak.); "however feeling may render plastic the stuff of poetry, the poem, if it be worthy of the name, is **forged** in the brain" (Lowes). In specific use, both legal and ordinary, **forge** implies the making of a counterfeit, especially by imitating the handwriting of an original or of a supposed maker; thus, one **forges** a document, such as a will, deed, check, or the like, by making it or by signing it in imitation of another's handwriting or by making alterations in a genuine document by the same means; as, he was able to live luxuriously by **forging** checks until he was apprehended.

Arz. Produce, turn out, yield, *bear: *compose, comprise, constitute, consist of: accomplish, achieve, effect, fulfill (see PERFORM).

make-believe, make-belief. *Pretense, pretension.

maker, n. **Maker, creator, author** are here considered only in their most general sense, when they denote one who brings something into being or existence. When written with an initial capital letter, all three terms designate God, or the Supreme Being; without the capital they ascribe similar but not equivalent powers or effects to a person. **Maker** typically implies a close and immediate relationship between the one who makes and the thing that is made. It implies literally or figuratively the handling of the material, and individual or personal responsibility for that which is turned out; hence, in hymns, prayers, and the like, God is usually called "my **Maker**" or "our **Maker**"; **maker** in such terms as king-maker, a **maker** of men, a **maker** of phrases, a **maker** of poems, suggests the use of persons, words, ideas, and the like, as instruments by which one brings something into existence through one's own labor or effort. "The sea is his, and he made it: and his hands formed the dry land. O come, let us worship and bow down: let us kneel before the Lord our **maker**" (Psalms xcv. 5-6). **Creator**, on the other hand, seldom suggests either literally or figuratively the use or handling of materials; its leading implication is that of bringing into existence what the mind conceives and the will, as the mind's instrument, carries out. As applied to God, the term usually evokes the picture of Creation, as presented in Genesis; the term is used, therefore, rather than **maker**, when his omnipotence and the greatness of his works are stressed. "And touched their golden harps, and hymning praised God and his works; **Creator** him they sung" (Milton). In the same way, **creator** is used of a man who brings into being something new, which has form in his mind or imagination before he gives it objective existence. "[The poetic spirit] Doth like an agent of the one great Mind Create, **creator** and receiver both" (Wordsworth). "A conservator, call me, if you please, Not a **creator** nor destroyer" (Browning). "To . . . experiment with new ones [forms of art] not as an imitator, but as a **creator**" (S. Alexander). **Author** is applied to one who originates and who, therefore, is not only the source, or ultimate source, but the one responsible for a person's or thing's existence. It is applied to God chiefly in the phrase "the **Author** of my being" (this phrase with **author** uncapitalized is sometimes applied to one's begetter, or father), when the reference is to the gift of life or its attendant circumstances. "Then casting up my eyes, thanked the **Author** of my being for the gift of that wild forest, those green mansions where I had found so great a happiness" (Hudson). In reference to persons, it is not only applied to a writer (see WRITER) but also to a founder, an inventor, an initiator, or anyone who brings something into existence; as, "the policy of which he was principally the **author**" (Belloc); "the gay and bewitching . . . co-

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

quette Célimène who is the *author* of all Alceste's woes" (S. Alexander).

makeshift. Shift, expedient, *resource, resort, stopgap, substitute, surrogate.

Ana. *Device, contrivance, contraption, gadget; *means, instrument, agency, instrumentality.

maladroit. Clumsy, gauche, inept, *awkward.

Ant. Adroit. — **Con.** *Dexterous, deft, feat, handy; *clever, cunning, ingenious: skilled, skillful, expert, adept, *proficient: politic, diplomatic, bland, smooth (see SUAVE).

malady. Ailment, affection, *disease, complaint, distemper.

male, adj. **Male, masculine, manly, manlike, mannish, manful, virile** agree in meaning of, characteristic of, or like a male of the species, especially of the human species. **Male** (opposed to *female*) applies to animals and plants as well as to human beings, and always indicates sex; as, "a male tiger" (Shak.); "a male tree" (Gilbert White); "male children" (Joshua xvii. 2); a male choir. **Masculine** (opposed to *feminine*) is used to distinguish grammatical gender (as, *masculine* nouns and pronouns), but it applies most frequently to physical and mental characteristics (such as vigor, strength, size, etc.) which belong to men rather than to women; as, "he was a big, active, *masculine* creature" (Deland); "the *masculine* character lying behind the lofty idealism of Sung painting" (Binyon). "His poetry is *masculine*, plain, concentrated, and energetic" (Londor). "In antiquity the virtues that were most admired were... those which are distinctively *masculine*. Courage, self-assertion, magnanimity, and above all, patriotism" (Lecky). The use of *masculine* instead of *male* in such phrases as "the *masculine* part of the audience" is not regarded with approval. **Manly** (often opposed to *boyish, childish*) commonly suggests the finer qualities of a man, especially courage, frankness, independence, or the physical characters and skills which come with maturity: it is applicable not only to men but to boys (as, a *manly* boy); as, "His big *manly* voice, Turning again toward childish treble" (Shak.); "What more *manly* exercise than hunting?" (Walton); "It was amusing to watch the *manly* coolness with which the announcement was taken" (Meredith). **Manlike** is more apt to suggest characteristically masculine qualities or, especially, foibles; as, *manlike* bluntness; "From long association with men she had learnt a *manlike* reticence" (H. S. Scott). Oftentimes *manlike* suggests reference to man in the more general sense of the word and therefore means little more than human, or like human beings; as, hairy *manlike* creatures such as some apes; "Man-like is it to fall into sin... God-like is it all sin to leave" (Longfellow, transl. from von Logau). **Mannish** (often contrasted with *womanish* or *effeminate*) applies chiefly to women, their dress, gait, manners, or the like, when they suggest masculinity rather than femininity; as, "A woman impudent and *mannish* grown" (Shak.); a *mannish* costume. But sometimes *mannish* (as opposed to *childish*) applies to boys or youths who affect the airs and manners of a mature man; as, "Why must every thing smack of man and *mannish*? Is the world all grown up?" (Lamb). **Manful** differs from *manly* chiefly in its greater stress on sturdiness and resoluteness; as, a *manful* struggle; a *manful* effort to gain self-control. **Virile** (a stronger word than *masculine* and opposed to *puerile* or, in specific sense, to *impotent*) suggests qualities belonging to fully developed manhood, such as aggressiveness, masterfulness, forcefulness, and in a specific sense, procreancy. It differs from *manly* and *manful* in being applied only to mature men or sometimes, in its general sense, to mature

women (since it often suggests character rather than sex); as, "more *virile*... than his brothers" (Galsworthy); "virile controversialists" (Inge); a *virile* style. "Ye chiefly, *virile* both to think and feel, Deep-chested Chapman and firm-footed Ben" (J. R. Lowell).

Ant. Female. — **Con.** Feminine, womanly, womanlike, womanish, ladylike (see FEMALE).

malediction. *Curse, imprecation, malison, anathema.

Ant. Benediction. — **Con.** *Blessing, benison.

malefic. Malign, baleful, *sinister.

malevolence. Ill will, malignity, *malice, spite, despite, spleen, grudge.

Ana. Animosity, rancor, animus, antipathy, antagonism, *enmity, hostility: hate, hatred, detestation, abhorrence, abomination (see under HATE, v.).

Ant. Benevolence. — **Con.** Benignity, benignancy, kindness, kindness (see corresponding adjectives at KIND): good will, *favor, countenance.

malevolent. Malignant, malign, *malicious, spiteful, spiteful, despicable.

Ana. *Sinister, baleful, malign, malefic.

Ant. Benevolence. — **Con.** Benign, benignant, *kind, kindly: *charitable, humane, altruistic, humanitarian, philanthropic.

malice. **Malice, malevolence, ill will, spite, despite, malignity, spleen, grudge** come into comparison when they denote a feeling or a state of mind which leads one to desire that another or others should suffer pain or injury. **Malice** usually implies a deep-seated and, often, an unjustified or unexplainable desire: it frequently carries an implication of an innate pleasure in doing evil, in inflicting injury, in seeing others suffer, or in wanton destruction; as, "With *malice* toward none; with charity for all... let us... bind up the nation's wounds" (Lincoln); "there are people in the world with that degree of... *malice* in them that they can't bear to allow a good man his merits" (Shaw); "Man, with his usual monkey-like *malice*, took pleasure in pulling down what he had built up" (H. Adams). Often, however, in current use, it implies mischievousness or impishness rather than a hardened, vindictive nature. "She was clever, witty, brilliant, and sparkling beyond most of her kind; but possessed of many devils of *malice* and mischievousness" (Kipling). In law, *malice* applies to the state of mind of one who willfully commits wrong, as in full deliberation (as, *malice aforethought* or *malice prepense*), or out of hatred and a desire to inflict injury on another (as, *malice in fact*), or out of the depravity of one's nature (as, *implied malice*). **Malevolence**, and the more common **ill will**, usually imply a state of mind or a feeling arising out of hatred, enmity, resentment, or the like: neither term carries so strong an implication of an inherently evil or vicious nature as does *malice*, but neither term necessarily suggests less evil or injuriousness in the acts motivated by them. "Let those who have betrayed him by their adulation, insult him with their *malevolence*" (Burke). "Irritable, suspicious, and aggressive... constantly regarding himself as the victim of other people's *malevolence*" (H. Ellis). "Catherine could not believe it possible that any injury or any misfortune could provoke such *ill-will* against a person... not supposed to be connected with it" (Austen). **Spite** implies active malevolence or ill will colored especially by envy or meanness of spirit; as, "contemporary *spites* do not harm true genius" (A. Lang). "One feels that the style [of certain satires] has generated the hate. It is, indeed, a little shabby, a little insignificant: not really hate at all, but *spite*" (Day Lewis). **Despite** (see also under DESPISE) differs from *spite* chiefly in carrying a strong implication of wounded pride or of contempt or disdain. "Because thou

haat... rejoiced in heart with all thy *despite* against the land of Israel... I will... deliver thee for a spoil to the heathen" (*Ezekiel* xxv. 6-7). "If you will imagine a glint of moonlight running up the blade of a rapier, you may know the chill flame of *spite* and *despite* that blickered in her eyes then as she spoke" (*Quiller-Couch*). *Malignity* implies one or more of these states of mind, but it stresses, more than any of the preceding terms, the intensity of the passion and its driving force; as, he could not escape the *malignity* of his enemy; "he is cruel with the cruelty of petrified feeling, to his poor heroine; he pursues her without pity or pause, as with *malignity*" (*Arnold*). *Spleen* implies deep-seated ill will (sometimes, but not necessarily, directed against a particular individual) combined with a choleric temperament: it usually suggests either latent spite or malice and the wish to harm in an outburst of wrath; as, the old man vented his *spleen* on any child at play who unwittingly impeded his progress. "It requires an infinitely smaller psychic effort to expel one's *spleen* in a verbal joke than in a practical joke or a murder" (*Van W. Brooks*). *Grudge* applies to cherished ill will, against an individual, which seeks satisfaction: it usually suggests deep resentment for some real or fancied slight or affront and, often, a determination to get even; as, "I will feed fat the ancient *grudge* I bear him" (*Shak.*); "this same inveterate *grudge*" (*N. Hawthorne*); "Buried at the root of the relations between the sisters was Sophia's *grudge* against Constance for refusing to leave the Square" (*Bennett*); "He held no *grudge* against any of the people who had misused him" (*Cather*).

Ana. Malignancy, malignity, maliciousness, spitefulness (see corresponding adjectives at **MALICIOUS**): venom, bane, *poison: animosity, animus, rancor, antipathy, *enmity.

Ant. Charity. — **Con.** *Mercy, grace, clemency, lenity: benignity, benignancy, kindness, kindness (see corresponding adjectives at **KIND**): *favor, good will, countenance.

malicious. *Malicious, malevolent, malignant, malign, spiteful, spiteful, spiteful, spiteful, spiteful* come into comparison when they mean disposed, as a person, to do or to inflict evil or, as an act, prompted by such a disposition. A person or thing is *malicious* that is motivated or dictated by hatred or spite and, usually, by a desire to inflict injury and suffering and to see another in disgrace or an object of ridicule or contempt; as, "such *malicious* revenge, such injustice, such inhumanity" (*Austen*); "Gunga Dass took a *malicious* pleasure in emphasizing this point and in watching me wince" (*Kipling*). "One... might certainly have supposed that the reason why the square-shouldered, clumsy, high-featured Pricilla wore a dress the fac-simile of her pretty sister's, was either the mistaken vanity of the one, or the *malicious* contrivance of the other in order to set off her own rare beauty" (*G. Eliot*). A person or thing is *malevolent* that evidences ill will or an intent to do evil, or a sinister influence; as, "Captain Tilney must have heard some *malevolent* misrepresentation of her" (*Austen*); "There is no free breath to be drawn within the sphere of so *malevolent* an influence" (*N. Hawthorne*); "[Henry Adams] did not believe, with Wordsworth, that nature is a holy and beneficent thing, or with Blake, that nature is a wicked and *malevolent* thing" (*A. Repplier*). A person or thing is *malignant* that is actuated or characterized by virulent ill will or extreme malevolence (or, when the reference is to a disease or bodily condition, by extreme virulence or infectiousness); as, a *malignant* enemy; "A churel is the peculiarly *malignant* ghost of a woman who has died in child-bed" (*Kipling*); "His cold, *malignant*

rage" (*L. P. Smith*); *malignant* diphtheria; a *malignant* tumor or growth. A person or thing is *malign* (see also **SINISTER**) that harbors violent enmity or ill will or threatens extreme evil or danger: the term, in contrast with *malignant*, carries a stronger implication of potentiality and therefore may or may not suggest certainty of effect; as, "a soul That spurns the crowd's *malign* control" (*H. Gifford*); *malign* influences; a *malign* desire; "Or praise *malignly* arts I cannot reach" (*Pope*); "By Fiends of aspect more *malign*" (*Wordsworth*). *Spiteful* and *despiteful* imply a deep-seated malice or malevolence provoked especially by a desire to get even with others for real or fancied offenses. *Spiteful*, however, carries a stronger implication of meanness or venomousness of temper and refers even more often to utterances than to acts; as, *spiteful* gossip; she has a *spiteful* tongue; "a *spiteful* saying gratifies so many little passions" (*Addison*). "Well," said Mr. Potter, who was not *spiteful* to his children, and preferred his wife unruffled, "We'll let you off this time" (*R. Macaulay*). *Despiteful*, on the other hand, stresses cherished ill will or deep contempt as well as a desire to injure or get even; as, "the heinous and *despiteful* act Of Satan done in Paradise" (*Milton*); "the great world dark and *despiteful*" (*Kingsley*). *Despicious*, and the now more common *despiteous*, though they imply despitefulness, stress mercilessness or lack of all pity or desire to ease the ills of one's victims; as, "Spurring so hot with rage *despiteous*" (*Spenser*); "The proud, *despiteous* rich man" (*W. Morris*).

Ana. *Poisonous, venomous, virulent, toxic: *pernicious, noxious, baneful, deleterious, detrimental: *envious, jealous: wanton, gratuitous, uncalled-for, *supererogatory.

malign, adj. 1 *Malignant, *malicious, malevolent, spiteful, spiteful, spiteful.*

Ana. Inimical, hostile, rancorous, antipathetic, antagonistic (see corresponding nouns at **ENMITY**): venomous, virulent, *poisonous, toxic.

Ant. Benign. — **Con.** Benignant, kindly, *kind.

2 *Sinister, baleful, malefic.

Ana. Threatening, menacing (see **THREATEN**): baneful, noxious, *pernicious, deleterious: disastrous, catastrophic, cataclysmic, calamitous (see corresponding nouns at **DISASTER**).

Ant. Benign. — **Con.** *Favorable, auspicious, propitious: fortunate, *lucky, providential, happy.

malign, v. *Malign, traduce, asperse, vilify, calumniate, defame, slander, libel* agree in meaning to speak evil of for the purpose of injuring and without regard for the truth. *Malign* and *traduce* usually imply persecution; they commonly suggest hatred, violent prejudice, bigotry, or some other equally blinding passion as the motive. *Malign*, however, although it always carries the implication that the person, group, race, or the like, affected is the victim of lies, does not necessarily impute deliberate lying to the speaker or writer; as, the most *malign* race in history; "gossips had *malign*ed the lady" (*Meredith*); whether Machiavelli has been *malign*ed by some of his earlier biographers or not is still an open question. *Traduce* carries these implications also but it stresses the resulting ignominy more than *malign*; as, to believe that the English queen called "Bloody Mary" has been *traduced* by historians. "If I am *Traduced* by ignorant tongues... 'Tis but the fate of place, and the rough brake That virtue must go through" (*Shak.*). "Fear of this witch of the East [Cleopatra], shamelessly *traduced* by Octavian's agents, hag-rode the popular mind" (*Buchan*). *Asperse* and *vilify* both imply efforts to destroy a person's good name or reputation. *Asperse*

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

suggests an intent to detract from one's reputation or to lower one in popular esteem by direct accusations or, more often, by subtler methods such as innuendo or spreading reports; as, to cause a run on a bank by *aspersing* its credit; to *aspersion* the family of the opposing candidate in an election. "There were foul tongues to *aspersion* a Douglas" (*Scott*). *Vilify* implies open methods and an intent to blacken one's good name and to render it ignominious; it usually suggests direct accusation coupled with violent abuse and scurrilous name-calling. "With a malignant insanity, we oppose the measures, and ungratefully *vilify* the persons, of those whose sole object is our own peace and prosperity" (*Burke*). "The soldier of to-day... should not be blamed for falling back. He should be shot or hanged afterward... but he should not be *vilified* in newspapers" (*Kipling*). *Calumniate* imputes malice to the speaker or writer and falsity to his aspersions or accusations, and usually implies that his false and malicious statements have seriously damaged the good name of his victim; as, the verdict of history is that Benedict Arnold was not *calumniated*, but was justly charged with treason. "*Calumniating* and ridiculing the Church which he had deserted" (*Macaulay*). *Defame*, *slander*, and *libel* are found both in general and in legal use, but their strict legal definitions are more or less affecting their literary meanings. All imply calumny, but they differ from *calumniate* mainly in their emphasis on the positive damaging effect of the lies. *Defame*, both in legal and in literary use, suggests an actual injury to one's good name or a definite loss of repute or reputation. "*Defaming* and defacing, till she left Not even Lancelot brave nor Galahad clean" (*Tennyson*). "Captain Basil Hall... was publicly accused of being an agent of the British government on a special mission to blacken and *defame* this country" (*Van W. Brooks*). To *slander*, in strict legal use, is to defame orally; in general use, it is not so narrowly employed, but covers both written and printed as well as oral calumny. It also, more strongly than *defame* or *calumniate*, connotes positive suffering on the part of the victim. "*Slander'd* to death by villains, That dare as well answer a man indeed As I dare take a serpent by the tongue" (*Shak.*). "And she to be coming and *slandering* me, the base little liar! But the tongue is a fire as you know, my dear, the tongue is a fire" (*Tennyson*). *Libel* is chiefly a legal term; in general use its implications are much the same. It implies the printing or writing of that which defames a person or his reputation and the publication or circulation of such printed or written matter; as, Grub Street hacks who made their living by *libeling* famous men; to *libel* a politician by a caricature.

Ana. Detract from, *decry, disparage, depreciate, derogate from: vituperate, revile (see SCOLD): defile, pollute (see CONTAMINATE).

Ant. Defend. — **Con.** Vindicate, justify, *maintain: extol, eulogize, *praise.

malignant. Malign, malevolent, *malicious, spiteful, despicable, despicable.

Ana. Virulent, venomous (see POISONOUS): *envious, jealous: baneful, noxious, *pernicious: diabolical, devilish, *fiendish.

Ant. Benignant. — **Con.** Benign, *kind, kindly: benevolent, *charitable, altruistic, humane.

malignity. *Malice, malevolence, ill will, spite, despite, spleen, grudge.

Ana. Rancor, animus, animosity, *enmity, hostility: malignancy, maliciousness, spitefulness (see corresponding adjectives at MALICIOUS): hatred, *hate: vindictiveness, revengefulness, vengefulness (see corresponding adjectives at VINDICTIVE).

Ant. Benignity. — **Con.** Benignancy, kindliness, kindness (see corresponding adjectives at KIND).

malison. Malediction, *curse, imprecation, anathema.

Ant. Benison. — **Con.** *Blessing, benediction.

mall. *Avenue, alley, allée.

malleable. *Plastic, pliable, pliant, ductile, adaptable.

Ana. Tractable, amenable (see OBEYEDIENT).

Ant. Refractory. — **Con.** Intractable, recalcitrant, ungovernable, *unruly.

malodorous. Malodorous, stinking, fetid (or foetid), noisome, putrid, rank, rancid, fusty, musty come into comparison when they mean emitting an unpleasant smell. Malodorous is the general term which is referable to any smell of this character, from one that is manifestly unpleasant to one that is distinctly offensive; as, malodorous flowers; malodorous foods such as certain cheeses or sauerkraut may be agreeable to the taste. Stinking, the colloquial and vulgar term, and fetid, the literary, technical, and often, in colloquial use, the preferable term, describe an odor or a thing that emits an odor which is peculiarly offensive: the former more obviously suggests disgusting foulness than the latter; as, a stinking dungeon; a stinking outhouse; a fetid weed; "he detected at once a fetid odour, not very strong but highly disagreeable" (*Cather*). Noisome, which in an earlier and now rare sense means noxious, is applicable chiefly to that which emits a poisonously or unwholesomely offensive odor; as, "Four sewers emptied into these twenty-five acres of swamp and morass—stagnant, noisome, and crawling with huge snakes" (*V. Heiser*). Putrid is applicable, in literal use, only to organic matter in such a state of decomposition that it is loathsome malodorous; as, "a bloated, putrid, noisome carcass" (*Burke*). Rank (as here considered: see also RANK, 1; FLAGRANT) applies to an odor or to a thing which emits an odor that is exceedingly strong and unpleasant yet not necessarily loathsome; as, the rank smell of a sunflower; the air is rank with the odor of the flowers of the alanthus, or tree of heaven; "O, my offence is rank, it smells to heaven" (*Shak.*). Rancid usually suggests an offensive taste as well as an offensive smell (it may suggest merely one or the other), that is indicative of a loss of freshness: in current use, it applies chiefly to oil, butter, and similar substances that have undergone a chemical change or some decomposition; as, rancid bacon; the odor of rancid perspiration. Fusty and musty both suggest lack of ventilation and sunlight, but of the two words fusty carries the stronger implication of prolonged uncleanness or of an accumulation of dust and of dirt, and musty, the stronger implication of moldiness, of age, or of the effects of darkness or dampness; as, "the ill-ventilated schoolroom full of boys smelt... fusty" (*H. Ellis*); the musty odor of a damp cellar; "There was an acrid, musty smell; the raw air was close with breathing" (*R. Macaulay*).

Ant. Odorous. — **Con.** Fragrant, aromatic, redolent (see ODOROUS).

maltreat. Mistreat, ill-treat, misuse, *abuse, outrage. **Ana.** See those at ILL-TREAT.

mammoth. Colossal, gigantic, giant, gigantean, elephantine, titanic, herculean, *enormous, immense, huge, vast, Cyclopean, Antaeus, Gargantuan, Broddingnagian.

Ana. *Monstrous, monumental, stupendous, tremendous, prodigious: ponderous, weighty, cumbrous, cumbersome (see HEAVY).

manacle, v. *Hamper, trammel, clog, fetter, shackle, hog-tie.

Ana. *Hinder, impede, obstruct, bar, block: *tie, bind: *restrain, inhibit, curb, check, snaffle.

manage. 1 *Conduct, control, direct.

Ana. *Govern, rule: *guide, lead, steer, pilot, engineer: *handle, manipulate, wield, swing, ply.

2 Manage, contrive, afford are not true synonyms, but they are sometimes used interchangeably in certain expressions especially when preceded by *can* and followed by an infinitive (sometimes only by the object of a suppressed infinitive); as, how can you *manage*, or *contrive*, or *afford* to live so comfortably on your salary?; he could not *manage*, or *contrive*, or *afford* (to take) a vacation this year. In such contexts, **manage** implies discovery of ways and means (these latter often being understood or inferred), such as the necessary funds, the necessary permission, the necessary time; as, you can *manage* to get along: **contrive** adds to *manage* the implication of ingenuity or of scheming; as, she *contrives* to run a home on a small budget: **afford**, originally equivalent to *manage*, now is more often equal to *manage* to bear the expense of or *manage* to spare the money for; as, he can *afford* (to buy) an automobile. *Afford* in this sense takes *can* as an auxiliary; the other words often do not.

mandate, n. 1 Dictate, *command, order, injunction, bidding, behest.

Ana. Charging or charge, direction, instruction (see corresponding verbs at **COMMAND**): sanctioning or sanction, endorsement, approval (see corresponding verbs at **APPROVE**).

2 Mandate, initiative, referendum, plebiscite agree in meaning a political action or procedure whereby a constituency instructs or gives information of its desires to its legislature or legislators. **Mandate**, the most general of these terms, now applies to any instructions delivered by the people in any way, such as by a general vote or by a choice in an election, that makes their wishes clear not only to their representatives in a legislature but also to those who hold the executive power, or, in an extended sense, to those who represent them in any way or who by the nature of their office or duties are necessarily responsive to the will of the people; as, the president of the United States, re-elected by an enormous majority, declared that he had a *mandate* from the people to continue his policies; "It would almost seem as if the present school of fiction is, to borrow a phrase from French politics, exhausting its *mandate*" (*J. M'Carthy*); "Obviously I have no *mandate* to speak for any one but myself" (*J. W. Kruick*). **Initiative** (usually, *the initiative*) often denotes a right, but when it denotes a procedure, it implies recognition of the right of a group of voters or, more often, of a clearly defined number of voters, to propose a new measure or a constitutional amendment to a legislature. In Switzerland, where the initiative, or right to originate legislation, is vested in the people, a demand by 50,000 voters sends a proposed constitutional amendment directly to the people for approval or rejection. The initiative, both as a right and as a procedure, is legally recognized in many of the states of the United States of America. **Referendum**, which is often coupled with *initiative* (as, in the right of *initiative and referendum*), applies to the practice, adopted by the Swiss and by some states and cities in the United States, of sending measures that have been considered by or proposed to the legislative body to the voters for approval or rejection or for an expression of their wishes. **Plebiscite** strictly applies to a vote of the people (now usually by universal suffrage) on some measure submitted to them by the group or the body having the initiative, as where the referendum is employed. In a still narrower sense, *plebiscite* implies a vote of the population of a territorial unit that testifies to their wishes as to the form of government they will accept, their choice in a

proposed merger with either of two nations, or the like. **3 Protectorate, dominion, *possession, dependency, territory, colony.**

maneuver or manoeuvre, n. Stratagem, *trick, ruse, artifice, wile, feint.

Ana. *Device, contrivance: expedient, resort, *resource, shift, makeshift: intrigue, machination, *plot.

manful. Virile, mannish, manlike, manly, masculine, *male.

Ana. Sturdy, stout, tenacious, stalwart, tough, *strong: resolute, steadfast, staunch (see **FAITHFUL**): intrepid, bold, *brave.

mangle. Batter, mutilate, *maim, cripple.

Ana. *Injure, damage, mar, impair: *deface, disfigure: *deform, contort, distort.

mania. 1 *Insanity, lunacy, psychosis, dementia.

Ana. Alienation, derangement, *aberration.

Ant. Lucidity.

2 Mania, delirium, frenzy (or, now rare, phrenzy), hysteria are here compared as meaning a state of mind in which the person concerned loses control over his emotions, nerves, or mental processes. **Mania** (see also **INSANITY**) definitely implies madness or insanity: the term may designate a type of madness in which the patient manifests extreme excitability or, in still stricter use, that phase of manic-depressive insanity in which the patient loses control over his powers of thought, of speech, and of movement through violent excitement or excessive emotion; as, "[George III] suffered a third attack of *mania*" (*Dict. Nat. Biog., Concise Ed.*). **Delirium** implies extreme mental disturbance but not, usually, a prolonged or serious mental illness: rather it applies to a mental condition induced by an abnormally high fever, prolonged alcoholic intoxication (then specifically called *delirium tremens*), a severe injury, or the like, and characterized by raving, hallucinations, and extreme restlessness; as, "a raging fever accompanied with *delirium*" (*Dickens*); by pain reduced to a state approaching *delirium*. But *delirium* also, in loose untechnical use, applies to a state of intense emotional excitement that manifests itself in an individual or in a group and robs him or them of all semblance of self-control; as, he is in a *delirium* of joy; "the *delirium* of popular enthusiasm" (*Lecky*); "The *delirium* of the preceding [parliamentary] session" (*J. Morley*). **Frenzy** (see also **INSPIRATION**) suggests wilder or more violent agitation or disorder than *delirium* but no less emotional excitement: it is applicable both to a state bordering on a mania (as, "demoniac *phrenzy*"—*Milton*; "An act done in the... *frenzy* of despair"—*Freeman*) and to one in which for the time being all self-control is lost (as, "His hands released her... and went up to his white hair, which they tore in a *frenzy*"—*Dickens*; "Her intensity, which would leave no emotion on a normal plane, irritated the youth into a *frenzy*"—*D. H. Lawrence*; "Paris wholly has got to the acme of its *frenzy*; whirled, all ways, by panic madness"—*Carlyle*). **Hysteria** applies strictly to a functional nervous disorder not caused by an organic condition but simulating an organic disease in its symptoms (such as partial losses of memory or of sensation, functional paralyses or contractures of the limbs, loss of appetite, or nausea); as, the paralysis of her lower limbs proved to be the result of *hysteria*. In ordinary, nontechnical language *hysteria* implies extreme emotional excitability that may or may not show itself in swift transitions from laughing to crying; as, "she laughed and cried together... in a *hysteria* which she could not control" (*Bennett*); "they were gradually worked up to complaisance and then to enthusiasm and then to *hysteria* and then to acute *mania*" (*Mencken*).

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. Depression, dejection, melancholia, melancholy (see **SADNESS**): *ecstasy, transport: excitement, provocation (see corresponding verbs at **PROVOKE**).

maniac, maniacal. *Insane, mad, crazy, crazed, demented, deranged, lunatic, wood, non compos mentis.

Ana. *Irrational, unreasonable.

Con. *Rational, reasonable.

manifest, adj. *Evident, patent, distinct, obvious, apparent, palpable, plain, clear.

Ana. Revealed, disclosed, divulged, told (see **REVEAL**): shown, evidenced, evinced (see **SHOW, v.**): conspicuous, *noticeable, prominent.

Ant. Latent: constructive (see **IMPLICIT**). — **Con.** *Obscure, vague, enigmatic, cryptic, dark: *implicit, virtual.

manifest, v. *Show, evidence, evince, demonstrate.

Ana. Exhibit, display, expose (see **SHOW, v.**): *express, vent, utter, voice: *reveal, discover, disclose, divulge.

Ant. Suggest. — **Con.** Adumbrate, shadow (see **SUGGEST**).

manifold. Multifold, *many, several, sundry, various, divers, numerous, multifarious

Ana. Diverse, divergent, disparate, *different, various.

manikin. Midget, *dwarf, pygmy, homunculus, runt.

Ant. Giant.

manipulate. *Handle, wield, swing, ply.

Ana. Flourish, brandish, *swing, wave, thrash.

manlike. Mannish, mantul, virile, manly, masculine, *male.

Con. Womanlike, feminine, womanish, ladylike, effeminate, womanly, *female.

manly. Manlike, manful, virile, masculine, mannish, *male.

Ana. *Mature, matured, grown-up, adult, full-fledged: sturdy, *strong, stout, stalwart.

Ant. Unmanly. — **Con.** Effeminate, womanish, feminine, *female: dastardly, *cowardly: boyish, puerile, juvenile, *youthful.

manna. *Ambrosia, nectar, amrita.

manner. 1 *Method, mode, way, fashion, system.

Ana. Custom, usage, use, wont, consuetude, practice, *habit, habitude.

2 Mien, demeanor, *bearing, deportment, carriage, port, presence, front.

Ana. Etiquette, propriety, *decorum, decency, dignity: *form, usage, convention, convenience: *tact, address, poise, savoir-faire.

mannerism. *Pose, air, affectation.

Ana. *Eccentricity, idiosyncrasy: peculiarity, singularity, oddness, queeriness (see corresponding adjectives at **STRANGE**).

mannish. Manlike, virile, masculine, *male, manful, manly.

Ant. Womanish. — **Con.** Womanlike, ladylike, feminine, effeminate, *female.

manoeuvre. Variant of **MANEUVER**.

manufacture. Fabricate, forge, *make, form, shape, fashion.

Ana. Produce, turn out, yield (see **BEAR**).

manumit. Emancipate, enfranchise, affranchise, deliver, discharge, *free, release, liberate.

Ant. Enslave.

many. Many, several, sundry, various, divers, numerous, manifold, multifold, multifarious come into comparison when they mean consisting of a large number or comprising a large group. **Many**, as here compared, implies a likeness between the individuals or units as in class, category, kind, or sort: except that it vaguely implies more than a few, the term gives no explicit sug-

gestion as to how large the number is; as, *many persons*; *many teachers*; *many novels*; *many sources of information*. **Several** (etymologically, separate), as here compared (see also **DISTINCT, 1**), is almost as vague as *many* in its implication of number. In law, the term is construed as meaning more than one; thus, the *several* counts of an indictment may be two or more counts. In more general use, it is usually construed as meaning at least three; as, the journey will take *several* days; they saw *several* strangers on the road; there are *several* reasons why you should not go. In highly discriminating use, the term means both more than a few and different each from the other: in such use, *several* is often preceded by a possessive adjective; as, "her *several* thoughts... as signalled by the changes on her face" (*Hardy*); "they [the delegates charged with the ratification of the Constitution of the United States] assembled in their *several* states" (*Ch. Just. Marshall*). **Sundry** (now somewhat archaic except in humorous use) also implies an indefinite number, but it carries regularly a stronger implication of the difference of each from the others than does *several*; as, there are *several* (not *sundry*) eggs left; there are *sundry* (more explicit than *several*) aspects of the problem that have not been considered; he appealed to all and *sundry* persons [i.e., to persons collectively and as individuals] to make the campaign for funds a success; "she differed... in *sundry* important features" (*Quiller-Couch*). **Various** (see also **DIFFERENT**) is often used loosely as meaning an indefinite number, with a more or less attenuated implication of difference in identity of each from each: this use is often, but not universally, disapproved; as, *various* [*many* would be better here if no implication of severality is intended] persons spoke to me about it. **Divers** also has come to imply a vague number, often meaning little more than *many* or *several*, thereby losing its original strong implication of difference among the individuals (cf. *diverse*, under **DIFFERENT**); as, he told his story to *divers* persons. "God, who at *sundry* times and in *divers* manners spake in time past unto the fathers by the prophets" (*Hebrews i. 1*). **Numerous** may qualify plural nouns or singular nouns that designate a collection or assembly of units or individuals. In each case the term implies the existence of a noticeably large number of units or individuals; sometimes, in fact, it connotes a crowding or thronging; as, every President has *numerous* letters from *numerous* persons; "I have contracted a *numerous* acquaintance among the best sort of people" (*Steele*); "The commoners who had been summoned... formed a *numerous* assembly" (*Macaulay*). **Manifold** (etymologically, having many folds or laps) usually implies numerousness (or more than twofold, threefold, fourfold, etc.): when it is applied to a singular noun (either a collective noun or one designating an abstraction), it suggests both numerousness and diversity in its forms, features, qualities, characters, applications, aspects, or the like; as, "He hated the Puritan sects with a *manifold* hatred, theological and political, hereditary and personal" (*Macaulay*); when it is applied, as now happens more frequently, to a plural noun, it stresses not only their numerousness, but their variety; as, "to acknowledge and confess our *manifold* sins and wickedness" (*Book of Common Prayer*); "your *manifold* attractions" (*Austen*); "to the Chinese painters this world of nature seemed... [an] effective way of shadowing forth the *manifold* moods of man" (*Binyon*); "the strength of the dramatic lies in its *manifold* implications" (*Day Lewis*). **Multifold** is sometimes used interchangeably with *manifold*, but not wisely, since it carries, especially in precise use, an implication of repeated duplication that is usually lacking in *manifold*; as, a

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

machine for the *multifold* copying of a typed original; "a first essay...composed...amidst *multifold* disappointment" (T. Maurice). *Multifarious* adds to the implications of *manifold* that of great diversity and often incongruity in the units, individuals, or elements involved: for this reason it usually qualifies plural nouns, though it may be applied to collective singulars; as, "in many of the *multifarious* activities he undertook" (H. Ellis); "the *multifarious* Italian dialects" (V. Heiser); "the large desk on which *multifarious* files and papers were ranged" (Bennett); the *multifarious* suffering (or sufferings) of the refugees; *manifold* duties may also be *multifarious*.

Ant. Few.

many-sided. *Versatile, all-round.

map, n. & v. *Chart, graph.

Ana. *Plan, plot, scheme, design: *sketch, outline, diagram.

mar, v. *Injure, damage, hurt, harm, impair, spoil.

Ana. *Deface, disfigure: *deform, contort, distort, gnarl, warp: *ruin, wreck.

Cor. Embellish, decorate, *adorn, beautify, ornament: *mend, repair, patch: amend, revise, reform, *correct, rectify, emend.

marauder. *Brigand, bandit, highwayman, footpad.

Ana. Ravager, pillager, sacker, despoiler (see corresponding verbs at RAVAGE): robber, plunderer, thief, looter (see corresponding verbs at ROB).

march, n. *Boundary, border, frontier.

margin. *Border, verge, edge, rim, brim, brink.

Ana. Bound, end, term, bourn, confine, *limit: penumbra (see SHADE).

marine, adj. 1 Oceanic, thalassic, neritic, pelagic, abyssal, bathysmal, bathybic, *aquatic, lacustrine, lacuscular, fluvial, fluvialite.

2 **Marine, maritime, nautical, naval** are not synonymous terms but they are so interrelated that their proper choice is sometimes a cause of confusion. *Marine* and *maritime* both etymologically and in their use in English imply a connection with the sea. *Marine* is the preferred term when that which is qualified is produced by or is found in the sea or in a body of salt water (for this sense see AQUATIC), or is intended for use at sea (as, a *marine* barometer; a *marine* chronometer), or deals with the sea or with vessels that ply the sea or other large body of water (as, a *marine* painter or painting; *marine* engineering; *marine* insurance). *Marine* also is sometimes used when there is an actual or implied reference to mariners or seamen (as, "At that time the *Marine* Board examinations took place at the St. Katherine's Dock House on Tower Hill"—Conrad; the *Marine* Society founded in 1756); the term commonly applies to soldiers who serve at sea (as, the *Marine* Corps of the United States; the Royal *Marine* forces of Great Britain). *Maritime* is the preferred term when the reference is to countries, peoples, and the like, on the borders of a sea (as, the *Maritime* Provinces—i.e., the Canadian provinces of New Brunswick, Nova Scotia, and Prince Edward Island; the *Maritime* Alps; *maritime* states or races), or to the navigation of or commerce on the seas (as, *maritime* pursuits such as fishing or whaling; *maritime* laws or law; *maritime* perils; "In the whole of British genius...I have estimated the *maritime* ancestry as 1.9, less than any other class"—H. Ellis). But *maritime* and *marine* are sometimes used interchangeably, especially in reference to law, insurance, and the like. *Nautical* and *naval*, on the other hand, imply a connection with ships and shipping, and therefore only indirectly with the sea. *Nautical*, however, is the preferred and usual term in any application where its etymological

relationship to sailors or seamen or the sailing of ships or boats is distinctly implied; as, *nautical* pursuits such as yachting; *nautical* skill; a man of *nautical* interests is never satisfied until he owns some sort of sailboat; *nautical* clothes; "No one rows, very few sail...; Brighton...is the least *nautical* of seaside places" (Jefferies). *Nautical* is usually the preferred term when reference to the art or profession of navigation is implied; as, a *nautical* clock; a *nautical* compass; *nautical* tables; *nautical* astronomy; a *nautical* mile. *Naval* (etymologically, pertaining to ships) now usually implies reference to a navy (as distinguished from a merchant marine) as composed not only of ships, but of men, supplies, and armaments; at times, only from the context can a reader be sure whether ship or naval force is referred to; as, *naval* stores; a *naval* architect; a *naval* engagement; the *Naval* Academy at Annapolis; *naval* officers; he belongs to the *naval* reserve.

mariner. *Mariner, sailor, seaman, tar, gob, matlow* (properly *matelot*), *bluejacket, rating* come into comparison as denoting a person engaged in sailing or navigating a vessel. In general use, *mariner* is loosely employed in reference to anyone directly employed in navigation, but in legal use it is the most general of these terms and is applicable to any person, man or woman, whose work in any way contributes to the accomplishment of the vessel's voyage, whether that work be concerned with the vessel's navigation or not; thus, a ship's master, officers, engineers, stewards, and the like, are in this sense *mariners*. *Mariner* is not so common in colloquial use as many of the preceding terms, but it is very common in literary, especially poetic, use; as, "Ye *mariners* of England That guard our native seas" (Campbell). *Sailor* still so strongly retains its original implication of concern with the management of boats (sailboats, yachts, etc.) or ships that are impelled by the action of wind upon sails that it is the preferred term whenever this idea is specifically suggested. However, the term is also applied to any person engaged in the actual navigation of a vessel regardless of the power which drives it. In ordinary use, it applies especially to one who in strict language is called a *seaman*, one of the navigating force (sometimes including, sometimes excluding, officers) employed on a vessel. Both in British and in American use, the term *seaman* alone is not applied to apprentices, for the term suggests skill and craft in operation and guidance of a vessel. In technical British use, however, the word is not used in reference to navigating officers or to pilots. *Tar* is a familiar, often poetic, designation of a sailor; *gob*, chiefly in American, and *matlow*, chiefly in British, use are colloquial designations of a sailor belonging to the navy. Neither of the latter terms is applied to an officer, whether commissioned or noncommissioned. *Bluejacket* is commonly applied to an enlisted man, especially a sailor, in the British or American navy: the term originally referred to the distinguishing uniform of such a seaman. In current use, it is often employed in distinguishing a sailor in the navy from a marine, or as a poetic equivalent of *sailor*. *Rating* is specifically British and is applied to any man in the British navy who holds neither a commission nor a warrant, the term being thus equivalent to the technical phrase *enlisted man* in the United States navy.

marital. *Matrimonial, conjugal, connubial, nuptial, hymeneal.

maritime. *Marine, nautical, naval.

mark, n. 1 *Sign, symptom, note, token, badge.

Ana. *Stigma, brand, blot, stain: criterion, touchstone, gauge, yardstick, *standard: *trace, vestige, track, rack: stamp, print, imprint, impress, *impression.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

2 *Character, symbol, sign, note.

Ana. *Device, contrivance.

marketable. *Vendible, purchasable, salable.

marriage. **Marriage**, **matrimony**, **wedlock**, **wedding**, **nuptials**, **spousal** (or **spousals**), **espousals** (or **espousal**) are not always synonymous nouns but they are closely allied because they all refer directly or indirectly to the act or acts by which a man and woman become husband and wife, or to the state of being husband and wife. **Marriage** is the common term both in literary and colloquial use: it may apply to the rite or ceremony (as, many were present at their *marriage*; a civil *marriage*), but it more often applies to the legal or spiritual relation which is entered upon (as, to be joined in *marriage*; to annul a *marriage*), to the state of being married (as, theirs was a long and happy *marriage*), or to the institution as an abstraction (as, "Nor does he dishonour *marriage* that praises virginity"—*Donne*). In extended use, the term is applicable to any similarly close and intimate union; as, "Let me not to the *marriage* of true minds Admit impediments" (*Shak.*); "the same sort of poetic effect as the Romantics obtained by the *marriage* of fertile words" (*Day Lewis*). **Matrimony** is the preferred term in religious and sometimes in legal use; in the Roman Catholic and the Eastern (including Orthodox and Uniat) churches and in the use of many members of the Anglican Communion, it designates one of the seven sacraments. The term therefore is used with historical correctness in place of *marriage* only when a religious ceremony or sanction is implied; as, to be joined in bonds of holy *matrimony*. In general, the term is applicable to the relationship which exists between husband and wife, and not (although there are literary exceptions) to the ceremony or the state of marriage. "So prays the Church, to consecrate a vow 'The which would endless *matrimony* make'" (*Wordsworth*). **Wedlock**, a term now chiefly in legal or literary use, applies especially to marriage as a legally sanctioned relationship or state; thus, children born out of *wedlock* are children of parents who are not married. "The sacred academy of man's life, Is holy *wedlock* in a happy wife" (*Quarles*). "Grave authors say, and witty poets sing, That honest *wedlock* is a glorious thing" (*Pope*). **Wedding** is the common term both in colloquial and literary use for the ceremony that marks a marriage and the festivities that accompany it; as, a thousand invitations to the *wedding* were sent out. **Nuptials** is a more rhetorical and grandiose term than *wedding*; it also carries a stronger implication of an elaborate religious ceremony. "I don't object to married priests, but I do strongly object to their *nuptials* . . . when a priest like Moxon-Hughes . . . indulges in an immense artistic *wedding*, I feel there is something undignified and almost unpleasant about it" (*C. Mackenzie*). **Spousal**, or more often **spousals**, is an archaic term which stresses the making of the vows of marriage rather than the performance of a ceremony: it is frequently in extended use applied to the mating of birds, beasts, etc.; as, "till the amorous bird of night Sung *spousal*, and bid haste the evening-star" (*Milton*); "with the morrow, the Church blessed the *spousals*" (*Symonds*). **Espousals** (or its somewhat archaic singular **espousal**), as here compared (see also **ENGAGEMENT**, 1), differs little from *spousals* (or *spousal*) except in its extended application. In the latter use it commonly implies a spiritual union, especially one that is dependent upon a vow, or pledge; as, "Let every act of worship be Like our *espousals*, Lord, to thee" (*J. Wesley*).

marrow. *Adipose, suet, tallow, lard.

marshal. *Order, arrange, organize, systematize, methodize.

Ana. Array, range, align, *line.

Con. Derange, disarrange, *disorder, disorganize, unsettle, disturb: *scatter, disperse, dissipate.

martial. **Martial**, **warlike**, **military** come into comparison not as close synonyms but because they carry as their basic meaning belonging to, suitable to, or characteristic of war. **Martial** distinctively implies reference to war in general, and to its essential and fundamental characteristics: it often specifically suggests the pomp and circumstance of war; as, *martial* music; standing in *martial* array; "the keen *martial* temper of the Yamato race" (*Binyon*). **Warlike**, as a rule, implies reference to war as a reality, its actual causes, its actual methods, its actual effects: it, therefore, applies more often to feelings, acts, activities, etc., that lead to or accompany real war, than to those which suggest its thrilling or stirring qualities; thus, a *warlike* temper suggests bellicosity, or readiness to fight to the bitter end, whereas a *martial* temper suggests dauntlessness, spiritedness, and an eagerness for war; so, *warlike* preparations; a *warlike* race; "tales of *warlike* feats" (*Wordsworth*); "Then peals the *warlike* thunder of the drum" (*Scott*). **Military** suggests war as fought by trained armies under the guidance of trained leaders. It often implies the conduct of war on land rather than on sea (being then opposed to *naval*) and suggests clashing forces, strategic movements, and the like: often, however, it refers to war in general, especially as it has been carried on since armaments have been employed; as, a *military* expedition; *military* tactics; "*Military* glory—that attractive rainbow that rises in showers of blood" (*Lincoln*).

Ana. *Belligerent, bellicose, pugnacious: *aggressive, militant: *spirited, high-spirited, mettlesome.

masculine. *Male, virile, manful, manly, manlike, mannish.

Ana. *Vigorous, energetic, lusty, strenuous: robust, *healthy, sound.

Ant. Feminine. — **Con.** Womanly, ladylike, womanlike, womanish, *female.

mask, n. Portrait, photograph, *image, simulacrum, effigy, statue, icon.

mask, v. *Disguise, cloak, dissemble.

Ana. Conceal, *hide, secrete, screen: protect, shield, defend, guard, safeguard.

Con. Discover, divulge, disclose, *reveal: expose, exhibit, display, flaunt, *show.

mass, n. 1 *Bulk, volume.

Ana. *Aggregate, aggregation, conglomerate, conglomeration: *sum, amount, total, aggregate, whole.

2 Heap, pile, stack, shock, cock, bank. See under **HEAP, v.**

Ana. Accumulation, hoarding or hoard, amassment (see corresponding verbs at **ACCUMULATE**).

mass, v. *Heap, pile, stack, shock, cock, bank.

Ana. *Gather, collect, assemble, congregate: *accumulate, amass, hoard: merge, blend, fuse, coalesce (see **MIX**): consolidate, *compact, unify, concentrate.

massacre, n. **Massacre**, **slaughter**, **butchery**, **carnage**, **pogrom** are comparable only when they mean great, or a great and often wanton, killing of human beings. **Massacre** implies promiscuous and wholesale slaying, especially of those who are not prepared to defend themselves and can make little or no resistance; as, the Indian *massacre* of the inhabitants of Deerfield, Mass., in 1704. "The tyrannous and bloody deed is done, The most arch act of piteous *massacre* That ever yet this land was guilty of" (*Shak.*). **Slaughter**, originally and still a butcher's term for the killing of animals used as food, as here compared suggests extensive and ruthless killing.

whether the scene of that killing be a battle, a massacre, a horrible accident, or the like. "The chief...cut his way through the enemy with great slaughter" (*Irving*). **Butchery** adds to slaughter the implication of exceeding cruelty or of cold-blooded indifference to the sufferings of the victims. "Boasting of his fights, his cruelties and his butcheries" (*Kingsley*). "Thus was the butchery waged While the sun clomb Heaven's eastern steep" (*Shelley*). **Carnage** is often not easily distinguishable from slaughter, except that it sometimes carries additional connotations similar to those of massacre, or suggests the heaping up of the bodies of the slain. "A slight resistance was followed by a dreadful carnage" (*Gibbon*). "War and all its deeds of carnage" (*Whitman*). **Pogrom**, a term borrowed from Russian, applies especially to an organized massacre of helpless people, such as those of a race other than the dominant one, carried on usually with the connivance of officials. It is often applied specifically to such a massacre of the Jews, especially in one of the European countries; as, the pogroms at Gomel and Kishinev in Russia in 1903.

Ana. Assassination, murdering or murder, slaying, killing (see corresponding verbs at KILL).

massive. **Massive, massy, bulky, monumental, substantial** are synonyms when they mean impressively large and heavy. **Massive** distinctively stresses solidity and strength of construction and usually implies an imposing appearance; as, "Its ceilings...heavy with massive beams" (*Dickens*); "I am sure that the Lord Mayor is glad to see again its [the Mansion House's] sombre and massive yet welcoming façade when he returns home from any jaunt" (*Lucas*); "a man whose massive shoulders and determined cast of features ought to have convinced him that such an enterprise was nothing short of desperate" (*Shaw*). **Massy**, now a literary word, carries a stronger implication of ponderosity than **massive**, but it still usually also implies solidity and strength. "Your swords are now too massy for your strengths And will not be uplifted" (*Shak.*). "Hast thou a goblet for dark sparkling wine? That goblet right heavy, and massy, and gold?" (*Keats*). **Bulky** stresses size rather than weight, and the excessive amount of space occupied rather than solidity or strength of construction; as, a bulky parcel: nevertheless, the word may still connote these underemphasized qualities; as, a bulky report. **Monumental**, as here compared, also implies greatness of size, but it distinctively suggests an imposing massiveness. "Me, Goddess, bring To archèd walks of twilight groves, And shadows brown... Of pine, or monumental oak" (*Milton*). "The monumental fourpost bed has been taken down" (*Daily Telegraph*). "Miss Dyas was a tall red-haired woman of monumental build" (*E. Wharton*). **Substantial** stresses solidity and strength of construction as much as **massive**, but it carries a weaker implication of size, and a stronger implication of established quality, worth, and stability than of outwardly imposing appearance; it is therefore applied often to persons of wealth (or substance) as well as to structures; as, the most substantial buildings in England today are the old Norman cathedrals; "substantial homes, and substantial relatives of some sort or other, on whom we could fall back" (*Galsworthy*).

Ana. *Heavy, weighty, ponderous: solid, hard, *firm: immense, *enormous, huge, gigantic, colossal.

massy. *Massive, bulky, monumental, substantial.

Ana. Ponderous, hefty, cumbersome, cumbersome, weighty, *heavy: *large, big, great: solid, *firm, hard.

master, n. Captain, *chief, commander, chieftain, head, leader.

masterful. Masterful, domineering, imperious, per-

emptory, imperative are here compared only as they apply to persons, their acts, utterances, demands, and the like, and mean governed by, or manifesting, a strong tendency to impose one's will on another. One is **masterful** who by the strength and virility of his personality is able to enforce his will on others or who deals with affairs commandingly and compellingly; as, "The major was a masterful man; and I knew that he would not give orders for nothing" (*Kipling*); "the man had such a masterful and magnetic personality...that it was impossible not to take fire at his ardour" (*A. Huxley*). One is **domineering** who tries to enforce his will or to make a show of his power by an overbearing or insolently tyrannical manner; as, "[He] was violent, arbitrary, domineering" (*Mrs. H. Ward*); "They are...not courageous, only quarrelsome; not determined, only obstinate; not masterful, only domineering" (*Shaw*); a domineering lady and her abject suitor. One is **imperious** who by temperament or by position is fitted to command or who assumes the air or manner of such a person; the term implies more arrogance than **masterful** and less insolence than **domineering**; as, "this ancient despot—this imperious old Louis XIV in a black front and a cap and ribbon" (*Thackeray*); "One could not have passed him on the street without feeling his great physical force and his imperious will" (*Cather*). One is **peremptory** who insists, often with curtness, on an immediate response to his commands; the term usually implies authoritativeness and a refusal to brook disobedience or delay or to entertain any objections however valid; as, the general issued a peremptory summons; "Candles...borrowed in a rather peremptory manner of Monsieur Gabelle" (*Dickens*); "two peremptory raps at the door" (*Shaw*). "When we say of...a man that he has a great deal of character, we generally mean that he has disciplined his temperament, his disposition, into strict obedience to the behests of duty; that he has clear and peremptory ideas about right and wrong" (*Brownell*). One is **imperative** who is peremptory, or whose actions or words are peremptory, owing to the urgency of the situation rather than because of one's temperament; as, "'Go back!' cried the old man, with an imperative jerk of the head" (*M. Wilkins*); "the doctor had imperatively commanded rest" (*Ben- nelt*).

Ana. Magisterial, magistral, *dictatorial, authoritarian, authoritative, oracular, dogmatic, doctrinaire: arbitrary, *absolute, despotic, tyrannical.

☞ Do not confuse masterful with masterly.

match, v. **Match, rival, equal, approach, touch** are often used interchangeably, especially in negative constructions, when they mean to come up to, or nearly up to, the level or standard of something else. One thing **matches** another when it proves to be its mate (rather than its duplicate) in power, strength, beauty, interest, or the like; as, it has been said that no language can match French in expressing ideas with clarity and exactness; "the beauty of his person was matched by the grace and dignity of his spirit" (*Buchan*). "No mortal builder's most rare device Could match this winter palace of ice" (*J. R. Lowell*). One thing **rivals** another when it closely competes with it for superiority or in excellence. "But would you sing, and rival Orpheus' strain, The wond'ring forests soon should dance again" (*Pope*). "Work of a beauty certainly not rivalled until we come to the Norman builders" (*Quiller-Couch*). One thing **equals** another when it rises to the same level or plane, as in quantity, value, degree, or the like, and there is no question concerning a difference, especially a deficiency. "Such a striking civility...ought to be imitated, though it could not be equalled, by some exertion of politeness on their

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

side" (*Austen*). "No other measure of our work equals the sight of the product put to its full uses" (*H. Suzzallo*). One thing **approaches** another when it comes so close to it that it nearly equals or matches it, and the difference, though apparent, is not important. "An adult reader with trained habits of . . . concentration will absorb the contents of a book with a speed and retentiveness which no child can *approach*" (*C. W. Eliot*). "An unlettered speaker may startle you with his power of giving to the spoken word an urgent aptness that *approaches* the vivid instancy of an involuntary cry" (*C. E. Montague*). One thing **touches** another thing when the former approaches the very high plane or level reached by the latter; as, "not another woman there to *touch* her" (*W. J. Locke*). "Yeats, the last in the aristocratic tradition of poets. . . none of us can *touch* his later work. . . He stands, a lesson to us in integrity, demanding from us a complete subjection to the poetry that occupies us" (*Day Lewis*). **Ana.** Correspond, harmonize, *agree, conform, square, accord.

Con. Differ from, *differ with: vary, *change, alter, modify.

matelot. Variant of MATLOW.

material, adj. 1 **Material, physical, corporeal, phenomenal, sensible, objective** are here compared as meaning belonging to, or having a relation to things that belong to, the world of actuality or of things apparent to the senses. **Material** applies to anything that is formed of matter or that relates to things formed of matter: it often implies an opposition to *spiritual*, but it may imply an antithesis to *ideal, formal* (i.e., of or pertaining to form as distinguished from matter), *intangible, impalpable*, and the like; as, *material objects*; one's *material possessions*; to believe in no other world than the *material world*; "busy with *material affairs*" (*Conrad*); "an appetite for *material pleasures*" (*A. C. Benson*). "The society of Shakespeare and Raleigh and Sir Philip Sydney. . . would not console them [modern men] for the absence of bath-rooms. . . motor-cars, and other *material comforts* of which that age was ignorant" (*B. Russell*). "These poor Christians are not thrifty like our country people at home [France]; they have no veneration for property, no sense of *material values*" (*Cather*). **Physical** (as here compared: see also **BODILY**) differs from *material* chiefly in suggesting an opposition to *psychical, mental, metaphysical, imaginary*, and, less often, *spiritual*: it applies especially to things perceived by the senses or capable of being dealt with in the same manner as objects of sense, and it usually implies a contrast to things knowable only through thought or intuition or built up by the mind or imagination; thus, the *material objects* and the *physical objects* within one's reach may be exactly the same objects, but *material* suggests their substantial nature and *physical* suggests their susceptibility of perception and identification, or, what is more important in science, of being weighed, measured, or the like. In scientific use, *physical* is also applicable to things which are not objects, but forces, actions, motions, etc., which are operative in nature or in mechanics and which can be measured or calculated, or put to use, even though, strictly speaking, they cannot be handled; as, the *physical properties of light*; the *physical effect of radiation*; a *physical explanation of a miracle*; "Everything *physical* is measurable by weight, motion, and resistance" (*De Quincey*). "With the advent of Einstein's relativity theory it was necessary for the first time to recognize that the *physical world* differed from the ideal [i.e., mentally constructed] world conceived in terms of everyday experience" (*transl. from W. Heisenberg*). **Corporeal** (as here compared: see also **BODILY**) applies

to that which not only has physical existence but also is tangible or can be described as a body; thus, energy in itself has no *corporeal* existence though it is a *physical* power found usually in *corporeal* things. "In a monistic . . . sense 'the mind' may be regarded as a living, growing 'structure,' even though it lacks *corporeal tangibility*" (*Science*). **Phenomenal** implies a relation to that which is known or knowable through the senses and experience, as distinguished from that which is knowable only through thought or intuition because it is beyond perception by the senses: the term is chiefly used in philosophy and science when there is an intent to mark the line between that which is actually perceived and that which has been ascertained by the reason, has been accepted by faith, or is theoretical, hypothetical, or the like; as, *phenomenal reality* is often specifically called *actuality*. "Phenomenal nature is reduced to an array of events in the four-dimensional continuum" (*Jean*). **Sensible**, the psychologist's, and often the layman's, term for that which is known or knowable through sense experience, is sometimes opposed to *intelligible* (i.e., knowable through mental processes): it is therefore a general term comprehending *visible, audible, tangible, palpable*, and the like; as, there is no *sensible movement* of the earth; to claim *sensible evidence* of the immortality of the soul. "Is this a dagger which I see before me, The handle toward my hand? Come, let me clutch thee . . . Art thou not. . . *sensible* To feeling as to sight? or art thou but A dagger of the mind, a false creation" (*Shak.*). **Objective** implies the same kind of existence as *phenomenal* and *sensible*, but it stresses the apartness of the thing known through the senses from the person who perceives it through his senses: the term, therefore, implies not only material existence but an existence which exactly corresponds to the image in the mind of the perceiver; as, "The ancient Hebrew . . . saw the rainbow as an *objective structure* set in the heavens for all men to behold" (*Jean*); "acosmism, the theory which denies the *objective existence* of the world or universe" (*Inge*). **Ana.** *Carnal, fleshly, sensual, animal, animalistic: actual, true, *real: tangible, *perceptible, appreciable, palpable.

Ant. Immaterial.

2 *Relevant, germane, pertinent, apposite, applicable, apropos.

Ana. Important, significant, consequential, momentous (see corresponding nouns at **IMPORTANCE**): vital, cardinal, *essential, fundamental.

Ant. Immaterial.

materialize. Externalize, objectify, substantiate, incarnate, embody, actualize, *realize, hypostatize, reify. **matériel or material.** *Equipment, apparatus, machinery, paraphernalia, outfit, tackle, gear.

maternal. Motherly, *parental, paternal, fatherly.

matlow or matelot. *Mariner, sailor, seaman, tar, gob, bluejacket, rating.

matrimonial. **Matrimonial, marital, conjugal, con-nubial, nuptial, hymeneal** agree in meaning of, relating to, or characteristic of marriage. **Matrimonial** is the most general term applicable to that which has to do both with matrimony and with marriage in any of its senses (see **MARRIAGE**); as, *matrimonial vows*; *matrimonial advances*; the *matrimonial state*; *matrimonial rites*; *matrimonial bliss*. **Marital**, though in strict use it implies reference to the husband and his part in marriage (as, *marital rights*; *marital authority*), is often used interchangeably with *matrimonial* (as, *marital vows*; the *marital relationship*; *marital bliss*). **Conjugal** and **con-nubial** are frequently used interchangeably. More strictly, **conjugal** connotes reference to the persons who

are married (as, "They flaunt their *conjugal* felicity in one's face"—*Wilde*; "I count it my good fortune that never once in . . . my childhood was I the witness of any *conjugal* jar"—*H. Ellis*); *connubial* implies reference to the marriage state (as, "Of my friends who have been least successful in *connubial* contracts"—*Johnson*; to enter the *connubial* state). *Nuptial* has primary reference to the marriage rites or ceremony; as, "the *nuptial* torch" (*Milton*); an *antenuptial* contract. *Hymeneal* (etymologically, relating to marriage or its god Hymen) is a purely poetic or literary word, suggestive of the splendors of marriage rites and festivities; as, *hymeneal* songs or hymns; "Chorus *Hymeneal*, Or triumphal chaunt, Matched with thine would be all But an empty vaunt" (*Shelley*).

matrimony. *Marriage, wedlock, wedding, nuptials, spousal, espousals.

matter. 1 *Affair, business, concern, thing.

2 *Subject, subject matter, argument, topic, text, theme, motive, leitmotiv.

matter-of-fact. *Prosaic, prosy.

Ana. Stolid, phlegmatic, *impassive: arid, *dry: *downright, forthright.

Con. Fanciful, *imaginary, fantastic, chimerical, quixotic, visionary: ideal, transcendent, transcendental (see *ABSTRACT*, *adj.*): romantic, *sentimental.

mature, adj. *Mature*, *matured*, *ripe*, *mellow*, *adult*, *grown-up*, *full-fledged* are terms that are not often interchangeable, yet are comparable because they bear the same underlying meaning, "fully developed." *Mature*, in its literal use as applied to living things, stresses the completion of development; as applied specifically to persons, sometimes it (or especially its derivative *maturity*) connotes simply the full development of the sexual organs; more often, however, it implies attainment of the prime of life, when the person is at the height of his powers, physically and mentally. "A great writer of the past is known by the delight and stimulus which he gives to *mature* spirits in the present" (*Van W. Brooks*). As applied to things, *mature* usually equals *matured*, which implies the completion of a course, process, or period; thus, a *matured* plan is a fully thought-out plan; a *matured* wine is one that has been allowed to age properly; a *matured* note is one that has reached the date when payment is due. *Ripe*, though it implies maturity, stresses readiness for use or enjoyment; in its literal sense, it is applied chiefly to fruits ready for eating, to grains or vegetables ready for harvesting, to seeds ready for planting. Figuratively, it often connotes merely readiness, or fully preparedness for action, activity, or use. "*Ripe* for exploits and mighty enterprises" (*Shak.*). "To be careful, in teaching history, not to obtrude aspects which are interesting to us until the child is *ripe* for them" (*B. Russell*). Sometimes, however, *ripe* connotes one or more of the characteristics of ripe things, especially ripe fruits, such as ruddiness, plumpness, richness. "His *ripe* cheeks" (*Quiller-Couch*). "Greek sculpture, in its *ripe* perfection" (*Binyon*). *Mellow* stresses either the agreeable qualities associated with ripe or slightly overripe fruits, such as softness, tenderness, sweetness, or the loss of their opposites, the signs of immaturity, hardness, harshness, or bitterness; as, a *mellow* cheese; a *mellow* wine. "The more *mellow* and cheerful outlook of his [Horace's] second book [of satires]" (*Buchan*). The last three words are applied chiefly to persons, their acts, minds, etc., and only by extension to inanimate things. *Adult* is the equivalent of *mature* in its merely physical implications and in its reference to animals; it presupposes, however, a clear line of demarcation, especially when used of human beings. An *adult*

person physiologically is one that has passed beyond adolescence; in law, he is one that has attained full age, or his majority. In extended use, *adult* implies the attainment of that point in development where the weaknesses of immaturity or of imperfection are surmounted. "The difference [between Romanticism and Classicism] seems to me rather the difference between the complete and the fragmentary, the *adult* and the immature, the orderly and the chaotic" (*T. S. Eliot*). *Grown-up*, a colloquial equivalent of *adult*, is sometimes used in preference to it when an antithesis to *childish* is needed; as, adults incapable of *grown-up* behavior. *Full-fledged*, literally applied only to birds that can fly freely because of fully developed wings, in its figurative application to persons retains its implication of being enabled, as by training, experience, etc., to go ahead independently in a particular line of work; as, a *full-fledged* lawyer or physician.

Ant. Immature: childish. — **Con.** *Childlike: *youthful, juvenile, boyish, puerile, maiden.

mature, v. *Mature*, *develop*, *ripen*, *age* come into comparison when they are used in reference to living, growing things or to anything with latent capacity for betterment, and mean to come or cause to come to the state of being fit for use, enjoyment, or the like. When employed with reference to living things or their specific characters, *mature* stresses fullness of growth and readiness for normal functioning; as, in warm climates human beings *mature* more rapidly than in cold climates: *develop* stresses the unfolding of all that is latent and the attainment of the perfection that is appropriate to the species or is possible to the individual; as, "the kitten's hunting instinct was not yet *developed*" (*B. Russell*); *ripen* emphasizes the approach to or the attainment of the peak of perfection; as, the fruits are now sufficiently *ripened*: *age* equals *mature* only when it is applied to the young; as, hard work *ages* a boy; more often, it implies approach to the period of decline or decay; as, the leaders of the movement are *aging* rapidly.

In their secondary senses, one *matures* that which is incomplete, imperfect, or not fully formed; as, to *mature* a plan; "an art that toiling ages have but just *matured*" (*Cowper*): one *develops* that which is potential, dormant, latent, nebulous, or the like, as by bringing it into being, into effect, into operation, or into open view; as, "the environment fitted to *develop* . . . a genius at once so subtle and so humane as that of Socrates" (*G. L. Dickinson*); "the sense of fact is something very slow to *develop*" (*T. S. Eliot*): one *ripens* that which is susceptible of improvement, enrichment, or enhancement if given time or subjected to influences favorable to its development; as, to *ripen* cheese by allowing it to stand or by processing it; friendship often *ripens* into love; "[minds that] have not leisure to grow wise . . . cannot *ripen* properly" (*S. M. Crothers*): one *ages* that which in its fresh or new state lacks a quality or qualities that fit it for use or enjoyment; as, to *age* wine by keeping it in storage; to *age* game by allowing it to hang for a period; to *age* Oriental rugs by subjecting them to hard usage.

Ana. *Harden, inure, season, acclimatize, acclimate: *habituate, accustom, familiarize, addict.

matured. *Mature, ripe, mellow, adult, grown-up, full-fledged.

Ana. Completed, finished (see *CLOSE*, *v.*): *deliberate, considered, advised, designed, studied, premeditated.

Ant. Unmatured: premature. — **Con.** Crude, green, callow, *rude, rough, raw: *youthful, juvenile, puerile, boyish: childish, *childlike.

maudlin. Mawkish, *sentimental, romantic, soppy, mushy, slushy.

Ana. Confused, muddled, fuddled, addled, bemuddled,

befuddled (see CONFUSE): embarrassed, rattled, fazed, discomfited, disconcerted (see EMBARRASS).

mawkish. Maudlin, *sentimental, romantic, soppy, mushy, slushy.

Ana. Flat, vapid, jejune, *insipid, banal, inane.

maxim. *Saying, saw, adage, proverb, motto, epigram, aphorism, apothegm.

may. *Can.

maze. *Labyrinth.

meager or meagre. **Meager** (or **meagre**), **scanty**, **scant**, **skimpy**, **scrimpy**, **exiguous**, **sparse**, **spare** come into comparison as meaning so small as in amount, number, or size as to fall short of what is normal, necessary, or desirable. **Meager** stresses thinness: as applied to persons or animals, it suggests emaciation (as, "strange straining eyes, and meagre form"—G. Eliot; "The meagre condition of his horse"—Scott), but as applied to things in general, it implies the absence of elements, qualities, or numbers necessary to a thing's richness, substance, potency, or the like; as, a meager diet; "a simplicity of diction which reflects a meagre and barren stock [of words]" (Lowes); "The magazines, like the newspapers, were liberal with their space, but again the results were terribly meagre" (V. Heiser). "An outline in itself is meagre, truly, but it does not necessarily suggest a meagre thing" (W. James). **Scanty** emphasizes insufficiency in amount, quantity, extent, or the like; as, a scanty supply of food for the winter; "The book... is not, like some biographical essays with scanty material, stuffed out with appreciation and conjecture" (T. S. Eliot). "Such a scanty portion of light was admitted... that it was difficult, on first coming in, to see anything" (Dickens). **Scant** differs from **scanty** in suggesting a falling short, as in amount or quantity, of that which is desired or is desirable rather than in that which is necessary or essential; as, "the work of those hours was miserably scant" (Hardy); "they were held in scant esteem" (Grandgent); "scant foliage" (Cather). **Skimpy** and **scrimpy**, both colloquial words, imply niggardliness as the reason for a thing's insufficiency in size, amount, numbers, or the like, but **skimpy** suggests stinginess that robs a thing of its proper measure, size, or amount (as, **skimpy** curtains; a **skimpy** allowance), and **scrimpy** usually connotes an enforced thrift or the influence of meager resources (as, their meals are pretty **scrimpy** these days; **scrimpy** portions of food). **Exiguous** stresses a smallness in size, amount, extent, capacity, or the like, that is more or less inherent in the thing under consideration and makes it compare unfavorably with other things of its kind; as, "brains too **exiguous** to hold more than half an idea at a time" (Amer. Speech); "building ships to supplement his **exiguous** navy" (Buchan); "a much larger dominion than the **exiguous** Dalriada" (Times Lit. Sup.). **Spare** (as here compared: see also LEAN, SUPERFLUOUS) implies merely a falling short of that which is sufficient: unlike **scanty** and **meager**, it seldom suggests resulting loss or hardship; as, "the powerful frame attenuated by **spare** living" (Dickens); **spare** vegetation; a **spare** diet. In the phrase "**spareribs** (of pork)" the term suggests meagerness of meat: the phrase applies therefore to ribs trimmed of most of their meat. **Sparse** stresses a lack of normal or desirable thickness or density: the term may or may not suggest insufficiency or inadequacy in numbers or in quantity, but it always connotes a thin scattering of the units; as, the **sparse** population of the mountainous district; "**sparse** grey locks" (Conrad); "the sound of their **sparse** talk and laughter... was blown over the walls to the ears of Harbinger" (Galsworthy). "Now and then she scattered, with regretful **spareness**, some seeds and crumbs from her **parcel**" (M. Wilkins).

Ana. analogous words.

Ant. antonyms.

Con. contrasted words.

See also explanatory notes facing page 1.

Ana. *Thin, slender, slim, slight, tenuous, rare: thinned, attenuated, extenuated, diluted (see THIN, v.): jejune, flat, *insipid, inane: penurious, *stingy, parsimonious.

Ant. Ample: copious.

mean, v. 1 *Intend, design, propose, purpose.

Ana. Wish, want, *desire: *aim, aspire, pant.

2 Mean, denote, signify, import are synonymous terms when used in the sense of to convey to the mind a definite idea or interpretation. Not only words or phrases can be said to **mean**, **denote**, **signify**, or **import** something, but also anything which admits of interpretation or of being intellectually appraised, such as a poem or an essay or an act of Congress, or such as the behavior of one person to another, or a set of circumstances. These words are commonly employed without distinction, but precision in their use is often possible and desirable. In their general applications (excluding for the moment their reference to words and phrases), **mean** is the most common; it is often far more expressive or poignant than the others when used to connote not only interpretation but also evaluation or appraisal. "That old vague hurt of discovery that he had never meant so much to David as David to him" (M. Austin). "He can have no idea of what it means to be the daughter of Mr. de Barral" (Conrad). **Denote**, in its widest application, is distinguished from the others by its taking for its subject things that serve as outward marks or visible indications; **signify**, by its taking for its subject things of a symbolic or representative character; as, his somber expression denoted (better than signified) a worried mind; the scales in the hands of the figure of Justice signify impartiality; the Eucharistic rite signifies one thing to Protestants and another to Catholics. **Signify** often suggests distinctiveness or importance; as, events which signify little at the time of occurrence often attain significance when the history of that period is written; does it signify nothing to you that your father has failed in health recently? **Import** frequently conveys its etymological implication of carrying in, i.e., in this sense, into the mind (as, new ideas import little to those not intellectually fitted to receive them), but it frequently comes close to signify (as, "What this imported I could ill divine"—Wordsworth).

In their special use in reference to the interpretation of the content of a term, these words are not always distinguishable. **Mean**, however, is capable of implying reference to the term's full content, that is, to the idea or relation between ideas which it conveys to the mind and the suggestions which it evokes; as, only a philosophically minded person can grasp what "beauty" and "truth" mean in Keats's lines "Beauty is truth, truth beauty,"—that is all Ye know on earth, and all ye need to know." **Signify** can, as **mean** cannot, suggest symbolic relationship between the term and the idea it conveys; as, the phrase "bread and butter" signifies the material needs of life. **Denote** (see also DENOTE, 2) is even more technical, for it implies a logical definition in which the idea named or expressed by a term is clearly marked out and its application or range of application accurately determined; as, "decoration" denotes one of three ideas, the act of adorning, or a thing used in adorning, or the results achieved by one who adorns. **Import**, though used with decreasing frequency in relation to terms, is precise in its implications. A term imports not what it denotes, or bears as a definition, but any or all of the implications involved in its interpretation. "Does it [the word 'necessary'] always import an absolute physical necessity...?" (Ch. Just. Marshall).

Ana. *Carry, convey, bear, transmit: *denote, connote:

define, assign, *prescribe: *suggest, imply, intimate, hint.

mean, adj.¹ **Mean, ignoble, abject, sordid** come into comparison when applied to persons, their behavior, or the conditions in which they live. All then mean so low as to be out of keeping with human dignity or just standards of human life or character. *Mean* and *ignoble* originally implied low birth, the former being applied to persons of the lowest social classes, the latter to persons below the rank of nobles. **Mean** usually suggests repellent antisocial characteristics, such as malevolence or cupidity. It almost invariably connotes small-mindedness. "Those who are tempted by the flesh have usually nothing to fear from avarice or the *meaner* vices. Those who spend their lives battling against *meanness* in any form are usually immune to the flesh" (C. Mackenzie). Often *mean* implies conduct or an attitude that is detestable and unworthy of a human being. "Delane... flung him off like a thing too *mean* for human handling" (E. Wharton). **Ignoble**, like its opposite *noble*, now usually implies qualities of mind or soul. It frequently comes close to *mean*, except that it seldom connotes small-mindedness. Its distinguishing implication is loss or lack of some essential high quality, such as spiritual elevation, moral dignity, or intellectual excellence. "Die to the little hatreds; die to greed; Die to the old *ignoble* selves we knew" (A. Noyes). "...to see how those he has converted distort and debase and make *ignoble* parodies of his teaching" (A. Huxley). **Abject**, in its most inclusive sense, means little more than extremely low in station or in degree; as, *abject* persons; an *abject* sinner; occasionally, it is merely an intensive applied to something that is itself low in the scale; as, *abject* poverty. In careful use, however, *abject* retains its etymological implications of being cast down and so variously implies abasement, debasement, or, more narrowly, contemptible servility. "Disgrace not so your king. That he should be so *abject*, base, and poor. To choose for wealth and not for perfect love" (Shak.). "Resolved to be a man Who... would live No longer in subjection to the past With *abject* mind" (Wordsworth). "How excessively and *abjectly* he [the painter Haydon] enjoys his week-end with Lord Egremont at Petworth!" (A. Huxley). **Sordid**, which originally connoted foulness and squalor, now more often suggests repellent dullness or drabness or degrading drudgery. "The slovenly, *sordid* aspect of the towns and country-side" (Cather). "The Greek ideal... postulated... a competence to secure him against *sordid* cares" (G. L. Dickinson).

Ana. *Base, low, vile: *contemptible, despicable, sorry, scurvy, cheap, beggarly, pitiable.

mean, adj.² Average, median, par. See AVERAGE, *n*.

Ant. Extreme.

mean, *n*. 1 *Average, median, norm, par.

2 In plural form **means**. **Means, instrument, instrumentality, agent, agency, medium, organ, vehicle, channel** agree in denoting a person or thing through or by which work is performed or an end is effected. **Means** (construed as either plural or singular) is the most general of these words; it may be applied not only to persons and to concrete things such as implements, tools, and machines, but also to their actions or operations; it may also be applied to methods, policies, devices, and the like; as, to find ways and *means* to attain one's ambitions; the *means* does not justify the end. "The habit of regarding the labouring class as a mere *means* to the maintenance of the rest" (G. L. Dickinson). "The *means* that a portrait-painter should employ to indicate the inner nature and the circumstances of his sitter" (Binyon). **Instrument** is commonly applied to persons who

merely carry out another's will or intention, often as tools, sometimes as dupes. "He... turned on me... suspecting perhaps that I only wished to make an *instrument* of him" (Hudson). "If they [judges] were to be used as the *instruments*, and the knowing *instruments*, for violating what they swear to support" (Ch. Just. Marshall). When applied to concrete things, *instrument* often derives connotations from its musical sense, such as susceptibility to manipulation, responsiveness to touch or use, etc. "He knew his brain was now a very uncertain *instrument*, sometimes quite good, sometimes a weary fount of half-formed ideas" (H. G. Wells). **Instrumentality** is interchangeable with *means* but not with *instrument* because its chief implication is effective action by, or effective use of, the instrument; as, through the *instrumentality* of the police he was able to locate his relatives; without the *instrumentality* of a free press liberty could not be preserved. **Agent** is applied chiefly to persons and only by extension to things. Originally meaning one who acts or does (still found in certain phrases such as a *free agent*, *agent noun*), the term now names (when applied to a person) the one who does the work as distinguished from the one who wills, plans, lays down the law, etc. "I often think, Jean, how you were an unconscious *agent* in the hands of Providence when you recalled me from Tucson" (Cather). "Ultimately these tattooed devils [the Kalingas]... were turned into effective *agents* for the maintenance of law and order" (V. Heiser). When applied to a thing, *agent* names that which effects a desired result or serves as a cause producing a definite effect; as, the cooling *agent* in making ice cream is a mixture of ice and rock salt. **Agency**, like *instrumentality*, is not interchangeable in good use with its allied noun, for it names the activity or operation of the agent or of something used to produce an effect. It is distinguished from *instrumentality* by its implication of causative (as opposed to effective) activity; as, some communicable diseases are transmitted only through the *agency* of vermin, insects, and the like. "Presumptuous thoughts that would assign Mechanic laws to *agency* divine" (Wordsworth). **Medium** is far more often applied to things than to persons; it designates anything (usually a substance or material) through which something, usually something intangible, is conveyed from one person or thing to another or given objective form; as, air is the *medium* through which sound and light waves are transmitted; language is the *medium* through which a person communicates his thoughts and feelings; the sculptor's *medium* may be bronze, marble, or other material. An *organ* is a medium that serves as a mouthpiece or spokesman; as, the two newspapers are *organs* of the Republican party. A *vehicle* is a medium that serves to carry (esp. to carry effectively) that which is to be revealed through it; as, the play was an excellent *vehicle* for the genius of Booth. "We must find a new form of verse which shall be as satisfactory a *vehicle* for us as blank verse was for the Elizabethans" (T. S. Eliot). A *channel* is a medium that provides either an outlet or a fixed course through which something may flow from one to another; as, the sacraments in Christian doctrine are *channels* of grace; to find the proper *channel* for the distribution of a fund for charity.

Ana. *Method, mode, manner, way, fashion, system: machinery, apparatus, *equipment, paraphernalia.

3 In plural form **means**. Resources, assets, effects, *possessions, belongings.

Ana. *Money, cash, currency: riches, wealthiness, affluence, opulence (see corresponding adjectives at RICH).

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

meander. Stray, roam, ramble, *wander, rove, range, prowl, gad, gallivant, traipse.

meaning. **Meaning, sense, acceptation, signification, significance, import** come into comparison when they denote the idea which a word, a passage, a facial expression, an action, situation, or the like, conveys to the mind or, less often, is intended to convey to the mind. **Meaning**, the general term, may be used interchangeably with any other of the terms here considered; it is not only applicable to language and to expressions or gestures but also to symbols, works of art, or other things that require interpretation; as, a dictionary gives the *meanings* of words; "if 'human' and the words formed from it can have an exact *meaning*... that *meaning* must refer to those qualities, characteristics, and powers which distinguish the human being" (*J. W. Krutch*). "Understand a plain man in his plain *meaning*" (*Shak.*). **Sense**, as here compared, denotes either the meaning or, more often, one of the specific or particular meanings, of a word or phrase, or sometimes of an allegory (as, some words have as many as twenty-five *senses*; the literal and figurative *senses* of *Pilgrim's Progress*; "Virtue, in the noble *sense* by Greeks and Romans understood"—*Swift*), or, more abstractly, intelligible or apprehensible meaning (as, "[She] speaks things... That carry but half *sense*"—*Shak.*; "In the first authentic edition... the words, I believe, ran, 'and a table of green fields,' which has no *sense*"—*Newman*). **Acceptation** (see also **ACCEPTANCE**) differs from *sense* (as denoting a meaning of a term) chiefly in its stress upon the actual use of that sense or upon its acceptance by a large number of writers and speakers; as, "It is necessary first, to consider the different *acceptations* of the word Knowledge" (*Locke*); "[Philosophy] in its common... *acceptation*... signifies, the search after wisdom" (*Fielding*). **Signification and significance**, as here compared (see *signify* under **MEAN**, *v.*, 2; *significance* under **IMPORTANCE**), are often used interchangeably in spite of the fact that they are carefully differentiated in their meanings. **Signification** (a noun derived ultimately from the same stem as *signify*) applies specifically to the established meaning of a term, a symbol, a character, or the like, or to an established *sense* of a word: it usually implies that when this term, or this symbol, or this character is used that such and such an idea is evoked in the mind of informed persons; as, the *significations* of the characters which serve as Roman numerals; to know the *signification* of each type of halo; a book alleged to give the *significations* of dreams; "I find it very... interesting to know the *signification* of names, and had written to ask him whether Jerusalem meant 'the vision of peace' or 'the foundation of peace'" (*Arnold*). "The counsel for the appellee would limit it [the term 'commerce'] to traffic, to buying and selling, or the interchange of commodities, and do not admit that it comprehends navigation. This would restrict a general term, applicable to many objects, to one of its *significations*" (*Ch. Just. Marshall*). **Significance**, on the other hand, applies specifically to the covert, as distinguished from the established or the ostensible, meaning of something: it may from its other sense (see **IMPORTANCE**) carry a connotation of weight or moment (a connotation now rarely, if ever, found in *signification*); as, his language is so grandiose that one wonders if his speeches have any *significance*; no one knows for a certainty the *significance* of some early Christian symbols. "For the mathematically illiterate, like myself, these things [Kelvin's demonstrations] are... mere scribbles, without *significance*" (*A. Huxley*). "Explaining all the minute happenings of the ranch... as though each of them had a special joyous *significance*"

(*M. Austin*). **Import** (see also **IMPORTANCE**), like *significance*, may imply momentousness, but in contrast with that term, and like *signification*, it denotes the idea or the impression conveyed or to be conveyed to the mind by the medium of words, passages, or the like; as, "the plain *import* of the words [of the Constitution] seems to be, that in one class of cases its [the Supreme Court's] jurisdiction is original, and not appellate; in the other it is appellate, and not original" (*Ch. Just. Marshall*); "[He] spoke words in her ear that had an awful *import* to her" (*Meredith*); "Kim gathered the *import* of the next few sentences" (*Kipling*).

Ana. Suggestion, implication, intimation, hinting or hint (see corresponding verbs at **SUGGEST**): denotation, connotation (see under **DENOTE**).

meaningful. Significant, pregnant, sententious, *expressive, eloquent.

Ana. Important, consequential, momentous, weighty (see corresponding nouns at **IMPORTANCE**).

Ant. Meaningless.

measly. Paltry, trifling, trivial, puny, *petty, picayunish, picayune.

Ana. *Contemptible, despicable, sorry, scurvy, cheap, beggarly: *stingy, parsimonious, penurious, miserly, curmudgeonly.

mechanic. Workman, workingman, artisan, *worker, operative, hand, laborer, craftsman, handicraftsman, roustabout.

mechanical. Automatic, instinctive, impulsive, *spontaneous.

Ana. Stereotyped, hackneyed, *trite: dull, *stupid, dense, crass, dumb.

Con. Vital, cardinal, *essential, fundamental: *spirited, high-spirited, mettlesome, fiery, spunky, gingery.

meddle. **Meddle, interfere, intermeddle, tamper** come into comparison when they mean to busy or concern oneself with someone or something officiously, impertinently, or the like. One *meddles with* or *in* that which is not one's concern or which is strictly the affair or the responsibility of another or of others: the term usually suggests the interposition of oneself without right or without permission or authorization; as, "It would be better if government *meddled* no farther with trade than to protect it" (*Franklin*); "His enemies accused him... of... *meddling* in matters which did not belong to him" (*Newman*); "it is inexpedient to *meddle* with questions of state in a land where men are highly paid to work them out for you" (*Kipling*). One, or sometimes one's act, *interferes* (see also **INTERPOSE**, 2) *with* someone or something or *in* something when one meddles (intentionally or unintentionally) in such a way as to hinder, frustrate, molest, or otherwise affect seriously and, usually, injuriously; as, to *interfere* in a dispute; "a physician... is not *interfering* with nature, any more than an architect is *interfering* with nature when he directs the building of a house" (*Karl K. Darrow*). One *inter-meddles with* or *in* something when one meddles impertinently and officiously and in such a way as to interfere; as, "The board of control had no right whatsoever to *intermeddle* in the business" (*Burke*). One *tampers with* someone or something when one seeks to make unwarranted alterations, to perform meddlesome experiments, or otherwise to exert an improper influence: the term may or may not suggest corruption or clandestine operation; as, "Provided, the farmer said, nobody had been *tampering* with any of his witnesses" (*Meredith*); "the door had not been *tampered with*" (*Wilde*); "Money and sex are forces too unruly for our reason; they can only be controlled by taboos with which we *tamper* at our peril" (*L. P. Smith*).

Ana. *Intrude, obtrude, interlope, butt in: *interpose, interfere, intervene: molest, discommode, incommode, trouble, *inconvenience.

meddlesome. *Impertinent, intrusive, obtrusive, officious, pragmatical.

Ana. Interfering, meddling, intermeddling, tampering (see MEDDLK): prying, snoop, nosy, inquisitive, *curious.

median, adj. Average, mean, par. See under AVERAGE, *n.*

median, *n.* *Average, mean, norm, par.

mediate. Intercede, intervene, *interpose, interfere.

Ana. Arbitrate, *judge, adjudge, adjudicate: conciliate, propitiate (see PACIFY): reconcile, accommodate, *adapt.

medicament. Medicine, *remedy, cure, specific, physic.

medicinal, *n.* *Drug, pharmaceutical, biological, simple.

medicine. *Remedy, cure, medicament, specific, physic.

mediocre. *Medium, middling, second-rate, moderate, average, fair, indifferent.

Ana. Poor, wrong, *bad: *common, ordinary, vulgar.

meditate. *Ponder, muse, ruminate.

Ana. Contemplate, *consider, study, weigh, revolve: reflect, reason, speculate, deliberate, *think, cogitate: examine, inspect, *scrutinize.

meditative. Contemplative, speculative, *thoughtful, reflective, pensive.

Ana. Pondering, musing, ruminating (see PONDER).

medium, *n.* *Means, instrument, instrumentality, agent, agency, organ, vehicle, channel.

medium, *adj.* Medium, middling, mediocre, second-rate, moderate, average, fair, indifferent agree in meaning midway, or about midway, between the extremes of a scale of measurement or evaluation. **Medium** usually presupposes use of a scale of measurement or gradation; it may be an instrument such as a meter or gauge, or it may be a mental power of measuring or gauging attained by experience; as, a boy of *medium* height; a book of *medium* size; a *medium* grade of motor oil; a *medium* gray. **Middling** is seldom used when accurate measurement or gradation is implied; it is employed chiefly in estimations of quality, rank, value, or the like, to describe that which is as far removed from the worst or lowest as it is from the best or highest. Although the word has a colloquial flavor and is much used in noncommittal remarks (as, "How is your health?" "Just *middling*, thank you"), good writers often employ it when they wish to describe something as failing to measure up to the best or the first rate yet not meriting disapproval or rejection. "Longinus...has judiciously preferred the sublime genius that sometimes errs, to the *middling* or indifferent one which makes few faults but seldom or never rises to any excellence" (*Dryden*). "Both of the writers lauded highly...contemporaries who were certainly no better than *middling* performers in their several arts" (*C. E. Montague*). In commercial use, *middling* sometimes occurs as a designation for the second of three grades or as a description of quality of offerings on the market; as, *middling* cottons of good staple. **Mediocre** is not only less colloquial than *middling*, but it also tends to be slightly more depreciative; thus, one who describes a moving picture as *middling* implies that it was good, but far from excellent, but one who describes it as *mediocre* gives ground for the inference that it was distinctly less than what one might call good. Consequently, *mediocre* is often modified by an adverb of degree; as, it is a very *mediocre* poem; he has only *mediocre* ability; "My performance is *mediocre* to the last degree" (*Austen*). "A best-seller is the gilded tomb of a

mediocre talent" (*L. P. Smith*). **Second-rate** etymologically implies a ranking midway between that which is regarded as first-rate and as third-rate; as, a *second-rate* battleship (sometimes called a *second-class* battleship); a *second-rate* power; a *second-rate* college; a *second-rate* football team. This use often suggests reference to size, equipment, etc., and not to excellence. Frequently, however, *second-rate* connotes inferiority and is used interchangeably with *mediocre* (except that it does not logically admit of qualification); as, a *second-rate* singer; a *second-rate* performance. **Moderate**, as here compared (see also MODERATE, 1), stresses limitations (not self-imposed) in quality, intensity, degree, and the like; it implies distance from the extreme or from either of the extremes possible to a thing of its kind; as, *moderate* wealth; a man of *moderate* ability; a *moderate* wind; to attain *moderate* success; an infusion of *moderate* strength. "I was a *moderate* scholar and a competent athlete" (*A. C. Benson*). **Average**, in the extended sense in which the word is here considered (see also under AVERAGE, *n.*), theoretically implies a level at which all things of a given kind, class, category, or the like, would find themselves or would seek, if their inequalities were resolved; as, this is an *average* June day; where can we find the *average* man? Actually, however, the term is applied to that which seems of the common run or is undistinguished either by its superiority or its inferiority, or is not exceptional or outstanding in any way; thus, a man of *average* ability seems to have neither greater nor less ability than that of the ordinary man. "The only one...with whom he cared to probe into things a little deeper than the *average* level of club and chop-house banter" (*E. Wharton*). "There are readers of papers who...like the ordinary, *average* day, with its good human humdrum" (*C. E. Montague*). **Fair** is applied to that which is neither good nor bad, neither excellent nor poor, neither large nor small, or the like, but is slightly above that which is middling and appreciably better than what is average; as, the quality is *fair* to middling; this region has had a *fair* amount of rain; to be in *fair* physical condition; a *fair* theme; he had a *fair* record in school. **Indifferent** is applied to that which it is difficult to rate because it is neither clearly fair nor clearly mediocre, yet is not obviously middling or average; as, to play an *indifferent* game of bridge; all sorts and conditions, good, bad, and *indifferent*. "The tenacity of wrath which made an *indifferent* poet like Lucilius a fairly great satirist" (*A. Repplier*).

Ana. Mean, median, average, par (see under AVERAGE, *n.*): *common, ordinary, vulgar, popular.

meed, *n.* Guerdon, prize, award, reward, *premium, bounty, bonus.

Ana. Recompensing or recompense, remuneration, requital, satisfaction (see corresponding verbs at PAY).

meek. Modest, *humble, lowly.

Ana. Gentle, mild (see SOFT): subdued, submissive, *lame: *compliant, acquiescent, resigned: *forbearing, tolerant, lenient: patient, long-suffering (see corresponding nouns at PATIENCE).

Ant. Arrogant. — **Con.** *Proud, lordly, overbearing, haughty: *spirited, high-spirited, mettlesome, spunky: rebellious, contumacious, *insubordinate.

meet, *v.* *Satisfy, fulfill, answer.

Ana. Equal, approach, *match, touch: gratify, *please: content, *satisfy.

Ant. Disappoint.

meet, *adj.* Suitable, proper, *fit, appropriate, fitting, apt, happy, felicitous.

Ana. Adapted, adjusted, accommodated, conformed, reconciled (see ADAPT): right, *good: just, equitable, *fair.

Ant. Unmeet.

melancholia. Melancholy, *sadness, depression, dejection, gloom, blues, dumps, vapors.

melancholic, adj. Melancholic, melancholy, atrabilious (or atrabiliar), hypochondriac (or hypochondriacal) agree in meaning gloomy or depressed, especially as a manifestation of one's temperament or state of health. *Melancholic, melancholy, and atrabilious* all once implied the presence or excess of "black bile," one of the "humors" which in the Middle Ages and the Renaissance were supposed to determine a man's temperament and physical constitution. In modern use they are distinguished in meaning. *Melancholic* describes a person who is afflicted with or inclined to melancholia. "Mr. Britling in these moods did not perhaps experience the grey and hopeless desolations of the *melancholic*, . . . but he saw a world that bristled with misfortune and error" (H. G. Wells). *Melancholy*, on the other hand, describes a person, or the mood, disposition, acts, or utterances of a person, who is excessively sad or detached in spirit and, usually, averse to that which is cheerful or gay. "They say you are a *melancholy* fellow." "I am so; I do love it better than laughing" (Shak.). "Prince, 'tis a *melancholy* lay! For youth, for life we both regret! How fair they seem, how far away" (A. Lang). *Atrabilious* preserves the implication of a morbid physical condition more strongly than the preceding words; often in modern use it suggests the morose or choleric disposition of the dyspeptic or the predilection for gloom of those who have been subjected to severe strain. "Neither were those [Puritan settlers of New England] plump rosy-gilled Englishmen that came hither, but a hard-faced, *atrabilious*, earnest-eyed race" (J. R. Lowell). "Of nervous *atrabilious* constitution" (J. Morley). *Hypochondriac* comes close to *atrabilious* in its suggestion of constitutional gloominess but, in modern use, it also implies a morbid anxiety about one's state of health. "There was a pleasurable illumination in your eye occasionally, a soft excitement in your aspect, which told of no bitter, bilious, *hypochondriac* brooding" (C. Bronie).

Ana. *Despondent, despairing, hopeless, forlorn, desperate: pessimistic, misanthropic, *cynical, misogynic.

melancholy, n. *Sadness, melancholia, dejection, gloom, depression, blues, dumps, vapors.

Ana. Miserableness or misery, wretchedness (see corresponding adjectives at MISERABLE): despondency, despair, hopelessness, forlornness, desperation (see under DESPONDENT): *tedium, boredom, ennui, doldrums.

Ant. Exhilaration. — **Con.** Joy, delight, *pleasure, enjoyment, delectation, fruition: hopefulness, optimism (see corresponding adjectives at HOPEFUL).

melancholy, adj. 1 *Melancholic, atrabilious, hypochondriac.

Ana. Morose, gloomy, glum, *sullen, dour, saturnine: depressed, oppressed, weighed down (see DEPRESS): *despondent, despairing, hopeless, forlorn, desperate.

2 **Melancholy, dolorous, doleful, lugubrious, rueful, plaintive** come into comparison when they mean expressing or exciting sorrow or mourning. All of these words have, to a greater or less extent, weakened from their original meaning, and are often used with a half-humorous connotation. *Melancholy* in earlier use stressed a quality that inspired pensiveness or sad reflection or awakened mournful thoughts or recollections which were not only not necessarily painful or disagreeable, but often agreeable, especially to the poetic or thoughtful mind. "Sweet bird, that shunn'st the noise of folly, Most musical, most *melancholy*" (Milton). "The tender images we love to trace Steal from each year a *melancholy* grace" (S. Rogers). In current use, the term frequently applies to that

which expresses or excites dejection or depression; as, "his *melancholy* old house on the hill" (Deland); "that *melancholy* problem of a money-earning occupation which lay so heavily on my thoughts" (H. Ellis). *Dolorous* in nonderogatory use implies sorrow associated with severe physical or mental suffering; as, "crushed in and bruised . . . pain Implacable, and many a *dolorous* groan . . . ere they could wind Out of such prison" (Milton). In current use, the term describes that which is lamentable in its gloom or dismalness, or is exaggeratedly dismal; as, "That *dolorous* aspect of human nature which in comedy is best portrayed by Molière" (T. S. Eliot). "I dare say you were exceedingly sorry for what you had done." "Indeed, Sir, *dolorously* moaned Berry, 'I were, and am'" (Meredith). *Doleful* and *lugubrious* are also frequently applied to that which is exaggeratedly dismal or dreary, but *doleful* connotes (now humorously) a weight of woe (as, a *doleful* and lackadaisical air; a *doleful* ditty) and *lugubrious*, an undue, and often an affected, heaviness or solemnity (as, "They have been crucifying *Othello* into an opera. . . . The music good, but *lugubrious*"—Byron); "Dark funeral barges like my own had flitted by, and the gondoliers had warned each other at every turning with hoarse, *lugubrious* cries"—Howells). *Rueful* implies self-pity or regret but in current use it often suggests a quizzical attitude; as, "the woebegone heroes . . . eyed each other with *rueful* countenances" (Irving). "The deacon looked at his manuscript *ruefully*. 'It reads like a Sunday School essay,' he muttered" (C. Mackenzie). *Plaintive* applies chiefly to tones, sounds, utterances, rhythms, and the like, that suggest complaint or mourning or that excite pity or compassion; as, the *plaintive* cries of a child; "She sang *plaintively*, the wounded, aggrieved, hurt notes of the nightingale" (Hewlett). In poetic use, however, the term often suggests little more than pensive melancholy or expression in a minor key; as, "Perhaps the *plaintive* numbers flow For old, unhappy, far-off things" (Wordsworth).

Ana. Pathetic, poignant, *moving, touching: hopeless, forlorn, despairing (see DESPONDENT): pensive, reflective, *thoughtful: discomposing, disquieting, perturbing, disturbing (see DISCOMPOSE).

Con. Happy, *glad, cheerful, joyous, joyful, light-hearted: *lively, vivacious, gay.

melee. Fracas, row, *brawl, broil, rumpus, scrap.

Ana. Altercation, *quarrel, wrangle, squabble: *confusion, disorder.

mellow. Ripe, matured, *mature, adult, grown-up, full-fledged.

Ana. *Tender, warm, sympathetic, responsive, warm-hearted.

Ant. Unmellow: green. — **Con.** Raw, crude, callow, *rude, rough.

melodramatic. Histrionic, theatrical, dramaturgic, *dramatic.

Ana. *Showy, pretentious, ostentatious: *sentimental, romantic, maudlin, mawkish.

melody. *Melody, air, tune* agree in denoting a clearly distinguishable and, often, easily remembered succession of rhythmically ordered tones. *Melody* stresses the sweetness or beauty of sound produced by such an arrangement of tones. "Sweetest *melodies* are those that are by distance made more sweet" (Wordsworth). It also commonly suggests expressiveness or moving power, and a carefully wrought pattern. "Nerve-dissolving *melody*" (Tennyson). " 'Tis a rich sobbing melody, with reliefs Full and majestic" (Keats). Technically, as applied to complex musical structure, *melody* always implies a contrast to *harmony*; it designates that kind of musical beauty produced by a continuous series of tones in one

or more of the voice parts, in distinction from that produced by simultaneously sounded tones in all the voice parts. Strictly, *air* is applied to the dominating melody, usually carried by the upper voice or voices, in a choral, a part song, or the like. Loosely, however, *air* is often applied to any easily remembered succession of tones which identifies a simple musical composition such as a song, a ballad, or a waltz, and which is more commonly and more precisely called *tune*; as, to hum the *tune* (or the *air*) of the Blue Danube. *Tune* is also applied to the musical setting of a ballad, psalm, lyric, and the like (as, a hymn *tune*), and to any simple composition whether unison or harmonized (as, a dance *tune*).

melt. *Liquefy, deliquesce, dissolve, thaw, fuse.

member. *Part, portion, piece, detail, division, section, segment, sector, fraction, fragment, parcel.

Ana. *Element, component, constituent, integrant: branch, limb, *shoot, bough.

memorandum. *Letter, epistle, missive, note, message, dispatch, report.

memory. *Memory, remembrance, recollection, reminiscence, mind, souvenir* are not synonyms in all of their senses, but they are comparable terms since all involve the ideas of remembering and of being remembered. *Memory* applies chiefly to the power or function of remembering that which has been experienced or learned; in this sense, it suggests the power to reproduce images of what is no longer before one, to retain something that has been learned (words, ideas, skills, etc.), and to recognize and identify something previously known; as, he has a remarkably good *memory*; to train the *memory*; "Her *memory*... went slipping back upon the golden days" (*Tennyson*). In literary use, *memory* often occurs in the sense of that which is remembered either as an aggregate or as a single item. More than any other of the words as used in this sense, *memory* suggests a keeping in mind rather than a bringing back and often, therefore, a treasuring as something intimate or personal; as, "a present moment of comfortable reality was worth a decade of *memories*" (*Hardy*). "It was the merest *memory* now, vague and a little sweet" (*Galsworthy*); "You must have had a charming evening... if I may judge from the way you have kept the *memory* green" (*Conrad*). *Remembrance* in current use applies primarily to the act or the process (as distinguished from the faculty, power, or function) of remembering; as, "Think only of the past as its *remembrance* gives you pleasure" (*Austen*); "The *remembrance* of all that made life dear pierced me to the core" (*Hudson*); "He was unpleasantly affected by the *remembrance* of certain passages between them" (*Arch. Marshall*). *Remembrance* also denotes, but now less often than formerly, the state or fact of being remembered or kept in the memory of a person or group of persons; as, to hold one in fond *remembrance*; "moments... that live again in *remembrance*" (*W. W. Gibson*); "our literature is going to be our most perdurable claim on man's *remembrance*" (*Quiller-Couch*). *Recollection* often takes the place of *remembrance* when not only the act or process of remembering is denoted, but also the act or process of bringing back into the mind something which has been forgotten or not thought of for a long period, or which merely is not in one's mind at the time: the term, therefore, often, but far from always, implies an effort to remember; as, he said he must have time for *recollection* if he was to give an accurate account of what happened that day; "Half a word fixed upon or near the spot, is worth a cartload of *recollection*" (*Gray*); "his uneasiness grew by the *recollection* of the forty tons of dynamite in the body of the *Ferndale*; not the sort of cargo one thinks of with equanimity in connexion with a

threatened collision" (*Conrad*). But *recollection* is quite as often used of that which is remembered, especially as the result of conscious effort; as, "You ask me to put down a few *recollections* of your father" (*Lecky*); "Vivid indeed is my *recollection* of our halts before shaded homesteads, our protracted and usually successful parleys with lean housewives, hungry for conversation" (*Grandgent*). *Reminiscence* is more colored in its meaning by philosophical and psychological theories (particularly the Platonic theory of reminiscence) than any of the preceding words. For this reason chiefly, although etymologically it means a bringing back to mind, it carries a stronger implication of recovery through retrospection than any of the other terms. Like *remembrance* and *recollection*, it denotes either the act or the process of remembering but it further suggests either the recollection of that which has been long unremembered, especially because it belongs to one's remote past (as, the old man spent hour after hour indulging in *reminiscence*; "after another quarter of an hour of *reminiscence* they had got around to the things that had happened to each of them since they had last met"—*M. Austin*) or, especially in writings marked by Platonism, the recollection of something that belongs to a previous existence (as, "Knows he his origin? can he ascend By *reminiscence* to his earliest date?"—*Cowper*). "I believe that as we lose our powers of *memory* we may increase the power of *reminiscence*, that is, of recalling what we want in small quantities for a short time" (*Jowett*). The term is often used, however, in place of *recollection* in the concrete sense where that which is remembered serves as a contribution to biography, an autobiography, or a history (as, "The *reminiscences* [of my father] kindly contributed by his different friends"—*H. Tennyson*), or is recalled from the past in conversation or in writing by an aging or aged person (as, to enjoy the *reminiscences* of the old veterans), or is a phrase, a passage, a thought, a custom, or the like, that is so like one found in an earlier writer or race as to be regarded as an unconscious imitation or repetition or a survival (as, the young poet's best phrases are *reminiscences* of Keats; *reminiscences* of medieval pageants in modern carnivals). *Mind* (see also MIND, 2) is now found in the sense here considered chiefly in certain idiomatic phrases where it means either the entity as distinct from the function which stores up that which is remembered (as, I shall keep your need in *mind*; out of sight, out of *mind*) or the power to remember (as, time out of *mind*). *Souvenir* (usually thought of as a memento) is now infrequent in the sense of a memory, or that which is remembered, but it still occurs; as, "little tender thoughts of 'onstance, some flitting *souvenir*... of her mother" (*Bennett*).

Ana. *Mind, intellect, soul, intelligence, brains, wits: remembering, minding, recalling, reminding (see REMEMBER): awareness, consciousness, cognizance (see corresponding adjectives at AWARE).

Ant. Oblivion.

menace, v. *Threaten.

Ana. Alarm, terrify, scare, *frighten: *intimidate, cow: presage, portend, forebode, forecast (see FORETELL).

mend, v. *Mend, repair, patch, rebuild, remodel* come into comparison when they mean to make something that has been injured or damaged once again fit for use. *Mend*, which is etymologically a shortened form of *amend*, in general implies a freeing from faults or defects or, less often, a making up for a fault, but in its chief current sense it usually specifically suggests a process of making whole or sound something that has been broken, torn, injured by wear or use, or the like. In slightly archaic English, one speaks of *mending* one's manners

(or ways), of *mending* one's health, of *mending* a person's reputation, or one uses the old proverb "the least said, the soonest *mended*." In ordinary English, on the other hand, one *mends* a garment when one sews up rents, darns holes, or puts pieces under worn spots; one *mends* a fountain pen when one puts in a new ink sac, provides a new pen point, or the like; so, to *mend* a broken dish or toy; to *mend* a rug; to *mend* a stone wall; the break in his leg never was properly *mended*. *Repair* may often be used in place of *mend* in the sense of making whole or sound again (as, to *mend* [or *repair*] a stone wall), but it is usually preferred to *mend* when complete success is implied and when the thing that is restored to wholeness or soundness is a complex thing that has been partly destroyed, or extensively damaged, or has suffered dilapidation, debilitation, exhaustion, or the like; as, to *repair* a bicycle or automobile; to *repair* the badly burned house before moving back into it; it will cost a huge sum to *repair* the bridge; food is necessary to *repair* the tissues of the body; "there are few moral wrecks which may not be, to all seeming, completely *repaired* in this world" (C. W. Eliot); "if economic havoc and maladjustment attributable to the Great War were *repaired*" (J. A. Hobson). *Patch* implies a mending of a hole, rent, breach, or weak spot by the insertion or application of a piece of the same or similar material: the term sometimes, but far from always, implies obvious, hurried, careless, or clumsy mending, or a repairing that merely serves a temporary purpose; as, to *patch* trousers; to *patch* a plastered wall; to *patch* shoes; to *patch* a damaged lawn; to *patch* an inner tube. In extended use, *patch*, or frequently *patch up*, implies a making of something out of a great number of pieces, fragments, odds and ends (as, to *patch* a quilt; to *patch up* an account of a battle from stray bits of information; to *patch up* a code of rules for the guidance of a society), or a settling of something that causes disturbance (as, to *patch up* a quarrel), or a restoring something which has been broken or disrupted in a way suggestive of patching (as, to *patch up* a friendship). In current use, especially in industry and business, *rebuild*, which normally means to build again something which has been razed or ruined, is often preferred to *repair* because it implies a thoroughgoing repairing with addition of new parts when necessary that makes a thing like new; as, a *rebuilt* typewriter or automobile. *Remodel* implies repairing with some changes, often extensive changes, in structure or design; as, to *remodel* an old house; to *remodel* a dress.

Ana. *Improve, better, ameliorate, help: emend, remedy, redress, *correct, rectify, reform: *renew, restore, renovate, rejuvenate, refurbish: fix, *adjust, regulate.

mendacious. *Dishonest, lying, untruthful, deceitful.

Ana. *False, wrong: prevaricating, equivocating, paltering, fibbing (see LIE, v.).

Ant. Veracious. — **Con.** *Reliable, dependable, trustworthy: honest, *upright, just, scrupulous, conscientious, honorable.

menial. Servile, slavish, *subservient, obsequious.

Ana. Abject, *mean, sordid, ignoble: *base, low, vile: groveling, floundering, wallowing (see WALLOW).

menstruum. *Solvent, dissolvent, resolvent, alkalest.

mental. Mental, intellectual, psychic, psychical, intelligent, cerebral agree in meaning of, relating to, or characteristic of that sum total of powers or functions called variously (and in the senses discriminated at MIND, 2) mind, intellect, soul (or psyche), or brain. In general, *mental* applies directly to that which has to do with the mind as a real (though often immaterial) or as a purely theoretical entity; as, one's *mental* life; a *mental*

state; *mental* diseases; *mental* processes; *mental* science. *Intellectual* differs from *mental* not only in its reference to the intellect, and therefore to the higher powers of the mind such as the comprehension of the abstract or difficult and the ability to reason, but also because it is directly applicable to persons, their utterances, acts, and qualities (thus, one says an *intellectual* [not a *mental*] person), and because it often carries an implied contrast to *emotional*, *moral*, *imaginative*, and the like; as, "a miracle of *intellectual* delicacy like Dr. Newman's" (Arnold); "No abstract, *intellectual* plan of life" (Browning); "The knowledge of geographical facts is useful, but without intrinsic *intellectual* value" (B. Russell). "It was only on her *intellectual* side that Elizabeth touched the England of her day. All its moral aspects were simply dead to her" (J. R. Green). "Part of the value of science is *intellectual*. It would be a dull mind that could see the rich variety of natural phenomena without wondering how they are inter-related" (Jeans). *Psychic* and *psychical* imply a reference to the soul or psyche, usually, but not invariably, in their psychological senses; often, therefore, they differ from *mental* in not suggesting a physical basis such as the brain or the nerves; thus, a *mental* disease is sometimes, but only in nontechnical language, distinguished from a *psychic* disease in that the former implies a cause which is organic and the latter a cause which cannot be related to the body but which seems to proceed from wrong ideas or attitudes; the term *psychical research* applies to investigations of phenomena that seem contrary to physical laws and suggest mental activity apart from the body. "You keep talking about maladies of the mind and soul. I don't accept the idea of *psychic* diseases analogous to *mental* diseases" (C. Mackenzie). "The humorist was a type that pioneer society required in order to maintain its *psychic* equilibrium" (Van W. Brooks). *Intelligent*, as here compared (see also INTELLIGENT, 2), is applicable to any person who is endowed with an intellect or reveals intelligence; as, men are *intelligent* beings; the most *intelligent* of his pupils. The term is also applicable to an animal that reveals sagacity or other qualities suggestive of intelligence; as, an *intelligent* spaniel. *Cerebral* implies a reference to brain (either as a physical organ or as mind or intellect) or brains: it is often used in current English when the physical basis of the mental life is stressed or when the particular qualities implied by brains are to be suggested; thus, the "*cerebral* awakening" of a child is a phrase more suggestive of brain activity than "*mental* awakening"; "*cerebral* music" implies the need of definite intellectual activity if the music is to be understood.

mephitic or mephitical. Toxic, *poisonous, venomous, virulent, pestilent, pestilential, miasmatic.

Ana. *Offensive, loathsome, revolting, repulsive, repugnant: fetid, noisome, putrid, *malodorous: noxious, *pernicious, baneful.

mercantile. *Commercial.

mercenary, adj. *Mercenary, hireling, hack, hackney, venal* are not close synonyms but they are comparable because when they are applied to persons, their acts, their services or products, or the like, they agree in meaning actuated or motivated chiefly by a desire for profit. *Mercenary* stresses self-interest (often self-seeking) as the guiding motive: it therefore usually (except when applied to soldiers who serve a foreign power for a wage) applies to persons, services, etc., that should be prompted by altruism or by noble aims or should be characterized by unselfishness or self-forgetfulness; as, "the faithful service of the heart; so rendered and so free from any *mercenary* taint" (Dickens); "She had... nothing sordid or *mercenary*; in fact, she never

thought of money" (G. Eliot). "If a writer's attitude toward his characters and his scene is as vulgar as a showman's, as *mercenary* as an auctioneer's, vulgar and meretricious will his product for ever remain" (Cather). *Hireling* suggests the attitude of one who serves for the wage involved or is guided by servile motives: the term usually, especially in its more common opprobrious use, implies a motive no higher than that of the reward promised or foreseen; as, "the factious and *hireling* historians of all ages" (Raleigh, d. 1618); "some *hireling* senators" (Johnson); "prostituted muse and *hireling* bard" (Byron). *Hack* and the original but now rare form *hackney*, as here compared, apply to a person that is hired or offers his services for hire, or to the services, products, or the like, of such a person: the term often, but not invariably, implies previous failure, as in a profession, a low order of ability or of performance, willingness to drudge, and indifference to the nature of the work required; as, a *hack* writer; a *hack* attorney; "the *hack* moralist of the pulpit or the press" (J. Morley); "some starved *hackney* sonneteer" (Pope); "the *hackney* libellers of the faction" (R. North). *Venial* implies purchasability. The term often connotes the use of bribery, and in the sense here considered it nearly always carries a strong implication of corruption or of corruptibility: it is, of all these terms, the most opprobrious; as, *venal* politicians; *venal* voters; the *venal* sale of political offices; a *venal* arrangement whereby certain contractors are favored; "bartering his *venal* wit for sums of gold" (Dryden).

Ana. Vendible, purchasable: abject, *mean, sordid, ignoble: *covetous, greedy, acquisitive, grasping, avaricious: debased, corrupt, corrupted, depraved (see under DEBASE).

merciful. Clement, *forbearing, tolerant, lenient, indulgent.

Ana. Compassionate, *tender: benignant, benign, *kind, kindly: forgiving, pardoning, condoning (see EXCUSE, v.).

Ant. Merciless. — **Con.** *Grim, implacable, relentless, unrelenting: cruel, fell, inhuman, *fierce.

mercifulness. Clemency, forbearance, tolerance, leniency, indulgence. See under FORBEARING.

Ana. *Mercy, clemency, lenity, charity, grace: compassion, commiseration, *pity, ruth.

Con. Severeness or severity, sternness (see corresponding adjectives at SEVERE); rigorousness or rigor, rigidity, strictness, stringency (see corresponding adjectives at RIGID).

merciless. Implacable, relentless, unrelenting, *grim.

Ana. Pitiless, ruthless, compassionless (see affirmative nouns at PITY): wanton, uncalled-for, gratuitous (see SUPEREROGATORY): cruel, fell, *fierce: inexorable, obdurate, *inflexible, adamant, adamantine.

Ant. Merciful. — **Con.** Clement, *forbearing, tolerant, lenient, indulgent.

mercurial. *Inconstant, fickle, capricious, unstable.

Ana. Volatile, effervescent, buoyant, expansive, *elastic, resilient: *changeable, changeful, variable, protean, mutable: mobile, *movable: *clever, adroit, cunning, ingenious.

Ant. Saturnine.

mercy. Mercy, charity, grace, clemency, lenity are here compared as meaning either the disposition to show compassion or kindness in one's treatment of others, especially of those who offend one and who are in one's power to punish or rebuke, or an instance in which this disposition is manifested. *Mercy* implies compassion so great as to enable one to forbear, even when justice demands punishment, or to give help or comfort even to the lowliest or most undeserving. "Earthly power doth

then show likest God's. When *mercy* seasons justice" (Shak.). "Which now of these three [the priest, the Levite, the Samaritan]... was neighbour unto him that fell among the thieves? And he said, He that shewed *mercy* on him" (Luke x. 36-37). *Charity* fundamentally implies a disposition to love all men as brothers; in more modern use, it stresses benevolence and good will, especially as it reveals itself not only in giving generously (for this sense see CHARITY, 2) but in broad understanding of others and in kindly tolerance; as, "with malice toward none, with *charity* for all" (Lincoln); "To know the literature of another language... enlarges aesthetic *charity*" (J. R. Lowell). "It is far commoner at the University to meet men of great attainments combined with sincere humility and *charity*, for... the most erudite specialist... becomes aware both of the wide diversity of knowledge and of his own limitations as well" (A. C. Benson). *Grace*, as here compared, implies a benignant attitude toward those who are dependent on one and a disposition to bestow favors or to make concessions to them. In its theological sense, in reference to the spiritual assistance given men by God, the word still lives; in its general application, it now tends to be somewhat archaic. "To bow and sue for *grace* With suppliant knee" (Milton). "Each in his place, by right, not *grace*, Shall rule his heritage" (Kipling). "Let him sit with me, or he'll grow up a barbarian, with no manners!... Miss Hannah was... thankful for this *grace* on her brother's part" (Deland). *Clemency*, as here compared (see also *clement* under FORBEARING), implies a mild or merciful disposition in one whose duty or function it is to administer justice or to punish offenses. "*Clemency*... is the standing policy of constitutional governments, as severity is of despotism" (Hallam). "Off went poor Tom... to rejoice in the *clemency* that spared his appearance at Sessions" (Meredith). *Lenity* differs from *clemency* only in its far greater emphasis on lack of severity. For this reason it often suggests undue gentleness or softness or even at times undue leniency. "What makes robbers bold but too much *lenity*?" (Shak.). "If it produces a proper *lenity* to our citizens in captivity, it will have the effect we meant" (Jefferson).

Ana. Compassion, ruth, *pity, commiseration: mercifulness, clemency, forbearance, tolerance, leniency, indulgence (see under FORBEARING).

Con. Vengeance, revenge, retribution, reprisal, *retaliation: punishment, chastening, chastisement, disciplining or discipline, correction, castigation (see corresponding verbs at PUNISH).

mere. *Mere*, *bare* are often employed with little or no distinction in the sense of being such as the term qualified states but nothing more. But *mere* is commonly used to emphasize the limitations of a thing, as if it were declared to be "simply what it is and nothing more"; as, he is a *mere* boy (i.e., in no sense an adolescent or man); "it began to rain—not a *mere* hill-shower, but a good, tepid, monsoonish downpour" (Kipling); "Is *mere* living... without reference to any intrinsic values, a thing of any worth?" (Inge); "There is scarcely any *mere* paint in the Sistine Madonna, but there is plenty of paint" (C. E. Montague). *Bare* is stronger, and frequently suggests that the thing just escapes falling short of what it actually is; as, *mere* civility (that is, civility and nothing more); *bare* civility (that is, civility that just escapes being incivility); to be elected by a *bare* majority; "a *bare* subsistence wage" (Shaw).

meretricious. *Gaudy, tawdry, garish, flashy.

Ana. *Showy, pretentious, ostentatious: vulgar, *coarse, gross: deceptive, delusive, delusory, *misleading.

☞ Do not confuse meretricious with meritorious.

merge. Blend, fuse, coalesce, amalgamate, commingle, mingle, *mix.

Ana. Consolidate, concentrate, *compact, unify: *unite, combine, conjoin: *integrate, concatenate, articulate.

merger. *Consolidation, amalgamation.

meridian. Culmination, zenith, apogee, *summit, peak, pinnacle, climax, apex, acme.

merit, n. 1 *Due, desert.

Ana. Meed, reward, guerdon (see PREMIUM): *worth, value: earning(s), gaining(s), winning(s) (see corresponding verbs at GET).

2 *Excellence, virtue, perfection.

Ant. Fault: defect.

merry. Merry, blithe, jocund, jovial, jolly come into comparison when they mean indicating or manifesting high spirits or lightheartedness in play, laughter, or the like. **Merry** implies a gay, cheerful temper or mood and uninhibited enjoyment of frolic, festivity, or fun of any sort. "A merrier man. Within the limit of becoming mirth, I never spent an hour's talk withal" (*Shak.*). "Let us drink and be merry, dance, joke, and rejoice" (*T. Jordan*). "For the good are always the merry, Save by an evil chance, And the merry love the fiddle. And the merry love to dance" (*Yeats*). **Blithe** (now chiefly literary except in Scotland) carries an even stronger implication of freshness, buoyancy, and lightheartedness than **merry**; it usually suggests song, leaping, dancing, and the like; as, "The milkmaid singeth blithe" (*Milton*). "Knit the blithe dance upon the soft green grass" (*Wordsworth*). "See This lovely child, blithe, innocent and free, She spends a happy time with little care" (*Shelley*). **Jocund** (once poetical, but now increasingly common in literary prose) heightens the implication of gladness and usually, also, connotes exhilaration of spirits, or elation; as, "A poet could not but be gay, In such a jocund company" (*Wordsworth*); "He was... in that jocund, new-married mood" (*M. Austin*). **Jovial** connotes especially good fellowship or conviviality. "Those jovial meetings of company where the warmth of a social temper is discovered with least reserve" (*Shenstone*). "Gunga Dass... was a jovial, full-stomached, portly government servant with a marvelous capacity for making bad puns" (*Kipling*). **Jolly** often suggests higher spirits than **jovial** and an even more manifest attempt to keep others laughing, as by jesting, bantering, playing tricks, and the like. "Whiles the jolly Briton... laughs [at the lovelorn Frenchman] from his free lungs" (*Shak.*). "Haste thee, nymph, and bring with thee Jest, and youthful jollity, Quips and cranks and wanton wiles" (*Milton*).

Ana. Gay, vivacious, *lively, sprightly, animated: joyful, joyous, cheerful, *glad, happy, lighthearted: mirthful, gleeful, hilarious (see corresponding nouns at MIRTH).

merry-andrew. *Fool, jester, clown, antic, buffoon, zany, pantaloone, harlequin, comedian, comic, stooge.

mesa. *Mountain, mount, peak, alp, volcano.

message. Missive, note, *letter, epistle, dispatch, report, memorandum.

metachronism. *Anachronism, parachronism, prochronism.

metamorphose. *Transform, transmute, convert, transmogrify, transfigure.

Ana. *Change, vary, alter, modify: develop, *mature, age, ripen.

metamorphosis. Transformation, transmutation, conversion, transmogrification, transfiguration. See under TRANSFORM.

Ana. *Change, mutation, alternation, permutation,

viciatude: change, variation, alteration, modification (see under CHANGE, v.).

metaphor. Simile, *analogy.

metaphrase. *Translation, version, paraphrase, construe.

meter or metre. *Rhythm, cadence.

method. Method, mode, manner, way, fashion, system are here compared as denoting the means taken or the plan or procedure followed in doing a given kind of work or in achieving a given end. **Method** may denote either an abstraction or a concrete procedure, but in both cases it implies orderly, logical, and effective arrangement, as of one's ideas for an exposition or an argument, or of the steps to be followed in teaching, in investigation, in the treatment of a disease, or in any kind or piece of work: often, also, the term connotes regularity or formality in procedure; as, his teaching is too informal to be said to have method; the inductive method of reasoning; a new method of dealing with relief cases; "the crude methods of trial and error" (*H. Suzzallo*); "the method of unfolding the course of a plot must in some ways be different in a play meant for acting and in a book meant for reading" (*C. E. Montague*). **Mode**, as here compared (see also FASHION, 2; STATE), is sometimes used interchangeably with method, but not wisely, for it seldom implies an orderly or logical arrangement; rather, it denotes an order or course pursued as the result of custom, tradition, personal preference, or the like; as, "The duty of itself being resolved on, the mode of doing it may easily be found" (*Jer. Taylor*); an author's peculiar mode of expression; the French mode of life; "The reasons given... do not seem very plausible to our modes of thought" (*Binyon*). **Manner** (see also BEARING) is often used in place of mode where the reference is to a personal or peculiar course or procedure, or to a method, whether pursued by a number of persons or not, that savors of that which is individual or distinctive; as, "Mark the manner of his teaching" (*Shak.*); "The mathematician... is not capable of giving a reason in the same manner as the dialectician" (*Jowett*); "his personality has suggested to me an entirely new manner in art" (*Wilde*). **Way** (see also WAY, 1) may be used in place of any of the preceding words, not only because it is the most general of all, but because it is a very old word common both in colloquial and in literary speech, and because it is found in many familiar idiomatic expressions, where theoretically method, mode, or manner might be more explicit, but would actually be less expressive or less poignant; as, religion implies not only a way of worship but a way of life; "it was the white man's way to assert himself in any landscape, to change it, make it over a little... it was the Indian's way to pass through a country... and leave no trace" (*Cather*); "the century has brought us not only new things to see but new ways of seeing" (*Day Lewis*); "Sally used to answer Robert's letters, sadly and patiently, and with no reproaches;—that was Sally's way" (*Deland*). **Fashion**, as here compared, differs from way not so much in denotation as in connotation derived in part from its commoner sense of style or vogue (see FASHION, 2). The term, therefore, often suggests an origin or source that is not so deep or a motivation that is not so abiding as those usually connoted by way: oftentimes also, it is the idiomatic term in prepositional phrases introduced by after or in; as, "He will, after his sour fashion, tell you" (*Shak.*); "Subjects serious in themselves, but treated after my fashion, non-seriously" (*Lamb*); "I have been faithful to thee, Cynara, after my fashion" (*E. Dowson*); "We hear them talking... in different fashions under different moods—even as you and I" (*Lowe*). But fashion some-

times comes very close to *mode* when it means the way that is characteristic of or peculiar to a group, type, or the like; as, to swim dog *fashion*. **System**, though not uncommon in the sense of a fully developed and often carefully formulated method, runs so easily into the commoner sense of the term (see **SYSTEM**, 1) that it may often as easily apply to the scheme as to the actual way of doing something; as, "The mind can scarcely conceive a *system* for regulating commerce between nations, which shall exclude all laws concerning navigation" (*Ch. Just. Marshall*); the *system* of classification now preferred by botanists; "The Greek . . . helped himself by an elaborate *system* of sacrifice and prayer and divination . . . the object of which was simply to discover and if possible to affect the divine purposes" (*G. L. Dickinson*). As an abstraction, however, meaning orderliness or plan in arrangement or procedure, *system* is often preferred to *method*; as, housekeeping without *system*; he follows no *system* in his reading.

Ana. *Process, procedure, proceeding: classification, alphabetization (see corresponding verbs at **ASSORT**): disposition, *disposal.

methodical, methodic. *Orderly, systematic, regular. **Ana.** Methodized, systematized, organized (see **ORDER**, v.); *careful, meticulous, scrupulous: *logical, analytical. **Ant.** Unmethodical: desultory. — **Con.** *Random, haphazard, casual, hit-or-miss: *irregular, unnatural: confused, disordered, chaotic, jumbled (see corresponding nouns at **CONFUSION**).

methodize. Systematize, organize, *order, arrange, marshal.

Ana. Regulate, *adjust: *set, settle, fix, establish.

meticulous. *Careful, scrupulous, punctilious, punctual.

Ana. Fastidious, finical, particular, fussy, picknickety, *nice: accurate, exact, precise, *correct.

métier. Business, pursuit, calling, occupation, employment, *work.

Ana. *Trade, craft, handicraft, art, profession: *work, labor, toil, travail: *vocation, avocation.

metonymy. **Metonymy, synecdoche** designate two closely related figures of speech in which the name of one thing is given for that of another thing which bears a close relationship to the first thing. **Metonymy** (etymologically, change of name) is the general term for this type of figure of speech; the relationships it may imply are very numerous, but the most common are these: (1) the use of the sign for the thing signified, as in: the pen (which is the instrument of a writer and the sign, therefore, of literary power) is mightier than the sword (the instrument of a soldier, and the sign of military power); (2) the use of that which contains, holds, or the like, for that which it contains, holds, etc., as in: he keeps a good table (i.e., a table well supplied at meals with good food); all the world (i.e., all the people inhabiting the world) loves a lover; the kettle (i.e., the water inside) is boiling; (3) the use of the cause for the effect or of the effect for the cause, as in: to read Dante (i.e., the poems Dante wrote); to have respect for gray hairs (i.e., for age which has gray hairs for one of its effects). **Synecdoche** is a species of metonymy in which: (1) the name of the whole is given for one of its parts, as in: please raise the window (i.e., the lower sash); (2) the name of a part takes the place of the name of the whole, as in: all hands (i.e., all the men employed at manual labor) were put to work; "I descried a sail [i.e., a ship] steering to the South-East" (*Swift*); (3) the name of the material takes the place of the name of the thing made from that material, as in: one of the finest marbles (i.e., sculptures carved out of marble) in the exhibition; to

read a paper (i.e., an article written or typed on paper) at a club meeting.

metropolitan, n. Archbishop, primate, *bishop, ordinary.

mettle. *Courage, spirit, resolution, tenacity.

Ana. *Fortitude, backbone, sand, grit, pluck, guts: nerve, hardihood, *temerity, audacity: gallantry, valor, *heroism.

mettlesome. *Spirited, high-spirited, spunky, fiery, peppery, gingery.

Ana. Courageous, bold, audacious, intrepid, *brave: *impassioned, passionate, ardent, fervent: restive, *impatient, restless, skittish.

miasmatic or miasmatical, miasmal, miasmatic. *Poisonous, toxic, venomous, virulent, pestilent, pestilential, mephitic.

Ana. Contagious, *infectious, catching: noxious, *pernicious, baneful, deleterious.

microbe. *Germ, bacterium, bacillus, virus, pathogen.

microscopic. Minute, *small, little, diminutive, miniature, petite, wee, tiny, teeny, weeny.

middle, n. *Center, midst, core, hub, omphalos, focus, nucleus, heart.

middling. *Medium, mediocre, second-rate, moderate, average, fair, indifferent.

midget, n. Manikin, pygmy, *dwarf, homunculus, runt.

midst. Middle, *center, core, hub, omphalos, focus, nucleus, heart.

mien. Demeanor, deportment, *bearing, manner, carriage, port, presence, front.

Ana. Air or airs, *pose, affectation, mannerism: aspect, *appearance, semblance, look.

might, n. Strength, energy, *power, force, puissance, arm.

Ana. Vigorousness or vigor, strenuousness, energeticness, lustiness (see corresponding adjectives at **VIGOROUS**): potency, powerfulness, forcibleness, forcefulness (see corresponding adjectives at **POWERFUL**).

mild. Gentle, lenient, bland, *soft, balmy.

Ana. *Forbearing, tolerant, clement, merciful, lenient, indulgent: delicate, dainty, exquisite, *choice: temperate, *moderate: *calm, serene, tranquil, placid.

Ant. Harsh: fierce.

milieu. Environment, setting, *background, misc-en-scène, backdrop.

militant. *Aggressive, assertive, self-assertive, pushing.

Ana. Bellicose, pugnacious, contentious, *belligerent: combating, opposing, antagonizing or antagonistic (see corresponding verbs at **OPPOSE**): fighting, warring, contending, battling (see **CONTEND**).

Con. *Pacific, pacifist, pacifistic, peaceful, peaceable: acquiescent, resigned, *compliant.

military. *Martial, warlike.

mime. *Actor, player, performer, mummer, Thespian, impersonator, trouper.

mimic. *Copy, imitate, ape, mock.

Ana. Play, impersonate, personate, *act: counterfeit, feign, simulate, sham, pretend, *assume.

mind, n. 1 *Memory, remembrance, recollection, reminiscence, souvenir.

2 **Mind, intellect, soul, psyche, brain, brains, intelligence, wit, wits** are here compared as meaning that sum total of powers (often thought of as a distinct entity) which man regards as the distinctive possession of human beings and by means of which each individual knows and understands both his inner life and the external world and establishes effective relations between them. **Mind**, like all the other terms, has been variously defined. It is commonly contrasted with *body*, or the

physical organism, but it is also in other senses contrasted with *heart*, as the seat of the feelings, and with *soul*, as the immortal spirit of man, or with *soul* as equivalent to *heart*, but in all cases, despite a difference in stress on certain qualities, it denotes a complex of powers of which man is conscious and which includes the perceiving, the remembering, the thinking, and less often, the feeling and willing powers or functions. When all these powers are implied, the opposition to *body* is clear (as, a sound *mind* in a sound body; "to keep the body in strength and vigour, so that it may be able to obey and execute the orders of the *mind*"—*Locke*); when the capacity for understanding and reasoning is stressed, the contrast with *heart* or *soul* is implied (as, "The *mind* must have its share in deciding these important matters, not merely the emotions and desires"—*R. Macaulay*); when the exercise of the powers that operate through physical organs (such as the eye, the ear, the brain, the nerves) is suggested, a distinction from *soul*, as spirit, is often connoted (as, "it is a man's own fault, it is from want of use, if his *mind* grows torpid in old age"—*Johnson*; "Insanity is often the logic of an accurate mind overtaxed"—*Holmes*; "And thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind, and with all thy strength: this is the first commandment"—*Mark* xii. 30). *Mind* also is usually the preferred term when the reference is to an individual's mental qualities; as, he has a very good *mind*; "The *mind* of Julius [Caesar], so far as we can read it, was the *mind* of a dreamer joined to the temperament of a soldier" (*Buchan*). *Intellect* and *mind* are often used interchangeably by many persons; however, in psychology and in philosophy *intellect* rather than *mind* has been the usual technical term for the knowing and thinking powers and functions (or the entity they suggest). In spite of numerous variations in definitions and a fundamental difference of opinion between schools of thought as to whether the power of intuition or the power to reason is the distinguishing property of *intellect*, the term has in all but loose nontechnical use denoted that entity (or, in many psychologies, that "faculty," of the mind or soul) by which a person attains knowledge, whether through comprehension of that which is taught or through processes of thought whereby the mind moves from that which was previously known to conclusions that represent new knowledge. In many psychologies this "faculty" of the mind is distinguished from two other "faculties"—those of feeling and of will. "We can trace . . . in the romanticism of nineteenth-century France this tendency toward a hypertrophy of sensation and an atrophy of ideas, toward a correspondingly expanding sensorium and a diminishing *intellect*" (*Babbitt*). "The emotionalist steepes himself or herself in luxurious feeling and pathetic imagination, which make no severe call upon either the will or the *intellect*" (*Inge*). *Soul*, as here compared (see also *SOUL*, 2), is still used in some psychologies (but not in those that reject not only the theory of "faculties" but also any other theory that presupposes the existence of an immaterial entity) as the inclusive term for the immaterial entity which is the seat of man's mental, emotional, and volitional life and which therefore is the prime object of psychological study; as, "I thought of my inner existence, that consciousness which is called the *soul*" (*Jefferies*). The term is now seldom used strictly in this sense, being confused not only with the conceptions of soul as spirit and as heart, but with several other ideas that are the result mainly of varying theologies and philosophies. Some modern psychologists and some writers and speakers prefer *psyche* to *soul*, as less susceptible to the addition of extraneous connota-

tions; some psychologists prefer *psyche* as a name for the life of the individual which comprehends not only all the powers and activities attributed by others to the entity called the soul, but also the subconscious life as well; the term, however, is not universally accepted by schools which deny the existence of the soul as an entity. "I would write *psyche* always instead of *soul*, to avoid meanings which have become attached to the word 'soul,' but it is awkward to do so" (*Jefferies*). *Brain* or, especially in colloquial use, *brains* always suggests a reference to the brain as the physical seat of the life of the mind or intellect; however, either term is often preferred to *intellect* (sometimes to *mind*) as denoting the powers (usually clearly manifested powers) of comprehension and of independent (sometimes creative) thought; as, a *brain* that quickly grasps abstruse ideas. "Have I ever even felt inclined to write anything, until my emotions had been unduly excited, my *brain* immoderately stirred, my senses unusually quickened, or my spirit extravagantly roused?" (*Galsworthy*). "They could more than make up for the cost of complying with the very moderate requirements of the Acts by putting a little more *brains* into their work" (*Shaw*). "It requires *brains* and education to follow the argument [of Aquinas that the existence of God is demonstrable]" (*Inge*). *Intelligence* is distinguished from *intellect*, with which it is often confused, by being in general applied to a concrete or individual exhibition of the powers ascribed to the intellect rather than to an abstraction designated as *intellect* or *mind*; as, men are animals endowed with *intellect* (not *intelligence*); the *intelligence* (i.e., the extent to which a man is able to use his intellect) of individuals is now measured by psychologists; he has grown rapidly in *intelligence* (not *intellect*); "it had turned capable men into mere machines doing their work without *intelligence*" (*Shaw*). In current use, *intelligence* often applies specifically to an ability to deal with a new or trying situation competently, to achieve one's ends in spite of difficulties, or the like; as, the situation demands the exercise of great *intelligence*; "He thinks the war could have been prevented with a little *intelligence*" (*R. Macaulay*). *Wit* (see also *WIT*, 2) and *wits* are often merely homely or colloquial equivalents of *mind*; as, to lose one's *wits*; he is dull in *wit*. Usually, however, the term carries a stronger implication of an inborn power or of native capacity than *mind*, which often suggests training and development: it therefore may imply ability to use the senses quickly and readily, strong common sense, or intelligence that is the result of the active use of these; as, "the untutored natural *wit* of savages" (*Shaw*); "Doctor Stirling arrived in less than ten minutes. Dick Povey had had the *wit* to look for him at the Federation meeting" (*Bennett*); "Every one had to be a jack-of-all-trades, every one had to live by his *wits*" (*Van W. Brooks*).

Ana. *Power, function, faculty: *reason, intuition, understanding: wisdom, judgment, *sense, gumption.
mind, *v.* 1 *Remember, recollect, recall, remind, reminisce, bethink.

2 *Tend, attend, watch.

Con. *Neglect, ignore, disregard, forget, slight.

mingle. *Mix, commingle, blend, merge, coalesce, amalgamate, fuse.

Ana. *Compose, comprise, consist of, constitute: *join, combine, unite, connect: consolidate, *compact, unify, concentrate.

miniature, *adj.* Minute, diminutive, *small, little, wee, tiny, teeny, weeny.

minimize. Depreciate, *decry, belittle, disparage, derogate from, detract from.

Ant. Magnify. — **Con.** Aggrandize, *exalt: extol, eulogize, acclaim, laud, *praise.

minister. Envoy, *ambassador, legate, nuncio, inter-nuncio.

minnesinger. Troubadour, trouvère, scald, jongleur, gleeman, scop, minstrel, bard, *poet, versifier, rhymester, rhymester, poetaster.

minority. *Infancy, nonage.

Ant. Majority. — **Con.** *Age.

minstrel. Bard, scop, gleeman, jongleur, troubadour, trouvère, minnesinger, scald, *poet, versifier, rhymester, rhymester, poetaster.

minute, n. *Instant, moment, second, flash, trice, jiffy, twinkling, twinkle, split second.

minute, adj. 1 *Small, little, diminutive, miniature, wee, tiny, teeny, weeny.

2 *Circumstantial, particular, particularized, detailed, itemized.

Ana. Meticulous, scrupulous, *careful, punctilious: precise, accurate, exact, right, nice, *correct.

Con. General, *universal: *abstract, ideal: comprehending or comprehensive, including or inclusive, embracing or embracive (see corresponding verbs at INCLUDE).

minx. *Wench, hussy, baggage.

miraculous. *Supernatural, supranatural, preternatural, superhuman.

mirage. Hallucination, *delusion, illusion.

mirror, n. *Model, example, pattern, exemplar, paradigm, ideal, beau ideal, standard.

mirth. Mirth, glee, jollity, hilarity come into comparison when they mean the mood or temper of a person or a group of persons manifesting joy or high spirits in laughter, play, or the like. **Mirth** often implies lightness of heart and a love of gaiety; it may, however, imply great amusement or cause for laughter; as, "Darcy was not of a disposition in which happiness overflows in mirth" (*Austen*); "Some of them literally throwing themselves down on the ground in convulsions of unholy mirth" (*Kipling*). "The glad circle round them yield their soul To festive mirth, and wit that knows no gall" (*Thomson*). **Glee** may be used in reference to a group (as, "Merry damsels . . . So many, and so many, and such glee"—*Keats*), but it is far more often employed in reference to an individual who by reason of special circumstances is filled with joy, delight, or happiness, and shows his exultancy by laughter, smiles, cries of joy, and the like. "Full well they laugh'd, with counterfeited glee. At all his jokes, for many a joke had he" (*Goldsmith*). But **glee** may express the exultation of one who takes more or less malicious delight in another's misfortunes or predicaments; as, in great glee over his friend's embarrassment; ghoulish glee. "Charles Critchlow came to the funeral, full of calm, sardonic glee . . . Though fabulously senile, he had preserved and even improved his faculty for enjoying a catastrophe" (*Ben-nett*). **Jollity** in the sense here considered, on the other hand, usually implies mirth in a group, especially a merrymaking group. Distinctively, however, it connotes exuberance and lack of constraint and may imply revelry of any kind. "Midnight shout and revelry, Tipsy dance and jollity" (*Milton*). "The entertainment was in that stage when bashfulness itself had passed into easy jollity, when gentlemen . . . could . . . be prevailed on to dance a hornpipe" (*G. Eliot*). **Hilarity** fundamentally implies the exhilaration of spirits as by wine, pleasurable excitement, or the like. "Wine gives not light, gay, ideal hilarity, but tumultuous, noisy, clamorous merriment" (*Johnson*). "Through all the works of Chaucer, there reigns a cheer-

fulness, a manly hilarity" (*Coleridge*). Until around 1800, it carried none of the implications of boisterousness or vulgar excess of spirits it now so frequently stresses; as, "coarse and vulgar hilarity" (*Thackeray*); the hilarity of a New Year's Eve celebration.

Ana. Cheerfulness or cheer, lightheartedness, joyfulness, gladness, happiness (see corresponding adjectives at GLAD): joy, *pleasure, delight: merriment, blitheness, jocundity, joviality (see corresponding adjectives at MERRY).

Con. *Sadness, depression, dejection, melancholy, blues, dumps, vapors: *tedium, boredom, ennui.

misanthropic, misanthropical. Pessimistic, misogynic, *cynical.

Ant. Philanthropic. — **Con.** Benevolent, humane, humanitarian, *charitable, altruistic.

miscarriage. *Abortion.

miscellaneous. Miscellaneous, assorted, heterogeneous, motley, promiscuous come into comparison when they mean marked by diversity or variety and are applied to the things that comprise a group, a collection, a mass, or the like, or to a group, collection, or mass. **Miscellaneous** usually implies a mixture of many kinds, showing few, if any, signs of selection, and often suggesting dependence on chance; as, there is always a miscellaneous assemblage at the meetings of the association. "Joyce's wide and miscellaneous acquaintanceship" (*P. Colum*). "My second boy . . . received a sort of miscellaneous education at home" (*Goldsmith*). **Assorted** in the restricted sense in which it is here considered (see ASSORT), and the derivative noun **assortment**, also imply a mixture, but not a haphazard one; they carry the implications of a selection including every available kind or variety or involving consideration of every taste or every need; as, a box of assorted candies; a basket of assorted fruits; a skein of assorted wools; a carefully assorted group; a case containing an assortment of tools. **Heterogeneous** is applicable chiefly to masses, groups, and the like, the individuals or the elements of which are necessarily in proximity or close relationship to each other; it suggests not only variety or diversity in the individuals or the elements but also absence of uniformity or unity and little (if any) evidence of fusion; as, "the task of transforming a heterogeneous selection of mankind into a homogeneous nation" (*B. Russell*); "the family is heterogeneous enough to make quite a good party in itself" (*R. Macaulay*); the heterogeneous structure of granite. **Motley**, literally varicolored, in the extended sense here considered adds to heterogeneous the suggestion of discordance in the individuals or elements or their striking contrast to each other; as, a motley crew; a motley gathering from all sections of the city. "One would enquire from whence this motley style Did first our Roman purity defile" (*Dryden*). "How motley are the qualities that go to make up a human being" (*Maugham*). **Promiscuous** may suggest haphazardness or the appearance of it, but it usually implies selection that is completely devoid of discrimination and that results in disorderly confusion; thus, a miscellaneous acquaintanceship may imply a catholicity of taste, but a promiscuous acquaintanceship implies an absence of taste and good judgment; from a description of a club's membership as heterogeneous one might infer its interesting diversity but from a description of it as promiscuous one can infer only a diversity that is distasteful and senseless from the point of view of the speaker or writer. For this reason promiscuous is applicable to acts, emotions, and the like, that affect or include in their scope a number of persons or things; in such use it stresses not only lack of discrimi-

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

nation, but lack of restriction within bounds set by prudence, good sense, sound morals, or the like; thus, *promiscuous* charity is imprudently lavish charity extended without reference to the needs of those helped; *promiscuous* blame suggests stupid indifference as to the persons or things one's censure may affect; *promiscuous* sexual intercourse implies extreme licentiousness.

Ana. Various, diverse, divergent, disparate, *different: multifarious, multifold, manifold, divers, sundry, *many.
Con. *Similar, alike, like, identical, homogeneous, uniform.

mischance. *Misfortune, adversity.

Ana. *Accident, casualty, mishap: *disaster, calamity, catastrophe, cataclysm.

mischief. *Injury, hurt, damage, harm.

Con. Perniciousness, detrimentalness or detriment, deleteriousness, noxiousness, banefulness or bane (see corresponding adjectives at *PERNICIOUS*): *evil, ill, bale: impairment, marring, spoiling (see corresponding verbs at *INJURE*).

mischievous. Wanton, roguish, waggish, impish, *playful, frolicsome, sportive.

Ana. Annoying, bothering or bothersome, vexing or vexatious, irking or irksome (see corresponding verbs at *ANNOY*): naughty, *bad, evil, ill, wicked: tricky, foxy, artful, *sly.

mise. *Contract, bargain, compact, pact, treaty, entente, convention, cartel, covenant, concordat, indenture.

mise-en-scène. *Background, setting, environment, milieu, backdrop.

miserable, adj. Miserable, wretched come into comparison because both adjectives are used to describe anything that is deplorably or contemptibly bad or mean, such as a person's state of health or of mind, a state of affairs, a human being with reference to his condition or character, or anything compared with others of its kind or with the average of its kind. A person is *miserable* if in misery or in a state either of extreme or acute distress of body or mind (as, "[Plato] would forbid any novelist to represent a good man as ever *miserable*" —H. Ellis; "Gideon has been absolutely *miserable*, and [has] gone about like a man half stunned, ever since it happened"—R. Macaulay), or of pitiable poverty or contemptible degradation (as, "a *miserable* creature of a crazed aspect... shattered and made drunk by horror"—Dickens). A thing is *miserable* when it is exceedingly mean or paltry, and provocative only of misery in the person affected or of extreme contempt in the observer; as, a *miserable* cold; a *miserable* dinner; "a *miserable* pun" (Meredith); "the squalor of mean and *miserable* streets" (Binyon). A person is *wretched* who is extremely unhappy or abjectly despondent because of want, grief, oppression, affliction, anxiety, or the like; a thing that pertains closely to the happiness of a person is *wretched* if it produces such dejection or mental suffering; as, "O cruel death! To those you are more kind Than to the *wretched* mortals left behind" (Waller). "It was her unhappy lot to be made more *wretched* by the only affection which she could not suspect" (Conrad); "She's 'poor Ellen' certainly, because she had the bad luck to make a *wretched* marriage" (E. Wharton). A thing, in general, is *wretched* if it is extremely or deplorably bad; as, "a *wretched* French cabaret, smelling vilely" (Meredith); *wretched* crops; *wretched* accommodations; "there is nowhere to be seen, perhaps, such *wretched* whist-playing as in French salons" (Brownell).

Ana. Forlorn, hopeless, despairing, *despondent: pitiable, piteous, *pitiful: doleful, dolorous, *melancholy.
Ant. Comfortable.

miserly. Penurious, curmudgeonly, parsimonious, niggardly, tight, tightfisted, *stingy, close, closefisted, cheeseparing, penny-pinching.

Ana. Avaricious, greedy, *covetous, grasping: *mean, sordid, abject, ignoble.

Con. Bountiful, munificent, *liberal, generous: benevolent, *charitable, altruistic.

misery. *Distress, suffering, agony, dolor, passion.

Ana. Adversity, *misfortune: affliction, visitation, *trial, tribulation: melancholy, dejection, *sadness, depression.

Ant. Felicity, blessedness. — **Con.** *Happiness, beatitude, bliss: comfort, ease, repose (see *REST*).

misfortune. Misfortune, *mischance*, *adversity* agree in denoting bad luck or adverse fortune. They are not always synonymous in their specific denotations, however. All may denote an instance of adverse fortune, though *adversity* is seldom so used except in the plural; as, to suffer a *misfortune* (or *mischance*). "Pray, tell me more of your *adversities*" (Longfellow). *Misfortune* and *mischance* only may designate the incident or the conjunction of events that is the cause of a change in fortune, but only *misfortune* and *adversity* may be used to denote the state itself; as, by *misfortune* (or *mischance*), he lost his position; persons who have never endured *misfortune* (or *adversity*). *Misfortune* usually implies physical or mental distress; *mischance* often suggests nothing more than slight inconvenience, but it may be used to imply affliction and even death, without loss of the objectivity in point of view that often distinguishes it from *misfortune*. "I have many *désagréments* that surround me; they have not dignity enough to be called *misfortunes*, but they feel heavy on my mind" (Gray). "The stupid fellow took it [a book] away with him—by *mischance*, I am bound to believe" (Meredith). "They... let down with Cords... seuerall Messengers (that if one came to *mischance*, another might passe on)" (Bacon). *Adversity*, the strongest of the words compared, denotes grave or continued misfortune. "A wretched soul, bruised with *adversity*" (Shak.). "In his [Francis Bacon's] *adversity* I ever prayed that God would give him strength" (B. Jonson).

Ana. *Disaster, calamity, catastrophe, cataclysm: *accident, casualty, mishap: *trial, tribulation, cross, affliction, visitation.

Ant. Happiness: prosperity. — **Con.** Felicity, bliss, blessedness, beatitude (see *HAPPINESS*): comfort, ease (see *REST*): *victory, triumph.

misgiving. Foreboding, presentiment, *apprehension.

Ana. Mistrust, distrust (see under *DISTRUST*, v.): suspicion, doubt, skepticism, *uncertainty: *fear, alarm, dread, fright.

mishap. *Accident, casualty.

Ana. *Misfortune, *mischance*: *disaster, calamity: *chance, fortune, hap, hazard.

mislay. *Misplace.

mislead. Delude, beguile, *deceive, betray, double-cross.

Ana. Entice, inveigle, *lure, tempt, seduce: *dupe, gull, hoodwink, hoax, bamboozle.

misleading. Misleading, *deceptive*, *delusive*, *delusory* agree in meaning having an appearance or character that leads one astray or into error. *Misleading* is the general term applicable to anything which, intentionally or otherwise, leads one away from the right course or direction as in action, conduct, or the apprehension of truth, and, therefore, into confusion or error; as, a *misleading* sign; a *misleading* question; "The bare statement that 'art is useless' is so vague as to be really meaningless, if not inaccurate and *misleading*" (H. Ellis).

Deceptive applies chiefly, but not exclusively, to things that by their aspect or appearance give a false impression; the term may or may not imply the intention to deceive; as, *deceptive* solemnity; *deceptive* words; a *deceptive* show of wealth or power. **Delusive** and the less common **delusory** carry a stronger implication than *deceptive* carries of mocking or cheating as well as misleading; as, *delusive* hopes; *delusory* promises; "it is important for this Court [the Supreme Court of the United States] to avoid extracting from the very general language of the Fourteenth Amendment a system of *delusive* exactness" (*Justice Holmes*).

Ana. Fallacious, casuistical, sophistical (see under FALLACY): *false, wrong: confounding, bewildering, distracting, perplexing, puzzling (see PUZZLE, v.).

misogynic, misogynical, misogynous. Misanthropic, pessimistic, *cynical.

Con. Benevolent, *charitable, altruistic.

misplace. **Misplace, mislay** agree in meaning to put in the wrong place. **Misplace** may imply a putting of a thing in another than its usual or customary location (as, to *misplace* a book inadvertently; I have *misplaced* the dish, for it is not here where it belongs), but it more often suggests a setting or fixing of something where it should not be (as, my confidence in him was *misplaced*; she is suffering from *misplaced* affections). "The globe and sceptre in such hands *misplaced*" (*Cowper*). **Mislay** usually implies a misplacing (in the first sense) but stresses a forgetfulness of the place in which the thing has been put; it therefore often means to lose through misplacing; as, to *mislay* a book or an umbrella.

Ana. Displace (see REPLACE): derange, disarrange, *disorder.

misrepresent. **Misrepresent, belie** agree in meaning to represent in a manner that is contrary to truth. **Misrepresent**, however, commonly implies intent and therefore takes a person or his utterance as its subject when used in the active voice; it often carries a suggestion of deliberate falsification or injustice, but it may suggest bias or prejudice; as, to *misrepresent* a statement, or the value of an article; the account *misrepresents* not only his actions but his motives. **Belie**, on the other hand, implies an impression given that contradicts or is at variance with the fact; it commonly, but not invariably, takes as its subject a thing, such as an appearance, a look, a manner, or the like; as, his brusque manner *belied* his real kindness of heart. "You are an Englishman . . . unless your physiognomy *belies* you" (*Kingsley*).

Ana. *Disguise, dissemble, cloak, mask: simulate, counterfeit, feign, *assume.

misrepresentation. *Lie, falsehood, untruth, fib, story.

Ana. Dishonesty, deceitfulness, mendaciousness or mendacity (see corresponding adjectives at DISHONEST): sophistication, doctoring, deaconing, loading, weighting, adulteration (see corresponding verbs at ADULTERATE): sophistry, casuistry (see FALLACY).

missionary, n. **Missionary, apostle, evangelist, revivalist**, as here compared, denote a person whose work it is to make converts, especially to Christianity. **Missionary** and **apostle** both etymologically imply a being sent, and are used to designate one who comes from outside, usually in response to a commission but sometimes in answer to a call. **Missionary**, in its more common application, denotes either a man or woman, clerical or lay, who is sent by a church or a religious order to work among peoples of no religion or of another religion, usually in a foreign land. In modern use it connotes social as well as religious activities, such as welfare and health work. In extended use *apostle* often denotes a missionary to the

heathen who is the first to bring Christianity into a country or to a people; as, John Eliot, *Apostle* of the Indians; St. Augustine, *Apostle* of the English. *Apostle* also is used of a person who initiates a great reform or preaches a new doctrine, often one of a political or intellectual as well as of a moral character; as, Richard Cobden has been called the *Apostle* of Free Trade. "We inevitably think of Rousseau as . . . the great *apostle* of the original and the spontaneous" (*Babbitt*). **Missionary**, in a frequent but less widespread use, is applied to an ordained preacher who comes from without a parish to stir up religious fervor among the parishioners and to convert backsliders or the unregenerate. In some churches, a preacher whose aims are similar is called an **evangelist**, but the latter term often suggests, in distinction from *missionary*, autonomous action, or lack of a commission from a superior authority, and activities independent of any one church, congregation, or denomination. "John Wesley the humanist enjoyed preaching in such a pleasant place to such pleasant people, while John Wesley the *Evangelist* was performing a stern moral duty" (*S. M. Crothers*). **Revivalist** stresses the aim of reviving faith and often connotes sensational methods of exciting religious fervor; otherwise, its implications are similar to those of *evangelist*; as, Billy Sunday was an outstanding American *revivalist*.

missive. *Letter, epistle, note, message, dispatch, report, memorandum.

mist, n. *Haze, fog, smog, brume.

mistake, v. **Mistake, confuse, confound** are here compared as meaning to mix up things, as by taking one thing for another. One **mistakes** one thing for another when by an error of perception or of thought (often one justified by a disguise), or as a result of a predisposition or a bias, one fails to recognize the thing or to comprehend its real nature and identifies it with something not itself or with something of another nature; as, "on a casual view Saint George [as presented by a nummer] . . . might be *mistaken* for his deadly enemy, the Saracen" (*Hardy*); "Kant . . . it has been said, *mistook* Duty for a Prussian drill-sergeant" (*H. Ellis*); "the tendency of the rest of us to *mistake* gush for vigour" (*Day Lewis*). One **confuses** one thing with another when one fails to distinguish two things that have similarities or common characteristics or to observe their lines of demarcation; as, "Very possibly some of the cases *confuse* the principles that govern jurisdiction with those that govern merits" (*Justice Holmes*); "far too intellectually keen to *confuse* moral problems with purely aesthetic problems" (*H. Ellis*). One **confounds** things or one thing with another when one mixes them up so hopelessly that one cannot detect their differences or distinctions. **Confound** usually carries a stronger connotation of mental bewilderment or of a muddled mind than the preceding words: for this reason, it is often preferred when the differences are more or less obvious to a clearheaded or intelligent person. "Sir Austin . . . expostulated, contradicted himself, *confounded* his principles, made nonsense of all his theories" (*Meredith*). "Courage must not be *confounded* with brutality. Brutality is pleasure in forcing one's will upon other people; courage is indifference to personal misfortunes" (*B. Russell*). "The temptation to *confound* accumulated knowledge and experience with intrinsic progress is almost irresistible" (*Inge*).

Ana. Addle, muddle, bemuddle, *confuse.

Ant. Recognize.

mistake, n. *Error, slip, lapse, blunder, faux pas, bull, howler, boner, bloomer, floater.

Ana. Confusion, confounding, mistaking (see corre-

sponding verbs at **MISTAKE**): inadvertence (see corresponding adjective at **CARELESS**): neglecting or neglect, omitting or omission, disregarding, slighting or slight (see corresponding verbs at **NEGLECT**).

mistreat. Maltreat, ill-treat, misuse, *abuse, outrage.

Ana. See those at **ILL-TREAT**.

mistrust, *n.* 1 Suspicion, skepticism, doubt, *uncertainty, dubiety, dubiousity.

Ana. Misgiving, presentiment, foreboding, *apprehension.

Ant. Trust: assurance. — **Con.** Confidence, faith, reliance, dependence (see **TRUST**): *certainty, certitude, conviction.

2 Distrust (see under **DISTRUST**, *v.*).

mistrust, *v.* *Distrust.

Ana. Apprehend, anticipate, *foresee: alarm, *frighten, scare: appall, *dismay.

Con. *Rely, trust, depend: confide, entrust, relegate, *commit.

misuse, *v.* *Abuse, mistreat, maltreat, ill-treat, outrage. **Ana.** Hurt, *injure, harm, damage, impair, mar, spoil: pervert, *debase, corrupt.

Ant. Respect. — **Con.** Esteem, regard (see under **REGARD**, *n.*): cherish, treasure, prize, *appreciate.

mite. Bit, *particle, smitch, smidgen, whit, atom, iota, jot, tittle.

mitigate. Allay, *relieve, alleviate, lighten, assuage.

Ana. Temper, attempter, *moderate: abate, reduce, lessen, diminish, *decrease: *palliate, extenuate.

Ant. Intensify. — **Con.** Aggravate, heighten, enhance (see **INTENSIFY**): *increase, augment.

mix. **Mix**, **mingle**, **commingle**, **blend**, **merge**, **coalesce**, **amalgamate**, **fuse** are synonymous terms when they are used of two or more things and denote to combine or become combined with resulting diffusion or interpenetration of particles, parts, elements, or the like. **Mix**, the most comprehensive of these terms, may or may not imply loss of identities, but even when the elements are distinguishable it suggests a homogeneous character in the product; as, to *mix* salt and pepper or wine and water; to *mix* colors in painting; to *mix* the ingredients of a cake; oil and water do not *mix*. So far as they differ, **mingle**, rather than *mix*, implies that the constituent elements are distinguished in the product; as, *mingled* sensations; "the evil. . .strangely *mingled* with the good" (*Babbitt*). "*Mingling*, as no other school of dramatists has done, the oratorical, the conversational, the elaborate and the simple" (*T. S. Eliot*). **Commingle** suggests a more intimate, and often a harmonious, union. "*Commingled* with the gloom of imminent war, The shadow of His loss drew like eclipse, Darkening the world" (*Tennyson*). **Blend** originally was the equivalent of *mix* or *mingle*. "A Tale, that *blends* their glory with their shame" (*Pope*). In current use, it implies a mixing of harmonious or compatible things, a union so intimate as to obscure the individuality of the component parts, and a sharing of their qualities by the resultant product; as, *blended* teas. "What delicious *blending*. . .of thought and diction!" (*T. E. Brown*). "Offshore where sea and skyline *blend* in rain" (*Kipling*). **Merge** still more distinctly implies the loss in the whole of the constituent elements, or the complete absorption of one element in another; as, to *merge* the private in the general good. "Archer often wondered how, after forty years of the closest conjugality, two such *merged* identities ever separated themselves enough for anything as controversial as a talking-over" (*E. Wharton*). **Coalesce** suggests a natural affinity for each other in the things merging and a resulting organic unity. "All these descriptive details

do not *coalesce* for us into the distinct image of a living woman" (*Babbitt*). "It is only gradually [for the infant learning how to perceive], through the formation of habits by association, that touch and sight and smell and hearing. . .*coalesce* in the. . .notion of an object" (*B. Russell*). **Amalgamate** in very careful use implies a tendency to merge or draw together, largely as a result of contact or association; it therefore suggests an effective or harmonious union rather than a complete merger with loss of identity. "The Indian race. . .formed no part of the colonial communities, and never *amalgamated* with them" (*Ch. Just. Taney*). "[Rome's] policy of conciliating and *amalgamating* conquered nations" (*A. Repplier*). **Fuse** stresses even more than *blend* and *merge* the loss of identity of each of the component elements, and, more than *coalesce*, the indissolubility of their union. In very precise use, it implies a powerful cause which operates like heat melting and bringing into one mass disparate substances. "The Scotch nation, nobles and commons, ministers and people, wonderfully *fused* together by fiery enthusiasm" (*G. Smith*). "Truth at white heat—the truth of terror and mystery and baleful beauty, *fused* into one flaming impression" (*Lowes*).

Ana. *Join, combine, unite.

Con. *Separate, part, divide, sever, sunder.

mixture. **Mixture**, **admixture**, **blend**, **compound**, **composite**, **amalgam** agree in denoting a product formed by the combination of two or more things. **Mixture** is the most inclusive and most widely applicable term; it has, however, many specific applications; thus, a fabric made by interweaving yarns of different colors is a *mixture*; a tobacco in which several varieties are combined to give a particular flavor or quality is a smoking *mixture*. The word often implies miscellaneousness; as, "society" in a small town is very much of a *mixture*. **Admixture** adds to *mixture* the suggestion of the alien character of one or more of the constituent elements; as, a racial stock that is an *admixture*; prosaic verse is an offensive *admixture* to lovers of pure poetry. **Blend**, on the contrary, adds to *mixture* the implication of thorough mingling of (usually, but not invariably) similar or congruous elements or ingredients. Like *admixture*, it implies that the product is not pure, or simple, but, unlike it, it usually suggests harmony or complete integration. "A curious *blend* of humility and irony" (*T. S. Eliot*). "Unorthodox was the *blend* of executive responsibility, legislative power and financial control" (*Buchan*). **Blend** is used in commerce as a name for mixed whiskies, wines, teas, coffees, etc., to indicate that a new product has been formed that combines the flavors, or the like, of several varieties of the same thing and that the products contain no other substance than whisky, wine, etc. **Compound** usually implies the union of two or more distinguishable or analyzable parts, elements, or ingredients. "It was not fear, it was not ardour,—it was a *compound* of both" (*Scott*). "Rare *compound* of oddity, frolic, and fun" (*Goldsmith*). In its technical senses, *compound* is definitely restricted in application. In chemistry, a compound is a distinct substance formed by a union of two or more elements, united in definite proportions by weight and with the same internal arrangement; thus, water is a *compound* of oxygen and hydrogen. As applied to words, a compound is a word or its equivalent which is formed of distinct parts, but has a distinct sense often not inferable from the meanings of its component parts. A compound may be written solid (as, *blackboard*), or hyphenated (as, *long-distance*), or be composed of separate words (as, *all right*). **Composite** is often interchangeable with *compound* in the general sense of the latter, but there is a

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

tendency to prefer the former when the constituent parts are artificially or fortuitously combined; thus, the American people is a *composite* of many races; the English language is a *composite* of Anglo-Saxon, Norman-French, and Celtic and other languages. An *amalgam* is literally a mixture made by adding mercury to a metal for the purpose of softening the latter; as, dentists use *amalgams* of gold and silver for tooth fillings. In its pertinent figurative sense *amalgam* is especially applicable to something plastic or to something that has not hardened into permanent form; as, the American people is as yet only an *amalgam*, not a race. "One's judgment [of a friend's literary work] is inevitably an *amalgam* of impressions of the work and impressions of the man" (T. S. Eliot).

Ana. Joining, combining, uniting (see JOIN).

moan, *v.* Groan, *sigh, sob.

Ana. Mourn, *grieve, sorrow: bemoan, bewail, lament, *deplere.

moan, *n.* Groan, sigh, sob. See under SIGH, *v.*

Ana. Crying or cry, wailing or wail (see corresponding verbs at CRY): lamenting or lament, bemoaning, bewailing (see corresponding verbs at DEPLORE).

mob, *n.* *Crowd, throng, press, crush, rout, horde.

Ana. *Multitude, army, host, legion.

mobile. *Movable, motile, motive.

Ana. Fluid, *liquid: *changeable, changeful, protean, variable: *inconstant, unstable, mercurial, fickle, capricious.

Ant. Immobile.

mock, *v.* 1 Taunt, deride, *ridicule, twit, rally.

Ana. Flout, *scoff, jeer, gird, gibe: *caricature, parody, travesty, burlesque.

2 *Copy, imitate, mimic, ape.

Ana. Counterfeit, feign, affect, simulate, *assume.

mode, *n.* 1 *State, condition, situation, posture, status, estate.

2 *Method, manner, way, fashion, system.

Ana. Trend, drift, *tendency, tenor, current: procedure, *process.

mode, *n.* 2 *Fashion, style, vogue, fad, rage, craze, dernier cri, cry.

model, *n.* **Model**, **example**, **pattern**, **exemplar**, **paradigm**, **ideal**, **beau idéal** (or **beau idéal**), **standard**, **mirror** come into comparison when they denote something set or held before one for guidance or imitation in one's conduct or endeavor. **Model** applies to any person or thing set before one for imitation by oneself or another: the term may suggest nothing more; as, art students painting from a *model*; "the child's patient efforts [in learning to write] to imitate the copperplate *model*... set before him" (H. Ellis); "Tennyson gave him [J. R. Lowell] the *model* for Sir Launfal" (Van W. Brooks). Oftentimes, however, the term applies to a person or thing that is eminently (sometimes, pre-eminently) worthy of imitation; as, "there is no poet in any tongue... who stands so firmly [as Dante] as a *model* for all poets" (T. S. Eliot); "[New Zealand's] system of child hygiene has been regarded as a *model* for all to follow" (V. Heiser). **Example** applies chiefly to a person (or his acts, conduct, etc.) that for one of a number of reasons is or may be imitated by others: the term usually implies that the person, or the act, or the conduct, for some good reason (such as the person's being in a position of authority, or his conduct being in the limelight, or his act being widely known) is one that is likely to be imitated, whether he (or it) be good or bad, right or wrong; thus, a father should set a good *example* to his children; she always followed the *example* of her mother in her social

behavior; a teacher's conduct should never give a bad *example* to his pupils. Sometimes, however, *example* applies to that which is not to be imitated, but which serves rather as a warning; as, to make an *example* of an offender (i.e., by punishing him conspicuously). "Let it profit thee to have heard, By terrible *example*, the reward Of disobedience" (Milton). *Example* is also used in a highly abstract sense in antithesis to *precept*, then implying the setting of an example, usually but not necessarily a good example; as, children learn more quickly by *example* than by precept; "the mistake of thinking that all can be done by precept, when... *example* is no less potent a force" (A. C. Benson). **Pattern** in its earliest and, to an extent, still current English senses, applies either to the divine archetype (see PROTOTYPE) of a thing or to a carefully worked-out design or plan (such as an architect's drawing) to be followed by a worker or workers in fashioning a thing. "According to an heavenly *pattern*... Which He [the Creator] had fashioned in his wise foresight, He man did make" (Spenser). "Almost all the common things we use now... are made by machinery, and are copies of an original *pattern*" (Jeans). In the sense in which the word is here considered (see also FIGURE, 2), *pattern* now usually applies to that which is actually worthy of imitation or is accepted as such: it often differs from *model* in suggesting a more clearly worked out design, or a fuller presentation of details, or in connoting fixity or compelling power; as, "A housewife in bed, at table a slattern; For all an *example*, for no one a *pattern*" (Swift); "Somewhere there must have been men and women working out our situation... successfully, but the only *example* life afforded us was not of the acceptable *pattern*" (M. Austin); "the inexorable conventions that tied things together and bound people down to the old *pattern*" (E. Wharton). **Exemplar** often comes closer to *pattern* than to *example* because it usually applies to that which is set before one as worthy of imitation and is, therefore, inherently good; as, "Christ is the... *exemplar* that all preachers ought to follow" (Latimer); "To men of letters doubly dear, not for his wit and genius merely, but as an *exemplar* of goodness, probity, and pure life" (Thackeray). Sometimes, however, *exemplar* is specifically applied to a person or thing that exhibits a quality, or sums up all the characteristics that distinguish a type, whether that quality or type be in itself good or bad; as, "Sisyphus, the legendary *exemplar* of cunning" (Thirlwall); "Stendhal's Julian Sorel... this *exemplar* of ruthless individualism" (A. Huxley). **Paradigm**, once a common but now a rare, synonym, except in its technical grammatical sense, of *pattern* and *exemplar*, often specifically implies existence not in the actual world but in the mind and, therefore, suggests a perfection exceeding what is possible in reality (as, "Socrates makes one more attempt to defend the Platonic ideas by representing them as *paradigms*"—Jowett). As a technical term in grammar, *paradigm* designates an example of a conjugation or declension showing a word (verb, noun, pronoun, or adjective) in all its inflectional forms and serving as a pattern for all words of the same class or type; as, a *paradigm* for Latin nouns of the second declension. The term in its nontechnical sense has now given way to *ideal* in popular as well as in learned use. But *ideal* in current use often applies to a person or thing that is found in reality as well as to one that is conceived by the mind and that is held before one as embodying or representing the perfection one hopes to realize or attain; as, the boy found his *ideal* in his father; "[Livinia] embodied in her life the *ideal* of the Roman matron" (Buchan). In some use *beau idéal* (a French

phrase now naturalized in English, correctly meaning "ideal beauty" but often incorrectly translated as "the beautiful, or perfect, ideal" is interchanged with *ideal* in this particular sense; as, "the *beau idéal* of young English manhood" (*M. E. Braddon*). Frequently, however, *ideal* is almost indistinguishable from *standard* when it applies not to a person or object that serves as a pattern or exemplar, but to anything such as a rule, a practice, an aim, an established level of excellence, or the like, by which one seeks to maintain a high quality in a product or of performance; as, "The *ideal* of general cultivation has been one of the standards in education" (*C. W. Eliot*); "[Accuracy] is still a noble and inspiring *ideal*. It is the morality of the intellect: it prescribes what it ought to strive for" (*P. B. Ballard*); "Each generation... has its own *ideals* and its own *standards* of judgment" (*S. M. Crothers*). But *standard* is interchangeable with *ideal* only when it applies to that which is the test of perfection or of human perfection (for other sense see *STANDARD*, 2); as, "the very art... incommensurable with any *standard* except that of pure beauty—I refer of course to the art of music" (*G. L. Dickinson*); "With the spread of impressionism literature has lost *standards* and discipline, and at the same time virility and seriousness" (*Babbitt*). *Mirror*, now archaic in this sense, was once used frequently in literary or complimentary speech for a person (rarely a thing) upon which others could look as a model or pattern of perfection, the term sometimes implying a reflection of celestial perfections; as, "call him bounteous Buckingham, The *mirror* of all courtesy" (*Shak.*); "*Mirror* of grace and Majesty divine" (*Spenser*).

Ana. Archetype, *prototype: criterion, touchstone, gauge, *standard.

moderate, adj. 1 **Moderate, temperate** are often used interchangeably to denote not excessive in degree, amount, or the like; as, a *moderate* allowance; *temperate* heat. When contrasted, *moderate* often connotes absence or avoidance of excess (opposed to *excessive, immoderate*), and *temperate*, deliberate restraint or restriction (opposed to *intemperate, inordinate*); thus, "a *moderate* drinker" suggests free but far from excessive indulgence in intoxicants, and "a *temperate* drinker" suggests restrained and cautious indulgence; "*moderate* enthusiasm" suggests lukewarmness, "*temperate* enthusiasm" suggests keeping a hold over one's exhibition of feeling; one's anger may be far from *moderate*, yet one's reply may be *temperate*. In precise, especially technical language, *moderate* and *temperate* often denote midway between extremes or designate a point, as in a scale, characterized neither by excess nor by deficiency of something understood. As a rule, when so used they are not interchangeable, for custom or terminology has determined the selection; as, *moderate* temperature; a *moderate* breeze; a *temperate* climate; a *temperate* zone. In this sense both *moderate* and *temperate* have two antonyms, one on the side of deficiency and the other on the side of excess. These antonyms are usually specific and vary according to the application; as, for example: *light* and *strong* (of breezes); *arctic* and *torrid* (of climate); *abstemious* and *glutinous* (of eating); *mild* and *violent* (of something having force and intensity).

Ana. Ordinary, *common, familiar: gentle, mild, bland, *soft: *sparing, economical.

Ant. Immoderate. — **Con.** *Excessive, extreme, inordinate.

2 *Medium, middling, mediocre, second-rate, average, fair, indifferent.

Ana. Decent, *decorous, proper: *steady, even, equable, constant.

moderate, v. **Moderate, qualify, temper, attempter** come into comparison when they mean to modify something so as to avoid an extreme or to keep within due bounds. **Moderate** stresses reduction of that which is excessive, but it does not necessarily imply finding the happy mean; as, the sun at midday *moderates* the cold; you must *moderate* your demands if you wish to be listened to. "Moderate your language, old man," I said; "remember that you are addressing a superior" (*Hudson*). **Qualify**, in most discriminating use, emphasizes restriction or more precise definition that brings a thing closer to the truth or facts, or that makes it less general, inclusive, or sweeping, or that gives it a clearly defined quality or character of its own; as, the teacher *qualified* his praise of the theme by the added comment "you can do better"; our admiration of his genius is *qualified* by our disapproval of his character. "It is time to *qualify* the over simple account I have given of the artist's process of creation" (*S. Alexander*). **Temper** strongly implies accommodation to the needs or requirements of the person, the situation, the time, and the like; it may or may not suggest moderation or qualification, but it usually implies the addition of a counterbalancing or mitigating thing; as, "God *tempers* the wind... to the shorn lamb" (*Sterne*); to *temper* justice with mercy. "Fierce for the right, he bore his part In strife with many a valiant foe; But Laughter winged his polished dart, And kindness *tempered* every blow" (*W. Winter*). **Attempter** is a very close synonym of *temper*. It is, however, increasingly rarer in current use and it seldom so strongly implies accommodation or adaptation as does *temper*. It commonly suggests a softening or mitigating rather than a counterbalancing of that which is harsh, strong, or the like. "The shadow of the willow tree... *attempted* the cheery western sunshine" (*N. Hawthorne*).

Ana. Abate, reduce, lessen, diminish, *decrease: mitigate, alleviate, lighten, *relieve: slow, slacken (see *DELAY*).

Con. *Intensify, aggravate, heighten, enhance: augment, *increase.

modern. Modernistic, *new, novel, new-fashioned, newfangled, neoteric, original, fresh.

Ana. *Contemporary, contemporaneous, coincident, concomitant, concurrent: *prevailing, current, prevalent.

Ant. Antique: ancient.

modernistic. *New, new-fashioned, newfangled, neoteric, novel, modern, original, fresh.

Ant. Antiquated.

modest. 1 *Humble, meek, lowly.

Ana. Retiring, withdrawing (see *GO*): *moderate, temperate.

Ant. Ambitious. — **Con.** *Showy, pretentious, ostentatious, pompous: arrogant, haughty, *proud, overbearing: *shameless, brazen, barefaced, impudent.

2 *Shy, bashful, diffident, coy.

Ana. Reserved, reticent, *silent: shrinking, recoiling (see *RECOIL*): demure, nice, seemly, proper (see *DECOROUS*).

3 Decent, *chaste, pure.

Ana. *Moral, virtuous: *decorous, proper, seemly, decent.

Ant. Immodest. — **Con.** Indecent, indelicate, *indecorous, unseemly, improper.

modification. 1 Change, alteration, variation. See under *CHANGE*, *v*.

Ana. Transformation, metamorphosis, conversion, transmutation (see under *TRANSFORM*): qualification, tempering (see corresponding verbs at *MODERATE*).

2 *Variation, adaptation, mutation.

modify. *Change, alter, vary.

Ana. Temper, attempter, *moderate, qualify: *transform, convert, metamorphose, transmogrify.

modish. *Stylish, fashionable, smart, chic, dapper, dashing, spruce, natty, nifty, nobby, posh, toffish, brave, braw.

Ant. Antiquated.

Mohock. Gangster, apache, *ruffian, thug, desperado.

moist. *Wet, damp, humid, dank.

Con. *Dry, arid.

molecule. Atom, *particle, corpuscle.

molest. Trouble, discommode, incommode, *inconvenience.

Ana. Disturb, *discompose, disquiet, perturb: interfere, *meddle, intermeddle, tamper: *intrude, obtrude, butt in: vex, *annoy, irk, bother.

mollify. Appease, placate, *pacify, propitiate, conciliate.

Ana. *Relieve, allay, mitigate, lighten: *moderate, temper, qualify: abate, lessen, reduce, *decrease.

Ant. Exasperate.

mollycoddle, v. Humor, pamper, *indulge, spoil, baby.

molt. *Discard, cast, shed, exuviate, slough, scrap, junk.

moment. 1 *Instant, minute, second, flash, trice, jiffy, twinkling, twinkle, split second.

2 *Importance, consequence, significance, import, weight.

Ana. Value, *worth: advantage, profit, avail, *use.

momentary. *Transient, transitory, passing, ephemeral, fugitive, fleeting, evanescent, short-lived.

Ant. A gelong.

momentum. Impetus, *speed, velocity, pace, headway.

monachal. *Monastic, monkish, cenobitic, cenobitical.

monastery. *Cloister, convent, nunnery, abbey, priory.

monastic or monastical. Monastic (or monastical),

monkish, monachal, cenobitic (or cenobitical; also coenobitic, coenobitical) agree in meaning of, relating to, or characteristic of monks, monasteries, or by extension, any cloistered religious order. **Monastic** is the preferred term by all writers and speakers who have no intent to depreciate or who wish to avoid any suggestion of bias or prejudice, or who wish to convey its implication of asceticism; as, the *monastic* vows of poverty, chastity, and obedience are taken by the religious of many orders, both male and female; "*monastic strictness*" (Sheridan); "*monastic fare*" (Pater); "there he lived with *monastic* cleanliness and severity" (Cather). **Monkish**, a term originating early in the Reformation period and used therefore by many writers and speakers with derogatory intent, still retains such suggestions even when the writer or speaker is unaware of its connotations; the term, therefore, is increasingly avoided as likely to be offensive; as, "the *monkish* stupidity of the times" (Goldsmith); "a *monkish*...superstition" (Shelley); "*monkish* cloisters" (Dickens). **Monachal** was once popular as a variant of *monastic* and *monkish* but is now rare, possibly because it never acquired particular connotations which would distinguish it from the other terms; as, *monachal* institutions or rules. **Cenobitic** suggests reference to the type of life led by monks, especially in distinction from that lived by friars in the Middle Ages or by hermits or anchorites; the term therefore implies living in a cloistered community under the guidance of a superior and may imply reference both to male and female religious; as, "The old *coenobitic* establishments of England" (Coleridge); the earliest followers of the religious life did not lead a *cenobitical* life.

monetary. *Financial, pecuniary, fiscal, bursal.

money, n. Money, cash, currency, legal tender, specie, coin, coinage agree in meaning the pieces of stamped

metal or their equivalents issued usually by a government, or by an authority recognized by the government, to serve as a medium of exchange in the country or section under the control of that government. **Money** was originally applied only to the coined gold, silver, copper, or other metal issued by a government or other authority as a medium of exchange. The term now, however, includes what is often called specifically *paper money*, or certificates or notes promising payment in metal money, that are issued by a government, authorized bank, or the like, and pass like coined metal as a medium of exchange. **Cash** applies to ready money; that is, to money actually in hand or in the boxes, safes, vaults, or the like, of an individual or a business or institution; as, the firm's supply of *cash* was very low because the larger part of the day's accumulation had just been deposited in the bank. **Currency** applies to all of the money in circulation, as distinguished from that which is not in circulation for one reason or another. "The first panacea for a mismanaged nation is inflation of the *currency*" (Hemingway). **Legal tender** applies specifically to the type of money which the law authorizes a debtor to offer and requires a creditor to receive as payment of money obligations. In the United States, standard silver dollars and treasury notes are legal tender to any amount unless the contrary is stipulated in the contract; subsidiary silver coins, for sums not over \$10; minor (nickel or bronze) coins, for not over 25c. In Great Britain, treasury notes are legal tender to any amount, silver coins are legal tender for not over 40s., the farthing for not over 6d., and other bronze coins for not over one shilling. **Specie, coin** (only in a collective sense), and **coinage** apply only to minted or coined money; they therefore imply an opposition to all forms of paper money such as treasury notes, bank notes, and the like; as, payments were demanded in *specie*, or in the *coin* of the realm. "We are far more concerned today with his debasement of the *coinage*" (Shaw).

monk. *Religious, friar, nun.

Ana. *Recluse, hermit, eremite, anchorite, cenobite: ecclesiastic, priest, *cleric, clergyman, abbé.

monkeyshine, n. *Prank, caper, antic, dido.

monkish. *Monastic, monachal, cenobitic, cenobitical.

monopolize. Monopolize, engross, absorb, consume.

Monopolize, the general term, means to possess or control exclusively; as, to *monopolize* the year's crop of cotton; a child should not be allowed to *monopolize* the attention of his family. "Every railroad *monopolizes*, in a popular sense, the trade of some area" (Justice Holmes). In its earlier use, **engross** implied the purchase of the whole, or nearly the whole, supply (as of a commodity) to control prices; as, edicts were issued against *engrossing* the market. In present use, *engross* may also be referred to any of a number of things which may be monopolized; as, war news *engrossed* their attention; pursuits which *engross* one's entire time. "The transition from government by a landed aristocracy to government by a city aristocracy gradually *engrossing* the land" (T. S. Eliot). **Absorb** is frequently interchangeable with *engross*, but it is less often predicated of persons as conscious agents and more often of things that have an inherent capacity for monopolization. "Manual occupations do not engage the mind sufficiently.... But composition, especially of verse, *absorbs* it wholly" (Cowper). "It is arithmetically impossible for every child to *absorb* the whole time of an adult tutor" (B. Russell). **Consume** comes into comparison with *engross* and *absorb* chiefly in an extended sense of each, implying monopolization of one's time, attention, or interest. These senses are not so common in the finite forms as in the participles; as, an *engrossing* pur-

suit; he is *engrossed* in writing a book; sitting in *absorbed* reflection; an *absorbing* interest or book; a *consuming* passion.

Ana. Possess, own, *have, hold: utilize, *use, employ: control, manage (see CONDUCT, v.).

monopoly. *Monopoly, corner, pool, syndicate, trust, cartel* are not, strictly speaking, synonymous terms but they are often confused. **Monopoly** denotes the exclusive control of any service (such as telephone or telegraph service) or traffic (such as transportation of goods and passengers by railroad) or of any commodity (such as wheat or petroleum) in a given market. *Monopoly* may imply exclusive control created by the state, as when a franchise is granted, an invention is patented, or a book is copyrighted. More frequently, however, the term is used to imply the exclusive power to buy or sell a given commodity or service in a given market, now especially when such control has been gained by the purchase of the sources of supply (such as mines) or of the whole or of the major portion of the stock of a given commodity. "In the reign of Edward III [German traders] had a practical *monopoly* of the carrying trade" (*M. Pattison*). Only by extension is *monopoly* used to denote the group or organization having such control. "It might be that when a combination reached a certain size it might have attributed to it more of the character of a *monopoly* merely by virtue of its size than would be attributed to a smaller one" (*Justice Holmes*). A purely temporal or local monopoly of a given commodity or of a given kind of property (such as the shares of a corporation), as on the stock or produce exchange on a selling day, constitutes a **corner**, so called because it puts all those who are determined to buy into a corner, or position where they must pay the price asked; as, the young and daring financier maintained his *corner* on wheat for three days. **Pool** is applicable strictly to a combination of property, or of interests of different persons or companies, by means of which a more or less permanent control or monopoly is acquired. Distinctively, however, *pool* implies a joint undertaking or end which cannot be attained unless the market is managed either by manipulating the prices for a given commodity, security, or the like, or by destroying the effects of competition, as through agreements concerning prices or rates, regulation of outputs, division of earnings, and the like, of each organization concerned. In common law and especially in the United States, pools are held to be illegal, as in restraint of trade. A group of financiers organized to profit by a monopoly was once, especially in or of European countries, called a **syndicate**, but at present the word is used of a group of individuals, firms, or corporations, often banking houses, which organize for a limited time to accomplish a given purpose, frequently to market an issue of bonds for some railroad, steel company, or public utility, which make their profit from the difference between the agreed-upon sum which they advance to the issuing corporation for the bonds, and the fixed sale price at which they market them, which assume responsibility for absorbing themselves any surplus bonds not marketed, and which dissolve as a group when the marketing period is completed. Outside of the field of finance, the use of the term is constantly being extended in its application to any combination, as of newspapers, business concerns, and the like, interested in a common project or enterprise, and now with decreasing frequency implying relation to a monopoly; as, his daily column appeared in a *syndicate* of over one hundred newspapers. **Trust** became prominent in the financial field when clever lawyers adapted the well-known trust provisions so common in wills and testaments to a scheme for inducing

stockholders in merged corporations to surrender their rights to "trustees" who would operate the corporations, and to accept, in return for their ownership stock certificates, trust certificates. Several of the larger business interests adopted this method of organization (the Standard Oil *Trust* and the Tobacco *Trust*, for example). Since the trust form of organization was defeated by U. S. Supreme Court decision, the word has been less common in financial use. Both pools and trusts are known in Germany as **cartels**: the term has some American and British use, and is widened in its application to be used of any large combined business unit.

monstrous. 1 **Monstrous, prodigious, tremendous, stupendous, monumental** are more or less hyperbolic adjectives, especially in their extended senses in which they mean astonishingly impressive. **Monstrous** commonly applies to that which is abnormal, usually in actual or relative size, but often also in shape or character: the term frequently carries suggestions of deformity, extreme ugliness, fabulousness, or the like; as, "the imagination turbid with *monstrous* fancies and misshapen dreams" (*Wilde*); "such *monstrous* feet they had... that he declined... to try on the Glass Slipper" (*Meredith*); "'my father, upon whose middle age it [the railway] came as a *monstrous* iron innovation'" (*Shaw*); "some... *monstrous* bulk of rumpled rock" (*C. E. Montague*). **Prodigious** usually implies a marvelousness that exceeds belief; it sometimes applies to that which is entirely out of proportion to that which is the previous or usual best, greatest, largest, or the like; as, the *prodigious* demand for steel in the World War; "a *prodigious* best-seller" (*A. Huxley*); "Men have always revered *prodigious* inborn gifts, and always will" (*C. W. Eliot*); "a mind with such *prodigious* capacity of development as Shakespeare's" (*T. S. Eliot*). **Tremendous** (etymologically, that causes trembling or fear), in very discriminating use, comes closer to awe-inspiring, terrifying in its immensity, and the like, than to gigantic or enormous, its common denotations in loose use; as, "A *tremendous* roar arose from the throat of [the mob in the Faubourg] Saint Antoine" (*Dickens*); "How shall we compare the cramped and limited vision of the universe which spread itself to the imagination of mankind in old time with the *tremendous* vistas opened out to us by modern science" (*Inge*); "the spell and *tremendous* incantation of the Thought of Death" (*L. P. Smith*). **Stupendous** in discriminating use implies the power to stun or astound; it is, therefore, most precisely used when it is applied to that which because of its size, its numbers, its complexity, or its greatness, exceeds one's power to describe or explain; as, "All [things] are but parts of one *stupendous* whole, Whose body Nature is, and God the soul" (*Pope*); "a *stupendous* catastrophe that occurred in the constellation Hercules 1300 years ago" (*W. Kaempfer*). **Monumental**, in its extended sense (see also MASSIVE), applies to that which is as conspicuously impressive or as massively framed or constructed as a monument (such as a great cathedral or an impressive memorial); as, a *monumental* literary work; a *monumental* lie. "The *monumental* pomp of age Was with this goodly personage; A stature undepressed in size, Unbent, which rather seemed to rise, In open victory o'er the weight Of seventy years, to loftier height" (*Wordsworth*).

Ana. *Enormous, immense, huge, vast, colossal, mammoth, gigantic.

2 *Outrageous, heinous, atrocious.

Ana. *Flagrant, glaring, gross, rank: *ominous, portentous, fateful: flagitious, nefarious, infamous (see VICIOUS).

monument. *Document, muniment, record, archive.

monumental. 1 *Monstrous, prodigious, tremendous, stupendous.

Ana. Colossal, gigantic, *enormous, mammoth: impressive, *moving.

2 *Massive, massy, bulky, substantial.

Ana. Imposing, stately, majestic, august, magnificent, *grand.

mood. Mood, humor (or humour), temper, vein are here compared as meaning a temporary state or frame of mind in which one emotion or desire or one set of emotions gains the ascendancy. Mood (etymologically, mind or feeling) is now the comprehensive term for any such frame of mind, regardless of its particular cause, its particular character, its effect on others, or its length of existence. Mood carries a stronger implication of pervasiveness and of compelling power than the other terms; also, it may refer not only to the frame of mind (as, to feel in a mood to work; a sullen mood; changing moods) but to its expression in a literary or artistic work (as, "the language, the stresses, the very structure of the sentences are imposed upon the writer by the special mood of the piece"—*Cather*) or to that which is seen, heard, or the like, in such a way as to evoke a mood or to harmonize with one's mood (as, "Only in summer days of highest feather did its [the heath's] mood touch the level of gaiety"—*Hardy*; "Our painters are prone to acquiesce in the colours of nature as they find them, rather than to use colours expressive of the mood evoked in themselves"—*Binyon*). Humor, as here compared (see also WIT, 2), applies chiefly to a mood which is the result of one's peculiar temperament or of one's physical or mental condition at the moment: it is usually preferred to mood when the idea of capriciousness, or of whimsicality, or of ability to see the ludicrous, or the like, is to be suggested; as, "I am not in a humour to hear you further. Leave me, please" (*Hardy*); "The Baronet seemed in a humour for dignified fooling; the lady for serious converse" (*Meredith*); "he surrendered to her humour, and went through the form of begging Mumps's pardon" (*Meredith*); "The women were horrified or admiring, as their humour moved them" (*E. Wharton*). Temper, as here compared (see also DISPOSITION, 2), applies to a mood dominated by a single strong emotion, often specifically that of great anger; as, "He is in a temper" "I never knew him So out of patience with them" (*Millay*). When qualified by an adjective indicating the controlling emotion, temper may apply to any humor that manifests itself in a display of feeling; as, "that meekness has done me more harm than the bitterest temper" (*Hardy*); "she was evidently now in a gay, frolicsome temper" (*Hudson*). Vein (see also TOUCH) is often used in the sense of mood, or especially of humor, but with a stronger implication of transitoriness than mood (as, "When the peacock vein rises, I strut a Gentleman Commoner"—*Lamb*), and a weaker implication than humor of a temperamental or physical cause (as, "The merry vein you knew me in, is sunk into a turn of reflection"—*Pope*).

Ana. *Disposition, temper, temperament, character, personality, individuality: *soul, spirit: emotion, *feeling, affection.

moor, v. 1 *Secure, anchor, rivet.

Ana. *Tie, bind: attach, *fasten, affix, fix: balance, steady, *stabilize, trim.

2 *Anchor.

moral, adj. Moral, ethical, virtuous, righteous, noble are synonyms only when they mean conforming to a standard of what is right and good: moral and ethical also come into comparison as meaning of or relating to

the science or theory of right conduct. Moral is by far the most comprehensive term of the group: in all of its here pertinent senses it implies a relationship to character or conduct viewed as good or bad or as right or wrong. Sometimes, moral implies an opposition only to that which is not related to or concerned with character or conduct viewed as good or bad or as right or wrong; as, moral goodness as distinguished from intellectual goodness or spiritual goodness; moral value as distinguished from economic value, aesthetic value, and the like. "The whole tendency of modern thought... is to extenuate the responsibility of human nature, not merely on the moral side, but equally on the spiritual side" (*C. Mackenzie*). Moral also applies to things such as literary works, works of art, philosophies, or to writers, artists, philosophers, etc., concerned with the determination or teaching of principles of right conduct or good living; as, a moral tale; moral essays; moral philosophy or philosophers; paintings that convey a moral lesson; "Tragedy... hath even held the gravest, *moralist*, and most profitable of all other poems" (*Millon*). The term also applies to men or communities, to acts, to conduct, and the like, in what is probably its chief current sense of conforming to the accepted standard of what is right and good (often, specifically, in sexual conduct) or, in some use, of conforming to the mores, or customs or conventions of a people regarded as binding laws; as, to lead a moral life; a man of high moral character; the moral ideals of the community; fine moral citizens; "to increase his respectability in the eyes of moral Britain" (*Meredith*); "by no means ascetic, scarcely even, in the narrow sense, a severely moral people" (*H. Ellis*); "His nature was purely sensuous, and she strove to make him moral, religious" (*D. H. Lawrence*). Ethical primarily implies a relationship to ethics, or the branch of philosophy which deals with moral principles, or often, more specifically, with the principles governing ideal human character and with the ideal ends of human action (as, an ethical system; an ethical code): for this reason, although ethical is often used interchangeably with moral, it characteristically gives a slightly different impression owing to certain subtle connotations; thus, ethical principles may, according to the context of the phrase, convey a strong suggestion of principles derived from a certain school of ethics, or of a formulated code behind them, or of an idealistic quality; an action is often described as ethical rather than moral when it accords with what the writer or speaker believes to be a higher or finer standard of morality than that which is generally accepted, or when it is in keeping with the code of ethics governing his profession (especially law and medicine); the phrase "an ethical person" often differs from the phrase "a moral person," in suggesting an assent to ethical principles or an attention to the niceties of ethics or to the ideal ends suggested by a system or code of ethics. "Meanwhile we hear... the ethical instinct of mankind asserting itself with splendid courage and patience" (*H. Van Dyke*). "I have always thought it most regrettable that serious and ethical thinkers... should go scuttling through space in this undignified manner" (*L. P. Smith*). Virtuous implies the possession or manifestation of moral excellence in character: in its most general sense, it implies rectitude, justice, integrity, and all other virtues (especially those which are described as the Christian [or divine] and as the cardinal virtues), but in a narrower sense, especially as applied to women and sometimes to men, it often means little more than chasteness or perfect fidelity in marriage; as, "poor people... whether they be lazy or busy, drunken or sober, *virtuous* or vicious" (*Shaw*); "A

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

man might grind the faces of the poor; but so long as he refrained from caressing his neighbours' wives and daughters, he was regarded as *virtuous*" (A. Huxley). " 'Didst thou not kill this king?' 'I grant ye.'... 'God grant me too Thou mayest be damned for that wicked deed! O, he was gentle, mild, and *virtuous*!' " (Shak.). *Righteous* differs from *virtuous* chiefly in its stronger implication of freedom from guilt or blame; as applied to persons, it often implies justification, especially worthiness of salvation in the theological sense (as, "I came not to call the *righteous*, but sinners to repentance"—Mark ii. 17; "What but thy malice moved thee to misdeem Of *righteous* Job"—Milton); as applied to acts, conduct, even displays of passion, it usually implies justifiability (as, *righteous* indignation; "a *righteous* occupation"—Conrad; *righteous* conduct). *Noble* (as here compared: see also *GRAND*) applies to persons, their acts, utterances, careers, and the like, and implies the possession and exhibition of a conspicuously high character. Oftentimes, the word carries no other clear implications and seems little more than a term of high praise implying moral or ethical eminence; as, "This was the *noblest* Roman of them all" (Shak.); "a *noble* aim, Faithfully kept, is as a *noble* deed" (Wordsworth). At other times, however, the term suggests not only moral eminence but the absence of all taint of anything petty, such as self-seeking, self-interest, concern for the world's standards, or the like: it then often suggests independence, or magnanimity, or high courage, or some other outstanding moral excellence. " 'Better a man without riches, than riches without a man.' 'A *noble* saying—and acted on would yield A *noble* breed of men and women' " (Tennyson). "The disinterested search for truth is certainly one of the highest and *noblest* careers that a man can choose" (Inge).

Ana. Right, *good: *upright, honest, just, honorable, scrupulous, conscientious: *chaste, pure, modest, decent: ideal, *abstract.

Con. *Immoral, unmoral, amoral, nonmoral.

morality. *Goodness, virtue, rectitude.

Ana. Integrity, probity, honor, *honesty: *excellence, perfection, virtue, merit.

morally. *Virtually, practically.

mordacious. *Caustic, mordant, acrid, scathing.

Ana. See those at MORDANT.

mordant. *Caustic, mordacious, acrid, scathing.

Ana. *Incisive, trenchant, cutting, biting, clear-cut, crisp: *pungent, poignant, piquant, racy, spicy, snappy: *sharp, keen, acute.

moreover. Besides, furthermore, likewise, *also, too.

moron. Imbecile, idiot, *fool, simpleton, natural.

morose. Glum, gloomy, saturnine, dour, *sullen, surly, sulky, crabbed.

Ana. Splenetic, choleric, *irascible, testy, cranky, cross: peevish, snappish, waspish, petulant, *irritable: brusque, gruff (see BLUFF).

mortal, adj. 1 *Deadly, fatal, lethal.

Ana. Destructive (see corresponding verb DESTROY): virulent, venomous, *poisonous: implacable, unrelenting, relentless (see GRIM).

Ant. Venial (especially of a sin).

2 *Earthly, terrestrial, terrene, earthy, mundane, worldly, sublunary.

Ant. Immortal (of things).

mortified. *Ashamed, chagrined.

Ana. Harassed, harried, worried, annoyed (see WORRY, v.): humiliated, humbled, abased (see ABASE): abashed, embarrassed, discomfited (see EMBARRASS).

motherly. *Parental, maternal, fatherly, paternal.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

motif, n. 1 Device, design, pattern, *figure.

2 Variant of MOTIVE, 2.

motile. *Movable, mobile, motive.

motion, n. *Motion, movement, move, locomotion, stir* are here compared as meaning the act or an instance of moving. *Motion* is the preferred term in abstract use for the act or process of moving, without regard to that which moves or is moved: in philosophical and aesthetic use it is an especially comprehensive term, for it may apply to manifestation of change or of changing not only from place to place, but from condition to condition, from step to step in a progression, or the like; as, the laws of *motion*; "this vicissitude of *motion* and rest, which we call life" (Steele); "in all the arts the principle of *motion* prevails increasingly over the principle of repose" (Babbitt). Ordinarily, however, the term implies visible moving, whether discernible to the naked eye (or other sense) or through a telescope or other instrument; as, the *motion* of the planets; there is no *motion* in the atmosphere; "I was lying... injured, and incapable of *motion*" (Hudson); the restless *motion* of the sea. *Movement* usually implies definite regulated motion: the term is seldom used to denote an abstraction, although it may be used figuratively to denote a quality of representation in a work of art that suggests motion (as, *movement* is one of the most striking characteristics of the Elgin marbles and of the Winged Victory), or a quality in poetry, drama, or the like, that suggests a definite rate of speed or progression as in the meter, the action, or the like (as, "No one will so well render Homer's swift-flowing *movement* as he who has himself something of the swift-moving spirit of Homer"—Arnold). In concrete use, *movement* implies a passage (sometimes self-initiated, sometimes under guidance or compulsion) from place to place, from situation to situation, from condition to condition, or the like; it may, in this sense, be used interchangeably with *motion* in the collective singular or in the plural; as, the *movements* of the planets; the restless *movement* of the sea; the *movement* of troops to the front was then in progress; severe storms hindered the *movement* of trucks carrying supplies; the progress of man is so slow that the *movement* is rarely perceptible. *Movement* also is frequently used for an instance of moving (especially one involving a change of place or position); as, "a *movement* among the ferns attracted Adrian" (Meredith); every *movement* of the bird was watched by the cat. *Move* applies chiefly to a definite instance of moving or of making a change in one's location or in the place occupied by something else: usually, the term suggests a clearly defined purpose or goal; as, the detectives are watching his every *move*; the next *move* (in a game of chess) is yours; their next *move* on their tour will be from Dover to Ostend; when the hostess made a *move* from the table all the guests arose and followed her to the drawing room. *Locomotion* was originally used, especially in philosophy, as a more specific term than *motion* because it definitely implied motion from place to place; thus, plants were described as living things incapable of *locomotion* and animals as living things capable of *locomotion*. In modern use, the term suggests travel especially by artificial means, as by boat, train, airplane, or automobile; as, "Every improvement of the means of *locomotion* benefits mankind morally and intellectually" (Macaulay). *Stir* applies to any motion or movement (often without an implication of changes of place or condition, or of progress) that involves a disturbance (but not necessarily a displeasing disturbance), especially of that which has been quiet or at rest, but also of that whose motion or movements indicate excitement, bustle, or agitation; as, "not a *stir*

of child or mouse" (*Stevenson*); "many persons find *stir*, and *movement*, and the presence of a crowd an agreeable stimulus" (*A. C. Benson*); "It is an age of *stir* and change" (*Galsworthy*).

Ana. Impetus, momentum, *speed, velocity, pace, headway.

motivate. Actuate, *activate.

Ana. Stimulate, quicken, *provoke, excite: arouse, rouse, *stir: inspire, animate, fire, *inform.

motive, n. 1 **Motive, spring** (or **spring**s), **impulse**, **incitative**, **inducement**, **spur**, **goad** come into comparison when they denote a stimulus inciting or prompting a person to act or behave in a definite way. **Motive** applies chiefly to any emotion, such as fear, anger, hatred, love, or the like, or to any desire (such as one for fame, wealth, knowledge, supremacy, revenge, or the like) or to any physical appetite (such as hunger or lust) which operates on the will and definitely moves it to activity. "Do you think," said Sir Austin, "...that you can trace every act of his to its *motive*?" (*Meredith*). "Whenever a man does a thoroughly stupid thing, it is always from the noblest *motives*" (*Wilde*). "I could slay no living thing except from *motives* of hunger" (*Hudson*). "Even where some piece of knowledge is uninteresting in itself, a man can force himself to acquire it if he has an adequate *motive* for doing so" (*B. Russell*). **Spring**, or the more common plural **spring**s, is used in place of *motive* without much difference in meaning; among very precise writers and speakers, however, it often refers to the underlying or basic motive which is often not fully recognized even by the person or persons affected and is especially hidden from all but the most penetrating observers. "It is difficult...to come at the true *spring*s of action" (*T. Forrest*). "The love of gold was the sordid *spring* of the most brilliant enterprises of the republic" (*C. Merivale*). **Impulse** is a complex term because it has both a general sense and a very specific sense in each of which some important implications run counter to those of the other sense. In both its inclusive and its specific senses, however, *impulse* may or may not imply, as *motive* or *spring* always do imply in very precise use, performance of an act or engagement in an activity; the term stresses impetus, or driving power, rather than its effect; thus, one may check (or restrain, or forgo, or dismiss) an *impulse*. In its more general sense, *impulse* is applicable to any powerful incitement or instigation to activity resulting from the operation or influence of an external agent or agency or arising within oneself as the result of a native propensity, one's peculiarity of temperament, one's intellectual or emotional constitution, or the like. "He was not a man...to yield timidly to the *impulses* of others" (*Prescott*). "This declamation is in its *impulse*, if not in its achievement, Senecan" (*T. S. Eliot*). "Men like the elder Cato, Varro, and the elder Pliny liked to record the curiosities of nature, but they had not the systematizing *impulse*, the restless passion for order, of the Greeks" (*Buchan*). "The *impulse* behind the reformation was the *impulse* of the English to express their nationality" (*C. Mackenzie*). Specifically, however, *impulse* is applicable to a spontaneous, often irrational, and in undisciplined persons usually irresistible, urge to do something. "Dr. Lavendar...said to himself, chuckling, 'If I'd followed my *impulse*, I'd have married them then and there, and made no bones of it'" (*Deland*). "The first *impulse* of a child in a garden is to pick every attractive flower" (*B. Russell*). "Gard suffered an odd *impulse* to get up and kick his chair over; but people don't do those things. He kicked the back log instead" (*M. Austin*). **Incentive** applies chiefly to any cause which incites and encourages action or activity, often,

but far from invariably, one for which the person affected is not himself responsible or which does not originate within himself; as, to offer a bonus as an *incentive* to greater speed and efficiency in production; with some pupils praise is not always an *incentive* to study. "Money is not the only *incentive* to work, nor the strongest" (*Shaw*). "The great *incentive* to effort, all through life, is experience of success after initial difficulties" (*B. Russell*). "People...cut off here without the influence of example or emulation, with no *incentive* but some natural yearning for order and security" (*Cather*). **Inducement** is narrower than *incentive*, for it suggests an external influence and often an attempt to entice or allure to action or activity. "The chief *inducements* to serve were the pension and the right of citizenship which awaited a soldier on his discharge" (*Buchan*). **Spur**, literally a pointed implement worn by a horseman at or above his heel and used to prick his horse in urging him on, in its extended use, applies to any impetus to action which not only incites but stimulates the mind and increases its energy and ardor. "Fame is the *spur* that the clear spirit doth raise...To scorn delights and live laborious days" (*Milton*). "The *spur* which drove me was sharp....I took on added duties, read books not on any prescribed list, and dashed indefatigably from public ward to private pavilion and to clinics in other hospitals" (*V. Heiser*). **Goad**, literally a pointed rod used to prod a beast who moves or works too slowly, in its extended sense applies to any stimulus to action or activity that keeps one going in spite of one's will or desire. "The daily *goad* urging him to the daily toil" (*Macaulay*).

Ana. *Cause, determinant, antecedent, reason: *desire, appetite, urge, passion, lust: *feeling, emotion, passion: purpose, intent, *intention, aim, end.

2 Also motif. *Subject, matter, subject matter, argument, topic, text, theme, leitmotiv.

motive, adj. *Movable, mobile, motile.

Ana. *Active, operative, dynamic: moving, driving, impelling or impulsive (see corresponding verbs at **MOVE**).

motley. Heterogeneous, *miscellaneous, assorted, promiscuous.

Ana. *Different, diverse, divergent, disparate, various: discrepant, incompatible, uncongenial, incongruous (see **INCONSONANT**).

Con. Uniform, homogeneous, parallel, akin, alike, identical (see **SIMILAR**).

motto. Proverb, adage, *saying, saw, maxim, epigram, aphorism, apothegm.

mound. **Mound, bank, dune, embankment, terrace, tumulus, barrow** are here compared as meaning a mass of earth or of earth and rock forming a small and often impermanent elevation. **Mound** usually implies a heaping or piling up in the shape of a small hill; it is capable of being applied to any built-up elevation of this shape as inconsiderable in size as those raised around the roots of some growing vegetables or as large as those found in regions where winds and waters pile up hillocks of sand or earth; as, the *mounds* over cemetery graves. "The merest grain of sand drifts unseen into a crevice, and by-and-by another; after a while there is a heap; a century and it is a *mound*" (*Jefferies*). **Bank** may be used in place of *mound* but it more often suggests a long, moderately high elevation rising to a ridge or level and sometimes also descending on the other side. Such banks often run alongside a road or are thrown up as a boundary wall or a fortification. "I know a *bank* where the wild thyme blows, Where oxlips and the nodding violet grows" (*Shak.*). "The gate was locked when he climbed up the steps cut in the *bank*" (*C. Mackenzie*). **Dune**

applies to one of several mounds or banks of sand built up by the force of the wind, as on the shore of the sea, of a large lake, in a river valley, or in a desert region; since the shape and size of dunes are at the mercy of winds, the term suggests shifting and impermanence. "Mounds and *dunes* of loose sand which whirled through the air all day in the boisterous spring winds" (*Cather*). An **embankment** is an artificial bank, usually of solid construction, sloping on both sides, and topped with a roadway or path. Most levees and many dikes, ramparts, bulwarks, and the like, are embankments. Strictly, a **terrace** is the level top of a bank or embankment, used for pleasure or for planting; the word, however, in current use commonly suggests not only the leveled top but the entire formation, including its steep or rounded face or faces walled with stone or brick or covered with grass. Terraces are found chiefly on the landscaped grounds of a house or institution where rough or steep natural elevations have been made smooth, even, and easy, or on the sides of hills or mountains (then usually in tiers), where they counteract the harm done by erosion by providing surfaces which retain the soil and are capable of cultivation. **Tumulus** and **barrow** are applied chiefly to one of the sepulchral mounds of earth and rock built by primitive peoples over the graves of their dead, or to any of the small isolated round hills that dot a plain or gently sloping region of a country, and may or may not have been originally sepulchral mounds. "A plain, on which are five earthen *tumuli*, or *barrows*" (*T. Pennant*). "Danish *barrows*" (*Tennyson*).

mount, n. *Mountain, peak, alp, volcano, mesa.

mount, v. 1 Ascend, soar, *rise, arise, tower, rocket, levitate, surge.

Ant. Drop.

2 *Ascend, climb, scale.

Ant. Dismount.

mountain. Mountain, mount, peak, alp, volcano, mesa.

Mountain, the ordinary and inclusive term, varies somewhat in meaning according to locality. In general, it designates an elevation higher and steeper than a hill, rising more or less abruptly from its surrounding country, and standing out conspicuously when viewed from a distance. **Mount** is often used in proper names of mountains; otherwise it is poetic. **Peak**, when applied to a mountain, designates one that rises to a sharp point; it may be isolated or one of a range. **Alp** (usually capitalized), which is chiefly poetic, suggests a towering, dizzy, or unscalable height. "Yet do I sometimes feel a languishment. . . To sit upon an *Alp* as on a throne, And half forget what world or worldling meant" (*Keats*). **Volcano**, which is strictly applied to a vent in the earth through which hot or molten rock and the like issue, also designates the cone-shaped mountain formed chiefly of this ejected material, and topped, usually, by a crater. **Mesa**, a Spanish term adopted in English, is commonly used in the southwestern part of the United States to designate a flat-topped elevation, usually comparable to a hill in height, but more suggestive of a mountain because of its steep clifflike sides.

Ana. *Height, elevation, altitude.

mountebank, n. *Impostor, faker, charlatan, empiric, quack.

mourn. Sorrow, *grieve.

Ana. Lament, bewail, bemoan (see **DEPLORE**): weep, keen, wail, *cry.

Con. Rejoice, gladden, delight, *please: exult, elate (see corresponding adjectives at **ELATED**).

movable or moveable. Movable (or moveable), mobile, motile, motive come into comparison when they

mean capable of moving or of being moved. **Movable**, in current use, applies not to that which has independent power of motion, but to that which is not too heavy to be moved by men or machines as by lifting, drawing, pushing, or driving, to another place or position (as, a *movable* steam engine; one's *movable* possessions; "some of these cabins were *moveable*, and were carried on sledges from one part of the common to another"—*Macaulay*), or to that which is not fixed, as in position or date (as, printing from *movable* types; a *movable* attachment for a machine; *movable* feasts such as Easter and Whitsunday). **Mobile** stresses facility or ease in moving or, less often, in being moved. In early use, it described particularly the quality of eyes that could range at will, or of a star that is not fixed: in current use, it often describes the quality of flowing which distinguishes a liquid or fluid from a solid (as, "the *mobile* liquid passes into a compact rigid solid"—*T. H. Huxley*) or which characterizes an electric current or charge (as, "long-lasting circulation of the *mobile* charge, around and around the circuit"—*Karl K. Darrow*) or the character which distinguishes something that moves or is equipped to move quickly and readily, or to go from place to place, from that which is slow-moving or does inside work (as, a *mobile* army; a *mobile* radio unit). But, more commonly, *mobile* describes features, faces, expressions of face, thoughts, and the like, which respond quickly and obviously to changing emotions, mental states, external stimuli, and the like, often at the same time connoting either fickleness or instability, or flexibility and versatility; as, "the gray restless eye, the thin *mobile* lips" (*J. R. Green*); "the *mobile* mirror of his mind" (*Mrs. H. Ward*); "he was no more *mobile* than his countenance" (*Cather*); "You are as *mobile* as the veering air, And all your charms more changeful than the tide" (*Millay*). **Motile** is almost entirely a technical term. In biology it applies to that which is not permanently attached and is free to move about or which has power of spontaneous motion; as, *motile* cells; *motile* spores; *motile* flagella. In psychology the term describes either the type of person in whom the tendency to recall muscular movements prevails, or the kind of images most easily recalled by a person of this type; thus, the *motile* type is distinguished from the *audile* (or ear-minded) or the *visile* (or eye-minded) types. **Motive** implies a moving only in the transitive sense of driving, or causing movement, or impelling to action: the term is now chiefly applied to power, energy, or the like, produced by fuel such as gasoline, by steam, by electricity, or other forces; as, steam is no longer the only *motive* power used in operating railway locomotives; the question of what *motive* power will be best for the new ship has not yet been decided; *automotive* (that is, mechanically self-propelled) vehicles. Even when the reference is to that which constitutes a motive for action, "*motive* power," "*motive* force," or "*motive* energy" is more likely to be used than, as in the past, "*motive* cause," "*motive* argument," "*motive* principle," or the like. "There was no *motive* power in experience. It was as little of an active cause as conscience itself" (*Wilde*). "As for the dream of the habitable earth peaceful under a universal empire . . . the *motive* power to realize it must come from the West, where men could still be both disciplined and free" (*Buchan*).

Ana. *Changeable, changeful, variable, mutable.

Ant. Immoveable: stationary. — **Con.** Fixed, set, settled, established (see **SET**, v.).

move, v. 1 **Move**, actuate, drive, impel come into comparison when they mean to set or keep going or in motion. **Move** is so general that the direction or nature

of the motion can be gathered only from the context; it may imply an agent or an agency as the mover; as, what power or force *moves* the rotating earth?; the mechanism that *moves* the locomotive; vessels *moved* by wind, steam, or electricity. *Actuate* is far more restricted in its reference than *move*, being used chiefly in connection with machinery and mechanisms; it stresses the communication of power to work or to set in action; as, a turbine is *actuated* by the force of a current of fluid under pressure. *Drive* implies forward and, usually, continuous rather than recurrent motion; it often emphasizes the effect produced, as of speed, violence, or show of power, rather more than the impetus given; as, a ship *driven* by wind and tide; the washing machine is *driven* by electricity; the heart *drives* the blood through the arteries. *Impel*, when used of physical motion, adds to *drive* the implication of great force in the impetus. "They *drive* him with their guns—like this! He imitated the action of a man's being *impelled* forward by the butt-ends of muskets" (*Dickens*).

These words are also synonymous in another sense, when they mean to excite or provoke a person to a given act or action or to given conduct or behavior. *Move* may imply an agent, human or divine, an external influence, or an inner spring or motive, as the mover. "If kingdom *move* thee not, let *move* thee zeal and duty" (*Milton*). "I *moved* the king my master to speak in the behalf of my daughter" (*Shak.*). *Actuate* always presupposes an inner stimulus, such as a desire, a feeling, a motive. "Men of the greatest abilities are most fired with ambition. . . ; mean and narrow minds are the least *actuated* by it" (*Addison*). "It used to be the thing for parents to represent themselves as Olympians, immune from human passions and always *actuated* by pure reason" (*B. Russell*). *Drive* presupposes a compelling force, sometimes outer, sometimes inner, which affects the freedom of the will. "What had I ever done to you that would *drive* you to such a step?" (*M. Austin*). *Impel*, like *actuate*, implies an inner prompting, but it suggests greater urgency in the desire or motive and more headlong action. "A life of adventure. . . was that to which his nature irresistibly *impelled* him" (*Arnold*). "She was a prey to shoddy, facile emotions. . . none of which had power to *impel* her to any action" (*R. Macaulay*).

Ana. *Activate, actuate, motivate: *provoke, excite, quicken, stimulate: *induce, persuade, prevail on or upon.

2 Move, remove, shift, transfer come into comparison when they mean to change or to cause to change from one place to another. *Move* is by far the most comprehensive of these terms, all of which are general in that they do not in themselves and apart from the context imply any definite kind of agent or agency or any definite means of conveyance or transportation, or give any indication of the extent of distance covered. *Move* is therefore chiefly used when nothing more than the motion or activity involved in a change of place is to be indicated; as, to *move* a table from a corner to the center of the room; to *move* one's family from New York City to Chicago; to *move* a house across the street to a larger lot; he is about to *move* from the city to the country; he will not *move* from that chair until he is called to dinner. *Remove* is only slightly less general than *move*, but the term implies (as *move* seldom, if ever, implies, apart from a statement in the context) that the person or thing that changes or is changed from one place to another is moved from or quits a place which is his or its normal or original location, station, position, occupation, or the like, for one which is new or temporary; as, to *remove* the cover from a platter; to *remove* the dishes from the

table. Many persons prefer the more simple *move* to *remove* when a change of habitation or business location is indicated; as, to *move* one's family to one's summer home; to *move* from Chicago to Denver. When the idea of getting rid or eradicating is stressed, *remove* is the preferred term; as, to *remove* a person from office; they *removed* the cause of the epidemic of typhoid fever when they put the typhoid carrier under close surveillance. *Shift* throws so much emphasis on change of location, direction, or the like, that the implications of voluntary or guided motion or activity are seldom apparent: therefore the term is often preferred when unrest or uncertainty or instability is to be suggested; as, the cargo *shifted* in the storm; the wind will *shift* during the night to due east; he *shifts* continually from job to job; to *shift* one's weight from one foot to another; a ne'er-do-well who *shifts* lodgings from week to week. However, *shift* is often used colloquially when a mere change in position is implied; as, give me a hand in *shifting* this bureau; he *shifted* his quid of tobacco to the other side of his mouth before answering. *Transfer* (as here compared: see also TRANSFER, 2) commonly implies a change from hand to hand, or from one mode of conveyance to another, or from one depository to another, or the like: it is often used in a specific sense, especially in the business of transportation; as, a truck will *transfer* our baggage from the railway station to our home; you will need to *transfer* (i.e., move to another train) at Albany; to *transfer* one's animus from one person to another. "There was no way in which he could *transfer* his own memories of European civilization into the [American] Indian mind" (*Cather*).

Ana. Displace, *replace, supplant, supersede: convey, *carry, bear, transport, transmit.

move, n. Movement, *motion, locomotion, stir.

Ana. Change, alteration, variation, modification (see under CHANGE, v.): transformation, metamorphosis, conversion, transmogrification (see under TRANSFORM).

moveable. Variant of MOVABLE.

movement. *Motion, move, locomotion, stir.

Ana. *Action, act, deed: change, alteration, variation, modification (see under CHANGE, v.): activity, operativeness or operation, dynamism or dynamism, liveliness (see corresponding adjectives at ACTIVE).

moving. Moving, impressive, poignant, affecting, touching, pathetic are synonymous so far as they agree in meaning having the power to excite or the effect of exciting deep and, usually, solemn emotion in the spectator, the reader, or the like. Only *moving*, the most general of these words, can be used in place of any of the others; the rest, though not mutually exclusive in their implications, are in precise use very specific. That is *moving* which stirs one deeply or evokes a strong emotional response, as by thrilling, entrancing, agitating, saddening, or the like; as, a *moving* scene in a play; a *moving* appeal for help. "To my mind the most *moving* . . . single line in English poetry" (*Day Lewis*). "Dancing is . . . the most *moving*, the most beautiful of the arts" (*H. Ellis*). That is *impressive* which imposes itself forcibly on the mind and compels admiration, awe, conviction, or the like. "Scenery . . . majestic without severity, *impressive* without showiness" (*Hardy*). "Ordinary men cannot produce really *impressive* art-works" (*Shaw*). "I regret that I cannot put into more *impressive* words my belief that . . . the defendants were deprived of their rights" (*Justice Holmes*). That is *poignant* which produces so painfully sharp an impression that it pierces one's heart or penetrates to the depth of one's being. "It was warm and yet fresh; blindfold, one could have

mistaken it for a morning in early May: but this kind of day... had a more *poignant* loveliness in autumn than in spring, because it was a receding footfall, a waning moon" (*Jan Struther*). That is *affecting* which moves one to tears or to some similar manifestation of feeling; as, even the most callous found the play *affecting*; an *affecting* reunion of a mother and her child. That is *touching* which arouses tenderness or compassion or which melts the heart. "A clean sober little maid, with a very *touching* upward look of trust" (*Galsworthy*). "Hers was a perfect little homily... and it ended with *touching* allusions to Pluffies' Mamma and Papa" (*Kipling*). That is *pathetic* which moves one to pity. Sometimes it suggests pity induced by compassion for one in sorrow or distress. "He was a lonely old man... Rather *pathetic*! Tony... felt a quick sympathy with him" (*Arch. Marshall*). "Pathetic gropings after the fragments of a shattered faith" (*Day Lewis*). Sometimes it suggests pity mixed with contempt for that which is weak, inadequate, futile, or the like; as, "a *pathetic* confusion of aims" (*Binyon*); *pathetic* attempts at portrait painting.

Ana. Exciting, stimulating, quickening, provoking (see **PROVOKE**): thrilling, electrifying (see **THRILL**): stirring, arousing, rousing, awakening, rallying (see **STIR**).

mucilaginous. Gummy, *adhesive, gluey, glutinous, sticky.

muddle, v. *Confuse, bemuddle, addle, fuddle, befuddle.

Ana. *Puzzle, perplex, mystify, bewilder, distract, non-plus, confound, dumfound: faze, rattle, discomfit, *embarrass: fluster, flurry, upset, agitate, *discompose. **Ant.** Enlighten.

muddle, n. *Confusion, disorder, chaos, disarray, jumble, clutter, pie, snarl.

muddy. *Turbid, roiled, roily.

Ana. Murky, opaque, gloomy, obscure, *dark: confused, muddled, bemuddled, addle (see **CONFUSE**): *dirty, filthy, foul, nasty, squalid.

Con. *Clear, transparent, translucent, lucid, limpid.

lug, n. *Face, countenance, visage, physiognomy, puss.

mulct. *Penalize, fine, amerce, scone.

Ana. Exact, require, *demand, claim.

mulish. *Obstinate, dogged, stubborn, pertinacious,

stiff-necked, pigheaded, bullheaded. **Ana.** Headstrong, intractable, recalcitrant, refractory, ungovernable, *unruly: fixed, set, firmed or firm (see corresponding verbs at **SET**).

multifarious. Manifold, multifold, divers, numerous, various, *many, several, sundry.

Ana. Disparate, diverse, divergent, *different: incongruous, incompatible, uncongenial, discrepant, discordant, *inconsonant, inconsistent.

multifold. *Many, several, sundry, various, divers, numerous, manifold, multifarious.

Ana. Reproduced, copied, duplicated (see corresponding nouns at **REPRODUCTION**): repeated, iterated (see **REPEAT**).

multiply. *Increase, augment, enlarge.

Ana. Propagate, reproduce, breed, *generate: expand, spread, stretch (see corresponding nouns at **EXPANSE**).

Con. *Decrease, diminish, lessen, reduce, abate.

multitude. *Multitude, army, host, legion* come into comparison when they mean, both in the singular and plural, a very large number of persons or things. They do not, as *crowd, throng*, etc., necessarily imply assemblage, but all of them are occasionally, or even often, used with that implication. *Multitude* stresses numerosness; always, however, with respect to what is the standard for, or the test of, numerosness in the thing referred to; thus, in "that child always asks a *multitude*

of questions" and "I never saw such a *multitude* of books before in one house" *multitude* obviously refers to a much smaller number in the first than in the second illustration. "We must not... expect systematic education to produce *multitudes* of highly cultivated and symmetrically developed persons" (*C. W. Eliot*). When applied to a group of persons taken as a whole, "a *multitude*" suggests an assemblage of a large number of persons (as, "moved his arms with large pawing gestures, as though he were distributing lay blessings to a kneeling *multitude*"—*E. Wharton*), but "the *multitude*" suggests the masses of ordinary people or the populace (as, speeches that sway the *multitude*; a book that appeals to the *multitude*). *Army* usually adds to *multitude* the implications of orderly arrangement without a suggestion of crowding, and often, especially in clearly figurative use, a progressive advance without any suggestion of halting or gathering; as, they were served by a vast *army* of waiters; an *army* of locusts. "Brave conquerors,—for so you are, That war against... the huge *army* of the world's desires" (*Shak.*). "We have considered science as a steadily advancing *army* of ascertained facts" (*Inge*). *Host*, like the other terms of this group, has for its primary implication numerosness. It may mean nothing more (as, she has *hosts* of admirers; he knows *hosts* of people) but it may suggest more strongly than any of the other words a concentration in great numbers of the thing referred to: in such cases it usually connotes an impressive or striking array; as, a clear cold night and a *host* of stars in the sky. "I saw a crowd, A *host*, of golden daffodils; Beside the lake, beneath the trees, Fluttering and dancing in the breeze" (*Wordsworth*). *Legion* derives its leading implication of incalculable numbers from Biblical rather than from military sources (in ancient Rome, it denoted the principal unit of an army), and its tendency to be applied to angels, devils, or things thought of as flying to aid or annoy. "Thinkest thou that I cannot now pray to my Father, and he shall presently give me more than twelve *legions* of angels?" (*Matthew* xxvi. 53). "And he [Jesus] asked him [the unclean spirit possessing the man], What is thy name? And he answered, saying, My name is *Legion*: for we are many" (*Mark* v. 9). "*Armies* of angels that soar, *legions* of demons that lurk" (*Browning*).

Ana. Horde, throng, press, mob, crush, *crowd.

nummer. Performer, mime, player, *actor, Thespian, impersonator, trouper.

mummery. *Gibberish, hocus-pocus, abracadabra.

mundane. Worldly, *earthly, earthy, terrestrial, terrene, mortal, sublunary.

Ana. Fleshly, sensual, *carnal, animal, animalistic: secular, temporal, *profane.

Ant. Eternal. — **Con.** *Infinite, sempiternal, boundless: heavenly, *celestial, empyrean.

munificent. Bountiful, *liberal, generous, handsome.

Ana. Benevolent, *charitable, philanthropic, altruistic: *profuse, lavish, prodigal.

monument. *Document, monument, record, archive.

munitions. *Armament, arms, ordnance, artillery, ammunition.

murder, v. *Kill, slay, assassinate, dispatch, execute.

murky. Obscure, gloomy, opaque, *dark, dim, dusk, dusky, darkling.

Ana. *Turbid, muddy, roiled, roily: lowering, glowering, glooming or gloomy (see corresponding verbs at **ROWN**): lurid, grim, *ghastly.

Con. *Bright, brilliant, radiant, effulgent: illuminated, illumined, lightened, enlightened (see **ILLUMINATE**): *clear, transparent, translucent, lucid.

muscular. *Muscular, brawny, sinewy, athletic, burly, husky* are here compared as applied to persons in the sense of strong and powerful in build or physique. **Muscular** implies well-developed, but not overdeveloped, muscles and, usually, a stalwart build. "My Eustace might have sat for Hercules; So *muscular* he spread, so broad of breast" (*Tennyson*). "Hard exercise . . . built into a strong, *muscular* body what had been a frail and sickly frame" (*W. A. White*). **Brawny** implies the full development of the muscles; although originally it was a close synonym of *fleshy*, it carries no connotation of stoutness but rather suggests the might that is associated with hard flesh and great size. "The muscles of his *brawny* arms Are strong as iron bands" (*Longfellow*). **Sinewy** attributes no less power to the muscles than *brawny* but it suggests greater energy and quickness and it never connotes hugeness. Rather it often implies a leanness, toughness, and litherness that are the result of training or of persistent exercise. Blacksmiths, steelworkers, prize fighters, and the like, are often described as *brawny*, but fencers, runners, acrobats, and the like, more often as *sinewy*. "Worthy fellows; and like to prove most *sinewy* sword-men" (*Shak.*). **Athletic**, as used in any science in which types of physique are studied, is applied to a build characterized by long limbs, well-developed muscles, and a broad chest. In more general use, *athletic* suggests much the same type, though occasionally it does not emphasize largeness of frame as much as muscularity, sinewiness, or vigor of health; as, a tall, *athletic* young man. **Burly** stresses massiveness of build to such an extent that it often carries connotations of corpulence, of coarseness or grossness, and suggests the possession of brute force. "Benson following his *burly* shadow" (*Meredith*). "Tall . . . *burly*, Quite fearless, built with such a jaw That no man's rule could be his law" (*Masefield*). **Husky** is an American colloquialism implying a powerful athletic build and brawniness; as, the *huskiest* members of a football team are placed on the line. "Good food and leisure and heredity gave me a *husky* build" (*S. E. White*).

Ana. Robust, *healthy, hale, sound: *strong, sturdy, stalwart, stout: *vigorous, lusty.

muse, v. *Ponder, meditate, ruminate.

Ana. *Consider, study, contemplate, weigh, revolve, excogitate: reflect, reason, *think.

museum. *Museum, library, gallery, archives, treasury, thesaurus* are not synonymous terms, but they come into comparison when they mean a place serving as a repository for monuments (see DOCUMENT, 1, for this sense) of the past. **Museum** is the most general of these terms; it usually implies the intention both to preserve and to exhibit for the education of the public. In Great Britain, it is applied chiefly to an institution concerned with the preservation and exhibition of objects of historical or scientific interest (the conspicuous exception is the British Museum), especially such as illustrate the development of human civilization or the evolution of species; thus, the Ashmolean *Museum* at Oxford is a place for the exhibition of objects of antiquarian or archaeological interest. In the United States, the term is applicable not only to institutions of this character, but to those providing for the preservation and exhibition of works of fine art, such as paintings and sculptures. Consequently the term is usually qualified in proper names or in general designations; as, the *Museum of Fine Arts*; the *Museum of Natural History*; an art *museum*. **Library** is applicable to any room, building, or institution which houses a collection of books not for sale but accessible to those persons who are permitted to use them. The great libraries of the world, however, such as the Vatican

Library, the National Library (Bibliothèque Nationale) in Paris, the British Museum (chiefly a library), the Library of Congress are vast storehouses of books of all kinds and of all ages, manuscripts, records, documents, files of journals, and the like; they often, in addition, exhibit works of art, but their primary purpose is to preserve works of literature and of reference, and documents in all fields of research, and to make them available to scholars. **Gallery** (often *art gallery*) is used commonly in Great Britain and often in the United States for a room, a suite, or a building housing and exhibiting paintings, works of sculpture, and the like; as, the National *Gallery* (in London). The term is used of a place housing a private as well as a public collection, and (especially in the plural, *galleries*) of a place where works of art are exhibited for sale. **Archives**, when the term designates the place where a collection of old records, old documents, old files, and similar papers are kept, rather than the collection itself (see DOCUMENT, 1), may refer to a building or, as is more common, to a part of a building, as of a library or museum, where the collection is housed; as, the *archives* of the city hall; the *archives* of the department of state; to place a manuscript in the *archives* of the Royal Society. **Treasury**, and occasionally *thesaurus*, are used to designate a room where possessions of historical value or significance are stored. Many of the old English cathedrals have their treasuries where old ecclesiastical utensils, vestments, relics and reliquaries, and the like, are kept and shown to visitors.

mushy. *Sentimental, romantic, mawkish, maudlin, soppy, slushy.

must. *Ought, should, have, have got.

muster. *Summon, call, cite, convoke, convene.

Ana. Collect, congregate, assemble, *gather: marshal, organize, arrange, *order: align, *line, range, array.

musty. Fusty, *malodorous, stinking, fetid, noisome, putrid, rank, rancid.

Ana. *Dirty, filthy, foul, nasty, squalid: sloppy, *slipshod, unkempt, slovenly.

mutable. *Changeable, changeful, variable, protean.

Ana. Unstable, *inconstant, fickle: fluctuating, wavering, swinging, swaying (see SWING).

Ant. Immutable. — **Con.** *Steady, even, constant, uniform, equable: *lasting, permanent, durable, stable.

mutation. 1 *Change, permutation, vicissitude, alternation.

Ana. Shifting or shift, moving or move, removing or remove (see corresponding verbs at MOVE): variation, modification, alteration (see under CHANGE, v.).

Con. Stabilizing or stability, steadying or steadiness, poising or poise (see corresponding verbs at STABILIZE): fluctuation, wavering, swinging or swing (see corresponding verbs at SWING).

2 *Variation, adaptation, modification.

mute, adj. *Dumb, speechless, inarticulate.

mutilate. 1 *Maim, cripple, batter, mangle.

Ana. *Injure, damage, hurt, spoil, mar: disfigure, disfigure, *deface.

2 *Sterilize, asexualize, castrate, spay, emasculate, geld, castrate.

mutinous. Rebellious, seditious, *insubordinate, factious, contumacious.

Ana. Recalcitrant, refractory, intractable, *unruly, ungovernable: disaffected, alienated (see ESTRANGE).

mutiny. *Rebellion, revolution, uprising, revolt, insurrection, Putsch.

Ana. *Sedition, treason: traitorousness, treacherousness, perfidiousness or perfidy, faithlessness (see corresponding adjectives at FAITHLESS).

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

mutual. *Reciprocal, common.

Ana. Shared, participated, partaken (see **SHARE**): joined or joint, united, connected, related, associated (see corresponding verbs at **JOIN**).

mysterious. **Mysterious, inscrutable, arcane** agree in meaning beyond one's power to discover, understand, or explain. That is **mysterious** which excites wonder, curiosity, or surmise, yet baffles all attempts to explain it. "Extremes in Nature equal ends produce, In Man they join to some *mysterious* use" (*Pope*). "God moves in a *mysterious* way His wonders to perform" (*Cowper*). "The one thing that can make modern life *mysterious* or marvellous to us" (*Wilde*). That is **inscrutable** which defies all one's efforts to examine or investigate it and leaves one with a sense of hopelessness or defeat. "Great God, thy judgments are *inscrutable*" (*Browning*). "The plighting of an *inscrutable* power, called Fortune" (*Bradley*). The word is often applied to a person whose intentions, motives, mental processes, and the like, are so well concealed that he excites awe or repels advances. "Many fathers feel that, if they are to maintain their authority, they must be a little distant and *inscrutable*" (*A. C. Benson*). "She still held him at a distance by something *inscrutably* aloof in her look and attitude" (*E. Wharton*). In loose use, the word often means little more than *baffling*; as, an *inscrutable* smile. That is **arcane** which is beyond comprehension because known or knowable only to the possessor of the secret (sometimes by implication God, Nature, the Fates, the authorities). The word often comes close to *occult* in meaning, but it stresses the reservation of that which is necessary for comprehension rather than the supernatural or magical character of that which is not understood; thus, one finds many of the poems of Blake *arcane* rather than *occult*; for some *arcane* (not *occult*) reason, grafters are seldom punished.

Ana. Occult, esoteric, *recondite, abstruse: cryptic, enigmatic, ambiguous, equivocal, *obscure: *mystical, mystic, analogical, cabalistic.

mystery. **Mystery, problem, enigma, riddle, puzzle, conundrum** come into comparison when they denote anything which baffles or perplexes and challenges one's power to solve it. **Mystery** often, especially in theological use, implies the thing's incapacity for comprehension by the human reason. The term is applied specifically to any one of the doctrines of Christianity (such as those of the Trinity and of the Incarnation of Jesus) which have this character, but it is also applicable to any of the facts of the world about us which defy all attempts to explain their cause or nature; as, "this *mystery* of growth and life" (*Jefferies*). "We must be humble, for we are compassed by *mysteries*, and our spiritual faculties are poor and dull" (*Inge*). The term is also used more loosely denoting something which is guarded by secrecy or which is in itself or by design mystifying; as, he always makes a *mystery* of his intentions; the story deals with the *mystery* of a ship that has disappeared; it's a *mystery* to me how he can keep going. **Problem** applies not only to any perplexing question that demands a solution (as, a geometrical *problem*) but also to any person, situation, or the like, that causes perplexity or puts one in a predicament (as, that child is a *problem* to his parents and teachers). "The *problem*... how to find healthy, happy leisure for all the working millions who are now being liberated by machines" (*L. P. Smith*). "The architect [of Coutances Cathedral] has grappled with more *problems* than one need hope to see solved in any single church" (*H. Adams*). **Enigma** (etymologically, a dark saying) applies to that which hides its meaning under obscure or ambiguous allusions so that one can only

guess what it signifies; as, a metaphor should not be farfetched, for then it becomes an *enigma*; the ancient oracles usually spoke in *enigmas*. Figuratively, the term applies to that which is inscrutable or beyond the range of unaided understanding; as, "He [Leonardo da Vinci] was an *enigma* to which they [his contemporaries] never secured the key" (*H. Ellis*). **Riddle** applies to any enigma involving paradoxical or contradictory statements, and definitely proposed to be guessed; as, to make up *riddles* for the amusement of her guests; a book of *riddles*; the *riddle* of the Sphinx. Figuratively, the term applies to any problem which is difficult because of its inner contradictions; as, "he tried to read the *riddle* of this girl's future" (*Galsworthy*). "The *riddle* of Actum is not in the details of the fighting but in the minds of the combatants" (*Buchan*). **Puzzle** applies to any problem or enigma which tests one's ingenuity or skill in solution, or which is peculiarly baffling; as, a jigsaw *puzzle*; a crossword *puzzle*; "hoary old *puzzles* of Ethics and Philosophy" (*L. P. Smith*). "There are few things in the world so difficult to explain as real change; it appears to me that most scientists are far from realising the complexity of this metaphysical *puzzle*" (*Inge*). **Conundrum** specifically applies to any riddle phrased as a question the answer to which involves a pun or an equivocal use of words; as, he rightly suspected that the question was a *conundrum*; "I'll make a *conundrum*" (*Austen*). The term is used figuratively in reference to unsolved or unsolvable problems which provoke speculation rather than serious attempts at solution. "Do you think life is long enough to let me speculate on *conundrums* like that?" (*W. Black*).

mystic, adj. *Mystical, analogical, cabalistic.

Ana. Occult, esoteric, *recondite, abstruse: *mysterious, inscrutable: visionary, quixotic, *imaginary.

mystic, n. *Ascetic.

mystical. **Mystical, mystic, analogical (or analogic), cabalistic (or cabalistical)** come into comparison when they denote having a meaning or character hidden from all except those who enjoy profound spiritual insight or are spiritually initiated. *Mystical* and *mystic*, though derived from the same root, are often distinguished in use. In general, **mystical** suggests comprehension of something beyond the range of the perceptive or ratiocinative powers; its use therefore often, but not invariably, implies belief in the possibility of such comprehension. Hence, the word variously connotes penetration into sacred mysteries, holiness of life, idealism, detachment from material concerns, ecstatic contemplation, or spiritual rapture; as, the *mystical* experiences of St. Paul; the *mystical* philosophy of Plotinus; *mystical* religions such as Buddhism; the *mystical* poetry of William Blake. "There is something *mystical* in this doctrine, this faith, as of Keats, that 'what the Imagination seizes as Beauty must be Truth'" (*L. P. Smith*). **Mystic**, on the other hand, is often preferred by writers who wish to avoid these implications or to suggest others more in keeping with a rationalistic or skeptical point of view. Therefore *mystic* often imputes to the thing it describes: (1) an occult, esoteric, or visionary character; as, *mystic* ceremonies; the *mystic* symbolism of Blake's poetry; (2) a mysterious, enigmatic, or sometimes nebulous quality; as, "words of *mystic* import" (*Shelley*); "His [Guérin's] expression has ..., more than Keats's, something *mystic*, inward, and profound" (*Arnold*); (3) a connection with magic or the arts of magic; as, *mystic* numbers; "each silver Vase in *mystic* order laid" (*Pope*). Oftentimes its original denotation is completely obscured and it means merely unintelligible, unfathomable, or incomprehensible; as,

"the *mystic* gulf from God to man" (Emerson). The last two words are used chiefly in reference to allegoristic interpretation of the Scriptures as practiced in the past. **Anagogical** was applied by medieval allegorists to the deepest underlying sense they found in the Bible (usually, in their computation, the third below the obvious, or literal, meaning), one hidden as a rule from all but men of profound spiritual insight or those taught by such men. "Jerusalem is literally a city of Palestine, allegorically the Church, morally the believing soul, *anagogically* the heavenly Jerusalem" (Schaff-Herzog). The word has been used also in reference to a deeply hidden sense apparent only to the mystical-minded in other writings than the Bible, notably the Divine Comedy of Dante. The anagogical sense is sometimes called the *mystical* sense. **Cabalistic**, in its primary meaning, was applied to a secret interpretation of Scriptures (*Cabala*) held to have been revealed to Moses and handed down orally through a line of chosen Jewish rabbis. The system was later committed to writing and was used by medieval magicians, sorcerers, and the like. In loose use it sometimes comes close to *mystic* in its connotations, but commonly it is closer to *occult*.

Ana. Profound, *deep, abysmal: *ultimate, absolute, categorical: spiritual, divine, sacred, *holy: *supernatural, supranatural, miraculous.

mysticism. Asceticism (see under ASCETIC, *n.*).

mystify. Bewilder, perplex, *puzzle, distract, nonplus, confound, dumfound.

Ana. Discomfort, faze, rattle, *embarrass: *discompose, disquiet, perturb, disturb, agitate, upset.

Ant. Enlighten.

myth. 1 **Myth, legend, saga** come into comparison as meaning a story which has come down from the past, which ostensibly relates a historical event or events, but whose origin has been forgotten or is not clearly traceable. **Myth** (see also ALLEGORY, 2) is often the general designation for this type of story, but in technical use the term specifically implies as a basis for the story an attempt to explain some practice, some belief, some natural phenomenon, some institution, some extraordinary event, or the like. "Whoever that discoverer [of the magnetic power of amber] may have been, someone ought to make a *myth* about him and call him the brother of Prometheus" (Karl K. Darrow). Both in technical and general use, *myth* is commonly applied to stories which tell how some god, or divinity, or hero with divine attributes, imparted the arts of life to man (as, the Prometheus *myth*; the Vulcan *myths*) or of how the gods or certain natural phenomena originated (as, the sun-god *myths*; the Jupiter or Zeus *myths*): in this sense, *myth* has a connection with practically all heathen and pagan religious beliefs and rites. The term is sometimes controversially applied to similar stories, especially those of Scriptural origin involving miracles, but, since the word definitely implies lack of factual basis and is often employed still more generally in the sense of an untrue story (as, the story of George Washington and the cherry

tree is now regarded as a *myth*), such application is avoided except by those who wish to stress this imputation. **Legend** (etymologically, something to be read) was originally applied to a saint's life or to a collection of such lives of the kind written or compiled in the Middle Ages for the edification of the people. Since these tales put into form without regard for their authenticity all the stories circulated about the saint and his miracles, the term *legend* came to be applied to any story, especially one of a fabulous nature circulated by word of mouth, which is attached to a saint, a hero, a place, a deed, or the like, which purports to be historical, but which, although it has or may seem to have a basis in history, is either incredible or unverifiable; as, the *legend* that King Alfred was the founder of Oxford University; the *legend* of the angels who appeared to the British troops at the battle of Mons; "there was no record or *legend* of any prisoner with those initials" (Dickens); "even after he was ailing he performed a feat which became one of the *legends* of the countryside,—killed a robber in a midnight scuffle" (Cather). **Saga**, in strict use, applies to a story of a Norse hero or heroes, especially such a story as was written in the Middle Ages (typically in the Icelandic language), and dealt with historical as well as legendary incidents: this written saga was typically in prose and highly conventional in form; as, the *Njals' Saga*; the *Volsunga Saga*. In extended use, *saga* is often employed in place of *myth* or *legend*, especially, but far from exclusively, when their reference to a hero or heroes of northern Europe is implied. In such use, *myth* commonly connotes a connection with ancient Greece, Rome, Egypt, and the like, though it may be used in reference to the American Indians and other aboriginal races: *legend* often suggests a connection with the Middle Ages under Christian domination, and *saga* usually implies a connection with the Scandinavians or Teutons of the Middle Ages who were not yet fully Christianized; as, "When she was about fourteen Joan's imagination passed out of the phase of *myth* and *saga* into the world of romance. The real world drew closer to her" (H. G. Wells). But *saga* is often even more loosely used to denote any literary treatment of the exploits (often superhuman exploits) of a hero or group of heroes (as, "had it fallen to Homer to attempt the impossible *saga* of Nelson's pursuit after Villeneuve he would have achieved it triumphantly"—Quiller-Couch) or, in present-day use, any novel or series of novels which is a chronicle of persons of a family through several generations (as, Galsworthy's "The Forsyte *Saga*") or of the persons who comprise a community, a class, or the like (as, "With this last visit terminates my *saga* of Gripsholm"—H. Marryat).

Ana. *Fiction, fable, fabrication, figment: invention, creation (see corresponding verbs at INVENT).

2 *Allegory, parable, fable, apologue.

mythical. *Fictitious, fabulous, legendary, apocryphal.

Ana. *Imaginary, visionary, fanciful, fantastic: invented, created (see INVENT): *traditional, legendary.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

N

nab. *Catch, capture, cop, trap, snare, entrap, ensnare, bag.

Ana. *Take, seize, grasp, clutch, grab, snatch: apprehend, *arrest, detain.

naïve or naive. Unsophisticated, artless, ingenuous, *natural, simple.

Ana. *Sincere, unfeigned: *spontaneous, impulsive, instinctive: fresh, original (see NEW).

naked. *Bare, nude, bald, barren.

Ana. Revealed, disclosed, discovered (see REVEAL): *evident, manifest, palpable, obvious: uncolored, *colorless: *pure, simple, sheer.

name, n. **Name, designation, denomination, appellation, title, style** agree in meaning the word or phrase by which anything is called and by means of which it can be distinguished or identified. **Name** is so general that it can be used of any such word or phrase whether it distinguishes a person or an object, an individual or a class, a particular or a universal, a thing having distinct existence in fact or a thing having distinct existence only in thought; thus, all nouns are *names*; love is the *name* of an emotion; the child's *name* is John Joseph Brown; the *name* of this synagogue is Beth-El. Sometimes *name* is thought of as something apart from the real character of the thing to which it is attached. "What's in a *name*? that which we call a rose By any other *name* would smell as sweet" (*Shak.*). "For sixty years he had been a *name*, not a figure [in the town of Bursley]" (*Bennett*). More often, however, the term connotes identification of the word with the thing or, especially, the person, it names, so that what affects one affects the other. "[Oxford] home of lost causes, and forsaken beliefs, and unpopular *names*, and impossible loyalties!" (*Arnold*). "If I discovered the worst, and it had to be exposed, I must see that Jane's *name* was kept entirely out of it" (*R. Macaulay*). This common feeling of a mutual and almost inevitable relation between the name and the thing named is what distinguishes *name* from *designation*, *denomination*, *appellation*, all of which are thought of as given and therefore as having an artificial association with the thing and a utilitarian purpose such as description or identification. A **designation** is a name given primarily for the sake of distinguishing one thing (an individual or a class) from other things of the same general description; as, the French revolutionists changed the traditional *designations* of days and months; as yet no suitable *designation* has been found for this variety of dahlia; Madame Curie chose "polonium" as the *designation* of the newly discovered radioelement in honor of her native Poland. **Denomination** (see also RELIGION) is the name given to a class, to a category, or to a closely knit group of persons; however, the idea of a class name is so deeply rooted in the word that it, in extended use, often means the kind, or species, or group distinguished by a particular name; as, most of George Eliot's works come under the *denomination* of *novel*; a roll of bills containing notes of every *denomination* or no two notes of the same *denomination*; Protestants of all *denominations* attended the religious service. **Appellation** differs from *designation* and *denomination* in precluding the idea (not necessarily the fact) of self-choice; thus, the *designation*, or name formally given to a thing, may be quite different from its *appellation*, or a name by which it is called; as, "Jesuit" is the common *appellation* of a member of the Society of Jesus; in school histories, George Washington is frequently referred to by the *appellation* "Father of his

Country." "The government of the United States has been emphatically termed a government of laws, and not of men. It will certainly cease to deserve this high *appellation*, if the laws furnish no remedy for the violation of a vested right" (*Ch. Just. Marshall*). A **title** is either a distinctive name given to a book, a picture, a play, a musical composition, or an honorary appellation coming to a person by virtue of his rank, office, dignity, descent, or the like, or given to him as a mark of respect; as, many modern books have for their *titles* a phrase from one of the poets, such as "If Winter Comes," and "Such Sweet Compulsion." "The head of the state must have a *title*" (*Buchan*). When used without reference to a particular work of art or person, *title* is sometimes preferred to *denomination* because it connotes distinction and dignity. "Any admixture of logical, of 'prose' meaning detracts from the value of a poem, if it does not disqualify it for the *title* of poetry altogether" (*Day Lewis*). When used abstractly in preference to *name* or *designation*, it often connotes the lack of an essential relation between the name and the thing it names. "Things change their *titles*, as our manners turn" (*Pope*). **Style**, which is now not used as commonly as formerly, is applicable chiefly to legal and formal titles, such as the legal name of a firm or corporation, or the complete, formal designation of a royal or other exalted personage as used in documents or in ceremonial address; as, a business incorporated under the *style* of the Globe Manufacturing Co. "Thrones and Imperial Powers, Offspring of Heaven, Ethereal virtues! or these *titles* now Must we [the fallen angels] renounce, and, changing *style*, be called Princes of Hell!" (*Milton*).

name, v. *Designate, nominate, elect, appoint.

Ana. *Choose, select, prefer, elect, opt: *declare, announce, publish, advertise.

narcotic. *Anodyne, opiate, nepenthe.

narrate. *Relate, rehearse, recite, recount, describe, state, report.

Ana. Tell, *reveal, disclose, discover: *discourse, expatiate, dilate, descant.

narrative. *Story, tale, anecdote, yarn.

Ana. Chronicle, *account, report, story, version: *fiction, fabrication, figment, fable.

narrow, adj. **Narrow, strait** agree in meaning neither broad nor wide, or having little breadth or width for a thing of its kind. **Narrow** is the ordinary term referable not only to that which in measurements is neither broad nor wide (as, a *narrow* corridor; a *narrow* stairway; a *narrow* box; a *narrow* entrance; a *narrow* stream) but to that which is cramped, restricted, or circumscribed in any way (as, "a poor philosopher who holds a view so *narrow* as to exclude forms not to his personal taste"—*Galsworthy*; "if he becomes isolated and self-absorbed, his work becomes *narrow* and mannerised"—*A. C. Benson*; "Many who though in *narrow* circumstances can hardly be called poor"—*Lecky*; "We are left with a *narrow* choice"—*T. S. Eliot*) or to that which (often, a person who) is provincial, sectional, highly partisan, bigoted, or the like (as, *narrow* opinions; a *narrow* mind; "Mr. Broadbent's robust if *narrow* understanding"—*Arch. Marshall*; "to be neither *narrow* nor puritanical"—*Galsworthy*). **Strait**, which is often confused with *straight*, is now chiefly archaic, dialectal, or literary in its historically correct senses. In its earlier and more consistently exact meanings, as well as in present precise

use, the term carries a stronger implication of tightness or closeness than *narrow* and therefore often suggests limits that are only wide enough to admit entrance, passage, or exit by or as if by squeezing through, or that cramp one unmercifully; as, "wide is the gate, and broad is the way, that leadeth to destruction. . . *Strait* is the gate, and *narrow* is the way, which leadeth unto life, and few there be that find it" (*Matthew* vii. 13-14); "The place where we dwell with thee is too *strait* for us" (2 *Kings* vi. 1); "To me the *straiter* prison, To me the heavier chain" (*Kipling*). In its extended senses, *strait* carries a far stronger implication than *narrow* of a strictness, a rigorousness, or a stringency that imposes severe, often galling or distressing, restraints; as, "after the most *straitest* sect of our religion I lived a Pharisee" (*Acts* xxvi. 5); "takes on him to reform . . . some *strait* decrees That lie too heavy on the commonwealth" (*Shak.*); "To make your *strait* circumstances yet *straiter*" (*T. Secker*). **Ana.** Limited, restricted, confined (see *LIMIT*, v.): *rigid, rigorous, strict, stringent.

Ant. Broad.

narrows. *Strait, straits, sound, channel, passage.

narthex. Vestibule, foyer, *entry, entryway, hall, lobby, anteroom, antechamber.

nasty. *Dirty, filthy, squalid, foul.

Ana. *Coarse, gross, vulgar, obscene, ribald: tainted, contaminated, polluted, defiled (see *CONTAMINATE*): indelicate, indecent, unseemly, improper, *indecorous.

national. *Race, people.

national, n. *Citizen, subject.

native, adj. **Native, indigenous, endemic, aboriginal, autochthonous (or autochthonal, autochthonic).** A person or thing is **native** (opposed to *foreign, alien*), or is a **native**, that has had his or its birth or origin in the place or country in question; as, a *native* American; a *native* New Yorker; a *native* tradition. A person or thing is **indigenous** (opposed to *naturalized, exotic*), or is an **indigene**, that is not only native but also has not been introduced into the country, region, or continent indicated; as, Negroes are *indigenous* to (or *indigenes* of) Africa; maize is *indigenous* to North America; the adobe houses of the Aztecs are of *indigenous* American architecture. *Indigenous* is applied usually to species or races rather than to individuals, and often implies reference to a larger area than *native*, as to a country or region characterized by a particular type of climate. A thing is **endemic** (opposed to *exotic*, and, in medicine, to *pandemic*), or is an **endemic**, which not only is indigenous but is also peculiar to (or in the case of a disease, prevalent in) a restricted region because of special conditions favoring its growth or existence; as, the herb edelweiss is *endemic* in the Alps; beriberi is an *endemic* disease in the Orient. A person or thing is **aboriginal**, or is an **aborigine**, that belongs to the earliest known race inhabiting a country, or to the people found there as by colonists and invaders: it usually implies the lack of a predecessor and often connotes a primitive culture; as, Indians are the *aboriginal* Americans; the *aboriginal* Australians (or *Australian aborigines*) are called "blackfellows." *Aboriginal* is more rarely applied to the earliest ascertainable native plants and animals. That is **autochthonous**, or is an **autochthon**, which has its origin in the place in which it is found; as, *autochthonous* rocks. When applied to races of men or their achievements, it implies purity of stock or freedom from all external influences. "As long as the States continue to . . . be dominated by the poetry of the Old World, and remain unsupplied with *autochthonous* song. . . so long will they stop short of first-class Nationality" (*Whitman*).

Ant. Alien, foreign.

native, n. Indigene, endemic, aborigine, autochthon. See under *NATIVE*, *adj.*

Ant. Alien, foreigner.

natty. Spruce, dashing, nifty, nobby, dapper, chic, *stylish, fashionable, modish, smart, posh, toffish, brave, braw.

natural, adj. 1 *Regular, normal, typical.

Ana. Ordinary, *common, familiar: *usual, customary, habitual, accustomed, wonted.

Ant. Unnatural: artificial: adventitious.

2 **Natural, simple, ingenuous, naïve (or naive), unsophisticated, artless, unaffected** are synonyms when they are applied to persons, their acts, and their utterances, in the sense of free from pretension or calculation of any sort. **Natural** implies, on the one hand, freedom from every sign of artificiality, effort, constraint, or affectation, and, on the other hand, an ease, a spontaneity, or a flexibility that suggests nature rather than art: the term often implies opposition to that which is labored, stiff, formal, or the like; as, "set him [a Frenchman] to write poetry, he is limited, artificial, and impotent; set him to write prose, he is free, *natural*, and effective" (*Arnold*); "it is of the essence of such talk that it should be *natural* and attractive, not professional or didactic" (*A. C. Benson*); "She was so friendly and so *natural* that it was nice to talk to her about what was interesting him" (*Arch. Marshall*). **Simple** stresses complete freedom from everything that savors of unconscious as well as conscious duplicity. It usually implies lack of confusion of aims, desires, interests, or the like, and therefore may carry one or the other of connotations as divergent as mental immaturity and intellectual ripeness, as the lack of experience characteristic of the child and the fullness of wisdom characteristic of the sage, as the transparency of those who do not know how to conceal their nature or motives and that of those who have nothing to conceal. "Nothing is more *simple* than greatness; indeed, to be *simple* is to be great" (*Emerson*). "Gard talked . . . about Marvin and their work together; how *simple* and thorough and understandable the young architect had turned out to be" (*M. Austin*). "She was so *simple* and trustful that I always thought it would be as wicked to hurt her as to hurt a babe in swaddling clothes" (*M. Webb*). **Ingenuous** stresses inability to disguise or to conceal one's thoughts or feelings: it commonly implies frankness or candor, lack of reserve or freedom from dissimulation, often with a hint of childlike simplicity. "'I know myself too weak, Unworthy! Choose a worthier stronger man! . . . 'Incapable' Qualmish of conscience? Thou *ingenuous* boy'" (*Browning*). "Father had set a dog on him. A less *ingenuous* character would be silent about such passages. . . but that is not his quality" (*H. G. Wells*). "In some of these letters of [Matthew] Arnold's I seemed to feel glowing—not indeed that *ingenuous* gusto of Dickens [expressing his delight in the financial success of his lectures], but something distantly akin to it" (*C. E. Montague*). **Naïve** implies freedom from all that is artificial, conventional, or acquired; in earliest English use and still often, especially in its derivative noun *naïveté*, it suggests freshness, spontaneity, and genuine expression of a nature untouched by worldly influences and without affectation or artifices; as, by contrast with the poetry of Vergil, that of Homer seems strikingly *naïve*; a delightfully *naïve* personality. In current English it is often a term of derogation. Sometimes, especially in colloquial use, it implies lack of worldly wisdom. "Sophia, the *naïve* ninny, had actually supposed that her walking along a hundred yards of pavement with a god by her side was not going to excite remark!" (*Bennett*). "One does not ask favors,

if it can be avoided, of persons one genuinely respects; one puts such burdens upon the *naïve* and colorless, upon what are called the good-natured" (*Mencken*). Equally often, but chiefly in learned use, it suggests the point of view of the untutored or unenlightened person or of one whose judgments are not corrected by advanced scientific or philosophical knowledge and who therefore supposes that things are what they seem to be. "The *naïve* science of an earlier day merely took it for granted that space and time existed in their own right" (*Jeans*). "That *naïve* patriotism which leads every race to regard itself as evidently superior to every other" (*J. W. Krutch*). **Unsophisticated** also stresses lack of wisdom, especially worldly wisdom. It does not, however, emphasize native simplicity as strongly as *naïve*; rather, it suggests lack of the experience or training necessary for worldly success or, more specifically, for graceful and adroit social relations. "She's not the type of the moment, not elegant or artificial, too much the *unsophisticated* child of nature" (*R. Macaulay*). **Artless** lays the stress on the absence of design; it suggests naturalness that is the result of indifference to, or unawareness of, the effect or impression one is producing. "Overflowing with... *artless* maternal gratitude" (*Austen*). "Almost every turn in the *artless* little maid's prattle touched a new mood in him" (*Meredith*). "He hated to seem heavy or profound or anything but *artless* and spontaneous to Cecily" (*H. G. Wells*). **Unaffected** centers the attention on the absence of affectation, but in current use it commonly implies both naturalness and simplicity without any hint of childishness, unworldliness, guilelessness, or the like; as, a well-bred, *unaffected* girl. "Very few English people have the art of conversing *unaffectedly* and sincerely before a circle" (*A. C. Benson*).

Ana. *Spontaneous, impulsive, instinctive: ingrained, constitutional, *inherent.

Con. Formal, conventional, ceremonious, *ceremonial: pretentious, ostentatious, pompous, *showy: affected, assumed, counterfeited, feigned (see ASSUME).

natural, n. *Fool, idiot, imbecile, moron, simpleton

nature. *Type, kind, sort, description, character, stripe, kidney, ilk.

Ana. *Structure, anatomy, framework: *disposition, temperament, character, personality: *form, figure, shape, conformation.

naught. *Cipher, zero, nought, aught, ought.

naughty. *Bad, evil, ill, wicked.

Ana. Mischievous, wanton, roguish, impish, waggish (see PLAYFUL): froward, balky, restive, wayward, *contrary, perverse.

nautical. *Marine, maritime, naval.

naval. Nautical, *marine, maritime.

navy. *Worker, workman, workingman, laborer, craftsman, handicraftsman, mechanic, artisan, hand, operative, roustabout.

near, adj. & adv. *Close, nigh, near by.

Ant. Far.

near, v. *Approach, approximate.

Ana. Rival, *match, touch, equal.

Con. Vary, *change, alter, modify: differ from, *differ with.

near by. Also **near-by, adj. & adv.** *Close, near, nigh. **Ant.** Far off.

nearest. **Nearest, next** are both superlative forms of *near*, but they are not always interchangeable. **Nearest** may be used wherever the intent is merely to indicate the highest degree of propinquity in space, time, kinship, or the like; as, the *nearest* house is five miles distant;

their *nearest* neighbor lives two miles away; her *nearest* relatives are her father and mother (or her fifth cousins).

Next, in earlier usage, was often employed in this sense, but in current use, it commonly implies immediate succession (sometimes, but not so often, precedence) in an order, a series, or a sequence; thus, the *next* house is the house just beyond the one in mind in a row or series of houses; their *next* child is the one who comes after the child under consideration in order of birth; the *next* (never *nearest*) best is the second best in a rating or choice; so, the *next* chapter of the story; the *next* day; the *next* time they met; ask the *next* person we meet. But in law one's *nearest* relative or relatives is (or are) one's "next of kin"; one's "next friend" is the person who has the right, as one's nearest relative or natural guardian, to act without authorization of a court for an infant, a married woman, or any other person who by the law of the state has not full legal capacity to sue or make other legal moves. In ordinary language, "nearest of kin" is found as often as "next of kin," but "nearest friend" applies only to one's most intimate friend.

nearly. **Nearly, almost, approximately, well-nigh** come into comparison when they mean within a little of being, becoming, reaching, or the like. Their differences in meaning are often imperceptible. However, **nearly** is preferable when mere proximity is implied; as, they are *nearly* at the end of their journey; it is *nearly* six o'clock; she was *nearly* hysterical with fright: **almost** is more explicit when the emphasis is on a falling short or a deficiency; as, they had *almost* finished when they were interrupted; she is *almost* out of her mind with grief; the news is *almost* too good to be true: **approximately** is the proper choice when the difference is of no practical importance and a reasonable approach to accuracy is implied; as, there were *approximately* 10,000 present; government meteorologists make *approximately* correct forecasts: **well-nigh** often equals *virtually*; as, they were *well-nigh* lost in the forest; he is *well-nigh* mad.

neat. **Neat, tidy, trim, trig, snug, shipshape, spick-and-span** come into comparison as meaning manifesting care and orderliness. **Neat** (etymologically, shining) through all its variations in senses keeps as its basic implication clearness, such as the clearness from dirt or soil that is manifest chiefly in perfect cleanliness (as, her house is as *neat* as a pin; the cat is perhaps the *neatest* of domestic animals; "He was remarkably *neat* in his dress"—*Johnson*), or the clearness that is indicated in simplicity and freedom from that which clutters, complicates, confuses, or the like, or that indicates orderliness, deftness, or adroitness (as, *neat* workmanship; a *neat* style; "the *neat* craftsman"—*C. E. Montague*; a *neatly* performed operation; *neat* arrangement of arguments; a *neat* retort; *neat* architectural design), or the clearness that means lack of adulteration, dilution, or the like; as, to take his whisky *neat*; *neat* silk. **Tidy** (etymologically, timely) was in earliest English use often applied to cattle, flocks, crops, and the like, in thriving and satisfactory condition: this sense now occurs mainly in extended applications to things which indicate a more or less flourishing condition; as, a *tidy* farm; he has a *tidy* fortune; he has made a *tidy* success of his venture. *Tidy*, as first applied to a person or his work, seems to have meant little more than satisfactorily pleasing in appearance or quality: in some use it was approximate to *busom* or *comely* in meaning, but it seems to have been applied chiefly to peasants and especially to servants. Hence, "*tidy* servant" at first meant a satisfactory servant from the points of view of diligence and neatness, but later came to mean one whose diligence showed itself in orderly habits and neat appearance; as, "If thou

knowest of any *tidy* lass like thyself, that wanted a place, and could bring a good character" (*Scott*). In current use *tidy*, as distinguished from *neat*, throws the stress on orderliness, careful arrangement, or a place for everything, rather than on cleanliness or simplicity; as, she keeps her house *tidy*; a *tidy* desk; a *tidy* sewing basket; "He objected to cut and trim them [shrubs]. 'For,' said he, 'God made nothing *tidy*'" (*Jefferies*); "When she [an ailing wife] got downstairs, she would find the house *tidy*, but dirty" (*D. H. Lawrence*). *Trim* in current use implies both neatness and tidiness: it stresses, however, smartness or spruceness in appearance such as is given by clean lines, excellent proportions, and the like; as, a *trim* clipper ship; a *trim* figure; "The sward was *trim* as any garden lawn" (*Tennyson*); "His shoes and buckles, too, though plain, were *trim*" (*Dickens*); "a criss-cross of *trim*... paths" (*Lowes*). *Trim* in its older use is not always distinguishable from *trim*, but in its chief current sense it carries a stronger implication of compactness, of neatness, and of jauntiness of appearance, and is more often applicable to persons or their clothes; as, she has a *trim* new tailored suit; a *trim* West Pointer in his new uniform. *Snug*, as here compared, was in earliest use applied to ships, first to those of trim lines, and then to those where everything is in order and properly prepared to weather a gale; as, "The stern is... plain, and *snug*, without much carving" (*Naval Chronicle*); "Soon all was *snug* aloft, and we were again allowed to go below" (*R. H. Dana, Jr.*). In the eighteenth century *snug* was often applied to persons or things that were markedly trim or spruce (as, "He kames his hair, indeed, and gaes right *snug*"—*A. Ramsay*), but this sense now occurs only in dialectal use. In current use it still often implies neatness or tidiness, but it stresses coziness or comfortableness (see *snug* under COMFORTABLE). *Shipshape* is now often used in place of *snug* to describe not only ships where tidiness and trimness prevail but anything which depends for its success or well-being upon habits of tidiness and orderliness; as, his affairs are in *shipshape* condition; "Look to the babes, and till I come again Keep everything *shipshape*" (*Tennyson*). *Spick-and-span*, which stresses the brightness and freshness of that which is new, is applicable also to that which by care and cleanliness has been kept new in appearance or made to look like new; as, *spick-and-span* white shoes; her mother keeps her *spick-and-span* every moment of the day; the kitchen was *spick-and-span*; *spick-and-span* machinery.

Ana. *Clean, cleanly: fastidious, *nice, dainty, finical: exact, precise, *correct, accurate.

Ant. Filthy. — **Con.** Unkempt, slovenly, *slipshod, sloppy: slack, lax, remiss, *negligent: confused, muddled, bemuddled, addled (see CONFUSE).

neb. Variant of NIB.

necessary. 1 *Needful, requisite, indispensable, essential.

Ana. Compelling or compulsory, obliging or obligatory, constraining (see corresponding verbs at FORCE): important, significant, momentous (see corresponding nouns at IMPORTANCE): cardinal, vital, *essential, fundamental.

2 *Certain, inevitable, apodictic.

Ana. Unavoidable, inescapable, ineluctable, *inevitable: *infallible, inerrable, inerrant, unerring.

necessity. *Need, exigency.

Ana. Compelling or compulsion, constraining or constraint, obliging or obligation, coercing or coercion (see corresponding verbs at FORCE): indispensableness, requiteness or requisition, needfulness (see corresponding adjectives at NEEDFUL).

nectar. *Ambrosia, manna, amrita.

nectared, nectarean, nectareous. Ambrosial (see under AMBROSIA).

need, n. **Need, necessity, exigency** come into comparison when they denote a state or condition requiring something as essential or indispensable, or the requirement itself. **Need** implies pressure and urgency arising either from external or internal causes or forces: it may merely suggest the call of an appetite or demand for emotional or intellectual satisfaction (as, he is in *need* of food; the child suffers because of a *need* for affection; he felt the *need* of an education), or it may imply circumstances, such as great poverty, a severe storm, a threat of war, actual hostilities, or the like, that show a lack of or create a demand for something indispensable to the well-being, protection, security, success, or the like, of those concerned (as, to provide food and lodging for those in *need*; the European war has taught Americans the *need* for a two-ocean navy; "So at the threat ye shall summon—so at the *need* ye shall send Men"—*Kipling*).

Necessity, though often interchanged with *need*, usually carries a far stronger suggestion of an imperative demand or of a compelling cause; as, telephone me in case of *necessity* (i.e., in very great *need*); "as soon as war is declared, every nation or institution must subordinate all other considerations to the *necessity* of victory" (*Inge*). "When a legal distinction is determined... between night and day, childhood and maturity... a point has to be fixed or a line has to be drawn... to mark where the change takes place. Looked at by itself without regard to the *necessity* behind it, the line or point seems arbitrary" (*Justice Holmes*). Sometimes, however, in order to enforce this implication, *necessity* is qualified by some such term as *compelling*; as, *compelling necessity* drove him to seek financial aid. *Necessity* may also apply to a compelling principle or abstract force inherent in nature or in the constitution of a thing and inevitable in its operation or inescapable in its results; as, there is no logical *necessity* apparent in the conclusions you have reached; physical *necessity* lies behind our need of food and drink; "One of the unhappy *necessities* of human existence is that we have to 'find things out for ourselves'" (*T. S. Eliot*). **Exigency** (see also JUNCTURE) implies the compulsion of necessity (sometimes, but rarely, of an inherent compelling principle), especially as a result of special circumstances, such as a crisis, an emergency, an accident, that imposes upon one severe restrictions, or great stress and strain: in either case, the term emphasizes, more even than either of the preceding words, extreme urgency, demands of a peremptory and exacting character, and difficulties that cannot be easily overcome; as, they were forced by *exigencies* of space (i.e., by circumstances that required inclusion of certain articles or that restricted the number that could be included) to omit several articles; "the various *exigency* of times and occasions" (*Book of Common Prayer*); "figures which are doing nothing in particular... striking an attitude which is dictated not by the inner *necessities* of balance or motion, but by the *exigencies* of the composition" (*Binyon*); "There are two vivid sonnets of Sir Philip Sidney... which deal with the *exigencies* of the poet's problem" (*Lowes*).

Ana. *Stress, strain, pressure: *lack, want, absence, privation, defect: *poverty, indigence, penury, destitution, privation, want.

need, v. *Lack, want, require.

Ana. *Demand, require, claim, exact: *long, hanker, pine, yearn, hunger, thirst: crave, covet, *desire, wish.

needful. **Needful, necessary, requisite, indispensable, essential** come into comparison as meaning urgently required. **Needful**, in current English, carries the weakest

suggestion of urgency, but it applies to that which is required to supply a want or to fill a need; as, "And Jesus answered . . . Martha, Martha, thou art careful and troubled about many things: But one thing is *needful*" (*Luke* x. 41-42); "forts, magazines, arsenals, dock yards, and other *needful* buildings" (*Ch. Just. Taney*); "tradesmen carrying what was *needful* to British ports" (*A. Repplier*). **Necessary** implies more pressing need or urgent constraint but, except where the compulsion of necessity (in the sense of an inherent compelling principle; as, a *necessary* consequence; a *necessary* conclusion) is suggested, the word does not invariably connote that the thing so qualified cannot be done without; as, "His personal return was most required and *necessary*" (*Shak.*); "always finding a more *necessary* article for which a less *necessary* had to be discarded" (*Cather*); "Of all the bitter and heavy things in this sorry old world, the not being *necessary* is the bitterest and heaviest" (*Deland*); "to classify in a science is *necessary* for the purpose of that science; to classify when you come to art is at best an expedient" (*Quiller-Couch*). **Requisite** differs from *necessary* chiefly in being applied to something that is specifically required by the nature of a thing, the end that is in view, the purpose to be fulfilled, and the like; usually, but not invariably, the adjective suggests an imposed requirement rather than an inner need and so suggests constraint from without or, often, from official sources; as, to complete the subjects *requisite* for college entrance; to gather the *requisite* equipment for a summer in camp; "thinking society to be the one thing *requisite* to the young man, he had introduced him to the people he knew" (*Meredith*); "the vigor *requisite* to success" (*Grandgent*). "Holy Scripture containeth all things *necessary* to salvation: so that whatsoever is not read therein, nor may be proved thereby, is not to be required of any man, that it should be believed as an article of the Faith, or be thought *requisite* or *necessary* to salvation" (*Book of Common Prayer*). **Indispensable** not only carries a stronger implication of urgency than the preceding terms, but it also distinctly implies that the thing so qualified cannot be done without, especially if the implied or expressed end is to be attained; as, there is no such thing as an *indispensable* person, though many persons have made themselves virtually *indispensable*; "acquaintance with it [the scientific method of inquiry] has become an *indispensable* element in culture" (*C. W. Eliot*); "Rigid truthfulness in adults towards children is . . . absolutely *indispensable* if children are not to learn lying" (*B. Russell*). **Essential** (see also **ESSENTIAL**, 2; **INHERENT**) is often used in place of *indispensable* as implying no less urgency but as being less extravagant in its suggestions: it usually also implies inherent necessity from the point of view of what a thing is or must be by its very nature or end; as, knowledge of one's subject is *essential* to successful teaching; *essential* raw materials; "You are *essential* to her perfect happiness" (*Dickens*); "the builders must have begun with the central piers and the choir, because the choir was the only *essential* part of the church" (*H. Adams*); "The construction of the pier was desirable for the more convenient repair of warships, but it was not *essential*" (*Justice Holmes*).

Ana. Wanted, needed, required, lacked (see **LACK**, v.): vital, cardinal, *essential, fundamental.

nefarious. Iniquitous, flagitious, infamous, corrupt, degenerate, *vicious, villainous.

Ana. Heinous, *outrageous, atrocious, monstrous: *flagrant, glaring, gross, rank.

negate. *Nullify, annul, abrogate, invalidate.

Ana. Negative, *neutralize, counteract.

negative, adj. *Neutral, indifferent, adaphorous.

Ant. Affirmative.

negative, v. 1 *Deny, gainsay, traverse, contradict, impugn, contravene.

2 *Neutralize, counteract.

Ana. *Nullify, negate, annul, abrogate, invalidate.

neglect, v. **Neglect, omit, disregard, ignore, overlook, slight, forget** come into comparison as meaning to pass over something without giving it due or sufficient attention. **Neglect** usually implies intentional or unintentional failure to give full or proper attention, especially to something one is doing (such as a task) or should do (such as a duty) or to someone who has a claim upon one's care or attention; as, to *neglect* one's studies because of undue interest in sports; to *neglect* to pay one's debts; "Pardon me for *neglecting* to profit by your advice" (*Austen*); "He asked Mr. Powell with some brusqueness if the chief mate had *neglected* to instruct him that the captain was to be found on the port side" (*Conrad*); to *neglect* one's family; to *neglect* one's personal appearance; "in March the vicar told his curate that he was . . . *neglecting* Galton for Oaktown" (*C. Mackenzie*). **Omit** implies a leaving out of something which forms a part of a whole (as, to *omit* two stanzas of a hymn; to *omit* a part of one's lecture) or, as it comes more closely into comparison with the other terms in this article, to neglect entirely through oversight, inattention, or absorption, an important detail, opportunity, aspect, or the like. "Nor could I think well of the man who should *omit* an occasion of testifying his respect towards any body connected with the family" (*Austen*). "Constance remembered small possessions of her own which she had *omitted* to remove from the cutting-out room" (*Bennett*). **Disregard** usually, but not invariably, implies voluntary, sometimes deliberate, inattention: the term may or may not imply justifiable neglect; as, to *disregard* petty annoyances; to *disregard* an unimportant piece of evidence; she persists in *disregarding* the wishes of her mother. "The Great War . . . a hideous business, in which nearly all the humane alleviations of brutal violence, introduced and practised in the days when professional armies fought for a dynasty or for a point of honour, were *disregarded*" (*Inge*). **Ignore** (etymologically, not to know) usually implies either an intention to disregard or a failure to regard something more or less obvious: it may even suggest a deliberate closing of the eyes to that which one does not wish to recognize; as, "to those who agree with me I am uttering commonplaces and to those who disagree I am *ignoring* the necessary foundations of thought" (*Justice Holmes*); "By tacit agreement they *ignored* the remarks and insinuations of their acquaintances" (*D. H. Lawrence*). "The ancients . . . tried to identify the fundamental element; one philosopher guessed air, another water, yet another fire; the true one [electricity] lay all about them, but they *ignored* its signals" (*Karl K. Darrow*). **Overlook** implies an omission or disregarding, sometimes through intention (often charitable intention) but more often through haste, lack of care, inadvertence, or the like; as, to *overlook* an item in an account. "It is the practice of good nature to *overlook* the faults which have already, by the consequences, punished the delinquent" (*Johnson*). **Slight** may imply neglect, omission, or disregard, but it also usually implies a contemptuous or an arrogant attitude that makes one undervalue a thing's importance, treat a person disdainfully, or be neglectful in performance of a task or duty. "Alas! what boots it with incessant care To tend the homely, *slighted*, shepherd's trade [figurative for poet's art]" (*Milton*). "Nothing in the service was *slighted*, every phrase and gesture had its full value"

(Cather). "I have been *slighted*, tricked, threatened, insulted, made ill... but I am justified" (H. G. Wells). **Forget**, as here considered, often retains from its chief current sense the implication of losing the memory of something or someone, so that when it implies neglect, it usually carries a suggestion of willful ignoring or of a failure to impress the thing neglected upon one's mind; as, "I shall not be surprised to be *neglected* and *forgot*" (Nelson); "Lord God of Hosts, be with us yet, Lest we *forget*—lest we *forget*" (Kipling). "Still, he told Hannah to get the boy better clothes—though he *forgot* to give her any money for the purpose" (Deland).

Ant. Cherish. — **Con.** *Appreciate, value, prize, treasure: *nurse, nurture, foster, cultivate.

neglect, n. *Negligence.

Ana. Neglecting, omitting or omission, disregarding or disregard, ignoring, slighting, forgetting, overlooking (see corresponding verbs at NEGLECT).

neglectful. *Negligent, lax, slack, remiss.

Ana. *Careless, heedless, thoughtless.

Ant. Attentive. — **Con.** *Thoughtful, considerate.

negligence. **Negligence, neglect** are not always clearly distinguished in use, even though in current English the lines between them are being drawn with increasing clearness. **Negligence** stresses the quality or fact of being negligent or careless, either as manifested in a lack of care in the performance of a task, a duty, a piece of work, or in the operation or handling of a dangerous machine or mechanism, which requires effort or close attention (as, the amazing *negligence* of some housekeepers; an act of criminal *negligence*; "no one has done more through *negligence* to corrupt the language"—Byron; all these themes indicate *negligence*) or as manifested in a temperamental or assumed indifference to small niceties in dress, manners, style, and the like, that gives an impression of casualness, artlessness, or lack of artificiality (as, to affect *negligence* in dress; "Nothing is so modish as an agreeable *negligence*"—Addison; "a princely *negligence*"—Landor). **Neglect**, on the other hand, applies either to the act or fact of neglecting or of leaving undone (or, very rarely, imperfectly done) something which it is one's business or duty to do (as, convicted of *neglect* of duty; "We made a nice tidy clean up... If I hadn't done it I ought either to have been shot for *neglect* or dismissed for incapacity"—H. G. Wells; "In dealing with the infant... there is need of a delicate balance between *neglect* and indulgence"—B. Russell) or to the state or fact of being neglected, slighted, ignored, or forgotten (as, "Rescue my poor remains from vile *neglect*"—Prior; "a... motive for reading it... [that] ensured poetry against *neglect*"—Day Lewis). For these reasons, the phrase "the *negligence* of a person" always refers to a quality of character of the agent, or to its outward manifestation in an act, a piece of work, an accident, or the like: "the *neglect* of a person" refers to the act of one who neglects, slights, ignores, or forgets another, thereby making that person his victim.

Ana. Laxness, slackness, remissness (see corresponding adjectives at NEGLECT): indifference, unconcernedness or unconcern, incuriousness (see corresponding adjectives at INDIFFERENT).

Ant. Attention: solicitude. — **Con.** *Care, concern, anxiety, worry: diligence, assiduity, sedulousness (see corresponding adjectives at BUSY).

negligent. **Negligent, neglectful, lax, slack, remiss** are here compared chiefly as applied to persons, their ways of working or acting, and the results of their work or activities, and as meaning culpably careless or manifesting such carelessness. **Negligent** implies inattentiveness to

that which is one's duty or business with the result that nothing is done or that one's work shows markedly one's indifference and inattention, as in its imperfection, its slovenliness, its incompleteness, or the like; as, "His family knew him to be... a most *negligent* and dilatory correspondent" (Austen); "Byron is so *negligent* in his poetical style... so slovenly, slipshod, and infelicitous... so little haunted by the true artist's fine passion for... words, that he may be described as having for this artistic gift the insensibility of the barbarian" (Arnold). **Neglectful** is usually more derogatory or contemptuous than *negligent*, for it carries a stronger connotation of laziness or deliberate and blameworthy inattention; as, parents *neglectful* of their children's health; "A government at once insatiable and *neglectful*" (James Mill); a ship's master *neglectful* of discipline. **Lax** (etymologically, loose; see LOOSE) implies want of necessary strictness, severity, or precision; the term applies chiefly to persons who do not satisfy the rigorous demands made upon them by their work or duties, or to any work or any activity performed or carried on without the close attention, constant care, or strict adherence to law or custom that is necessary; as, a *lax* parent; *lax* discipline; *lax* morals; a *lax* interpretation of a law. "When Delia, who came of the *laxer* Lovells, and was naturally inclined to novelty, had first proposed to her husband to dine at six o'clock instead of two, his malleable young face had become... relentless" (E. Wharton). **Slack** (see also LOOSE) stresses the want of proper or necessary diligence and expedition as well as of care; the term usually also implies indolence, or sluggishness, or indifference; as, a *slack* servant; "a *slack* workman" (G. Eliot); "We keep our wits *slack*" (H. G. Wells). When applied to that which is accomplished by a slack worker, the term usually suggests neglect of important details necessary to the completeness, finish, or perfection of the work; as, "A three-quarters figure of admirable design, though of rather *slack* execution" (J. C. Stobart). **Remiss** implies culpable carelessness that shows itself in slackness and forgetfulness or in negligence; it is applied chiefly to that which is lax in performance, maintenance, or the like, but it may be applied to a person who is unduly careless or lax in the performance of his duties; as, *remiss* housekeeping; *remiss* discipline; a *remiss* police officer. "It certainly had been very *remiss* of him, as Mayor... to call no meeting ere this" (Hardy).

Ana. *Careless, heedless, thoughtless, inadvertent: *indifferent, unconcerned, incurious: *slipshod, slovenly.

Con. *Rigid, strict, rigorous: *thoughtful, considerate, attentive.

negotiate. 1 Parley, treat, *confer, commune, consult, advise.

2 **Negotiate, arrange, concert** come into comparison when they mean to bring about or accomplish by mutual agreement, especially after discussion or parley. **Negotiate** and **arrange** both imply prior intercommunication of views and wishes and, sometimes, settlement by bargaining or compromise. **Negotiate** is preferred when the dealings are carried on by diplomatic, business, or legal agencies, and **arrange** when they are carried on by private persons or their representatives; as, to *negotiate* a treaty; to *arrange* a marriage; to *negotiate* the Louisiana Purchase; to *arrange* the settlement of a case out of court; to *arrange* a meeting between estranged persons. **Concert**, which is now found chiefly in its participial form **concerted**, usually, but not invariably, implies an agreement to do something in common; it therefore may or may not suggest conspiracy, intrigue, or the like; as, a *concerted* attack. "The old weakness of barbarians, an incapacity for *concerted* action" (Buchan). "We began to

concert measures for his coming on board with secrecy" (Defoe).

neighborhood or **neighbourhood**. *Locality, district, vicinage, vicinity.

neighborly or **neighbourly**. Friendly. *amicable.

Ana. Peaceful, peaceable, *pacific: *social, hospitable, gregarious, co-operative: cordial, sociable, *gracious.

Ant. Unneighborly: ill-disposed. — **Con.** Antagonistic, *adverse.

neophyte. *Novice, novitiate, probationer, postulant, apprentice.

neoteric. *New, novel, modern, modernistic, new-fangled, new-fashioned, original, fresh.

nepenthe. *Anodyne, opiate, narcotic.

neritic. *Aquatic, marine, oceanic, thalassic, pelagic, abyssal, bathysmal, bathybic, lacustrine, lacuscular, fluvial, fluvatile.

nerve. Effrontery, *temerity, audacity, hardihood, cheek, gall.

Ana. Boldness, intrepidity (see corresponding adjectives at BRAVE): *fortitude, grit, pluck, sand, guts: foolhardiness, temerariousness, recklessness (see corresponding adjectives at ADVENTUROUS).

nervous. 1 *Vigorous, lusty, energetic, strenuous.

Ana. Forceful, forcible, potent, *powerful: *spirited, mettlesome: virile, manly (see MALE).

2 Also **nervy**. *Impatient, restless, restive, unquiet, uneasy, fidgety, skittish, feverish, hectic, jumpy, jittery. **Ana.** Excited or excitable, stimulated, provoked or provocative (see corresponding verbs at PROVOKE): *inconstant, unstable, mercurial.

Ant. Steady. — **Con.** Constant, even, equable, uniform (see STEADY).

nescient. *Ignorant, illiterate, unlettered, uneducated, untaught, untutored, unlearned.

Ana. *Indifferent, incurious, aloof, unconcerned.

Con. *Aware, conscious, cognizant.

nettle. Provoke, exasperate, *irritate, aggravate, roil, peeve.

Ana. *Annoy, irk, bother, vex: disturb, perturb, agitate, upset, *discompose: fret, chafe, gall (see ABRADE).

network. *System, scheme, organism, economy, complex.

neurologist. **Neurologist**, **psychiatrist** (or **psychiater**), **alienist**, **psychopathologist** (or **psychopathist**), **psychotherapist**, **psychoanalyst** agree in denoting a specialist (usually a medically trained specialist) in mental disorders. **Neurologist**, the comprehensive term, is applied to any physician skilled in the diagnosis and treatment of diseases of the nervous system, as epilepsy, locomotor ataxia, and chorea (St. Vitus's dance). Only in loose use is the term ever restricted to a specialist in purely mental diseases. *Psychiatrist*, *alienist*, *psychopathologist* are interchangeable terms in scientific use, but they stress different implications. All designate a physician who devotes himself to the diagnosis and treatment of diseases affecting the mind, especially, as distinguished from *neurologist*, of those disorders not demonstrably of physical origin, such as neurasthenia, hysteria, and paranoia. **Psychiatrist**, however, usually suggests skill in treatment and in correction of curable disorders; **alienist**, the preferred term in medical jurisprudence, suggests skill in detection of mental derangements or of insanity; **psychopathologist** (or **psychopathist**) suggests the psychologist's approach and skill in discovering causes, such as defects of personality, unfavorable environment, and the like, and in describing the nature of the individual

case. A **psychotherapist** is a psychiatrist who employs suggestion, hypnosis, re-education, etc., in the treatment of psychic disorders. A **psychoanalyst** is a psychotherapist who proceeds on the assumption that mental difficulties are the result of disturbances below the level of consciousness, who diagnoses these disorders by a study of the individual's emotional and mental life, especially as manifested in dreams, inhibitions, complexes, and the like, and who treats these disorders by revealing their causes to the patient and suggesting means whereby the disturbances may be eliminated and the mental difficulties overcome.

neutral, *adj.* **Neutral**, **negative**, **indifferent**, **adiaphorous** are here compared as meaning lacking decisiveness or distinctiveness in character, quality, action, or effect. **Neutral**, in what is probably its earliest and is still its most common sense, applies to states, governments, parties, or persons who refuse to take sides with either of two (or any of several) contending parties. The term may or may not imply an attitude of impartiality, but it usually implies either indecision or a refraining from positive action for any one of numerous reasons. "The stepfather [of Octavius] was a moderate Pompeian in sympathies, but his family connections kept him *neutral*, and the household was never drawn into the war" (Buchan). "Revolutionary verse... makes the *neutral* reader wonder whether it is aimed to win him for the communist or fascist state" (Day Lewis). When otherwise applied, as to colors or terms, to a character or personality, to a substance in chemistry, or to an entity in philosophy, or the like, *neutral* implies a quality, an appearance, or a reaction that belongs to neither of two opposites or extremes: the term, therefore, often connotes vagueness, indefiniteness, indecisiveness, ineffectualness, or the like; thus, a *neutral* character is one that reveals neither positive virtues nor positive vices; a chemically *neutral* substance, such as distilled water, is neither acid nor basic; a *neutral* color, such as taupe, is not clearly or positively any definite color, often because it verges on gray. "The artists of the Far East... use positive tints quite sparingly, giving them for foil large spaces of *neutral* tone" (Binyon). "[Crabb Robinson's] honest dullness supplied the *neutral* background that genius needs" (Times Lit. Sup.). **Negative** carries a far stronger implication than *neutral* of absence of positive or affirmative (cf. AFFIRMATIVE) characteristics or qualities: the term therefore usually implies inaction, ineffectiveness, or a failure to assume a definite or concrete form; as, "the *negative* propaganda of silence" (A. Huxley); "the man who falls in love with one of these *negative* young creatures hardly takes the trouble to ask whether she loves him" (DeLand); "There is certainly a vague and widespread discontent with our present results [in education]; but it is all a *negative* opinion" (A. C. Benson). **Indifferent**, as here compared (see also INDIFFERENT, 1; MEDIUM), implies a character or appearance that does not readily define itself or fall into any clearly marked class or category: the term is applicable to things (rarely to persons) which stir up no feeling or elicit no decision as to whether they are good or bad, in accordance with one's principles or not, necessary or unnecessary, pleasant or unpleasant, or the like; as, though they disliked each other, they could converse at length upon *indifferent* subjects; it is *indifferent* to which race the father or the mother belongs; "Either one attitude is better than the other, or else it is *indifferent*" (T. S. Eliot); "At Alexandria Hadrian found a money-loving population worshipping Christ and Sarapis almost *indifferently*" (Inge). **Adiaphorous** is chiefly a technical term applicable to rites, ceremonies, practices,

and the like, which are regarded as indifferent, or as neither necessary nor unnecessary, but often a matter of purely individual concern; thus, fasting is an obligatory practice in some churches, and an *adiaphorous* practice in others.

Con. Biased, disposed, predisposed (see **INCLINE**, v.): positive, *affirmative: *decided, decisive.

neutralize. **Neutralize**, **counteract**, **negative** come into comparison as meaning to render one thing inoperative or ineffective by means of its opposite force, influence, effect, or the like. **Neutralize** often implies either the reduction of opposites to a state of equality, especially in influence, with the result that neither has the power to make way against the other, or the nullification of the active principle in one thing by its combination with something that annuls its effect; as, drugs that *neutralize* each other's beneficial effects; "our esteem for facts has not *neutralized* in us all religiousness" (*W. James*); "That . . . is why we call them [the two electricities] 'positive' and 'negative'—because they are capable of annulling or *neutralizing* one another's actions" (*Karl K. Darrow*). **Counteract** may definitely imply, as *neutralize* does not, that either one of the things concerned, the agency or the thing affected, is an evil or harmful force, influence, or effect. The term may imply merely the counterbalancing of that which is evil or harmful by that which is good or beneficial, or conversely (as, "Unless powerfully *counteracted* by all sorts of opposite agencies, [old age] is a miserable . . . blighter to the genial charity of the human heart"—*De Quincey*; "Perhaps this [knowledge of drunkenness, quarrels, etc.] does them [slum children] no harm, if it is *counteracted* by other influences"—*B. Russell*), or it may imply the operation or the use of forces that destroy or eradicate the evil or harmful thing or make the beneficial effect of a good thing impossible (as, "the spontaneous physiological processes which *counteract* disease before medical science comes into play"—*H. Ellis*; the effect of his preaching was *counteracted* by the looseness of his behavior). **Negative**, as here compared, stresses a rendering futile, useless, of little or no value, or the like, of one thing by another: it may or may not imply destruction, but it usually suggests a frustration of a purpose or a hindrance to the production of an effect; as, the hurricane *negated* all the labors of the orange growers; their child's contact with all sorts of children in school *negated* his early training in correct speech.

Ana. Offset, countervail, counterbalance, counterpoise (see **COMPENSATE**): defeat, overcome, subdue, *conquer. **never-ending.** *Everlasting, endless, interminable, unceasing.

Ana. *Lasting, permanent, durable, perdurable, stable: *immortal, deathless, undying, unfading, fadeless, amaranthine: eternal, sempiternal, *infinite.

nevertheless. Still, however, *but, yet.

new, adj. **New**, **novel**, **new-fashioned**, **newfangled**, **modern**, **neoteric**, **modernistic**, **original**, **fresh** come into comparison when they mean having very recently come into existence or use, or into a connection, a position, a state of being recognized, or the like. A thing is **new** that has never before the time of its advent been known, thought of, manufactured, experienced, or the like, or that is just ready for use, sale, circulation, or the like; as, *new* books; *new* ideas; a *new* washing machine; "No man putteth *new* wine into old bottles" (*Mark* ii. 22); the *new* baby; a *new* way of dressing the hair. A person is **new** if he has just been taken into a military, business, social, or other connection (as, a *new* soldier; a *new* stenographer; three *new* members; the *new* rich), or if he has received his first experience (as, "he was . . . fright-

ened, being *new* to the sight"—*Dickens*), or if he has been renewed in spirit or in mind (as, "if any man be in Christ, he is a *new* creature"—*2 Corinthians* v. 17). A thing is **novel** which is not only new but so out of the ordinary course as to strike one as strange, unusual, or unfamiliar; as, "*novel* forms of government, like those of Russia and Italy" (*Frankfurter*); "*novel* schemes of salvation" (*L. P. Smith*); "sermons . . . bold in thought and *novel* in language" (*E. Wharton*). "The assumption that whatever has been customary must be bad, and that anything which is or seems *novel* must be good" (*Grandgent*). "If a man cannot write what is *new*, at least he can write what is *novel*" (*R. Hallet*). A thing is **new-fashioned** which is so different in form, shape, style, or character from that which was previously known that it challenges curiosity or meets more or less general acceptance; as, *new-fashioned* modes of painting; *new-fashioned* hats for women are regarded as absurd by many men. A thing is **newfangled** which strikes one as unnecessarily or as ingeniously novel in its construction, use, or the like: often, however, the term differs little from **new** except in suggesting disparagement; as, *newfangled* toys; *newfangled* theories of art; "a *newfangled* nomenclature" (*Sir W. Hamilton*). A person or thing is **modern** or **neoteric** (a later term than **modern**, common in the 17th century but now rare) that belongs to the present time or is especially characteristic of it: the terms often imply up-to-dateness and novelty, or a contrast with that which has been long accepted and still is the choice of the conservative: in this special sense **modernistic** is now often preferred to **modern**; as, "the *neoteric* fashion of spending a honeymoon on the railway" (*Meredith*); *modern* (or *modernistic*) furniture; *modern* (or *modernistic*) schools of painting. **Modern**, however, is always preferred to **modernistic** when contemporaneity only is implied; as, "in *modern* art atmosphere counts for so much" (*Wilde*). "This strange disease of *modern* life, with its sick hurry, its divided aims, its heads o'ertaxed, its palsied hearts" (*Arnold*). But **modern** is also applicable to things of more remote origin than any of the other terms; as opposed to **ancient** and **medieval** it usually implies reference to the centuries beginning with the full Renaissance up to the present (as, *modern* languages; *modern* civilizations); often, however, the dividing line between that which is **modern** and that which is too far distant in time to be called **modern** has to be supplied by the context; as, the Victorian era gave way to the *modern* age of machinery. "Most *modern* well-to-do Englishmen and Americans, if they were transported by magic into the age of Elizabeth, would wish themselves back in the *modern* world" (*B. Russell*). A person or thing is **original** that produces or that is something new or novel and, at the same time, the first of its kind; as, "That he would be successful in an *original* way, or that he would go to the dogs in an *original* way, seemed equally probable" (*Hardy*); "Poets . . . who . . . construct an *original* speech" (*Day Lewis*); "A wildly daring, *original* . . . spirit" (*H. Ellis*). A thing (sometimes a person) is **fresh** that is or seems so new that it has not had time to lose the signs of newness, such as a liveliness, energy, brightness, a virginal quality, or the like; as, *fresh* footprints; to receive a *fresh* impetus; to make a *fresh* start; a *fresh* newspaper. "This was a *new* voice falling upon the attentive ears of youth—a *fresh* challenge to its native and impetuous generosity" (*A. Repplier*). **Ant.** Old.

newfangled. *New, novel, new-fashioned, neoteric, modernistic, modern, original, fresh.

new-fashioned. *New, novel, newfangled, neoteric, modernistic, modern, original, fresh.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

news. *News, tidings, intelligence, advice (or advices)* are all used to designate a report or the reports of occurrences and conditions not previously known. *News* stresses novelty and freshness of information; as, the gossip was not *news* to her; the letter contained no *news*. Since *news* is specifically applied to the information disseminated through journals shortly after the incidents have occurred, it also often implies distribution, even in its general sense or in some of its derivatives; as, experts in handling *news*; *newsmongers*. *Tidings* is now poetic or bookish; it is often appropriate in literary English when it refers to news orally communicated or disseminated, as by a herald or messenger. "Fear not... I bring you good *tidings* of great joy... For unto you is born this day in the city of David a Saviour" (*Luke* ii. 10-11). *Intelligence* commonly stresses the desirability or the practical value of the information rather than its freshness. "Their visits to Mrs. Philips were now productive of the most interesting *intelligence*" (*Austen*). In specific military use, *intelligence* suggests clandestine methods of gathering information as by a secret service or spies. It is therefore applied not only to the news gathered but to the branch of the service commissioned to gather it. "An enemy superior in numbers, who possessed also the advantage in armament, position, and more accurate *intelligence*" (*Buchan*). In comparison with *intelligence*, which often suggests the gathering of important information, *advice* stresses the transmission of information and implies the immediacy of its value. It, therefore, or its plural *advices*, is often applied to the means by which this information is communicated, such as letters, telegrams, messengers, and the like. "No doubt he [Richelieu] had *advices* that Casale was sufficiently provisioned to last for many months, perhaps a year" (*Bello*).

newspaper. *Journal, periodical, magazine, review, organ.

next. *Nearest.

nib or neb. *Bill, beak.

nice. 1 *Nice, dainty, fastidious, finical, finicking, finicky, particular, fussy, squeamish, pernickety (or pernicketty, pernickity; also pernickety)* come into comparison when they mean exacting or displaying exacting standards as in selection, judgment, workmanship, or the like. *Nice*, as here considered (see also **CORRECT, DECOROUS**), implies fineness of discrimination and power to distinguish the very good from that which is merely good: the term connotes rather more of intellectual quality than the other words; as, "an appetite for knowledge too eager to be *nice*" (*Johnson*); "In language one should be *nice* but not difficult" (*J. R. Lowell*); "to attain this union of gravity and simplicity requires the *niciest* art" (*P. E. More*); "he had a *nice* taste in literature and had edited Crashaw and Vaughan with conspicuous taste and much perception" (*C. Mackenzie*). *Nice* is also applicable to questions, problems, and the like, which require such powers of discrimination and subtlety or delicacy in handling if the solution is to be found; as, a *nice* experiment; the situation raises a *nice* question. *Dainty*, in the sense here considered (see also **CHOICE**), usually implies a tendency to select carefully that which does, or to reject with more or less disdain that which does not, satisfy one's extremely delicate taste or sensibility: it usually connotes chariness or a tendency to pick and choose, especially in eating; as, she has a *dainty* appetite; "No shape but his can please your *dainty* eye" (*Shak.*); "All highly developed forms of utterance are studiously acquired, the 'tough' jargon of the East Side no less than the *dainty* discourse of the Four Hundred" (*Grandgent*). *Fastidious* etymologically

implies a strong aversion to that which does not satisfy one's sense of what is right, proper, in good taste, or the like: in its current use, however, it suggests the possession of ethical, artistic, social, or other standards that are so high that they impose a strain upon those who would meet them (as, "It is... an advantage for an author to have two or three *fastidious* readers whom he can imagine sniffing at his pages"—*L. P. Smith*), or that cause suffering to the possessor when they are not satisfied (as, "I am *fastidious* in voices, and I can't endure listening to an imperfect reader"—*G. Eliot*); "The disorder was almost more than his *fastidious* taste could bear"—*Cather*), or that foster extreme care in selection from that which is offered or available (as, "a *fastidious* instinct for the connotations of a phrase"—*Palmer*; "Why such a desperate orgy of literature? I thought you were of a more *fastidious* habit—not like Stanley, who insists on reading everything"—*R. Macaulay*). *Finical (or the colloquial finicking or finicky)* implies an affected or overnice fastidiousness; as, "His reserve, his delicacy, his distaste for many of the persons and things surrounding him... have produced an impression of Gray as being a man falsely *fastidious, finical, effeminate*" (*Arnold*); "a world of little *finical* observances, and little frail proprieties" (*Stevenson*); a *finicky* taste in dress. *Particular*, as here compared, implies an insistence that all details or circumstances should be exactly as one wishes them or that one's special or peculiar standards must be met. In contrast with *fastidious*, *particular* may or may not imply what others would call a high standard: the term usually suggests standards which the individual regards as high or exacting; as, a *particular* teacher; she is *particular* about the way steak should be broiled; "I'm going to change it [one engraving on a wall] with that one.... He said the effect would be very much better if they were changed. And his lordship is very *particular*" (*Bennett*). "As she approached, George Adams, who had a *particular* mother, rose, and Niel followed his example" (*Cather*). *Fussy* is applicable not only to fastidious or particular persons and to acts that manifest a disposition to be querulous or fidgety (as, "she was not one of the trivially *fussy* domesticated women"—*H. Ellis*; "In this matter Augustus moved slowly and tactfully. He was no lawyer, and he had not the *fussy* interest of Claudius in the work of the courts"—*Buchan*), but also to things that are so difficult or so complicated that they make a particular person engaged upon them nervous or fidgety (as, a *fussy* piece of work; an extremely *fussy* operation). *Squeamish* etymologically implies a readiness to be nauseated by the sight, taste, smell, or hearing of something disagreeable; as, "the starved stomach is not *squeamish*" (*Hudson*). In its extended use, it implies a disgust for or an aversion to that which does not satisfy one's standards of what is decent, delicate, honest, or nice: it therefore sometimes connotes extreme sensitiveness, or prudishness, or scrupulousness, or the like; as, "such *squeamish* youths as cannot bear to be connected with a little absurdity are not worth a regret" (*Austen*); "trifles magnified into importance by a *squeamish* conscience" (*Macaulay*); "As to the nudities... they might well have startled a not very *squeamish* eye" (*N. Hawthorne*); "Our nerves... are unduly delicate, and our tastes too *squeamish*" (*L. Stephen*). *Pernickety* is a colloquial term which manifests the speaker's (sometimes writer's) annoyance, exasperation, or disgust, excited by persons who are unduly *fussy* or *finical*, or by tasks, problems, etc., that are so delicate or complicated that they impose severe strain on one's patience and good temper; as, "The grammarian, the purist, the *pernicketty* stickler for trifles" (*B. Matthews*); "such

confining and *pernickely* work" (*Harper's Mag.*).
Ana. *Wise, judicious, sage, sapient: punctilious, meticulous, scrupulous, *careful: discriminating, discerning, penetrating (see corresponding nouns at DISCERNMENT).

Con. *Coarse, gross, vulgar: crude, callow, green, raw (see RUDE): *negligent, lax, remiss, neglectful, slack.

2 Precise, exact, accurate, *correct, right.

Ana. Strict, *rigid, rigorous, stringent: exquisite, delicate, rare (see CHOICE, *adj.*).

Con. *Random, haphazard, hit-or-miss, happy-go-lucky: *careless, heedless, inadvertent.

3 Proper, seemly, *comme il faut*, demure, *decorous, decent.

Ana. Fitting, *fit, appropriate, suitable, meet.

✚ Below this level, and not embodying the main tendency of *niche* to express an aversion to or a distaste for anything that does not reach the state of perfection in method, manner, or deportment, lie several other uses which do not meet general approval. In general, it is a term of approval that reveals nothing out of the ordinary or exacts no attention to a high standard; as, a *niche* day; a *niche* letter; a *niche* book; a *niche* dinner.

niche. *Recess, alcove, nook, embrasure, bay, cubicle, carrell, carol.

nick, n. *Dent, dint, notch, indentation, indenture.

nifty. Nobby, natty, spruce, *stylish, fashionable, modish, smart, chic, dapper, dashing, posh, toffish, brave, braw.

niggardly. Parsimonious, penurious, miserly, *stingy, close, closefisted, tight, tightfisted, curmudgeonly, cheesepating, penny-pinching.

Ana. *Covetous, avaricious, grasping, greedy: *sparing, economical, frugal, thrifty: *mean, ignoble.

Ant. Bountiful. — **Con.** *Liberal, generous, munificent, handsome: *profuse, lavish, prodigal.

nigh, adj. & adv. *Close, near, near by.

Ant. Far.

nightly. **Nightly, nocturnal** agree in meaning of, belonging to, or occurring at night. **Nightly** is the preferred term when the opposition to *daily* (as connoting day-time) is to be implied; as, the *daily* and *nightly* visits of his physician; there were both *daily* and *nightly* raids for several weeks. But *nightly*, whether opposed to *daily* or not, commonly carries so strong an implication of recurrence that the term is interpreted as meaning night after night unless the context clearly indicates reference to a single night or to special nights; as, the doctor made only two *nightly* visits this week; the *nightly* meetings of the general's staff; *nightly* revels; *nightly* prowls; he kept a *nightly* vigil. **Nocturnal** is often literary or somewhat technical, but it applies specifically and without question to things which are so associated with the night that they are thought of as belonging or appropriate to the hours of darkness; thus, *nocturnal* animals or insects (bats, owls, some flies, etc.) are active or evident only during the night; animals of *nocturnal* habits; the *nocturnal* office of a monk (commonly called *matins*) is usually sung between midnight and dawn; *nocturnal* sounds are those one hears only at night and therefore associates with that period. **Nocturnal** is the correct term when the effect of darkness or of moonlight or starlight is implied; as, "the changing beauty of *nocturnal* landscapes" (*Bennett*).

Ant. *Daily*.

nightmare. Dream, vision, *fancy, fantasy, phantasm, phantasm, daydream.

Ana. *Delusion, hallucination, illusion: threatening or threat, menacing or menace (see corresponding verbs at THREATEN).

nihilist. *Collectivist, socialist, communist, Bolshevik, anarchist.

nimble. *Agile, brisk, spry.

Ana. Sprightly, *lively, animated: alert, wide-awake, vigilant, *watchful: *supple, limber, lithe.

nimbus. *Halo, glory, aureole.

nix, fem. nixie. *Fairy, faery, fay, elf, sprite, pixy, gnome, dwarf, goblin, brownie, puck, shue, leprechaun, banshee.

nob. *Fop, dandy, beau, coxcomb, exquisite, élégant, dude, macaroni, buck, spark, swell, toff.

nobby. *Stylish, fashionable, modish, smart, chic, dapper, dashing, spruce, natty, nifty, posh, toffish, brave, braw.

nobility. *Aristocracy, gentry, county, gentlefolk, elite, society.

noble. 1 Stately, majestic, imposing, august, magnificent, *grand, grandiose.

Ana. Glorious, *splendid, resplendent, superb, sublime: illustrious, eminent, distinguished (see FAMOUS).

Ant. Ignoble: cheap. — **Con.** Despicable, *contemptible, sorry, scurvy, beggarly.

2 Virtuous, righteous, *moral, ethical.

Ana. Honorable, *upright, just, honest.

Ant. Base (of actions, etc.): atrocious (of acts, deeds, etc.).

nocturnal. *Nightly.

Ana. Diurnal.

noise, n. *Sound, sonance.

Ana. Discordance, dissonance (see under DISSONANT).

*din, uproar, babel, hubbub, racket, pandemonium.

noiseless. Silent, quiet, *still, stilly.

Ana. *Calm, tranquil, serene, placid.

Con. Clamorous, *vociferous, strident, boisterous

noisome. Fetid, stinking, *malodorous, putrid, rank, rancid, fusty, musty.

Ana. Foul, nasty, squalid, filthy, *dirty: noxious, baneful, *pernicious, deleterious: loathsome, *offensive, revolting.

Ant. Balmey. — **Con.** *Odorous, fragrant, aromatic, redolent.

nomadic. *Itinerant, peripatetic, ambulatory, ambulant, vagrant.

nom de guerre. *Pseudonym, alias, pen name, nom de plume, incognito, allonym.

nom de plume. Pen name, nom de guerre, *pseudonym, alias, incognito, allonym.

nominate. *Designate, name, elect, appoint.

Ana. Propose, *intend, mean, purpose: present, tender, *offer, proffer.

nominee. *Candidate, aspirant, applicant.

non-. *Un-, in-, a-.

nonage. *Infancy, minority.

Ant. Age.

nonchalant. Unruffled, imperturbable, *cool, composed, collected.

Ana. Unconcerned, *indifferent, aloof, detached: lighthearted, cheerful, *glad: *easy, effortless, light, smooth.

Con. Concerned, solicitous, anxious, worried, caretul (see under CARE, *n.*).

non compos mentis. *Insane, mad, crazy, crazed, demented, deranged, lunatic, maniac, wood.

nonconformist, n. Dissenter, sectary, sectarian, *heretic, schismatic.

nonesuch. *Paragon, sublimation, apotheosis, phoenix, nonpareil.

nonmoral. Unmoral, amoral, *immoral.

nonpareil. *Paragon, sublimation, apotheosis, phoenix, nonesuch.

nonplus. Bewilder, distract, confound, dumfound, mystify, perplex, *puzzle.

Ana. Faze, rattle, *embarrass, discomfit, disconcert: *confuse, muddle, bemuddle: baffle, balk, *frustrate.

nonreligious. Unreligious, *irreligious, ungodly, godless.

Ana. Secular, *profane, lay, temporal.

nonsocial. *Unsocial, asocial, antisocial.

nook. *Recess, alcove, niche, embrasure, bay, cubicle, carrel, carol.

norm. *Average, mean, median, par.

normal. *Regular, typical, natural.

Ana. Ordinary, *common, familiar: *usual, customary, habitual, wonted, accustomed.

Ant. Abnormal: adventitious (sense 2).

nosy or nose. *Curious, inquisitive, prying, snoop.

Ana. Meddlesome, *impertinent, intrusive, obtrusive.

notch, n. *Dent, dint, nick, indentation, indenture.

note, n. 1 *Sign, mark, token, badge, symptom.

Ana. Indication, betokening, bespeaking, attesting (see corresponding verbs at INDICATE): character, *quality, property, attribute, accident.

2 Mark, sign, symbol, *character.

3 *Remark, observation, comment, commentary, descant, obiter dictum.

Ana. Annotation, gloss (see under ANNOTATE): remembering, reminding or reminder, recalling or recaller (see corresponding verbs at REMEMBER).

4 *Letter, epistle, missive, message, dispatch, report, memorandum.

note, v. Remark, notice, perceive, discern, observe, contemplate, survey, view, *see, behold, descry, espy.

noted. Renowned, celebrated, *famous, famed, distinguished, eminent, illustrious, notorious.

Ana. Conspicuous, outstanding, salient, signal, *noticeable, remarkable.

notice, v. Remark, observe, note, perceive, discern, *see, behold, descry, espy, view, survey, contemplate.

Ana. Recognize, *acknowledge: *refer, advert, allude.

Con. Ignore, slight, overlook, disregard, *neglect.

noticeable. Noticeable, remarkable, prominent, outstanding, conspicuous, salient, signal, striking, arresting agree in meaning attracting or compelling notice or attention. **Noticeable** implies that the thing so described does not or cannot escape observation; as, *noticeable* attentions to a lady; a *noticeable* aversion to another's company; *noticeably* crude behavior. **Remarkable** adds to *noticeable* the further implication of inviting comment or of demanding a call to others' attention; it may or may not impute to the thing so described an extraordinary or exceptional character; as, he has made no *remarkable* gain in skill during the last five years; he has a *remarkable* gift for making friends. **Prominent** seldom loses its earliest implication of protuberance or projection above a level or beyond a surface; in literal use it is applied chiefly to things that noticeably protrude from their background; as, a *prominent* nose; "her eyes were... a china blue, rather *prominent* and inexpressive" (*Cather*); a landscape without *prominent* features. In extended use, it is applied to persons or things that stand out so clearly from their surroundings that they are often in evidence, or are generally known or recognized, or are frequently pointed out, or the like; as, the *prominent* persons in a town; the church occupies a *prominent* position; "attending to his parish duties without making himself too *prominent* by his enthusiasm or his originality" (*C. MacKenzie*). **Outstanding**, although it implies prominence, is applicable only to that which rises above or beyond others of the same kind and is remarkable by comparison

with them; as, there is no *outstanding* man among the candidates for this office; the new anthology is *outstanding* in its kind in that it gives complete works, not excerpts. **Conspicuous** is applicable chiefly to that which is so obvious or patent that the eye or the mind cannot miss it (as, *conspicuous* merit; *conspicuous* bravery); it is also used to describe that which strikes the eye or the mind (often unpleasantly) through its singularity; as, to wear *conspicuous* clothes; to make oneself *conspicuous* by one's affectations; his supporters are *conspicuous* by their absence. **Salient** stresses emphatic quality and is applied to that which thrusts itself upon one's attention or impresses itself insistently upon the mind; it imputes significance more often than obtrusiveness to the thing so described. "There are days rich in *salient* news and days far from rich in it" (*C. F. Montague*). "The Middle Ages...sacrificed ruthlessly subsidiary qualities to throw into sharp relief the *salient* trait, till Griselda, for example, carried patience beyond the utmost bound of human thought" (*Lowe*). **Signal** suggests such distinction from that which is ordinary or usual that the thing so described is in itself remarkable or memorable; as, the *signal* sacrifice of Sir Robert Scott; a *signal* mark of esteem; *signal* bravery in action. **Striking** is applicable to that which impresses itself powerfully and deeply upon the observer's mind or vision; as, one easily remembers the *striking* scenes in a story; to give a *striking* example of loyalty; a woman of *striking* beauty. **Arresting** adds to *striking* the suggestion of capturing attention or of more than passing interest; as, an *arresting* personality; an *arresting* story. "The slight, steel-coloured figure with steel-coloured hair, was more *arresting* in its immobility than all the vociferations and gestures of the mob" (*Galsworthy*).

Ana. *Evident, manifest, obvious, palpable, patent.

notify. Apprise, advise, acquaint, *inform, advertise.

Ana. Announce, *declare, proclaim, publish, promulgate, broadcast: *reveal, disclose, discover, divulge, tell.

notion. *Idea, concept, conception, thought, impression.

Ana. *Opinion, view, belief, conviction, persuasion, sentiment.

notoriety. Reputation, repute, éclat, *fame, celebrity, renown, honor, glory.

Ana. *Publicity, propaganda, promotion, ballyhoo.

notorious. *Famous, famed, renowned, noted, celebrated, distinguished, eminent, illustrious.

Ana. Conspicuous, *noticeable, remarkable, outstanding, salient: *flagrant, glaring, gross, rank.

notwithstanding. **Notwithstanding**, in *spite of*, **despite** are often interchangeable prepositions. **Notwithstanding**, the least emphatic, merely implies the presence of an obstacle; in *spite of*, the most emphatic, suggests active opposition or strongly adverse considerations to be encountered; **despite** is somewhat lighter in its emphasis than in *spite of* and otherwise is closer to *notwithstanding* than to *in spite of*; as, *notwithstanding* the rain, I shall go; I shall go *in spite of* all your efforts to prevent me; *despite* his assurances, I doubted him.

nought. Naught, aught, ought, *cipher, zero.

nourish. *Feed, pasture, graze.

Ana. *Nurse, nurture, foster, cultivate.

nourishment. Nutriment, sustenance, *food, aliment, pabulum.

Ana. Support, keep, maintenance, sustenance, *living.

novel, adj. *New, new-fashioned, newfangled, neoteric, modern, modernistic, original, fresh.

Ana. *Strange, singular, unique, peculiar.

Con. *Usual, customary, habitual: ordinary, *common, familiar.

novel, n. **Novel, romance** are here compared as designating a type of prose fiction. In earlier usage, *novel* and *romance* were rather sharply contrasted with reference to subject matter, style, and, sometimes, length. **Novel** then denoted and still to an extent denotes any work of fiction that deals more or less realistically with the life of the present or of the past, that involves its characters in situations arising out of their individual temperaments or out of the clash between opposing temperaments, and that has a definite plot which moves through entanglements to crisis and disentanglements, and finally to a definite and often (but now far from invariably) happy conclusion. This type of prose fiction, which (in England) was first accepted as a serious literary form with the work of Richardson and Fielding in the mid-eighteenth century and attained a high degree of excellence in the mid-nineteenth century in the work of Thackeray, Dickens, and George Eliot, still prevails, though often in the modern form there is greater emphasis on character than on plot and on the inner life than on external action, with the result that what happens before the action begins or what may happen after it ends is more or less of a concern to the author and to the reader. **Romance**, a much older term in English than *novel*, was used in the Middle Ages and Renaissance to denote a type of narrative, in either poetry (the *metrical romance*), or in prose, dealing with the actual or, more often, the legendary exploits of a hero or heroes, such as Arthur and the knights of the Round Table, Charlemagne, Roland, and others. Originally, the term implied an opposition to the classic form of poetic narrative, the epic or heroic poem, typically represented by Homer's *Iliad* and *Odyssey* and Vergil's *Aeneid*. Hence, in the late eighteenth and early nineteenth centuries (when *romance* and *novel* were first contrasted) and still later, *romance* was applied to any relatively long work of prose fiction that deals typically with the past in a romantic as opposed to a realistic manner, that stresses adventure and action rather than character, and that arouses interest chiefly by surprising incidents, wonderful exploits, or glamorous characters and situations. In still later, and still current, use *romance* as distinguished from *novel* often in addition specifically implies the subordination of character to the plot, little concern for the probability or credibility of situations or incidents, marked use of coincidences, and a swift and often thrilling action that moves from situation to situation to a completely satisfactory end; as, the *romances* of Richard Harding Davis and Anthony Hope.

novice, novitiate. **Novice, novitiate, apprentice, probationer, postulant, neophyte** come into comparison only when applied to one who is a beginner, especially a beginner in a trade, a profession, a career, or a sphere of life. **Novice** and **novitiate** (an old form discountenanced by some persons) may be applied to anyone who comes under this description, since inexperience is their chief distinguishing implication; as, a *novice* in writing. "You are but *novices* in the art of naval resources" (*Burke*). **Novice** is specifically applied to a new member of a religious order who is undergoing training before taking first (usually not the final) vows. **Apprentice** is applicable only to a beginner who is serving under another as his master or teacher. "The breathless, the fructifying adoration of a young *apprentice* in the atelier of some great master of the Renaissance" (*Van W. Brooks*). In such applications it commonly emphasizes subjection to a taskmaster and to discipline rather than inexperience. Although specifically it often denotes a youth who is bound to a master for a number of years to learn a trade (see **BOUND, adj.**), or denotes an enlisted man in the United States Navy (now usually called *apprentice*

seaman) who is receiving instruction in seamanship, gunnery, and the rudiments of a general education (at a training station or on board a training ship), it also has wide general use. "You must from your years be a *novice* in affliction, whereas I have served a long *apprenticeship* to misery" (*Fielding*). **Probationer** designates a beginner who is on trial for a period of time and must prove his aptitude for the work or life; as, the most disagreeable tasks in a hospital are often assigned to *probationers* among the nurses. In Scotland, a divinity student who is licensed to preach but has not yet received a call is spoken of as a *probationer*. **Postulant** implies candidacy for admission, as into a religious order; it usually also implies acceptance for a period of probation; hence, *postulant* and *probationer* are sometimes interchanged in literal use. In extended use they are, because of the difference in their fundamental implications, rarely interchanged. "The brevity and vanity of this life, in which we are but *probationers*" (*Richardson*). "Words . . . often answering to calls too subtle for analysis, are constantly presenting themselves as *postulants* for recognition" (*F. Hall*). **Neophyte** usually suggests initiation, and is applicable to one who is learning the ways, methods, principles, or the like, of something with which he is newly connected, such as an art, a science, a society, a club, or a religious faith; as, "such an encounter usually perplexes the *neophyte* at first" (*M. C. Cooke*). In discriminating use, however, it carries connotations of innocence and youthful eagerness derived from its earliest English association with a newly baptized person or convert to Christianity. "The old philosopher of Monticello was more than pleased with this ardent *neophyte* . . . Not since his own years abroad had Jefferson seen such an eager student" (*Van W. Brooks*).

Ana. Beginner, starter, commencer (see corresponding verbs at **BEGIN**): *amateur, dilettante, dabbler, tyro.

noxious. Baneful, *pernicious, deleterious, detrimental. **Ana.** Injurious, hurtful, harmful (see corresponding nouns at **INJURY**): *poisonous, virulent, venomous, toxic, pestilent, miasmatic: noisome, stinking, fetid, putrid (see **MALODOROUS**).

Ant. Wholesome, sanitary.

nucleus. *Center, middle, midst, core, hub, omphalos, focus, heart.

nude, adj. *Bare, naked, bald, barren.

Ant. Clothed.

nugatory. *Vain, otiose, idle, empty, hollow.

Ana. Worthless, valueless (see affirmative nouns at **WORTH**): trifling, trivial, *petty, paltry: ineffectual, *ineffective, inefficacious: fruitless, bootless, *futile, vain, abortive.

nullify. **Nullify, negate, annul, abrogate, invalidate** in their current literary or general senses are often interchangeable without marked loss. All then bear the common denotation to deprive of effective or continued existence. One thing **nullifies** another when the former reduces the latter to nothingness or deprives it of effectiveness, validity, or value. "Each of his [Antony's] virtues . . . was *nullified* by some rampant vice" (*Buchan*). One thing **negates** another when one cannot coexist with the other or both are mutually destructive; as, our actions often **negate** our principles; death is the **negation** of life. One thing **annuls** another (see also **ANNUL**) when it neutralizes the effect of the other or deprives it of power to act or work. "That . . . is why we call them [the two types of electricity] 'positive' and 'negative'—because they are capable of *annulling* . . . one another's actions" (*Karl K. Darrow*). One thing **abrogates** another (see also **ANNUL**) when the former effectively dispenses with or abolishes the latter; as, this law **abrogates** the rights of

the minority. One thing **invalidates** another when it deprives the latter of its force or legality. *Invalidate* usually implies failure to meet tests of soundness or to conform to imposed conditions; as, a beneficiary under a will cannot witness the will without *invalidating* it. "Let us try to discover how far the facts confirm or *invalidate* this proud claim" (*A. Huxley*).

Ana. *Neutralize, negative, counteract: offset, counter-
vail, counterbalance, *compensate: *limit, restrict,
confine.

number, n. Quantity, whole, total, aggregate, *sum,
amount.

number, v. *Count, tell, enumerate.

Ana. *Calculate, compute, estimate, reckon.

numerous. *Many, several, sundry, various, divers,
manifold, multifold, multifarious.

Ana. *Large, great, big: abundant, *plentiful, plenteous.

nun. *Religious, monk, friar.

nuncio. Legate, internuncio, *ambassador, minister,
envoy.

nunnery. *Cloister, monastery, convent, abbey, priory.

nuptial, adj. *Matrimonial, conjugal, connubial,
hymeneal, marital.

nuptials. *Marriage, matrimony, wedlock, wedding,
spousal, espousals.

nurse, v. Nurse, nurture, foster, cherish, cultivate come into comparison not so strikingly in their primary as in their secondary senses, but in both cases they agree in meaning to give the care necessary to the growth, development, or continued welfare or existence of someone or something. **Nurse** literally implies close care of and attention to someone unable to care for himself, such as an infant or a sick person, with the idea of helping that one to grow strong and self-sufficient; as, he was slowly *nursed* back to health. In its extended sense, the term implies similar sedulous attentions, such as brooding over or constant provision of sustenance or that which feeds or nourishes, thereby strengthening what was at first weak, or indefinite, or tentative, or the like; as, "the uncle of this young woman...had...long *nursed* the prudent scheme of marrying her to his son" (*Meredith*); "When I would muse in boyhood... And *nurse* resolves and fancies" (*Housman*); "They sulkily avoid his eye, and *nurse* their wrath in silence" (*Shaw*). **Nurture** stresses the rearing and training, and so the determination of the course the person or, by extension, the thing, will follow; as, "*Nurtured*, as thy mien bespeaks, in high degree" (*Wordsworth*); "By solemn vision, and bright silver dream, His infancy was *nurtured*" (*Shelley*). "Reverence for age and authority, even for law, has disappeared; and in the train of these have gone the virtues they engendered and *nurtured*" (*G. L. Dickinson*).

Foster (etymologically, to provide a young thing with food and care as, or more often as if, its parent) is now rarely used literally, although this sense occurred frequently in the past; as, "Some say that ravens *foster* forlorn children" (*Shak.*). In its secondary sense, where it implies encouragement or promotion of the growth or increase of something, the term is very common; as, "Age, I find, *fosters* the finer feelings" (*L. P. Smith*); "Everything...had *fostered* in the princess a like conviction" (*H. James*). "The teaching that *fosters* these ends succeeds; the teaching which neglects them fails" (*H. Suzzallo*). "Governments have deliberately *fostered* nationalistic fervour to serve their own political purposes" (*A. Huxley*). **Cherish** stresses loving, protective care, such as that of a nurse or a parent for a child, or of a husband for a wife; as, "to love and to *cherish*, till death do us part" (*Anglican Marriage Service*). In its extended use, it is not always distinguishable from *nurse*, but among discriminating writers and speakers, it still retains its etymological implications of holding dear or as a thing of value, and stresses prizing and preserving rather than brooding over or causing to increase in strength; as, "She still *cherished* a very tender affection for Bingley" (*Austen*); "from the first, separately and together, she and I had *cherished* ideals of freedom and independence...and cast contempt on the narrow self-absorption of domestic love" (*H. Ellis*). "Julius was a bold iconoclast about republican forms which had survived their usefulness; Augustus sought to *cherish* whatever of these forms could be made to work" (*Buchan*). **Cultivate** in its literal sense implies the care and attention given to land in order to increase its fertility or to plants in order to improve their condition. In figurative or extended use, it implies comparable and equally sedulous attentions to the improvement or growth of something desirable; as, "his sense of personal initiative is *cultivated* instead of being diminished" (*B. Russell*). "Determined that his own books should not justify a similar reproach, he *cultivated* his literary gifts with conscientious industry" (*A. Huxley*). "We shall do well to *foster* the studies most conducive to the habits we wish to *cultivate*" (*Grandgent*).

Ana. *Feed, nourish: promote, *advance, further, forward: *indulge, pamper, humor.

nurture, v. Foster, *nurse, cherish, cultivate.

Ana. Raise, rear (see **LIFT**): train, educate, school, discipline (see **TEACH**): *support, uphold, back.

Con. *Neglect, overlook, disregard, ignore.

nutriment. Nourishment, sustenance, *food, aliment, pabulum.

Ana. Maintenance, support, keep, bread and butter, *living.

O

obdurate. Inexorable, *inflexible, adamant, adamantine.

Ana. *Hardened, indurated, callous: *obstinate, stubborn, mulish, stiff-necked: *immovable, immobile.

Con. *Tender, compassionate: yielding, submitting, succumbing, relenting (see **YIELD**).

obedient. Obedient, docile, tractable, amenable, biddable are synonyms carrying the common meaning of submissive to the will, guidance, or control of another. Though applied chiefly to persons, they are by extension

applicable also to things. **Obedient** implies due compliance with the commands or requests of a person or power whose authority one recognizes or accepts; as, *obedient* to the law; children trained to be *obedient* to their parents. "Exhort servants to be *obedient* unto their own masters" (*Titus* ii. 9). When applied to things, it implies compulsion by a superior force, movement in accordance with natural law, or the like; as, tides *obedient* to the moon. "And floating straight, *obedient* to the stream, Was carried towards Corinth" (*Shak.*). **Docile** implies a

responsiveness to teaching, but it stresses either a predisposition to submit to guidance or control, or negatively, an indisposition to resist impositions or to rebel against authority. "That is a question which you must excuse my child from answering. Not, sir, from want of will, for she is *docile* and obedient" (*Hudson*). "Whatever doctrine is best calculated to make the common people *docile* wage slaves" (*Shaw*). *Tractable*, which is nearly as often applied to things as to persons and animals, suggests success or ease in handling or managing. Unlike *docile*, which in many ways it closely resembles, it seldom implies a submissive temperament; thus, a *docile* child is always *tractable*, but a strong-willed child may prove *tractable* when he is wisely guided. "Loving she is, and *tractable*, though wild" (*Wordsworth*). "It [the Roman Senate] became more and more a dignified anachronism, peevish if unskillfully handled, *tractable* under a discreet Princeps" (*Buchan*). "One of the most *tractable* [that is, easily handled]... of the phenomena of the realm of Nature" (*Karl K. Darrow*). *Amenable* stresses a temperamental willingness or readiness to submit; not, however, in the spirit of obedience, but because of a desire to be agreeable, because of openness of mind, or the like. "We were now dealing with the intractable Sinhalese rather than the stupid but *amenable* Tamils" (*V. Heiser*). "Well, Joan had a broad brow; she thought things over; she was *amenable* to ideas" (*H. G. Wells*). "In spite of his usual *amenableness* to such suggestions, the President replied that... he was going" (*E. Roosevelt*). *Biddable* is a more homely word than *docile*; it is used chiefly of children, of servants, and the like. "Theophilus nodded, silently. He was perfectly apathetic.... He seemed to be just a silent, *biddable* child" (*Deland*).

Ana. *Compliant, acquiescent, resigned: submissive, subdued. *tame: deferential, obeisant (see corresponding nouns at HONOR).

Ant. Disobedient: contumacious. — **Con.** *Insubordinate, rebellious: *contrary, perverse, froward, wayward: recalcitrant, refractory, intractable, *unruly, ungovernable.

obaisance. Deference, homage, *honor, reverence.

Ana. Allegiance, fealty, loyalty, *fidelity: respect, esteem, *regard: veneration, reverence (see under REVERE).

obese. Corpulent, rotund, chubby, *fleshy, fat, stout, portly, plump.

Ant. Scrawny. — **Con.** *Lean, spare, angular, rawboned, lank, lanky, gaunt, skinny: *thin, slender, slim, slight.

obiter dictum. *Remark, observation, comment, commentary, note, descant.

object, v. Object, protest, remonstrate, expostulate, kick come into comparison when they mean to oppose something, such as a course, a procedure, a policy, or a project, especially by making known one's arguments against it. Object carries so strong an implication of dislike or aversion that it often is lacking in a clear or definite implication of vocal or other outward opposition: very frequently, however, such a reaction is suggested; as, why do you always *object* to everything he wishes to do for you? "Censorship of drama... [is] welcomed by the overwhelming majority of the public; *objected* to only by such persons as suffer from it" (*Galsworthy*). **Protest** (as here considered: see also ASSERT, 1) implies strong opposition and, usually, the presentation of objections in speech or in writing against the thing to which one objects; as, the residents of the district unanimously *protested* against the granting of the license; "It is against this dualism or pluralism that scientific men... *protest* when they reject the... conception of miracle as the

suspension of a lower law by a higher" (*Inge*); "swearing and *protesting* against every delay in the work" (*S. Anderson*). **Remonstrate** implies protestation but it carries so much stronger an implication of an attempt to convince or persuade than *protest* carries that it is often, though not invariably, the preferred term when the objection is to something being done by a child, a friend, or a relative, rather than by an official or an impersonal agent, or when reproach is also implied. "Now and then a well-meaning friend of Sir Austin's ventured to *remonstrate* on the dangerous trial he was making in modelling any new plan of education for a youth" (*Meredith*). "The family 'attention had been drawn to' the article, as people always express it when writing to a paper to *remonstrate* about something in it they haven't liked" (*R. Macaulay*); " 'Father Joseph,' he *remonstrated*, 'you will never be able to take all these things back to Denver'" (*Cather*). **Expostulate** differs little from *remonstrate*, but it usually carries a heightened implication of firm, earnest, but friendly reasoning or insistence on the merits of one's arguments. "The priestly brotherhood... Prompt to persuade, *expostulate*, and warn" (*Cowper*). "I resolved, for Johnny's sake, to *protest*, and that very evening drew Gibbings aside and *expostulated* with him" (*Quiller-Couch*). **Kick**, once in good English use in the sense here discussed, is now a colloquialism: it implies strenuous protestation and, usually, an exhibition of recalcitrancy or defiance; as, "Wherefore *kick* ye at my sacrifice and at mine offering?" (*1 Samuel* ii. 29); when the tax rate was raised for the fourth successive year, everybody *kicked*.

Ana. *Demur, balk, scruple, jib, hoggle, shy, stick, stickle: *criticize, denounce, reprobate.

Ant. Acquiesce. — **Con.** *Assent, consent, agree, accede.

object, n. 1 *Thing, article.

Ana. *Affair, concern, matter, thing: *form, figure, shape, configuration.

2 Objective, goal, end, aim, design, purpose, *intention, intent.

Ana. *Motive, incentive, inducement.

Con. Result, *effect, consequence.

objectify. Externalize, substantiate, substantialize, materialize, incarnate, embody, *realize, actualize, hypostatize, reify.

objective, adj. 1 *Material, physical, corporeal, phenomenal, sensible.

Ana. External, outside, *outer, outward: tangible, palpable, *perceptible.

Ant. Subjective.

2 Impartial, unbiased, dispassionate, uncolored, *fair, just, equitable.

Ana. & Ant. See those at OBJECTIVE, 1.

objective, n. Object, end, goal, aim, design, purpose, *intention, intent.

objurgate. *Execrate, curse, damn, ban, anathematize. **Ana.** Revile, vituperate (see SCOLD): condemn, denounce, reprobate, *criticize.

Con. Applaud, *commend, compliment.

obligation. 1 Obligation, duty come into comparison as denoting that which a person is bound to do or refrain from doing or for the performance or nonperformance of which he is held responsible. In ordinary usage, *obligation* commonly implies immediate constraint and a specific reference; as, he is under the *obligation* of supporting his aged mother; "Englishmen and women... wholly indifferent to the *obligations* of their faith" (*T. S. Eliot*); "the Ralstons fulfilled their *obligations* as rich and respected citizens" (*E. Wharton*). **Duty**, on the other hand, often suggests less compulsion from immediate

circumstances but a greater impulsion on moral or ethical grounds; thus, a person weighed down by a sense of *duty* is keenly aware of what in general he ought to do; one has a sense of *obligation* only in a particular case and for a particular reason; so, Wordsworth describes *duty* as "the stern daughter of the voice of God"; "The path of *duty* was the way to glory" (*Tennyson*); "The old statesman [Cicero] was now in a sad frame of mind, torn between *duty* and self-interest" (*Buchan*). "In the apprehension of these eternal Values, and in earnest striving to co-operate with the divine will in actualising them, lies the whole *duty* of man" (*Inge*).

Ana. Compulsion, constraint, restraint (see *FORCE*, *n.*): responsibility, accountability, answerability (see corresponding adjectives at *RESPONSIBLE*).

2 *Debt, indebtedness, liability, debit, arrear, arrearage. **Ana.** Burden, *load: promising or promise, engagement, pledging or pledge (see corresponding verbs at *PROMISE*).

oblige. 1 Constrain, coerce, compel, *force.

Ana. *Tie, bind.

2 **Oblige, accommodate, favor** agree in denoting to gratify a person by doing him a service or courtesy. To **oblige** a person is to make him indebted by doing something that is pleasing to him. "Punch was always anxious to *oblige* everybody" (*Kipling*). "She had given him up to *oblige* others" (*Austen*). It is commonly used in the passive voice as a conventional acknowledgment of small courtesies or offices. "There is an oversight... which I shall be much *obliged* to you to correct" (*Macaulay*).

Accommodate, when it is used of services, is often interchangeable with *oblige* in the active voice. Sometimes, especially in the participial adjective, it implies gracious compliance; as, an *accommodating* man; sometimes it connotes the intent to be of assistance. "I was willing to *accommodate* you by undertaking to sell the horse" (*G. Eliot*). But *accommodate* often suggests a business transaction rather than an act of kindness, and an obligation to pay or repay. In such use, it commonly implies a loan of money or acceptance as a paying guest (see also *CONTAIN*); as, the bank *accommodated* him when he provided sufficient security; no hotel in town could *accommodate* the party. To **favor**, by contrast, is to render an attention or a service solicited or unsolicited, out of good will, and commonly, but not necessarily, without imposing any obligation on, or expecting a return from, the person favored; as, to *favor* a person with one's advice; Fortune *avored* him in all his enterprises. Sometimes the implication of partiality is so strong as to obscure that of giving gratification or assistance; as, he always *avored* gifted students. The verb is of more restricted application than the noun, and in ironical use suggests gratuitousness. "The stupidity with which he was *favoured* by nature" (*Austen*).

Ana. Gratify, *please: *benefit, profit, avail: *help, aid, assist: *support, uphold, back.

Ant. Disoblige. — **Con.** *Inconvenience, incommode, discommode, trouble.

obliging. Good-natured, complaisant, *amiable.

Ana. Helping or helpful, aiding, assisting (see corresponding verbs at *HELP*): accommodating, favoring (see *OBLIGE*): *compliant, acquiescent: *thoughtful, considerate.

Ant. Disobliging: inconsiderate.

oblique. *Crooked, devious.

Ana. *Awry, askance, askew: *indirect, circuitous, roundabout.

Con. *Direct, immediate: *straightforward, forthright: downright, *forthright.

obliterate. Efface, cancel, expunge, *erase, blot out, delete, del.

Ana. *Abolish, annihilate, extinguish: *destroy, raze: annul, abrogate, negate, invalidate, *nullify.

oblivious. *Forgetful, unmindful.

Ana. Disregarding, ignoring, forgetting, neglecting, overlooking (see *NEGLECT*, *v.*).

Con. *Aware, conscious, cognizant: *thoughtful, attentive, considerate: alert, vigilant, *watchful.

obloquy. 1 *Abuse, vituperation, invective, scurrility, billingsgate.

Ana. Censuring or censure, condemning or condemnation, denouncing or denunciation, criticizing or criticism (see corresponding verbs at *CRITICIZE*): calumny, *detraction, backbiting, slander, scandal.

2 *Disgrace, dishonor, disrepute, shame, infamy, ignominy, opprobrium, odium, scandal.

Ana. *Stigma, brand, blot, stain: humiliation, humbling, degradation (see corresponding verbs at *ABASE*).

obnoxious. Distasteful, invidious, abhorrent, *repugnant, repellent.

Ana. *Hateful, odious, detestable, abominable: *offensive, loathsome, repulsive, revolting.

Ant. Grateful.

obscene. Gross, vulgar, ribald, *coarse.

Ana. Indecent, indelicate, *indecorous: lewd, lascivious, wanton, *licentious: foul, nasty, *dirty.

Ant. Decent.

obscurantist. Obscurantist, Philistine, barbarian agree in denoting one inaccessible or opposed to enlightenment. An **obscurantist** is one who is precluded by prejudice (as traditionalism or bigotry) from intellectual candor and open-minded inquiry and who is opposed to the introduction of new and enlightened ideas and methods. "From this class of [Chinese] *obscurantists* who had hitherto resisted all Western innovations there now came young leaders eager to emulate Japan" (*Peace Handbooks*). "You working men complain of the clergy for being bigoted and *obscurantist*, and hating the cause of the people" (*Kingsley*). A **Philistine** is one whose attention is centered on material or worldly things, and is indifferent or blind to whatever makes an appeal only to the mind or soul. The term usually implies obtuseness and insensitiveness. "In their heavy inaccessibility to ideas, their dull respectability, their tedious orthodoxy, their worship of vulgar success, their entire preoccupation with the gross materialistic side of life, and their ridiculous estimate of themselves and their importance, the Jews of Jerusalem in Christ's day were the exact counterpart of the British *Philistine* of our own" (*Wilde*). In the following quotation, Matthew Arnold has assigned to *Philistine* a restriction, and to *barbarian* a sense, that have been adopted by some later writers. "*Philistine* gives the notion of something particularly stiff-necked and perverse in the resistance to light and its children; and therein it specially suits our middle class... But the aristocratic class... if it does not pursue light, it is not that it perversely cherishes some dismal and illiberal existence in preference to light, but it is lured off from following light by... worldly splendor, security, power, and pleasure... I often, therefore, when I want to distinguish clearly the aristocratic class from the *Philistines* proper, or middle class, name the former, in my own mind, the *Barbarians*."

obscure, adj. 1 Murky, gloomy, opaque, *dark, dim, dusk, dusky, darkling.

Ana. Shady, shadowy, umbrageous (see corresponding nouns at *SHADE*).

Con. *Clear, lucid: *bright, brilliant, luminous.

2 **Obscure, dark, vague, enigmatic, cryptic, ambiguous, equivocal** come into comparison when they are applied to

language or expression (sometimes to causes, motives, etc.) and agree in meaning not sufficiently intelligible or clearly understood. That is **obscure** the true meaning of which is hidden or veiled, because of some fault or defect either in the thing itself or in the person who would understand it. "That decorum and orderliness without which all written speech must be ineffective and *obscure*" (H. Ellis). "Real and offensive *obscurity* comes merely of inadequate thought embodied in inadequate language" (Swinburne). "The mere text of the play will often look scrappy and disjointed and *obscure* to a reader who does not bring to it the special theatrical imagination" (C. E. Montague). That is **dark** which is so imperfectly revealed as to be invested with mystery; as, "I will utter *dark sayings*" (Psalms lxxviii. 2); "*dark* hints about Richard" (Meredith). That is **vague** which is lacking in distinct outlines or in clear definition, either because it is too general or because it is so imperfectly conceived or thought out that it is incapable of clear formulation. "The only objection that can be urged is found within the *vague* contours of the Fifth Amendment, prohibiting the depriving any person of liberty or property without due process of law" (Justice Holmes). "We shall never gain power from *vague* discourse about unknown or unassimilated facts" (Grandgent). That is **enigmatic** which puzzles, mystifies, and, often, baffles one who would seek its true meaning or significance. "She fell to conjecturing the meaning of Farfrae's *enigmatic* words about not daring to ask her what he fain would" (Hardy). "Puzzling out the threats, or the *enigmatic* promises, of a starry sky" (Palmer). That is **cryptic** which is stated or expressed darkly or enigmatically; the word often implies a definite intention to perplex or to challenge. "She's too young to be really young," she remarked *cryptically*" (Van Vechten). "Instead of inventing, they [the great poets] discovered. If that sounds *cryptic*, let us start with a modern instance" (Lowes). That is **ambiguous** which admits of more than one interpretation, largely because of the use of a word or words having a dual (or multiple) meaning without giving an indication of which sense is intended. "The title of this chapter is *ambiguous*. It promises a discussion of the end of the world, but it does not say which end" (Eddington). "We are here not far from the *ambiguous* doctrine that art is 'expression,' for 'expression' may be too easily confused with 'communication'" (H. Ellis). That is **equivocal** which permits a wrong or false impression, thereby admitting uncertainty and confusion or fostering error. As applied to use of words, *equivocal* is distinguishable from *ambiguous* in that it implies the repeated use of a word in different applications in such a way as to convey the impression that the term carries the same implications and connotations in each case; as, the *equivocal* use of "democracy" by persons who apply it to popular governments of widely varying types. In extended use *equivocal* is applied to anything, such as an act or a mode of life, that admits of two possible or plausible interpretations, one of which may be harmful or discreditable; as, *equivocal* conduct; an *equivocal* remark.

Ana. Abstruse, *recondite, occult, esoteric: difficult, *hard: complicated, intricate, involved (see COMPLEX): *mysterious, inscrutable.

Ant. Distinct, obvious: celebrated (as a person). — **Con.** *Clear, perspicuous, lucid: *evident, manifest, obvious: express, *explicit, definite.

obsequious. *Subservient, servile, slavish, menial.

Ana. Deferential, obeisant (see corresponding nouns at HONOR): *compliant, acquiescent: sycophantic, parasitic, toadyish (see corresponding nouns at TOADY):

cringing, fawning, truckling, cowering (see FAWN, v.). **Ant.** Contumelious.

observance. **Observance, observation**, though ultimately derived from the same root, came into English as different words about two centuries apart. They are not synonyms but are sometimes confused. **Observance**, the older of the two forms, has always retained a close relation to *observe* in the sense of *keep* (see *observe* under **KEEP**, 1) and, therefore, almost invariably implies a close heeding or following, as of rules, customs, and rites, or in the celebration of prescribed holidays or holydays, or the like. The term may denote either the act of observing or keeping (as, "He was careful in his *observance* of all prescribed religious rites"—G. L. Dickinson) or a rule, custom, rite, or the like, that is observed (as, "He set about it in a very orderly manner, with all the *observances*, which he supposed a regular part of the business"—Austen; "The beauty of an inherited courtesy of manners, of a thousand little ceremonies flowering out of the most ordinary relations and *observances* of life"—Binyon). **Observation**, the later term, is in current use sharply distinguished from *observance*, for it usually bears a close relation to *observe* in the sense of to watch attentively. Except for its specific sense of a comment (see **REMARK**, n.), the term may denote either the act or process of observing (as, the astronomer devotes several hours each clear night to *observation* of the stars; "He [Trollope] was an honest and industrious craftsman with a considerable power of *observation*"—Maugham) or the act or fact, or an instance, of being observed (as, "He needs daily exercise in the open air; but he cannot bear *observation*"—Shaw).

observation. 1 *Observance.

2 *Remark, comment, commentary, note, descant.

Ana. *Opinion, view, belief: annotation, gloss (see under **ANNOTATE**): *criticism, critique.

observe. 1 *Keep, celebrate, solemnize, commemorate.

Ana. Respect, esteem, regard (see under **REGARD**, n.). *revere, reverence, venerate.

Ant. Violate. — **Con.** *Neglect, ignore, overlook, disregard, slight.

2 Survey, view, contemplate, notice, remark, note, perceive, discern, *see, behold, descry, espy.

Ana. *Scrutinize, examine, scan, inspect.

observer. *Spectator, beholder, looker-on, onlooker, witness, eyewitness, bystander, kibitzer.

obsolete. *Old, antiquated, archaic, antique, ancient, venerable, antediluvian.

Ant. Current.

obstacle. **Obstacle, obstruction, impediment, bar, snag** agree in denoting something which seriously hampers action or progress. **Obstacle**, which is used of both material and immaterial things, applies to any object, condition, situation, or the like, which stands in one's way and must be removed or surmounted if one is to progress or attain one's ends. "Feeling about for the *obstacle* which had flung him down, he discovered that two tufts of heath had been tied together across the path" (Hardy). "It is of the very essence of supremacy to remove all *obstacles* to its action within its own sphere" (Ch. Just. Marshall). "The new Lord Advocate ... the conqueror of many *obstacles*" (Stevenson). **Obstruction** may be used of immaterial things, but such use is often obviously figurative, for the word suggests a blocking of a way or passage; as, the French Maginot Line and the German Westwall proved serious *obstructions* to the movement of troops; an intestinal *obstruction*. "Any phrase repeated too often becomes an *obstruction* to the flow of thought and feeling. It forms a clot" (S. M.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Crothers). **Impediment**, which etymologically implies an entangling of the feet, is, in precise use, applied to something (material or immaterial) which serves to hinder or delay action or progress until one is freed from it; as, the refugee's limited knowledge of English was for a long time an *impediment* to his progress in his profession; divorce is often a means of freeing oneself from an *impediment* to another marriage. "I have made my way through more *impediments* Than twenty times your stop" (*Shak.*). "[In commerce] distance of place, difference of speech, are irremovable *impediments*" (*Bagehot*). **Bar** applies to something interposed, as by nature or by man, which serves, either in effect or by intention, to prevent admission or escape as effectually as the bars of a cage or prison. Sometimes the word carries a strong suggestion of prohibition, especially when it applies to a law or condition that restrains; as, under the immigration laws, a criminal record, an infectious disease, and illiteracy are *bars* to admission to the United States; he found his infirmity no *bar* to his success in his profession. "Must I new *bars* to my own joy create?" (*Dryden*). "Who breaks his birth's invidious *bar*... And breasts the blows of circumstance" (*Tennyson*). **Snag**, from its literal application to a stump of a tree with jagged points which lies hidden under water and proves a hazard to boats, is figuratively applied to any obstacle or impediment which is hidden from view and which one encounters as suddenly and as sharply as a boat that strikes a snag; as, they struck many *snags* in the course of their investigation; refugees continually running against some *snags* in the shape of laws affecting aliens. **Ana.** Barrier, *bar: hindering or hindrance, blocking or block (see corresponding verbs at HINDER): opposing or opposition, resisting or resistance, withstanding (see corresponding verbs at OPPOSE).

obstinate. **Obstinate, dogged, stubborn, pertinacious, mulish, stiff-necked, pigheaded, bullheaded** come into comparison when they mean fixed or unyielding in one's purpose, course, or the like. **Obstinate** implies persistent adherence, especially against persuasion or attack, to an opinion, purpose, or course: when applied to persons, their ideas, and the like, the term often suggests unreasonableness or perversity rather than steadfastness; as, "They will not be resolute and firm, but perverse and *obstinate*" (*Burke*); "so yielding doubtful points that he can be firm without seeming *obstinate* in essential ones" (*J. R. Lowell*); "There is nothing in the world which can be quite so *obstinate* as a yielding, mild, opinionless girl" (*Deland*). **Dogged** adds the implication of downright and tenacious, sometimes sullen, persistence: usually, also, it connotes great determination or an unwavering purpose; as, "a *dogged* veracity" (*Johnson*); "a *dogged* perseverance" (*Thackeray*); "Men whose hearts insist upon a *dogged* fidelity to some image or cause" (*Hardy*); "his mother's influence was to make him quietly determined, patient, *dogged*, unwearyed" (*D. H. Lawrence*). **Stubborn** is often used interchangeably with *obstinate* and *dogged*, for it implies the unyielding adherence of the one and the tenacious determination of the other; more strongly than either of them, however, it carries an implication of a native fixedness of character or of a deeply inrooted quality that makes a person sturdily resistant to attempts to change his purpose, course, or opinion, or that makes a thing highly intractable to those who would work it, treat it, manipulate it, or the like; as, "stubborn as a mule" (*Smollett*); "Their furrow oft the *stubborn* glebe has broke" (*Gray*); "Cases which proved *stubborn* to treat and often impossible to cure" (*V. Heiser*); "Poetry whose democracy is tempered by a *stubborn* conviction that democracy thwarts the develop-

ment of the individual at its peril" (*Lowes*). **Pertinacious** lacks, as compared with *obstinate*, the implication of resistance, and as compared with *stubborn*, the suggestion of inherent quality: it usually implies a chosen course, and stresses its pursuit with "stick-to-itiveness" and, often, with a persistence that is annoying or irksome; as, *pertinacious* as a mosquito; a *pertinacious* beggar. "[Socrates's] originality lay not in any purely speculative views, but in the *pertinacious* curiosity, practical in its origin and aim, with which he attacked and sifted the ethical conceptions of his time" (*G. L. Dickinson*). **Mulish** suggests an obstinacy as characteristic or as unreasonable as that of a mule; as, "a man...intolerably irritable...with a *mulish* determination to make the worst of everything" (*T. S. Eliot*); "A fierce, hot, hard, old, stupid squire... Small brain, great courage, *mulish* will" (*Masefield*). **Stiff-necked**, more even than *obstinate* or *stubborn*, stresses inflexibility: it often also suggests a haughtiness or arrogance that makes one, like a high-spirited horse incapable of obeying the rein, incapable of respecting the commands, wishes, or suggestions of others; as, the *stiff-necked* father could neither control his children nor win their love when they approached adolescence; "Be ye not *stiffnecked*, as your fathers were, but yield yourselves unto the Lord" (2 *Chronicles* xxx. 8). **Pigheaded** and **bullheaded** (both more colloquial than the other terms of this group) suggest a particularly perverse or stupid kind of obstinacy; therefore they are chiefly terms of severe reproach; *pigheaded*, however, often suggests impenetrability to argument and *bullheaded*, headstrong determination; as, "many of the managing posts will be filled up by *pigheaded* people only because they happen to have the habit of ordering poor people about" (*Shaw*); "their *bull-headed* obstinacy" (*Scott*).

Ana. Headstrong, willful, recalcitrant, *unruly: obdurate, inexorable, *inflexible: resolute, steadfast, stanch (see FAITHFUL).

Ant. Pliant, pliable. — **Con.** *Plastic, malleable, ductile: submitting or submissive, yielding, succumbing (see corresponding verbs at YIELD): *compliant, acquiescent.

obstreperous. *Vociferous, clamorous, blatant, strident, boisterous.

Ana. *Unruly, ungovernable, intractable, headstrong, refractory: uproarious, rackety (see corresponding nouns at DIN).

Con. Restrained, curbed, checked (see RESTRAIN): quiet, *still, silent, noiseless.

obstruct. Impede, block, *hinder, bar, dam.

Ana. *Prevent, preclude, obviate, avert: *restrain, check, curb, inhibit.

obstruction. *Obstacle, impediment, bar, snag.

Ana. Hindering or hindrance, blocking or block (see corresponding verbs at HINDER): arresting or arrest, checking or check, interruption (see corresponding verbs at ARREST).

Ant. Assistance. — **Con.** Forwarding, furthering, promoting or promotion, advancing or advancement (see corresponding verbs at ADVANCE).

obtain. *Get, procure, secure, acquire, gain, win, earn.

Ana. Gain, *reach, achieve, attain: effect, fulfill, accomplish, *perform.

obtrude. *Intrude, interlope, butt in.

Ana. *Interpose, interfere, intervene, mediate.

obtrusive. Intrusive, meddlesome, *impertinent, officious, pragmatical.

Ana. Inquisitive, *curious, prying, snoop, nosy: blatant, strident (see VOCIFEROUS).

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

Anf. Unobtrusive: shy.

obtuse. *Dull, blunt.

Ana. Insensitive, *insensible, anesthetic, impassible: stolid, phlegmatic, *impassive.

Anf. Acute. — **Con.** *Sharp, keen: sensitive, susceptible, open, exposed (see **LIABLE**).

obverse, n. *Converse, reverse.

obviate. Preclude, *prevent, avert, ward off.

Ana. Evade, elude, avoid, *escape: forestall, anticipate, *prevent: *interpose, interfere, intervene.

obvious. *Evident, manifest, patent, distinct, apparent, palpable, plain, clear.

Ana. Prominent, conspicuous, salient, signal, striking (see **NOTICEABLE**).

Anf. Obscure: abstruse.

occasion, n. 1 *Opportunity, chance, break, time, tide, hint.

Ana. *Juncture, pass: situation, posture, condition, *state: moment, *instant.

2 *Cause, determinant, antecedent, reason.

Ana. Incident, *occurrence, event: *origin, source, inception.

occasional. *Infrequent, uncommon, scarce, rare, sporadic.

Ana. Casual, desultory, *random: incidental, *accidental.

Anf. Customary. — **Con.** *Usual, habitual, accustomed, wonted: constant, *continual, continuous.

occult. Esoteric, *recondite, abstruse.

Ana. *Mysterious, inscrutable, arcane: mystic, cabalistic, *mystical, analogical.

occupation. Employment, *work, calling, pursuit, métier, business.

occur. *Happen, hap, chance, befall, betide, transpire.

Ana. Rise, arise, *spring, emanate, issue, proceed: *follow, succeed, ensue, supervene.

occurrence. **Occurrence, event, incident, episode, circumstance** agree in denoting something that happens or takes place. **Occurrence** is the general term for that which takes place; as, "Omit All the *occurrences*, whatever chanced, Till Harry's back-return again to France" (*Shak.*); "Such a happy and convenient *occurrence*, the princess's conversion" (*H. G. Wells*). **Event** (which is frequently regarded as arising from an antecedent state of things) is a more or less important or noteworthy occurrence; as, the *events* of the year; the sequence of *events* that followed the declaration of war; her engagement was the *event* of the season; "The course of human *events*" (*The Declaration of Independence*). An *incident* (cf. *incident* under **ACCIDENTAL**) is commonly an occurrence of subordinate character or secondary importance, either a mere casual happening having little relation to major events, or an occurrence that merely follows because of them; as, "Her tone implied that bedroom fires were a quite ordinary *incident* of daily life in a place like Bursley" (*Bennett*). "Many American writers have won that honor [an Oxford degree]; it is, in fact, almost a routine *incident* in a distinguished career. In the case of Mark Twain it became a historic *event*" (*Van W. Brooks*). The term may, however, be used of a single event that stands out or is marked off clearly from the other events (as in a story, a play, a history) in its nature or significance; as, the book narrates a series of thrilling *incidents*; "he was delighted and looked upon the *incident* as an adventure" (*S. Anderson*). In current use the term is applied, especially by journalists, to any critical event that provokes a break in diplomatic relations between countries, suggests the possibility of war, or the like; as, the Corfu *incident*

(1923) caused the severance of diplomatic relations between Italy and Greece; border *incidents*. **Episode** (see also **DIGRESSION**) is often used in place of *incident* in the sense of a single or outstanding event, but the term, in precise use, often carries a stronger implication of distinctiveness or apartness from the main course than does *incident*; as, "A pretty little domestic *episode* occurred this morning" (*Meredith*); "Clare would inevitably... come to regard her passion for Oliver Hobart and its tragic sequel as a romantic *episode* of girlhood" (*R. Macaulay*). **Circumstance** is used as a synonym of *incident* only when the latter is thought of as a detail; as, "before closing his door for the night, [he] stood reflecting on the *circumstances* of the preceding hours" (*Hardy*). The word is also occasionally used as a synonym for *event* in its more general sense; as, certain curious *circumstances* in his history.

Ana. Appearance, emergence (see corresponding verbs at **APPEAR**): *juncture, pass, exigency, emergency, contingency: posture, situation, condition, *state.

oceanic. *Aquatic, marine, thalassic, neritic, pelagic, abyssal, bathysmal, bathybic, lacustrine, lacuscular, fluvial, fluvatile.

odd. Queer, quaint, *strange, singular, unique, peculiar, eccentric, erratic, outlandish, curious.

Ana. Bizarre, grotesque, *fantastic: anomalous, *irregular, unnatural.

Con. *Usual, customary, habitual: ordinary, *common, familiar: normal, *regular, typical, natural.

odds. *Advantage, handicap, allowance, edge.

odious. *Hateful, abhorrent, abominable, detestable.

Ana. *Repugnant, repellent, distasteful, obnoxious: *offensive, loathsome, repulsive, revolting.

odium. Obloquy, opprobrium, ignominy, infamy, *disgrace, dishonor, disrepute, shame, scandal.

Ana. *Hate, hatred: *antipathy, aversion: abhorrence, abomination, detestation, loathing (see under **HATE, v**)

odor or odour. *Smell, scent, aroma.

Ana. *Fragrance, perfume, redolence, incense, bouquet, scent.

odorous. **Odorous, fragrant, redolent, aromatic, balmy** agree in meaning emitting and diffusing scent. **Odorous** applies to anything which has a strong, distinctive smell, whether it is pleasant or not; as, *odorous* flowers such as lilies, tuberoses, and narcissuses; *odorous* chemicals are often malodorous; "*odorous* gums from the East" (*Wilde*). **Fragrant** applies to that which has a sweet and agreeable odor, especially to flowers, fruits, beverages, and the like, that through their lingering sweetness of scent give *sensuous* delight; as, *fragrant* roses; "Where the *fragrant* limes their boughs unite, We met— and we parted forever!" (*J. Crawford*); "perhaps far back... certain Chinese preferred *fragrant* tea to insipid water!" (*V. Heiser*). **Redolent** once meant, and still occasionally means, pleasantly odorous; in such use, it applies not only to things that diffuse a scent, but to the scent itself, as, the *redolent* pine; the *redolent* scent of pine. "Every flower and every fruit the *redolent* breath Of the warm seawind ripeneth" (*Tennyson*). In current use, it chiefly applies to a place or thing impregnated with odors, especially with those that are penetrating and delightful. "Dim, shady wood-roads, *redolent* of fern And bayberry" (*Millay*). **Aromatic** is more restricted in its implications than *aroma*, for it usually suggests a certain type of pungent, often fresh, odor of the kind associated with the foliage of balsams, pine, and spruce, the wood of cedar, the dried leaves of lavender, certain spices such as cloves and certain gums such as myrrh. It is therefore often applied to preparations scented with substances

that are aromatic; as, *aromatic* smelling salts; *aromatic* spirit of ammonia. *Balmy* applies chiefly to things which have a delicate and soothing aromatic odor; as, "the *balmy* air of night" (*Poe*). "As *aromatic* plants bestow No spicy fragrance while they grow; But crush'd, or trodden to the ground, Diffuse their *balmy* sweets around" (*Goldsmith*).

Ant. Malodorous: odorless. — *Con.* Stinking, fetid, noisome, putrid, rank, rancid, fusty, musty (see *MALODOROUS*).

oeconomus. *Steward, reeve, bailiff, agent, factor, seneschal, major-domo.

oecumenical. Variant of *ECUMENICAL*.

offend. *Offend*, *outrage*, *affront*, *insult* come into comparison when they mean to cause another, especially by one's actions or words, to be deeply vexed or hurt or to take umbrage. One *offends* who, with or without intention, displeases another by hurting his feelings or by violating his sense of what is proper or fitting. "He begged pardon for having displeased her. In a softened tone she declared herself not at all *offended*" (*Austen*). "The majority of women that he meets *offend* him, repel him, disgust him" (*Mencken*). One *outrages* who offends another past endurance, or offends his pride, or his sense of justice or honor, etc. "Grief of two years' standing is only a bad habit." Alice started, *outraged*. Her mother's grief was sacred to her" (*Shaw*). One *affronts* who, either with an intent to offend or with deliberate indifference to civility or courtesy, humiliates or dishonors a person and arouses his deep resentment. "A moral, sensible, and well-bred man Will not *affront* me, and no other can" (*Cowper*). One *insults* who wantonly and insolently offends another so as to cause him humiliation or shame. "You can annoy, you can *insult*, you cannot move me" (*Meredith*).

Ana. *Annoy, vex, irk, bother: exasperate, nettle, *irritate: pique, *provoke, excite: chate, fret, gall (see *ABRADE*).

offense or offence. 1 Offensive, aggression, *attack.

Ana. Assault, *attack, onslaught, onset.

2 *Offense (or offence)*, *resentment*, *umbrage*, *pique*, *dudgeon*, *huff* come into comparison as denoting a person's emotional reaction to what he regards as a slight, an affront, an insult, or an indignity. *Offense* implies a state of displeasure (often but not necessarily extreme displeasure) or of wounded feelings; as, criticism so tactfully made that they gave no *offense*; he is so sensitive that he takes *offense* at any unintentional or seeming slight. *Resentment* implies more indignation than *offense*, more prolonged dwelling upon what one regards as a personal injury or grievance and, often, more ill will to the person who has offended; as, "It is very difficult to get up *resentment* towards persons whom one has never seen" (*Neuman*); "As long as I am free from all *resentment*. . . I would be able to face the life with much more calm" (*Wilde*); "Westermarck. . . claims that *resentment* and gratitude (which he calls emotions) are the foundation of moral judgments" (*S. Alexander*). *Umbrage* (currently used chiefly in the phrase "to take umbrage") differs from *offense* in carrying a clearer implication of being slighted or unfairly ignored: the term therefore generally suggests ruffled pride, resentful suspicion of others' motives, or jealousy of those favored; as, "Although the Rector was not inclined to take *umbrage* at the treatment they had received, he showed. . . that he was quite aware that it was not what might have been considered due to them" (*Arch. Marshall*). Very often, however, *umbrage* is not clearly distinguishable from *offense*; as, "I should be very loath to give the least *umbrage or offence* by what I have said" (*Swift*). *Pique*

applies to the fit of one who has taken offense or umbrage, but it distinctively suggests a petty cause and a transient mood, and often connotes wounded vanity; as, "When the wanton heroine chooses to. . . flirt with Sir Harry or the Captain, the hero, in a *pique*, goes off and makes love to somebody else" (*Thackeray*). *Dudgeon* applies chiefly to a fit of angry resentment or of high indignation provoked by opposition to one's views, a refusal of one's request, or the like; as, to go off in high *dudgeon*; "They often parted in deep *dudgeon*" (*Scott*); "You must not be in a *dudgeon* with me" (*Trollope*). *Huff*, like *dudgeon*, applies to a fit of anger, but it comes closer to *pique* in suggesting pettiness of cause and transitoriness; distinctively, it implies petulance and a refusal to have more to do with those who have offended. "At the first hint that we were tired of waiting and that we should like the show to begin, he was off in a *huff*" (*H. James*). "Half of 'em will be disgusted, and go away in a *huff*" (*W. De Morgan*).

Ana. *Affront, insult, indignity: indignation, wrath, *anger.

Con. *Pleasure, delight, joy: gratifying or gratification, rejoicing (see corresponding verbs at *PLEASE*).

3 *Offense (or offence)*, *sin*, *vice*, *crime*, *scandal* are here compared as general terms denoting a more or less serious or conspicuous infraction or transgression of law. *Offense* is the term of widest application, being referable to a violation of any law, including the law of the state, the law of the church, natural law, moral law, the standards of propriety, taste, etc., set up by society or the arts, and the like. It is also applicable to any transgression regardless of its triviality or gravity, or its voluntary or involuntary character, provided it injures or tends to injure the welfare, or well-being, or happiness of others. "O, my *offense* is rank, it smells to heaven; It hath the primal eldest curse upon't, A brother's murder" (*Shak.*). "Punch. . . was careful not to repeat the *offence*, because Aunt Rosa told him that God had heard every word he had said and was very angry" (*Kipling*). "The greater the number of laws, the greater the number of *offences* against them" (*H. Ellis*). *Sin*, in strict use, applies to an offense against the moral law, especially as laid down in the Ten Commandments and in laws derived from them. Theologically, its essential character is disobedience of the divine will and willful opposition to the law of God: in somewhat wider use, it implies a failure to live up to the moral ideals of one's time or environment or to the moral ideal one has set as the standard of one's own conduct; as, all regarded stealing and lying as *sins*; the *sin* of sacrilege; nonobservance of the Sabbath was the *sin* most abhorred by the settlers of that region; "what constitutes the essence of the tragedy. . . is the habituation of Beatrice to her *sin*" (*T. S. Eliot*). *Vice* (as here considered: see also *FAUL*, 1), though frequently applied to any of the offenses that from the theological and religious points of view are called sins, often carries little suggestion of a violation of divine law; rather, it more uniformly imputes to such offenses a character suggestive of moral depravity, corruption, or deep degradation; also, the term less often applies to single acts or single transgressions than to habits, practices, etc., that debase the character of a person or group of persons; as, "Spare then the person, and expose the *vice*" (*Pope*); "Treachery and cruelty, the most pernicious and most odious of all *vices*, seem peculiar to uncivilized ages" (*Hume*). *Crime*, in its earliest and still most common sense, applies to any infraction of law, especially of common law or statute law, that is punishable by the state or by any power that constitutes itself as the guardian of such law: it is not a technical legal term, but it is often used in the courts

Ana. analogous words. *Ant.* antonyms. *Con.* contrasted words. See also explanatory notes facing page 1.

and is sometimes defined in penal codes, usually as a general term applicable to any act or omission forbidden by law and punishable upon conviction. In such use the term comprehends many clearly distinguished types of offenses such as a misdemeanor, a felony, treason, and the like; as, "the reason for excluding evidence obtained by violating the Constitution seems to me logically to lead to excluding evidence obtained by a *crime* of the officers of the law" (*Justice Holmes*); "offenses against marriage such as adultery, which is a *crime* punishable by death in Papua and only a *sin* in civilized society" (*Social Science Abstracts*). "Human society may punish us for *crimes*; human monitors reprove us for *vices*; but God alone can charge upon us the *sin*, which He alone is able to forgive" (*J. Maritain*). *Crime* and, less often, *sin*, are often applied to offenses that are of exceedingly grave nature; in fact, this implication is often found in *crime*, even in its quasi-legal sense. "I've not been guilty of anything more than an indiscretion.... I behaved foolishly, but that's not a *crime*" (*C. Mackenzie*). *Scandal* comes into comparison with these words in the sense here considered because it applies to an offense against any law that is also an offense in another sense of that word—that of an act, a condition, a practice, or the like, which offends the public conscience or which puts a stumbling block in the way of those who should obey the law or should be trained to obey it: unlike the words *sin*, *vice*, and *crime*, it carries no implication of probable or certain punishment or retribution, but emphasizes the distressing effect it has on others or the discredit it attaches to religion, to morals, etc.; as, "Catholics... could not appear in Protestant assemblies without causing *scandal* to the weaker brethren" (*Froude*); "the man's life is an open *scandal*" (*Cather*); "There is only one way in which we can meet and be together... and that is as friends.... I will be party to no *scandal*" (*R. Macaulay*).

Ana. *Injustice, injury, wrong, grievance, tort: *breach, infraction, violation, transgression, trespass, infringement, contravention.

offensive, *adj.* 1 Attacking, aggressive. See under **ATTACK**, *n*.

Ana. Invasive, incursive, irruptive (see corresponding nouns at **INVASION**): assaulting, assailing, attacking, bombarding, storming (see **ATTACK**, *v*).

2 **Offensive**, **loathsome**, **repulsive**, **repugnant**, **revolting** come into comparison as meaning utterly distasteful or repellent. That is **offensive** which subjects one to painful or highly disagreeable sensations. Sometimes the term implies injured feelings as a result of an affront or insult (as, "Oly, though without the tact to perceive when remarks were untimely, was saved by her very simplicity from rendering them *offensive*"—*Hardy*); often, also, the term suggests the evocation of such aversion that endurance involves mental strain or moral distaste (as, "[a situation] far less *offensive* to modern taste than many other situations in Elizabethan drama"—*T. S. Eliot*; "Particularly *offensive* to the ear of the old-fashioned Yankee is... 'goodnus' for goodness"—*Grandgent*); most often, it implies a vileness of appearance, odor, or the like, that excites nausea or extreme disgust (as, "[she] lay stretched awkwardly... her head thrown back, her face discoloured, her eyes bulging, her mouth wet and yawning: a sight horribly *offensive*"—*Bennett*). That is **loathsome** which is so foul or obscene that one cannot look upon it, hear it, feel it, or the like, without a sense of deep disgust and abhorrence: often the term is not clearly distinguishable from **offensive** in the sense of disgustingly nauseating, but it is probably applied more often to things which must be endured or cannot

be avoided; as, **loathsome** diseases; **loathsome** prison conditions; the **loathsome** details of a battle scene; "a band of **loathsome** fakirs" (*Kipling*). That is **repulsive** which is so ugly in its appearance, or so completely lacking in all that attracts, or allures, or charms, or even challenges interest, that it either drives one away or makes one unwilling to dwell on it; as, "Mary was not so **repulsive** and unsisterly as Elizabeth" (*Austen*); "To Dorothea it [the memory of an aunt's long illness] was all ghastly and **repulsive**" (*Deland*); "Work which is now **repulsive** can be made no irksome than the general run of necessary labour" (*Shaw*). "In those days all school-books were as **repulsive** as publishers could make them. Their appearance went a long way in discouraging any intimacy with their contents" (*A. Repplier*). That is **repugnant** (in the extreme sense in which it is here considered: see also **REPUGNANT**, 1) which is highly offensive or loathsome because in direct conflict with one's nature, one's principles, and one's tastes, and irreconcilable with them. "This frightful condition of internal strain and instability [in Europe in 1914] was not set up by human nature: it was, I repeat, intensely **repugnant** to human nature, being a condition of chronic terror that at last became unbearable" (*Shaw*). "The door is not barred and bolted for a solution less **repugnant** to our deepest intuitions than that [determinism] which has hitherto seemed to be forced upon us" (*Eddington*). That is **revolting** which is so extremely offensive, loathsome, repulsive, or repugnant to a person of fine feeling or delicate sensibilities that the sight or thought of it arouses in him a desire or determination to resist or rebel; as, he found horseflesh **revolting**; "to developed sensibilities the facts of war are **revolting** and horrifying" (*A. Huxley*); "There was something **revolting** in having to plead like this" (*Galsworthy*); "**Revolting** cant about the duty of obedience and the wickedness of resistance to law" (*H. Adams*).

Ana. Repellent, *repugnant, abhorrent, distasteful, obnoxious, invidious: *hateful, odious, abominable, detestable.

offensive, *n*. *Attack, aggression, offense.

Ana. Assault, *attack, onslaught, onset.

offer, *v*. **Offer**, **proffer**, **tender**, **present**, **prefer**, as here compared, agree in meaning to lay, set, or put something before another for acceptance. **Offer**, the most common of these words, implies in its earliest sense a laying before God, or a god, something devoutly hoped to be worthy of his acceptance; as, to **offer** a goat as a sacrifice; to **offer** up one's prayers. In current use, it frequently implies a putting before one something which may be accepted or rejected according to his will or choice; as, "There was a crown **offered** him: and being **offered** him, he put it by" (*Shak.*); "Had he succeeded, he told me, he would have **offered** me the post of sub-editor" (*H. Ellis*). The verb is also used both transitively and intransitively in the sense of to put something before one for consideration, selection, as a way out of a difficulty, or the like; as, to **offer** one's help; to **offer** a suggestion, a remark, a motion, a plan; to **offer** oneself in marriage; the dress department **offers** several new models this week; he **offered** \$10,000 for the house; "she appeared... ready to escape... when a way of escape **offered**" (*Hudson*); "We must ask in the end what they have to **offer** in place of what they denounce" (*T. S. Eliot*). The word is often loosely used in the sense of to give something by or as if by handing it to one, with no suggestion of its formal acceptance or possible rejection; as, "When she **offered** him tea, he made it a point to launch a cautious inquiry if she knew Mr. Farfrae" (*Hardy*). **Proffer**, a more formal or literary term than

offer, differs from it chiefly in more consistently implying a putting or setting before one something that one is at liberty to accept or reject, and in usually suggesting voluntariness, spontaneity, courtesy, or the like, on the part of the agent; as, he *proffered* his arm to a lady having difficulty in crossing a street; "Dorothea...felt that it would be indelicate just then to ask for any information which Casaubon did not *proffer*" (*G. Eliot*); "rejecting the *proffered* assistance of a couple of officious friends" (*Shaw*); "The flavour of social success is delicious, though it is scorned by those to whose lips the cup has not been *proffered*" (*L. P. Smith*). *Tender* (etymologically, to stretch out, or extend) was originally and still is a formal term in legal use, meaning to offer something to the court or to the person or persons concerned, according to the terms of the law, for formal acceptance or approval; as, to *tender* a thousand dollars in full satisfaction of a debt; the defense will *tender* evidence to prove its contention that the defendant has a sound alibi; to *tender* the oath to a justice being sworn into office. In more general use, *tender* differs from *offer* and *proffer* in carrying a stronger connotation of modesty, humility, gentleness, or the like, on the part of the one who makes the offer; as, "My gracious lord, I *tender* you my service" (*Shak.*); to *tender* one's friendship. "I will not dare to discuss that wisdom here. I observe that when the poets preach it we *tender* them our applause" (*Quiller-Couch*). *Tender*, however, is the idiomatic or highly polite term in certain collocations; as, to *tender* one's resignation; to *tender* one's hospitality; to *tender* one's congratulations. *Present*, as here compared (see also *GIVE*), carries a stronger implication of ceremonious exhibition or of outward show than any of the preceding terms: otherwise it often suggests little more than *offer* in the sense of to lay or put before one for consideration, selection, approval, one's use or pleasure, or the like; as, the butler *presented* the salver to his mistress; the producer *presented* a new play this week; "My last, least offering, I *present* thee now" (*Cowper*); "There is the fatigued Shakespeare...*presented* by Mr. Lytton Strachey; there is the Messianic Shakespeare...*presented* by Mr. Middleton Murry; and there is the ferocious Shakespeare, a furious Samson, *presented* by Mr. Wyndham Lewis" (*T. S. Eliot*). *Prefer*, as here considered (see also *CHOOSE*), is now archaic or obsolete in the sense of *proffer* or *present* except in some legal use (as, to *prefer* an indictment; to *prefer* a claim): it is, however, found often in the writings of authors between the late sixteenth and the mid-nineteenth centuries; as, "He spake, and to her hand *prefer*d the bowl" (*Pope*); "I don't *prefer* any claim to being the soul of Romance" (*Dickens*).

Ana. *Give, present, bestow, confer: *adduce, advance: propose, design, purpose, *intend.

Con. Accept, take, *receive: reject, refuse, *decline.

offhand. *Extemporaneous, extempore, extemporary, improvised, impromptu, unpremeditated.

Ana. Casual, desultory, *random: abrupt, hasty, sudden, *precipitate, impetuous: brusque, curt, blunt (see *BLUFF*).

Con. Studied, advised, considered, *deliberate.

office. 1 *Function, duty, province.

Ana. *Work, métier, business, calling: *task, job, chore, stint.

2 Post, situation, *position, place, job, berth, billet, capacity.

officer. *Policeman, constable, bailiff, catchpole, gendarme, bobby, peeler, copper, cop, bull.

officious. Meddlesome, intrusive, obtrusive, *impertinent, pragmatical.

Ana. Meddling, interfering, intermeddling, tampering (see *MEDDLER*): annoying, vexing, irking, bothering (see *ANNOY*): pushing, assertive, *aggressive.

offset. Countervail, balance, *compensate, counterbalance, counterpoise.

Ana. *Neutralize, negative, counteract: *nullify, negate: redeem, reclaim, save, *rescue.

oft. *Often, frequently, oftentimes.

often. *Often, frequently, oft, oftentimes* are ordinarily used with little or no distinction as meaning again and again in more or less close succession. But *often* stresses the number of times a thing occurs, without regard to the interval of recurrence; *frequently* usually stresses repetition, especially at short intervals; as, he came *often*; he called *frequently*; the disease is *often* fatal; "I *frequently* examined the colour of the snow" (*J. Tyndall*); you will *often* find this to be true; unless you write me more *frequently* I shall feel out of touch with you. *Oft* and *oftentimes* differ little from *often*; *oft*, however, is usually archaic or poetic (as, "Oft in the still night"—*T. Moore*) and *oftentimes* is occasionally preferred for metrical reasons, or as a more explicit term than *often* in its clear implication of numerous times (as, he will *oftentimes* regret that fit of anger).

oftentimes. *Often, frequently, oft.

oil, n. *Oil, fat, wax, grease* are comparable when they denote a substance of smooth, slippery consistency, typically combustible and insoluble in water, but soluble in gasoline (or other petroleum distillates) or, with some limitations, in ether or in alcohol. *Oil* designates any of a large class of such substances that are liquid, or at least easily liquefiable on warming, and that are used variously, as for food, for fuel, and in the preparation of medicines, perfumes, and lubricants. The term is applicable to all substances of this character, whether of animal origin, as cod-liver *oil*, neat's-foot *oil*; vegetable origin, as olive *oil*, wintergreen *oil*; mineral origin, as kerosene *oil*, shale *oil*. Although there are natural oils, such as petroleum and whale oil, many if not most oils are derived by extraction, expression, or distillation. **Fat** commonly designates a substance which, either as a semisolid or liquid, is found both in the animal and vegetable organism as part of its structure or as a constituent of one of its secretions, and is of considerable nutritive value when the organism or secretion is used as food. It is the chief element of adipose tissue and constitutes an important element of the milk of female animals: it is also found in certain seeds, such as nuts, and certain fruits, such as the olive. It is usually separable from the organism or secretion by processes which decompose the latter; thus, butter, an animal *fat*, is obtained by churning cream and leaving buttermilk as a residue; the *fat* of olive, olive oil, is obtained by expression. Chemically, a fat is distinguished from the other substances here differentiated: it is usually a mixture of glyceryl esters of certain acids, such as oleic and stearic acids, that upon saponification yield glycerol. **Wax** was originally applied only to a substance obtained from a secretion of bees and used by them in constructing the honeycomb; besides this specific sense, the term, however, is now also used in the far more comprehensive sense in which it is here considered. Like a fat, a wax is of animal or vegetable origin, but in contrast to the former it is typically a secretion and in its physical properties is less greasy, harder, and more brittle; thus, spermaceti is a *wax* which separates from the oil of a sperm whale; Chinese *wax* is a substance deposited on certain trees by a scale insect that is common in China and India; carnauba *wax* is obtained from a secretion on the leaves of a Brazilian palm tree, called the carnauba.

Also, in contrast to a fat, a wax is not a food, but is used chiefly in the making of candles, ointments, floor polishes, and the like; one of its physical properties is its readiness to blend with a fat or oil, as in most cerates. Chemically also, so called "true waxes" are distinguished from fats by being esters of higher monohydric alcohols. Certain oils, such as sperm oil, which belong to this group chemically, are called by some "liquid waxes." The term *wax* is also applied to a number of substances which resemble waxes physically, but are either chemically fats, such as bayberry wax, or are of mineral origin and chemically diverse, such as the mixture of hydrocarbons known as paraffin wax and the preparation of shellac and Venice turpentine known as sealing wax. *Grease* is a more popular and less clearly defined term than any of the preceding. The most common of its senses in current use, and the best-grounded historically, is that of animal fat which has been melted and become semisolid in cooling; in this use, the term is applicable to the drippings from meat in cooking (as, sausage *grease*), to melted or rendered adipose tissue (as, goose *grease*), and to the more refined rendered fats, such as lard. The term is also used of any substance composed of fat or fats, wax or waxes, mineral oils, soapy materials, and the like, which is in appearance and texture like animal grease and is used as an ointment, lubricant, or cleanser; as, axle *grease*; cup *grease* (a mixture of petroleum oil, lime or soda soap, etc., used in lubricating mechanisms); face *grease* (a colloquial designation of face cream).

oil, v. Oil, grease, lubricate, anoint, inunct, cream, pomade, pomatum agree in meaning to smear with an oily, fatty, or similar substance, but they vary greatly in their implications of the substance used and the purpose for which it is employed and in their idiomatic applications. One *oils* the parts of a machine or mechanism subject to friction, typically by drops or squirts of a liquid substance, usually but not necessarily a mineral oil. Also, one *oils* a fabric, such as cloth, silk, paper, etc., when one impregnates it with oil so as to make it waterproof. One *greases* a thing when one rubs on or in a thick fatty substance, often, but far from always, an animal fat or oil, for some purpose such as to increase speed by reducing friction (as, to *grease* axles), or as a medicinal application (as, to *grease* the chest with lard and turpentine), or as a preventive of cohesion (as, to *grease* a baking dish). One *lubricates* when one oils, or greases, or provides for the feeding of oil or grease or some similar substance to, contiguous surfaces in a machine or mechanism to make them slippery, thereby reducing friction, eliminating roughness, and preventing cohesion. *Lubricate* stresses the effect intended or produced; *oil* and *grease*, the substance used or the method of its application. One *anoints*, in strict use, only the body or a part of the body, when one smears it with, or rubs into it, an oily or fatty substance for some purpose such as a protection from the sun, an aid in massage, or the like. *Anoint*, however, is now especially employed in reference to ceremonial uses of oil (see ANOINT, 2). The word preferred in medicine when an oil or fatty application is rubbed in so as to be absorbed by the pores, is *inunct*, or its more common derivative noun *inunction*. In the application of oily or fatty cosmetics, especially those which are called creams, *cream* is the customary term. When one uses perfumed unguent (a pomade) or a greasy substance (a pomatum) to smooth and brighten the hair, or to nourish the scalp, *pomade* and *pomatum* are the specific, but not common, terms. "Their hair... was scrupulously *pomatumed* back from their foreheads with a candle" (*Irvings*).

oily. Unctuous, oleaginous, *fulsome, sleek, soapy.

Ana. Ingratiating, insinuating, insinuate, *disarming; hypocritical, pharisaical, sanctimonious (see under HYPOCRISY): bland, politic, diplomatic, smooth (see SUAVE).

old. 1 *Aged, elderly, superannuated.

Ana. *Weak, feeble, infirm, decrepit: *senile, anile, dotting, doddering.

Ant. Young.

2 Old, ancient, venerable, antique, antiquated, antediluvian, archaic, obsolete all denote having come into existence or use in the more or less distant past. That is *old* (opposed to *young, new*: see AGED) which has lived or existed long, or which has been long in use or has stood for a long time in a particular relation to something; that is *ancient* (opposed esp. to *modern*) which lived, existed, or happened long ago, or which has existed or come down from remote antiquity; as, *old* wine, books, friends; *old* as the hills. "O heavens, if you do love *old* men... if yourselves are *old*" (*Shak.*). "The papers were dull, the news was local and stale, and the war news was all *old*" (*Hemingway*). "From the *ancient* world those giants came" (*Milton*). "Some illustrious line so *ancient* that it has no beginning" (*Gibbon*). But *ancient* and *old* are often interchangeable; as, the *ancient* Romans; the *old* Romans. "It is an *ancient* mariner" (*Coleridge*). "Old, unhappy, far-off things, and battles long ago" (*Wordsworth*). **Venerable**, as here compared (cf. *august* under GRAND), suggests the hoariness and dignity of age. "An *old* man... [who] appeared the more *ancient* from his gray locks, that were truly *venerable*" (*Smollett*). "Venerable as Anglo-Saxon is, and worthy to be studied as the mother of our vernacular speech" (*Quiller-Couch*). **Antique** applies to that which has come down from ancient (esp. classical) times, or which is in some way related to them or, with regard to furniture and other household articles, to an old-fashioned type characteristic of an earlier period; as, an *antique* highboy or clock that belonged to one's great-grandmother. "Even a Leonardo regretted his failure to recover the *antique* symmetry, but he at least imitated the ancients vitally" (*Babbitt*). "Refreshing our minds with a savour of the *antique*, primeval world and the earliest hopes and victories of mankind" (*Binyon*). That is *antiquated* which has gone out of vogue or fashion, or that has been for some time discredited; the word often implies a slight touch of contempt. "For the purpose of... endowing it [an almost mushroom period] with an *antiquated* air, events can be as powerful as the passage of time" (*Lucas*). "Is it true that *antiquated* legal ideas prevent government from responding effectively to the demands which modern society makes upon it?" (*Frankfurter*). That is *antediluvian*, literally, which existed before the Noachian Flood; by extension, and always contemptuously, which is extremely antiquated. "The whole system of travelling accommodations was barbarous and *antediluvian*" (*De Quincey*). That is *archaic* which has the characteristics of an earlier, sometimes of a primitive, period; with regard to words, specifically, *archaic* implies not in use in ordinary modern language but retained in special context or for special uses, as in Biblical, ecclesiastical, and legal expressions and in poetry (e.g., *belike, certes*). "We visited Medinin, a town so *archaic* and unreal in its architecture that it was difficult to believe that it was actually inhabited by the human race" (*M. Hoffman*). That is *obsolete* which has gone out of use, or which contains what has gone out of use; as, "a... link between *obsolete* forms of life and those which generally prevail" (*Hardy*). "As [a writer's] language grows *obsolete*, his thoughts must grow obscure"

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

(Dryden). "A scientific textbook is *obsolete* in a decade or less" (Lowes).

Ana. *Secular, centuried, agelong, diuturnal, aeonian: primitive, primeval, pristine, primal (see PRIMARY).

Ant. New.

oleaginous. Oily, unctuous, *fulsome, sleek, soapy.

Ana. See those at OILY.

oligarchy. Oligarchy, aristocracy, plutocracy come into comparison as meaning government by, or a state governed by, the few. The terms are often applied to governments or states that are ostensibly monarchies or democracies, but are, in the opinion of the user, governed by a clique. **Oligarchy** is the most inclusive term referable to any government or state where the power is openly or virtually in the hands of a few men. "The present [1932] government [of Russia], political and economic... is a self-appointed *oligarchy*" (J. A. Hobson). **Aristocracy** etymologically suggests the rule of the best citizens, but it seldom retains this implication except when it is used in distinction from *oligarchy* and the latter connotes power seized or held for selfish or corrupt reasons. "An *Oligarchy* is the swerving, or the corruption of an *Aristocracy*" (Raleigh, d. 1618). "It ceased to be, in the Greek sense, an *aristocracy*; it became a faction, an *oligarchy*" (Thirlwall). Its commonest current implication is power vested in a privileged class, especially in a nobility that is regarded as superior by birth and breeding and that by owning or controlling much of the land exercises direct control over a large portion of the population; in this sense, Great Britain was until recent generations an *aristocracy*. **Plutocracy**, unlike the other terms, is usually, not occasionally, derogatory; as a rule, it implies concentration of power in the hands of the wealthy and in consequence, a withholding of power from those to whom it properly belongs, either the people or their representatives. "It is true that we still have in England the forms of *aristocracy*, but the spirit is that of *plutocracy*, which is quite a different thing" (B. Russell). "Democracy has to fight its way out from under *plutocracy*" (H. G. Wells).

omen, n. Augury, portent, *foretoken, presage, prognostic.

Ana. *Sign, mark, token, badge, note, symptom: divination, clairvoyance (see DISCERNMENT): foreboding, *apprehension, presentiment, misgiving.

ominous. Ominous, portentous, fateful, inauspicious, unpropitious come into comparison as basically meaning having a menacing or threatening character or quality. That is **ominous** which has or seems to have the character of an omen, especially of an omen forecasting evil: in current use, however, the term commonly suggests a frightening or alarming quality that bodes no good, but seldom implies inevitable disaster; as, "an *ominous* change had come over nature" (Hudson); "my ears were startled by the...uproar of yelling and shouting. It sounded *ominous*, but...I had to go on" (V. Heiser). That is **portentous** which has or seems to have the character of a portent, or some prodigy of nature which gives a forewarning of a calamity to come (as, a *portentous* eclipse; a *portentous* comet). In current use *portentous* far less often than *ominous* suggests a threatening character: it usually means little more than prodigious, monstrous, almost frighteningly marvelous, solemn, or the like; as, "His gravity was unusual, *portentous*, and immeasurable" (Dickens); "the assertion that children of six are 'mighty prophets, seers blessed,' would...have seemed to him [Plato] *portentous* nonsense" (Babbitt); "They all look *portentous*; but they have nothing to say" (Shaw). That is **fateful** which has or, more often, seems to have, the quality, character, or importance decreed for it by

fate or that suggests inevitable death or calamity; as, the *fateful* conference that brought on war; "The soldier's *fateful* steel" (J. Barlow). In present use, however, the term means little more than momentous, appallingly decisive, or the like; as, "A *fateful* evening doth descend upon us" (Coleridge); "Lying awake till morning, Delia lived over every detail of the *fateful* day when she had assumed the charge of Charlotte's child" (E. Wharton). That is **inauspicious** (see *auspicious* under FAVORABLE) which is or seems to be attended by signs that are distinctly unfavorable; as, an *inauspicious* horoscope. But *inauspicious* now usually means nothing more than unlucky, unfortunate, or unlikely to succeed; as, an *inauspicious* beginning of a great project; an *inauspicious* war. That is **unpropitious** (see *propitious* under FAVORABLE) which carries or seems to carry no sign of favoring one's ends or intentions; as, *unpropitious* omens. In its more common extended sense, the term means merely unfavorable, discouraging, or harmful; as, "sleep and exercise are *unpropitious* to learning" (Jowett); his attitude was *unpropitious*, and suggested a refusal.

Ana. *Sinister, baleful, malign, malefic: threatening, menacing (see THREATEN).

omit. *Neglect, disregard, ignore, overlook, slight, forget.

Ana. Cancel, delete, delc, efface, *erase: *exclude, eliminate.

Con. *Remember, recollect, recall: *tend, attend, mind, watch.

omnipotent. Omnipotent, almighty are not clearly distinguishable when applied to God and meaning all-powerful. Nevertheless in their extended and, sometimes, humorous applications a distinction between them is apparent. **Omnipotent** implies the power to effect any or all desired ends, as by irresistible power or by overriding all natural laws. "O powerful love! that, in some respects, makes a beast a man, in some other, a man a beast... O *omnipotent* Love!" (Shak.). "Was he not alone *omnipotent* On Earth...? tho' dead Does not his spirit... work for me and mine still the same ruin?" (Shelley). **Almighty**, on the other hand, usually stresses the power to command, above everything else, awe, worship, obedience, or the like. "My neglect Of his [Cupid's] *almighty* dreadful little might" (Shak.). "Insensible of truth's *almighty* charms" (Cowper). "Sir Aylmer Aylmer, that *almighty* man. The county God" (Tennyson). "The *almighty* dollar, that great object of universal devotion throughout our land" (Irving).

omnipresent. Omnipresent, ubiquitous, ubiquitary agree in meaning present or existent everywhere. In strict use, they carry this as a literal or absolute meaning, but in loose current English, they are often used hyperbolically. That is **omnipresent** which is present everywhere at the same time: in earlier and strict use, the term was applicable only to the Supreme Being (as, "*omnipresent* Deity"—Ken), but in more recent use, especially in a loose or weakened sense, it applies to that which is always present or existent, as in a class or a type wherever it may be found or in an area to which it belongs (as, "a capable agent makes himself *omnipresent*"—G. Eliot; "an *omnipresent* sense of social obligation"—C. W. Eliot). That is **ubiquitous** (or, now comparatively rare, **ubiquitary**) which is found everywhere and, often but not always, at the time or in the region given or implied; as, "electrons being so numerous and so *ubiquitous*" (Karl K. Darrow); "The big public services will have to be made practically *ubiquitous*" (Shaw). Either term, but especially *ubiquitous*, is applicable to a singular noun naming a type or an individual, often with the humorous implication that one cannot

escape him (or it) wherever one goes; as, the *ubiquitous* American tourist; that child is *ubiquitous*; "the sad, *ubiquitous* spinster, left behind... by the stampede of the young men westward" (*Van W. Brooks*). "God is not *ubiquitous*, but *omnipresent*, and never through all eternity can you and I be nearer to Him than we are at this moment" (*L. Abbott*).

omphalos. *Center, middle, midst, core, hub, focus, nucleus, heart.

on. 1 *At, in.

2 *At, in.

onerous. *Onerous, burdensome, oppressive, exacting* come into comparison when they mean imposing severe trouble, labor, or hardships. All of these terms are applicable to a state of life, its duties or obligations, or to conditions imposed upon a person by that life or by another person: *oppressive* and *exacting* are also applicable to persons or agents responsible for these difficulties. *Onerous* stresses laboriousness and heaviness but often also implies irksomeness or distastefulness; as, the *onerous* life of women among savage tribes; *onerous* tasks. "What were the conditions?" "Oh, they were not *onerous*: just to sit at the head of his table now and then" (*E. Wharton*). *Burdensome* usually implies mental as well as physical strain, but it often emphasizes the former at the expense of the latter; as, he was finding the life of a farmer unduly *burdensome*; a *burdensome* tax; the restrictions grew increasingly *burdensome*. *Oppressive* adds to *burdensome* the implication of extreme harshness or severity; it, therefore, usually connotes the unendurableness of that which is imposed or inflicted (sometimes by nature as well as by man) or cruelty or tyranny in the one responsible for the impositions or inflictions; as, *oppressive* taxes; *oppressive* legislation; *oppressive* heat; *oppressive* rulers. "There are more ways of coercing a man than by pointing a gun at his head. A pacifist society may be unjust and *oppressive*" (*Inge*). *Exacting*, like *oppressive*, implies extreme severity of demands, but otherwise it differs because it commonly suggests rigor, sternness, or extreme fastidiousness rather than tyranny in the one who demands, or the tremendous care or pains required of the one who satisfies these demands; as, an *exacting* employer; an *exacting* teacher; an *exacting* technique; an *exacting* task. "The *exacting* life of the sea has this advantage over the life of the earth, that its claims are simple and cannot be evaded" (*Conrad*).

Ana. *Heavy, weighty, ponderous, cumbrous, cumbersome, hefty: arduous, *hard, difficult.

onlooker. Looker-on, *spectator, observer, beholder, witness, eyewitness, bystander, kibitzer.

only, adj. & adv. *Only, alone* are often used interchangeably (though *alone* is not now found in the attributive position), but seldom if ever without a slight change in meaning or emphasis. *Only* is preferable when restriction to that which is specified or asserted is implied and the term is equivalent to *sole* or *solely*; as, I want *only* this book (that is, this book and no more); of all the family *only* John and Helen came (that is, the specified persons and no more). "To distinguish...that which is established because it is right, from that which is right *only* because it is established" (*Johnson*). *Alone* is preferable when the idea of the elimination of all other possibilities is expressed and the term is the equivalent of *exclusive* or, more often, *exclusively*; as, I want this book *alone* (that is, this book and not any of the others); of all the family John *alone* came (that is, John and none of the others). "Man shall not live by bread *alone*, but by every word that proceedeth out of the mouth of God" (*Matthew* iv. 4).

onomasticon. *Dictionary, lexicon, wordbook, glossary, gazetteer, synonymicon.

onset. *Attack, assault, onslaught.

Ana. Aggression, offensive, offense, *attack: storming, bombarding, assailing (see *ATTACK*, v.): *invasion, raid, incursion, irruption.

onslaught. *Attack, assault, onset.

Ana. See those at *ONSET*.

onward. *Onward, forward, forth* are here compared as meaning in the act of advancing or getting ahead, as in a movement, progression, series, sequence, or the like. They are frequently used with little or no distinction, but *onward* often suggests progress or advance in general toward a definite goal, end, place, or the like; as, "Onward, Christian soldiers, Marching as to war" (*Baring-Gould*); "onward-looking men" (*Stevenson*). *Forward* (opposed to *backward*) has more specific reference to movement or advance with reference to that which lies before rather than back in place (see *forward* under *BEFORE*), in time (as, from that time *forward* he took command), or in a succession, such as the incidents of a narrative or the steps of a process (as, "I am got *forward* too fast with my story"—*Franklin*). *Forth* is often interchangeable with *forward* without loss (as, from that day *forth*; go *forth*, brave soldier) but it is the preferred term in certain idiomatic phrases; thus, one says "backward and *forward*" or "back and *forth*," the latter phrase often implying swifter or more frequent changes than the former (as, back and *forth* her needle flew); one brings *forth* from, or as if from, a place of concealment (as, to bring *forth* a precious jewel), but one brings *forward* something or someone already in plain view (as, bring *forward* your chair).

opalescent, opaline. Iridescent, *prismatic.

opaque. Obscure, dusk, dusky, darkling, *dark, murky, gloomy.

Ana. *Turbid, muddy, roiled, roily: dull, dense, crass (see *STUPID*).

open, adj. 1 Exposed, subject, prone, susceptible, sensitive, *liable, incident.

Ant. Closed.

2 Plain, candid, *frank.

Ana. *Straightforward, aboveboard, forthright: *natural, simple, ingenious, naive, unsophisticated: *fair, equitable, impartial.

Ant. Close, close-mouthed, close-lipped: clandestine.

open-air. *Outdoor, plein-air, alfresco.

operate. *Act, behave, work, function, react.

operative, adj. *Active, dynamic, live.

Ana. *Effective, effectual, efficacious, efficient: *fertile, fecund, fruitful.

Ant. Abeyant.

operative, n. Mechanic, artisan, hand, workman, workingman, *worker, laborer, craftsman, roustabout.

opiate. *Anodyne, narcotic, nepenthe.

opinion. *Opinion, view, belief, conviction, persuasion, sentiment* come into comparison when they mean a more or less clearly formulated idea or judgment which one holds as true. An *opinion* is a more or less carefully thought-out conclusion concerning something that is or may be questioned. The word not only does not exclude the suggestion of consideration of all the evidence and of arguments on both sides, but it sometimes implies such consideration; as, Justice — presented the minority *opinion* at today's session of the Supreme Court; the critics differ in their *opinion* of the quality of the book; to seek an expert *opinion* on the authenticity of a painting; the attending physician said he would like the *opinion* of a consulting physician. However, the term

more consistently suggests (even in the preceding instances) a personal element in the judgment, the possibility of its being in error, and the strong probability that it will be disputed. "If you doubt it, ask Stryver, and he'll tell you so." "I prefer to form my own *opinion*, without the aid of his" (*Dickens*). "Books... are a public expression of a man's *opinions*, and consequently they are submitted to the world for criticism" (*A. C. Benson*). A *view* is an opinion more or less colored by the feeling, sentiment, or bias of the individual; as, he was fond of airing his *views* in the public press; this poet's depressing *view* of life; each member was asked to state his *views* on the proposed change in the constitution. A *belief* differs from an opinion or view in that it is not necessarily formulated by the individual who holds it, but may have been proposed to him for acceptance (as in the form of a doctrine, a dogma, a proposition, or an authoritative opinion). The emphasis in *belief* is placed on intellectual assent or assurance of truth. "He [Augustus] possessed from the start... certain guiding ideas derived from Julius [Caesar], a passion for order, a realism about facts, and a *belief* that he possessed a capacity for reconstruction" (*Buchan*). "It might be better not to call this pantheistic creed Naturalism, reserving the name for the *belief* that the whole system of nature is calculable in terms of mathematics and mechanics" (*Inge*). "I have not adopted my faith in order to defend my *views* of conduct, but have modified my *views* of conduct to conform with what seem to me the implications of my *beliefs*" (*T. S. Eliot*). A *conviction* is a belief which one holds firmly and unshakably because one is undisturbed by doubt of its truth. "If any one had asked him the reason of this *conviction* he could not have told them; but *convictions* do not imply reasons" (*Deland*). "The teacher should learn not to take sides [in controversial questions], even if he or she has strong *convictions*" (*B. Russell*). A *persuasion* is usually at once an opinion and a belief. It often implies that one's assurance of its truth is induced by one's feelings or wishes, rather than by argument or evidence. "It was the avowed opinion and *persuasion* of Callimachus... that Homer was very imperfectly understood even in his day" (*Cowper*). "Drugs are not much in cases of this sort. Changel That's what's wanted.... It's no use my talking, I know," added the Doctor. "On the contrary," said Sir Austin, "I am quite of your *persuasion*" (*Meredith*). *Sentiment*, as here compared (see also *FEELING*, 2; *SENTIMENT*, 3), is now rare or literary in this sense except in a few idiomatic phrases (as, those are my *sentiments*), but it was very common between the late seventeenth and the early nineteenth centuries. The term applies to a more or less settled opinion; often, but not necessarily, with reference to something which involves one's feelings or which is formulated so as to suggest the stimulus of emotion; as, "His 'Solomon' had many noble *sentiments* elegantly expressed" (*Johnson*); "Had I the command of millions, were I mistress of the whole world, your brother would be my only choice." This charming *sentiment*... gave Catherine a most pleasing remembrance of all the heroines of her acquaintance" (*Austen*); "There is no expression in the constitution, no *sentiment* delivered by its contemporaneous expounders, which would justify us in making it [a certain exception]" (*Ch. Just. Marshall*). *Ana.* Thought, notion, impression, *idea, concept, conception: inference, deduction, conclusion, judgment (see under *INFER*): deciding or decision, determining or determination, settling or settlement (see corresponding verbs at *DECIDE*).

opinionated. *Opinionated, opinionative, self-opinion-*

ated agree in meaning having or holding a decided opinion or opinions. *Opinionated* is now the far more common term: it usually implies either great assurance of the rightness of one's opinions or great obstinacy in their maintenance; as, "[A] painter... bold and *opinionated* enough to dare and to dictate" (*Walpole*). "He is not overbearing, or bigoted, or fanatical—that would be putting it too strongly.... He seems to put an excessive value on his own opinions. Yes, I have the word—*opinionated*" (*S. M. Crothers*). *Opinionative* is now comparatively rare, but it is still sometimes preferred to *opinionated* when one wishes to suggest the speculative or doctrinaire character (as opposed to the practical value) of a person's opinions, at the same time suggesting dogmatism in their maintenance; as, "Too young to teach, and too *opinionative* to learn" (*Johnson*); "The common female blue [i.e., bluestocking] is intolerable, *opinionative*, and *opinionated*" (*Edgeworth*). *Self-opinionated* carries a stronger implication of conceitedness or of pride in one's opinions than either of these terms but, like *opinionative*, it usually suggests dogmatism in their maintenance; as, he is far too *self-opinionated* to yield to argument.

Ana. *Sure, certain, positive, cocksure: *confident, assured, sanguine, sure.

opinionative. *Opinionated, self-opinionated.

Ana. Doctrinaire, dogmatic, *dictatorial: *sure, certain, positive, cocksure.

opponent. *Opponent, antagonist, adversary* agree in denoting one who expresses or manifests opposition. Unlike *enemy* (in its strict sense), they do not necessarily imply personal animosity or hostility. An *opponent* is one who is on the opposite side in a contest (as an argument, disputation, or election), or in a conflict of opinion; *antagonist* implies sharper opposition, esp. in a struggle or combat for supremacy or control. "The *opponents* and proponents of the bill" (*N. Y. Times*). "Where you find your *antagonist* beginning to grow warm, put an end to the dispute by some genteel badinage" (*Chesterfield*). *Adversary* ranges in connotation from the idea of mere opposition to that of active hostility. "Do as *adversaries* do in law, Strive mightily, but eat and drink as friends" (*Shak.*). "Your *adversary* the devil, as a roaring lion, walketh about, seeking whom he may devour" (1 Peter v. 8).

Ana. *Enemy, foe: rival, competitor, emulator (see corresponding verbs at *RIVAL*).

opportune. *Seasonable, timely, well-timed, pat.

Ana. Happy, felicitous, appropriate, fitting (see *FIT, adj.*): propitious, auspicious, *favorable: ready, prompt, *quick, apt.

Ant. Inopportune.

opportunity. *Opportunity, occasion, chance, break, time, tide, hint* come into comparison when they mean a state of affairs or a juncture of circumstances favorable to some end. *Opportunity* is perhaps the most common of these terms in both colloquial and literary English: it applies to a juncture which provides an opening for doing something, especially something in line with one's inclinations, ambitions, purposes, or desires; as, the suspect had both motive and *opportunity* for the murder; "To keep in the rear of *opportunity* in matters of indulgence is as valuable a habit as to keep abreast of *opportunity* in matters of enterprise" (*Hardy*); "on the whole an infant's desire to learn is so strong that parents need only provide *opportunity*" (*B. Russell*). *Occasion*, as here considered (see also *CAUSE*, 1), carries the basic denotation characteristic of its leading senses—a definite moment or juncture, but it applies only to a moment that provides an opportunity or, more often in current

use, that calls for or prompts action of a definite kind or nature. In its earliest use, *occasion* meant the opportune moment or the opportunity provided by a moment: an occasion therefore was visualized, as an opportunity is now often visualized, as something that comes and goes almost before its presence is realized. This use continues in certain idiomatic phrases; as, he took the *occasion* to satisfy his desire for revenge; "We can escape even now, So we take fleet *occasion* by the hair" (*Shelley*). In current use, *occasion* suggests more strongly than *opportunity* a juncture that provokes or evokes action; as, "With *occasion* she might have been a Charlotte Corday" (*Meredith*); "With great things charged he shall not hold Aloof till great *occasion* rise" (*Kipling*); "So long as a child is with adults, it has no *occasion* for the exercise of a number of...virtues...required by the strong in dealing with the weak" (*B. Russell*). *Chance* applies chiefly to an opportunity that comes seemingly by luck or accident; as, they had no *chance* to escape; he has long hoped for a *chance* of promotion. Sometimes, the word means little more than a fair or a normal opportunity, especially in negative expressions; as, the boy never had a *chance* to make anything of himself. *Break* is slang (chiefly in the United States) for a chance to make good (or to fail), to make profits (or to lose money), to better oneself (or to lower oneself), or the like: ordinarily, the term is qualified by an adjective indicating the kind of chance and suggesting its outcome (as, he has had a bad *break*; that investment was a lucky *break* for him; he has not had a fair *break* in years) but when it is unqualified, the term usually denotes a good, or lucky, break (as, he is still hoping for a *break*; one says that a team "gets the *breaks*" but a good team usually makes its own *breaks*). *Time* and *tide* are archaic or poetic only when used as a phrase denoting a juncture that is well-timed or opportune for the execution of one's end or purpose: *time* especially, and *tide* somewhat, are still used singly in this sense; as, *time* and *tide* wait for no man; "There is a *tide* in the affairs of men, Which, taken at the flood, leads on to fortune" (*Shak.*); this is the *time* to buy stocks: even tomorrow may be too late. *Hint* is now obsolete in the sense of opportunity or occasion, but it was once common, especially in the 17th and 18th centuries; as, "It was my *hint* to speak" (*Shak.*); "To watch the *hints* which conversation offers for the display of their particular attainments" (*Johnson*).

Ana. *Juncture, pass, contingency, emergency: posture, situation, condition, *state.

oppose. *Oppose, combat, resist, withstand, antagonize* are here compared only as transitive verbs and as meaning to set oneself against someone or something. *Oppose* is the most comprehensive of these words; it may imply at one extreme little more than objection and at the other intense hostility and violent warfare. It commonly implies the intent to thwart or frustrate the will of another or to destroy that which actively interferes with one's own rights or security. "After that they did not *oppose* his plan of leaving the house" (*Deland*). "At the town meeting there is always the chronic objector who *opposes* every popular measure" (*S. M. Crothers*). "Or to take arms against a sea of troubles, And by *opposing* end them?" (*Shak.*). *Combat* stresses a struggle for supremacy and an actual conflict with that which one opposes. In modern English the struggle is often mental (as, to *combat* temptation, one's fears, a weakness) and, when external, the conflict is usually with intangibles, such as ideas, forces, or evils, which one would figuratively put to rout. "He would rather *combat* the superstitions of a whole Indian pueblo than

the vanity of one white woman" (*Cather*). "How to *combat* diphtheria or appendicitis or tuberculosis" (*C. W. Eliot*). "Certain fallacies, which it is the duty of the better informed members of society to meet and *combat*" (*Grandgent*). *Resist* and *withstand* both presuppose the initiative in opposition on the other side, as by attack, encroachment, or the use of compulsion. *Resist* merely implies acceptance of the challenge and the exercise of counter force; as, it is the duty of every patriot to *resist* invasion. "To attempt to impose it on us...is an act of tyranny, and to be *resisted*" (*Arnold*). "We must firmly *resist* those who wish to make education purely scientific" (*Inge*). *Withstand* often adds to *resist* the suggestion of a successful outcome; it, therefore, usually implies special qualities in the person or group, such as courage, persistence, or superior training; as, only seasoned troops could *withstand* such an attack. "They had been married that afternoon...Jane having *withstood* the pressure of her parents" (*R. Macaulay*). When used of things that are proof against the onslaught of external forces, such as germs, the elements, military attacks, and the like, there is little difference between the two words, *withstand* being slightly more emphatic; as, few trees could *withstand* (or *resist*) the fury of the hurricane; to *resist* (or *withstand*) infection. Both words also are often used without any connotation of threatened danger from the other side but with a strong suggestion of its power to compel by attracting, convincing, or the like; in these cases either the verb or the subject contains a negative or a near negative; as, one cannot (or, few persons can) *withstand* her charm. "Nobody can *resist* the Bay of Naples, or if he can, then all the simple and sensuous delights of this world must turn to bitterness and ashes in his mouth" (*C. Mackenzie*). *Antagonize* implies that one side (usually one's own) has initiated the opposition and has, therefore, invited resistance or hostility. "The Bishop replied that the time was not yet; for the present it was inexpedient to *antagonize* these people" (*Cather*). In current use, the word often means to incite (sometimes unintentionally) ill will or resentment; as, he is unfortunate because his manner *antagonizes* many persons.

Ana. *Contend, cope, fight, battle, war: *attack, assail, assault, storm, bombard: *defend, protect, shield, guard, safeguard.

opposite, adj. *Opposite, contradictory, contrary, antithetical (or antithetic), antipodal (or antipodean), antonymous* are comparable chiefly as antonyms, as meaning so far apart as to be or to seem irreconcilable with each other. The same differences in applications and implications are found in their corresponding nouns, *opposite, contradictory, contrary, antithesis, antipodes (or antipode), antonym*, when they mean one of two things which are opposite, contradictory, etc. *Opposite*, as here narrowly considered, is the inclusive term; it may be used interchangeably with any of the others, though few of the latter are interchangeable in precise use. *Opposite* may be used to describe the relation of either of two ideas, terms, statements, qualities, forces, and the like, to the other when they are set against each other so as to bring out sharply the contrast, conflict, or antagonism between them; as, *opposite* views; attraction and repulsion are *opposite* forces. "Democratism, the tendency to level down all superiorities in the name of equality and good fellowship...is the *opposite* fault to the aristocratism...the assumption that the lower classes must remain excluded from intellectual and even from moral excellence" (*Inge*). *Contradictory*, though often used loosely as an equivalent of *opposite*, retains in precise use its fundamental implication of

denial, and therefore, especially when it is applied to terms, propositions, and principles, further implies that if one of the two opposites be true, the other must be false, or if one be false, the other must be true. For any words, propositions, or principles that are *contradictory* in this strict sense are mutually exclusive and, therefore, admit no possibilities between; thus, "John is English" and "John is not English" are *contradictory* statements, one of which must be false if the other is true; "alive" and "dead," are *contradictory* terms because they cannot both be truly applied to the same thing, for if the application is admissible one of them must be true and the other false (as, the tree is either alive or dead). *Contrary*, as here compared (see also *CONTRARY*, 2), is also used both loosely and strictly. As applied to intentions, motives, opinions, and the like, it usually implies extreme divergence with no basis for agreement; as, to take a *contrary* view of the situation; he maintained that the *contrary* was true. In strict use, especially as applied to terms, propositions, and the like, *contrary* implies diametrical opposition, or the greatest conceivable or possible difference between the things opposed. Contraries are "poles apart"; unlike contradictories, both may be false, for they represent extremes and do not mutually exclude every other possibility; thus, "destitute" and "opulent" are *contrary* terms as applicable to a person's circumstances, but they may be inapplicable in a vast number of particular cases for they describe only the extremes; thus, "John is parsimonious" and "John is prodigal" are *contrary* statements, but John in truth may be neither parsimonious nor prodigal, but merely close, or thrifty, or free, or liberal, in the expenditure of money. *Antithetical* and especially *antithesis* (see also *COMPARISON*) imply an intent to set the thing under consideration against its opposite, usually its diametrical opposite, in order to emphasize its significance or to reveal or define sharply its true nature. Both words are applicable to persons and things regarded objectively as well as to ideas, qualities, terms, and the like. "I could describe... my own particular *antithesis* among bookworms; and no doubt he could, and probably will, describe me" (*J. C. Powys*). "That mystic faith in unseen powers which is the *antithesis* of materialism" (*R. Macaulay*). "The essential interests of men and women are eternally *antithetical*" (*Mencken*). Although *antipodal* and *antipodes* (the latter in this sense is now construed as a singular and preferred to *antipode*) also imply diametrical opposition, they do not suggest an expository purpose but rather an attempt to emphasize the unlikeness and the remoteness from each other of the things contrasted. So strong are these implications that, at times, the things contrasted are only figuratively, not generically, opposites, and the contrast constitutes, in a sense, an inverse simile. "The same insurgent journal [may] print poems as *antipodal* as a slaughter house and a hand-painted fan" (*Loues*). "*Antipodes* of each other in temper and endowment" (*J. R. Lowell*). *Antonymous* and *antonym* are applicable only to a word or term which is so opposed to another in meaning that it, in effect, negates or nullifies every implication of it. *Antonyms* (or *antonymous words*) may be contradictory or contrary terms, as defined, or they may be terms which negate other terms by implying the undoing or reversing of what is denoted by them; thus, "retain" is the contradictory *antonym* of "lose," but "recover" is the latter word's reverse *antonym*. *Antonym* is sometimes applied to terms that are opposite only in the sense of being relative or complementary (as, *husband* and *wife*, *stimulus* and *response*, *question* and *answer*), but this application is not generally regarded as defensible.

Ana. Reverse, *converse: antagonistic, *adverse, counter, counteractive.

Con. Reconciling, conforming, adapting, adjusting (see *ADAPT*): consistent, compatible, congruous, congenial, *consonant.

opposite, *n.* Contradictory, contrary, antithesis, antipodes, antonym. See under *OPPOSITE*, *adj.*

oppress, 1 *Depress, weigh (down, on, or upon).

Ana. *Abuse, mistreat, maltreat, ill-treat, outrage: *worry, annoy, harass, harry.

2 *Wrong, persecute, aggrieve.

Ana. *Afflict, torment, torture: overcome, subdue, subjugate, reduce, overthrow (see *CONQUER*).

oppressive. *Onerous, burdensome, exacting.

Ana. Extorting or extortionate, extracting (see corresponding verbs at *EDUCE*): compelling or compulsory, coercing or coercion, constraining, obliging or obligatory (see corresponding verbs at *FORCE*): despotic, tyrannical, *absolute, arbitrary.

Con. Humane, humanitarian (see *CHARITABLE*): compassionate, *tender.

opprobrious. *Abusive, vituperative, contumelious, scurrilous, scurrile, scurril.

Ana. Reviling, vituperating, railing, berating (see *SCOLD*): despicable, *malicious, malevolent, malign, malignant: *execrable, damnable, accursed.

opprobrium. Obloquy, odium, ignominy, infamy, shame, *disgrace, dishonor, disrepute, scandal.

Ana. *Abuse, invective, vituperation, obloquy, scurrility: censure, denunciation, condemnation, reprehension (see corresponding verbs at *CRITICIZE*).

Con. Prestige, authority, credit, *influence.

opt, *v.* *Choose, select, elect, pick, cull, handpick, prefer, single out.

Ana. Take, accept, *receive: *adopt, embrace, espouse.

optimistic. *Hopeful, roseate, rose-colored.

Ana. *Confident, sanguine, assured: cheerful, light-hearted, joyous, *glad.

Ant. Pessimistic. — *Con.* *Cynical, misanthropic.

option. *Choice, alternative, preference, selection, election.

Ana. *Right, prerogative, privilege.

opulent, 1 Affluent, wealthy, *rich.

Ana. Lavish, *profuse, prodigal: *showy, pretentious, ostentatious, pompous.

Ant. Destitute; indigent.

2 Sumptuous, *luxurious.

Ana. Luxuriant, lush, exuberant (see *PROFUSE*): *splendid, resplendent, gorgeous, superb.

opus. *Work, product, production, artifact.

oracular. Doctrinaire, dogmatic, authoritative, *dictatorial, authoritarian, magisterial, magistral.

Ana. *Opinionated, opinionative, self-opinionated: positive, certain, *sure, cocksure.

oral, 1 *Vocal, articulate.

Ant. Written.

2 **Oral**, **verbal** are often confused in use. **Oral** (see also *VOCAL*, 1) always implies utterance and speech: it is correctly applied to that which is delivered, communicated, transacted, carried on, or the like, directly from one to another by word of mouth; as, an *oral* (as opposed to a written) confession, tradition, command; to receive *oral* instructions; *oral* teaching of the deaf (as distinguished from teaching by signs). **Verbal** stresses the use of words: in correct use, it applies indifferently to that which is written or spoken, for it carries no implication of the method of communication; as, *verbal* (i.e., word for word) inspiration of the Bible; *verbal* difficulties caused by ambiguous or equivocal language; "He often

loses himself in little trifling distinctions and *verbal* niceties" (Gray). The use of *verbal* as a substitute for *oral* does not meet with approval; as, to receive an *oral* (not a *verbal*) invitation to the dinner; an *oral* (not a *verbal*) contract; one gives *oral* (not *verbal*) testimony; one asks for *oral* (not *verbal*) voting.

oration. *Speech, address, harangue, allocution, lecture, prelection, talk, sermon, homily.

oratory. Eloquence, *elocution.

orb. *Sphere, globe, ball.

orbicular, orbiculate. *Round, spherical, globular, orbicular, annular, circular, discoid.

orbit. *Range, reach, scope, compass, sweep, gamut, radius, ken, purview, horizon.

order, n. 1 *Association, society, club.

2 *Command, injunction, bidding, behest, mandate, dictate.

Ana. Instruction, direction, charging or charge (see corresponding verbs at COMMAND).

order, v. 1 **Order, arrange, marshal, organize, systematize, methodize** agree in meaning to put (a number of persons or things) in their proper places especially with relation to each other, or to bring about an orderly disposition of the individuals, units, or elements that comprise (a thing). **Order** is now felt to be archaic when the idea of putting in a definite order is to be expressed; it usually implies a straightening out, and may connote either the elimination of friction or confusion, often with resulting peace or harmony, or the imposition of a fixed and rigid discipline; as, to *order* one's affairs in expectation of death; an *ordered* industry. "It was a home strictly *ordered*, and he would have to conform to its *ordering*" (Arch. Marshall). "The Greek states...were not well *ordered*; on the contrary, they were always on the verge, or in the act, of civil war" (G. L. Dickinson). **Arrange** is now more often used than *order* where the idea of setting in order, that is, in proper sequence, relationship, or adjustment, is uppermost. The word often implies a notion of what is orderly, fit, suitable, or right, and a placing of things in accordance with this notion; as, to *arrange* the furniture in a room; to *arrange* fruit in a dish; to *arrange* the books on a shelf; to *arrange* one's hair in the newest fashion; "these words are *arranged* without art" (A. Huxley). Oftentimes, the term implies a determination of the way in which the things are disposed by an end in view and then frequently suggests contrivance, manipulation, maneuvering, or the like; as, we shall *arrange* matters so that you will not be inconvenienced; to *arrange* the details of a conference between the leaders of the factions. "It is necessary for the physicist to *arrange* the experimental conditions so as to evoke phenomena in which the general laws...can be discerned" (Karl K. Darrow). **Marshal**, in precise use, usually connotes generalship, for it always implies assemblage and arrangement either for ease or advantage in management, as under stress, or for effectiveness in display or exhibition; as, to *marshal* troops for battle; to *marshal* one's thoughts before making a public address. "Marshaled like soldiers in gay company, The tulips stand arrayed" (Amy Lowell). "Thanks to Mr. Dawson's erudition and his gift of *marshalling* facts, we begin to have a notion of what it is all about" (A. Huxley). **Organize** implies an arrangement in which all persons or things are so related to each other that they work as a unit, each individual having his (or its) proper function, duty, or the like; as, to *organize* a nation for war; to *organize* a new branch of the military service; "Florence Nightingale *organized* the hospital work of the Crimean War" (Shaw); to *organize* the supporters of a candidate

for the presidency; a colony of ants always reveals *organization*. **Systematize** implies arrangement according to a definite, and therefore predetermined, scheme; thus, one *systematizes* a collection of coins when one arranges them according to some plan of classification; one *systematizes* one's daily work when one reduces it to routine order. **Methodize** differs from *systematize* in suggesting the imposition of orderly procedure rather than of a fixed scheme; thus, one can *methodize* one's work without giving it the character of routine. "Those rules of old discovered, not devis'd, Are Nature still, but Nature *methodis'd*" (Pope). "That art of reasoning...which *methodizes* and facilitates our discourse" (J. H. Short-house).

Ana. *Adjust, regulate; *line, align, range, array.

2 *Command, bid, enjoin, direct, instruct, charge.

Ana. Prohibit, *forbid, interdict, inhibit, ban.

Con. Permit, allow, *let; license, *authorize, commission.

orderly, adj. **Orderly, methodical (or methodic), systematic (or systematical), regular** come into comparison as meaning following closely a set arrangement, design, or pattern. **Orderly** implies observance of due sequence, or proper arrangement, as in the harmonious or careful disposition of persons or things (as, the guests passed in *orderly* lines into the room where the receiving party stood; an *orderly* placing of furniture), as in obedience to the rules of conduct or behavior that guide disciplined persons (as, an *orderly* group of children; an *orderly* assembly of citizens; an *orderly* election), as in keeping a place free from litter or confusion (as, his study is always *orderly*; an *orderly* housekeeper), or, in a less specific sense, as in a scheme, system, or the like, when all details stand in their proper relations, each playing its due part without interfering with that of any of the others (as, "a process calculated to reduce the *orderly* life of our complicated societies to chaos"—A. Huxley; "the difference [between classicism and romanticism] seems to me rather the difference between the complete and the fragmentary, the adult and the immature, the *orderly* and the chaotic"—T. S. Eliot). **Methodical**, or the now infrequent **methodic**, implies the observance of an order that has been carefully worked out so that the steps to be followed are exactly known or the pattern that is accepted seems logical or inevitable under the circumstances; as, to make a *methodical* search for evidence; to give *methodical* instructions to a new servant; to begin a *methodical* study of the Bible; the *methodic* school of physicians; a *methodical* performance of one's daily duties. **Methodical** rather than *methodic* is referable to persons who use or follow method in the performance of their duties or tasks or who follow the same order or schedule in their daily occupations; as, a *methodical* housekeeper; a *methodical* teacher; to lead a *methodical* life. **Systematic**, or less often **systematical**, comes close to *methodical* in ordinary use: *systematic*, however, is preferred to *methodical* when the emphasis is not upon the order followed but upon the integrity and completeness of the finished thing; thus, *methodical* training suggests training that follows its course according to a predefined sequence or schedule; *systematic* training usually implies training long enough and intensive enough to gain the end or ends in view; an astronomer makes a *systematic* (better than *methodical*) study of the celestial sphere. "A *systematic* course of five lessons a week, extending through at least the three years between fourteen and seventeen years of age" (C. W. Eliot). *Systematic*, but not *systematical*, may also be applied to nouns (often, but not necessarily, nouns of action) with the implications of repetition and of a purpose or intention that is reprehensible; as, "Pope

...was a *systematic* appropriator...of other men's thoughts" (L. Stephen); to make a *systematic* attack on the doctrines of a church; "trained by success to a sort of *systematic* selfishness" (Cather). **Regular** (as here compared: see also **REGULAR**, 1) implies a steadiness or uniformity as in following a schedule (as, *regular* habits; *regular* meals; *regular* treatments) or in pursuing a course marked by occurrence or recurrence at fixed or stated intervals (as, a *regular* pulse; as *regular* as the ebb and flow of the tides).

Ana. Tidy, *neat, trim, spick-and-span: formal, conventional, ceremonious (see **CEREMONIAL**): peaceable, *pacific, peaceful.

Ant. Disorderly: chaotic.

ordinance. Canon, precept, *law, rule, regulation, statute.

ordinary, adj. *Common, familiar, popular, vulgar.

Ana. *Usual, customary, habitual, wonted, accustomed.

Ant. Extraordinary. — **Con.** *Abnormal, atypic, aberrant: *exceptional: *irregular, unnatural, anomalous.

ordinary, n. *Bishop, archbishop, metropolitan, primate.

Ant. Agent (sense 2—in *ecclesiastical* use).

ordnance. *Armament, munitions, arms, artillery, ammunition.

organ. 1 Medium, vehicle, channel, *means, instrument, instrumentality, agent, agency.

2 *Journal, periodical, newspaper, magazine, review.

organism. *System, scheme, economy, network, complex.

organize. 1 Systematize, methodize, *order, arrange, marshal.

Ana. Design, project, plan, scheme (see under **PLAN**, n.): form, fashion, shape, *make.

Ant. Disorganize.

2 Institute, *found, establish.

Ana. *Begin, commence, start, initiate, inaugurate: *adjust, regulate.

oriel. *Window, casement, dormer.

orifice. *Aperture, interstice.

origin. **Origin, source, inception, root, provenance, provenience, prime mover** come into comparison as denoting the point, as represented by an act, an event, a person, a place, a condition, or the like, at which something (such as a process, a growth, a development, a custom, a habit, or an institution) begins its course or its existence. **Origin** applies chiefly to the point at which the thing under consideration has its rise, or to the person or thing from which it is ultimately derived: it often applies specifically to the causes in operation before the thing itself is finally brought into being; as, Charles Darwin's book "On the *Origin* of Species by Means of Natural Selection"; the *origin* of the custom of giving presents at Christmas; the *origin* of Christianity; the *origin* of a phrase. Often, when used in reference to persons, it means little more than ancestry or parentage: it is then used either in the singular or (now more often) the plural; as, "his father was of no great *origin*" (Belloc); "[Ramsay MacDonald's] humble *origins* were known" (H. Ellis). **Source** (etymologically, a lifting or surging up), in the earliest of its living senses, applies to the point at which waters from a spring or fountain emerge to form the beginning point of a stream or river; as, the *source* of the Hudson River. In extended use, *source* more often than *origin* applies to that which serves as the ultimate beginning of a thing, especially an immaterial or intangible thing: however, since the term is sometimes qualified by words such as *immediate*,

secondary, etc., which weaken or destroy this implication, it is often in this sense modified by *ultimate, fundamental, primary*, or the like; as, "an ever-present energy, which is the *source* of all cosmical movement" (Inge); "the power of concentrated attention as the fundamental *source* of the prodigious productiveness of great workers" (C. W. Eliot); "Theoretically the mob is the repository of all political wisdom and virtue; actually it is the ultimate *source* of all political power" (Mencken). *Source* is also applied to the person, book, manuscript, or the like, from which one derives information: in this sense, a *primary source* is a person who has firsthand knowledge, or a work that was written at the time under discussion, especially by one who had firsthand knowledge, or the like; a *secondary source* is a person who has learned the facts from others, or a work which is based upon information gathered from others; as, graduate students in history are discouraged from using *secondary sources*. "When it [news] comes from one of the great news-collecting agencies like the Associated Press, the *source* generally is indicated" (Justice Holmes). **Inception** is often preferred to *origin* when the reference is to the actual beginning of an undertaking, a project, an institution, or the like: the term carries a weaker connotation of underlying causes than *origin*, yet does not, as *source* often does, carry any suggestion that the thing so called is the ultimate origin; as, "They joined the League of Nations Union... Stanley did so, at its *inception*, and became, in fact, a speaker on platforms in the cause" (R. Macaulay); "The subject may and does change between the *inception* of the work and its completion" (S. Alexander). **Root** is often the preferred term when the actual origin of a thing goes back to something very deep and fundamental, and the thing itself is only an outward manifestation of its influence. **Root**, therefore, more often even than *source*, applies to what is regarded as the first, or final, cause of a thing; as, "the love of money is the *root* of all evil" (1 Timothy vi. 10); "Faith, the *root* whence only can arise The graces of a life that wins the skies" (Cowper). **Provenance and provenience** (the form preferred by some writers) are chiefly used by scholars, especially in the fields of history, anthropology, philology, and the like, for the place (sometimes, the race or people) from which a thing is derived, or where (or by whom or among whom) it originated, was invented, was constructed, or the like; as, not to know the *provenance* (or *provenience*) of a legend or custom; antiquities of doubtful *provenance*. "He would have some difficulty in guessing its *provenance*, and naming the race from which it was brought" (A. Lang). **Prime mover** has been employed in philosophy, theology, poetry, but is now chiefly used in mechanics as a designation of an ultimate and original source of motion or motive power. In early use it was applied especially to God, as the source of all motion: this application still occurs, but in more modern use, when applied to a personal agent, it usually refers to an inciter or instigator of an action or course; as, "the *prime mover* in the whole matter was Hugh the Great" (Freeman). In mechanics, the term applies to the natural or mechanical power which sets a thing moving or in motion: it has been used in reference to wind (as in driving a sailing ship), steam (as in driving a steamship), a waterwheel, a windmill, a steam engine, and the like.

Ana. Beginning, commencement, initiation, starting (see corresponding verbs at **BEGIN**): derivation, origination, rising or rise (see corresponding verbs at **SPRING**): *ancestry, lineage.

original. *New, fresh, novel, new-fashioned, newfangled, neoteric, modern, modernistic.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

Ant. Dependent: banal; trite.

originate. Rise, derive, arise, *spring, flow, issue, emanate, proceed, stem.

Ana. *Begin, commence, start.

ornament. *Adorn, decorate, embellish, beautify, deck, bedeck, garnish.

Ana. Enhance, heighten, *intensify: prink, primp, prank, doll up, perk up, *preen, prune.

ornate. *Ornate, rococo, baroque, flamboyant, florid* come into comparison when they mean elaborately and, often, pretentiously decorated or designed. *Ornate* is applicable to anything heavily adorned or ornamented or conspicuously embellished; as, an *ornate* style of architecture; "in the *fiacre* were Gerald and a woman. Gerald... was talking eagerly to his *ornate* companion" (*Benett*). "[Wendell Phillips] introduced the direct and colloquial manner upon the American public platform, as distinguished from the highly elaborated and often *ornate* style which had been established by Edward Everett" (*T. W. Higginson*). *Rococo* was first applied to a certain style of architecture originating in France in the eighteenth century and carried to an extreme in Italy and Germany, and characterized chiefly by the extravagant and often fantastic use of curves. The term therefore implies the ornateness of design characteristic of this style of decoration, especially as evident in architectural details, in furniture, and in mirror and picture frames. It is now used to describe any style that seems to the writer tastelessly or meaninglessly ornate or over-adorned, especially by scrolls and the like; as, "That *rococo* seventeenth-century French imitation of the true Renaissance" (*Pater*). *Baroque* was first applied to a style of art and architecture which prevailed from the time of Michelangelo (d. 1564) to nearly the end of the eighteenth century and which emphasized energy in conception, amplitude in design, the use of dynamic contrasts, extremely high relief, and the employment of curved and often contorted forms. "I entered this *Baroque* interior, with its twisted columns and volutes and high-piled, hideous tombs, adorned with skeletons and allegorical figures and angels blowing trumpets" (*L. P. Smith*). In its current extended sense, *baroque* suggests more grotesqueness and extravagance and less fancifulness than *rococo*, although it also implies tasteless ornamentation. "The decorative art of the French does indeed oftener than not lend itself to the *rococo*, though *baroque* it has rarely been" (*Brownell*). *Flamboyant* (etymologically, flaming or wavy like flames) was originally and still is applied to a late style of French Gothic architecture, or more specifically to the tracery in the windows of buildings in that style. The chief characteristic of that tracery is the use of curves that suggest ascending curving flames. In its more general application *flamboyant* suggests not so much ornateness (though it often also connotes that) as excess of color, conspicuous vigor and dash, bold and daring display, or any of numerous qualities that suggest the freedom and brilliancy of flames; as, a *flamboyant* display of courage; "*flamboyant* penmanship" (*E. Dowden*); "the *flamboyant* period of prose" (*Saintsbury*); "they [war-weary people] want... something novel, *flamboyant* and sensational" (*C. E. Montague*); "These... *flamboyant* tricks of virtuosity have gone quite out of fashion" (*Quiller-Couch*). *Florid* implies richness, usually overrichness, in details, shown particularly in the use of color, figures of speech, flourishes, and the like, for their own sake; it implies, therefore, showy and often ostentatious embellishment; as, a *florid* style of poetry; a *florid* musical composition; "The screen was an old one, of gilt Spanish leather, stamped and wrought with a rather *florid* Louis-Quatorze

pattern" (*Wilde*); "the public genuinely admired the *florid* and *rococo* forms of Early Victorian art" (*A. C. Benson*).

Ana. Adorned, decorated, ornamented, embellished (see *ADORN*): flowery, aureate (see *RHETORICAL*): *luxurious, sumptuous, opulent: *showy, ostentatious.

Ant. Chaste: austere.

oscillate. *Swing, sway, vibrate, fluctuate, pendulate, waver, undulate.

Ana. Vacillate, waver, *hesitate, falter: *shake, tremble, quiver, quaver.

ostensible. *Apparent, seeming, illusory.

Ana. Specious, *plausible, colorable: pretended, assumed, affected, simulated, feigned (see *ASSUME*).

ostentatious. *Showy, pretentious, pompous.

Ana. Vainglorious, vain, proud (see under *PRIDE*): flaunting, parading, displaying (see *SHOW, v.*): boasting, bragging, gasconading (see *BOAST*).

ostracize. *Banish, exile, expatriate, deport, transport, extradite.

otiose. *Vain, nugatory, idle, empty, hollow.

Ana. *Superfluous, supernumerary, surplus: *futile, vain, fruitless, bootless.

ought, v. *Ought, should, must have, have got* come into comparison as auxiliary verbs meaning is or are bound (to do, or to forbear, or the like). *Ought* and *should* express the compulsion of obligation, *ought* commonly suggesting duty or moral constraint, *should* suggesting the obligation of fitness, propriety, expediency, and the like; as, "We have left undone those things which we *ought* to have done; And we have done those things which we *ought* not to have done; And there is no health in us" (*Book of Common Prayer*); "The participle for the substantive *should* be very rarely used" (*Jowett*); "The translator of Homer *should* be penetrated by a sense of four qualities of his author" (*Arnold*). But *ought* is often used in the weaker sense conveyed by *should*; as, "The translator of Homer *ought* steadily to keep in mind... what judges he is to try to satisfy" (*Arnold*). *Must* implies the compulsion of necessity, whether physical or moral; it, therefore, carries no suggestion that the decision is left to the agent or the person involved; as, "I did but taste a little... and, lo, I *must* die" (*1 Samuel* xiv. 43); "Duty whispers low, Thou *must*" (*Emerson*); "I suppose a woman *must* have children to love—somebody else's if not her own" (*E. Wharton*). *Have* and, in low colloquial uses, *have got*, are often used in the sense of *must*; with, however, less stress on inescapable necessity and more on the compulsion of obligation, duty, need, or the like; as, he *has* to go to the hospital for an operation; he *had* to leave before the convention ended; "Science has, and will long have to be a divider" (*Arnold*).

ought, n. Aught, naught, nought, *cipher, zero.

oust. *Eject, expel, evict, dismiss.

Ana. *Exclude, eliminate, shut out, rule out, debar, disbar: *dismiss, discharge, fire, cashier, sack.

out-and-out. *Outright, unmitigated, arrant.

outcome. *Effect, consequence, result, aftereffect, event, aftermath, issue, upshot, sequel.

Ana. *Fate, lot, portion, destiny: termination, *end.

outdo. Excel, outstrip, transcend, surpass, *exceed.

outdoor. *Outdoor, open-air, plein-air, alfresco* agree in meaning outside a house or building. *Outdoor* usually implies existence or occurrence outside of any building and in the fresh air; as, *outdoor* exercise or games; *outdoor* clothes (that is, clothes not suitable for house wear); an *outdoor* display of goods. Sometimes, however, it is applied to certain activities carried on outside of an

institution, especially a hospital, and then approaches *extramural* in meaning; as, *outdoor* relief. **Open-air** invariably implies existence, occurrence, or the like, outside of any building; as, *open-air* meetings; *open-air* concerts; an *open-air* school (that is, a school conducting all or most of its activities out of doors). **Plein-air**, a French term adopted in English as an equivalent of *open-air*, is chiefly applied to certain schools of painters (or their paintings) who carry on their work out of doors and concentrate attention on atmospheric and light effects. **Alfresco** (derived from the Italian *al fresco* "in the fresh [air]"), also is equivalent to *open-air* in denotation. However, it is applied chiefly to meals, entertainments, etc., and so has acquired connotations of informality, rusticity, and the like.

outer. **Outer**, **outward**, **outside**, **external**, **exterior** are here compared as adjectives meaning being or placed without something. Although in many cases interchangeable, they are more or less restricted in their applications and are therefore clearly distinguished in their implications. **Outer** usually retains its comparative force, then applying to that which is farther out from something described as *inner* (as, the *outer*, as distinguished from the *inner*, court; the *outer* layer of skin is called the epidermis) or is farther than another thing from the center, the body, or the like (as, to shed one's *outer* garments; the *outer* covering of a butternut is removed before the nut is cracked). **Outer** is also applicable to that which is definitely without as opposed to that which is definitely within something, but in this sense the term rarely suggests spatial relations; thus, the *outer* man is the man as known in the flesh and as distinguished from the inner man, that is, the man as he really is in mind and soul; one's *outer* life is that which is observable to one's fellows; the *outer* world is the world as known directly through the senses. **Outward**, less frequently than formerly, may be used of spatial relations: when it is so used it commonly implies motion or direction away from, or the reverse of, that which is *inward*; as, given to *outward* display; *outward* travel from New York City is very heavy over the weekends; the *outward* curve of a convex lens. Like *outer*, the term is sometimes used in contrast with that which is spiritual (as, "Women's self-possession is an *outward* thing; inwardly they flutter"—*Conrad*), but more often it implies existence entirely without the mind or soul; as, "obstinate questionings Of sense and *outward* things" (*Wordsworth*); "Unless the *outward* and visible signs of Our Authority are always before a native he is...incapable...of understanding what authority means" (*Kipling*). **Outside** usually implies a position on or a reference to the outer parts or surface of a thing; as, an *outside* stateroom on a ship; *outside* shutters; the *outside* paint is looking shabby. But *outside*, in extended use, applies especially to a person or thing that is beyond certain implied borders, bounds, or limits; thus, an *outside* influence is one not emanating from the particular society, group, community, or the like, in mind; the *outside* world is the world beyond the scope or interest of a family group, community, set, or the like, or the confines of a town, city, or state; an *outside* broker is one who is not a member of an exchange; *outside* work is work in the field or on the road, in contrast with *inside* work, as in an office, factory, or store. "If it had condemned, Old Chester would not have cared in the very least. It looked down upon the *outside* world" (*Deland*). **External** and **exterior** are often used interchangeably without loss, for both come close in meaning to *outside* (as, the *exterior*, or *external*, appearance of an object; the *exterior*, or *external*, form of a body). But *external* is usually the term

preferred when location or situation beyond or away from the thing under consideration is implied (as, "I was often unable to think of *external* things as having *external* existence"—*Wordsworth*; "Our desires and wills are directed to some object *external* to us"—*S. Alexander*), and *exterior* is the term preferred when location or situation on the surface or on the outer limits of a thing is implied (as, the *exterior* slope of a fortification; the *exterior* parts of the human body; "Thou, whose *exterior* semblance doth belie Thy Soul's immensity"—*Wordsworth*). But *external* often comes close to *superficial* in implying mere appearance or semblance that has no relation or little relation to what the thing really is; as, "But under this *external* appearance of ease she was covered with cold beads of sweat" (*E. Wharton*); beauty that is purely *external*.

Ana. *Extrinsic, extraneous, foreign, alien.

Ant. Inner. — **Con.** Inward, inside, internal, interior, intestine (see **INNER**).

outfit, *n.* *Equipment, apparatus, paraphernalia, tackle, machinery, gear, matériel.

outfit, *v.* *Furnish, equip, appoint, accouter, arm.

outlander or **uitlander**. *Stranger, foreigner, alien, outsider, immigrant, émigré.

outlandish. *Strange, singular, unique, peculiar, eccentric, erratic, odd, queer, quaint, curious.

Ana. Bizarre, grotesque, *fantastic, antic: alien, foreign, extraneous, *extrinsic.

outlast. *Outlive, survive.

Ana. Endure, persist, abide, *continue: withstand, resist (see **OPPOSE**).

outline, *n.* 1 **Outline**, **contour**, **profile**, **sky line**, **silhouette** come into comparison as meaning the boundary line or lines which give form or shape to a body, a mass, a figure, or the like. **Outline** refers to a line which marks or seems to mark the edge or limits of a thing; it may apply either to an outer edge (as, "At night, the *outline* of the shore is traced in transparent silver by the moonlight and the flying foam"—*Stevenson*) or to the continuous line (sometimes then *outlines* is preferred) that marks the edge of a body or mass, especially from a given point of view (as, "Clem...looked at the big house. The dark *outline* against the dark sky made him hesitate"—*E. Caldwell*; "[the lighthouse keeper] far from the earth, of which he scarcely distinguishes the *outlines* through the mist"—*H. Ellis*). **Contour** does not fix the attention on an edge or limit, but on the outer lines as related to a thing's shape and as indicative of its grace or lack of grace, its fullness or slenderness, its softness or harshness, or the like; as, "the full and flowing *contour* of the neck" (*Shelley*); "a child, of timid, soft *contours*" (*Hewlett*); "the blurred *contour* of Rainbarrow obstructed the sky" (*Hardy*). Specifically, *contour* applies to lines (*contour lines*) in a map (*contour map*) that indicates the configuration of a country or tract of land. **Profile** in its earliest sense applies to the representation or the appearance of something in outline, especially of a face in side view showing the contour of the head and emphasizing the line from forehead to under the chin; as, "lips lovely in *profile*—a little too wide and hard...seen in front" (*Ruskin*). Consequently, *profile* is usually the preferred term when a varied and sharply defined outline as seen against a background is implied, although *sky line* may be chosen as more specific when the background is the sky; as, "Its *sky-line* was like the *profile* of a big beast lying down" (*Cather*); the *sky line* of New York City. **Silhouette**, in its earlier and literal sense, applies especially to a kind of portrait of someone or something made by tracing the outline of his (or its) shadow on a wall on

paper (or fabric) that is black on one side, by cutting out this figure as drawn, and by mounting it, black side outward. *Silhouette*, therefore, even more than *outline* or *profile*, eliminates all consideration of details such as color, quality, expression, and the like, and implies an outline seen in or as in a shadow; as, from the distance at which we stood and because of the brightness of the sun behind them, we saw the two figures only in *silhouette*; "The *silhouette* made a blue-black stain On the opposite wall" (*Amy Lowell*).

Ana. Figure, *form, shape, conformation, configuration. **2** Sketch, diagram, delineation, draft, tracing, plot, blueprint. See under SKETCH, v.

outline, v. *Sketch, diagram, delineate, draft, trace, plot, blueprint.

outlive. **Outlive, outlast, survive** are here compared as meaning to remain in existence longer than another person or thing, or after a given experience. **Outlive** carries a strong implication of a capacity for endurance and is therefore used by preference when competition, struggle, the surmounting of a difficulty, or the like, is also connoted; as, the three brothers lived to be over ninety, but John *outlived* James and Henry; "Not marble, nor the gilded monuments Of princes, shall *outlive* this powerful rhyme" (*Shak.*); to *outlive* one's shame; "The world has *outlived* much, and will *outlive* a great deal more" (*J. R. Lowell*). **Outlast** usually stresses greater length of duration rather than greater capacity for endurance and therefore is employed when comparison is more important than a suggestion of superiority or when the fact of existing longer is more important than the length of time involved; as, "Customs that have long *outlasted* their usefulness" (*Inge*); "The sweet sensations of returning health made me happy for a time; but such sensations seldom *outlast* convalescence" (*Hudson*). But when length of (as distinguished from capacity for) endurance, rather than length of life or existence, is implied, *outlast* is preferred to *outlive*; as, "He could *outlast* horse and outpace hound" (*Masefield*). **Survive** may be used as an intransitive as well as a transitive verb; in general, it suggests merely a living or existing longer than another person or thing, or after some event (sometimes implied rather than expressed) which might bring about his (or its) end; as, the elder sister *survived* the younger; far more infants *survive* after birth than in the days when no prenatal care was given; he is unlikely to *survive* the operation; "No religion can *survive* the judgment of history unless the best minds of its time have collaborated in its construction" (*T. S. Eliot*); "One in a million of these childish talents *survives* puberty" (*A. Huxley*).

Ana. Endure, persist, abide, *continue: surpass, *exceed.

outlook, n. *Prospect, anticipation, foretaste.

Ana. Forecasting or forecast, predicting or prediction, prophesying or prophecy, presaging or presage (see corresponding verbs at FORETELL): possibility, probability, likelihood (see corresponding adjectives at PROBABLE).

outrage, v. **1** *Abuse, misuse, mistreat, maltreat, ill-treat.

Ana. *Wrong, persecute, oppress, aggrieve: corrupt, pervert, vitiate, deprave, *debase.

2 *Offend, affront, insult.

Ana. Vex, *annoy, irk, bother: mortify, chagrin (see corresponding adjectives at ASHAMED).

outrageous. **Outrageous, monstrous, heinous, atrocious** agree in meaning enormously or flagrantly bad or horrible. That is *outrageous* which violates even the lowest standard of what is right or decent, or exceeds one's power to suffer or tolerate; as, *outrageous* behavior; an *outrageous* practical joke; an *outrageous* cartoon; *outra-*

geous treatment of prisoners of war. That is *monstrous* which is shockingly wrong, absurd, horrible, or the like, or is inconceivably fantastic, abnormal, or aberrant; as, a *monstrous* falsehood; a *monstrous* conception of morality. "It is natural... that you should consider the idea of an isolated or imprisoned manhood something *monstrous*" (*Meredith*). "The very horror with which men spoke, centuries after... plainly indicates that such a wholesale massacre was exceptional, *monstrous*" (*Quiller-Couch*). That is *heinous* which is so flagrantly bad or so conspicuous for its enormity that it excites hatred or horror; as, treason has always been regarded as a *heinous* crime. "A process... so *heinous* that men might on it spit" (*Chaucer*). "These animal passions are felt most vividly when the community is animated with anger against some *heinous* offence" (*S. Alexander*). That is *atrocious* which excites condemnation for its savagery or barbarity; as, *atrocious* cruelty; "*atrocious* acts which can only take place in a slave country" (*Darwin*). In current loose use, *atrocious* is often used to suggest savage condemnation rather than to impute savagery to the thing so described; as, *atrocious* English; an *atrocious* book.

Ana. *Flagrant, glaring, gross, rank: notorious (see FAMOUS): *excessive, inordinate, immoderate, extreme: flagitious, nefarious, iniquitous, *vicious.

outright, adj. **Outright, out-and-out, unmitigated, arrant** are comparable when they are used hyperbolically as meaning just what one (a person or thing) is said to be, without reservation or qualification. They are often used interchangeably as intensives, but there are clear differences in meaning. That is *outright* which has gone to the extreme and can be made neither better nor worse, or which is past recall; as, he is an *outright* fool; you speak *outright* nonsense; an *outright* killing. That is *out-and-out* which is completely as described at all times, or in every part, or from every conceivable point of view; as, an *out-and-out* fraud; an *out-and-out* villain; an *out-and-out* blessing. That is *unmitigated* which is or seems to be beyond the possibility of being lessened, softened, relieved, or the like; as, an *unmitigated* evil; "unrequited affections are in youth *unmitigated* woes" (*L. P. Smith*). That is *arrant* which is all that is implied by the term that follows (usually a term of abuse); as, an *arrant* coward; an *arrant* hypocrite; an *arrant* liar. Cf. *fastnote* at ABSOLUTE.

outside, adj. *Outer, outward, external, exterior.

Ana. *Extrinsic, extraneous, alien, foreign.

Ant. Inside. — **Con.** *Inner, inward, internal, interior, intestine.

outsider. *Stranger, foreigner, alien, outlander, immigrant, émigré.

outstanding. Prominent, conspicuous, salient, signal, striking, arresting, remarkable, *noticeable.

Ana. *Exceptional.

Ant. commonplace. — **Con.** *Common, ordinary, familiar.

outstrip. Outdo, *exceed, surpass, transcend, excel.

outward. *Outer, outside, external, exterior.

Ana. Extraneous, *extrinsic, alien, foreign.

Ant. Inward. — **Con.** *Inner, inside, internal, interior, intestine.

outwit. *Frustrate, thwart, foil, haffle, balk, circumvent.

Ana. Defeat, overcome, surmount (see CONQUER): *prevent, preclude, obviate, avert: overreach, *cheat, defraud.

over. *Above.

Ant. Beneath.

overbearing. Supercilious, disdainful, lordly, arrogant, haughty, *proud, insolent.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. Domineering, *masterful, imperious: scorning or scornful, despising or spiteful, contemning (see corresponding verbs at **DESPISE**): autocratic, despotic, tyrannical, *absolute.

Ant. Subservient.

overcome. Surmount, overthrow, subjugate, rout, *conquer, vanquish, defeat, beat, lick, subdue.

Ana. Capture, *catch: outstrip, outdo, *exceed: *suppress, repress.

overdue. *Tardy, behindhand, late.

Ana. Delayed, retarded, detained, slowed, slackened (see **DELAY**, *v.*): deferred, postponed (see **DEFER**).

overflow. *Teem, swarm, abound, superabound.

overlay. **Overlay**, **superpose**, **superimpose**, **appliqué** agree in meaning to add one thing to another by placing the former upon or over the latter. **Overlay** usually implies covering with another material or substance, sometimes thinly, as with a wash, glaze, or coat (as, plated silver is often a white metal *overlaid* with silver), sometimes thickly, as by incrusting, veneering, or plastering (as, a brick wall *overlaid* with stucco). In extended use, *overlay* usually implies accretions or additions that conceal or encumber the original thing or smother and stifle whatever there is of life in it. "The ancient world had its own complexities, but it was not, like ours, heavily *overlaid* with the debris of speculative systems" (*Buchan*). "Ages of fierceness have *overlaid* what is naturally kindly in the dispositions of ordinary men and women" (*B. Russell*). **Superpose** and **superimpose** are not always clearly distinguished, especially when they imply a putting of one thing on top of another, thereby extending the height of the original mass; thus, strata are layers of rock successively built up by sedimentary deposits, each layer being *superimposed* (or *superposed*) on the one previously formed. **Superpose**, however, is the preferred term when relative position only is indicated, and **superimpose** when the thing added rests upon or is supported by the original thing; thus, *superposed* columns do not necessarily have the columns of the lower row for their respective bases, but *superimposed* columns do; an overtone is strictly a *superposed* (not a *superimposed*) tone. **Superpose** is also the preferred term among scientists when dealing with light rays, undulations, etc., that occupy the same position without destroying each other or losing their identities; as, "upon the large and general motion of the glacier, smaller motions are *superposed*" (*J. Tyndall*); "originally they [the two bright spots] were *superposed* on each other" (*Karl K. Darrow*). **Superimpose** often, especially in extended use, carries the implications of imposition or the addition of something extraneous and burdensome; as, many a historian *superimposes* his prejudices or private opinions upon his narrative of events. **Appliqué** (a verb derived from the French past participle *appliqué*, which is used in English as an adjective) always implies an intent to ornament and is chiefly used in reference to cut or shaped pieces of a fabric or textile which are pasted, sewn, or otherwise attached to a similar or contrasting fabric or textile so as to form a decorative pattern on the surface of the latter; as, to *appliqué* a satin blouse with wool of the same color; net on which lace motifs are *appliquéd* is called *appliqué* lace. In extended use, *appliqué* always suggests overlaying so as to form a decorative design. "Never taking his eyes off the pine-trees, *appliquéd* against the blue water" (*Cather*).

overlook. Slight, forget, ignore, disregard, *neglect, omit.

overplus. *Excess, superfluity, surplus, surplusage.

overreach. *Cheat, cozen, defraud, swindle.

overrun. *Infest, beset.

overset. *Overturn, upset, capsize, overthrow, subvert.

oversight. **Oversight**, **supervision**, **surveillance** not only carry the same meaning etymologically—a watching over—but in their current use come into comparison when they denote the function or duty of watching or guarding for the sake of proper control or direction. **Oversight**, the term of Anglo-Saxon origin, applies to the function or duty not only of one who is called an overseer or an inspector, but of any one whose duty it is to watch the progress of a piece of work so that no defects or imperfections may occur or to superintend the labors or efforts of a force, a staff, or other body of workers; as, each foreman is charged with the *oversight* of the work done in his department; the bishop has *oversight* of the clergy and parishes in his diocese. **Supervision**, the term of Latin origin, carries the strongest implication of authoritative powers, of responsibility, and of superintendence; it therefore usually suggests more rigorous direction or closer management than *oversight*; as, the architect had *supervision* of the construction of the building; the *supervision* of the schools is the duty of the superintendent rather than of the board of education; police *supervision* of traffic is very strict. **Surveillance**, the term of French origin, applies largely to any duty involving a close watch of persons lest they commit misdeeds of offenses against the law or against morals, or suffer untoward accidents; as, the police are maintaining a strict *surveillance* of the suspect; to keep the inmates of a lunatic asylum under *surveillance*.

Ana. Management, direction, controlling or control (see corresponding verbs at **CONDUCT**): inspection, scrutiny, examination (see under **SCRUTINIZE**).

overthrow, v. 1 *Overturn, overset, subvert, upset, capsize.

Ana. *Throw, cast, fling, hurl, toss.

2 Rout, surmount, overcome, vanquish, *conquer, defeat, beat, lick, subdue, subjugate, reduce.

overture, n. 1 **Overture**, **approach**, **advance**, **tender**, **bid** are, in the senses in which they are here considered, words of somewhat indefinite application covering any of a variety of acts or actions by which one person or party tries to gain the good will of another person or party. **Overture**, in careful use, always implies an attempt to begin a relationship. It may designate a formal proposal intended to open negotiations, as for peace, for a marriage between persons of royal blood, or for a merger of corporations. It is, however, often applied to any act or speech that may be construed as a search for an opening for friendship, for reconciliation, for co-operation, or the like. "She was not one of those backward and delicate ladies, who can die rather than make the first *overture* (*Fielding*). " 'You are the new second officer, I believe.' Mr. Powell answered in the affirmative, wondering if this was a friendly *overture*" (*Conrad*). **Approach** often is used in place of *overture* when the latter is felt to be too formal; as, the two girls made timid *approaches* to each other. **Advance** may be applied to any attempt to gain love, friendship, good will, or the like, whether it serve as an *overture* or as an effort to establish a closer relationship; as, after his *overtures* (more explicit than *advances*) were accepted, no further *advances* (not *overtures*) were made by either for some days. "She tried to make talk, but Hugh answered all her *advances* . . . briefly" (*S. Anderson*). **Tender** in this looser sense, still retains its primary meaning of offer, but it does not necessarily imply specific acts or a formal proposal. Sometimes it suggests little more than a sign or token. " 'He hath, my lord, of late made many *tenders*. Of his affection to me.' 'Affection! pooh! you speak like a green girl . . . Do you

believe his *tenders*, as you call them?" " (*Shak.*). *Bid*, a less formal word, adds to *advance* the implication of appeal or, sometimes, of invitation: it always requires qualification; as, a *bid* for sympathy; a *bid* for patronage. Like the other words of this group, the specific nature of the act or action can be inferred only from the context; as, the new state's ready acceptance of the Allies' proposal constituted a *bid* for recognition.

Ana. *Proposal, proposition: offering or offer, proffering (see corresponding verbs at *OFFER*).

2 Induction, *introduction, prologue, prelude, preface, foreword, prolegomenon, proem, exordium, preamble, prolusion, protasis, avant-propos.

overturn. *Overturn, overset, upset, capsiz, overthrow, subvert* come into comparison only because they carry a common basic meaning—to cause to fall (sometimes, intransitively, to fall) from its normal or proper position. Otherwise, they vary widely in their applications and implications. *Overturn* is usually the least explicit of these terms in its additional implications: sometimes it implies a turning upside down (as, the boat *overturned* and floated with its keel upwards) but more often it implies a turning on the side so that the thing affected lies flat on the ground (as, to *overturn* a chair by hitting against it); sometimes, especially when the thing affected is a state, an institution, or something which has been built up or become established, the term also implies a breaking down and, consequently, its ruin or destruction; as, "Without *overturning* all existing institutions" (*Edgeworth*); "Long-reverenced titles cast away as weeds; Laws *overturned*" (*Wordsworth*); "When they seek to *overturn* our rights" (*Tennyson*). *Overset*, once a common and close synonym of *overturn*, is now increasingly rare, having given way to *upset* in its literal and, to some extent, in its extended senses. The latter is now the familiar and colloquial term. Both words, however, more than *overturn*, imply a loss of balance, sometimes physical, sometimes mental, often emotional (for this sense of *upset* see *DISCOMPOSE*), as the result of some external or internal cause or agency; as, "I *overset* my raft" (*Defoe*); "No birds in last year's nests—the winds have torn and *upset* the mossy structures in the bushes" (*Jefferies*); "A man who knew how slight a thing would *overset* the delicate organisation of the mind" (*Dickens*);

"a European war lays its blight on whole peoples, deranges their life, *upsets* their standards of judgement" (*C. E. Montague*). But *upset* far more often than *overturn* or *overset* is used to imply the abolition of something established or the demolishing of something built up; as, to *upset* a person's calculations; to *upset* one's plans. "We are bound to be very cautious in coming to the conclusion that the Fourteenth Amendment has *upset* what thus far has been established and accepted for a long time" (*Justice Holmes*). *Capsiz* is the specific term meaning to upset or overturn a boat: since, however, it usually suggests a complete overturning, it is sometimes employed in an extended sense to imply a turning, especially a sudden turning, upside down or topsy-turvy, not only physically, but mentally or morally; as, "When I see youth going to *capsiz* [morally]... it makes my blood... curdle" (*Besant*). *Overthrow*, as here considered (for most common specific sense see *CONQUER*), carries a far stronger implication of the exercise of force, violence, or strategy than any of the preceding terms: it therefore often also implies consequent defeat, destruction, or ruin; as, to *overthrow* one's opponent in a combat; to *overthrow* the images in churches; to *overthrow* a government by force; to seek to *overthrow* religion. *Subvert* implies an overturning or overthrowing of something held to be of intrinsic value, such as a form of government, morality, or religion, by undermining its supports or weakening its foundations: often, but not always, it suggests the operation of insidious or corrupting influences; as, "This doctrine would *subvert* the very foundation of all written constitutions" (*Ch. Just. Marshall*); "A... question... whether more harm will be done to morality by weakening or *subverting* established usage than good" (*S. Alexander*); "Representative government... easily may be, and in England has been, used to *subvert* equality and fraternity" (*Brownell*).

Ana. Invert, *reverse, transpose.

OWN, v. 1 Possess, hold, *have, enjoy.

Ana. Control, manage, direct, *conduct: *keep, retain.

2 *Acknowledge, avow, admit, confess.

Ana. Concede, *grant, allow: *reveal, disclose, divulge.

Ant. Disown: repudiate.

oxygenate. *Aerate, ventilate, carbonate.

ozone. *Air, atmosphere, ether.

P

abulum. *Food, aliment, nutriment, nourishment, sustenance.

pace, n. 1 *Trot, single-foot, walk, gallop, run, canter, lope, rack, amble.

2 *Speed, velocity, momentum, impetus, headway.

pace, v. Trot, single-foot, walk, gallop, run, canter, lope, rack, amble. See under *TROT, n.*

pacific. *Pacific, peaceable, peaceful, irenic (or irenical; also eirenic, eirenical), pacifist, pacifistic* are sometimes confused because they all involve the idea of affording or promoting peace. But *pacific* applies chiefly to persons, utterances, acts, influences, ideas, and the like, that tend to make peace or to conciliate strife; as, "the old grave *pacific* Quakers" (*John Adams*); the *pacific* counsels of the ambassador; the *pacific* views of the chief arbitrator in a labor dispute. "It must come in the end to the sword—this the most *pacific* and legally-minded had been forced to admit" (*Buchan*). *Peaceable* applies also to persons, their actions, words, etc., but it describes their

character or quality as peace-loving, as disposed to avoid strife, or as inclined to keep peace, rather than their aims or tendencies; as, the villagers were a quiet, *peaceable* folk; "Our king the good Simonides... deserves so to be called for his *peaceable* reign and good government" (*Shak.*); "Fox was a pacifist; but his tongue was not always *peaceable*" (*Inge*). *Peaceful* applies especially to a life, a condition or state, a period or age, a country or people, in which peace prevails or there is no strife, but it may apply to anything which manifests peace, especially peace of mind, or provides an opportunity for such peace; as, "And may at last my weary age Find out the *peaceful* hermitage" (*Milton*); the *peaceful* countenance of the old clergyman; to involve *peaceful* countries in war by sudden and unprovoked invasion; "Thou shouldst have seemed a treasure-house divine Of *peaceful* years" (*Wordsworth*). "I am grown *peaceful* as old age to-night" (*Browning*). *Irenic*, a word of relatively recent origin, applies chiefly to theological arguments, views, and the

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

like, that have for their aim the promotion of peace and of bringing members of divergent sects into accord. "Pieper lived to see his synod adopt a very *irenica* attitude towards its former antagonists" (*Dict. Amer. Biog.*). **Pacifist** and **pacifistic**, terms of very recent coinage, apply chiefly to the views, arguments, writings, or the like, of those who call themselves *pacifists*, or opponents of war or the use of military force for any purpose (as, *pacifist* propaganda; *pacifist* doctrines; the *pacifist* attitude to the Second World War), but they may also apply to the spirit or utterances of anyone who conscientiously objects to wars or who would substitute arbitration for conflict in the settlement of any disputes (as, *pacifistic* antagonism to conscription; *pacifistic* labor leaders).

Ana. *Calm, placid, serene, tranquil: conciliating or conciliatory, propitiating or propitiatory, appeasing, pacifying or pacificatory (see corresponding verbs at PACIFY).

Ant. Bellicose. — **Con.** *Belligerent, pugnacious, quarrelsome, contentious.

pacifist, pacifistic. *Pacific, peaceable, peaceful, irenic.

pacify. **Pacify, appease, placate, mollify, propitiate, conciliate** agree in meaning to quiet a person or persons when excited or disturbed. **Pacify** presupposes a disturbance of the peace and often, but far from invariably, a state of insurrection or of active hostility; it implies a reduction to order or quiet, but not necessarily a removal of the cause of the outbreak; as, it took time to *pacify* the excited children; troops were sent to *pacify* the rebellious tribes. **Appease** usually presupposes agitation caused by someone or something that makes demands; it therefore may be used in reference to appetites, desires, passions, as well as persons; it implies giving satisfaction, sometimes complete satisfaction, but more often merely a contenting; as, to *appease* one's curiosity or one's hunger. "When he [an orator] has once tasted the blood of popular applause, he is a tiger, nevermore to be *appeased*" (*Grandgent*). "Thoroughly to *appease* his conceit, it would have been necessary to swing open the gates of honour in the Arc and allow his facade to pass through" (*Bennett*). In the constructions "to *appease* one's wrath, rage, temper, etc.," or "to *appease* one in a rage," the implication of demands to be satisfied is often obscured though seldom lost; the emphasis, however, is on calming or quieting the excitement by pleasing or gratifying; as, he hoped to *appease* his father by his candor. "He [Antony] had a hasty temper, but it was easily *appeased*" (*Buchan*). **Placate** always presupposes bitterness of feeling, deep resentment, or the like; it implies success in changing ill will into good will or a hostile to a friendly attitude; as, he never attempts to *placate* his enemies. "Nothing ever *placates* them, nothing ever moves to a look of approval that ring of bleak, old, contemptuous Faces" (*L. P. Smith*). **Mollify** presupposes agitation caused by anger, especially rising anger, or by hurt feelings; it implies a softening of one's wrath or a soothing of one's feelings; as, she takes offense easily, but flattery always *mollifies* her. "His careworn look... *mollified* my wife toward him" (*Thackeray*). **Propitiate** presupposes an offense or affront that makes one ill-disposed; it implies a placating, usually for the sake of gaining that person's or group's active or effective good will. "The gods [of the ancient Greeks]... were capricious and often hostile... but at least they had a nature akin to his; if they were angry, they might be *propitiated*; if they were jealous, they might be *appeased*" (*G. L. Dickinson*). "Aunt Rosa, he argued, had the power to beat him... It would be discreet in the future to *propitiate* Aunt Rosa" (*Kipling*). **Conciliate** presupposes

an estrangement or an alienation of a person or group; it implies a winning over as by persuasion, arbitration, inducements, or the like, and a settling of differences. "Dr. Lambert... with amazing good nature and tact, has been able to *conciliate* the various island administrations" (*V. Heiser*). "The natural instinct of man... to *conciliate* and to *propitiate* him [a deity] by all the means in his power, as he would offer gifts to a prince or chief" (*A. C. Benson*).

Ana. Assuage, alleviate, allay, mitigate, *relieve: *moderate, qualify, temper.

Ant. Anger.

pack, n. 1 *Bundle, bunch, package, packet, bale, parcel, fardel.

2 *Flock, herd, drove, bevy, covey, gaggle, flight, swarm, shoal.

package, n. Packet, *bundle, bunch, bale, parcel, pack, fardel.

packet, n. Package, pack, *bundle, bunch, bale, parcel, fardel.

pact. Compact, *contract, bargain, treaty, entente, convention, cartel, covenant, concordat, indenture, misc.

pagan, n. **Pagan, heathen, paynim, ethnic, Gentile** come into comparison both as nouns and as adjectives when they mean one (or, as an adjective, of or characteristic of one) that belongs to a religion that is not Christian and often, by implication, not Jewish. **Pagan**, which came into English from the Latin, and **heathen**, which came into Anglo-Saxon from earlier Germanic languages, were both used in this sense by early Christians, and by some later writers dealing with early Christianity, to designate persons who lived in remote sections or away from the centers of civilization and had not yet been converted to Christianity. In the course of time, with the Christianization of these peoples, the words became somewhat, though not always clearly, differentiated in meaning; hence, *pagan* very frequently refers specifically to a follower of the Greek and Roman and similar polytheistic religions of ancient times or of times before the Christianization of Europe and America (as, "The emperor Julian... was perverted from Christianity, and confirmed a *pagan*, by Maximus a magician" — *Defoe*; "It was the words 'descended into Hades' That seemed too *pagan* to our liberal youth" — *R. Frost*) and **heathen**, by contrast, to one who belongs to a race or people unconverted to Christianity, even though that race or people has a religion (often, but not necessarily, a polytheistic religion) of its own (thus, Christian missionaries are sent to convert the *heathens* [not *pagans*]; "To reveal his Son in me, that I might preach him among the *heathen*" — *Galatians* i. 16). In current use, *pagan* more often suggests an attitude to life than a difference in religion: the term variously implies irreligiousness, indifference to things of the spirit, frank delight in material joys or goods, or the like. "The Renaissance is, in part, a return towards the *pagan* spirit, in the special sense in which I have been using the word *pagan*; a return towards the life of the senses and the understanding" (*Arnold*). "You will hear the word '*pagan*' flung loosely about for 'irreligious,' or sometimes as meaning joyous, material and comfort-loving, whereas the simple *pagans* walked the earth full of what is called holy awe and that mystic faith in unseen powers which is the antithesis of materialism, and gloomy with apprehension of the visitations of their horrid and vindictive gods" (*R. Macaulay*). **Paynim**, originally a Middle English word meaning *pagandom* and then *pagan*, is now an archaic or historical term, used chiefly in historical novels, for one who from the point of view of the Middle Ages is a heathen: from the crusades on, the

term has been specifically applied to one of the chief enemies of the crusaders, a Mohammedan or Saracen; as, "The *Paynim* turban and the Christian crest" (*Byron*). Both *ethnic* (now obsolete as a noun) and *Gentile* (often uncapitalized) etymologically mean a nation or people, but as here considered the terms usually apply to one of any people not converted to the true faith. This is particularly true of *Gentile*, which names, from the point of view of Jews, a non-Jew and, from the point of view of early Christians, as derived from the New Testament, one of any nation yet to be, or in the course of being, Christianized by the apostles and their successors. "But I say that the things which the *Gentiles* sacrifice, they sacrifice to devils, and not to God" (*1 Corinthians* x. 20). "Such boastings as the *Gentiles* use, Or lesser breeds without the Law" (*Kipling*). In nonhistorical use, *ethnic* comes close to *pagan* or *heathen* in meaning (as, "The *Ethnics* do still repute all great trees to be divine"—*Evelyn*; "These are ancient *ethnic* revels Of a faith long since forsaken"—*Longfellow*). *Gentile*, except when used historically in the New Testament sense, now commonly implies an opposition to *Jew*, and applies, as a rule, to a Christian of any denomination; as, Jews and *Gentiles* gathered to honor the great Hebrew divine.

pagan, *adj.* Heathen, *paynim*, *ethnic*, *Gentile*. See under *PAGAN*, *n.*

pain, *n.* 1 *Pain*, *ache*, *pang*, *throe*, *twinge*, *stitch* come into comparison when they mean a bodily sensation that causes acute discomfort or suffering. *Pain* may range in its application from a sensation that makes one uneasily aware of some bodily disturbance or injury to a sensation resulting from severe injuries or disease and of agonizing intensity; from a sensation that is purely local to one that affects the entire body; as, a *pain* in the finger; chest *pains*; his face was drawn with *pain*. More specifically, *pain* implies acute and, often, sudden suffering such as might be inflicted by something that pierces, stings, burns, or the like. An *ache* is, commonly, a steady, often a dull, pain; it is especially referable to sensations arising from disorders that may be relieved; as, a *backache*; a *headache*. "A fellow that never had the *ache* in his shoulders" (*Shak.*). A *pang* is a sharp, sudden, and, often, transitory pain of great intensity, especially one that recurs in spasms. "*Pangs* have taken hold upon me, as the *pangs* of a woman that travaileth" (*Isaiah* xxi. 3). A *throe* is a pang characteristic of a process, such as that of labor in childbirth. Because of its association with labor it usually designates a violent and convulsive, as well as a recurrent pain; as, in the *throes* of violent retching. "The *throes* of a mortal and painful disorder" (*Scott*). A *twinge* is a momentary shooting or darting pain, especially one causing muscular contraction or twitching; it is sometimes regarded as a premonitory symptom; as, to feel a *twinge* in the region of the heart. *Stitch* differs from *twinge* in suggesting something that runs through a part of a body (usually a muscle) like a piercing needle; as, a *stitch* in the side.

All of these words except the last designate also mental suffering. *Pain* commonly suggests sorrow, as for something lost or unattainable. "An' lea' us nought but grief an' *pain* For promise'd joy" (*Burns*). *Ache* usually implies suffering that must be endured or longing not likely to be appeased; as, a dull *ache* in her heart; to know the *ache* of loneliness. *Pang* suggests a sudden sharp access of a painful emotion; as, sharp *pangs* of envy, or fear, or remorse. *Throe* presupposes the existence of mental agony and designates one of the recurrent spasms that characterize the state of mind. "Fierce maternal passion... was now bowing her still lower, in the *throes* of a bitter renunciation" (*E. Wharton*). *Twinge* suggests

less poignancy than *pang* but often connotes compunction. "*Twinges* of conscience" (*Thackeray*). "Too painfully preoccupied to feel a *twinge* of self-reproach at this undeserved praise" (*G. Eliot*).

Ana. Agony, *distress, suffering, passion: anguish, *sorrow, grief.

2 In plural form *pains*. *Effort, exertion, trouble.

Ana. Labor, toll, travail, *work: industriousness or industry, diligence, sedulousness, assiduousness (see corresponding adjectives at *busy*).

pair, *n.* *Couple, brace, yoke.

pal, *n.* Chum, comrade, *associate, companion, crony, buddy.

palatable. *Palatable*, *appetizing*, *savory* (or *savoury*), *sapid*, *saporous*, *tasty*, *toothsome*, *flavorsome*, *relishing* agree in meaning agreeable or pleasant to the sense of taste. *Palatable* is not emphatic in its implication of pleasantness; therefore it seldom suggests deliciousness and often, on the other hand, implies little more than acceptability; as, to provide *palatable* meals for one's family; plain but *palatable* food. The term is used frequently in extended applications of things which are mentally digested; as, *palatable* advice; the rebuke was not *palatable*. "I'm afraid that my remarks have not been very *palatable*, but I can assure you that they were sincerely meant" (*C. Mackenzie*). *Appetizing* implies a whetting of the appetite; it is applicable to the smell and appearance as well as to the taste of food; as, the *appetizing* odor of a roasting turkey; a convalescent requires *appetizing* meals. In its extended use, the word is applicable to things that stimulate a desire for more or an eagerness to go further; as, an *appetizing* title; an *appetizing* introduction to a subject. *Savory*, also, is applied to foods that have an agreeable odor as well as taste, but it conveys definite implications of piquancy; it is therefore applied to highly seasoned dishes as contrasted with sweet or bland dishes; as, a bland meat like veal needs a *savory* onion or tomato sauce; a *savory* stuffing for the turkey; to prefer a *savory* to a sweet omelet. In its extended application, the word often suggests, especially in contrast to *unsavory*, a stimulating and refreshing as well as agreeable quality. "With *savoury* truth and wholesome common sense: To lead his son... To some not steep, though philosophic height" (*Cowper*). *Sapid* and *saporous* are not in common use today, but they still occasionally occur as opposites of *insipid*, implying a marked taste or flavor, sometimes one merely lacking in flatness or lifelessness, but often one that is distinctly keen or exhilarating; as, roast beef is more *sapid* than roast veal and roast venison more *sapid* than roast beef; vigorous, *sapid* poetry. *Tasty* also implies a marked taste, but it suggests in addition an appetizing quality; as, a *tasty* morsel; a *tasty* dish; a *tasty* filling for a sandwich; a *tasty* cheese. The word, though in good use in the past and still so regarded by some, is now regarded by others as colloquial, and by still others as common; it is therefore avoided in literary use and in elegant speech. *Toothsome* heightens the implication of agreeableness in *palatable* and usually adds also the suggestion of tenderness or of daintiness; as, a *toothsome* steak; a *toothsome* dessert. *Flavorsome* is the more or less colloquial equivalent of *sapid*, though usually it suggests richness rather than sharpness of taste, and often implies fragrance as well as savor; as, *flavorsome* apricots; a *flavorsome* rum sauce. *Relishing* stresses gusto in enjoyment; as, plain fare is *relishing* to a starving man; he found all this praise extremely *relishing*.

Ana. *Delightful, delicious, delectable, luscious: piquant, *pungent, spicy.

Ant. Unpalatable: distasteful.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

palate. *Taste, relish, gusto, zest.

pale, adj. 1 **Pale, pallid, ashen, ashy, wan, livid** agree in meaning devoid of natural or healthy color (as a complexion) or deficient in vividness or intensity of hue (as a specific color). **Pale** is the least rich in implications and connotations of these words; it merely implies relative nearness to white and deficiency in depth and brilliance of coloring; as, his face grew *pale*; the *pale* pink of a rose; the sea is a *pale* green in this light. **Pallid** adds to *pale* the suggestions of deprivation, rather than absence, of color and of an abnormal condition, such as weakness or faintness, or intense weariness; thus, one's cheeks may be naturally *pale* (better than *pallid*); his *pallid* (more expressive than *pale*) face reveals the strain he has been under; "Trembling limbs and *pallid* lips" (*Shelley*); "Its little smoke, in *pallid* moonshine, died" (*Keats*). **Ashen** and **ashy** definitely suggest not only the pale gray color of ashes but often, also, that of the skin in death. A thing described as *ashen* or *ashy* may therefore be said to be dead or ghastly pale; as, "The skies they were *ashen* and sober" (*Poe*); "the *ashen* hue of age" (*Scott*); "Oft have I seen a timely-parted ghost, Of *ashy* semblance" (*Shak*); "Mr. Cruncher, who was all in a tremble... with an *ashy* and solemn visage" (*Dickens*). **Wan** suggests the blanching associated with an unhealthy condition or waning vitality; it usually therefore denotes a sickly paleness; as, "the blasted stars looked *wan*" (*Milton*); "her poor *wan* face with its wistful, pitiful little smile" (*Hewlett*). **Livid** basically means leaden-hued; it is chiefly used of things, especially of human faces that under the influence of something that distorts them have lost their normal coloring and have assumed a dull gray tinge; as, he grew *livid* with rage; the *livid* sky before a storm. "In the greenish glass her own face looked far off like the *livid* face of a drowned corpse at the bottom of a pool" (*Conrad*). The word is also applied to various dull or dun colors when the hue is no more than apparent; as, the *livid* red of the sun seen through a heavy fog; the *livid* yellow of a stormy sky. "His trembling lips are *livid* blue" (*Scott*).

Ana. *Ghastly, macabre: cadaverous, *haggard, worn. 2 **Pale, anemic (or anaemic), bloodless** come into comparison in their extended senses when they are applied to things and mean weak and thin in substance or in vital qualities, as though drained of blood. **Pale** stresses deficiency in qualities necessary to give a thing its true color, or character. Sometimes it connotes lack of vigor, force, or energy; as, "The French... Shake in their fear and with *pale* policy Seek to divert the English purposes" (*Shak.*); more often, especially in modern use, it implies inadequacy or failure to measure up to the requirements of a type or standard. "I choose to wear you [his love] stamped all over me... That *pale* loves may die out of their pretence" (*Browning*). "Even philosophy, unless you count the *pale* work of Boethius—real philosophy had... nearly perished [in the Dark Ages]" (*Quiller-Couch*). "Dropping a *pale* smile on him she drifted away" (*E. Wharton*). **Anemic**, literally used to describe persons whose blood is deficient in the number or quality of red corpuscles, in its extended applications to things implies deficiency in the elements that make for vigor or richness, especially intellectual or spiritual vigor or richness. "That *anaemic* secular conception of the universe as a whole which he [Darwin] seems to have accepted" (*H. Ellis*). "The African negro has... joy of life, love of colour, keen senses, beautiful voice, and ear for music—contributions that... might one day prove a tonic to an *anaemic* and art-less America" (*Zangwill*). **Bloodless** stresses the absence of qualities necessary to life or lifelikeness, such as vitality, warmth, color, etc.

"Books are good enough in their own way, but they are a mighty *bloodless* substitute for life" (*Stevenson*).

Ana. *Insipid, wishy-washy, inane, jejune: inadequate, insufficient (see affirmative adjectives at SUFFICIENT): *ineffective, ineffectual.

pall. Cloy, surfeit, *satiety, sate, glut, gorge, surcharge.

palliate. **Palliate, extenuate, gloze, gloss, whitewash, whiten** come into comparison as meaning to disguise artfully or otherwise give a speciously fine appearance to that which is base, evil, erroneous, or the like. **Palliate**, in strict use, stresses the concealing or cloaking, or the condoning of (or an attempt to conceal, cloak, or condone) the enormity of a crime or offense; as, "Retracing thus his frolics ('tis a name That *palliates* deeds of folly and of shame)" (*Cowper*); "We have not endeavored to conceal or even *palliate* his errors" (*Lockhart*); "We cannot... explain away this deliberate act as due to the garrulity of age, or accept the other excuses with which his admirers have sought to *palliate* it" (*L. P. Smith*). The word is also used in reference to other than moral evils in the sense of to disguise the true nature or extent of so as to soften its bad effects; as, "Minds which are keener and wills which are stronger than the average do not rest in 'quiet desperation' *palliated* by illusion" (*J. W. Krutch*); "When... Sophia observed a fault in the daily conduct of the house, her first impulse was to go to the root of it and cure it, her second was to leave it alone, or to *palliate* it by some superficial remedy" (*Bennett*). **Extenuate** (as here considered: see also THIN) in very precise use refers not only to crimes and offenses but also to one's guilt: the term implies the aim to lessen, as by excuses or the like, the seriousness or magnitude of the crime, offense, or guilt; as, "When you shall these unlucky deeds relate, Speak of me as I am; nothing *extenuate*. Nor set down aught in malice" (*Shak.*); "These, however varnished, however coloured over, however *extenuated* or diminished... will in the event feel the wrath of God" (*W. Paley*); "he may... have somewhat overpraised the virtues, and too much *extenuated* the faults, of Bolingbroke" (*T. S. Eliot*). But the term is often, even by good writers, used in the sense of to make excuses for; as, "She had never forgiven Cromwell the execution of the martyr Charles; and to *extenuate* the conduct of the great Roundhead captain, was to make Mrs. Doria despise and detest you" (*Meredith*); "The fact that Soranzo is himself a bad lot does not *extenuate* her [his wife's] willingness to ruin him" (*T. S. Eliot*). **Gloze** and **gloss**, usually followed by *over*, imply an aim to veil as by specious comments, by flattering talk, or by any other more or less light dissembling, the true harshness, unpleasantness, or disagreeableness of something: often, the word suggests a representation of that which is actually disagreeable as more or less agreeable or as not distinctly unpleasant; *gloze*, however, is usually more derogatory than *gloss*; as, the explorer has succeeded in *glossing* over the hardships he endured; "With the tongue of flattery *glossing* deeds which God and Truth condemn" (*Whittier*). **Whitewash**, and less often (especially in colloquial or journalistic use) **whiten**, imply an attempt to cover up a crime, a serious defect or fault, a person's guilt, or the like, by some means or other such as a superficial investigation, or a perfunctory trial, or a special report, that leads to a seeming acquittal or exoneration or that gives the person or persons accused an appearance of innocence or blamelessness; as, "A poet and an author will go as far in *whitewashing* a munificent tyrant (*Walpole*); "By selecting the evidence any society may be relatively blackened, and any other society relatively *whitened*" (*H. Spencer*).

Ana. Mitigate, alleviate, lighten (see RELIEVE): con-

done, *excuse; *moderate, qualify, temper: cloak, mask, *disguise, dissemble.

pallid. *Pale, ashen, ashy, wan, livid.

palpable. 1 *Perceptible, sensible, tangible, appreciable, ponderable.

Ana. *Apparent, ostensible, seeming: believable, credible, colorable, *plausible.

Ant. Insensible.

2 Plain, clear, *evident, apparent, manifest, patent, obvious, distinct.

Ana. *Sure, certain, positive: *noticeable, remarkable, striking, arresting.

Ant. Impalpable. — **Con.** *Doubtful, dubious, questionable, problematical.

palpitate. Beat, throb, *pulsate, pulse.

Ana. Vibrate, oscillate, fluctuate, *swing, sway.

palpitation. Beat, throb, pulsation, pulse. See under PULSATE, *v*.

Ana. Vibration, oscillation, fluctuation, swinging, swaying (see corresponding verbs at SWING).

palsy. *Paralysis, apoplexy, stroke, shock.

palter. *Lie, prevaricate, equivocate, fib.

Ana. Evade, elude, *escape: *trifle, dally.

paltry. Trifling, trivial, *petty, puny, measly, picayunish, picayune.

Ana. *Contemptible, despicable, sorry, scurvy, cheap, beggarly: abject, ignoble, *mean: *base, low, vile.

pamper. *Indulge, humor, spoil, baby, mollycoddle.

Ana. Gratify, tickle, regale, *please: fondle, pet, *caress, dandle.

Ant. Chasten.

pandect. *Compendium, syllabus, digest, survey, sketch, précis, aperçu.

pandemonium. Uproar, *din, hullabaloo, babel, hubbub, racket.

pander. *Cater, purvey.

Ana. Trickle, toady, *fawn, cringe: gratify, tickle, regale, *please.

panegyric. Tribute, eulogy, *encomium, citation.

Ana. Commendation, applauding or applause, complimenting or compliment (see corresponding verbs at COMMEND): acclaiming or acclaim, laudation, praising or praise, extolling or extollation (see corresponding verbs at PRAISE).

pang. *Pain, ache, throe, twinge, stitch.

Ana. Agony, *distress, suffering: anguish, *sorrow, grief, heartache: torturing or torture, tormenting or torment (see corresponding verbs at AFFLICT).

panic. Terror, horror, trepidation, consternation, dismay, alarm, fright, dread, *fear.

Ana. Agitation, upsetting or upset, perturbation, disquieting or disquiet, discomposing or discomposure (see corresponding verbs at DISCOMPOSE).

Con. *Confidence, assurance, self-possession, aplomb: *equanimity, composure, sang-froid.

pant. Aspire, *aim.

Ana. Thirst, hunger, *long, yearn, pine: crave, covet, *desire, wish, want.

pantaloon. *Fool, jester, clown, antic, buffoon, zany, merry-andrew, harlequin, comedian, comic, stooge.

paper. *n.* 1 **Paper, instrument, document** are here compared in their most general senses as meaning a writing (often typed, sometimes printed) that is of value to its owner or to others who come after him, as a source of information, proof of a right or contention, or the like. **Paper** is the most general term, applicable to any of the letters, deeds, certificates, writs, etc. (*papers*, in general), that are filed away for future use or reference; as, state *papers*; "A peculiar difficulty I have experienced in

dealing with Lord Macaulay's private *papers*" (G. O. Trevelyan); "it was not until I was forty that my father put into my hands a few old family *papers* which furnished clues to an investigation of my more remote ancestry" (H. Ellis). **Instrument** is a legal term applicable only to a paper (such as a deed, a writ, a will, a contract, or the like) that is made and executed according to the terms of the law, as concrete evidence of a transfer of property, the enforcement of a judgment, one's decisions as to who shall inherit one's property, the terms of an agreement, or the like; as, "[The slave's white] father executed certain *instruments* to manumit him" (Ch. Just. Taney). **Document**, as here compared (see also DOCUMENT, 1), applies to any legal instrument or to any original or authentic copy of a letter, a record, or other paper that may be used as a source of information, evidence, or proof; as, the *documents* to be used by the prosecution have been put in a very safe place; "Her [Lady Byron's] letters I sent back except those of the quarreling correspondence, and those, being *documents*, are placed in the hands of a third person" (Byron).

2 Article, *essay, theme, composition.

par. *n.* Norm, *average, mean, median.

par. *adj.* Mean, median, average. See under AVERAGE, *n*.

parable. *Allegory, myth, fable, apologue.

parachronism. *Anachronism, metachronism, prochronism.

parade. *n.* *Display, array, pomp.

Ana. Showiness, ostentatiousness or ostentation, pretentiousness, pompousness (see corresponding adjectives at SHOWY).

parade. *v.* Flaunt, expose, display, exhibit, *show.

Ana. *Reveal, disclose, divulge: *declare, proclaim, publish, advertise: vaunt, *boast, brag, gasconade.

Con. Cloak, mask, *disguise, dissemble.

paradigm. *Model, example, pattern, exemplar, ideal, beau ideal, standard, mirror.

paradox. **Paradox, antinomy, anomaly** are not synonyms but they all involve the idea of expressing or revealing an inner or inherent contradiction and are therefore not always clearly distinguished or correctly used. A **paradox** is primarily a statement or proposition which contains a contradiction yet which, absurd as it seems to be, may still be true and in accordance with the facts and common sense. "The perfectly bred man is born, not bred, if the *paradox* may be permitted" (Brownell). By extension, a *paradox* is a situation which is known to exist, yet which when described or put in words seems incredible because it involves a logical contradiction. "His [Horace's] own phrase of 'golden mediocrity' expresses with some truth the *paradox* of his poetry; in no other poet, ancient or modern, has such studied and unintermitted mediocrity been wrought in pure gold" (J. W. Mackail). "The old will perennially become new at the hand of genius. That is the *paradox* of art" (Loves). An **antinomy**, in philosophical use, is a contradiction between two laws, principles, or conclusions, both of which are held on good grounds or are correctly inferred from the same facts or premises; thus, the conclusions that every material thing can be explained by mechanical causes and that some material things cannot be explained unless a final cause is postulated, present an *antinomy*, but in the opinion of Kant both can be accepted as rules regulative of experience. In loose general use, the term is often applied to one thing that contradicts another thing and is irreconcilable with it. "Form and expression . . . should stand toward one another not as clashing *antinomies* but as reconciled opposites" (Babbitt). In discriminating general use, how-

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

ever, an *antinomy* is an irresolvable conflict (at least in the light of present knowledge) of principles, beliefs, forces, tendencies, aspirations, and the like. "A mind that is not naturally analytical, and conscious of the *antinomies* of existence" (*Amer. Speech*). "Every dogma is but one side of an inevitable *antinomy*" (*H. Cushing*). "In Greek religion... these two tendencies are also in evidence, the one working towards particularism, the other towards a wider Pan-Hellenic unity... the Greeks—like other ancient peoples—failed to solve the *antinomy*" (*Cambridge Ancient History*). An *anomaly* is something that is contrary to what it should be. For example, it may be an exception, or a contradiction to the rule; it may be a freak, a monster, a sport, or a contradiction to the type; it may be an anachronism or solecism, irreconcilable with its surroundings or conditions; it may be an action, a practice, mood, or the like, that is in effect a denial of what one believes or teaches. "There is no greater *anomaly* in nature than a bird that cannot fly" (*Darwin*). "That he [Mark Twain] remained active and buoyant to the end was... sufficient evidence that his philosophical despair was only an *anomaly*, which had no organic part in the structure of his life" (*Van W. Brooks*). "In Egypt Augustus... had... royal authority... an *anomaly* in the empire" (*Buchan*).

paragon, n. *Paragon, sublimation, apotheosis, phoenix* (or *phenix*), *nonpareil, nonesuch* are here compared as meaning a person or thing of consummate quality or transcendent excellence in its kind. *Paragon* distinctively implies supremacy and incomparability; as, "An angel! or, it not, An earthly *paragon*!" (*Shak.*); "on His left [hand] sat smiling Beauty's *paragon*" (*Keats*); "Mill's book is a *paragon* of expository writing" (*J. A. Macy*); "Hawaii, a *Paragon* throughout the East" (*V. Heiser*). **Sublimation**, in precise use, stresses the absence (or sometimes, the removal) of all that is gross, impure, or earthy. "We need not trace the evolution of prayer from a half-magical incantation to the *sublimation* of petition in 'Thy will be done'" (*Inge*). In loose use, the word is often thought of as a synonym of *quintessence*. "That... *sublimation* of all dismal sounds, the bark of a fox" (*Hardy*). **Apotheosis** is rarely used with precision or with a consciousness of its historical implications. For this reason it is often indistinguishable from *paragon* or *sublimation*; as, "here all is spotless grace, ethereal delicacy... the very *apotheosis* of womanhood" (*Mrs. Jameson*). In very discriminating use, it implies glorification, or such exaltation of a person or thing that he (or it) loses human or earthly character and becomes almost divine or purely ideal; it is therefore correctly applied not only to the product but also to the act of glorification; as, national or racial heroes are often *apotheoses* of the actual men; the *apotheosis* of the state in totalitarian ideology. "Wagner believed that Beethoven's Seventh Symphony... was an *apotheosis* of the dance" (*H. Ellis*). "For some time no more was heard of them; then news came of Ellen's marriage to an immensely rich Polish nobleman of legendary fame... She disappeared in a kind of sulphurous *apotheosis*" (*E. Wharton*). **Phoenix**, in its literal sense a mythical bird which after having lived its allotted years burns itself on a pyre and arises from the ashes with renewed youth and beauty, has acquired in the figurative sense in which it is here considered the implication of uniqueness or rarity or apartness from others. "For goddess love, let not him be a *Phenix*, let him not be alone" (*Latimer*). "Lucian is far more deeply concerned at seeing the *phoenix* of modern culture throw herself away on a man unworthy of her" (*Shaw*). **Nonpareil** and **nonesuch** are now rarer in literary use than they once were. Like *paragon* they

imply the absence of a rival in excellence, but they have been debased by their frequent use in names of botanical and other varieties, and in trade names of manufactured articles. "Thou art the best o' the cut-throats: yet he's good That did the like for Fleance: if thou didst it, Thou art the *nonpareil*!" (*Shak.*). "The giddy people had cried him up for a *nonesuch*" (*Cotton Mather*).

paragraph. *Paragraph, verse, article, clause, plank, count* are here compared only as denoting one of the several and individually distinct statements of a discourse or instrument, each of which deals with a particular point or item. *Paragraph* primarily refers to a typographical division, usually indicated by beginning on a new line, and usually by indenting the first word, or by the use of ¶, but it also is applicable to a similar division in writing or typing. In rhetorical use, the term usually implies a number of sentences which comprise a unit that coherently develops a topic or point, especially one of the subordinate topics or points of an essay, an argument, or the like. In more general use, brief, clear, or pointed statement of a single idea rather than its expansion and adequate exposition is stressed; the term is often used where statements follow in serial or numbered order and are neither developed individually nor logically related to each other; as, see *paragraph 4* of the accompanying instructions; the witty *paragraphs* of a popular columnist. **Verse**, as here considered (see also *VERSE*, 1), is applied specifically to one of the numbered paragraphs of the Bible, especially as printed in the Authorized and Douay versions; as, Isaiah, chapter v, *verses 23-25*. **Article** may or may not imply paragraph arrangement of each point or item, but it does imply that each is a distinct yet essential member of a whole. In its more common use it is applied to a statement that stands out distinctly, as, for example, one of the stipulations in a contract, or one of the doctrines in a creed, or one of the provisos of a statute; thus, the *Thirty-nine Articles* are the doctrines to which a clergyman of the Anglican Communion subscribes before being admitted to holy orders; the *articles* of the Apostles' Creed are not paragraphs or sentences, but brief phrases naming each of the dogmas professed by those Christians who hold this creed; the *articles* of an indenture, that is, of an agreement by which an apprentice is bound to a master, are the specific terms or conditions of that agreement. However, in some instruments, such as the Constitution of the United States of America, *article* designates one of the larger and more inclusive divisions, comprising many *articles* in the narrower sense. Therefore, one usually speaks of a specific rule, regulation, specification, stipulation of that document, or of other constitutions, as a **clause**. *Clause* is also used more often than *article* in reference to a will, a deed, and a legislative bill, and with little difference in frequency in reference to a contract, a statute, or similar instruments; as, he added two *clauses* to his will before signing it; strike out *clause 5* of the agreement. **Plank**, originally an Americanism, though now found in British use, is applied only to an article in a program, as something that those who accept that program implicitly agree to carry out if possible. It is chiefly used in designating one of the specific proposals or pledges in the platform of a political party; as, the speaker argued for a platform with *planks* that were both specific and feasible. **Count** is the legal designation for a particular allegation or charge in a declaration or indictment; as, to try the indicted man on two *counts*.

parallel, adj. Analogous, comparable, *similar, like, alike, identical, akin, homogeneous, uniform.

Ana. *Same, identical, equal, equivalent: correspondent, correlative (see *RECIPROCAL*).

parallel, n. 1 *Comparison, contrast, antithesis, collation.

Ana. *Likeness, similarity, resemblance, similitude.

Con. *Dissimilarity, unlikeness, difference, divergence.

2 **Parallel, counterpart, analogue, correlate** are comparable when they denote a person or thing that corresponds in essentials to another person or thing, or closely resembles the latter in the points under consideration. **Parallel**, in very precise use, is the preferred term when the two things compared are so like each other that their lack of divergence suggests two parallel lines: it is therefore used frequently in negative expressions; as, we shall seek in vain a *parallel* for this situation; it is hard to find a *parallel* for this mode of procedure. "None but thyself can be thy *parallel*" (*Pope*). Sometimes, especially when actual comparison is implied, the word suggests that the two things follow a similar course, order, or the like; as, the life of any one dictator offers a close *parallel* to that of any other. **Counterpart**, because it was originally applied to either of the two parts of an indenture, or a document containing an agreement written in duplicate and later divided between the parties, often suggests a complementary, and sometimes an obverse, relationship; as, the two halves of a globe are *counterparts* of each other. More commonly, however, the word implies a duplication, especially in another sphere, or age, or language, or the like; as, several French words such as "distract" have been anglicized because they had no *counterparts* in English; synthetic chemistry has produced many a drug or perfume that has no *counterpart* in nature. "He saw that there was no mood of the mind that had not its *counterpart* in the sensuous life" (*Wilde*). **Analogue** usually implies a more remote likeness than the preceding words and usually suggests comparison with something familiar and tangible for the sake of clarifying an explanation or enforcing an argument. Like *counterpart*, it often involves reference to something in another sphere, or order, or genus; as, the gill in fishes is an *analogue* of the lung in quadrupeds. "Boileau is the *analogue* of Pope in French literature" (*Hallam*). "Christian progressives... tried to find some warrant for it [their belief in a law of progress] in the New Testament, where its only *analogue* is the apocalyptic Messianism which we find St. Paul and the author of the Fourth Gospel cautiously discarding" (*Inge*). **Correlate** retains its primary implication of correspondence, but does not, as here compared, retain that of a complementary relationship. A thing which is a correlate of another, in the sense under consideration, is what corresponds to it from another point of view or in a different order of viewing; thus, the scientist asks what is the physical *correlate* of the rainbow; the psychologist seeks the *correlate* of thought in the physical events in the cortex of the brain; for the ideas expressed by many words there are no objective *correlates*; affinity is the *correlate* in chemistry of the force the physicist calls attraction.

paralogism. *Fallacy, sophism, sophistry, casuistry.

paralogistic. Fallacious, sophistical, casuistical. See under FALLACY.

paralysis, palsy, apoplexy, stroke, shock are not all synonyms of each other but they are frequently confused by laymen. **Paralysis** designates an effect rather than a cause; it is the term used to denote loss of power to move (*motor paralysis*), or of power of sensation in (*sensory paralysis*), any part of the body; the loss may occur suddenly (as usually in *hemiplegia*, paralysis of one lateral half of the body, or in *paraplegia*, paralysis of the lower half of the body) or it may be progressively effected (as in *creeping paralysis*). **Palsy** is a close synonym of *paralysis*, but in popular use it generally connotes shak-

ing or tremulousness of the muscles in a part or the whole of the body. **Apoplexy**, or its more popular designation **stroke**, names a sudden diminution or loss of consciousness and paralysis, caused either by a cerebral hemorrhage or by a clot or embolus in an artery that prevents the flow of blood into a part of the brain. Paralysis is often the result of apoplexy, but it may also be caused by an injury to the spinal cord or to other nervous tissues, as by disease or by chemical or bacterial poisons. **Shock** is another popular term for *apoplexy*, but its use is not approved by physicians, because the word has a very different denotation in medicine, always indicating a profound depression of the vital processes of the body.

paramount. Preponderant, preponderating, predominant, *dominant, sovereign.

Ana. *Supreme, surpassing, pre-eminent, superlative: capital, foremost, principal, main, leading, *chief.

parapet. Rampart, breastwork, *bulwark, barbette, bastion.

paraphernalia. Apparatus, *equipment, machinery, outfit, tackle, gear, matériel.

paraphrase, n. Metaphrase, construe, version, *translation.

parasite, n. **Parasite, sycophant, favorite (or favourite), toady, lickspittle (or lickspit), bootlicker (or bootlick), hanger-on, leech, sponge (or sponger)** are here compared as denoting a person who seeks support and sustenance (usually physical, but sometimes social or intellectual) from another without right or justification. **Parasite** (etymologically, [one] eating beside or at the table of another) applies strictly to one who is fed and, often, clothed by another without giving any services in return; as, "The poorer citizens [of ancient Rome] were little more than *parasites*, fed with free state bread, amused by free state shows" (*Buchan*). It is in a similar sense that *parasite* is used in the biological sciences, when the term denotes an animal or plant that lives on, in, or with, another animal or plant and, usually, preys upon it. In current extended use, *parasite* is often applied to a person who, like a biological parasite, clings close to a person of wealth, power, and influence and derives some great personal advantage from that association (as, "New friends who had faith in her ideas, as well as new *parasites* who hoped to profit by them, gathered around her" —*H. Ellis*), or who is as useless and unnecessary a member of society as the biological parasite is to its host (as, to regard all idle inheritors of wealth as *parasites*). **Sycophant** (originally, an informer or traducer) applies strictly to one who clings close to a person of great wealth, power, or influence, winning his favor by fawning attentions, flattery, and adulation; as, "The young monarch was accompanied by a swarm of courtly *sycophants*" (*Prescott*). "In France, the cleverest boys go to the École Normale Supérieure and do not mix any longer with the average. This plan certainly has advantages. It prevents the intellectuals from having their nerve broken and becoming *sycophants* of the average Philistine" (*B. Russell*). **Favorite**, in the specific sense here considered, applies to a person who is the close associate and intimate friend of a king, a prince, or the like, and who is unduly favored by him; often, the term carries in addition suggestions of parasitism or sycophancy on the part of the favorite, or of the wielding of undue influence by him; as, "like *favourites*, Made proud by princes" (*Shak.*); "[The Roman emperor] Committing to a wicked *favourite* All public cares, and yet of him suspicious" (*Milton*). **Toady stresses** a truckling to the rich, powerful, or influential. It sometimes implies parasitism or sycophancy, but more often suggests the servility and

snobbery of a social climber; as, he was a *lady* in the presence of those he regarded as his superiors, and a bully when surrounded by those he thought of as his inferiors. *Licksapittles*, or the less common *lickspit*, and *bootlicker*, or *bootlick* (the latter pair American slang), are extremely contemptuous synonyms of *sycophant* or *toady*: all heighten the suggestion of abject servility in fawning or truckling; as, "Stage-coachmen were... comrades to gentlemen, *licksapittles* to lords" (*J. Hawthorne*); he's not a friend of B—'s: a *bootlicker*—nothing more. *Hanger-on* is a colloquial general term for anyone who wins contempt for his close adherence to another and dependence on him; as, "He is a perpetual *hanger-on*: yet no-body knows how to be without him" (*Swift*); political *hangers-on*, dancing attendance on this party boss or that, trying to obtain sinecures. *Leech* applies to a *hanger-on*, especially to a parasite, who resembles, both in his close clinging and in his power to bleed for his own advantage, the blood-sucking worms called *leeches*; as, "the spendthrift and the *leech* That sucks him" (*Cowper*). *Sponge* (now a colloquial term), or *sponger*, applies usually to a parasite, but it stresses his laziness, dependence, and greed, and indifference to the discomforts he may be causing; as, "I will do any thing, Nerissa, ere I'll be married to a *sponge*" (*Shak.*); the school club refused to elect to membership any one who they feared might become a *sponger*.

Ana. Fawner, cringer, truckler (see corresponding verbs at FAWN).

parcel, n. 1 *Part, portion, piece, detail, member, division, section, segment, sector, fraction, fragment.

2 *Bundle, bunch, pack, package, packet, bale, fardel.

parcel, v. *Apportion, portion, ration, prorate.

Ana. *Allot, assign, allocate, apportion: *grant, accord, award.

parch. *Dry, desiccate, dehydrate, bake.

Ana. Sear, scorch, char, *burn: shrivel, wither, *wither.

pardon, v. Forgive, remit, *excuse, condone.

Ana. *Free, release, liberate: *confess, shrive, absolve: acquit, absolve, *exculpate.

Ant. Punish. — **Con.** *Penalize, fine, amerce: discipline, correct, chasten, castigate, chastise (see PUNISH).

pardon, n. Pardon, amnesty, absolution, indulgence come into comparison in their legal and ecclesiastical senses. **Pardon**, which is the comprehensive term, denotes a release not, as is often mistakenly supposed, from guilt, but from the penalty due for a transgression of secular or spiritual law. Thus, in civil and military affairs, a *pardon* usually implies a release from prison, or from the payment of a fine, or from a sentence of death, and permission to go scot free, though not acquitted. When a pardon is extended to an entire class, such as an insurgent group, or to an entire community, it is called an *amnesty*; as, a general *amnesty* and liberty of conscience were promised to parliament by Charles II in the Declaration of Breda (1660). *Amnesty* often, but not invariably, carries its etymological implication of oblivion, and suggests not only that past offenses will go unpunished, but that they will be forgotten. When, in ecclesiastical use, especially in the use of the Roman Catholic Church, a pardon is extended for sins confessed and atoned for according to the laws of the Church, it is specifically called *absolution* when it implies that the eternal punishment for sin has been remitted in the sacrament of penance, and it is specifically called *indulgence* when it implies that the temporal punishment (that is, punishment by heavy penances or in Purgatory) has in some degree been remitted by the performance of further acts of piety prescribed by the Church. In older English, *pardon* often equaled *indulgence*, but the former

is seldom found in this sense today except as a translation of the French *pardon* or in derivatives such as *pardoner* (the medieval church official). The implication of permission to commit sin which *indulgence* acquired in the late sixteenth century was the result of post-Reformation misunderstanding of the doctrine and is not found today in informed usage.

pardonable. *Venial.

pare. Peel, *akin, decorticate, flay.

parental. Parental, motherly, fatherly, maternal, paternal, despite the difference in sex suggested by some of the terms, come into comparison as meaning of, relating to, or characteristic of a parent. **Parental** carries no specific or distinguishing implications and is therefore the ordinary uncolored term; as, *parental* authority; *parental* duties; *parental* rights. **Motherly** and **fatherly** carry implications of qualities of character or of appearance associated in the first case with the typical (or often, ideal) mother, and in the second the typical (or often, ideal) father. **Motherly**, therefore, often suggests tenderness, and comprehension of or sympathy with the natures or difficulties of children (as, "When I see the *motherly* airs of my little daughters when playing with their puppets"—*Addison*), or the mature, often buxom, appearance of a woman who has competently reared many children (as, "a brisk, wholesome, *motherly* body"—*L. Stephen*). **Fatherly** usually suggests affection, protectiveness, wisdom in advising, and the like (as, to take a *fatherly* interest in a group of orphans; to give the departing son a *fatherly* blessing and *fatherly* counsel), or a benign, often a venerable, appearance (as, "See how the tears run down his [Cranmer's] *fatherly* face"—*Tennyson*). **Maternal** and **paternal** often differ little from **parental** except in their definite indication of sex; as, *maternal* (or *paternal*) authority; *maternal* (or *paternal*) love; *maternal* (or *paternal*) responsibility. They are, however, the preferred terms when relationship on or through the mother's or father's side is indicated; as, one's *paternal* grandfather; ancestors on the *maternal* side; one's *maternal* great-aunt. Oftentimes, also, *maternal* and *paternal* are used in place of *motherly* and *fatherly*, especially when that which is qualified bears a relation to the fact or state of motherhood or fatherhood rather than to the concept of the ideal or typical father or mother; as, *paternal* obligations; *maternal* fears; the *maternal* instinct; *paternal* emotions.

parkway. *Road, roadway, highway, highroad, street, avenue, boulevard, terrace, drive, thoroughfare, byway, lane, alley, alleyway.

parley. Treat, negotiate, *confer, commune, consult, advise.

Ana. *Discuss, debate, dispute, argue, agitate: converse, talk, *speak.

parody, n. Travesty, *caricature, burlesque.

Ana. Skit, squib, lampoon, *libel.

parody, v. Travesty, caricature, burlesque. See under CARICATURE, n.

paroxysm. Spasm, convulsion, *fit, attack, access, accession.

parsimonious. Niggardly, penurious, *stingy, close, closefisted, tight, tightfisted, miserly, curmudgeonly, cheeseparing, penny-pinching.

Ana. Avaricious, *covetous, grasping, greedy: *sparing, frugal: *mean, ignoble, sordid, abject.

Ant. Prodigal. — **Con.** *Profuse, lavish: *liberal, munificent, bountiful, generous.

part, n. Part, portion, piece, detail, member, division, section, segment, sector, fraction, fragment, parcel are here compared as meaning something which is less than

the whole but which is either considered as apart from the rest of the whole or is actually separated from it. **Part** is the most comprehensive of these terms: it may be used in place of any of the succeeding words in this group (or even in place of *element*, *component*, *constituent*, or the like: see **ELEMENT**); as, "All are but *parts* of one stupendous whole" (*Pope*); he spent *part* of his life in China; a large *part* of the estate went to the elder son; the cup was broken into three *parts*; "The better *part* of valour is discretion" (*Shak.*). **Portion**, although it denotes a part of a whole, does not always presuppose a compact or integral whole: it may suggest a whole that comprises all of an existing or a possible stock, store, or the like, without any connotation of its assemblage; as, "That best *portion* of a good man's life, His little, nameless, unremembered, acts Of kindness and of love" (*Wordsworth*); "He is a *portion* of the loveliness Which once he made more lovely" (*Shelley*). But *portion* (see also **FATE**) is preferred to *part* when there is the intent to imply determination of amount or quantity, or assignment or allotment, especially of a share; as, a bride's *portion* (i.e., her dowry); to divide a pie into six equal *portions*; "A *portion* of each day was given to this artistic labour" (*Hudson*); "When the plant was set, a *portion* of water, nicely calculated as to quantity, ran down a pipe and was deposited at the plant roots" (*S. Anderson*). **Piece** applies always to a separate or detached part or portion of a whole; thus, a *piece* of bread is a part of a larger whole, such as a loaf or a slice; a *piece* of cloth may be the length of a bolt (i.e., a given number of yards cut from a web and made into a roll), or a length cut from a bolt, a smaller length left after the larger part of that piece has been used, or a bit that serves as a swatch or sample; so, to break a stick of candy into *pieces*; to ask for a small *piece* of the cake. But *piece* so stresses the implication of independence that the term is often applied to a thing that is relatively complete in itself, and has reference to a whole only as it presupposes a mass from which it was taken, a collection of similar or related things, especially as produced by one person, one machine, one factory, or the like; as, the red-hot *piece* of iron upon the blacksmith's anvil; *pieces* of pottery; each *piece* of furniture has been freshly polished; many factory workers are paid by the *piece* (that is, according to the number of pieces made during a week or day); a *piece* of poetry; his *pieces* (that is, short articles) are frequently published in the newspapers. **Detail** (see also **ITEM**) applies to a part chiefly when the presupposed whole is a plan or design, or represents the working out of a plan or design: in this sense the term is used mainly, but not exclusively, in the arts of painting, sculpture, and architecture, and often denotes a small but important part or feature; as, to reproduce a *detail* of a painting; the sculptor's students were set to work, each modeling a *detail* of the Venus de Milo; this blueprint shows the *details* of the façade. In military use, *detail* applies to a small detachment (or sometimes, only one person) assigned to a given piece of work or a given duty; as, "No, not combatants—only *Details* guarding the line" (*Kipling*). **Member**, in general, applies to any part that constitutes one of the units of which a body (a human body, an animal or plant body, a metaphorical body, a construction or structure, such as a chair, a table, a bridge, a building, or, far more often in current use, a body of persons who make up a legislature, a staff, an association, or the like) is comprised; therefore, the term, though it usually implies close association with the body under consideration, also usually implies its separability in thought or in fact; thus, the legs, arms, and head are often specifically regarded as *members* of the human

body; the saddle seat is a distinctive *member* of a Windsor chair; the flying buttress is an important architectural *member* of most of the great medieval Gothic cathedrals; *members* of Congress; the club has 500 *members*; "Now ye are the body of Christ, and *members* in particular" (*1 Corinthians* xii. 27); "The body of the law is no less encumbered with superfluous *members*" (*Addison*). **Division** and **section** apply to a distinct, often a detached, part formed by or as if by cutting or dividing. The terms are often used interchangeably, but *division* is usually, though not invariably, applied to larger parts than is *section*; thus, in military use, a *division* is ordinarily one of the large parts of an army in which all types of military service are represented, so that in a sense it constitutes a self-contained army, whereas a *section* is a small group led usually by a sergeant and composed typically of a headquarters and two or more squads; in education, especially in the United States, a *division* is a group of allied departments (as, the *divisions* of modern languages and of political sciences), whereas a *section* is one of the groups into which a large class of students taking a course is divided (as, there are twenty *sections* of freshman English). Except in technical use, both terms carry no explicit suggestions as to size, extent, or the like: *division*, however, is more often used abstractly than *section*, which tends to be applied to a conspicuously distinct part of a writing, a people, a territory, or the like; as, "It is improper to speak of these different parts of the chemical industry as *divisions*, for the solidarity of the whole does not permit splitting it" (*A. C. Morrison*); a *section* of a chapter; the eastern *section* of the country; the Constitution is divided into *sections*. **Segment** is often preferred to *section* for a part cut off by natural lines of cleavage or necessitated by the nature of the thing's construction or design; as, a *segment* of an orange; a *segment* of a compound leaf; a *segment* of a flywheel; the *segment* of the globe known as the Torrid Zone. In mathematical use, *segment* is distinguished from *sector* in that *segment* refers to any part of a plane or solid figure cut off from the whole by a line or plane (as, a *segment* of a cylinder; a *segment* of a circle is bounded by an arc and a chord) and *sector* refers to any part of a circle bounded by an arc and two radii (as, to divide a circle into six *sectors*). In more general use, *sector* applies to a section that roughly corresponds to a mathematical sector; thus, a *sector* assigned to a commander of a division in war has arbitrary bounds on sides and rear but a front that is as extensive as the range of its guns. **Fraction** and **fragment** both apply to a part that is disconnected from a whole, especially by breaking; but *fraction*, probably by its confusion with the arithmetical sense of that word, usually suggests a negligible part (as, "only a small *fraction* of mankind is capable of enthusiasm for language, for its own sake"—*Inge*; "some little *fraction*...of your enjoyment of tragedy"—*C. E. Montague*), and *fragment* applies to one of the pieces left, as after eating, use, the course of time, or the like (as, "They took up of the *fragments*...twelve baskets full"—*Matthew* xiv. 20; only a *fragment* of a statue or a poem remains). **Parcel**, as here compared (see also **BUNDLE**), is now rarely used except in law and in some idiomatic phrases such as *part and parcel*. In law, it means a piece of land (as, to convey several *parcels* of an estate; to purchase a *parcel* of land); in its archaic general sense, *parcel* differs from *part* in its always implying an undetached or undetachable connection with the whole of which it is a part; as, "[no] *parcel* of the world is denied to man's inquiry and invention" (*Bacon*).

Art. Whole.

part, v. Divide, *separate, sever, sunder, divorce.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. *Detach, disengage: apportion, *allot, allocate, assign: *tear, rend, cleave.

Ant. Cleave.¹ — **Con.** Cling, *stick, adhere: *unite, combine, conjoin.

partake. *Share, participate.

Ana. *Separate, part, divide: take, *receive, accept: *have, hold, own, possess, enjoy: *get, obtain, procure, acquire.

partiality. Prepossession, prejudice, bias, *predilection.

Ana. *Favor, good will, countenance: approving or approval, endorsing or endorsement (see corresponding verbs at APPROVE).

Ant. Impartiality.

participate. *Share, partake.

Ana. *Separate, divide, part: take, *receive, accept: *have, hold, own, possess, enjoy.

particle. 1 **Particle, bit, mite, smitch, smidgen (or smidge), whit, atom, iota, jot, tittle** come into comparison when they mean a very small or insignificant piece or part. **Particle**, which is literally a diminutive of *part*, is used in reference not only to substances which are actually divisible but to those which are only theoretically so because they are intangible or ideal things such as a quality, a state, or a condition; usually it implies an amount within the range of ocular or mental perception; as, a *particle* of matter; he hasn't a *particle* of sense; "a voice from which every *particle* of emotion was painfully excluded" (*Hardy*). **Bit** sometimes retains its etymological suggestion of *bite*, or *mouthful*; as, there isn't a *bit* of food in the house; he hasn't eaten a *bit* today; but, in the sense here considered, it more often suggests the least possible or feasible amount, extent, or degree; as, to own a *bit* of land; he likes it not a *bit*; he is a *bit* of a coward (that is, he has a *bit* of cowardice in his nature).

Mite (a colloquial term) because of its dual reference to *mile*, the tiniest of insects, and to the coin of insignificant value (the widow's mite of *Luke* xxi. 2), may stress either diminutiveness in size or minuteness in amount; as, a *mite* of a boy; a *mite* of a diamond; he hasn't a *mite* of suspicion; I have a *mite* of fear. **Smitch, smidgen** are dialectal words not distinguishable in meaning from *bit* or *mite*. **Whit** is used chiefly in negative phrases in the sense of the least conceivable amount; as, it matters not a *whit*; he hasn't a *whit* of knowledge of the subject.

Atom, with its reference to the scientific atom (see PARTICLE, 2), implies an amount or a size beyond the possibility of further diminution; as, not an *atom* of dust escaped her scrutiny; he exhausted himself to the point where not an *atom* of energy remained. **Iota** and its anglicized form *jot* both imply a minuteness suggestive of the character *iota* [i], the smallest letter of the Greek alphabet; **tittle** implies a minuteness suggestive of a small diacritical mark such as the dot over an *i* or a cedilla under *ç*. In use they are not distinguishable when they mean the smallest or most minute detail; as, he hasn't added a *jot*, an *iota*, or a *tittle* to our knowledge of the subject. "Till heaven and earth pass, one *jot* or one *tittle* shall in no wise pass from the law, till all be fulfilled" (*Matthew* v. 18). **Iota**, however, sometimes denotes an insignificant amount, extent, or degree. "They never depart an *iota* from the authentic formulas of tyranny and usurpation" (*Burke*).

2 **Particle, corpuscle, atom, molecule** are here considered in their commonest current meaning, in chemistry and physics, of a minute (submicroscopic) division of matter. **Particle**, the oldest and most general of these terms, is applied especially to any of certain minute entities which have more specific designations such as *ion, molecule, atom, electron, proton, and alpha particle*. **Particle** is often used to emphasize the idea of indivi-

bility without change of identity, commonly suggesting the ultimate entities (protons and electrons) of which all matter is now believed to be composed. **Corpuscle** differs from *particle* chiefly in suggesting a discrete material entity that possesses the properties characteristic of typical material bodies. The words, however, are close synonyms. "They [alpha particles] are *corpuscles* endowed with charge, with mass, and with velocity" (*Karl K. Darrow*). "Let us assume that all lighted bodies emit *particles* of light, or *corpuscles*, which, falling on our eyes, create the sensation of light" (*Einstein & Infeld*). "When Huyghens argued with Newton on the subject of the nature of light, he condemned Newton's idea that light consisted of a flight of *corpuscles*, on the ground that material *particles* could not possibly travel as fast as light had just been found to move" (*Sir W. H. Bragg*). According to the common modern concept, an *atom* is the smallest particle of an element that can exist either alone or in combination with smaller particles of the same or of a different element; as, an *atom* of hydrogen or of oxygen. **Molecule** denotes the smallest particle of an element or compound that retains chemical identity with the substance in mass. Molecules are usually composed of two or more atoms, either of the same or of different elements; as, a *molecule* of water is composed of two *atoms* of hydrogen and one *atom* of oxygen. *Atom* is sometimes used loosely in place of *molecule*.

particular, adj. 1 *Single, sole, separate, unique, lone, solitary.

Ant. General.

2 Individual, *special, specific, especial, respective, concrete.

Ant. General, universal.

3 Particularized, detailed, itemized, *circumstantial, minute.

Ana. Scrupulous, meticulous, *careful, punctilious.

4 Fussy, squeamish, *nice, dainty, fastidious, finical, pernickety.

Ana. Exacting, demanding, requiring (see DEMAND), strict, *rigid, rigorous.

particular, n. *Item, detail.

Ant. Universal: whole: aggregate.

particularized. Particular, detailed, itemized, *circumstantial, minute.

Ana. Accurate, precise, exact, *correct.

Ant. Generalized.

partisan. *Follower, adherent, disciple, sectary, henchman, satellite.

Ana. Supporter, upholder, backer, champion (see under SUPPORT, v.): helper, aider or aid, assistant (see corresponding verbs at HELP).

Con. Antagonist, *opponent, adversary.

partner. **Partner, copartner, colleague, ally, confederate** agree in denoting an associate. **Partner** implies especially an associate in business, or one of two associates, as in certain games, in a dance, or in marriage. Since *partner* alone implies association, the addition of *co-*, with its implication of association, in *copartner* sometimes adds little or nothing to *partner*; as, *partners*, or *copartners*, in crime. *Copartner*, however, does not tend to be as specialized in application as *partner*, and it often distinctively implies fellow partner; as, "The authority of a *partner* to bind his *co-partners*" (*Encyc. Brit.* 11th ed.), or equality of share; as, "A *copartner* in that sovereignty of the people" (*J. Spence*). **Colleague** implies especially an associate in office or in professional or academic relations. **Ally** and **confederate**, though referable to persons, most frequently denote an associated state or government (for *confederate*, see also ACCOMPLICE). **Ally** suggests a somewhat temporary union for co-operation in

war or in affairs of policy or statecraft; *confederate*, a closer union for strength and solidarity. The latter term often implies a central government or, at least, centralized control of the associated states.

Ant. Rival.

parturition. *Childbirth, delivery, labor, travail, accouchement.

party. 1 *Company, band, troop, troupe.

Ana. Clique, *set, coterie, circle: gathering, collection, assembly or assemblage, congregation (see under GATHER).

2 *Combination, combine, bloc, faction, ring, cabal, junto.

pasquinade, pasquin, pasquill. Lampoon, squib, skit, *libel.

pass, *n.*¹ Passage, *way, route, course, artery.

pass, *n.*² *Juncture, exigency, emergency, contingency, pinch, strait, crisis.

Ana. Situation, condition, *state, posture: plight, *predicament, quandary.

passage. 1 Pass, *way, route, course, artery.

2 Also **passageway**. **Passage, passageway, corridor, hall, hallway, gallery, arcade, cloister, aisle, ambulatory** come into comparison when they designate a typically long, narrow way connecting parts of a building or affording access to a particular room or section in it. **Passage** (see also **WAY**, 1) and **passageway** are the comprehensive terms, interchangeable with any of the others. A **corridor** is a passageway flanked on one or both sides by rooms, apartments, compartments (as, in British use, of a train), offices, or the like, or leading from one part of a building to another. **Hall** and **hallway** are in American use applied to a corridor; the former in both British and American use is also applied to a room that serves as an entrance to a house (see **ENTRY**, 2). A **gallery** (see also **BALCONY**) is a corridor having a continuous row of windows; it may be a part of the building or a verandallike enclosure. An **arcade** is an arched and covered passageway, usually between rows of shops but, sometimes, between the front of a row of shops and the street or an open court. A **cloister** is a similar structure in a monastery or in a building imitating monastic architecture, but it runs along one or more sides of an open court or patio, and is arcaded or colonnaded on the outer side. An **aisle** is, strictly, not a passageway but a part of a church or other building divided from the central part, or *nave*, by a row of columns or piers. In Gothic and Romanesque churches, aisles flank the nave. Since in many modern churches the nave and the aisles contain two rows of pews each, to which access is given by a narrow passageway, the term has been transferred to the passageway; it is also applied to any similar passage flanked by rows of seats, as in an auditorium, a theater, or, in American use, a train. **Ambulatory** is a passageway through which one may walk; it is specifically applied to the cloister of a monastery, and to the curved passageway (loosely the *aisle*) between the choir of a church and the chapels of an apse.

3 *Strait, straits, sound, channel, narrows.

passing, *adj.* *Transient, transitory, ephemeral, momentary, fugitive, fleeting, evanescent, short-lived.

passing, *n.* *Death, decease, demise.

passion, *n.* 1 Suffering, agony, dolor, *distress, misery.

Ana. *Trial, tribulation, cross, visitation, affliction.

2 *Feeling, emotion, affection, sentiment.

Ana. *Inspiration, enthusiasm, frenzy, furor: *ecstasy, rapture, transport.

3 Lust, concupiscence, appetite, appetence, *desire, urge, yen.

Ana. Craving, coveting (see **DESIRE**, *v.*): longing, yearning, hungering or hunger, thirsting or thirst (see corresponding verbs at **LONG**): panting, aspiring, aiming (see **AIM**, *v.*).

4 **Passion, fervor (or fervour), ardor (or ardour), enthusiasm, zeal** agree in denoting intense, high-wrought emotion. **Passion**, as here compared, implies an overwhelming or driving emotion; it may be either the most abstract or the most concrete of these terms. It may be used without implication of a specific emotion; thus, a poet without *passion* is a poet incapable of feeling or of displaying vehement, agitating, or soul-stirring emotion; to be in the grip of *passion* is to be swayed by violent emotion; but without a hint from the context the nature of the emotion remains unknown. On the other hand, *passion* may designate intense erotic love, or often, but far from always, lust; as, "The red rose whispers of *passion*. And the white rose breathes of love" (*J. B. O'Reilly*): it may designate violent rage; as, she flew into a *passion*. "I am very sorry, good Horatio, That to Laertes I forgot myself. . . But, sure, the bravery of his grief did put me Into a towering *passion*" (*Shak.*). **Fervor** and **ardor** both imply the kindling of emotion to a high degree of heat, but *fervor* suggests rather a steady glow or burning and *ardor* a restless or leaping flame. *Fervor* is associated therefore with emotions that express themselves in prayer, contemplation, devotion, preaching, in works of art, or the like; *ardor*, with emotions that express themselves in eager longings, zealous efforts, or the like; as, the *fervor* of a nun; the *ardor* of a missionary; to exhort with *fervor*; to dampen one's *ardor*. "The hieratic Buddhist art was to become formal and gradually lose the *fervour* of its inner life" (*Binyon*). "In the prints of Harunobu there is an intense sympathy with youth, with its shyness, its tremulous *ardours*" (*Binyon*). **Enthusiasm** often comes very close to *ardor*, but it differs from the latter chiefly in its emphasis on the rational grounds for the emotion, such as thoroughgoing admiration for a person or thing, conviction of the worthiness of the cause or end, or the like. *Ardor* may suggest aspiration without a clearly envisioned goal, but *enthusiasm*, correctly used, always implies an objective, a cause, an object of devotion, or the like; thus, a teacher may stimulate *ardor* in a pupil without necessarily directing the latter's emotion into a definite channel, but he stimulates *enthusiasm* only when he provides the pupil with something concrete to admire, to follow, to fight for. "He showed in this cause not only the *enthusiasm* of an idealist, but the sagacity of a practical leader" (*Inge*). **Zeal**, which etymologically implies jealousy and emulation, has now lost these connotations, though it still retains a suggestion of a goading or driving passion equivalent to them in power. In current English, that passion is great ardor or enthusiasm for a cause or end. Coupled with this implication is that of energetic and unflagging activity in the service of a cause or in the pursuit of an end; as, "With all the *zeal* Which young and fiery converts feel" (*Byron*); "It took the Franciscan movement about twenty years to lose the *passion* of its early *zeal*" (*A. Huxley*); "[Shaftesbury's] health was further affected by his *zeal* in public affairs as well as his enthusiasm in study" (*H. Ellis*).

Ana. *Ecstasy, rapture, transport: *anger, rage, fury, wrath: eroticism, amorousness (see corresponding adjectives at **EROTIC**).

passionate. *Impassioned, ardent, fervent, fervid, perfervid.

Ana. *Intense, vehement: impetuous, headlong, *precipitate, abrupt: excited, quickened, stimulated (see **PROVOKE**).

passive. *Inactive, inert, idle, supine.

Ana. *Impassive, phlegmatic, stolid, apathetic.

Ant. Active. — **Con.** Live, operative, dynamic (see ACTIVE).

pastoral. *Rural, rustic, bucolic, georgic, Arcadian, agrestic, geponic.

pasture, v. Graze, *feed, nourish.

pat, adj. *Seasonable, timely, well-timed, opportune.

Ana. Apt, happy, felicitous, appropriate, fitting (see FIT, *adj.*): pertinent, apposite, apropos, applicable (see RELEVANT).

patch, v. *Mend, repair, rebuild, remodel.

Ana. Emend, remedy, redress, amend, *correct: fix, *adjust, regulate.

patent. *Evident, manifest, distinct, obvious, apparent, palpable, plain, clear.

Ana. *Noticeable, conspicuous, salient, prominent: *flagrant, glaring, gross, rank.

Ant. Latent. — **Con.** *Imperceptible, insensible, imperceptible: hidden, concealed, secreted (see HIDE, *v.*).

paternal. *Parental, fatherly, maternal, motherly.

pathetic. Poignant, affecting, *moving, touching, impressive.

Ana. *Pitiful, piteous, pitiable: plaintive, *melancholy, doleful.

Ant. Comical.

pathogen. *Germ, microbe, bacterium, bacillus, virus.

pathos, pathos, poignancy, bathos are here compared as denoting the quality found in human situations, or especially in works of art or literature, which moves one to pity or sorrow. **Pathos** is the common term in critical and literary use: because of its early and long-continued association with aesthetics it often implies the arousing of emotions which give pleasure rather than pain and it suggests the detachment of an observer rather than personal involvement in the perturbing events or situations; as, "*Pathos* is the luxury of grief; and when it ceases to be other than a keen-edged pleasure it ceases to be *pathos*" (*Palmore*). Often, also, *pathos* implies not so much an effect produced on the person who sees, hears, or reads, as the art, device, or trick employed by the writer, speaker, artist, or other person seeking to produce such an effect; as, "He passed without an effort from the most solemn appeal to the gayest raillery, from the keenest sarcasm to the tenderest *pathos*" (*J. R. Green*); "My poor children, what had I ever done to you that would drive you to such a step? The touch of *pathos* was all that Jane needed to stiffen her" (*M. Austin*). **Poignancy** is now often preferred by literary and art critics to *pathos* because it carries no suggestion of artificiality and centers the attention on the genuineness of the thing's emotional quality and of the emotions it arouses: it also specifically implies a power to pierce the mind or heart so that the reader, hearer, or observer feels with pain as well as with aesthetic pleasure the emotion aroused whether it be pity or sorrow or any other overwhelming emotion; as, "the most famous of the women-poets of Japan, whose verse expresses with peculiar *poignancy* a sense of the glory of beauty and the *pathos* of it" (*Binyon*); "Out of these illustrious atoms [words]... were made all the glow and intensity of... eloquence and the sweet *poignancy* of songs" (*C. E. Montague*). **Bathos** is often applied to a false or pretentious *pathos*, especially a strained *pathos* that by its absurdity arouses laughter rather than tears.

patience. *Patience, long-suffering, long-sufferance, longanimity, forbearance, resignation* come into comparison when they mean the power to endure or a capacity for enduring without complaint that which is

disagreeable or requires effort. **Patience** stresses calmness or composure, not only under suffering or under provocation, but in awaiting an outcome that seems unduly or inordinately delayed, or in performing a task that makes severe demands upon one's attention; as, "Upon the heat and flame of thy distemper Sprinkle cool *patience*" (*Shak.*); "In your *patience* possess ye your souls" (*Luke xxi. 19*); "Let us run with *patience* the race that is set before us" (*Hebrews xii. 1*); "I shall never lose the habit of giving myself away to you. You've brought it on yourself by your goodness and *patience*" (*C. MacKenzie*). **Long-suffering** (or, now less often, **long-sufferance**) and **longanimity** imply extraordinary patience under provocation or trial. The former is the common term found both in literary and in colloquial use. In colloquial use, it sometimes also suggests undue meekness or submissiveness; as, "It shows much *long-suffering* in you to put up with him, and keep him in your employ" (*Hardy*); "The *long-sufferance* of the army is almost exhausted" (*Washington*). The latter term more often than the former names a virtue, and so is chiefly found in abstract use; as, "in Isaac such simplicity, such *longanimity* in Jacob" (*Hooker*). **Forbearance** (see FORBEARING) adds to *long-suffering* the implication of restraint in the expression of one's feelings or in exacting punishment: it therefore often suggests toleration, for the sake of peace, of something that merits censure or castigation; as, "My lord Kew has acted with great *forbearance*, and under the most brutal provocation" (*Thackeray*). **Resignation** implies a submission to suffering or evil or an acceptance of it because it must be endured or cannot be escaped: it sometimes connotes patience arising from submission to what is believed to be the Divine Will, but often it implies a stoical or fatalistic, rather than a religious, attitude; as, "*Resignation* superadds to *patience* a submissive disposition...; it acknowledges both the power and the right of a superior to afflict" (*T. Cogan*); "In *resignation*... lies... the only serenity possible in this life of struggle and of combat" (*Mrs. H. Ward*); "For a modern American or Englishman, waiting is a psychological torture. An Indian accepts the blank hours with *resignation*" (*A. Huxley*). **Ana.** Perseverance, persistence (see corresponding verbs at PERSEVERE): *fortitude, backbone, pluck, grit, sand, guts: *equanimity, composure.

Ant. Impatience.

patois. *Dialect, vernacular, lingo, jargon, cant, argot, patter, slang.

patrician. *Gentleman, aristocrat.

patrimony. *Heritage, inheritance, birthright.

patron. *Sponsor, surety, guarantor, backer, angel.

Ana. Supporter, upholder, champion (see corresponding verbs at SUPPORT): benefactor, contributor (cf. *benefaction, contribution*, at DONATION): protector, defender (see corresponding verbs at DEFEND).

Ant. Client: protégé.

patter, v. Chatter, prate, *chat, gab, prattle, babble, gabble, jabber, gibber.

patter, n. *Dialect, vernacular, patois, lingo, jargon, cant, argot, slang.

pattern, n. 1 Exemplar, example, *model, paradigm, ideal, beau ideal, standard, mirror.

Ana. *Prototype, archetype: *paragon, apotheosis, sublimation.

2 *Figure, design, motif, device.

Ana. *Form, figure, shape, conformation, configuration.

paunch. *Abdomen, belly, stomach.

pawn, n. Hostage, gage, *pledge, earnest, token.

pay, v. Pay, compensate, remunerate, satisfy, reimburse,

indemnify, repay, recompense, requite come into comparison as meaning to give money or an equivalent in return for something. **Pay** is the ordinary term when the giving or furnishing of money to discharge an obligation for services rendered, goods delivered, or the like, is implied; as, to **pay** one's bills promptly; to **pay** one's gardener good wages (or to **pay** good wages to one's gardener); to **pay** a debt contracted by another; to **pay** ten dollars for a hat; "Taxes are what we **pay** for civilized society" (*Justice Holmes*); "owing doesn't mean **paying**, as any butcher or baker or candlestick-maker can tell you" (*Deland*). When, in extended use, **pay** does not imply the actual giving of money, the term is often employed purely as a figure of speech (as, nothing can **pay** him for his pains; he promised to **pay** the offender in his own coin), or it means merely to give as due or deserved (as, to **pay** a compliment), or to give in the hope of a return in kind (as, to **pay** attention to a young woman). **Compensate** is often preferred to **pay** when no legal obligation is implied or no payment for services is expected, because the term stresses a return, usually but not necessarily in money, that is regarded as an equivalent for a service given, for trouble taken, time spent, or the like; as, to **compensate** a waiter for his cheerful willing service; to **compensate** a friend for the time he spent in helping one; to **compensate** a neighbor for taking care of one's pets during the summer. But in this sense **compensate** often does not imply an obligation to another or the passing of money: it often suggests a counterbalancing, as of something unpleasant by something pleasant, or of something lost by something gained; as the beauty of the view **compensated** for the labor of the climb. (See COMPENSATE, 1.) **Remunerate**, like **pay**, usually implies the discharge of an obligation in money and, like **compensate**, usually suggests the giving of an equivalent for services rendered rather than for goods delivered, but unlike both of these terms, it often carries a suggestion, sometimes a mere hint, sometimes a distinct implication, of a reward; as, he promised to **remunerate** the searchers handsomely; "The king **remunerated** them both, the former with an addition of honour, the latter with an accession of estate" (*Fuller*). Both **compensate** and **remunerate** are used in place of **pay** when the latter term is thought of as offensive or indelicate; as, the party always **remunerates** its faithful workers; the lawyer asked for a thousand dollars to **compensate** him for his services. **Satisfy**, as here considered (see also SATISFY, 1 & 3), implies the payment of something that is asked, demanded, or required by the terms of the law or the decree of a court; as, to **satisfy** a claim; to **satisfy** a judgment against one; certain pieces of property must be sold to **satisfy** legacies involving definite sums; he was not able to **satisfy** all his creditors. **Reimburse** implies a return for money that has been expended by oneself in hope of making a profit, or by another, such as one's agent or attorney, in doing one's business; as, the profits of his business did not **reimburse** him for the money he had invested in it; to **reimburse** one's lawyer for certain expenditures; "a promise of **reimbursing**... what the people should give to the king" (*Bolingbroke*); "Nor do I see that [the book] is likely ever to **reimburse** him the charge of printing" (*Lamb*). **Indemnify** implies promised or actual reimbursement for loss as by fire, for injury as by accident, for damage as by war, or the like; as, the insurance policy **indemnifies** him against the loss of his house and its furnishings by fire, flood, or windstorm; the victors in a war usually demand that the conquered enemy **indemnify** them for all the damages suffered in battle or through invasion or raids. **Repay** and **recompense** carry a weaker implication of giving or furnishing

money than any of the preceding terms and a stronger implication of returning like for like: both therefore stress the demands of justice even more than the compulsion of an obligation; in fact, they cover the senses expressed colloquially by the verb phrase **pay back**. When the passing of money or of an equivalent is implied, **repay** is preferred when there is a suggestion of giving something back that has been paid out to one (as, to **repay** a loan) and **recompense**, when compensation for voluntary services or for losses or injuries sustained is suggested and a due or adequate return is implied (as, he **recompensed** each person who had given him assistance; he **recompensed** each of the victims for the injuries sustained in the collision for which he was responsible). But **repay** and **recompense** sometimes imply reciprocation of something given, advanced, inflicted, or the like. **Repay** usually implies little more than paying back in kind or amount (as, "**repay** her scorn for scorn"—*Keats*; we never can **repay** your kindness, or **repay** you for your kindness) but it is sometimes used when the return is not that which might be expected but is its diametrical opposite (as, to **repay** love with hate; "**Repaying** ingratitude with faith"—*Browning*). **Recompense** often in this extended sense specifically implies a desire to make amends or to atone for a wrong that has been inflicted; as, the governess sought to **recompense** the child for the coldness of his father and mother; "in some part to **recompense** My rash but more unfortunate misdeed" (*Milton*). **Requite** carries a still stronger implication of reciprocation or retaliation than these terms: it may imply a return not of like for like, but of that for which one is striving (as, she did not **requite** his love; "You will **requite** me... by the sight of your ardour for what is noble"—*Quiller-Couch*), or of that which is the antithesis of the hoped-for return (as, "his servility was **requited** with cold contempt"—*Macaulay*). Often, however, it distinctly implies the avenging of a wrong or the satisfaction of a desire for revenge; as, "Drake... had **requited** the wrongs inflicted by the Inquisition on English seamen" (*J. R. Green*).

pay, n. *Wage or wages, salary, stipend, fee, hire, emolument, screw.

Ana. *Reparation, restitution, indemnity, redress, amends.

paynim, adj. & n. Pagan, heathen, ethnic, Gentile. See under PAGAN, *n.*

peaceable. *Pacific, peaceful, pacifist, pacifistic, irenic.

Ana. *Amicable, friendly, neighborly: *amiable, complaisant: *calm, placid, serene, tranquil.

Ant. Contentious: acrimonious. — **Con.** Quarrelsome, bellicose, *belligerent: *martial, warlike.

peaceful. 1 *Calm, tranquil, serene, placid, halcyon.

Ana. *Soft, gentle, mild: *still, stilly, quiet, silent, noiseless.

Ant. Turbulent.

2 *Pacific, peaceable, pacifist, pacifistic, irenic.

Ana. Composed, collected, unruffled, *cool: equable, constant, *steady.

Con. Disturbed, perturbed, disquieted, agitated, upset, discomposed (see DISCOMPOSE).

peak. 1 *Mountain, mount, alp, volcano, mesa.

2 *Summit, pinnacle, climax, apex, acme, culmination, meridian, zenith, apogee.

peculate. *Defalcate, embezzle.

Ana. Appropriate, *arrogate, pre-empt, usurp, confiscate: *steal, pilfer, purloin, filch: *rob, plunder, rifle, loot.

peculation. Defalcation, embezzlement. See under DEFALCATE.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. Appropriation, arrogation, confiscation (see corresponding verbs at ARROGATE): *theft, larceny, robbery.

peculiar. 1 Individual, *characteristic, distinctive.

Ana. *Special, especial, particular, specific: idiosyncratic, eccentric (see corresponding nouns at ECCENTRICITY).

2 Eccentric, odd, queer, *strange, singular, unique, quaint, outlandish, curious.

Ana. Bizarre, grotesque, *fantastic: *abnormal, atypic, aberrant: unusual, unc customary (see affirmative adjectives at USUAL).

pecuniary. *Financial, monetary, fiscal, bursal.

pedantic. **Pedantic, academic (or academical), scholastic, bookish** are here compared as terms of derogation applied to thinkers, scholars, and other learned men and their utterances. **Pedantic** often implies ostentatious display of knowledge, didacticism, and stodginess. "Samuel Johnson... a man artificial in phrase and *pedantic* in judgment" (*Quiller-Couch*). It tends, however, to connote undue attention to scholarly minutiae and small interest in significant issues. "A careful attention to words, which in its extreme form becomes *pedantry*" (*H. Ellis*). **Academic** rarely carries implications of disagreeable personal characteristics, but it does stress abstractness, lack of practical experience and interests, and often, the inability to consider a situation realistically. "There is so much bad writing... because writing has been dominated by... the *academic* teachers and critics" (*H. Ellis*). **Scholastic** is less fixed in its implications than the others, for sometimes the allusion is to the medieval Schools (Scholasticism) and sometimes to modern education. As a rule it implies dryness, formalism, adherence to the letter, and, sometimes, subtlety. "It [Sidney's *Arcadia*] is not romantic, but *scholastic*; not poetry, but casuistry" (*Hazlitt*). "Many laws... could be shown... to transgress a *scholastic* interpretation of one or another of the great guaranties in the Bill of Rights" (*Justice Holmes*). **Bookish** often suggests learning derived from books rather than from actualities; sometimes it implies a decided literary or rhetorical quality; as, *bookish* words; *bookish* interests. "Few novelists are less *bookish* than Kipling" (*C. E. Montague*).

Ana. *Learned, polymathic, erudite: *recondite, abstruse.

pedigree. *Ancestry, lineage.

peek, n. Peep, glimpse, glance, *look, sight, view, coup d'oeil.

peel, v. *Skin, decorticate, pare, flay.

peel, n. *Skin, bark, rind, hide, pelt, fell.

peeler. *Policeman, officer, constable, bailiff, catchpole, bobby, copper, cop, bull, gendarme.

peep, n. Glance, glimpse, peek, *look, sight, view, coup d'oeil.

Ana. Peering or peer, gazing or gaze, staring or stare (see corresponding verbs at GAZE).

peer, v. *Gaze, gaze, stare, glare, gloat.

Ana. Peep, glance, glimpse, look (see corresponding nouns at LOOK).

peerless. Surpassing, pre-eminent, *supreme, superlative, transcendent, incomparable, banner.

Ana. Paramount, sovereign, *dominant, predominant: unmatched, unrivalled, unequalled (see affirmative verbs at MATCH).

peeve, v. *Irritate, exasperate, nettle, provoke, aggravate, roil.

Ana. Vex, *annoy, irk, bother: chafe, fret, gall (see ABRABE).

peevish. *Irritable, fractious, snappish, waspish, petulant, pettish, huffy, huffish, fretful, querulous.

Ana. Captious, carping, caviling, faultfinding, *critical.

pelagic. *Aquatic, marine, oceanic, thalassic, neritic, abyssal, bathysmal, bathybic, lacustrine, lacuscular, fluvial, fluvialite.

pellucid. *Clear, transparent, translucent, lucid, diaphanous, limpid.

Ana. *Pure, sheer: *bright, brilliant, luminous, radiant.

Con. *Turbid, muddy, roiled, roily.

pelt, n. *Skin, hide, fell, rind, bark, peel.

penalize. **Penalize, fine, amerce, mulct, scone** agree in meaning to punish by depriving of something. **Penalize** usually presupposes a violation of laws or rules intended to maintain discipline or fair treatment for all: it implies exaction by the authorities of a pecuniary penalty or a forfeiture of an advantage, or, especially in games, the imposition of a handicap; as, to *penalize* late taxpayers by adding five per cent to the amount due; to *penalize* a football team fifteen yards for holding. **Fine** and **amerce** are chiefly found in technical legal use, in reference to court cases, but their implications in extended use are not materially different. They, and their corresponding nouns, **fine** and **amercement**, are distinguishable in that *fine* implies that the amount exacted is, within certain limits, prescribed by the law; *amerce* and *amercement*, that it has been left to the discretion of the judge; as, violators of the municipal parking ordinances may be *fined* from one to ten dollars; the judge *amerced* the offender in the sum of fifty dollars. **Mulct**, as here compared, commonly implies subjection to a superior power which can legally or illegally exact a penalty (usually in money) for a breach of discipline or for failure to comply with its edicts. Sometimes it merely implies a fine or amercement or a withholding of money due; as, non-conformists were *mulcted* for attendance at services of their own communion; the soldier was *mulcted* of his pay for damage to government property. Often the word suggests force; commonly it implies imposition or the exaction of a heavy (sometimes oppressive) penalty; as, the colonizers *mulcted* the natives of their gold whenever the latter showed signs of resistance. **Scone**, originally in English university (particularly Oxford) use, suggests a petty fine such as the forfeiture of a tankard of ale, for a slight breach of the rules, especially for an infraction of the conventions while dining in hall. "Sir you have *sconced* me two-pence for non-attendance at a lecture not worth a penny" (*Johnson*). In its rare extended use, it comes close to *mulct*, but it seldom suggests imposition or use of force. "This sanctity of tenure, by which the public had been *sconced*, generation after generation" (*Gladstone*).

Ana. *Punish, discipline, correct, chasten.

penchant. *Leaning, propensity, proclivity, flair.

Ana. Bent, turn, talent, knack, *gilt: bias, prepossession, *predilection, prejudice.

pendant. Variant of PENNANT.

pendent or pendant. *Suspended, pendulous.

pendulate. *Swing, sway, oscillate, vibrate, fluctuate, waver, undulate.

pendulous. *Suspended, pendent.

penetrate. 1 *Enter, pierce, probe.

Ana. Invade, entrench, encroach, *trespass: *perforate, puncture, bore, prick.

2 Pervade, interpenetrate, impenetrate, *permeate, impregnate, saturate.

Ana. Insert, insinuate, interpolate, *introduce: *soak, saturate, drench, steep.

penetration. Insight, acumen, *discernment, discrimination, perception, divination, clairvoyance.

Ana. Sharpness, keenness, acuteness (see corresponding

adjectives at SHARP): shrewdness, astuteness, perspicaciousness or perspicacity, sagaciousness or sagacity (see corresponding adjectives at SHREWD).

penitence. Penitence, repentance, contrition, attrition, compunction, remorse agree in denoting sorrow or regret for sin or wrongdoing. Penitence implies little more than such sorrow or regret; as, the outward signs of *penitence*; his *penitence* is only skin-deep; he showed his *penitence* in many ways. Repentance is richer in its implications, for it also implies a change of heart, an awareness of one's shortcomings morally or spiritually, or of the evil of one's actions or life as a whole. "I came not to call the righteous, but sinners to repentance" (Luke v. 32). "God of his mercy give You patience to endure, and true repentance" (Shak.). Contrition and attrition (see also exosion) are both theological terms, and as such contrasted; only *contrition* is found in general use. Both imply deep sorrow for sin and the purpose of amendment, but in strict theological use *contrition* implies that one's sorrow arises out of love of God and a realization of one's failure to respond to his graces, and *attrition* (now rare except in learned use) that it arises from a lower motive, such as fear of hell or fear of the loss of heaven. "O may Thy love and pity supply whatsoever has been wanting in the sufficiency of my *contrition*" (Manual of Prayers). "Sacramental grace to raise our sorrow from *attrition* to *contrition*" (Manning). In general use, *contrition* implies penitence that is manifest in signs of pain or grief. "You must—whether you feel it or no—present an appearance of *contrition*" (Meredith). "Sophia thought that, after such a sin, the least Amy could do was to show *contrition*" (Bennett). Compunction and remorse both imply a painful sting of conscience, but *compunction* usually suggests a momentary reaction not only for something done, but also for something being done or to be done, and *remorse* usually suggests prolonged and insistent self-reproach and, often, intense suffering for consequences which cannot be escaped. "A heartless scoundrel who had . . . abandoned her in her poverty for evermore, with no touch of *compunction*" (Dickens). "He [the older child] has to be taught that the junior can be easily hurt by rough handling, and to feel *compunction* when he has wantonly caused tears" (B. Russell). "Make thick my blood; Stop up the access and passage to *remorse*. That no compunctious visitings of Nature Shake my fell purpose" (Shak.). "O, that the vain *remorse* which must chastise Crimes done, had but as loud a voice to warn, As its keen sting is mortal to avenge!" (Shelley).

Ana. Regret, *sorrow, anguish: humiliation, humbling, degradation, debasement (see corresponding verbs at ABASE): *qualm, scruple.

Con. Obdurateness or obduracy, inexorableness, adamant (see corresponding adjectives at INFLEXIBLE).

pen name. *Pseudonym, nom de plume, alias, nom de guerre, incognito, allonym.

pennant or pendant. *Flag, ensign, standard, banner, color, streamer, pennon, jack.

pennon. *Flag, ensign, standard, banner, color, streamer, pennant, jack.

penny-pinching. *Stingy, close, closefisted, tight, tightfisted, niggardly, parsimonious, penurious, miserly, curmudgeonly, cheeseparing.

pensive. *Thoughtful, reflective, speculative, contemplative, meditative.

Ana. Solemn, *serious, earnest, sober, grave: musing, pondering, ruminating (see PONDER).

penumbra. Umbra, adumbration, umbrage, *shade, shadow.

penurious. Parsimonious, niggardly, *stingy, close,

closefisted, tight, tightfisted, miserly, curmudgeonly, cheeseparing, penny-pinching.

Ana. Avaricious, grasping, greedy, *covetous: *mercenary, venal: *mean, abject, sordid, ignoble.

penury. *Poverty, indigence, want, destitution, privation.

Ana. *Need, necessity, exigency: pinch, strait, pass, *juncture.

Ant. Luxury.

peon. Bondsman, bondman, *serf, slave, bondslave, thrall, vassal, Helot.

people, n. *Race, nation.

peppery. Fiery, gingery, *spirited, high-spirited, mettlesome, spunky.

Ana. Impetuous, headlong, *precipitate, abrupt: *pungent, piquant, spicy, snappy.

perceive. Discern, note, remark, notice, observe, contemplate, *see, behold, descry, espy, view, survey.

Ana. Grasp, seize, *take: *apprehend, comprehend: *enter, penetrate, pierce, probe.

percept. *Sensation, image.

Ana. *Idea, concept, notion: recognition, acknowledgment (see corresponding verbs at ACKNOWLEDGE).

perceptible. Perceptible, sensible, palpable, tangible, appreciable, ponderable come into comparison when they mean capable of being apprehended through the senses or intellect as real and existent. Perceptible may be used inclusively to describe anything that comes within the range of one's senses and can be recognized in itself or by certain signs; as, *perceptible* sounds; the ship is barely *perceptible* on the horizon; few objects are distinctly *perceptible* in a fog. It may also be used narrowly without qualification by *just*, *scarcely*, *barely*, or the like, to describe a thing that just passes the borderline between invisibility and visibility, inaudibility and audibility, and the like; as, a *perceptible* change in her tone; there are *perceptible* differences between *surprise* and *astonish*; a *perceptible* flavor of onions; her remark had no *perceptible* relevance to the topic of conversation. *Sensible* may be used to describe anything which is clearly apprehended through the bodily senses, or which impresses itself strongly on the mind through the medium of sensations. Originally, *sensible* was opposed to *intelligible*, the former meaning apprehensible directly by the senses, and the latter, apprehensible only by the intellect; as, *sensible* versus *intelligible* reality. This opposition is now rare except in some philosophical use, but *sensible* still often applies to that which can be known through the senses; as, "a rich and thronging world of *sensible* things" (Loves); "Our true ideas of *sensible* things do indeed copy them" (W. James). In contrast with *perceptible*, however, *sensible* applies to that which is more obvious, even sometimes to that which is patent through its effects or signs; thus, a *sensible* change in tone is one which is immediately recognized; a *sensible* difference in a person's expression is one that is quickly detected. "The direct, *sensible* influence of Protestantism has been to isolate and to individualize" (Browell). Both *palpable* and *tangible* in their primary senses may be used to describe anything which is perceptible through the sense of touch. *Palpable*, however, although it is used of that which is felt by touching with the tips of the fingers (thus, a *palpable* powder is one that feels gritty), as often implies a sensation produced as a sensation sought and therefore may be applied to anything that evokes a response from the tactile nerves in any part of the body; as, there is a *palpable* chill in the air. "Art thou not, fatal vision [of a dagger] *sensible* To feeling as to sight? . . . I see thee yet, in form as *palpable* As this [dagger] which now I

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

draw" (*Shak.*). "When I hear A lay that once I saw her hand awake, Her form seems floating palpable, and near" (*Keats*). *Tangible*, on the other hand, is applied (literally) only to things which may be or are handled or grasped; as, if an infant is not provided with light tangible objects, he will play with a sunbeam or shadow; idols are gods or divinities in tangible form. In their secondary senses, these two words diverge widely. *Palpable*, in one of its most common meanings, implies a high degree of perceptibility (see *EVIDENT*); in poetic use, especially when applied to an immaterial thing, it suggests an almost physical awareness of its existence or reality. "What happens to live When every hour brings palpable access Of knowledge" (*Wordsworth*). "In the expiring, diffused twilight . . . it was the immensity of space made visible—almost palpable" (*Conrad*). *Tangible*, in its extended senses, is applied only to things that can be thought of as having real, independent, or objective existence, whether they are apparent to the senses or not, or whether they can be handled or not; thus, tangible ideas are those that can be grasped by the mind and made objects of thought; tangible advantages are those having a substantial character; tangible assets are those that can be appraised with reasonable accuracy, such as equipment, accounts due, and the like, as distinguished from those that are intangible, such as good will. *Appreciable* is applied to anything that is large enough to be measured, weighed, valued, or otherwise estimated; thus, a perceptible change in the temperature may be so slight a change that it almost, but not quite, escapes notice; a palpable change in temperature may still be slight, but it is great enough to make it definitely felt; an appreciable change in temperature may also be slight, but its extent is determinable by reference to a thermometer; some said there was no perceptible diminution of war hysteria, others declared that the decrease in tension was palpable, but still others maintained that months must elapse before any tangible effects of the accord became evident and there was appreciable relief from strain. *Ponderable* is applicable to that which can be weighed, either physically or mentally. "Something ponderable from the outer world—something of which we can say that its weight is so-and-so" (*Jeans*). The word tends, however, to be applied to that which is appreciable in terms of weight or significance as distinguished from that which is so intangible as to elude such determination; as, to exert a ponderable influence upon the events of his time.

Ana. *Clear, lucid, perspicuous: *noticeable, conspicuous, signal: discerned or discernible, noted or notable, observed or observable (see corresponding verbs at *SEE*).
Antf. Imperceptible.

perception. Penetration, insight, acumen, *discernment, discrimination, divination, clairvoyance.

Ana. Appreciation, comprehension, understanding (see corresponding verbs at *UNDERSTAND*): sharpness, keenness, acuteness (see corresponding adjectives at *SHARP*).

perch, v. *Alight, light, land, roost.

percussion. Concussion, clash, shock, *impact, impingement, collision, jar, jolt, brunt.

Ana. Striking, hitting, smiting (see *STRIKE*): vibration, oscillation, fluctuation (see corresponding verbs at *SWING*).

perdurable. Durable, permanent, stable, *lasting, perpetual.

Ana. Enduring, abiding, persisting, continuing (see *CONTINUE*): *everlasting, endless, interminable.

Antf. Fleeting.

peremptory. Imperative, imperious, *masterful, domineering.

Ana. Decisive, *decided: positive, certain (see *SURE*):

*dictatorial, authoritative, dogmatic, oracular.

perennial. Perpetual, incessant, constant, *continual, continuous.

Ana. *Lasting, perpetual, perdurable, stable: *everlasting, unceasing, never-ending.

Antf. Annual (*esp. of plants*).

perfect, adj. Perfect, whole, entire, intact come into comparison when they mean not deficient, defective, or faulty in any particular. Perfect is the usual term to describe such a condition, for it may imply not only the presence of every part, every element, and every quality necessary to a thing in its finished or fully developed state, but the soundness, the proportionateness, and the excellence of each part, element, or quality; as, a perfect set of teeth; a perfect diamond; a perfect tree; a physically perfect infant. The term is also applicable where there is no more definite measure or test than correspondence to a very high standard of excellence (as, a perfect gentleman; perfect coloring; "a perfect poem like *Lycidas*, a perfect fiction like *Esmond*, a perfect handling of a theory like Newman's *Idea of a University*"—*Pater*), or to an archetype, definition, or pattern (as, a perfect hexagon; a perfect flower [i.e., one that is both staminate and pistillate]; a perfect Greek temple), or to any conception that represents an ideal or personal vision of the highest possible of its kind (as, perfect virtue; the perfect Christian). The term is also used in the loose sense of absolute (see *footnote* at *ABSOLUTE*); as, he is a perfect fool; that is perfect nonsense. Whole and entire (as here considered: see also *WHOLE*, 2) are somewhat poetical or elevated, and often reminiscent of Scriptural use. Whole usually implies a perfection, especially a moral or physical perfection, that can be sought and attained, or that can be lost and regained: it usually suggests the attainment of or restoration to health, soundness, completeness, or the like; as, "Daughter, be of good comfort; thy faith hath made thee whole" (*Matthew ix. 22*); "she [a statue] is just as whole as when she left the hands of the sculptor" (*N. Hawthorne*); "We touch Him in life's throng and press, And we are whole again" (*Whittier*). Entire usually implies a physical, intellectual, moral, or spiritual perfection that derives from the completeness, integrity, soundness, and often the purity (freedom from admixture) of the thing so described: more than whole, it suggests a perfection that is unimpaired or without sign of previous imperfection; as, "But let patience have her perfect work, that ye may be perfect and entire, wanting nothing" (*James i. 4*). "Oh grant me, Phoebus, calm content, Strength unimpaired, a mind entire" (*J. Conington*). Intact usually implies the retention of the perfection of a thing in its finished, or its natural, or its original state: often it suggests its passage through some experience that might have destroyed its soundness, integrity, or wholeness; as, "That high courage which enabled Fielding . . . to keep his manly benevolence and love of truth intact" (*Thackeray*); "The group was in wonderful preservation: the figure of Bacchus intact, that of the young faun lacking only the arm" (*Vernon Lee*); "I am . . . thankful that I was among the last persons to see the original Rheims intact. The cathedral . . . remains enshrined . . . in my memory forever" (*H. Ellis*).
Ana. *Pure, absolute, simple, sheer: *consummate, finished, accomplished: *impeccable, flawless, faultless, errorless.

Antf. Imperfect. — **Con.** *Deficient, defective.

perfection. Virtue, merit, *excellence.

Antf. Failing.

perfidious. Fervid, *impassioned, passionate, ardent, fervent.

Ana. *Intense, vehement: heightened, enhanced, intensified (see *INTENSIFY*).

perfidious. *Faithless, false, disloyal, traitorous, treacherous.

Ana. *Mercenary, venal: disaffected, alienated, estranged (see **ESTRANGE**): deceitful, *dishonest: perjured, forsworn (see **PERJURE**).

perforate. **Perforate, puncture, punch, prick, bore, drill** come into comparison as meaning to pierce through so as to leave a hole or holes. **Perforate** is now used mainly with reference to the action of a machine or instrument which makes several holes, usually small round holes in a line or pattern as for ready tearing, for ornamentation of leather and other products, or for marking with a symbol, device, name, or the like; as, to **perforate** a sheet of postage stamps; to **perforate** leather for the tips of shoes; to **perforate** laundry tabs. The word, however, may be used of any hole, or of any holes in a series or group, produced by natural, artificial, or accidental means; as, leaves **perforated** by insects; the bullet **perforated** the breastbone; the soil is **perforated** by worms. **Puncture** suggests the intentional or accidental entrance of a sharp pointed instrument or thing into a tissue, substance, or material; as, to **puncture** the arm with a hypodermic needle; the tire was **punctured** by a sharp tack. "As the rush began, there flashed through my mind a picture of the ignominious fate which awaited me—**punctured** to death by umbrellas" (*V. Heiser*). Since **puncture** in current use is often associated with the sudden release of air from an inflated object, such as a balloon or a pneumatic tire, the word frequently connotes the sudden deflation of something inflated, unduly pretentious, pompous, or the like; as, to **puncture** a scheme; "The effect of Mark Twain's humorous assault on the dignity of General Grant was to reduce him not to the human but to the common level, to **puncture** the reluctant reverence of the groundlings" (*Van W. Brooks*). **Punch** is often used in place of **perforate** or **pierce** when the use of a tool or machine called a **punch** is implied; as, to **punch** holes in a piece of brass; railway conductors are instructed to **punch** the tickets presented them. (But **punch** does not invariably imply perforation or piercing, for the tool or machine may be so constructed as to perform various other operations such as bending, coining, extruding, and the like.) **Prick** implies a piercing with something that has a very sharp fine point, and therefore suggests a very small hole or a superficial wound; as, to **prick** oneself with a needle; to **prick** out a design on a piece of canvas; to **prick** chapel attendance (i.e., to prick the name of each student attending school or college chapel). In figurative use, **prick** usually stresses either the sharp sting that accompanies the pricking of the skin (as, "his conscience had more than once **pricked** him"—*Arch. Marshall*) or the delicacy and clearness of a pattern or design (as, "the design is **pricked** out, so to speak, by the rhymes"—*Loves*). Both **bore** and **drill** imply the use of a mechanical means in making a hole. But **bore** (etymologically, to plow) stresses the removal of materials and therefore is employed when there is a suggestion of excavation by hand or machinery (as, to **bore** a hole in the ground; to **bore** a tunnel through a mountain), or the use of a rotary tool such as an auger or gimlet (as, to **bore** holes in a plank; the corn borer is the larva of a moth that winters in the stem of Indian corn and **bores** through the ears as it develops), or in machine-shop practice, of the use of a boring tool, that is, a tool designed for the finishing of roughly made holes by enlarging them and by making them exact in size and true with relation to a specified center line (as, to **bore** the barrel of a gun). **Drill** (etymologically, to bore) commonly implies the use of an instrument or machine equipped with a pointed or two-edged tool for boring holes in hard substances such as

metal and stone, or in teeth; as, to **drill** a well in rocky ground; to **drill** holes in a steel plate; a dentist **drills** a tooth to remove decayed dental tissue from a cavity. In their figurative, as distinguished from their extended, senses, **bore** and **drill** (see also **PRACTICE**) carry differing connotations, **bore** suggesting the slow or continuous forcing of a passage through (as, to **bore** one's way through a crowd; "the sound of an aeroplane **bored** ominously into the ears of the crowd"—*V. Woolf*), and **drill**, the forced entrance of something through a succession of efforts, through persistence (often overpersistence), or the like (as, "A normal child has no spite against work until you have **drilled** one into him by some form of dis-education"—*C. E. Montague*).

Ana. *Enter, penetrate, pierce, probe.

perform. **Perform, execute, discharge, accomplish, achieve, effect, fulfill (or fulfil)** agree in meaning to carry out completely or into effect. **Perform** (sometimes merely a formal synonym for **do**) is more often used with reference to processes than to acts. One **performs** processes that are lengthy, or exacting, or ceremonial in character; as, to **perform** a play; to **perform** a surgical operation; to **perform** the marriage service. "A solemn Sacrifice, **perform'd** in state" (*Pope*). One **performs** acts that are distinguished or striking; as, to **perform** feats of skill or deeds of heroism. When the end rather than the means to the end is stressed, that which is **performed** is usually something undertaken or pledged. "When she promised a thing she was . . . scrupulous in **performing** it" (*Austen*). One **executes** that which exists in design or intent by bringing it into being or by putting it into effect. "The heads of departments are . . . political or confidential agents . . . merely to **execute** the will of the president" (*Ch. Just. Marshall*). "The quilt was Mammy Clo's masterpiece . . . a difficult design [that] had to be **executed** exactly right" (*R. Bradford*). Sometimes **execute** is used in place of **perform** of a process involving great skill or a highly exacting technique; as, few dancers can **execute** an adagio beautifully. One **discharges** duties or obligations when one has gone through a required round (usually routine) of tasks. "I had **discharged** my confidential duties as secretary . . . to the general satisfaction" (*De Quincey*). **Accomplish** usually stresses the completion of a process rather than the means by which it is carried out. One **accomplishes** something begun or something which there is reason to expect. "It took us twenty-three days to **accomplish** the return journey" (*Hudson*). "Who but I saw that prophecy **accomplished**? Indeed, I was the instrument" (*Kipling*). Sometimes **accomplish** implies the fruitfulness of effort or the value of the results obtained. "Because of his efforts things are **accomplished**" (*S. Anderson*). "There's very little to be **accomplished** by telling men anything. You have to show them" (*M. Austin*). **Achieve** adds to **accomplish** the implication of conquered difficulties. One **achieves** a work, a task, an enterprise that is of great importance and that makes unusual demands on one's energy, will power, resources, or the like. "The American public schools **achieve** . . . the task of transforming a heterogeneous selection of mankind into a homogeneous nation" (*B. Russell*). **Effect** implies obstacles to be removed, but, unlike **achieve**, it emphasizes inherent force in the agent rather than personal qualities such as daring and perseverance. Also, it is often predicated of things as well as of persons; as, only two prisoners **effected** their escape. "That short-cutting of emotion which pure poetry can **effect**" (*Day Lewis*). "Taxation as an instrument for **effecting** a more equal distribution of income" (*Shaw*). **Fulfill** is often used without precision where one of the preceding words would better serve the purpose. It is also often used in-

correctly for *fill*; as, "this *fulfills* a want" (where "this *fills* a want" is correct). Its distinctive implication is full realization, as of that which exists potentially or of that which is demanded especially by the nature of a thing; as, an injured organ cannot *fulfill* its natural function; some laws do not *fulfill* the ends for which they were framed; the prophecy was *fulfilled* to the letter. In reflexive use, *fulfill* suggests complete manifestation of powers or complete self-expression. "God *fulfills* himself in many ways" (*Tennyson*). "Life for her was rich with promise. She was to see herself *fulfilled*" (*D. H. Lawrence*).
Ana. *Reach, gain, compass, achieve, attain: finish, complete, conclude (see *CLOSE*, *v.*).

performer. *Actor, player, mummer, mime, Thespian, impersonator, trouper.

perfume. *Fragrance, scent, bouquet, redolence, incense.

Ana. Odor, scent, aroma, *smell.

perilapt. *Fetish, talisman, charm, amulet.

pericope. *Extract, excerpt.

peril. *Danger, jeopardy, hazard, risk.

Ana. Menacing or menace, threatening or threat (see corresponding verbs at *THREATEN*): exposure, subjection, openness, liability (see corresponding adjectives at *LIABLE*).

perilous. *Dangerous, hazardous, jeopardous, risky, precarious.

Ana. Desperate, forlorn, hopeless (see *DESPONDENT*): chancy, chance, haphazard, *random.

perimeter. *Circumference, periphery, circuit, compass, ambit.

period. *Period, epoch, era, age, aeon (or eon)* come into comparison when they denote a portion or division of time; *epoch* and *era* also come into comparison when they denote an event regarded as the beginning of a portion or division of time. *Period*, as here compared, is the generic term, designating an extent of time of any length, for whatever purpose delimited; as, to request a one-minute *period* of silence as a tribute to a dead person. "A centenary *period* in the history of man" (*Milman*). An *epoch* is properly the starting point of a new period, esp. as marked by striking or remarkable changes or events. An *era* is a period (often one extending from an *epoch*) characterized esp. by some new order of things "The reading of this book was an *epoch* in my life, one of the turning points in my mental history" (*J. S. Mill*). "A better intellectual *era* is dawning for the working men" (*Kingsley*). But *epoch* is frequently used with little distinction from the usual sense of *era*, and *era* is sometimes used with little distinction from the proper sense of *epoch*. "Though the *epoch* was one of confusion... the fame of Volta's work spread gradually" (*Karl K. Darrow*). "The landing of this English Governor was an *era* in their lives" (*W. H. Dixon*). *Age* is commonly more specific and definite than *era*; it is frequently used of a period dominated by some central figure or clearly marked feature; as, the *age* of Pericles; the Bronze *Age*. "The French Revolution and its *age*" (*Arnold*). An *aeon* is an immeasurably or indefinitely long period of time. "He [the elephant] has weight Behind him: *aeons* of primeval power Have shaped that pillared bulk" (*W. W. Gibson*). "During the three terrible hours... he had lived centuries of pain, *aeon* upon *aeon* of torture" (*Wilde*).

Certain or all of these terms are used with arbitrary value in geological and archaeological classifications, but usage is far from uniform. In geology the following classification is perhaps more often used than any other: An *era* is one of the five great divisions (Archeozoic, Proterozoic, Paleozoic, Mesozoic, Cenozoic) of geologic time, as determined by the kinds of fossils found in strata; a

period is a subdivision of an era; an *epoch*, a subdivision of a period. An *age* is a portion of time characterized by its dominant type of life, and is not an integral part of this classification; thus, the *Age* of Reptiles coincides with the Mesozoic *era*, while the *Age* of Fishes coincides with the Devonian *period*.

In archaeology, uniformity appears to exist only in the use of *age* for one of the three great divisions of human culture (Stone, Bronze, Iron), as determined by the kind of implements used. There is considerable confusion in the use of names for subdivisions of these three divisions; thus, the three subdivisions (Eolithic, Palaeolithic, Neolithic) of the Stone Age have been called both *periods* and *eras*.

periodic. *Intermittent, recurrent, alternate.

Ana. *Fitful, spasmodic, convulsive: sporadic, occasional (see *INFREQUENT*).

periodical, n. *Journal, magazine, newspaper, review, organ.

peripatetic. *Itinerant, ambulatory, ambulant, nomadic, vagrant.

periphery. *Circumference, perimeter, circuit, compass, ambit.

Ana. *Limit, confine, bound, end: *boundary, border, march, frontier.

periphrasis. *Verbiage, redundancy, tautology, pleonasm, circumlocution.

peristyle. *Colonnade, arcade, arcature, portico.

perjure. *Perjure, forswear* come into comparison only when they mean to violate one's oath, or, when used reflexively, to make a false swearer of oneself. In general literary use, *perjure* is often employed more loosely than in law, where it is a highly technical term meaning to make a willfully false statement of fact (sometimes of an intention to do something) in spite of an oath or a solemn affirmation that one has told the truth or, as a witness in a judicial proceeding, that one will tell only the truth; as, the judge was convinced that the witness had *perjured* himself. In the looser use, *perjure* often implies making a liar of oneself, whether one is under oath or not; as, "When a native begins *perjury* he *perjures* himself thoroughly. He does not boggle over details" (*Kipling*); "He thanked her, with as much enthusiasm as he could muster without actually *perjuring* himself" (*Arch. Marshall*). *Forswear*, as here compared (see also *ABJURE*), often implies a violation of an oath, promise, or vow (as, "he swore a thing to me on Monday night, which he *forsook* on Tuesday morning"—*Shak.*; "Thou shalt not *forswear* thyself, but shalt perform unto the Lord thine oaths"—*Matthew v. 33*), but it may also suggest untruth to something as sacred as an oath, such as one's principles, one's beliefs, the laws of one's country, or the like (as, "Shelley indignantly refused to *forswear* his principles" by accepting 'a proposal so insultingly hateful'"—*Arnold*).

Ana. *Deceive, delude, mislead, beguile: *lie, pervariate.

perk up. *Preen, prune, primp, doll up, prank, prink.

perky. Jaunty, *debonair, cocky, chipper.

Ana. Gay, *lively, animated, sprightly: trim, trig, *neat, tidy.

permanent. *Lasting, perdurable, durable, stable, perpetual.

Ana. Perennial, constant, continuous, *continual.

Ant. Temporary: ad interim (of persons).

permeate. *Permeate, pervade, penetrate, interpenetrate, impenetrate, impregnate, saturate* come into comparison when they mean to pass, or to cause to pass, through every part of a thing. *Permeate* may be

used in reference to a material or an immaterial thing and implies its diffusion through all the pores or interstices (literal or figurative) of some substance or entity; as, the rain has *permeated* the sand; "[the dealer in red ocher] was not temporarily overlaid with the colour: it *permeated* him" (*Hardy*); "In...the Elizabethan age, English society at large was accessible to ideas, was *permeated* by them" (*Arnold*); "[Japanese color prints] prove at least how deeply the sense of beauty had *permeated* the whole nation" (*Binyon*). *Pervade* (etymologically, to walk through) is a very close synonym of *permeate*, but in current use it distinctively carries a heightened suggestion of diffusion throughout every part or parcel of the whole (or in the case of very extensive wholes, the portion within one's reach), and it is more often used in reference to places, documents, works of art, and the like; as, "a deep And solemn harmony *pervades* The hollow vale from steep to steep" (*Wordsworth*); "a principle which so entirely *pervades* the constitution...as to be incapable of being separated from it" (*Ch. Just. Marshall*); "we cannot usually say that a smell comes from a certain direction, but merely that the air is *pervaded* by a smell" (*Jeans*). *Penetrate*, as here compared (see also ENTER, 1), is preferred to *permeate* or *pervade* when there is the intent also to suggest the entrance of something that goes deeply or profoundly into the essence or nature of a thing, thereby giving it its characteristic quality or efficient force; as, "a whole nation...*penetrated* with an enthusiasm for pure reason, and with an ardent zeal for making its prescriptions triumph" (*Arnold*); "a letter *penetrated* with affection for the old plain edifice and its memories" (*Quiller-Couch*); "[Painters and poets] *penetrated* with such ideas, and with this innate love of suggestion and understatement" (*Binyon*). *Interpenetrate* and the less common *impenetrate* are merely intensives of *penetrate*, often, but not invariably, also implying a more thoroughgoing diffusion; as, chewing promotes the *interpenetrating* of the food with saliva; totalitarian ideas have deeply *impenetrated* the minds of Central European peoples. *Impregnate* often carries a stronger implication of the operation of a causative power (frequently a human agent) than any of the preceding terms: it also suggests a filling of every available part or portion of a whole so that the thing which enters or is entered is diffused throughout the entire substance, structure, work, group, or the like; as, "the water is *impregnated* with magnesia" (*A. Huxley*); "Any judge who has sat with juries knows that...they are extremely likely to be *impregnated* by the environing atmosphere" (*Justice Holmes*); "He is versifying his ideas...not *impregnating* thought with imaginative beauty" (*Loves*). *Saturate*, as here compared (see also SOAK), implies impregnation to the point where no more of the thing which enters can be taken up or absorbed: the term, therefore, is often used in preference to *permeate* or *pervade* when that which permeates or pervades is highly obvious, deeply ingrained, conspicuously heavy (as an odor), or the like; as, "the unfinished dresses...were often so *saturated* with smoke that he knew she found it a trial to work on them next morning" (*Cather*); "The [French] Revolution awakened it [democracy] into consciousness, imbued it with ideality, *saturated* it with sentiment" (*Brownell*).

Ana. *Infuse, imbue, ingrain: drench, steep, *soak, saturate: *inform, animate, inspire, fire.

permission. *Permission, leave, sufferance* come into comparison when they denote the sanction which enables one to do something that requires the consent of those in authority. *Permission* is the ordinary term except in some conventional phrases: it commonly implies

the power or authority to grant or to refuse what is asked; as, to have the owner's *permission* to hunt on this estate; "The horses can go in our barn. I'm sure Mr. Forrester would have no objection." She spoke as if he had asked her *permission*" (*Cather*). *Leave* differs very little from *permission*. It occurs chiefly in conventionally courteous phrases such as "by your *leave*," "to ask *leave*," "give me *leave*," and the like, but it may be used elsewhere in place of *permission*; as, to ask for *leave* (or *permission*) to remove papers from a file. In military, naval, and some official use, possibly by confusion with the verb *leave* in the sense of *depart*, the term implies official permission to absent oneself from one's duties or from one's station for a fixed period of time, or the furlough or absence so permitted; as, to be granted a *leave* (or a *leave of absence*) of thirty days; to be on sick *leave*; after being absent without *leave* for a month, the soldier was arrested as a deserter. *Sufferance* usually implies a neglect or refusal to forbid, and therefore suggests either a tacit permission withdrawable on cause or, more often, merely suffering a person to be present or to do something; as, you are here only on *sufferance* and if you want to stay, you must listen without interrupting; "He comes among us on *sufferance*, like those concert singers whom mamma treats with so much politeness" (*Thackeray*).

Ana. Authorization, commissioning or commission, licensing or license (see corresponding verbs at AUTHORIZE): letting, allowing (see LET): sanctioning, approval, endorsement (see corresponding verbs at APPROVE).

Ant. Prohibition.

permit, v. *Let, allow, suffer, leave.

Ana. *Authorize, license, commission: sanction, endorse, *approve.

Ant. Prohibit, forbid.

permutation. Mutation, *change, vicissitude, alternation.

Ana. Moving or move, shifting or shift, removing or remove (see corresponding verbs at MOVE): transformation, conversion, metamorphosis (see under TRANSFORM).

pernicious. *Pernicious, baneful, noxious, deleterious, detrimental* agree in meaning exceedingly harmful, but they differ as to the kind and extent of harm done. That is either *pernicious* or *baneful* which is irreparably harmful, but *pernicious* is more often applied to things that corrupt or undermine and *baneful* to those that poison or destroy; as, *pernicious* anemia; a *pernicious* influence; a *baneful* mushroom; a *baneful* atmosphere in which to bring up children. "Untrue beliefs work as *perniciously* in the long run as true beliefs work beneficially" (*W. James*). "A propaganda of *pernicious* humbug" (*Shaw*). "The *baneful* notion that there is no such thing as a high, correct standard in intellectual matters" (*Arnold*). That is *noxious* which is harmful, especially to health of body or mind. "A cold *noxious* wind" (*S. Haughton*). "Only when the educator shall have been educated, the air cleared of *noxious* fallacies...will the reign of Humbug come to an end" (*Grandgent*). *Deleterious* is now seriously used chiefly of that which causes harm when taken into the body, as into the digestive or respiratory tract. "Many drugs that seem so good in the first trials prove to have *deleterious* after effects" (*V. Heiser*). "This gas was well known to be *deleterious*" (*J. Phillips*). *Detrimental* is usually followed by a phrase specifying that which sustains injury, harm, etc.; as, restrictive legislation that is *detrimental* to trade. "Paradoxes...*detrimental* to the true course of thought" (*Jowett*).

Ana. *Baleful, malign, *sinister, malefic*: *poisonous, venomous, toxic, pestilent, miagmatic: injurious, hurtful, harmful, mischievous (see corresponding nouns at INJURY).

Ant. Innocuous.

pernickety, pernicketty, pernickity, or pernickety. Fastidious, finical, *nice, dainty, particular, fussy, squeamish.

Ana. Exacting, demanding, requiring (see DEMAND): annoyed, vexed, irked (see ANNOY).

perpendicular. *Vertical, plumb.

Ana. *Steep, abrupt, precipitous, sheer.

Ant. Horizontal.

perpetual. 1 *Lasting, permanent, perdurable, durable, stable.

Ana. *Everlasting, endless, unceasing, interminable, never-ending: eternal, sempiternal, *infinite.

2 *Continual, continuous, constant, incessant, perennial.

Ana. Enduring, persisting, abiding, continuing (see CONTINUE): set, settled, fixed, established (see SET, v.).

Ant. Transitory, transient.

perplex. *Puzzle, mystify, bewilder, distract, nonplus, confound, dumfound.

Ana. Disturb, perturb, upset, *discompose: baffle, balk, thwart (see FRUSTRATE): astound, amaze, astonish, *surprise.

perquisite. *Right, prerogative, privilege, appanage, birthright.

persecute. Oppress, *wrong, aggrrieve.

Ana. *Worry, annoy, harass, harry: torture, torment, rack, grill (see AFFLICT): *bait, badger, hound, ride.

Con. *Indulge, pamper, humor: favor, *oblige, accommodate: *support, uphold, champion, back.

persevere. Persevere, persist come into comparison when used in reference to persons in the sense of to continue in a given course in the face of difficulty or opposition. Persevere, in all but rare instances, now implies an admirable quality: it suggests both refusal to be discouraged by failure, doubts, attacks, or the like, and a steadfast or dogged pursuit of an end or an undertaking. "I will persevere in my course of loyalty, though the conflict be sore between that and my blood" (Shak.). "For, strength to persevere and to support, And energy to conquer and repel— These elements of virtue, that declare The native grandeur of the human soul" (Wordsworth). Although persist (as here compared: see also CONTINUE) may imply a virtue (as, he persisted in his inquiries until he brought the truth to light; "a strength of character... which enables him to persist"—S. Alexander), it more often suggests a disagreeable or annoying quality, for it stresses stubbornness or obstinacy more than courage or patience, and frequently implies opposition to advice, remonstrance, disapproval, one's own conscience, or the like; as, to persist in working when ill; "the [abbreviation] 'Mlle' in which Frenchmen persist to the verge of bigotry" (C. E. Montague).

Ana. *Continue, abide, endure, last.

Con. Vary, *change, alter: waver, vacillate, falter, *hesitate.

persiflage. *Badinage, raillery.

Ana. Bantering or banter, chaffing or chaff, rallying or rally (see corresponding verbs at BANTER): ridiculing or ridicule, twitting, deriding or derision (see corresponding verbs at RIDICULE).

persist. 1 *Persevere.

Ant. Desist. — **Con.** Discontinue, cease, *stop, quit.

2 *Continue, last, endure, abide.

Ant. Desist. — **Con.** *Stop, cease, discontinue.

peranickety. Variant of PERNICKEY.

personality. Character, individuality, temperament, *disposition, temper, complexion.

personate. *Act, play, impersonate.

perspicacious. *Shrewd, sagacious, astute.

Ana. *Sharp, keen, acute: penetrating, piercing, probing (see ENTER).

Ant. Dull.

Do not confuse perspicacious with perspicuous.

perspicuous. *Clear, lucid.

Ana. Manifest, *evident, plain, distinct: *explicit, express, specific, definite.

Con. *Turbid, muddy: inflated, flatulent, tumid, turgid.

Do not confuse perspicuous with perspicacious.

persuade. *Induce, prevail on or upon.

Ana. Influence, *affect, touch, sway, impress: *move, drive, impel, actuate.

Ant. Dissuade. — **Con.** *Restrain, curb, check, inhibit: *hinder, impede, obstruct.

persuasion. 1 Conviction, belief, *opinion, view, sentiment.

Ana. *Predilection, prepossession, bias, partiality, prejudice: tenet, dogma, *doctrine.

2 *Religion, denomination, sect, cult, communion, faith, creed, church.

pert. *Saucy, arch.

Ana. Flippant, frivolous, volatile, light-minded (see corresponding nouns at LIGHTNESS): *impertinent, intrusive: brash, impudent (see SHAMELESS).

Ant. Coy.

pertain. *Bear, relate, appertain, belong, apply.

Ana. Connect, *join, combine, associate.

pertinacious. *Obstinate, stubborn, dogged, mulish, stiff-necked, pigheaded, bullheaded.

Ana. Tenacious, tough, stout, sturdy, *strong: persistent, persevering (see corresponding verbs at PERSEVERE): resolute, steadfast, staunch (see FAITHFUL): headstrong, willful (see UNRULY).

pertinent. *Relevant, germane, material, apposite, applicable, apropos.

Ana. Fitting, apt, happy, felicitous (see FIT): pat, *seasonable, opportune, timely, well-timed.

Ant. Impertinent: foreign.

perturb. Disturb, agitate, upset, *discompose, disquiet, fluster, flurry.

Ana. *Annoy, vex, irk, bother: *confuse, muddle, addle: *confound, nonplus, distract, bewilder, dumfound (see PUZZLE, v.).

pervade. *Permeate, penetrate, interpenetrate, impregnate, impregnate, saturate.

Ana. *Infuse, imbue, ingrain, leaven: *inform, animate, inspire, fire.

perverse. *Contrary, restive, balky, froward, wayward.

Ana. *Unruly, ungovernable, recalcitrant, refractory: *obstinate, stubborn, mulish, pigheaded, stiff-necked: fractious, *irritable, peevish.

pervert, v. Deprave, corrupt, *debase, vitiate, debauch.

Ana. *Abuse, misuse, ill-treat, maltreat, mistreat, outrage: contort, distort, warp (see DEFORM).

pervert, n. *Renegade, apostate, turncoat, recreant, backslider.

perverted. Corrupted, depraved, debased, vitiated, debauched. See under DEBASE.

Ana. Distorted, contorted, warped (see DEFORM): abused, misused, outraged (see ABUSE).

pessimistic. *Cynical, misanthropic, misogynic.

Ana. Gloomy, morose (see SULLEN): depressed, oppressed, weighed (down) (see DEPRESS).

Ant. Optimistic. — **Con.** Sanguine, *confident, assured.

pester. Plague, tease, tantalize, *worry, annoy, harass, harry.

Ana. *Bait, badger, hector, heckle, chevy: fret, gall, chafe (see ABRASE): perturb, disturb, agitate, upset, *discompose.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

pestilent, pestilential. *Poisonous, venomous, virulent, toxic, mephitic, miasmatic, miasmic, miasmal.

Ana. *Infectious, contagious, catching: noxious, *pernicious, baneful, deleterious.

pet, v. *Caress, fondle, cuddle, dandle.

Ana. *Indulge, humor, pamper, mollycoddle, baby.

petite. *Small, little, diminutive, wee, tiny, teeny, weeny, minute, microscopic, miniature.

petition, n. *Prayer, suit, plea, appeal.

petition, v. Pray, sue, plead, appeal. See under PRAYER.

pettish. *Irritable, fractious, peevish, petulant, snappish, waspish, huffy, fretful, querulous.

petty. **Petty, puny, trivial, trifling, paltry, measly, picayunish, picayune** agree in meaning little and insignificant, often contemptibly so. That is **petty** which by comparison with other things the same in kind, but different in size, importance, gravity, moment, and the like, is among the smallest or least important; as, a **petty** officer; a **petty** interest; a **petty** prince; a **petty** inflection. The word often connotes small-mindedness; as, **petty** gossip. "Hunt does one harm by making fine things **petty** and beautiful things hateful" (*Keats*). "We are split up into the **pettiest** possible squierarchy, who... cut down all the trees, level all the old virole banks, and stop up all the footways they can" (*FitzGerald*). That is **puny** which is so small or slight as to seem impotent, feeble, or completely without vitality. "None of your thin, **puny**, yellow, hectic figures, exhausted with abstinence and hard study" (*Smollett*). "One no sooner grasps the bigness of the world's work than one's own effort seems **puny** and contemptible" (*J. R. Green*). That is **trivial** (etymologically, ordinary or common), in highly discriminating use, which seems petty and commonplace and scarcely worthy of special consideration or notice; as, "that strange interest in **trivial** things that we try to develop when things of high import make us afraid" (*Wilde*); "he regarded no task as too humble for him to undertake, nor so **trivial** that it was not worth his while to do it well" (*A. Huxley*). The term is often applied to persons, minds, activities, and the like, which reveal engrossment in trivial affairs or a lack of serious or profound interests; as, "She knew him for a philanderer, a **trivial** taster in love and life" (*R. Macaulay*); "[Lepidus's] **trivial** mind" (*Buchan*); "Massinger had not the personality to create great farce, and he was too serious to invent **trivial** farce" (*T. S. Eliot*). That is **trifling** which is so small as to have little, if any, value or significance; as, "Our ordinary distinctions become so **trifling**, so impalpable" (*N. Hawthorne*); "The tax is **trifling**" (*Burke*); a few **trifling** purchases. That is **paltry** which is ridiculously or contemptibly small in comparison especially to what it should be; as, a **paltry** allowance; "our little ambitions, our **paltry** joys" (*A. C. Benson*). "The **paltry** prize is hardly worth the cost" (*Byron*). That is **measly** which is contemptibly small (as in size, quantity, etc.) or petty; as, a **measly** portion of pie; "[He] ends as a politician—and a rather **measly** one at that" (*W. A. White*). That is **picayunish**, or **picayune**, which is insignificant in its possibilities, accomplishments, or the like (as, a **picayunish** business; a **picayune** legislature, or hopelessly narrow in its (or his) outlook or interests (as, a **picayunish** policy; a **picayune** congressman).

Ana. *Small, little, diminutive, minute.

Ant. Important, momentous: gross.

petulant. *Irritable, fractious, peevish, pettish, snappish, waspish, huffy, fretful, querulous.

Ana. Cross, cranky, touchy, testy (see IRASCIBLE): *impatient, restive, fidgety, skittish.

phase. Variant of BACTERIOPHAGE.

phantasm. 1 *Apparition, phantom, wraith, fetch,

ghost, spirit, specter, shade, revenant, spook, haunt. **Ana.** *Delusion, illusion, hallucination.

2 *Fancy, fantasy, phantasy, vision, dream, daydream, nightmare.

phantasy. 1 *Fancy, fantasy, phantasm, vision, dream, daydream, nightmare.

2 *Imagination, fancy, fantasy.

phantom. *Apparition, phantasm, wraith, fetch, ghost, spirit, specter, shade, revenant, spook, haunt.

Ana. Simulacrum, counterfeit, deception, *imposture: *delusion, illusion, hallucination.

pharisaical. Hypocritical, sanctimonious, canting. See under HYPOCRISY.

Pharisaism. *Hypocrisy, sanctimony, cant, canting.

pharmaceutical, n. *Drug, medicinal, biological, simple.

pharmaceutist. *Druggist, pharmacist, apothecary, chemist.

pharmacist. *Druggist, pharmaceutist, apothecary, chemist.

phase, n. **Phase, aspect, side, facet, angle** come into comparison when they denote one of the possible ways in which an object of contemplation may be seen or may be presented. **Phase**, in very careful use, always implies a change in the appearance of a thing without any change in the observer's point of view. From its original denotation as one of the four different shapes which the moon apparently assumes during its waxing and waning (new moon, first quarter, full moon, last quarter) it often suggests a cyclical change in appearance. "The wheel of the world swings through the same **phases**... Summer passed and winter thereafter, and came and passed again" (*Kipling*). In extended but still discriminating use, it is often applied to an outward and passing manifestation of a stage in growth, development, unfolding, or the like; thus, the red fox exhibits color **phases** in which it is known variously as cross fox, silver fox, black fox, etc. "He saw her in the most attractive **phase** of her character" (*Lytton*). "But it [absorption in religion] might be only a **phase**, as Richard said, such as all girls go through" (*V. Woolf*). **Aspect** comes into comparison here in two of its senses. Sometimes it too implies a change in appearance without a shifting in point of view but, unlike **phase**, it usually suggests a superficial change, especially one brought about by unpredictable circumstances; as, every time I look out of the window, the hills present a new **aspect**. At other times (and this is the sense here emphasized) it implies a change in appearance that is traceable to a change in the observer's point of view; as, as a result of long daily walks he came to know every **aspect** of the near-by hills. "The one and only **aspect** of a rich and complex subject which I mean to treat" (*Lowes*). Thus, one who proposes to treat the **phases** of the depression of the nineteen-thirties implies that he intends to consider its stages as they manifested themselves outwardly; one who proposes to treat all **aspects** of that depression implies that he intends to consider it from every possible point of view, such as the political, economic, and sociological. **Side**, though often used interchangeably with **phase** and **aspect**, in precise use retains implications derived from one of its literal senses and is used chiefly in reference to something that may be thought of as having two or more faces and therefore not fully apprehensible unless it or its observer shifts position; as, to see life only on its pleasant **side**; life presented only its tragic **side** to him. "Hitherto I have shown you only one **side**, or rather one **phase**, of her" (*E. Wharton*). "[Do] You who put sophistry to shame, and shout 'There's but a single **side** to man and thing'... believe 'tis true?" (*Browning*). But **side** differs from **phase** and **aspect** in not

invariably connoting appearance, or referring to physical or intellectual vision; as, to hear both *sides* of a dispute; to read all *sides* in a controversy. "On its theoretic and perceptive *side*, Morality touches Science; on its emotional *side*, poetic Art" (*G. Eliot*). **Facet** differs from *side* in implying a multiplicity of other faces similar to or like it, all small, sharply distinguished, and manifesting the central quality as every facet of a brilliant manifests the radiance of the diamond. "The strength of the lyric lies in the complete statement of a single selected *facet* of experience" (*Day Lewis*). **Angle** denotes that aspect which is observable from a point of view restricted in its scope; as, he knows only one *angle* of his subject; it is necessary to consider all *angles* of the situation.

Ana. *State, condition, situation, posture: *appearance, look, semblance.

phase, *v.* Variant of FAZE.

phenix. Variant of PHOENIX.

phenomenal. *Material, physical, corporeal, sensible, objective.

Ana. Actual, *real.

Ant. Noumenal.

philanthropic. *Charitable, benevolent, humane, humanitarian, altruistic.

Ana. *Liberal, munificent, bountiful, generous: lavish, *profuse, prodigal.

Ant. Misanthropic.

philanthropy. *Charity.

Ant. Misanthropy.

Phillistine, *adj.* *Obacurantist, barbarian.

phlegm. 1 Impassivity, stolidity, apathy, stoicism. See under IMPASSIVE.

Ana. Insensibility, insensitiveness, impassibility, anesthesia (see corresponding adjectives at INSENSIBLE).

2 *Equanimity, composure, sang-froid.

Ana. Imperturbability, nonchalance, coolness, collectedness (see corresponding adjectives at COOL): calmness or calm, tranquillity, serenity (see corresponding adjectives at CALM).

phlegmatic. *Impassive, stolid, apathetic, stoic.

Ana. *Indifferent, unconcerned, incurious, aloof: cool, chilly, *cold, frigid: sluggish, *lethargic.

phoenix or phenix. *Paragon, sublimation, apotheosis, nonpareil, nonesuch.

photograph, *n.* Portrait, *image, simulacrum, effigy, statue, icon, mask.

phrase, *n.* **Phrase**, **collocation**, **idiom**, **expression**, **locution** come into comparison when they mean a group of words which, when taken together, express a single idea or notion and may be used as a part of a sentence. **Phrase**, as here considered, does not apply to the grammatical unit called *phrase* (such as a *prepositional phrase*) but to any group of words which for one reason or another recurs frequently in the language of a people, the writings of an author or school of authors, the speech of a person or a clique of persons, or the like. Sometimes, the word means little more than this (as, "This phrase, *a priori*, is in common most grossly misunderstood"—*Southey*) but, more often, it suggests a given character, such as triteness (as, "To use the *phrase* of all who ever wrote upon the state of Europe, the political horizon is dark indeed"—*Cowper*) or as pithiness or pointedness (as, "I summed up all systems in a *phrase*"—*Wilde*; "You don't understand a young philosopher," said the Baronet. 'A young philosopher's an old fool!' returned Hippas, not thinking that his growl had begotten a *phrase*"—*Meredith*). **Collocation** when applied to a phrase stresses the order and arrangement of words: the term when used independently in this sense or in the phrase *collocation* of

words usually suggests an arrangement that has become fixed in a language, a dialect, or in personal use; sometimes, specifically, it names one that has acquired a special significance; as, *collocations* such as "to turn in" or "by the by"; that oft-repeated *collocation* of Caesar's "I came, I saw, I conquered"; "Expressed in French . . . Any given *collocation* of words has a significance that is certain" (*Brownell*). **Idiom** (as here considered: see also LANGUAGE, 1) applies to any phrase or collocation which is peculiar to the language in which it occurs either in its grammatical structure or in the meaning which is associated with it but which cannot be derived from it when the words are interpreted literally; thus, "to keep house," "to center round (a person)," "to catch cold," "to strike a bargain," are homely but truly English phrases called *idioms*. **Expression** and **locution** are sometimes used in place of *phrase* when the idea of a way of expressing oneself is uppermost. Although both terms may be applied to phrases that are generally current, they are usually applied to those that are individual. **Expression** is particularly used when accompanied by a characterizing adjective or clause or phrase; as, he is in the habit of using telling *expressions*; that is a very odd *expression*; an *expression* that has gone out of use. **Locution** is somewhat more formal or bookish than *expression* and is therefore often preferred when the reference is to literary rather than colloquial phrases or to phrases that are as peculiar to a language or a group as an idiom; as, a pet *locution* of the author. "Carlyle and Carlyles were to leave their traces. Even the style of Thoreau was to be tinged faintly here and there with the rhythms and *locutions* of a writer whom lesser minds could not resist" (*Van W. Brooks*).

phraseology, phrasing. *Language, vocabulary, diction, style.

phrenzy. Variant of FRENZY.

physic, *n.* 1 *Remedy, cure, medicine, medicament, specific.

2 **Physic**, **laxative**, **aperient**, **aperitive**, **purgative**, **cathartic**, **purge** agree in meaning a medicine, or the like, used in effecting a cleansing of the bowels. **Physic** is, in current use (see also REMEDY), the general term for anything taken to relieve or to remedy a constipated or costive condition. A **laxative**, **aperient**, or **aperitive** (see also APPETIZER), is a mild *physic* the chief purpose of which is to give relief and to effect a loosening or opening of the intestines by the discharge of fecal matter. **Laxative**, however, is generally applied to those *physics*, such as mineral oil and agar-agar, that increase the tendency to intestinal evacuations, and **aperient** to those, such as some salts, which promote an easy discharge. **Purgative**, **cathartic**, and **purge** are applied to any *physic* that produce an evacuation of the contents of the bowels. **Purgative** and **cathartic** are applicable to those *physics*, such as castor oil and calomel, which are more certain and energetic in their action than laxatives. They are sometimes used in contrast with **purge**, the latter term being applied to a drastic, irritant *physic*, such as some salts taken in large doses, which causes profuse, repeated, and watery evacuations, or to a drastic enema.

physical. 1 *Bodily, corporeal, corporal, somatic.

Ana. Fleahly, *carnal, sensual, animal, animalistic.

2 *Material, corporeal, phenomenal, sensible, objective.

Ana. Actual, *real, true: elemental, *elementary.

physiognomy. *Face, countenance, visage, mug, puss.

piazza. *Balcony, gallery, loggia, veranda, porch, portico, stoop.

picayunish, picayune. *Petty, trivial, trifling, puny, paltry, measly.

pick, *v.* *Choose, select, elect, opt, cull, hand-pick, prefer, single out.

Ana. *Take, seize, grasp: determine, *decide, settle.

Con. Reject, spurn, refuse, *decline.

picked. *Select, elect, exclusive.

pickle, *n.* *Predicament, plight, dilemma, quandary, scrape, fix, jam.

pictorial. *Graphic, vivid, picturesque.

picturesque. Vivid, *graphic, pictorial.

Ana. Charming, attractive, alluring (see under ATTRACT): conspicuous, salient, striking, arresting (see NOTICEABLE).

pie. *Confusion, disorder, chaos, disarray, jumble, clutter, snarl, muddle.

piece, *n.* *Part, portion, detail, member, division, section, segment, sector, fraction, fragment, parcel.

pier. *Buttress, abutment.

piere. Penetrate, probe, *enter.

Ana. *Perforate, bore, drill, puncture: rend, *tear, cleave, split, rive.

pietistic. Sanctimonious, pious, *devout, religious.

Ana. Reverencing or reverential, venerating, adoring, worshiping (see corresponding verbs at REVERE): fervid, perfervid, ardent, fervent (see IMPASSIONED): *sentimental, maudlin, romantic.

piety. Devotion, *fidelity, allegiance, fealty, loyalty.

Ana. Obedience, docility (see corresponding adjectives at OBEDIENT): fervor, ardor, zeal, enthusiasm, *passion: *holiness, sanctity.

Ant. Impiety.

pigeonhole. *Assort, sort, classify, alphabetize.

Ana. Systematize, methodize, organize, arrange, *order.

pigheaded. *Obstinate, stubborn, mulish, stiff-necked, bullheaded, dogged, pertinacious.

Ana. Headstrong, willful, recalcitrant, refractory (see UNRULY): *contrary, perverse, froward.

pilaster. *Pillar, column.

pile, *n.* 1 Heap, stack, mass, bank, shock, cock. See under HEAP, *v.*

2 *Building, edifice, structure, fabric.

pile, *v.* *Heap, stack, mass, bank, shock, cock.

Ana. *Gather, collect, assemble, congregate: *accumulate, amass, hoard.

pilfer. *Steal, filch, purloin, lift, pinch, snitch, swipe, cop.

Ana. Seize, *take, grasp, grab, snatch: *catch, capture: *rob, rifle, loot, plunder.

pilgrimage. *Journey, voyage, tour, trip, jaunt, excursion, cruise, expedition.

pillage, *n.* *Spoil, plunder, booty, prize, loot, swag.

Ana. *Cupidity, rapacity, avarice, greed: robbery, *theft.

pillage, *v.* *Ravage, devastate, waste, sack, despoil, spoliage.

Ana. Plunder, loot, *rob, rifle: invade, encroach, *trespass: confiscate, *arrogate, appropriate, usurp.

pillar. **Pillar, column, pilaster** come into comparison as denoting a structure that rises high from a base or foundation and that is slender in comparison with its width, and is typically (though often only apparently) monolithic and decorative. **Pillar** is the general term, for it applies to any such structure whether it stands alone (as, an obelisk is a kind of *pillar*; "But his wife looked back from behind him, and she became a *pillar* of salt"—*Genesis* xix. 26) or is a supporting architectural member of a building or similar structure (as, "Samson took hold of the two middle *pillars* upon which the house stood"—*Judges* xvi. 29; "The building was a spacious theatre, Half round on two main *pillars* vaulted high"—*Milton*). In figurative use, *pillar* usually applies to that which

stays or supports (as, "The four *pillars* of government . . . religion, justice, counsel, treasure"—*Bacon*; "The Classics have . . . lost their place as a *pillar* of the social and political system"—*T. S. Eliot*), but when the application is to persons (the most common current application) the term usually suggests the character of one who supports, though it may also imply leadership, prominence, or similar qualities (as, he is a *pillar* of the church; "[Mark Twain's] circle of friends had come to include most of the main *pillars* of American society"—*Van W. Brooks*). **Column** in architectural use strictly applies to a supporting pillar that is often, but by no means always, cylindrical and free at every point except its bottom and top. The term commonly also implies three more or less elaborate parts, the base, by which it is attached to the floor, the shaft, often a fluted or channeled cylinder which rises high from the base, and the capital, the uppermost member which crowns the shaft and takes the weight, or its share of the weight, of that which rests on it. By the shape and decoration of these three parts, especially of the shaft and capital, columns are classifiable as belonging to Doric, Ionic, Corinthian, or other styles of architecture. But *column* is also applicable to a monument or memorial fashioned in the manner of an architectural column, but serving usually as a pedestal for the statue of the person who is honored; as, Nelson's *Column* in London. By extension, the term is also applicable to anything that suggests a column as in shape (as, a *column* of smoke) or in use or structure (as, the spinal *column*), or the like. Very generally it is applied to anything that is long and relatively narrow; as, the *columns* of a newspaper page; the well-known writer of a *column* (i.e., of a special article usually taking a newspaper column); a *column* of figures; a *column* of infantry. **Pilaster**, though used with reference to a supporting member of a piece of furniture, is chiefly employed with reference to an architectural member which in function is a pier (see *pier* under BUTTRESS) but which in design and treatment resembles a column. In this latter sense, *pilaster* implies engagement or attachment to a wall and suggests a rectangular rather than cylindrical form.

pilot, *v.* Steer, *guide, lead, engineer.

Ana. Direct, manage, *conduct, control: *handle, manipulate.

pinch, *v.* *Steal, pilfer, filch, purloin, lift, snitch, swipe, cop.

pinch, *n.* *Juncture, pass, exigency, emergency, contingency, strait, crisis.

Ana. *Difficulty, hardship, rigor, vicissitude.

pinched. *Haggard, cadaverous, worn, careworn, wasted.

Ana. Gaunt, scrawny, skinny, angular, rawboned (see LEAN, *adj.*).

Con. *Strong, sturdy, stout, stalwart: robust, *healthy.

pinch hitter. *Substitute, supply, locum tenens, alternate, understudy, double, stand-in.

pine, *v.* *Long, yearn, hanker, hunger, thirst.

Ana. Crave, covet, *desire: languish, enervate (see corresponding adjectives at LANGUID).

pinnacle. *Summit, peak, apex, acme, climax, culmination, meridian, zenith, apogee.

pious. *Devout, religious, pietistic, sanctimonious.

Ana. *Holy, sacred, divine, religious: worshiping, adoring, reverencing, venerating, revering (see REVERE): fervent, ardent, fervid (see IMPASSIONED).

Ant. Impious.

piquant. *Pungent, poignant, racy, spicy, snappy.

Ana. *Incisive, trenchant, cutting, biting, clear-cut.

Ant. Bland. — **Con.** *Insipid, flat, banal, jejune, inane.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

pique, *n.* *Offense, resentment, umbrage, dudgeon, huff.

Ana. Annoyance, vexation, irking or irk (see corresponding verbs at ANNOY): irritation, exasperation, provocation (see corresponding verbs at IRRITATE).

pique, *v.* 1 *Provoke, excite, stimulate, quicken, galvanize.

Ana. *Stir, rouse, arouse: prick, punch (see PERFORATE): kindle, ignite, inflame (see LIGHT, *v.*).

2 *Pride, plume, preen.

pirouette, *v.* *Turn, revolve, rotate, gyrate, circle, spin, whirl, twirl, wheel, eddy, swirl.

pitch, *v.* Hurl, fling, cast, *throw, toss, sling.

Ana. Heave, *lift, raise, hoist: *move, drive, impel.

piteous. *Pitiful, pitiable.

Ana. Imploring, supplicating, entreating, beseeching (see BEG): *melancholy, doleful, dolorous, plaintive.

pithy. Summary, compendious, *concise, terse, succinct, laconic.

Ana. Sententious, pregnant, meaningful, *expressive: *brief, short.

Con. Flatulent, *inflated, tumid, turgid: prolix, diffuse, *wordy, verbose.

pitiable. 1 Piteous, *pitiful.

Ana. Sad, depressed, dejected, melancholy (see corresponding nouns at SADNESS): forlorn, hopeless, despairing, desperate, *despondent.

2 Despicable, *contemptible, sorry, scurvy, cheap, beggarly.

Ana. *Miserable, wretched: deplorable, lamentable (see corresponding verbs at DEPLORE).

pitiful. Pitiful, piteous, pitiable are synonymous adjectives only when they mean arousing or deserving pity or compassion. Even in this sense they are not always interchangeable. Pitiful applies generally to that which actually excites pity or, sometimes, commiseration, because it is felt to be deeply pathetic; as, their distress was *pitiful*; a long line of *pitiful* refugees. "Her face looked pale and extinguished. . . . She struck Archer, of a sudden, as a pathetic and even *pitiful* figure" (E. Wharton). Piteous implies not so much an effect on the observer, as a character in the thing that excites pity; thus, a cry is *piteous* if it implores or demands attention or pity; it is *pitiful* only if it actually excites pity; one may scorn a *piteous* appeal, but it would be a contradiction in terms to scorn a *pitiful* appeal. "Cashel cast a glance round, half *piteous*, half desperate, like a hunted animal" (Shaw). Pitiable is preferable (especially in current good use) to *pitiful* when a contemptuous commiseration is implied, but contempt may be weakly or strongly connoted (see also CONTEMPTIBLE). "That *pitiable* husk of a man who a hundred years ago was a familiar figure in its streets, a shadow of his former insolence and splendour" (Lucas). Of all these words only *pitiful* is now employed as meaning full of pity or compassion, but even so its use is chiefly archaic or poetic in this sense; as, "Fair maid, be *pitiful* to my great woe" (Keats); "tender-hearted, meek and *pitiful*" (Shelley). **Ana.** Touching, *moving, pathetic, affecting: *tender, compassionate, responsive, sympathetic.

Ant. Cruel.

piteance. *Ration, allowance, dole.

pity, *n.* Pity, compassion, commiseration, ruth, condolence, sympathy, empathy, bowels agree in meaning a feeling for the suffering, distress, or unhappiness of another. Pity usually implies sorrow or a melting of the heart with tenderness for the one who is suffering or unhappy; as, "The still tears, stealing down that furrow'd cheek, Spoke *pity*, plainer than the tongue can speak" (Crabbe); "*pity* . . . that was for the murderer on

the scaffold, as it was for the dying soldier or the martyr on the rack" (Cather); "orators by phrases could move crowds to fury or to *pity*" (Bennett). Sometimes, however, the term denotes an emotion aroused in the strong or the self-sufficient for the weak or inferior (as, "scornful *pity*"—Tennyson; "Bawdiness, which leaves us less with a sense of repugnance for the man who could write it than with a sense of *pity* for the man who could think of nothing better"—T. S. Eliot), or for that which is highly regrettable (as, "'Tis *pity* love should be so contrary"—Shak.). **Compassion**, in precise use, usually suggests tender pity that inspires mercy or charity: the term when used not merely as another word for *pity*, but as a word with distinctive values, connotes an urgent desire to aid or to spare; as, "There was a dead man carried out, the only son of his mother, and she was a widow. . . . And when the Lord saw her, he had *compassion* on her" (Luke vii. 12-13); "In his *casa* every day was Friday—unless one of his neighbour women cooked a chicken and brought it in to him out of pure *compassion*" (Cather); "A great wave of *compassion* had swept away his indifference and impatience" (E. Wharton). **Commiseration** carries a strong implication of pity expressed outwardly as in words, tears, cries, or the like: it often also suggests the attitude of one who sees misery and suffers with the person involved in it, but can neither help him nor relieve it; as, "While we look at Samson. . . we are forced to think of Milton, of his blindness, of his abandonment, with as deep a *commiseration*" (Landon); "There was a murmur of *commiseration* as Charles Darnay crossed the room to a grated door" (Dickens); "Here was cause for *commiseration*: All his forty years Mrs. Day had dominated her son's life" (Deland). Ruth (a term of archaic flavor) differs from *compassion* chiefly in implying a change from hardness of heart, anger, indifference, or the like, to merciful pity; as, "Look homeward, Angel, now, and melt with *ruth*" (Milton); "is the truth Within your soul? care for your own, or *ruth* For others' sufferings?" (Shelley). **Condolence** etymologically and in its earliest, but now less frequent, meaning denotes a grieving with another who has suffered a loss or great misfortune; as, he deserves *condolence* rather than congratulation on his marriage. In current use, the term applies chiefly to such a sentiment formally expressed, or to the note, letter, telegram, or the like, expressing such a sentiment; as, a letter of *condolence*; she sent her personal card to the bereaved parents with "Condolences" written upon it; they received *condolences* from as many as two hundred friends. **Sympathy** (etymologically, suffering with) is often used in place of *pity* or *compassion* (as, his plight aroused her *sympathy*) or in place of *condolence* (as, to offer one's *sympathy* to a bereaved friend), but in its precise meaning, it implies a power to enter into another's emotions or experiences, whether of a sorrowful or joyful nature, as by sharing them, by truly understanding them, or by being equally affected by them; as, "a boy goes for *sympathy* and companionship to his mother and sisters, not often to his father" (A. C. Benson); "the rebel, as a human type entitled to respect and often to *sympathy*" (R. E. N. Dodge); "Amid the various feelings she was aware of arousing, she let me see that *sympathy*, in the sense of a moved understanding, had always been lacking" (E. Wharton). "Ah, then that was it! He was a lonely old man, who didn't want to live in constant reminder of happy times past. . . . Tony. . . felt a quick *sympathy* with him" (Arch. Marshall). **Sympathy** is also applicable to anything that engages one's interest, sometimes because one is in agreement with its aims, accomplishments, principles, or tenets, and is attached to it (as, "the stepfather was a moderate Pompeian

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

in *sympathies*"—*Buchan*), but more often because one has the imaginative capacity to enter into it and understand it in its true nature (as, "a creative writer can do his best only with what lies within the range and character of his deepest *sympathies*"—*Cather*). *Empathy* applies to the imaginative power which enables a person, especially an artist, to understand the emotions and experiences of others and to sympathize with them. "The active power of *empathy* which makes the creative artist, or the passive power of *empathy* which makes the appreciator of art" (*Rebecca West*). *Bowels*, which in Scriptural and other use was applied to the seat of compassion much as *heart* is today (as, "And Joseph made haste; for his *bowels* did yearn upon his brother"—*Genesis* xliii. 30), now less often than formerly denotes pity or compassion. "I am a man that can feel for my neighbours. I have *bowels*—yes I have *bowels*" (*Lynton*).

Ana. *Sadness, melancholy, dejection, depression: *pathos, poignancy: *charity, mercy, clemency, lenity.

pity or **pixie**. *Fairy, faery, fay, elf, sprite, gnome, dwarf, goblin, brownie, puck, nix, shee, leprechaun, banshee.

placate, *v.* *Pacify, appease, mollify, propitiate, conciliate.

Ant. Enrage. — *Con.* *Anger, infuriate, incense, mad-den: *stir, arouse, rouse: *provoke, excite, stimulate, pique.

place, *n.* *Position, situation, office, post, job, berth, billet, capacity.

Ana. Employment, occupation, *work, calling, pursuit, métier, business: *function, office, duty, province.

placid. *Calm, tranquil, serene, peaceful, halcyon.

Ana. Imperturbable, nonchalant, *cool, collected, composed: gentle, mild, lenient (see *SOFT*): *steady, equable, even, constant.

Ant. Cholerick (*of persons*): ruffled (*of things*).

plague, *v.* Pester, tease, tantalize, harry, harass, *worry, annoy.

Ana. Gall, fret, chafe (see *ABRADE*): *bait, badger, hector, hound, ride: torment, *afflict, try.

Con. *Relieve, mitigate, lighten, assuage, alleviate.

plain, *adj.* 1 Plane, flat, *level, even, smooth, flush.

Ant. Solid.

2 Clear, distinct, obvious, *evident, manifest, patent, apparent, palpable.

Ana. *Clear, lucid, perspicuous: *explicit, express, definite, specific, categorical.

Ant. Abstruse.

3 *Frank, candid, open.

Ana. Forthright, *straightforward, aboveboard: blunt, *bluff: *sincere, unfeigned.

plaintive. Dolorous, doleful, *melancholy, lugubrious, rueful.

Ana. Pensive, reflective, meditative, *thoughtful: lamenting, deploring (see *DEPLORE*): *pitiful, piteous.

plait or **pleat** or **plat**. *Weave, knit, crochet, braid, tat.

plan, *n.* *Plan, design, plot, scheme, project* come into comparison both as nouns, when they denote a proposed method of doing or making something or of achieving a given end, and as verbs, when they mean to devise such a method. *Plan*, in its widest sense, always implies mental formulation of the method; as, to *plan*, or make *plans* for, a trip to Europe (or for the future of one's children, for a new book, for an expansion of one's business); "While she sat maturing this *plan*" (*Galsworthy*). In a narrower sense, the terms may imply a graphic representation of that method, as by a mechanical drawing, a chart, a sketch, a layout, or the like; as, an architect's set of *plans*; to *plan* a garden. "The basement of St.

Katherine's Dock House is vast in extent and confusing in its *plan*" (*Conrad*). *Design* (see also *INTENTION*) adds to *plan* an emphasis on intention (often artistic, sometimes divine, intention) in the disposition of individual members or details, often thereby suggesting a definite pattern; since it is used frequently in reference to a completed work, it often implies reference to the degree in which order, harmony, or integrity have been achieved in spite of diversity in the parts, or in which there is the beauty that results from unity in variety. "It...like most architecture erected since the Gothic age, was a compilation rather than a *design*" (*Hardy*). "Buildings are not grouped like that by pure accident, though convenience probably had much to do with it. Convenience often dictates very sound *design*" (*Cather*). "A curious woman, whose dresses always looked as if they had been *designed* in a rage" (*Wilde*). *Plot*, as here narrowly considered (see *PLOT*, *n.*, 2; *SKETCH*, *v.*), usually connotes a laying out in clearly distinguished and carefully proportioned sections or divisions, and attention to proper placing and due relation of the parts, and to scale. It is now found chiefly in technical use, as in surveying, where it suggests a ground plan (as, to *plot* a tract of land), or as in literature, where it refers to a fundamental design which the action of a drama or narrative follows; as, there is plenty of action in this play, but no *plot*. *Scheme* has nearly lost its early implication of a diagram except in some technical senses where it suggests tabulation more often than outline drawing; as, the rhyme *scheme* of a Shakespearean sonnet. Nevertheless, the word often suggests, more than *plan* does, system and careful choice or ordering of details; as, to work out a *scheme* for the distribution of war refugees. "She seldom *schemed*, but when she did *scheme*, her plans showed...the comprehensive strategy of a general" (*Hardy*). In current use, the terms often connote, singly or in combination, self-delusion, craftiness, or self-seeking on the part of the agent. "He it was *schem'd* the snare thus subtly wrought" (*Browning*). "He doesn't *scheme* and twist things about trying to get the best of some one else" (*S. Anderson*). "A lurking suspicion that our work was...a *scheme* to superimpose American economic control upon ingenuous foreign countries" (*V. Heiser*). *Project* comes close to *scheme* except in its connotations. Sometimes it suggests enterprise; sometimes, imaginative scope or vision; sometimes, mere extensiveness. "Sanguine *schemes*, Ambitious *projects*, pleased me less" (*Wordsworth*). "Such were my *projects* for the city's good" (*Browning*). "I *projected*, and drew up a *plan* for the union" (*Franklin*). "The difference between *scheme* and *project* is best shown in their derivatives *schemer* and *projector*, the former commonly carrying the specific meaning of a deviser of ways and means to attain his own ends, and the latter, of a promoter of grand, often chimerical, schemes.

Ana. *Intention, intent, purpose: *idea, conception, notion: *chart, map, graph: diagram, outline, sketch (see under *SKETCH*, *v.*).

plan, *v.* Design, plot, scheme, project. See under *PLAN*, *n.*

Ana. Propose, purpose, *intend: *sketch, outline, diagram, delineate.

plane, *adj.* Plain, flat, *level, even, smooth, flush.

Ant. Solid.

plank. *Paragraph, verse, article, clause, count.

plastic. *Plastic, pliable, pliant, ductile, malleable, adaptable* are here compared as they are applied to things and to persons regarded as material susceptible of being modified in form or nature. That is *plastic* which has, literally or figuratively, the quality of wax, clay, or plaster, soft enough to be molded or to receive an im-

pression yet capable of hardening into the given form. "The language at the period during which the Bible was being translated into English was in its most *plastic* stage" (*Lowes*). "When children are small we elders in charge are apt to suppose them altogether *plastic*" (*H. G. Wells*). That is *pliable* or *pliant* which has, literally or figuratively, the quality of willow twigs, supple enough to be easily bent or manipulated and therefore yielding without resistance. *Pliable*, in figurative use, usually suggests the imposition of, or submission to, another's will. "I flatter myself that I have some influence over her. She is *pliable*" (*Hardy*). "Assertiveness is [not] the only mannish trait taken on by successful women, nor is *pliability* the only feminine mark they lose" (*M. Austin*). *Pliant*, on the other hand, suggests flexibility rather than obedience. "Art which is alive and *pliant* in the hands of men" (*Quiller-Couch*). That is *ductile* which has the quality of copper and other tensile metals, tenacious enough to be permanently drawn out or extended, or of water and some other fluids that can be made to flow through channels; thus, platinum is the most *ductile* of all metals; the *ductility* of heated asphalt is tested by a machine. In figurative use, *ductile* often approaches *plastic* and *pliant*. Discriminating writers, however, give it connotations directly derived from its literal senses, such as quick responsiveness (as distinguished from submissiveness) to influences that would form, guide, or fashion. "Bingley was endeared to Darcy by the easiness, openness, and *ductility* of his temper" (*Austen*). "Verse . . . is easier to write than prose. . . . Mr. Shaw would have found his story [Cashel Byron's Profession] still more *ductile* in the metre of Hiawatha" (*Quiller-Couch*). Sometimes fluidity within bounds is connoted. "Smooth, *ductile*, and even, his fancy must flow" (*Cowper*). That is *malleable* which is literally (like most metals) or figuratively capable of being beaten or pressed into shape, especially after being conditioned as by heating. "Tempera . . . rendered *pliant* and *malleable* in the fiery furnace of domestic tribulation" (*Irving*). "Truth independent; truth that we find merely; truth no longer *malleable* to human need" (*W. James*). That is *adaptable* which is capable of being modified or of modifying itself to suit other conditions, other needs, or other uses. As applied to persons it implies sometimes a *pliant*, but more often an accommodating, disposition and a readiness to make one's habits, one's opinions, one's wishes, correspond to those of one's present society or environment; as, it is often said that men are less *adaptable* than women.

Ans. Flexible, supple, *elastic, resilient: tractable, amenable (see OBEYDIENT).

Con. Rigid, *stiff, inflexible.

plat, *adj.* Dialectal variant of FLAT, *adj.* (sense 1).

plat, *v.* Variant of PLAIT.

platitude. *Commonplace, truism, bromide, cliché.

Ans. Banality, inanity, vapidity, insipidity (see corresponding adjectives at INSIPID): mawkishness, sentimentality (see corresponding adjectives at SENTIMENTAL).

plaudits. *Applause, acclamation, acclaim.

Ans. Cheering, hurraing, huzzaing (see APPLAUD).

plausible. *Plausible*, *credible*, *believable*, *colorable* (or *colourable*), *specious* come into comparison as meaning capable of impressing the observer, auditor, or reader as truly or genuinely having or possessing the quality or character that is set forth or claimed. A thing (sometimes a person) is *plausible* (etymologically, worthy of applause) that is capable of winning acceptance, approval, belief, or the like, by its (or his) apparent possession of certain qualities which make it (or him) seem pleasing,

genuine, or reasonable at first sight or hearing: the word may or may not definitely imply a false outside, or an intention to deceive, or a lack of soundness, but it usually connotes such a possibility, even though it also clearly suggests its (or his) ingratiating or mentally satisfying character; as, a *plausible* argument; a *plausible* rogue. "That is a perfectly intelligible position, and it is *plausible* to the last degree" (*Lowes*). "He was a grey-haired man, with a *plausible* voice and careful manners" (*Joyce*). "A fairly *plausible* case can be made out for expecting that far fewer marriages and families will be broken up under Socialism than at present" (*Shaw*). "Aristotle . . . while admitting that Plato's scheme has a *plausible* appearance of philanthropy, maintains that it is inapplicable to the facts of human nature" (*G. L. Dickinson*). A thing (less often a person) is *credible* that appeals to another as worthy of belief or of being credited, sometimes because of plausibility, but more often because of its (or his) support by known facts, or by sound reasoning; as, a *credible* explanation; a *credible* witness; "Right reason makes that which they say appear *credible*" (*Hobbes*). "A theory which denies the truth of one of our fundamental convictions about our own minds must have very strong evidence from other quarters to make it *credible*" (*Inge*). A thing that is credible because it comes within the range of possibility or probability, or because it is in accordance with other facts that are known, is *believable*; as, a *believable* plot; a *believable* situation; it is not *believable* that he could commit perjury. A thing is *colorable* which at least on its face or outwardly seems true, just, valid, or the like, or which is capable to some extent of being sustained or justified; as, no *colorable* evidence has as yet been presented in support of this theory; so far as is known he holds no *colorable* title to the estate; "They gathered together many of her maladministrations, for which they might the more *colorably* put her out of office" (*Bp. Burnet*); "Both might *colourably* have pleaded that they were, after all, writing Latin" (*Quiller-Couch*). A thing or, less often, a person is *specious* that is outwardly or apparently attractive, beautiful, valid, sincere, or the like, but that is inwardly or actually the reverse in character. *Specious* is the only one of these terms that, in current use, always clearly implies dissimulation, or fraud, or deceit, or hypocrisy; as, *specious* picturesqueness; *specious* piety; a *specious* rogue; "they sanctified the worse cause with the *specious* pretext of zeal for the furtherance of the best" (*Cowper*); "some writers are . . . content with a transient notoriety attained by deliberate and *specious* obscurification" (*Day Lewis*); "effusions of fine sentiments about brotherly love that are only a *specious* mask for envy and hatred of riches and success" (*Babbitt*).

Ans. Smooth, bland, politic, diplomatic, *suave: likely, *probable, possible: unctuous, *falsome, sleek, oily.

play, *v.* **Play**, *sport*, *disport*, *frolic*, *rollick*, *romp*, *gambol* come into comparison as verbs meaning to engage in exercise or other activity as a pleasure or amusement, and as nouns meaning exercise or activities engaged in for the sake of pleasure or amusement. **Play**, the most general of these terms, suggests an opposition to *work*: like its antithesis, it usually implies activity, often vehement activity, of body or mind, but it emphasizes the absence of any end except that of amusement, diversion, recreation, or pure enjoyment; as, children *play* for hours at keeping house; to *play* chess; to *play* tennis; "All work and no *play* makes Jack a dull boy" (*Old Proverb*); "She is weary of dance and *play*" (*Tennyson*). "I never knew what was *play* and what was work. No *play* is interesting to me unless it effects work, and no work is possible to me unless it possesses the amusement of *play*" (*H. Ellis*).

"They had been . . . transformed from a dejected, downcast, docile, uninterested people, who could not even play, into one which was healthy, alert" (V. Heiser). Sport and the now archaic or poetic original form *disport* suggest a complete release not only from work but from seriousness: the terms imply indulgence in that which cheers, makes merry, or, especially in current use, serves as a pastime; as, "If all the year were playing holidays, To sport would be as tedious as to work" (Shak.); "Sport that wrinkled Care derides" (Milton); "See the children sport upon the shore" (Wordsworth); "And by him sported on the green His little grandchild Wilhelmine" (Southey); "A day for toil, an hour for sport" (Emerson); "when . . . my *disports* corrupt and taint my business, Let housewives make a skillet of my helm" (Shak.); "We make ourselves fools, to *disport* ourselves" (Shak.); "Say, Father Thames, for thou hast seen Full many a sprightly race *Disporting* on thy margent green" (Gray). Frolic suggests more gaiety, more levity, more spontaneousness than any of the preceding terms: it often is used in reference to the lighthearted, joyous movements of children (or, by extension, of young animals) at play, but it also suggests the pastimes, antics, or pranks of those who have thrown off all care; as, "I come to frolic with you, and to cheer Your drooping souls" (J. Ford & Dekker); "They sang as blithe as finches sing . . . And frolic where they list" (Cowper); "Those who meet as we have met, In frolic and in laughter" (Praed); "their sedateness is as comical as their *frolic*" (Meredith). Rollick (infrequent as a noun: now used chiefly in the form *rollicking*) adds to *frolic* implications of exuberance in gaiety and of reveling and therefore is used especially in reference to youths or young adults; as, "*Rollicking* blades" (T. Hook); a party of young folk off for a *rollick*; "Q. appears as a *rollicking* humorist. . . . He *rollicks*, perhaps, a little too laboriously" (Pall Mall Gazette). Romp suggests the boisterous carefree frolicking of children, of rough boys, and of hoydens: it usually connotes running or racing in play; as, "This careless jade was eternally *romping* with the footman" (Steele); "I have been having a *romp* with my godson" (M. E. Braddon). Gambol suggests the leaping and skipping characteristic of lambs and young children; it comes close to *frolic*, but carries a stronger suggestion of joy in movement; as, "Where be your gibes now? your *gambols*? your songs? your flashes of merriment . . . ?" (Shak.); "Their pigmy king, and little fairy queen, In circling dances *gamboll'd* on the green" (Pope).

Ana. Divert, entertain, recreate, *amuse: *trifle, toy, dally.

2 *Act, impersonate, personate.

Ana. Feign, simulate, counterfeit, *assume.

play, v. 1 Sport, disport, frolic, rollick, romp, gambol. See under PLAY, v., 1.

Ana. Enjoyment, delectation, *pleasure, delight: amuse-ment, diversion, recreation, entertainment (see under AMUSE): *athletics, sports, games.

Ant. Work.

2 *Fun, jest, sport, game.

Ant. Earnest.

player. *Actor, performer, mummer, mime, Thespian, impersonator, troupier.

playful. Playful, frolicsome, sportive, roguish, waggish, impish, mischievous, wanton come into comparison as meaning given to play, jests, or tricks, or indicative of such a disposition or mood. Playful stresses either lighthearted gaiety or merriment (as, *playful* children; in a *playful* mood) or a lack of seriousness or earnestness (as, his words were serious, but in his eyes there was a *playful* gleam; the *playful* humor of Cowper's John Gilpin).

Frolicsome not only heightens the implications of *playful*: it carries a stronger suggestion of friskiness or prankishness or irresponsible merriment; as, "Mingled with the more decent holiday-makers there were *frolicsome* apprentices" (G. Eliot); "the voice might proceed from a very *frolicsome* and tricky creature, full of wild fantastic humours, but nothing worse" (Hudson). **Sportive** carries a stronger implication of jesting or of levity than either of the preceding words; the term infrequently implies excess of animal spirits, but it usually connotes a desire to evoke or provoke laughter. "Three generations of serious and of *sportive* writers wept and laughed over the venality of the senate" (Macaulay). "Strength is a God to you: Purity a toy. A pretty one, and you seem to be fond of playing with it," he added with unaccustomed slyness. The lady listened pleased at the *sportive* malice" (Meredith). **Roguish** not only heightens the implications of *sportive*, but it suggests an engaging naughtiness or slyness. "The most bewitching leer with her eyes, the most *roguish* cast" (Dryden); "'I don't think I shall want anything else when we've got a little garden; and I knew Aaron would dig it for us,' she went on with *roguish* triumph" (G. Eliot). **Waggish** suggests a less engaging sportiveness than *roguish* and one less delicate in its character: usually also the term carries a stronger suggestion of jocoseness or of jocularity; as, "With all his overbearing roughness there was a strong dash of *waggish* good-humor at bottom" (Irving). **Impish** adds to *roguish* a hint of elfish, malicious mockery; as, "teasing . . . with *impish* laughter half suppressed" (Hardy); to take *impish* delight in the falls of other skaters. **Mischievous** in current, and especially American, use combines the implications of *frolicsome* and *impish*: it may also, as formerly, imply the doing of mischief (see *mischief* under INJURY, 1), or the causing of an injury to others; as, "The opinions, principles, and practices, which I thought so very *mischievous*" (Burke); often, however, it suggests little more than thoughtless indifference to the possible effects of one's sports, tricks, or practical jokes; as, a garden ruined by *mischievous* boys; the child is as *mischievous* as a monkey; "She . . . was . . . waked by Meta, standing over her with a sponge, looking very *mischievous*" (C. M. Yonge). **Wanton**, as here compared (see also SUPEREROGATORY, LEWD), is now archaic in the sense of *sportive* or *frolicsome*, but it occurs frequently in the English classics, especially as applied to children and to animals. So used, however, the term commonly retains from its earliest sense an implication of unruliness or lack of discipline and, therefore, suggests a running wild or without restraint. "As flies to *wanton* boys, are we to the gods, They kill us for their sport" (Shak.); "Wanton as a child, skipping and vain" (Shak.). In current use, this original implication is still often stressed, and that of sportiveness is somewhat obscured or even lost; as, "to produce in the child the same respect for the garden that restrains the grown-ups from picking *wantonly*" (B. Russell).

Ana. Gay, sprightly, *lively: *merry, blithe, jocund, jolly, jovial: mirthful, gleeful, hilarious (see corresponding nouns at MIRTH).

plea. 1 *Apology, apologia, excuse, pretext, alibi.

Ana. Explanation, justification, rationalization (see corresponding verbs at EXPLAIN): defense, vindication (see corresponding verbs at MAINTAIN).

2 *Prayer, suit, petition, appeal.

Ana. Entreaty, supplication, imploring, beseeching, begging (see corresponding verbs at BEG).

plead, v. Pray, sue, petition, appeal. See under PRAYER.

Ana. Entreat, implore, supplicate, beseech, *beg: intercede, mediate, intervene, *interpose.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Con. Bestow, confer, present, *give: *grant, vouchsafe, accord.

pleasance or pleasaunce. *Amenity, luxury.

pleasant. Pleasant, pleasing, agreeable, grateful, gratifying, welcome are comparable when they mean highly acceptable to the mind or the senses. Pleasant and pleasing are often indistinguishable; however, *pleasant* usually imputes a quality to the object to which it is applied, and *pleasing* suggests merely the effect of the object upon one; as, a *pleasant* answer, a *pleasing* answer; a *pleasant* face, a *pleasing* face. "Your mother... is a very *pleasant* person to live with" (*Ad. Austin*). "The thought of gazing on life's Evening Star makes of ugly old age a *pleasing* prospect" (*L. P. Smith*). **Agreeable** implies harmony with one's tastes or likings; as, an *agreeable* (cf. a *pleasant*) taste, odor. "If I was obliged to define politeness, I should call it the art of making oneself *agreeable*" (*Smollett*). **Grateful** carries the implications of both *pleasing* and *agreeable*; in addition it stresses the satisfaction or relief afforded the senses or, somewhat less often, the mind. "They... lay down on the clean grass under the *grateful* shade of the tall cottonwoods" (*Cather*). "Only occasional voices from the road outside came to disturb the *grateful* sense of quiet and seclusion" (*A. Marshall*). **Gratifying** is applied chiefly to that which affords mental pleasure to the individual by satisfying his desires, hopes, conscience, or the like; as, the reviews of his book were very *gratifying*. "The *gratifying* feeling that our duty has been done" (*W. S. Gilbert*). **Welcome** even more than *pleasing* stresses the pleasure or satisfaction given by the thing to which it is applied; it often suggests prior need or an answer to one's longings; as, the explorers found fresh fruit and vegetables a *welcome* addition to their diet; the news was most *welcome*.

Ana. Charming, attractive, alluring (see under ATTRACT, v.): *soft, gentle, mild, balmy.

Ant. Unpleasant; distasteful; harsh.

please, v. Please, gratify, delight, rejoice, gladden, tickle, arride, regale agree in meaning to make happy, or to be a cause of happiness. Please usually implies an agreement with one's wishes, tastes, or aspirations, and a happiness which ranges from mere content and the absence of any ground for displeasure to actual elation; as, the family was *pleased* with the daughter's marriage; the aim of poetry is to *please*; the suggestion did not *please* him; the promotion *pleased* not only Henry, but all his friends. **Gratify** (cf. *gratifying* under PLEASANT) suggests an even stronger measure of satisfaction than *please* and is invariably positive in its implication of pleasure; as, "he wished to *gratify* his son by these eulogies of Lucy" (*Meredith*); "It *gratifies* us to imagine that... we have reached a point on the road of progress beyond that vouchsafed to our benighted predecessors" (*H. Ellis*). "It *gratified* him to have his wife wear jewels; it meant something to him" (*Cather*). **Delight** stresses the emotional rather than the intellectual quality of the reaction, though the latter is often also implied; it suggests intense, lively pleasure that is not only keenly felt but, usually, vividly expressed in the countenance or in outward actions. "O, flatter me; for love *delights* in praises" (*Shak.*); "Sailors to tell of winds and seas *delight*" (*Gray*); "gazed From the watch-towers of Helvellyn; Awed, *delighted*, and amazed!" (*Wordsworth*); "The soul *delighted* on each accent dwells,— Enraptur'd dwells,—not daring to respire" (*Keats*). **Rejoice** implies a happiness that exceeds bounds, and reveals itself as in smiles, in song, in festivities, in enthusiastic effort, or the like; as, "Rejoice, you men of Angiers, ring your bells" (*Shak.*); "Rejoice the soul of thy servant: for unto thee, O Lord, do I lift up my soul" (*Psalms lxxxvi. 4*). "Hendrik worked,

rejoicing in the strength that God had given him, in his skill, in his power, and in his capacity for righteous anger" (*S. Cloete*). **Gladden** sometimes is indistinguishable from *rejoice* except in rarely suggesting excess of emotion and in being usually transitive. "A small *pleasantry* frankly uttered by a patron, *gladdens* the heart of the dependant" (*Irving*). It often, however, connotes a raising of the spirits, or a cheering or consoling in depression or grief. "Even so thy latent worth will re-appear, *Gladdening* the people's heart from shore to shore" (*Wordsworth*). **Tickle, arride, and regale** involve the idea of delight, but they are often less dignified in their connotations. **Tickle** implies pleasurable sensations, such as tingles and thrills, or it suggests an almost physical gratification; as, food that *tickles* the palate. "Something... that thrilled and *tickled* my heart with a feeling partly sensuous and partly spiritual" (*N. Hawthorne*). Sometimes, with reference to physical tickling it suggests provocation of laughter. "The mimic court of justice in the orchard *tickled* him immensely" (*Deland*). **Arride** suggests a delight that is sometimes near derision but always provoked by that which is amusing or engaging. The word is not now common, but is found in the work of some very good writers. "That conceit *arrided* us most... and still tickles our midriff to remember" (*Lamb*). "As he [Stevenson] would have said, it [his writing] *arrides* you; wherever you open him... and read a sentence or two... whatever he means to convey at the time is being vivaciously put" (*C. E. Montague*). **Regale** always connotes huge enjoyment or a feasting upon that which gives pleasure; as, "The sight is *pleased*. The scent *regaled*" (*Cowper*); "Mr. Sycamore was *regaling* himself with the discomfort of Lady Charlotte" (*H. G. Wells*).

Ana. *Satisfy, content: elate, exult (see corresponding adjectives at ELATED): beguile, *while, wile.

Ant. Displease: anger: vex.

pleasing. *Pleasant, agreeable, grateful, gratifying, welcome.

Ana. Winning (see GET): ingratiating, *disarming; charming, attractive, alluring, enchanting (see under ATTRACT).

Ant. Displeasing: repellent.

pleasure. Pleasure, delight, joy, delectation, enjoyment, fruition are the most general terms in English for the agreeable emotion which accompanies the possession, acquisition, or expectation of that which is good or greatly desired. **Pleasure** so strongly implies a feeling of satisfaction or gratification that it sometimes carries no implication of visible happiness or actual gladness; as, "the first step [in an infant's development]... is to pass beyond mere *pleasures* of sensation, such as food and warmth, to the *pleasure* of social approbation" (*B. Russell*); "It was for him a bitter sort of *pleasure* to have... a new-comer, to whom he could repeat all these matters of grief and suspicion" (*Conrad*). Often, however, the term suggests an excitement or exaltation of the senses or of the mind that implies positive happiness or gladness; as, "When these wild ecstasies shall be matured Into a sober *pleasure*" (*Wordsworth*); a great work of art always gives *pleasure*; "the doctors found out that a man could digest his food best if he ate it with *pleasure* among cheerful friends" (*C. E. Montague*). **Delight** carries a stronger implication of liveliness, intensity, or obviousness in the satisfaction or gratification induced than *pleasure* (though not as strong an implication as in *glee*: see MIRTH); the term, however, often suggests a less stable or enduring emotion than *pleasure*; as, "What *pleasure* the possession of my money could have afforded him I am unable to say; but... as it did give him evident *delight* I was not sorry that I had parted with it so readily"

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

(*Kipling*); "Deep was the Old Dog's *delight* to hear the praises of his Beauty sounded by such aristocratic lips as the Hon. Peter Brayder's" (*Meredith*). *Joy* is often used in place of *pleasure* and still more often in the place of *delight*. It is the preferred and often the necessary term, however, when a deep-rooted, rapturous emotion is implied, or when the happiness is so great as to be almost painful in its intensity; as, "And all its aching joys are now no more, And all its dizzy raptures" (*Wordsworth*); "It expressed her happiness, relieved the pressure of her joy at being alive" (*R. Macaulay*); "Glad to be free, proud too... of stepping this famous pavement, joy of a kind, cheap, tinselly, if you like, but all the same rapture, flushed their faces" (*V. Woolf*). *Delectation* and *enjoyment* differ in the main from the other words of this group in denoting the state of mind or the sensuous or emotional reactions of one who takes pleasure, delight, or joy in something. But *delectation*, especially in current use, often carries a strong connotation of amusement, diversion, or entertainment that gives occasion for delight; as, her oddities afforded him the utmost *delectation*; to tell many witty stories for the *delectation* of his guests. *Enjoyment*, on the other hand, usually implies an attitude, or a circumstance, or a favorable response to a stimulus that tends to make one gratified or happy; as, "He gave himself up to the vigorous enjoyment of his pipe for a silent minute or two" (*Conrad*); "She drank in all the new impressions... joyously; from that moment dated her... enjoyment of French ways, and her *delight* in Paris" (*H. Ellis*); "He accepted chance and weather... with a sort of grave enjoyment" (*Cather*). *Fruition* is now so often used even by good writers and speakers in the sense of realization or fulfillment that it has become increasingly rare in its earlier and generally approved sense of pleasure in possession or of enjoyment in attainment; as, "If we live by hope let us desire the end and *fruition* of our hope" (*Latimer*); "in love we must deserve nothing, or the fine bloom of *fruition* is gone" (*Meredith*). In extended use, where realization or fulfillment is stressed and there is still some suggestion of accompanying pleasure, the employment of *fruition* is not disapproved (as, "how mature one has to be before learning... that growth is more desirable than *fruition*"—*Lucas*); where realization or fulfillment is stressed and the word implies only the bearing of fruit or the coming to an issue, and carries not the slightest suggestion of accompanying pleasure, the employment of *fruition* is regarded by some as incorrect and by others as loose (as, the *fruition* of his plan; "It [determinism] is rather the *fruition* of a scientific method which had grown up under the shelter of the old causal method"—*Eddington*).

Ana. *Happiness, felicity, bliss: amusement, diversion, recreation, entertainment (see under AMUSE).

Ant. Displeasure: anger: vexation.

pleat. Variant of PLAIT.

plebiscite. *Mandate, initiative, referendum.

pledge, n. Pledge, earnest, token, pawn, hostage, gage, as here compared, agree in denoting something that is given or held as a sign of another's faith or intention to do what has been promised. Pledge, originally and still in some applications a technical legal term, applies in general to anything (often in the past a person) handed over to another as security for the performance of an obligation, payment of a debt, or the like. "In argument and proof of which contract, Bear her this jewel, *pledge* of my affection" (*Shak.*). "They therefore sent seven galleys... as a *pledge* of their loyalty" (*Thirlwall*). **Earnest**, originally the money or other thing of value given by a buyer to a seller to bind a bargain, in its

modern extended sense applies to that which serves as a promise or assurance of more to come, or which establishes a strong probability of it; as, *earnest* money. "That holy Spirit... Which is the *earnest* of our inheritance" (*Ephesians* i. 13, 14). "It seemed to him a sort of *earnest* that Providence intended his rescue from worse consequences" (*G. Eliot*). "This zeal for making a nation's... language... correct and worthy, is... a weighty *earnest* of future power" (*Arnold*). **Token** (see also SIGN, 1) applies to anything given as a guaranty or proof of a person or thing's authority, authenticity, or good faith; as, "Give me some *token* for the surety of it" (*Shak.*); "I do set my bow in the cloud, and it shall be for a *token* of a covenant between me and the earth" (*Genesis* ix. 13). In specific concrete use, *token* is applied to something which serves as a proof of an obligation, a right, a debt, or the like; thus, a coinlike piece of metal sold by a transportation company for use as a ticket is usually called a *token*; coins, notes, and the like, issued by some countries, states, or cities, as currency at a nominal or face value above their real value as metal (or other substance) but redeemable at their face value, are collectively called *tokens*. **Pawn**, originally a close synonym of *pledge* (as, "He must leave behind, for *pawns*, His mother, wife, and son"—*Dryden*), now specifically refers only to an object of more or less value deposited as security for the money loaned on it by another, usually by a person (called a *pawnbroker*) whose business is the loaning of money on such security; as, he left his watch with the broker as a *pawn*. In very precise extended use, *pawn* often carries a suggestion of something held for a time and liable to redemption or withdrawal by the actual owner. "My life I never held but as a *pawn* To wage against thy enemies" (*Shak.*). "I held what I inherited in thee, As *pawn* for that inheritance of freedom Which thou hast sold" (*Shelley*). **Hostage** literally applies to a person handed over to another or kept by another until one's agreement or promise has been fulfilled; as, to hold the king's children as *hostages* for the safe return of the captured barons. In extended use (which is comparatively rare) the term is applicable to anything which serves as an earnest or pledge of something to come. "One who wisely schemed, And *hostage* from the future took In trained thought and lore of book" (*Whittier*). **Gage**, originally the equivalent of *pledge* in the earliest sense of that word, is now archaic in that sense; the term still occurs, however, as a designation for something which is given as a pledge (such as a glove, a cap, or the like) that a person will appear to fight an opponent, to assert a claim, or the like. In this sense, it is found chiefly in the phrase "to throw down (or fling down) the *gage*," which is figuratively to defy or to challenge one to fight.

Ana. *Guarantee, guaranty, security, surety, bond, bail.

pledge, v. *Promise, engage, plight, covenant, contract.

Ana. Bind, *tie: *swear, affirm: *commit, consign, confide, entrust.

Ant. Abjure.

plein-air. Open-air, *outdoor, alfresco.

plenary. *Full, complete, replete.

Ant. Limited.

plenteous. *Plentiful, ample, abundant, copious.

Ana. & Ant. See those at PLENTIFUL.

plentiful. Plentiful, plenteous, ample, abundant, copious denote in common more than adequate or sufficient yet not in excess. That is plentiful or plenteous of which there is great or rich supply; *plenteous* is now bookish. "Butter is cheap when it is *plentiful*, and dear when it is scarce" (*Shaw*). "The king made silver and gold... as *plenteous* as stones" (*2 Chronicles* i. 15). That is *ample*

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

which is generously sufficient to satisfy a definite requirement. "Ample apologies indeed for fifteen years of persecution" (*Macaulay*). "Their mother's fortune, though ample for her situation in life, could but ill supply the deficiency of his" (*Austen*). That is abundant which is very plentiful or of which there is an unusually large supply. "She found the fruit abundant" (*Meredith*). "His abundant vitality" (*Bennett*). Abundant sometimes implies profusion. "Abundant beautiful bright tresses" (*Meredith*). That is copious which is marked by great abundance; as, a copious supply; "A copious stream [of words]" (*Hudson*). Copious is especially applicable to that which varies in the quantity or number of things produced, yielded, used, or the like. It is, therefore, not always interchangeable with the other words. Thus, one says "a copious or plentiful supply of food" (not "food was copious"); "there was a copious crop of potatoes this year" (not "potatoes were copious this year"). "Copious showers" (*Wordsworth*). "Latin he read copiously to the end" (*Lowe*). "Copious eating and still more copious drinking" (*A. Huxley*). In literary use, copious often implies profusion of words, or richness of vocabulary, or fullness of information. "Declaimers of a copious vein" (*Berkeley*). "French, English, or any other copious language" (*Hobbes*). "Be copious and distinct, and tell me a great deal of your mind" (*Johnson*).

Ana. Fruitful, prolific (see FERTILE): sumptuous, opulent, *luxurious: *profuse, lavish, prodigal.

Ant. Scanty, scant.

pleonasm. *Verbiage, redundancy, tautology, circumlocution, periphrasis.

pliable. *Plastic, pliant, ductile, malleable, adaptable.

Ana. Lithe, limber, *supple: *elastic, resilient, springy, flexible: *compliant, acquiescent.

Ant. Obstinate.

pliant. *Plastic, pliable, ductile, malleable, adaptable.

Ana. See those at PLIABLE.

plight, n. *Predicament, dilemma, quandary, scrape, fix, jam, pickle.

Ana. Situation, condition, *state, posture: *difficulty, rigor, hardship, vicissitude.

plight, v. *Promise, engage, pledge, covenant, contract.

plot, n. 1 *Plan, design, scheme, project.

Ana. *Chart, map, graph.

2 Plot, intrigue, machination, conspiracy, complot, cabal, frame-up are here compared only as meaning a secret plan devised to entrap or ensnare another or others. Plot implies careful planning of details and an intent to accomplish an evil, mischievous, or treacherous end: it may involve one or more devisers and a person, a group, a class, or a people, as the victim; as, the Gunpowder Plot; "There is a plot against my life, my crown" (*Shak.*); "the plots against him Had madden'd tamer men" (*Tennyson*). Intrigue implies more complicated scheming or maneuvering than plot and the use of petty underhand methods: it more often implies an attempt to gain one's own ends through clandestine means, as in politics, in business, in love, or the like, rather than (as plot frequently implies) an attempt to destroy, to betray, to usurp power, or the like; as, "Mr. Swift hath finely described that passion for intrigue, that love of secrecy, slander, and lying, which belongs to weak people, hangers-on of weak courts" (*Thackeray*); "The party politicians forgot their good resolutions, and reverted to their familiar intrigues" (*H. G. Wells*). Machination (commonly in the plural) usually imputes hostility or treachery to the makers; often, also, it suggests craftiness in devising or contriving annoyances, injuries, evils, or the like: if these ideas are to be connoted, it may be applied to a plot, an intrigue, or any of the secret plans

named by the words in this group. "Mrs. Morland knew so little of lords and baronets, that she entertained no notion of their general mischievousness, and was wholly unsuspecting of danger to her daughter from their machinations" (*Austen*). "Tortured by some black trouble of the soul, and given over to the machinations of his deadliest enemy" (*N. Hawthorne*). Conspiracy (as here considered: see also under CONNIVE, v.) and the archaic term complot differ from plot chiefly in implying a combination of persons or groups as the devisers and agents and in being applied chiefly to such a plot when it involves treason or great treachery; as, "To lay a complot to betray thy foes" (*Shak.*); "Heaven...hath marr'd Their complots" (*Souhey*); "This is the fifth conspiracy hatch'd in France" (*Tennyson*); "'Tis a long devised Conspiracy: the whole tribe is involved" (*Browning*). In legal use, where conspiracy is a technical term, the word implies the doing of an unlawful act or the use of unlawful means in accomplishing a lawful end; as, "Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States, or with foreign nations" (*First U. S. Antitrust Act*). Cabal (as here considered: see also COMBINATION) applies usually to an intrigue in which a group combines to accomplish some end favorable to it but injurious or disastrous to the person or group (often, specifically, the government) affected; as, "The cabal against Washington found supporters exclusively in the north" (*G. Bancroft*). Frame-up, originally American slang, applies to any plot which involves fraud or a fraudulent end, especially the incrimination of a person as by planting false evidence or by staging a questionable situation in which he will be found and suspected of a crime; as, "Some one put those little glass figures amongst my traps. It was a frame-up" (*Agatha Christie*).

Ana. Connivance, collusion (see under CONNIVE): contrivance, *device, contraption: manuever, stratagem, *trick, ruse, artifice.

3 Sketch, outline, diagram, delineation, draft, tracing, blueprint. See under SKETCH, v.

plot, v. 1 Plan, design, scheme, project. See under PLAN, n.

Ana. Fashion, fabricate, forge, form, shape, *make: conspire, *connive, collude.

2 *Sketch, outline, diagram, delineate, draft, trace, blueprint.

Ana. Create, *invent: *chart, map, graph.

pluck, n. *Fortitude, grit, backbone, guts, sand.

Ana. *Courage, spirit, mettle, resolution, tenacity: determination, *decision: hardihood, audacity, *temerity.

plumb, adj. *Vertical, perpendicular.

plume, v. *Pride, pique, preen.

Ana. *Appreciate, value, prize.

plump. *Fleshy, stout, portly, rotund, chubby, fat, corpulent, obese.

Ant. Cadaverous. — **Con.** *Lean, spare, scrawny, skinny, lank, lanky: *haggard, pinched, wasted.

plunder, v. *Rob, rifle, loot, thief, burglarize.

Ana. Despoil, spoliage, sack, pillage, *ravage: *strip, denude, bare.

plunder, n. *Spoil, pillage, booty, prize, loot, swag.

Ana. Robbery, larceny, *theft.

plutocracy. *Oligarchy, aristocracy.

ply, v. *Handle, manipulate, wield, swing.

Ana. Exercise, *practice, drill: operate, work, function (see ACT, v.): manage, direct, control, *conduct.

pocket, n. *Hole, hollow, cavity, void, vacuum.

poet. Post, versifier, rhymester (or rimer), rhymester (or

rimester), poetaster, bard, minstrel, scop, gleeman, jongleur, troubadour, trouvère, minnesinger, scald (or skald) come into comparison when they denote a composer who uses metrical or rhythmical language as his medium. Poet, etymologically a "maker," is used in a generic sense and in several highly specific senses. In its generic sense, it applies to any writer of verse; in its specific senses, it applies only to a composer of verse who manifests certain qualities regarded as essential by the age or time, or by the writer or speaker who uses the term. With all its variations in implications in these specific senses, poet usually stresses inventive and imaginative power as the prime essential, sometimes without clear reference to skill in constructing verses. "Every man, that writes in verse is not a Poet" (B. Jonson). "The Poet is chiefly distinguished from other men by a greater promptness to think and feel without immediate external excitement, and a greater power in expressing such thoughts and feelings" (Wordsworth). Versifier may designate any composer who uses verse as his medium without reference to any quality or qualities thought of as essential to poetry. In contrast to poet, however, it usually implies the lack of such a quality or qualities. "A clever versifier might have written Cowley's lines; only a poet could have made what Dryden made of them" (T. S. Eliot). Rhymers and rhymester came into English use in the seventeenth century when opposition to rhyme, especially in heroic verse, was crystallizing and there was a pronounced distinction between poets who employed blank verse and those who employed rhyme. In earliest use, the terms were often descriptive rather than depreciative; in later use, especially in the age of romanticism when poet was regarded as a title to be bestowed rather than claimed, rhymers and rhymester were often used by poets in speaking of themselves or of their fellow poets. "I am nae poet, in a sense, But just a rhymers like by chance.... Whene'er my Muse does on me glance, I jingle at her" (Burns). "Novelist, realist, rhymester, play your part, Paint the mortal shame of nature with the living hues of art" (Tennyson). Poetaster is, and has always been, a term of contempt applied to versifiers whose work is regarded as unimportant, trashy, inane, or the like. "There are always poetasters enough; but of great poets...there are never so many as not to leave room for...more" (J. Hawthorne). Bard, in strict historical use, applies only to one of a class of Celtic poets, especially of Welsh and Irish poets in ancient times, who composed verses such as those praising heroes, chiefs, or warriors, or recounting historical facts or traditions, and who sang or recited them to the accompaniment of the harp or similar musical instrument. In extended use, bard is a more or less romantic designation of any poet, especially of one who is closely associated with a particular place (thus, Shakespeare is called the Bard of Avon; Burns, the Ayrshire Bard; Wordsworth, the Bard of Rydal Mount) or one who is thought of as a composer of verse that sings itself or is written to be sung. "Compile in all the lyrical poetry of the last 150 years a list of half a dozen first-class or even second-class bards who wrote primarily to be sung" (Quiller-Couch). Minstrel, in its historical reference, may or may not imply composition of verse; it applied originally to a public entertainer, often a strolling musician and mountebank, who sang songs (sometimes his own) to the accompaniment of a harp or other instrument and performed tricks; later it was robbed of some of its implications of jugglery and buffoonery (except in reference to a black-faced entertainer in a minstrel show) and given some of the more elevated connotations of poet; in its extended use it is close to bard in its implica-

tions but it places less emphasis on professional character and more on natural lyrical power. "O black and unknown bards of long ago, How came your lips to touch the sacred fire? How, in your darkness, did you come to know The power and beauty of the minstrel's lyre?" (J. W. Johnson). Scop, an Anglo-Saxon word, was applied to a type of Anglo-Saxon poet similar to the bard; the scop was, however, a minstrel attached to a court, who provided entertainment by the songs and poetic narratives which he composed or adapted and himself delivered. Gleeman (a word of Anglo-Saxon origin) and jongleur (of Norman-French origin) are now often used in precise writing in place of minstrel in its earliest sense but with a more definite implication of the minstrel's race: only in loose and incorrect use are they employed as synonyms of minstrel in the sense of poet. Troubadour and trouvère are often misapplied except by scholars and learned writers and speakers. The terms are not interchangeable. Both designate one of a class of poets who existed between the tenth and the fourteenth centuries chiefly in what is now known as France, but who used distinctly different tongues. Troubadour applies to a type of poet-musician found chiefly in Southern France and Northern Italy, frequently a knightly amateur, who composed lyrics (often also the music) in the Provençal tongue, usually of an amatory character and characteristically in a complicated metrical pattern; trouvère applies to a type of poet found in Northern France who composed, in the main, metrical romances, long narrative poems dealing with the loves and exploits of heroes, which were recited or sung by jongleurs and others. Trouvère therefore comes close to bard in some of its implications; however, the two words in their strict historical senses are not interchangeable because they imply widely different backgrounds and are referable respectively only to a highly specialized type of poet. Troubadour, in extended use, is often employed in place of minstrel (in its extended sense) but improperly, for troubadour rightly implies not naturalness but artifice and technical skill in versifying. "I speak after my fancies, for I am a Troubadour, you know, and won the violet at Toulouse; but my voice is harsh here [in Normandy], not in tune, a nightingale out of season" (Tennyson). Minnesinger is correctly applicable only to one of a class of German lyric poets, usually of noble birth, existing at approximately the same time as the troubadours and having much in common with them, especially in their emphasis on love songs and skill in versification. Scald applies to a type of ancient Scandinavian poet and relater of historical and traditional events who both composed and recited his verses and who, like the ancient bard, was regarded as a historian and as a preserver of legends. The term is often misapplied, being used in reference to any Teutonic poet comparable to the ancient bard or trouvère.

Ana. *Maker, creator, author: *writer, author, composer.

poetaster. *Poet, versifier, rhymers, rhymester, bard, minstrel, scop, gleeman, jongleur, troubadour, trouvère, minnesinger, scald.

pogrom. *Massacre, slaughter, butchery, carnage.

poignancy. *Pathos, bathos.

poignant. 1 *Pungent, piquant, racy, spicy, snappy.

Ana. Penetrating, piercing, probing (see ENTER): *sharp, keen, acute: *incisive, trenchant, cutting, biting, crisp.

Art. Dull (reaction, sensation, etc.).

2 *Moving, touching, pathetic, impressive, affecting.

Ana. Exciting, stimulating, provoking (see PROVOKE): disturbing, agitating, perturbing (see DISCOMPOSE).

point, v. *Direct, aim, level, train, lay.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. Turn, bend (see CURVE, *v.*): *direct, address, devote: steer, pilot, engineer, *guide.

point of view. **Point of view, standpoint, viewpoint, angle, slant** agree in denoting the position or attitude that determines which aspect of an object of contemplation is seen or presented. **Point of view** is the idiomatic English term: **standpoint** and **viewpoint** came into English as the result of efforts to find a one-word term and a less awkward phrasing; as, from the *point of view* of history; from the *standpoint* of history. The substitutes were slow in meeting approval, but both are now generally accepted, although *viewpoint* is still held in disfavor by many persons. *Standpoint* is increasingly frequent in writing (it was once felt as colloquial) and is acquiring connotations which tend to distinguish it from *point of view* and *viewpoint*. *Point of view* and *viewpoint* may suggest either a physical or mental position; *standpoint* is gradually being restricted to the mental point of view; as, to paint a scene from the *point of view* of one standing on a hillside; to consider totalitarianism from the German *standpoint* (or *point of view*). *Point of view* permits the inference that there are other ways of looking at that which is considered and therefore usually suggests lack of completeness in the vision, or one-sidedness in the views expressed or presented: *standpoint* more often connotes than definitely implies a fixed way of looking, justified by one's fundamental principles, one's wealth of information, or the like, and not necessarily resulting in a limited understanding. "Every intellectual product must be judged from the *point of view* of the age and the people in which it was produced" (*Pater*). "My criticism of what seem to me one-sided views will be better understood if my general *standpoint* is known" (*Inge*). These distinctions, though apparent in recent good use, are not, however, always observed. **Angle** definitely implies one-sidedness or limitations in the scope of one's vision. "Every man of genius sees the world at a different *angle* from his fellows, and there is his tragedy. But it is usually a measurable *angle*" (*H. Ellis*). "In the rhetorical speeches from Shakespeare which have been cited, we have... a new clue to the character, in noting the *angle* from which he views himself" (*T. S. Eliot*). **Slant** (a colloquial term) stresses bias, but it may be the bias derived from temperament, mental habits, or experience rather than from prejudice; as, he always takes a pessimistic *slant* when any proposal for avoiding war is made. "No one sees anything without some personal *slant*" (*Sat. Review of Lit.*). All of these words are synonyms in their extended senses for they agree in meaning one's view (as held or advocated) or views. *Point of view* (or *viewpoint*), however, implies that the view is an opinion or personal judgment; as, to express one's *point of view*; his *point of view* is generally known. *Standpoint* suggests a basic principle or body of principles; as, to question the validity of an opponent's *standpoint*. "We believe the latter *standpoint* to be that generally assumed by the British Empire" (*Sat. Review*). *Slant* and *angle* also, in colloquial usage, signify opinion, but they imply personal bias far more than does *point of view*. "I remember my confusion when an American professor wanted to know my '*slant* on the leadership question'" (*Irish Statesman*).

Ana. *Position, stand, attitude.

poise, v. *Stabilize, steady, balance, ballast, trim.

Ana. *Support, uphold, back.

Con. Disturb, agitate, upset (see DISCOMPOSE): *overturn, overset, overthrow, subvert.

poise, n. 1 *Balance, equilibrium, equipoise, tension.

Ana. Suspending or suspension, hanging (see corresponding verbs at HANG): *equanimity, composure.

2 *Tact, address, savoir-faire.

Ana. Self-possession, aplomb, assurance, *confidence: calmness, tranquillity, serenity (see corresponding adjectives at CALM): grace, dignity, *elegance.

poison, n. **Poison, venom, virus, toxin, bane** agree in meaning matter or a substance that when present in an organism or introduced into it chemically produces an injurious or deadly effect. **Poison**, etymologically a potion or drink, acquired its first specific meaning when it was applied to a potion containing a highly noxious ingredient, especially in such a quantity as to prove fatal to the drinker. In its sense development it came to be applied to the deadly ingredient, rather than to the drink containing it, and to be thought of as something that could be introduced into the system not only through the mouth but in other ways; as, killed by a *poison-barbed* arrow; morphine (usually introduced hypodermically) is, in sufficient quantities, a *poison*; carbon monoxide gas, when inhaled, is a deadly *poison*. In still more recent use, the term is applied to any substance, manufactured within an organism, which under certain conditions chemically produces disease or death; as, *poisons* in the blood made up of accumulated substances which should have been eliminated in urine cause uremia. The term *poison* is now the most general of all these words, and is referable to any highly noxious or deadly matter without reference to whether it is swift or slow in action, whether it is of animal, vegetable, or mineral origin, or whether it is introduced into the system or is manufactured within the system. In its secondary sense, *poison* is merely a figurative extension of its literal sense; as, fear uncontrolled is a *poison* that destroys all self-confidence. **Venom** and **virus** had for their earliest meaning a fluid containing a poison secreted by a snake, scorpion, bee, or the like, whenever the creature bites or uses its organ of offense or defense, such as a fang, a sting, or a spine. *Venom* still retains this meaning in precise use, though it is sometimes applied to a poisonous secretion of a plant. "Man spurns the worm, but pauses ere he wake The slumbering *venom* of the folded snake" (*Byron*). *Virus*, on the other hand, has practically lost this meaning, and is more commonly restricted to designating the poison in the juices of a person having an infectious disease (for fuller treatment see GERM). **Toxin** is specifically applied to a poison, or poisonous secretion, that is manufactured in the plant or animal body. A toxin, such as the venom of a snake, may be harmful to others but not to the organism itself; a toxin produced by faulty metabolism, or a lack of balance in the constructive and destructive processes in an organism, is usually exceedingly harmful to the organism. A toxin may also be the product of bacteria, as in tetanus, diphtheria, or botulism, and therefore dangerous to the organism in which it is produced. **Bane** is an old word, now rare except in poetic or deliberately archaic use and in certain combinations such as *ratsbane* (rat poison), and *henbane*, *dogbane*, *wolfbane* (certain plants containing a poisonous juice supposedly fatal respectively to hens, dogs, etc.). Originally applied to anything that caused destruction or woe or that wrought great harm (a meaning still found in such phrases as "she is the *bane* of his existence"), it came to be specifically applied to any poison that is fatal if not counteracted by an antidote. "My death and life, My *bane* and antidote, are both before me: This [the *bane*] in a moment brings me to an end; But this [the antidote] informs me I shall never die" (*Addison*).

poisonous. **Poisonous, venomous, virulent, toxic (or toxical), mephitic (or mephitical), pestilent, pestilential, miasmatic (or miasmatical), miasmic, miasmal** come into comparison as meaning having the properties or the

effects of poison (see POISON). In its literal sense, **poisonous** always implies that the thing so described will be fatal or exceedingly harmful if introduced into a living organism (usually a human organism) in sufficient quantities as by eating, drinking, inhaling, or the like; as, the most **poisonous** of mushrooms; **poisonous** gases; "[aniline] is also **poisonous** but by proper chemical manipulation it becomes the parent of many beneficial medicines" (A. C. Morrison). Figuratively, the term implies extreme noxiousness, or perniciousness, or power to corrode, rankle, corrupt, or the like; as, "You might condemn us As **poisonous** of your honor" (Shak.); "What a difference between Pope's little **poisonous** barbs and Dryden's strong invective" (Tennyson); "The sentence was pronounced... in a stifling **poisonous** atmosphere" (Conrad). In its literal sense, **venomous** applies not only to reptiles, insects, etc. (such as the snake, scorpion, bee), whose bite or sting introduces or is believed to introduce a deadly venom (see **venom** under POISON) into the organism, and to plants believed to contain a poisonous fluid (as, a **venomous** snake; "a garden of **venomous** plants"—Marvell), but also to the bites, stings, or wounds inflicted by venomous creatures (as, a **venomous** snake bite). The adjective is, however, used far more often in its figurative senses, where it implies extreme malevolence (as, "his [Cobbett's] scolding red face and his radical laugh, in which **venomous** hate mingles with a mocking exultation at his enemies' surely approaching downfall"—Heinrich Heine, transl. by Arnold), or destructive malignancy (as, "The most innocent intimacies would not have escaped misrepresentation from the **venomous** tongues of Roman society"—Froude). Literally, **virulent** implies the destructive or extremely deleterious properties of a virus (in old use, a venom; in current use, the poisonous substance produced in an organism by an infectious disease): it is now applied chiefly to infectious diseases of a particularly malignant or violent form, or, in technical use, to the virus (as defined above) that induces a violent and often fatal attack; as, "poverty produces outbreaks of **virulent** infectious disease... sooner or later" (Shaw); one of the most **virulent** types of the pneumococcus. Figuratively, the term applies to that which is particularly violent in its display of an offensive or noxious nature or quality; as, his **virulent** antipathy to foreigners of any kind; "the **virulent** pen of that rascal the Examiner" (Steele); "proceedings... dictated by **virulent** hatred" (G. Eliot); "the escholtzia, which... I avoided, for its **virulent** orange flowers" (H. Ellis). **Toxic** is chiefly in literal use, where it sometimes implies the presence of properties or effects of a toxin, or poisonous secretion manufactured in an animal or vegetable organism (as, a **toxic** condition of the blood; a **toxic** goiter; **toxic** poisoning of the system) or at other times implies only the character or the properties of a poison, and therefore means little more than **poisonous** (as, the **toxic** principle of a certain drug; **toxic** gases; a **toxic** drug). In its rare figurative use, **toxic** often implies insidious and destructive activity, comparable to that of some toxins in the human organism; as, "Arsène Dumont thought that it [civilization] inevitably held within itself a **toxic** principle, a principle by which it is itself in time poisoned" (H. Ellis). **Mephitic** is applicable to that which is so offensive to the sense of smell that it is, or often, is believed to be, actually poisonous; as, **mephitic** vapors rising from a swamp; the **mephitic** air of a disused mine; **mephitic** fumes, such as those of chloroform or ether. **Pestilent** and **pestilential** may come close to **poisonous** or, less often, to **virulent** or **toxic** in meaning (as, **pestilent** opium; the **pestilential** fever or, as it is now called, typhus fever), but they are now chiefly used in

the extended sense of exceedingly infectious or dangerous to the health, morals, mental integrity, or the like, especially of the group, as distinguished from the individual: **pestilential** is usually preferred when the breeding of a pestilence is implied; as, "While in all other arts it is agreed that a student should be trained only on the best models... there has been with respect to poetry a **pestilential** notion that the young should be gradually led up to excellence through lower degrees of it" (Bridges). "So **pestilential**, so infectious a thing is sin, that it scatters the poison of its breath to all the neighbourhood" (Jer. Taylor). **Miasmatic**, **miasmic**, **miasmal** all imply a reference to **miasma**, or supposedly infectious matter emanating from swamps or jungles or from putrescent substances and floating in the air; as, a **miasmatic** marsh; "The morning mist is grey and **miasmic**" (Amy Lowell); a **miasmal** place. In their now much more common extended use, these words, especially the first two, come close to **pestilential** in implying a power to spread contamination or to poison the minds or souls of the multitude; as, **miasmatic** doctrines; the **miasmic** influence of a certain institution.

Ana. Mortal, fatal, lethal, *deadly: *pernicious, baneful, noxious, deleterious, detrimental.

polemic, polemical. *Controversial, eristic, apologetic.

Ana. Argumentative, disputatious (see corresponding nouns at ARGUMENTATION): contentious, litigious (see BELLIGERENT).

policeman. Policeman, officer, constable, bailiff, catchpole (or catchpoll), gendarme, bobby, peeler, copper, cop, bull come into comparison when they denote a member of the police, or the force or body officially charged with the duty of preserving peace and order in the community by preventing violations of the law and by taking into custody persons who are known or are alleged to be guilty of such violations. **Policeman** is the general term referable to a member of any police force, whether civil or military, or, if civil, whether under the jurisdiction of town or city or of a state. The term is referable to such a person regardless of the specific duties to which he is assigned, such as patrolling, detection, or traffic control. **Officer** (except in the phrase *police officer*, which is equivalent to *policeman*) is now used chiefly in the United States in addressing a policeman; as, *Officer*, will you send in a fire alarm? The word was in British use, however, long before *policeman*, and was applied to any official charged with enforcing peace and order and arresting violators of the law. "The thief doth fear each bush an *officer*" (Shak.). **Constable**, which seems to have come into use in this sense around 1400, has since then acquired and lost various specific implications owing to historical changes in the system of policing the community. In general, a constable is now either a policeman in a small community such as a village, a parish, or a township, or a special official, often a sheriff's assistant, charged with executing the warrants of judicial officers, such as warrants for arrest, attachment, eviction, and the like. It is also used of a member of a constabulary, or an organized police force serving a county, state, or section of a country. In British use, *constable* is used as a term of address for a policeman. In British, and in rare American use, a **bailiff** is a sheriff's constable and, therefore, a county police officer; **catchpole** is the now contemptuous equivalent of **bailiff** in this sense or, sometimes, of any constable. **Gendarme** is often used by English-speaking persons of a French or other European policeman (properly in France called *agent de police*). In strict French use, a *gendarme* is a soldier, a member of the gendarmerie, or military police. **Bobby** and **peeler**

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

are both British colloquial equivalents of *policeman*, derived from the name of Sir Robert Peel, who as British home secretary was responsible for acts organizing the Metropolitan Police (of Greater London) and the Irish constabulary. *Bobby* is used, chiefly in England, of any policeman, but especially of uniformed policemen wearing a helmet; *peeler* was originally an Irish designation for a member of the Irish constabulary, a police force organized on military lines; it was later applied to any policeman. *Copper* and *cop* (literally one who cops, or catches) are slang terms common both in the United States and in Great Britain; they often refer to a policeman who is on the lookout for offenders, such as a patrolman or a motorcycle policeman. *Bull* also is a slang term for *policeman* and is often applied specifically to a detective.

polish, v. *Polish, burnish, furbish, buff, shine* agree in meaning to smooth or brighten by rubbing. *Polish*, the most common of these words, fundamentally implies friction that removes all roughnesses of surface or gives a crude product a smooth, often a lustrous, finish, or renews the finish of an old product; it may imply the use of a tool, instrument, or machine (such as a file, a brush, or a grinder), or the application, usually in addition, of a gritty powder, a paste, or the like; as, to *polish* marble for a tombstone; to *polish* mahogany; to *polish* glass; to *polish* furniture; to *polish* shoes. "Windowpanes which she had *polished* until they shone like jewels" (*M. Wilkins*). *Burnish* etymologically implies a causing to shine or gleam. As originally, it is still used chiefly in reference to metals, or to objects made of metals, which are rubbed until they become lustrous; as, *burnished* gold; to *burnish* one's shield; to *burnish* brass candlesticks. In present use, the term is also applied to things which shine as though they were burnished; as, "the blue green of the pines... shone in the sun—a *burnished* colour" (*Jefferies*); "Even his hair... seemed like *burnished* bronze in the evening light" (*Shaw*). *Furbish*, which is now used more often in a figurative than in a literal sense, in earliest use implied cleaning of rust from armor, weapons, and the like, by friction; as, "*furbished* the rusty sword again" (*Dryden*). In extended use, it commonly implies freshening up, renovating, or the like, with very little emphasis (if any) on rubbing, brushing, or scouring. "I took it [the play] to make alterations... and *furbished* it up in a day or two" (*Lamb*). *Buff*, originally a tradesman's word, implies polishing with a soft, rough, oil-treated leather (originally of buffalo hide) or with a stick or tool (called a *buffer*) faced with such leather or with chamois, velvet, or the like; as, to *buff* brass; to *buff* knives; to *buff* one's fingernails. *Shine* is often used in place of *polish* when cleansing or brightening are implied; as, to *shine* silver. **Ana.** *Renew, restore, refresh, rejuvenate.

Ant. Tarnish.

polite. *Civil, courteous, courtly, gallant, chivalrous.

Ana. *Gentle, genteel: *suave, urbane, diplomatic, politic: *thoughtful, considerate, attentive.

Ant. Impolite.

politic. 1 *Expedient, advisable.

Ana. Practical, *practicable: *possible, feasible, practicable: *shrewd, astute, perspicacious, sagacious.

2 Diplomatic, bland, smooth, *suave, urbane.

Ana. Ingratiating, insinuating, *disarming: unctuous, sleek, oily, *fulsome: *wise, prudent, judicious.

politician. *Politician, statesman, politico* are synonymous terms only when they denote a person who is versed in or engaged in politics, or the science or art of government. In American use, they are often, though not always, regarded as opposites rather than as inter-

changeable terms. When used without derogation, *politician*, as distinguished from *statesman*, both in British and American use applies to a person who by training and temperament is able to deal with masses of persons so as to accomplish desirable ends, such as election to a political office (sometimes of oneself, sometimes of one's chosen candidate), or the passage of bills or the acceptance of measures one upholds, or the settlement of especially difficult problems to the satisfaction of one's constituency or of the country as a whole. Usually, *politician* also connotes the power to deal successfully with opposition, especially opposition coming from other political parties. "What makes Burke stand out so splendidly among *politicians* is that he treats politics with his thought and imagination" (*Arnold*). "The loose cog in the wheel happened to be that he [a former unsuccessful mayor of New York City] held a political position and was 1,000 miles away from being a *politician*. He did not know how to handle people and did not know how to deal with them or how to get along with them" (*Alfred E. Smith*). In American, as distinguished from British, use, *politician* is often a highly derogatory or contemptuous term, implying scheming, self-interest, artifice, or intrigue in accomplishing one's ends. "He has... a loose, shifty expression of face, and one which gives you the impression of a thorough *politician* in the bad sense of the word" (*E. L. Godkin*). "American readers are asked to note that the term '*politician*' is used in the English sense, as meaning 'one engaged in politics,' and has no derogatory application" (Foreword to *International Who's Who*, 1940). *Statesman*, in both American and British use, carries little if any reference to party politics (except that in effusive American use a *politician* is sometimes pronounced a *statesman*), but throws the emphasis upon skill and sagacity in the management of affairs of state, as in the capacity of president or prime minister, a member of Congress or of Parliament, an ambassador, or the like. The term, in contrast to *politician* (sometimes to *demagogue*), is often applied to the highest representatives (either in actuality or in thought) of this type; as, "Unhappily, the republic [the First French Republic] was subject to men who were mere demagogues and in no sense *statesmen*" (*Macaulay*); "Ticknor was a scholar born, as Webster was a *statesman* born" (*Van W. Brooks*); "Men are employed to bring up the name of a *politician* so that he may be called a *statesman*" (*S. Anderson*). *Politico* is sometimes used in Great Britain in place of *politician* in the derogatory sense: in American use, it is sometimes preferred to *politician* when a term devoid of all depreciation is desired, and yet there is no intent to suggest laudable qualities.

politico. *Politician, statesman.

pollute. *Contaminate, defile, taint, attain.

Ana. *Debase, vitiate, corrupt, deprave, pervert: *abuse, outrage, mistreat: profane, desecrate, blaspheme (see corresponding nouns at PROFANATION).

poltroon. Craven, dastardly, recreant, *cowardly, pusillanimous.

Ana. *Mean, ignoble, abject: *contemptible, despicable, sorry, scurvy.

Ant. Dauntless.

polymathic. *Learned, erudite, scholarly.

pomade, pomatum, v. *Oil, grease, lubricate, anoint, inunct, cream.

pomp, n. *Display, parade, array.

Ana. Ceremony, ceremonial, liturgy, ritual, formality, *form: ostentatiousness or ostentation, pompousness, showiness or show (see corresponding adjectives at SHOWY).

pompous. *Showy, ostentatious, pretentious.

Ana. Ceremonious, *ceremonial, solemn, formal: stately, imposing, majestic, grandiose (see GRAND): *splendid, resplendent, glorious, superb: grandiloquent, magniloquent, bombastic (see RHETORICAL).

Ant. Lowly.

ponder. **Ponder, meditate, muse, ruminate** come into comparison chiefly but not exclusively as intransitive verbs meaning to consider or examine something attentively, seriously, and with more or less deliberation. **Ponder**, in highly discriminating use, retains its etymological implication of weighing and usually suggests consideration of a problem from all angles or of a thing in all its relations in order that nothing important will escape one: unlike *weigh* in an allied sense (see CONSIDER, 1), it does not now usually suggest a balancing that leads to a conclusion; as, "Witness this weighty book...so nicely pondered, yet so strongly wrought" (*Dryden*); "[Feverel] pondered on what his Aunt said. He loved Lady Blandish, and yet he did not wish to see her Lady Feverel" (*Meredith*); "the great Sung master was wont...to...spend the day pondering the subjects of his brush by the side of running streams" (*Binyon*). **Meditate** adds to *ponder* an implication of a definite directing or focusing of one's thought: in intransitive use, especially, it more often suggests an effort to understand the thing so considered in all its aspects, relations, or values than an effort to work out a definite problem. "*Meditate* upon these things; give thyself wholly to them" (1 *Timothy* iv. 15). "Empowered by long training, the young priest blotted himself out of his own consciousness and meditated upon the anguish of his Lord" (*Cather*). In transitive use, *meditate* implies such deep consideration of a plan, project, or the like, that it approaches *intend* or *purpose* in meaning; as, "are you really serious in meditating a dance at Netherfield?" (*Austen*). **Muse** comes close to *meditate* in implying focused attention but it suggests a less intellectual aim: often it implies absorption as in a dream, a fancy, a remembrance, or the like. "Let him...read a certain passage of full poesy or distilled prose, and let him wander with it, and muse upon it...and dream upon it" (*Keats*). "What an old-fashioned place it seems to be!" said Elizabeth-Jane, while her silent mother *mused* on other things than topography" (*Hardy*). **Ruminate** (etymologically, to chew the cud as a ruminant animal) implies a going over the same problem, the same subject, or the same object of meditation again and again: it may be used in place of any of these words, but it does not carry as strong a suggestion of weighing as *ponder*, of concentrated attention as *meditate*, or of absorption as *muse*, and, on the other hand, it more often implies processes such as reasoning or speculation. "I sit at home and ruminate on the qualities of certain little books like this one—little elixirs of perfection, full of subtlety and sadness—which I can read and read again" (*L. P. Smith*). "Behind [Dr. Alexis] Carrel lies forty years of ruminating on life, of glimpsing it in its simplest forms through microscopes, of incredibly delicate surgical operations on tissues or organs" (*W. Kaempfert*). *Muse* and *ruminate* are now very rare as transitive verbs.

Ana. Weigh, *consider, revolve, contemplate: reflect, deliberate, speculate, *think, cogitate.

ponderable. Appreciable, *perceptible, sensible, palpable, tangible.

Ana. Important, significant, momentous, weighty, consequential (see corresponding nouns at IMPORTANCE).

Con. Trivial, trifling, *petty, paltry.

ponderous. Cumbersome, cumbersome, *heavy, weighty, hefty.

Ana. *Massive, massy, bulky, substantial: clumsy, *awkward, maladroit: *onerous, burdensome, oppressive, exacting.

pool, n. *Monopoly, corner, syndicate, trust, cartel.

poor. *Bad, wrong.

Ana. *Deficient, defective: *petty, puny, trivial, trifling, paltry: *base, low, vile.

Con. *Good, right: satisfying, fulfilling, meeting, answering (see SATISFY).

popular. *Common, ordinary, familiar, vulgar.

Ana. General, *universal, generic, common: accepted, received, admitted (see RECEIVE): prevalent, *prevailing, current.

Ant. Unpopular: esoteric.

porch. Veranda, piazza, portico, stoop, *balcony, gallery, loggia.

port, n.¹ *Harbor, haven.

port, n.² Presence, carriage, front, *bearing, deportment, demeanor, mien, manner.

portal. *Door, gate, doorway, gateway, postern.

portend. Preage, augur, prognosticate, *foretell, predict, forecast, prophesy, forebode.

Ana. Betoken, *indicate, bespeak, attest: signify, import, *mean, denote.

portent. *Foretoken, presage, prognostic, omen, augury.

Ana. Presentiment, foreboding, misgiving, *apprehension: forewarning, warning, cautioning or caution (see corresponding verbs at WARN).

portentous. *Ominous, unpropitious, inauspicious, fateful.

Ana. Threatening, menacing (see THREATEN): prodigious, *monstrous: prophesying or prophetic, presaging, foreboding, predicting, foretelling (see corresponding verbs at FORETELL).

porter. *Beer, lager, bock, ale, stout.

portico. 1 *Colonnade, arcade, arcature, peristyle.

2 *Balcony, gallery, loggia, veranda, piazza, porch, stoop.

portion, n. 1 *Part, piece, detail, member, division, section, segment, sector, fraction, fragment, parcel.

Ana. Quantity, amount (see SUM, n.): apportionment, rationing or ration (see corresponding verbs at APPORTION): allotment, assignment, allocation (see corresponding verbs at ALLOT).

2 *Fate, destiny, lot, doom.

Ana. Distribution, dispensation, division, dealing (see corresponding verbs at DISTRIBUTE): fortune, hap, *chance, luck.

portion, v. *Apportion, parcel, ration, prorate.

Ana. *Allot, assign, allocate: *distribute, dispense, divide, deal.

portly. *Fleshy, stout, plump, rotund, chubby, fat, corpulent, obese.

Ana. Burly, husky, brawny, *muscular.

portrait. Photograph, *image, simulacrum, effigy, statue, icon, mask.

pose, v. Posture, attitudinize. See under POSTURE, n.

Ana. *Assume, affect, simulate, feign, counterfeit.

pose, n. 1 Pose, air (or airs), affectation, mannerism are synonyms when they mean an adopted rather than a natural way of speaking, behaving, and the like. **Pose** implies an attitude deliberately assumed in order to impress others or to call attention to oneself; it may be applied to opinions, policies, etc., as well as to manners; as, his reticence is just a pose. "The literary pose which affects to despise literature" (*Arch. Marshall*). "The insurgent attitude has now become a pose" (*Grandgeni*). **Air**, except in the plural form *airs*, does not always imply assumption, for it often suggests acquirement

through environmental influences; as, she has the *air* of a teacher; he spoke with an *air* of authority. Used absolutely, *air* often implies distinction and aristocratic breeding. "Mr. Wickham was . . . far beyond them all in person, countenance, *air*" (*Austen*). When it and (especially) *airs* definitely imply artificiality and the intent to give a false appearance, they usually also imply a vulgar pretense of breeding, of grandeur, or of superiority; as, to put on *airs*. "Oh! they give themselves such *airs*" (*Austen*). *Affectation* usually designates a specific trick of speech or behavior of one who obviously puts on *airs* or whose trick impresses others as deliberately assumed and insincere. *Mannerism* designates an acquired peculiarity or eccentricity in speech or behavior; it seldom implies insincerity, but it nearly always connotes habit or potential habit. A *mannerism* consciously assumed becomes thereby also an *affectation*; what begins as an *affectation* may become an unconscious and habitual trick of behavior, and so a *mannerism*.

2 *Posture, attitude.

posh, *adj.* *Stylish, fashionable, modish, smart, chic, dapper, dashing, spruce, natty, nifty, nobby, toffish, brave, braw.

posit. *Presuppose, presume, assume, postulate, premise.

position, *n.* 1 Presupposition, presumption, assumption, postulate, premise. See under PRESUPPOSE.

2 **Position, stand, attitude**, as here compared, denote a more or less fixed mental point of view or way of regarding something. **Position** and **stand** both imply reference to a question at issue or to a matter about which there is difference of opinion. *Position*, however, is often the milder term, since it, unlike *stand*, seldom connotes aggressiveness or defiance of a widely held or popular opinion; as, he was asked to make known his *position* on disarmament; he took the *stand* that disarmament would not accomplish the ends its proponents had in view. "There is a strong sceptical element in Newman, though he would have been shocked at the developments of his *position* by the Roman Catholic Modernists" (*Inge*). "He . . . agreed thoroughly with my *stand* that no government or private organization could give health; people had to achieve it by their own efforts" (*V. Heiser*). **Attitude** suggests a personal or, sometimes, a group or communal point of view, especially one that is colored by personal or party feeling, is influenced by one's environment or the fashion of the moment, and is, on the whole, more the product of temperament or of emotion than of thought or conviction; as, a humorous *attitude* to life; the Greek *attitude* to nature; "Eudora's *attitude* of owning your time and interest" (*M. Austin*); a resentful *attitude* to criticism. "Their *attitude* towards truth (that bug-bear of Potterism) was typical; Clare wouldn't see it; Jane saw it perfectly clearly, and would reject it without hesitation if it suited her book" (*R. Macaulay*). **Ana.** *Point of view, viewpoint, standpoint, angle, slant.

3 **Position, place, situation, office, post, job, berth, billet, capacity** are here considered only in the narrow sense of the particular employment in which one is engaged for a salary or wage. **Position** and **place** mean little more than this: they differ little from each other, except that sometimes *position* is preferred where the employment indicates a higher social status or more dignity in the work involved, and *place* when the reference is to a menial employment; as, he has found a *position* as office manager; she has lost her *place* as a cook; there are few good teaching *positions* open at present; the employment agency can provide *places* for several good servants, chauffeurs, and farm hands at once. This distinction, however, is not maintained in

good usage: for example, in British use especially, *place* has not entirely lost its earlier denotation of a position in the government, at court, or the like (as, "In my younger years I used many endeavours to get a *place* at Court"—*Addison*; "To glut their insatiable craving for *place*"—*J. Morley*); in university and collegiate use, a placement officer is charged with the work of finding *places* for students leaving college or on vacation. **Situation** (see also **STATE**) is not always distinguishable from *position* or *place*: it is frequently the preferred term in the classified columns of newspapers (as, *situations* wanted; *situations* vacant), and it sometimes carries a stronger implication of occupancy (or need of an occupant) than *position*; as, to seek a *position* (i.e., an opening or a place in a group, staff, system); to take or obtain a *situation* (i.e., a place one fills) as governess. **Office**, as here considered (see also **FUNCTION**, 1), applies specifically to a position of trust, authority, or the like, especially in the service of a nation, state, city, or the like, or of a company, corporation, or association; it often implies the selection of its occupant by election, appointment, or the like: it usually also suggests definite duties or functions, tenure, and (though not necessarily) emoluments beyond those given to holders of positions or situations; as, to elect a new man to the *office* of mayor; he holds the *office* of attorney general of the state; appointed to one of the highest *offices* in the country; the directors elected the president of the corporation to the *office* of chairman of their board. **Post**, originally and still applied to the place where a soldier is stationed for sentry or guard duties, in the sense here considered applies to a position, or more often to an office, attended by great responsibility or involving the performance of onerous duties; as, he has been appointed to the *post* of secretary of war; it is rumored that he will give up his *post* at the beginning of the new year. In British use, *post* is now the common term for a place in the teaching profession. **Job, berth, billet** are more or less colloquial terms (the last somewhat more frequent in British than in American use) for *position, situation, office*, or *post*. *Job* specifically stresses the work involved; as, a teaching *job*; he has a hard *job*; a man is lost when he is without a *job*. The term, once applied chiefly to places involving heavy labor, is now used not only without depreciation, but even with a suggestion of some special significance; as, he is the only man for that *job*; a *job* requiring skill and courage. **Berth** distinctively implies a place (often a small place) in a system, a staff, or a particular service; often, but less clearly than *billet*, it suggests a place to which one has been allotted, assigned, or appointed; as, he has a good *berth* in the civil service; "The men who cling to easy *billets* ashore" (*Harper's Mag.*). **Capacity**, as here considered (see also **ABILITY**), comes into comparison with the other terms only when it denotes a position or job with reference to the nature of the tasks to be performed or to the qualifications of the person who performs them; as, he is with the firm in the *capacity* of financial adviser; he serves them in the *capacity* of butler, but they call him their houseman.

Ana. *Work, employment, occupation, calling, pursuit, métier, business.

positive. 1 Certain, *sure, cocksure.

Ana. *Confident, assured, sanguine, sure: dogmatic, doctrinaire, oracular, *dictatorial.

Ant. Doubtful.

2 *Affirmative.

Ant. Negative. — **Con.** *Neutral, indifferent: nugatory, *vain, idle, hollow: nullifying, annulling (see **NULLIFY**).

possess. Own, enjoy, hold, *have.

Ana. Control, manage, direct, *conduct: retain, *keep, reserve, withhold.

possession, n. 1 **Possession, dependency, territory, colony, dominion, protectorate, mandate** come into comparison as meaning a country or state that is subject in whole or in part to the rule or control of another state. **Possession**, as here considered, implies occupation and control by the governing state; as, Canada no longer has the status of a *possession* of Great Britain; the insular *possessions* of the great powers. **Dependency** applies to a possession or, sometimes, to a province that is more or less remote from the governing country and that, therefore, does not form a constituent part of it. Usually, a dependency is self-governing in part; thus, the *possessions* of the United States (including the Canal Zone, Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, and Wake and Midway Islands) are usually called *dependencies*. **Territory** (as here considered: see also **FIELD**, 2) applies to a portion of a country (specifically of the United States, Canada, and Australia) not yet recognized as a state or province of that country and, therefore, partly self-governing but under the control of the federal government; as, Alaska is a *territory* of the United States; most of the western states of the United States were *territories* before their admission to statehood; the Northwest *Territories* of Canada. **Colony** applies strictly to a company of people transplanted to a distant region for the purpose of settling in it and of founding a state; as, Germany established *colonies* in many parts of the world. As here specifically compared, the term applies to the state they have established, so long as it is subject to the parent government; as, the British *colonies* which after the American Revolution united to form the United States of America; French *colonies* in the West Indies. **Dominion** is now the preferred term in British use for any of the self-governing states which once as colonies or possessions formed part of the British Empire, and which are now regarded as free members of the British Commonwealth of Nations united by a common allegiance to the crown. Not all of these in their official titles use *dominion*, however; thus, the *Dominion* of Canada and the Commonwealth of Australia are *dominions* in this sense. **Protectorate** applies either to a country over which a more highly organized or more powerful country assumes control for the purposes of protecting it from aggression or internal disturbance and of managing its affairs, or to the form of government which it imposes upon the people of such a country; as, "The programme sketched out by Mr. [Cecil] Rhodes, of drawing a continuous chain of British *protectorates* from Cape Colony to the Nile valley" (C. Oman). **Mandate** (see also **COMMAND**) is the term applied to any former German colony or other conquered territory that was assigned by the Treaty of Versailles, 1919, to another nation (mandatory), not as a possession but as a protectorate with power to administer and regulate its affairs, especially for the benefit of the colony or territory; as, German East Africa was one of the *mandates* assigned to Great Britain.

2 In plural form **possessions**. **Possessions, belongings, effects, means, resources, assets** come into comparison when they mean all the items that taken together constitute a person's or group's property or wealth. *Possessions, belongings, effects* stress ownership; *means, resources, assets* emphasize value, especially pecuniary value. **Possessions** may be applied to the aggregate of things owned, regardless of the individual worth or significance of each thing; thus, one may speak of the *possessions* of an indigent old woman or of

the *possessions* of a Rothschild, the former referring to a few articles of furniture and clothing, the latter to extensive properties, enormous invested capital, and the like. **Belongings** is applied commonly to more intimate personal possessions, such as one's clothes, one's goods, one's valuables, or, in extended use, one's family, one's relatives, or one's dependents; as, to gather up one's *belongings* when leaving boarding school; to have insufficient space for one's *belongings*. "I have sent his folk, His kin, all his *belongings*, over-seas" (Tennyson). **Effects** is somewhat more inclusive than *belongings*, but usually less so than *possessions*. It is often applied to personal as distinguished from real property, especially when the reference is to the estate of a deceased person; as, he died leaving no *effects* of value; all his *effects* were divided among his relatives before an administrator could be appointed. Sometimes, it is applied to movable articles as distinguished from those that are stationary; as, a sale of household *effects*; all his personal *effects* are in his one trunk. **Means** usually applies to all the money that is available, in the form of revenue from capital, income, or ready money, for expenditure; as, to live beyond one's *means*; a man of small (or large) *means*. This skill shall be taught to the ablest of those who desire it, quite independently of their parents' *means*" (B. Russell). **Resources**, on the other hand, is applied to all possessions of any sort that have actual or potential value (often, but not necessarily, money value), and that may be depended upon in case of need or of deficiency. Sometimes, the term comprehends all possessions (tangibles and intangibles) whether they are actually used or are merely available for use; thus, a statement of a company's *resources* is a statement that covers every item that may be regarded as a part of the company's wealth. More often, however, the term refers specifically to possessions held in reserve for emergencies or to sources of supply as yet untapped; as, the natural *resources* of any country are its unmined minerals, unfelled timber, and the like. "Great acumen has been shown in husbanding the *resources* [that is, the funds] of the Memorial" (V. Heiser). "Unless men and women are to turn into unthinking mechanisms... they must possess some *resources* [that is, some other interests or skills] outside their particular work" (Grandgent). **Assets** both in law and in accounting always implies an opposition to *liabilities* and therefore suggests the possibility of an inequality between the two and a difference between one's ostensible and one's actual wealth. When the term is used in reference to the settlement of the estate of a deceased person or to the legal administration of the property of an insolvent or bankrupt person or concern, the assets include all the possessions of marketable value which may be turned into money to provide for the payment of the liabilities; thus, the *assets* of the estate were sufficient to cover all liabilities, including the decedent's debts and his legacies. When used in reference to general balance sheets of a company or corporation, the term comprehends all items which from one point of view can be called resources having book value. But *assets* is never exactly the same as *resources*, because the latter word does not, as *assets* always does, imply a comparison with *liabilities*.

possible. 1 **Possible, practicable, feasible** come into comparison as meaning capable of being realized. That is **possible** (as here compared: see also **PROBABLE**) which is not contrary to the nature of things, but which, given the proper conditions, does or may exist or occur; as, "Although he [Plato] still asserts that community of goods would be the ideal institution, he reluctantly abandons it as a basis for a *possible* state" (G. L. Dickinson).

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

son); "there will be such [a minority of abnormal persons]... in every possible society" (*H. Ellis*). That is **practicable**, such as a plan, project, scheme, or the like, which may be easily or readily effected by the means at hand or under current conditions (as, "the notion of a Government department trying to make out how many different types were necessary, and how many persons of each type, and proceeding to breed them by appropriate marriages, is amusing but not *practicable*"—*Shaw*), or such as a method or way of doing or making something that the thing turned out is, or remains, of practical value (as, "It is admitted to be impossible to distinguish the innocent from the infected product [the filling of comfortables] in any *practicable* way when it is made up into comfortables"—*Justice Holmes*), or such as a newly devised or untried machine, implement, instrument, process, or the like, which is found usable or operable (as, television was finally shown to be not only *possible* but *practicable*; "Hearing Ed Hall berate a farmer who doubted the *practicability* of the machine"—*S. Anderson*). That is **feasible** which is not only highly possible but also to all appearances practicable (with, however, a less definite suggestion of concrete ways and means), and which therefore (especially when applied to a project, plan, scheme, or the like) is or seems to be capable of working out or of being worked out successfully; as, "My cousin... express[ed] a purpose, if the matter could be contrived, of bringing you with her; I was willing to believe that you had... found it *feasible*" (*Cowper*); "I am not here concerned with the question whether such a 'humanistic' civilization as that aimed at by Professor Babbitt is or is not desirable; only with the question whether it is *feasible*" (*T. S. Eliot*); "Was it really *feasible* to offer Anglicanism as a world religion?" (*C. Mackenzie*). Oftentimes, *feasible* specifically implies suitability to an expressed or understood purpose, or appropriateness as a means of accomplishing a given or implied end; as, a northern resort is not *feasible* for some invalids in winter; the suggested plot was not *feasible* for the type of play he wished to write.

Ana. Practical, *practicable: *expedient, advisable.

2 *Probable, likely.

Ana. Credible, believable, colorable, *plausible: potential, dormant, *latent.

post, n. *Position, place, situation, office, job, berth, billet, capacity.

posterior, adj. Posterior, rear, hind, hinder, after, back agree in meaning behind in order of arrangement in space. **Posterior** is the formal or technical term for that which is situated behind (opposed to *anterior*). "To an anatomical eye the *posterior* part of the skull is even more striking than the *anterior*" (*T. H. Huxley*). **Rear** belongs especially to military usage, but has general application with reference to structures, vehicles, and the like; as, the *rear* ranks of a column; the *rear* guard (cf. to bring up the *rear*); the *rear* wall of a house. **Hind** (opposed to *front, fore*) is used most commonly with reference to related parts, and designates the member or pair which is in the rear; as, the *hind* wheels of a wagon; the *hind* legs of a horse. It has sometimes more general application. "The lower and *hind* part of the body" (*J. Moore*). **Hinder** is equivalent to *hind* or (in nontechnical use) *posterior*; as, "the *hinder* part of the ship" (*Mark* iv. 38); "the *hinder* part of the skull" (*T. H. Huxley*). **After** is usually confined to nautical usage and applies to that which is abaft the midship section, or in the rear part of a vessel, or relatively near to this part; as, the *after* cabin or hatchway. **Back** applies to that which is thought of as behind, remote from, or inferior or subsidiary to, the

main or more important part; as, *back* stairs; a *back* door, seat, settlement; cf. the *backwoods*.

Ant. Anterior.

postern, n. Gate, *door, gateway, doorway, portal.

postpone, v. *Defer, suspend, stay, intermit.

Ana. *Delay, retard, slow, slacken: *adjourn, prorogue.

postulant, n. *Novice, novitiate, probationer, neophyte, apprentice.

postulate, n. Presupposition, presumption, assumption, premise, position. See under **PRESUPPOSE**.

Ana. *Principle, axiom, theorem, fundamental, law: theory, *hypothesis.

postulate, v. *Presuppose, presume, assume, premise, posit.

Ana. Affirm, aver, predicate, *assert.

posture, n. 1 **Posture, attitude, pose** come into comparison when they denote a position assumed by the body or the disposition of the parts of the body with relation to one another. The same distinctions in implications and connotations mark the uses of the verbs **posture**, **attitudinize**, **pose**. **Posture** applies either to a position that is habitual or characteristic or to one that is consciously or unconsciously determined with reference to the needs or the mood of the moment. In the former case, the word means the way in which one holds oneself and refers to one's physical carriage or bearing; as, her *posture* is excellent; pictures illustrating defects of *posture*; examples of correct *posture*. In the latter case, the word requires qualification (as, a sitting *posture*; a kneeling *posture*; the *posture* of supplication) or the assistance of the context to evoke a picture of how the parts of the body are disposed or to reveal the intention or end. "There's a *posture* for a man to fight in! His weight isn't resting on his legs" (*Shaw*). "Nearly all the opera of the world is so supported. A few rich cads pay the bills, their wives *posture*... in the boxes" (*Mencken*). **Attitude** applies chiefly to a posture that is unconsciously expressive or is intentionally assumed, often as a result of a particular mood or state of mind; as, not only her standing aside from the crowd but also her *attitude* betrayed her intense shyness; like an actor in the silent pictures striking an *attitude* (or *attitudinizing*) in order to register an emotion. "When her wooer turned from her she rested her arms against the mantel-shelf and bowed her face in her hands... he... left the room without her hearing him or changing her *attitude*" (*E. Wharton*). "Uttering platitudes in stained-glass *attitudes*" (*W. S. Gilbert*). **Pose** applies to an attitude or to a position of some part or parts of the body which is assumed for the sake of effect, or which, it unconscious, strikes the observer as effective or as affected; as, the *pose* of a model; to *pose* for a picture. "Assuming a *pose* for inspection at the threshold of the parlour, [she] would demand of Samuel: 'Shall I do?' " (*Bennett*). "She was very charming at her instrument [the harp]; the *pose* suited her tip-tilted canary head, and her little foot and white arms" (*Cather*). "The lofty *pose* of her head expressed an habitual sense of her own consequence" (*Shaw*).

Ana. *Bearing, carriage, deportment, mien.

2 Situation, *state, condition, mode, status, estate.

Ana. *Position, stand, attitude: readiness, quickness, promptness (see corresponding adjectives at **QUICK**).

posture, v. Attitudinize, pose. See under **POSTURE, n.**

pot, n. *Bet, wager, stake, blind, ante.

potent, n. *Powerful, puissant, forceful, forcible.

Ana. *Vigorous, energetic, strenuous, lusty: *effective, efficacious, effectual: *strong, sturdy, tenacious.

Ant. Impotent.

potential. Dormant, *latent, quiescent, abeyant.

Ant. Active, actual.

pothor, n. Flurry, fuss, ado, *stir, bustle.

Ana. *Haste, hurry, speed, dispatch: agitation, upset, perturbation, disturbance (see corresponding verbs at DISCOMPOSE).

Con. Coolness, collectedness, composure (see corresponding adjectives at COOL).

pouch. *Bag, sack.

pound, v. *Beat, pummel, buffet, baste, belabor, thrash, thresh.

Ana. *Strike, hit, smite, slug: batter, mutilate (see MAIM).

poverty. Poverty, indigence, penury, want, destitution, privation are here compared as denoting the state of one who is poor or without enough to live upon. Poverty, the most comprehensive of these terms, may imply either the lack of all personal property or possessions (as, the monk's vow of *poverty* prevents him from having anything he may call his own) or it may imply resources so limited that one is deprived of many of the necessities and of all of the comforts of life (as, "in Syria he feathered his nest so successfully that in two years he raised himself from *poverty* to opulence"—Buchan). Indigence (often opposed to *affluence*) does not suggest dire or absolute poverty, but it always implies reduced or straitened circumstances and therefore usually connotes the endurance of many hardships and the lack of comforts; as, to endure *indigence* in his old age; clothing neat and clean but somewhat threadbare gave evidence of his *indigence*; "The road that leads from competence and peace To *indigence*" (Cowper). Penury may or may not imply abject poverty but it does suggest such an extreme of need, especially of money, that one is cramped or oppressed by the lack of it; as, "Chill Penury repress'd their noble rage" (Gray); "she has to take anything she can get in the way of a husband rather than face *penury*" (Shaw). But *penury* may imply the semblance of poverty that comes from miserliness or penuriousness (cf. *penurious* under STINGY); as, "Her relatives considered that the *penury* of her table discredited the Mingott name, which had always been associated with good living" (E. Wharton). Want (see also LACK) and destitution both imply an extreme of poverty that leaves one without the means of mere subsistence: both terms, especially the latter, often imply starvation and homelessness or the need of charity; as, he is in great *want*; a small weekly gift that secures a family against *want*; "Here to the homeless child of *want* My door is open still" (Goldsmith); "One estate, passing by death from heir to heir three times...in one year (as happens easily during a war) is wiped out by them [death duties], and the heirs reduced from affluence to *destitution*" (Shaw). Privation, though implying a state that is comparable to the one suggested by *indigence*, does not, as the latter term does, necessarily suggest poverty: although it always implies a condition of being without many of the necessities of existence or an insufficient supply of them, it may connote another cause of such a condition than a lack of money or of possessions of value; as, an explorer must often undergo prolonged *privations*; months of *privation* had made every member of the family look scrawny and ill-nourished.

Ana. Necessity, *need, exigency: strait, pass, pinch (see JUNCTURE).

Ant. Riches.

power, n. 1 Power, force, energy, strength, might, puissance, arm come into comparison when they mean the ability to exert effort as in doing, bearing, resisting, or the like. Power is the most general of these terms, and

denotes the ability, latent or exerted, inherent or acquired, physical or mental or spiritual, to act or be acted upon, to effect something or to affect or be affected by something; as, the finest machine in the world is useless without a motor to give it *power*; the mechanical *power* of the internal-combustion engine; the king has great *power* over his people; to raise the productive *power* of a body of workers; "the sound of a great flood moving with majesty and *power*" (Calder); "What is it...which has made it [the Authorized Version] a factor of such *power* in the development of our speech?" (Lowes); "Her pained reserve had no *power* to awe them into decency" (Conrad); to give an attorney the *power* to act for one; "hateful to feel their *power* over me when I knew that they were nothing but fancies" (Hudson). Force, as here compared (see also FORCE, 2), implies the exhibition or the exercise of power: the term usually therefore carries with it a suggestion of actually overcoming resistance, actually setting a thing in motion or accelerating its motion, actually driving a person or thing in the desired direction, or the like; thus, one has the *power* to do something but exerts *force* when he accomplishes it; a wind gathers *force*; "accumulated *force* which drove them as if discharged from a cross-bow" (Jefferies); "[the tiller of the soil] deals with a hard and rebellious element not to be conquered mainly by skill...but mainly by *force*" (H. Ellis); "He had in fact settled down into a dilettante, having learnt...to scorn the triumphs which he lacked the *force* to win" (Bennett). Therefore, *force* is often applied to a person or thing that exerts its power with marked efficacy or efficiency; as, "They believed that the Church was the only *force* which could consolidate the nation" (Inge); "Giles Overreach [in Massinger's *New Way to Pay Old Debts*] is essentially a great *force* directed upon small objects" (T. S. Eliot); "Art is but the expression of a harmony of life, a fine balance of all the *forces* of the human spirit" (Binyon). Energy in practically all of its senses implies contrast to *power* in the sense of latent power and denotes either the power that is expended in actual work or the power that is capable of being transformed into work. In the physical sciences, *energy* is an extremely important term and is, in general, thought of as one aspect of matter, of which the other is mass: when matter, regardless of the size or weight of the mass, is in motion, its capacity for work is described as *actual*, or *kinetic*, *energy*; when its power for work is dependent on its position with reference to other matter, its capacity for work is described as *potential energy*; thus, a machine that is being operated exhibits kinetic *energy*; a projectile so placed that it will reach the target at which it is aimed when it is fired exhibits potential *energy*. In these sciences energy may be mechanical, electrical, molecular, chemical, or the like; as, "the electrical *energy* expended in the circuit is derived from the chemical *energy* of the freshly compounded battery" (Karl K. Darrow). In general use, especially as applied to persons, *energy* implies stored-up power releasing itself in work or craving such release; as, "The *power* of poetry is, by a single word...to instill *energy* into the mind, which compels the imagination to produce the picture" (Coleridge); "The prodigious *energy* put forth by industry in time of war" (A. C. Morrison); "Politics and patriotism afforded practical outlets for Greek *energy*" (B. Russell); "It was marvellous...that the *energy* of her spirit could carry through so triumphantly her frail nervous system" (H. Ellis). Strength applies to the power that resides in a person or thing as a result of qualities or conditions that enable him or it to exert force or to manifest great energy or to resist pressure, strain, stress, attack, or the like. Physically,

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

strength implies soundness, as of health, of construction, or the like (as, *strength* of body; the tensile *strength* of a rope; the blasting *strength* of an explosive); mentally and morally, it implies capacity for endurance, resolution, intrepidity, or the like (as, to show *strength* in trial, or temptation, or in danger); when applied to armies, forces, fleets, and the like, it usually implies numbers, equipment, resources, etc. (as, it was impossible to estimate the exact *strength* of the enemy's army; a fleet incomparable in *strength* with any other). *Might*, *puissance*, *arm* are more or less rhetorical or poetic words meaning operative or effective power or force. *Might* often suggests great or superhuman power; it is therefore appropriate when the reference is to supernatural beings or supernatural forces or to human power that is so strong that it cannot be gainsaid. "Protect us by thy *might*, Great God, our King" (S. F. Smith). "Let us have faith that right makes *might*" (Lincoln). "The pride and *might* and vivid strength of things" (Galsworthy). *Puissance* is often indistinguishable from *might*, but in very discriminating use it generally also connotes an impressive display of power. "We should advance ourselves To look with forehead bold and big enough Upon the power and *puissance* of the King" (Shak.). "Wherefore should not strength and might There... weakest prove Where boldest, though to sight unconquerable? His [Satan's] *puissance*... I mean to try" (Milton). *Arm*, which is a figurative extension of *arm*, the upper human limb, is capable of two applications, both implying operative or effective power. Sometimes, it is applicable to the power, or body having authority, that executes, as one's arm executes that which one's mind conceives or one's will directs; thus, the police force is the *arm* of the law; the civil authority was in past times called the secular *arm*, that is, the *arm* of the ecclesiastical authority. *Arm* is also, in military use, applied to one branch of the service; as, the air *arm*. Sometimes it is applicable to the might that shows itself, especially in overcoming an enemy: in these cases, *arm* often seems metaphorical rather than idiomatic English. "Son of man, I have broken the *arm* of Pharaoh king of Egypt" (Ezekiel xxx. 21). "To whom is the *arm* of the Lord revealed?" (Isaiah liii. 1). "He, whose strong *arm* the Orient could not check, He, who had held the Soldan at his beck" (Wordsworth).

Ana. *Ability, capacity, capability: *gift, genius, talent, faculty: qualification, competence (see corresponding adjectives at ABLE).

Antf. Impotence.

2 Power, faculty, function come into comparison only when they mean an ability to act or perform in a given way or a capacity for a particular kind of action or performance. Since, as so defined, all of these terms are used specifically of human beings, they primarily suggest a mental ability or capacity that controls or directs conscious operations of the body or spirit as well as of the mind. *Power*, the comprehensive term of this group, may apply to a capacity for action or performance that does not, or apparently does not, call the mind into play (as, the *power* to digest food; the *power* of reflex movement) but it more frequently applies to an ability or capacity that involves either mental activity or mental receptiveness (as, the *power* to think clearly; the *power* to understand; to lose one's *power* to remember; "to Rima had been given this quickness of mind and *power* to divine distant things"—Hudson; the *power* of hearing delicate sounds; "distinguishing in the soul three principles or *powers*, reason, passion, and desire"—G. L. Dickinson). *Faculty*, often but far from always, applies to a native or inherent power: in earlier use it applied especially to those powers which were the possession of every normal

human being, though not always manifested in the first months of infancy or the earliest years of childhood; as, the *faculty* of hearing; the *faculty* of speech. Still later, the word became a technical term of psychology referable to any one of the three (or more) powers of the human mind (often will, memory, reason), which psychologists discovered by an analysis of the entity called "mind" or "soul"; as, "The understanding and will, are two *faculties* of the mind" (Locke); "The truth is that memory and imagination, the two most important human *faculties*, are scarcely cultivated at all" (Grandgent). Individual analyses not only resulted in enumerating widely different faculties and in widely differing definitions of faculties called by the same name (such as reason and understanding), but brought out a tendency to regard each faculty as a separate and distinct thing; consequently, the term as applied to one of the enumerable powers of the mind or soul has fallen into disrepute and is avoided in current psychological use. However, *faculty* as meaning generally a distinct, discoverable power of the human mind or soul, and *faculties* as meaning all the powers of the mind which are essential for its successful operation, are both found in good writing, especially nontechnical writing; as, "There has been endless discussion whether we have a distinct *faculty* for the knowledge of God" (Inge); "It is the one occasion when violent grief, disturbing his *faculties*, appears in his correspondence" (Belloc). In current psychology, *function*, as denoting an activity which can be more or less definitely associated with the brain or the central nervous system or a part of either, is usually preferred to *faculty* and, sometimes, to *power*. "All mental activities, such as seeing, hearing, perceiving, conceiving, imagining, recalling, etc., are termed *functions*" (Carl Murchison). Some psychologists distinguish kinds of psychology according to the stress laid upon mental processes as evidences of the existence of faculties (*faculty psychology*) or as activities involving the sense organs, central nervous system, and brain (*functional psychology*).

3 Power, authority, jurisdiction, control, command, sway, dominion are here compared as meaning the right or prerogative of determining, ruling, or governing, or the exercise of that right or prerogative. *Power* even in this specific sense never loses its fundamental implication of ability, but in this case it is a capacity for rule that resides in one by virtue of one's rank, one's office, or even one's character or personality; as, in an absolute monarchy the king has sole *power*; all *power* over life and death was placed in the hands of the general; knowledge is *power*. "It is a strange desire, to seek *power*, and to lose liberty; or to seek *power* over others, and to lose *power* over a man's self" (Bacon). *Power* when used with reference to a definite person or body or office commonly connotes divisibility or strict limitation; as, the trustees have *power* of appointment; the charter gives the city *power* to tax sales; he was given *power* of attorney but he never exercised that *power*; there is no division of *power* when a dictator rules. "It is not enough that a statute goes to the verge of constitutional *power*. We must be able to see clearly that it goes beyond that *power*" (Justice Holmes). *Authority* is often used interchangeably with *power*; nevertheless, there is an essential difference in meaning. In precise use, *authority* refers to power resident in or exercised by another than oneself; thus, one may have *power* (not *authority*) to determine one's own actions, but a parent or a master or a ruler has the *authority* (or, less precisely, the *power*) to determine the actions of those under him; so, one is obedient to *authority* (not *power*); *authority* (more precise than *power*) is needed to restrain persons from infringing upon

the rights of others; the schoolmaster refrained from exercising his *authority* until all attempts at persuasion failed. "The object is to induce the child to lend of his own free will; so long as *authority* is required, the end aimed at has not been achieved" (B. Russell). "*Authority* in the religious sphere generally means absolute or infallible *authority*, such as Catholics ascribe to the Church, some Protestants to the Bible, and a few mystics to the Inner Light" (Inge). *Power* and *authority*, especially in the plural, often refer to the person or persons who have or hold power or authority as defined. *Powers*, however, usually occurs in the phrase "the *powers* that be" ("The *powers* that be are ordained of God"—Romans xiii. 1) and is either somewhat more comprehensive or less explicit in its reference than "the *authorities*," which often means the persons who have authority in the special instance to decide, to punish, or the like; as, he is always in opposition to the *powers* that be; he threatened to report the offense to the *authorities* (in this case, to the police). In still another sense, *authority* often implies a delegation or grant of power or an authorization to speak, act, or the like, in the name of the one having the real power; as, who gave you the *authority* to remove this fence? "Man, proud man Drest in a little brief *authority*" (Shak.). *Jurisdiction* implies possession of legal or actual power to determine, to rule, or to govern within definitely assigned limits, and of the authority to so act in all matters that come within the sphere of that power, or in figurative use, of the thing's influence. "The principle of law is too well settled to be disputed, that a court can give no judgment for either party, where it has no *jurisdiction*" (Ch. Just. Taney). "This new and populous community must, for the present, the Kansas Bishop wrote, be accounted under Father Latour's *jurisdiction*" (Cather). "Demanding from us a complete subjection to the poetry that occupies us, yet never asking of poetry more than lies within its proper *jurisdiction*" (Day Lewis). *Control*, as here compared, stresses possession of the authority to restrain or curb and its effective exercise, or of actual power to regulate or keep responsive to one's will not only persons, but things; thus, a teacher who has lost *control* of his class has reached a point where the pupils no longer recognize his authority; a fire has gone beyond *control* when those who are fighting it have lost all power to check it. "To be virtuous [to the ancient Greek] was to act under the *control* of the universal reason which was supposed to dwell in man as man" (G. L. Dickinson). "He talked a great deal of a thing called '*control*.' 'When you get ready to start for yourself keep that in mind. . . . Sell stock and borrow money at the bank. . . . but don't give up *control*. . . . That's the way I made my success. I always kept the *control*.'" (S. Anderson). *Command* implies such control as makes one the master of men, and such authority that obedience to one's order or one's will either inevitably follows or is inexorably enforced; thus, one speaks of the officer in *command* (rather than in *control*) of a regiment or says that a person has *command* of a situation (rather than *control* of it) when he completely dominates it or has all persons or things involved in it under control; so, the president assumes *command* of the army and navy in time of war. "How, in one house, Should many people, under two *commands*, Hold amity?" (Shak.). *Command* is also used in reference to things which one has mastered so thoroughly that one encounters no resistance or interference in using, recalling, or controlling them. "His brush did its work with a steady and sure stroke that indicated *command* of his materials" (Jefferies). "These passages [of Shakespeare] are comparable to the best bombast of Kyd or Marlowe, with a greater *command* of

language and a greater *control* of the emotion" (T. S. Eliot). *Sway* tends to be slightly rhetorical because its use in this sense was originally figurative and the word still carries a hint of its etymological implications of swinging or sweeping through an arc or circle; hence, when a word is desired that means power but also connotes extent or scope, and preponderant influence, compelling authority, potency, or the like, *sway* is the proper choice; as, the British Empire has extended its *sway* to every quarter of the earth. "Primal spirits beneath his *sway*" (Shelley). "We can escape from Custom's idiot *sway*" (Cowper). "The law of compensation rules supreme in art, as it holds *sway* in life" (Lowes). *Dominion*, in precise use, imputes sovereignty to the power in question or supremacy to the authority in question; as, the government of the United States has *dominion* over its dependencies, but many of them have the right of self-government. "The powers of the general government, it has been said, are delegated by the States. . . and must be exercised in subordination to the States, who alone possess supreme *dominion*" (Ch. Just. Marshall). "Foreign *dominion* in any shape would soon become hateful" (Freeman).

Arna. *Right, privilege, prerogative, birthright: management, direction (see corresponding verbs at CONDUCT)·ascendancy, *supremacy.

powerful. *Powerful*, *potent*, *puissant*, *forceful*, *forcible* come into comparison as meaning having or manifesting power to effect great or striking results. *Powerful* is applicable only to that which stands out from the rest of its kind as exceeding the others in its display of strength or force, or in its manifestation of energy: it also usually implies an effectiveness that has been proved rather than attributed; as, the most *powerful* ruler of his age; a *powerful* pugilist; a *powerful* fleet; a *powerful* argument that no one could gainsay; a *powerful* cathartic. *Potent*, though it implies powerfulness, is applicable chiefly to that which derives or seems to derive that character from some hidden or latent virtue or quality rather than from an observable or measurable power or force; as, he exercised a *potent* spell over her imagination; a *potent* medicine; "magic *potent* over sun and star" (Wordsworth); "How *potent* is this Oriental blood in Napoleon, in Goethe, in Heine, Victor Hugo" (J. R. Lowell); "metre with its repetition is a *potent* means of compacting words into the expression of spontaneous life" (S. Alexander); "illusions. . . no longer *potent* because they are no longer really believed" (J. W. Krutch). *Puissant*, a bookish word, referring chiefly to persons (usually princes and potentates), to military or naval forces, or to bodies politic, connotes more the outward attributes of power: it commonly suggests a great and abiding strength; as, a *puissant* monarch; a *puissant* commonwealth; a *puissant* army; "Most. . . mighty, and most *puissant* Caesar" (Shak.). "Methinks I see in my mind a noble and *puissant* nation rousing herself like a strong man after sleep, and shaking her invincible locks" (Milton). The last two words of the group, though somewhat more restrained in their suggestion of power, nevertheless imply an ability to effect impressive results. *Forceful* stresses the possession or manifestation of force as a quality: it therefore suggests marked vigor or energy or strength, regardless of whether it is being exercised or not. The word is applicable even to that which makes no display of effort or violence, provided it impresses its undoubted force on the observer; as, a *forceful* personality; a *forceful* style; a *forceful* writer; "he relied more on a *forceful* clarity to convince his readers than on the brilliant and exciting ambiguities of propagandist eloquence" (A. Huxley). *Forcible*, on the other hand, suggests the

actual exertion of power or force: it often implies the use of physical violence in attaining one's ends; as, to make a *forcible* entry into a building; to take *forcible* possession of goods not paid for; to favor *forcible* measures in treating unruly prisoners. There are times, however, when *forceful* falls short because it does not imply aggressiveness, militancy, or decided potency. In such cases, discriminating writers often prefer *forcible*; thus, one might prefer to describe Theodore Roosevelt's personality or a dictator's speech as *forcible* rather than *forceful*.

Ana. *Able, capable, competent: efficacious, effectual, *effective, efficient: *vigorous, energetic, strenuous.

Ant. Powerless: inefficacious.

powerless. *Powerless, impotent, impuissant* agree in meaning unable to effect one's purpose, intention, or end.

Powerless denotes merely lack of power or efficacy; as, he suddenly found himself *powerless* to move; "*powerless* as an infant" (*De Quincey*); "Argument is *powerless* against either feeling" (*Hardy*); "I hope that the luxuries of this palatial mansion are *powerless* to corrupt your heart" (*Shaw*). *Impotent* (see also *STERILE*, 1) implies not only powerlessness, but positive weakness or, especially, complete ineffectiveness; as, "An angry little spitfire sea continually sprits and thrashes with *impotent* irascibility" (*Stevenson*); "terrible and *impotent* rage" (*Wilde*); "Fifteen years later one King of England was put to death, an *impotent* victim" (*Belloc*); "Set him [a Frenchman] to write poetry, he is limited, artificial, and *impotent*; set him to write prose, he is free, natural, and effective" (*Arnold*). *Impuissant*, like *puissant* (see under *POWERFUL*), is a literary term: often it is indistinguishable from *impotent*, but it is sometimes preferred when there is a contrast between the greatness of the attempt and the complete ineffectiveness of the result; as, an *impuissant* man defying fate; to send an *impuissant* army against a *puissant* invader.

Ana. Inert, *inactive, passive, supine: feeble, *weak, infirm, decrepit.

Ant. Powerful: efficacious. -- **Con.** *Effective, efficient.

practicable. 1 Feasible, *possible.

Ana. Operating or operable, working or workable, functioning (see corresponding verbs at *ACT*).

Ant. Impracticable.

2 Practicable, practical are not synonyms in good current use, but they are sometimes confused when they imply a capacity for being used or turned to account.

Practicable (see also *POSSIBLE*, 1) applies chiefly to things which have not been worked out (as a plan, project, scheme, design) or which have been recently devised, invented, constructed, or the like (such as a new machine, a new form of entertainment, a new implement), and about which one of the following questions arises: is it capable of being developed or worked out, or is it likely to prove successful in operation or use; thus, many plans for the eradication of poverty are dismissed as "not *practicable*" (or "*impracticable*"); the possibility of wireless telegraphy was questioned until Marconi demonstrated its *practicability*; no *practicable* winter automobile that operates on runners rather than on wheels has yet been devised. **Practical** applies not only to things (concrete and immaterial) but also, as *practicable* never does, to persons. The term in all of its senses stresses an opposition to that which is *theoretical, speculative, ideal, unrealistic, imaginative*, or the like, and implies a relation to the actual life of man, his daily needs, or the conditions which must be met. When the term also implies a capacity for use, it emphasizes actual usefulness rather than highly probable or merely discovered usability; thus, the automobile when first

invented was not regarded as *practicable* by many persons but as a result of numerous improvements in the course of time it is now regarded as a most *practical* vehicle for pleasure, business, transportation, and the like; "Without his [Faraday's] researches in magnetic electricity we might have missed . . . those most *practical* machines of our modern life, the dynamo and the telephone" (*H. Ellis*). Hence, *practical* may apply to anything that is such in kind, character, amount, effect, or the like, that it is definitely useful or serviceable in actual life; as, very few students of French gain a *practical* knowledge of it unless they spend at least a year in France; "In everything he undertook he demanded a utilitarian purpose and a *practical* result" (*Buchan*); "These writers cannot confirm any one in the faith; they can merely have the *practical* value of removing prejudices from the minds of those who have not the faith but who might possibly come to it" (*T. S. Eliot*); "With . . . the real, *practical* kindness of leaving some money for her board . . . they moved on" (*Deland*).

practical. *Practicable.

practically. *Virtually, morally.

practice or practise, v. Practice (or, as a verb, spelled also *practise*), **exercise, drill** come into comparison as verbs meaning to perform or cause one to perform an act or series of acts repeatedly, and as nouns denoting such repeated activity or exertion. **Practice** fundamentally implies doing, especially doing habitually or regularly, often in contrast to thinking, believing, and professing, or to theory and precept; as, to *practice* what one preaches; the *practice* of one's religion; to *practice* medicine; the *practice* of one's profession; in theory, every citizen votes but in *practice*, rarely more than half avail themselves of the privilege; "If a thing has been *practiced* for two hundred years by common consent, it will need a strong case for the Fourteenth Amendment to affect it" (*Justice Holmes*). *Practice* also implies a doing over and over again of certain acts for the sake of acquiring proficiency, dexterity, skill, or the like, or in the hope of attaining perfection; as, "*Practice* makes perfect" (*Proverb*); to *practice* on the piano one hour each day; rifle *practice*; "I suppose they teach you to make Latin verses . . . ? That's very good *practice*" (*Arch. Marshall*). **Exercise** fundamentally implies a keeping busy or a setting to work; it usually presupposes the possession of a power or of powers which can be developed or strengthened only by activity, especially repeated activity, or can be manifested only in practice; as, give him plenty of opportunities to *exercise* his intelligence; a wise father avoids the *exercise* of authority except when other means fail; "he had liberality, and he had the means of *exercising* it" (*Austen*); "so long as a child is with adults, it has no occasion for the *exercise* of a number of important virtues, namely, those required by the strong in dealing with the weak" (*B. Russell*); "Will can only be *exercised* in the presence of something which retards or resists it" (*Inge*). Like *practice*, *exercise* may be used also to imply acts performed repeatedly for the sake of an ulterior end, but *exercise* usually refers either literally or figuratively to those directed to the attainment of health or physical vigor; as, Tom was being *exercised* like a raw recruit; to grow mentally dull through lack of physical *exercise*. "*Exercise* is good for the muscles of mind and to keep it well in hand for work" (*Lowell*). "Poetry is in France an *exercise*, not an expression. It is to real French expression, to prose, what gymnastics and hygiene are to health" (*Brownell*). **Drill** fundamentally connotes an intention to fix physical or mental habits as deeply as though they were bored in by the use of the drill, the tool; in current use, the term

stresses repetition, as of military evolutions, of word pronunciations, of grammatical rules, or the like, as a means of training and disciplining the body or mind or of forming correct habits; as, to *drill* troops; a *drill* in arithmetic. "This is a real danger in modern education, owing to the reaction against the old severe *drill*. The mental work involved in the *drill* was good; what was bad was the killing of intellectual interests" (*B. Russell*).

Ana. *Perform, execute, fulfill: *follow, pursue: *repeat, iterate.

practice, *n.* 1 *Habit, habitude, usage, custom, consuetude, use, wont.

Ana. Procedure, *process, proceeding: *method, system, way, fashion, mode, manner.

2 Exercise, drill. See under PRACTICE, *v.*

Ana. *Use, utility, usefulness: usage, *form, convention, convenience: pursuit, calling, *work.

Ant. Theory: precept.

pragmatical, pragmatic. Official, meddlesome, *impertinent, intrusive, obtrusive.

Ana. *Curious, prying, inquisitive: *busy, assiduous, sedulous: agitated, disturbed, perturbed (see DISCOMPOSE): interfering, interposing, intervening (see INTERPOSE).

praise, *v.* Praise, laud, acclaim, extol, eulogize agree in meaning to express approbation or esteem. Praise often implies no more than warmly expressed commendation. "What we admire we *praise*, and when we *praise*, Advance it into notice" (*Cowper*). When specifically referred to persons, it frequently suggests the judgment of a superior; as, to *praise* a pupil for his diligence. However, it is also used in reference to God (or a god), or a saint. Then it implies glorification by acts of homage, such as song or prayer. "*Praise* God from whom all blessings flow" (*Ken*). Sometimes it connotes thanksgiving. "Though we have not beef and mutton...yet (God be *praised*) we want them not; our Indian corn answers for all" (*Winthrop*). *Laud* implies very high, sometimes excessive, praise; as, *lauded* to the skies. "Both of the writers *lauded*... contemporaries who were certainly no better than middling performers in their several arts" (*C. E. Montague*). *Acclaim* usually suggests enthusiastic expression of approval, etc., as by loud applause or cheers. "Dr. Welch... was *acclaimed* not only in his own country but throughout the civilized world" (*V. Heiser*). *Extol* retains its etymological implication of lifting up or raising, and suggests praise that exalts or magnifies. "They... *extoll'd* your perfections to the heavens" (*B. Jonson*). It is often used when a contrast between approbation or esteem and their opposites is enforced. "To find Virtue *extolled*, and Vice stigmatized" (*Addison*). "An age must always decry itself and *extol* its forbears" (*Galsworthy*). *Eulogize*, sometimes interchangeable with *extol*, differs from it in implying formality both in the method and in the occasion; very frequently it suggests a set composition or oration (*eulogy*), suitable for a funeral or testimonial. "He *eulogized* constitutional government as immeasurably superior to despotism" (*Lecky*). "*Eulogies* turn into elegies" (*Spenser*).

Ana. *Commend, applaud, compliment: *exalt, magnify, aggrandize.

Ant. Blame. — *Con.* Asperse, *malign, traduce, vilify, calumniate, defame, libel: disparage, *decry, detract from, belittle: reprehend, reprobate, censure, denounce, *criticize.

prank, *n.* Prank, caper, antic, monkeyshine, dido agree in meaning a playful, often a mischievous, act or trick. Prank still carries the strongest implication of devilry of all these words, though now there is little suggestion of

malice and greater emphasis upon the practical joke than in the past. "Hear thou... how many fruitless *pranks* This ruffian hath botch'd up" (*Shak.*). "His [Middleton's] comedies... are long-winded; the fathers are heavy fathers, and rant as heavy fathers should; the sons are wild and wanton sons, and perform all the *pranks* to be expected of them" (*T. S. Eliot*). *Caper* still suggests friking and bounding like a kid; it does not as often in modern use as in the past evoke the image of dancing and leaping (as, "Faith, I can cut a *caper*" *Shak.*), but rather, especially in the plural, the romping and running of children in overflowing spirits and frolicsome mood; as, to find childish *capers* annoying. *Antic* stresses the ludicrousness and grotesqueness of the movements, gestures, and postures, rather than the spirit in which the acts or tricks are performed; as, the *antics* of a clown. Sometimes, however, it suggests "grandstand play"; as, to watch the *antics* of boys climbing poles. "The Casterbridge tradition was that to drive stock... hideous cries, coupled with yahoo *antics*... should be used" (*Hardy*). *Monkeyshine* (a slang term in American use) may be applied to a caper or antic but it usually also implies amusing mimicry or extreme nimbleness in movement. It is a frequent designation of the mischievous tricks and capers of young boys. *Dido* (also slang) adds to *prank* the implications of racket making and often, of malicious mischief; as, to cut up *didos* on Halloween.

Ana. Frolic, gambol, rollick, sport, play (see under PLAY, *v.*): levity, *lightness, frivolity: vagary, *caprice, freak, whim, whimsey.

prank, *v.* *Preen, prune, prink, primp, perk up, doll up.

Ana. *Adorn, ornament, decorate, deck, bedeck, embellish, beautify.

prate. Chatter, *chat, gab, patter, prattle, babble, gabble, jabber, gibber.

prattle. Chatter, patter, prate, gab, *chat, babble, gabble, jabber, gibber.

pray. Plead, petition, appeal, sue. See under PRAYER.

Ana. Supplicate, entreat, beseech, implore, *beg.

prayer. Prayer, suit, plea, petition, appeal and their corresponding intransitive verbs *pray*, *sue*, *plead*, *petition*, *appeal* agree in meaning an earnest and, usually, a formal request for something (or to make such a request). *Prayer* and *pray* (*for* or *to*) imply that the request is made to a person or body invested with authority or power, or especially to God or a god; the words usually therefore connote humility in approach and often fervor in entreating. "We do *pray* for mercy; And that same *prayer* doth teach us all to render The deeds of mercy" (*Shak.*). In religious use, however, where *prayer* and *pray* always imply an act of worship, they may or may not connote a request or petition. This implication of making a request is retained, however, in the specific legal use of these terms in a court of equity, where formally one *prays* for relief; the *prayer* in a bill in equity is the part that specifies the kind of relief sought. The words are also used in formal petitions or remonstrances to a legislative body. *Suit* and *sue* (*for* or *to*) imply a deferential and formal solicitation, sometimes for help or relief, but often for a favor, a grace, a kindness, and the like. Except in legal use (see SUIT, *n.*, 3) in reference to the addresses of a man (a suitor) to the lady he hopes to marry, and in some idiomatic phrases such as, "to *sue* for peace," the words are somewhat archaic in flavor. "There Kings shall *sue*, and suppliant States be seen Once more to bend before a BRITISH QUEEN" (*Pope*). "Is it that I *sue* not in some form Of scrupulous law, that ye deny my *suit*?" (*Shelley*). *Plea* (see also APOLOGY) and *plead* (*for*) often suggest a court of law, the status of a defendant or of an accused person, and his formal statements in an-

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

swer to the plaintiff's allegations or the state's charge. *Plea*, especially, has technical senses not here considered. In general use, however, both terms imply argument or urgent entreaty, of which self-justification, a desire for vindication or support, or strong partisanship, is usually the motive; as, to make a *plea* for forgiveness; to *plead* for a more tolerant attitude. "Though justice be thy *plea*, consider this, That, in the course of justice, none of us Should see salvation" (*Shak.*). "I *plead* frankly for the theistic hypothesis as involving fewer difficulties than any other" (*Inge*). *Petition* and its verb *petition* (*for*) imply a formal and specific request, often in writing, presented to the person or body that has power to grant it. In modern use, the words carry little or no connotation of abject humility of entreaty or the like; rather they suggest a right to make a request, as one of the sovereign people or as one who is confident that it will be judged on its merits; as, to *petition* (or send a *petition* to) the legislature to repeal an obnoxious law; to make a *petition* to the court for a new trial. *Appeal* and *appeal* (*for* or *to*) basically imply a call for attention to and favorable consideration of one's plea; as, to *appeal* for mercy; to *appeal* to one's family for help. Often, they additionally connote an insistence on being heard and hence, a change of plea from an inferior to a superior power, such as a higher court or a higher authority, or, in more recent use, the emotions, in an attempt to evoke a favorable response or judgment; as, to *appeal* to the supreme court for a new trial; the court of last *appeal*. "Against the decree of fate there is no *appeal*" (*A. Huxley*). "Mantalinis and Dobbins who pursue women with *appeals* to their pity or jealousy or vanity" (*Shaw*). In current use, the terms often omit the "to" phrase and imply a sympathetic or favorable response or a compelling quality; as, an *appealing* way; the song has a human *appeal*.

Ana. Supplication, entreaty, beseeching, imploring, begging (see *BEG*): worship, adoration (see under *REVERE*).

preamble. *Introduction, prologue, induction, prelude, overture, preface, foreword, prolegomenon, proem, exordium, prolusion, protasis, avant-propos.

precarious. *Dangerous, hazardous, perilous, jeopardous, risky.

Ana. *Doubtful, dubious, questionable: distrustful, mistrustful (see corresponding verbs at *DISTRUST*): chance, chancy, haphazard, *random.

Con. *Safe, secure: *steady, even, equable, constant.

precedence. *Priority.

Ana. Leading or lead, guiding or guide (see corresponding verbs at *GUIDE*): antecedence, foregoing (see corresponding adjectives at *PRECEDING*).

precedent, adj. *Preceding, antecedent, foregoing, previous, prior, former, anterior.

preceding, adj. *Preceding, antecedent, precedent, foregoing, previous, prior, former, anterior* agree in meaning being before, especially in time or in order of arrangement. *Preceding* (opposed to *succeeding, following*) is restricted to time and place; it usually means immediately before; as, the *preceding* day; the *preceding* clause; events *preceding* the opening of the story. *Antecedent* (opposed to *subsequent, consequent*) usually implies order in time, but unlike *preceding*, it often suggests an indefinite intervening interval; as, events *antecedent* to the opening of the story; Chaucer's poems were written in a period *antecedent* to the Elizabethan Age. Very often, also, the word implies a causal or a logical, as well as a temporal relation; thus, to understand the success of modern dictators we must have a knowledge of *antecedent* conditions (that is, of conditions

earlier in time and causative of dictatorships); a conclusion is based on a chain of *antecedent* inferences. *Precedent* often applies to one thing which must precede another thing if the latter is to be valid or become effective; thus, a condition *precedent* in law is a condition that must be fulfilled before an estate can be vested in one or before a right accrues to one. *Foregoing* (opposed to *following*) applies almost exclusively to statements; as, the *foregoing* citations; the *foregoing* argument. *Previous* and *prior* (opposed to *subsequent*) are often used interchangeably, esp. with *to*; as, *previous* to, or *prior* to, a given date. But *prior* sometimes implies greater importance than *previous*; thus, a *previous* obligation suggests merely an obligation entered into earlier in point of time, whereas a *prior* obligation is one which surpasses the other in importance and must be fulfilled in advance of the other (or others). *Former* (opposed to *latter*), even more definitely than *prior*, implies comparison; as, there can be a *former* engagement only when there is also a later one; a *previous* or *prior* engagement may prevent one's making a second. *Anterior* (opposed to *posterior*), also comparative in force, applies to position, usually in space, sometimes in order or time; as, the *anterior* lobe of the brain. "Organization must presuppose life as *anterior* to it" (*Coleridge*).

Ant. Following.

precept. Rule, *law, canon, regulation, statute, ordinance.

Ana. *Principle, fundamental, axiom: *doctrine, tenet, dogma: injunction, behest, bidding (see *COMMAND, n.*).

Ant. Practice: counsel.

precious. *Costly, expensive, dear, valuable, invaluable, priceless.

Ana. *Choice, exquisite, recherché, rare: valued, prized, appreciated, cherished (see *APPRECIATE*).

precipitate, adj. *Precipitate, headlong, abrupt, impetuous, hasty, sudden*, as applied to persons or their acts or behavior, denote, in common, characterized by excessive haste and unexpectedness. *Precipitate* especially stresses lack of due deliberation; sometimes it suggests prematurity, and is therefore especially applicable to decisions or to actions based on decisions. "It was feared by some that she might be *precipitate* in her choice" (*Irving*). *Headlong* throws the emphasis on rashness and lack of forethought; it is used to describe not only persons and their acts, but the qualities exhibited by such persons or in such acts; as, *headlong* folly; *headlong* haste. *Abrupt*, when applied to a person's actions, suggests complete lack of warning, or, sometimes, unceremoniousness; as, an *abrupt* departure; the story came to an *abrupt* end; when applied to manners or words, it usually implies curtness; as, he answered *abruptly*; when applied to style, it retains its etymological implication of a sudden breaking off and connotes sharp changes in thought without any attempts at transition. *Impetuous* implies violence or vehemence; as applied to persons, it often also suggests impulsiveness or, at times, extreme impatience. "You know the *impetuosity* of my brother's temper" (*Fielding*). "No necessity exists for any hurry, except in the brain of that *impetuous* boy" (*Meredith*). *Hasty* stresses quickness of response, and often suggests thoughtlessness and hot temper rather than impulsiveness. "I am known to be a humorous patrician...*hasty* and tinder-like...what I think I utter, and spend my malice in my breath" (*Shak.*). *Sudden*, as here compared, is distinguishable from *sudden* meaning unexpected only by its added implications of extreme hastiness or impetuosity; as, *sudden* in temper; given to *sudden* rages "Now and then an access of...*sudden* fury...would lay hold on a man or woman" (*Kipling*).

Ana. Headstrong, willful, refractory (see UNRULY).

Ant. Deliberate. — **Con.** Leisurely, *slow.

☞ Do not confuse precipitate with precipitous.

precipitate, v. *Speed, accelerate, quicken, hasten, hurry.

Ana. Drive, impel (see MOVE, v.): *force, compel, coerce, constrain.

precipitous. *Steep, abrupt, sheer.

Ana. Soaring, towering, rocketing, ascending, rising (see RISE).

☞ Do not confuse precipitous with precipitate.

précis. Sketch, aperçu, survey, *compendium, syllabus, digest, pandect.

precise. Exact, accurate, *correct, nice, right.

Ana. Definite, express, *explicit: strict, *rigid, rigorous, stringent.

Ant. Loose. — **Con.** Lax, slack (see LOOSE): *careless, heedless.

preciseness. *Precision.

precision. Precision, preciseness agree in denoting the quality or character of that which is precise. Precision commonly denotes a quality that is sought for or is attained, usually as a highly desirable thing. When used in reference to language, it implies expression with such exactitude that neither nothing more nor nothing less than what applies to the thing under consideration is said; as, "expressing herself...with incomparable precision" (Arnold); "to describe with precision...the persons to whom this high privilege was given...the word citizen was...substituted for...free inhabitant" (Ch. Just. Taney); "[Rhetoric] is merely a vague term of abuse for any style that is...so evidently bad or second-rate that we do not recognize the necessity for greater precision in the phrases we apply to it" (T. S. Eliot). When used in reference to the arts, sciences, and the like, the term usually implies such clearness of definition or such sharpness in distinction or in distinguishing, that there is no confusion as to outlines, boundaries, dividing lines, movements, or the like; as, "However we may disguise it by veiling words we do not and cannot carry out the distinction between legislative and executive action with mathematical precision" (Justice Holmes). "Taught her to play the piano with the force and precision of a crack regiment of cavalry" (H. G. Wells). "Acting, singing, and dancing seem to me the best methods of teaching aesthetic precision" (B. Russell). Precision is also used in reference to an instrument, a machine, or a part of a machine, or the like, that must be made with such exactness of measurements that an infinitesimal fraction of an inch would debar it from fulfilling its function; as, instruments of precision (or, often, precision instruments); "the fabrication of precision parts" (A. C. Morrison). Preciseness is now rarely used in place of precision, for it has come to carry so strong an implication of severity, or of strictness, sometimes, overnicety, in the observance of religious laws, the code of one's profession, the proprieties as dictated by one's class or social equals, or the like, that it is deprecatory as often as it is laudatory; as, "savoring of Puritanism and overstrict preciseness" (Prynne); "prejudiced preciseness" (C. M. Yonge); "the letter... had the preciseness of an Imperial mandate" (Meredith); the preciseness of his enunciation and diction is almost the only sign of his foreign birth.

preclude. *Prevent, obviate, avert, ward off.

Ana. *Hinder, obstruct, impede, block, bar: *stop, discontinue, quit, cease: *exclude, eliminate, shut out, debar.

precocious. Untimely, forward, *premature, advanced.

Ana. *Immature, unmatured, unripe.

Ant. Backward.

precursor. *Forerunner, harbinger, herald.

Ana. *Sign, mark, token, symptom: antecedent, determinant, *cause, reason.

predicament. Predicament, dilemma, quandary, plight, scrape, fix, jam, pickle are here compared as denoting a situation from which one does or can extricate himself only with difficulty. Predicament, originally a term of logic denoting the character, status, or classification assigned by a predication, now carries in its chief current sense no implications derived from this meaning, except possibly the implication that the situation constitutes a problem for those who are involved in it. The term may imply lack of freedom to do what one wishes or finds essential for some reason, or it may imply deep perplexity as to ways out of the situation. "Advice... may be of such nature that it will be painful to reject and yet impossible to follow it; and in this predicament I conceive myself to be placed" (Crabbe). "The predicament with which our civilization now finds itself confronted—the problem, namely, how to find healthy, happy leisure for all the working millions who are now being liberated by machines" (L. P. Smith). "He explained his own predicament in life. 'I got married,' he said. 'Already I have three children'" (S. Anderson). Dilemma (also originally, and still, a term of logic denoting a choice of alternatives presented by an opponent in argument either of which is extremely damaging to one's case) applies to a situation which constitutes a predicament from which one can escape only by a choice of equally unpleasant or unsatisfactory alternatives; as, the army was confronted with the dilemma of capitulating or starving. Quandary differs from dilemma chiefly in its stress on puzzlement or perplexity; in fact, this implication is often so emphasized that the suggestion of a dilemma, or a choice between alternatives, is lost or obscured; as, he was in a quandary as to how he could keep his appointment; "All his quandaries terminated in the same catastrophe; a compromise" (Disraeli). All the other words now definitely imply a difficulty, often a very disagreeable situation. Plight in its earliest use did not carry this suggestion, for it was applicable to a situation of any kind or character, but in current use, even when unqualified, the term commonly suggests an unfortunate, trying, or unhappy situation; as, "the plight in which the world finds itself to-day" (J. A. Hobson); the plight of this poor family is beyond description. "Cayley Drummie in *The Second Mrs. Tanqueray* has it for his main job to size up the pretty plight of Tanqueray and his wife and to speculate plausibly about things which they cannot very well say" (C. E. Montague). Scrape applies to a plight in which one is involved through one's own fault: often, it suggests a being in disgrace or disfavor; as, "I only suspected it to be Bingley from believing him the kind of young man to get into a scrape of that sort" (Austen); "they're every one of 'em in scrapes, and I've got to pay the piper" (Meredith). Fix and jam are colloquial equivalents of plight, but fix stresses rather the difficulty in extrication, and jam stresses the tight place or hopeless involvements in which one finds oneself; as, he will be in a fix if he doesn't settle his debts when they are due hereafter; he is in a jam financially. Pickle applies to a particularly distressing or sorry plight; as, "How camest thou in this pickle?" (Shak.); "But when I was left ashore in Melbourne I was in a pretty pickle. I knew nobody, and I had no money" (Shaw).

Ana. *State, situation, condition, posture: pass, pinch, strait, emergency, exigency, *juncture.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

predicate, v. Affirm, declare, *assert, aver, protest, avouch, avow, warrant.

predict. *Foretell, forecast, prophesy, prognosticate, augur, presage, portend, forebode.

Ana. *Foresee, foreknow, divine: *warn, forewarn, caution: surmise, *conjecture, guess.

predilection. **Predilection, partiality, prepossession, prejudice, bias** agree in meaning an attitude of mind as exhibited in a feeling or idea which predisposes one to make a certain choice or judgment or to take a certain view without full consideration or reflection. **Predilection** always implies a strong liking that results from one's temperament, one's principles, or one's previous experience, and that predisposes one to prefer certain kinds of friends, books, foods, methods, or the like, or to accept a thing without reference to any other test; as, "For great men I have ever had the warmest *predilection*" (*Carlyle*); "a *predilection* for the strange and whimsical" (*Coleridge*). "Out of the mass of words that make up a language every writer uses only a limited number, and even among these has his words of *predilection*" (*H. Ellis*). "The scientist's refusal to believe in a chaotic universe... is [not] based on any personal *predilections*" (*Inge*). **Partiality** implies a disposition to favor a particular person or thing because of some predilection or, more often, because of overweening fondness or passionate partisanship; it commonly connotes unfairness; as, to show *partiality* in appointments to office; there was no evidence of *partiality* in his treatment of his students; "Mr. and Mrs. Musgrove's fond *partiality* for their own daughters' performance, and total indifference to any other person's" (*Austen*). **Prepossession** always implies a fixed idea or conception in the light of which any new person, new idea, new experience, or the like, is judged; as, Bernard Shaw felt that his dramas were unfavorably criticized because they did not conform to the average critic's *prepossession* of what a play should be; to clear the mind of *prepossessions*; "the *prepossessions* of childhood and youth" (*D. Stewart*). **Prejudice** implies a prepossession (unless distinctly stated, an unfavorable one, implying fear, hate, or repugnance) which affects its possessor's treatment or judgment of a person or thing and tends to work to his or its injury or disadvantage; as, racial *prejudice*; to approach a subject without *prejudice*; "prejudice is blind" (*Gibbon*); "the phenomena of life and character... set down without fear, favour, or *prejudice*" (*Galsworthy*). "Those who use their reason do not reach the same conclusions as those who obey their *prejudices*" (*Lippmann*). **Bias** implies a lack of balance or distortion in one's judgment owing to the pull of a predilection or a prepossession, or of partiality or prejudice, and a resulting inclination in favor of or against a person or thing; as, histories that reveal a *bias* in favor of certain races; "a well-proportioned mind is one which shows no particular *bias*" (*Hardy*); "it is as well that you be able to allow for my personal *bias*" (*Shaw*).

Ana. *Leaning, propensity, proclivity, flair: bent, turn, knack, aptitude, *gift.

Ant. Aversion.

predispose. Dispose, *incline, bias.

Ana. Influence, sway, *affect, touch, impress, strike.

predominant. *Dominant, paramount, preponderant, preponderating, sovereign.

Ana. Controlling, directing, conducting, managing (see **CONDUCT, v.**): *prevailing, prevalent: *chief, principal, leading, main, foremost.

Con. *Subordinate, secondary, dependent, subject.

pre-eminent. Surpassing, transcendent, superlative, *supreme, peerless, incomparable, banner.

Ana. analogous words. **Ant.** antonyms.

Con. contrasted words. See also explanatory notes facing page 1.

Ana. *Dominant, predominant, paramount: excelling or excellent, outdoing, outstripping (see corresponding verbs at **EXCEED**): *consummate, finished.

pre-empt. *Arrogate, usurp, appropriate, confiscate.

Ana. *Take, seize, grasp, grab: *exclude, eliminate, shut out, debar.

preen, v. 1 **Preen, prune, prank, prink, primp, perk up, doll up** come into comparison when they mean to spend time and effort in beautifying or adorning oneself. **Preen** and **prune** (which must not be confused with *prune*, meaning to cut off or out that which is superfluous) both originally implied the smoothing of feathers by the beak and referred, therefore, to the motions of a bird: in later use, both were extended in their application to other animals and to human beings who give close attention to details of grooming. *Prune* is currently less often used than *preen* in this sense, with the result that it is sometimes mistakenly regarded as incorrect. "Below them, in their holes in the sandstone, pigeons *preened* themselves and cooed softly" (*D. H. Lawrence*). "Another... with more beard than brain *prunes* his mustaccio" (*B. Jonson*). "Where contemplation *prunes* her ruffled wings" (*Pope*). **Prank** and **prink** both imply a bedecking or adorning, though they often also suggest a preening or beautifying, as with cosmetics: *prank* more often than *prink* is used of places as well as of persons; as, "Mariners *pranked* out in sky-colored suits" (*K. L. Bates*); "The cottage *prankt* with its holly and mistletoe" (*Zangwill*); "To gather kingcups in the yellow mead, And *prink* their hair with daisies" (*Cowper*); "The thousand and one emporiums which patch and *prink* us" (*Galsworthy*). **Primp**, originally a dialectal term, suggests an almost finicky attention to detail and stresses neatness and nicety more than adornment; as, too much time spent in *priming*, too little at work. **Perk up** and **doll up** are colloquial or slang terms. The former specifically implies a freshening of one's appearance, such as by a smartening of one's attire, a new arrangement of one's hair, a removal of old and the application of fresh rouge and powder, or the like: the latter, like *primp*, suggests close attention to detail but it carries a stronger suggestion than *primp* of bedecking and adorning oneself and of attention to finery, to fashion, and to effective grooming.

Ana. *Adorn, decorate, embellish, beautify.

2 **Plume, *pride, pique.**

Ana. Congratulate, *felicitate.

preface, n. *Introduction, prologue, induction, prelude, overture, foreword, prolegomenon, proem, exordium, preamble, prolusion, protasis, avant-propos.

prefer. 1 *Choose, select, elect, opt, pick, cull, hand-pick, single out.

Ana. Accept, *receive, admit, take: *approve, endorse, sanction: favor, *oblige, accommodate.

2 *Offer, proffer, tender, present.

preference. Selection, election, *choice, option, alternative.

Ana. *Predilection, prepossession, partiality: *favor, countenance.

preferment. *Advancement, promotion, elevation.

Ana. Advance, progress (see under **ADVANCE, v.**, 2): rising or rise, ascending or ascent (see corresponding verbs at **RISE**).

pregnant. Meaningful, significant, *expressive, eloquent, sententious.

Ana. Weighty, momentous, consequential, significant, important (see corresponding nouns at **IMPORTANCE**).

prejudice, n. Bias, partiality, prepossession, *predilection.

Ana. Predisposition, disposition, inclination (see cor-

responding verbs at **INCLINE**): *favor, countenance: *leaning, penchant.

prelection. *Speech, address, oration, harangue, allocution, lecture, talk, sermon, homily.

prelude. *Introduction, prologue, induction, overture, preface, foreword, prolegomenon, proem, exordium, preamble, prolusion, protasis, avant-propos.

premature. *Premature, untimely, forward, advanced, precocious* are not actually synonyms, for they are rarely interchangeable, but they come into comparison when they mean unduly early in coming, happening, developing, or the like. *Premature* applies usually to that which takes place before its due or proper time (as, a *premature* birth; a *premature* announcement) or comes into existence before it is fully grown or developed or ready for presentation (as, a *premature* baby; a *premature* conclusion; a *premature* report), or to actions or persons that manifest overhaste or impatience (as, "I have been a little *premature*, I perceive; I beg your pardon"—*Austen*). *Untimely* usually means little more than unseasonable but when, as frequently happens, it is applied to that which comes or occurs in advance of its due or proper time, it approaches very close to *premature* in meaning: the term, however, applies not so often to that which begins a life, outward existence, or the like, before its proper time, as to that which ends or destroys a life, a season, or a growing or developing thing, before it has run its normal, natural, or allotted course; as, the *untimely* falling of fruit from a tree; the *untimely* death of the son and heir; the *untimely* frosts that brought summer's beauty to an end; "whose harvest . . . perished by *untimely* blight" (*C. Bronie*). *Forward*, as here compared, applies chiefly to living things, especially to young persons, young animals, young plants, to growing crops, but also sometimes to seasons, that show signs of progress beyond those that are normal or natural for a thing or things of its kind at the time in question; as, an unusually *forward* spring; he is the most *forward* in mental development of their children. In current use, *advanced* tends to supplant *forward* when by comparison with other persons, other growing things, other seasons, etc., of the same kind or class, the person or thing so described is notably ahead of the others; as, the most *advanced* children in the school; "conflict between the economic interests of the *advanced* and backward peoples" (*J. A. Hobson*). *Precocious* strictly implies a premature fruiting or flowering: in current use, however, it is rarely applied to plants, but chiefly to children who show undue signs of intellectual maturity or an unusual forwardness in mental development. "He was *precocious* . . . and his mixing with natives had taught him some of the more bitter truths of life" (*Kipling*). The term is also applied to qualities, conditions, circumstances, or the like, which properly belong to maturity, but come or belong to one who is otherwise immature or to the person affected by them; as, "The young Marcellus was proving a little difficult, for . . . his *precocious* dignities were hard for youth to support without arrogance" (*Buchan*); "Shaw is dramatically *precocious*, and poetically less than immature" (*T. S. Eliot*).

Ana. *Immature, unmaturing, unripe, unmellow: abortive, fruitless (see **FUTILE**): *precipitate, hasty, sudden, abrupt.

Ant. Matured.

premeditated. *Deliberate, considered, advised, designed, studied.

Ana. Intended, purposed, meant (see **INTEND**): *voluntary, intentional, willful.

Ant. Unpremeditated: casual, accidental. — **Con.**

*Precipitate, abrupt, headlong, hasty, sudden.

premise or premiss, n. Postulate, position, presupposition, presumption, assumption. See under **PRESUPPOSE**. **Ana.** Ground, *reason: proposition, *proposal.

premise, v. Postulate, posit, *presuppose, presume, assume.

premium. *Premium, prize, award, reward, meed, guerdon, bounty, bonus* agree in meaning something which is bestowed upon a person as a recompense for greater effort, superior merit, supremacy in competition, or the like. *Premium*, as here considered, is applied usually to something extra or additional that serves as an incentive to buy, sell, loan, compete, strive, or the like; as, the school offers *premiums* for excellence in certain studies; to pay a *premium* in addition to an hourly wage to workmen who perform a given amount of work in less than the standard time specified; to ask a *premium* as well as interest for a loan; to increase the sales of a manufactured article by giving *premiums*. *Prize* is applied to something (etymologically something of value) which is striven for or, in looser use, which may be won by chance; it is bestowed upon the winner in a contest or competition, or in a lottery; as, bridge *prizes*; a *prize* for the best composition. In literary use, *prize* commonly implies effort, struggle, and uncertainty in the seeking, and often, but not invariably, imputes value or worth to that which is competed for. "Let a man contend to the uttermost For his life's set *prize*, be it what it will!" (*Browning*). "He had embarked early upon that desperate game of which the *prize* was a throne, and the forfeit, life" (*A. Reppier*). *Award* implies both a decision of judges and a bestowal of a prize or an honor; it is therefore often preferred to *prize* when the recipients have not been competitors in the strict sense but have in their work or performances fulfilled the conditions required by those who offer prizes; as, to receive an *award* for civic service; Boy Scout *awards*. *Award* is logically the correct term for the act of awarding a prize or for the decision in a particular competition; as, the judges have inspected the exhibits and will soon make their *awards*; the Rhodes scholarship *awards* will be announced this week. *Reward* strongly involves the idea of recompense for that which is good or meritorious (only ironically for that which is evil); it may be used in reference to a prize or premium only when that has been earned; thus, a winner of a *prize* for the best novel of the year may feel that he has been given a *reward* for intense effort; a *reward* is offered for the return of a lost article (not for its finding); heaven is thought of as the *reward* for a good life and not as its *prize*. "He scorned to take a *reward* for doing what in justice he ought to do" (*Steele*). "The *reward* of one duty is the power to fulfil another" (*G. Eliot*). *Meed* and *guerdon* are close synonyms of *reward*, but they are used only in poetry or rhetorical prose. They are often employed without distinction, but *meed* tends to suggest a reward recognizing merit and proportioned to it, and *guerdon* a prize or honor conferred as a reward. "He must not float upon his watery bier Unwept, and welter to the parching wind, Without the *meed* of some melodious tear" (*Milton*). "The harsh criticism of the coach on the bank, when we rested for a moment to receive our *meed* of praise or blame" (*A. C. Benson*). "Verse, like the laurel, its immortal *meed*, Should be the *guerdon* of a noble deed" (*Cowper*). "take A horse and arms for *guerdon*; choose the best" (*Tennyson*). *Bounty* and *bonus* are applicable chiefly to a sum of money or its equivalent, given as a premium or reward. *Bounty* is usually, but not exclusively, applied to a premium promised by a government or governmental agency as an inducement to enlistment in the army or navy, to emigration to a distant colony, to the destruc-

tion of noxious animals or pests, and the like, or as a subsidy to industry; as, the State pays a *bounty* for every wildcat killed; during the Civil War, some men enlisted for the *bounty* and then deserted. *Bonus*, on the other hand, is applied to something given over and above what is regularly received or due as salary, wages, dividends, interest, or the like, either as a reward or encouragement or as a distribution of surplus; as, a soldier's *bonus*; a shareholder's *bonus*. When used in reference to men in the army and navy, *bounty* refers only to the sum of money paid at enlistment, *bonus* to any sum of money, insurance, and the like, granted after discharge.

Ana. *Gift, present, gratuity, favor: enhancement, intensification, heightening (see corresponding verbs at INTENSIFY).

preoccupied. *Abstracted, absent, absent-minded, distraught, distraught.

Ana. *Intent, engrossed, absorbed: *forgetful, oblivious, unmindful.

preponderant, preponderating. *Dominant, predominant, paramount, sovereign.

Ana. *Supreme, pre-eminent, transcendent, surpassing: outstanding, salient, signal (see NOTICEABLE).

prepossession. Partiality, prejudice, bias, *predilection. **Ana.** Bent, turn, knack, aptitude, *gift: *leaning, penchant: predisposition, inclination (see corresponding verbs at INCLINE).

preposterous. Absurd, *foolish, silly.

Ana. *Irrational, unreasonable: bizarre, grotesque, *fantastic.

prerequisite. Requisite, *requirement.

Ana. Necessity, *need, exigency.

prerogative. *Right, privilege, perquisite, appanage, birthright.

Ana. Immunity, *exemption: *claim, title: *freedom, license, liberty.

presage, n. *Foretoken, prognostic, omen, augury, portent.

Ana. *Sign, symptom, mark, token: forewarning, warning (see WARN).

presage, v. Augur, portend, forebode, prognosticate, *foretell, predict, forecast, prophecy.

Ana. *Indicate, betoken, bespeak: signify, import, denote, *mean.

prescind. *Detach, disengage, abstract.

prescribe. *Prescribe, assign, define* come into comparison when they mean to fix arbitrarily or authoritatively for the sake of order or of a clear understanding. *Prescribe* stresses dictation, especially by one in command, and usually implies that the aim is to give explicit directions or clear guidance to those who accept one's authority or are bound to obey one's injunctions; as, the Constitution *prescribes* the conditions under which it may be amended; the Anglican Church *prescribes* the prayers used in its various services; the attending physician *prescribes* the medicines for his patient. "Can he refuse a copy thereof to a person demanding it on the terms *prescribed* by law?" (*Ch. Just. Marshall*). "They were...ready within the time *prescribed* by Austin" (*Meredith*). *Assign*, in the sense here considered (see also ALLOT, ASCRIBE), usually retains from its other senses at least a suggestion of allotment or ascription; it implies arbitrary, but not despotic, determination for the sake of some practical end such as harmony in operation or functioning, the proper distribution of a number of things, or the settlement of a dispute by agreement; as, a committee is responsible for *assigning* the periods for all classes; the city charter *assigns* the duties of each elected official and the limits of his authority; some

phoneticians *assign* one value to "a" in "fare," "mare," "dare," etc., and some another. "Ye know the spheres and various tasks *assign'd* By laws eternal to th' aerial kind [sylpha, genii, daemons, etc.]" (*Pope*). *Define* implies an intent to mark boundaries between things so as to prevent confusion, conflict, or overlapping; as, to *define* the jurisdiction of the various courts; the Constitution of the United States *prescribes* the powers of the government, *assigns* the limits to each, and *defines* the functions of each branch.

Ana. *Set, settle, fix, establish: direct, enjoin, instruct, order, *command.

prescribed. *Prescribed, appointed, destined* come more closely into comparison than the verbs from which they are derived, because some of these adjectives have acquired or retained implications not found in the verb. As here compared, they agree in meaning fixed or settled beforehand. *Prescribed* usually implies an authoritative setting of bounds, not primarily to limit or confine others' activities or to restrict others' freedom, but to achieve some end such as uniformity in practice or equipment, or a conservation of time or energy; thus, a *prescribed* form of words commonly constitutes a formula such as a pledge of allegiance, an oath of office, or the like; the *prescribed* prayers for a service are the prayers that are ordered to be said, but they are not necessarily the only ones that are said; the *prescribed* reading for a course represents not the maximum which an energetic student may accomplish, but the minimum which is required of every student in order that all students may have a common ground. *Appointed* may imply prior determination by agreement of those concerned, or it may imply prior determination by a superior power; it stresses a marking out or fixing in a clear and unmistakable fashion, as of a time or place of meeting, a task to be accomplished, a course to be followed, an end to be aspired to, or a limit to be observed; as, "We were all back in our places at the *appointed* hour" (*Galsworthy*); "Eternal Father!... Who bidd'st the mighty ocean deep Its own *appointed* limits keep" (*W. Whiting*). "Neither snow, nor rain, nor heat, nor night stays these couriers from the swift completion of their *appointed* rounds" (inscribed on N. Y. City post office and translated from Herodotus). *Destined* presupposes a decree by an inexorable power such as God or Fate, or, especially in modern use, a relentless human intention; that which is *destined* is, in strict use, that which is inevitable and cannot be escaped. "The day when I must die... My feet shall fall in the *destined* snare Wherever my road may lie" (*D. G. Rossetti*). "You think that you are Ann's suitor: that you are the pursuer and she the pursued... Fool: it is you who are the pursued, the marked-down quarry, the *destined* prey" (*Shaw*). The word, however, is now often used loosely and without an implication of inevitability; it may, and commonly does, refer to something that has already happened; as, at last we reached our *destined* goal; she first met her *destined* husband when she was sixteen.

Ana. Set, settled, fixed, established (see SET, v.): allotted, assigned, apportioned (see ALLOT).

prescription. *Receipt, recipe.

presence. *Bearing, deportment, demeanor, mien, manner, carriage, port, front.

Ana. Personality, individuality (see DISPOSITION): aspect, *appearance, look.

present, v. 1 *Give, bestow, confer, donate, afford.

Ana. *Grant, award, accord.

2 *Offer, tender, proffer, prefer.

Ana. Exhibit, display, parade, *show: advance, *adduce, allege, cite.

present, *n.* *Gift, gratuity, favor, boon, largess, fairing.
Ana. Contribution, *donation, benefaction: grant, subvention (see APPROPRIATION).

presentiment. Misgiving, foreboding, *apprehension.
Ana. *Fear, dread, alarm, terror: foretaste, anticipation, *prospect: disquieting or disquietude, discomposing or discomposure, disturbance, perturbation (see corresponding verbs at DISCOMPOSE).

preserve, *v.* *Save, conserve.

Ana. *Rescue, deliver, redeem, ransom: protect, guard, safeguard (see DEFEND).

preserves. See under SAVE, *v.*

press, *n.* Throng, crush, *crowd, mob, rout, horde.

Ana. *Multitude, army, host, legion.

pressure. *Stress, strain, tension, shear, thrust, torsion.

prestige. *Influence, authority, weight, credit.

Ana. Ascendancy, *supremacy: *power, sway, dominion: reputation, repute, honor, glory, *fame.

presume. *Presuppose, postulate, premise, posit, assume.

Ana. Surmise, *conjecture: deduce, *infer, judge, gather, conclude.

presumption. Presupposition, assumption, postulate, premise, position. See under PRESUPPOSE.

Ana. View, *opinion, conviction, belief: conjecture, surmise (see under CONJECTURE, *v.*).

presuppose. Presuppose, presume, assume, postulate, premise, posit agree in meaning to take something for granted or as true or existent, especially as a basis for action or reasoning. Their corresponding nouns **presupposition**, **presumption**, **assumption**, **postulate**, **premise** (or **premiss**), **position** when they denote that which is taken for granted or is accepted as true or existent are distinguishable in general by the same implications and connotations as the verbs. **Presuppose** and **presupposition**, the most inclusive of these words, may or may not imply the dubiousness of that which is taken for granted. At the one extreme they may suggest nothing more than a hazy or imperfectly realized belief that something exists, or is true, or the uncritical acceptance of some hypothesis, in either case casting doubt on that which is taken for granted; as, a lecturer who talks above the heads of his listeners **presupposes** too extensive a knowledge on their part; a school of theology that **presupposed** the total depravity of human nature. At the other extreme the terms may be used in reference to something that is taken for granted because it is the logically necessary antecedent of a thing that is known to be true or the truth of which is not presently in question; as, an effect **presupposes** a cause; so deliberate a murder **presupposes** a motive; "belief in the supernatural **presupposes** a belief in natural law" (*Inge*). **Presume** and **presumption** are often loosely used to imply conjecture (as, I **presume** [that is, venture to believe] they are now in London); in precise English, they always carry the implication that whatever is taken for granted is entitled to belief until it is disproved. Therefore one **presumes** only that for which there is justification in experience, or which has been shown to be sound in practice or in theory, or which is the logical inference from such facts as are known; as, "Every man is to be **presumed** innocent till he is proved to be guilty" (*Blackstone*); the fact that a custom is ancient and is still revered creates a **presumption** in its favor. "It cannot be **presumed** that any clause in the constitution is intended to be without effect" (*Ch. Just. Marshall*). **Assume** and **assumption** stress the arbitrary acceptance as true of something which has not yet been proved or demonstrated or about which there is ground for a difference of opinion; as, some debaters

weaken their case by **assuming** too much; for the sake of argument, let us **assume** that the accident occurred as is contended. "I know of nothing more false in science or more actively poisonous in politics... than the **assumption** that we belong as a race to the Teutonic family" (*Quiller-Couch*). "I... **assume** that one purpose of the purchase was to suppress competition" (*Justice Holmes*). **Postulate**, either as a verb or as a noun, differs from **assume** or **assumption** only in being far more restricted in its application and more exact in its implications. One can **assume** or make an **assumption** at any point in a course of reasoning, but one **postulates** something or lays down a proposition as a **postulate** only as the groundwork for a single argument, or for a chain of reasoning, or for a system of thought. **Postulate**, therefore, has reference to one of the underlying assumptions, which are accepted as true but acknowledged as indemonstrable and without which thought or action (also artistic representation) is impossible because of the limitations of human knowledge or of human reason (or of art); thus, the ordinary man always **postulates** the reality of time and of space; the dramatist **postulates** certain conventions which it is necessary for the audience to accept; "belief in the uniformity of nature, which is said to be a **postulate** of science" (*B. Russell*); "the prevailing theological system is one which **postulates** the reality of guidance by a personal God" (*A. Huxley*); "the kind of curvature **postulated** by the generalised theory of relativity" (*Jeans*). **Premise** is often used as though it were identical in meaning with **postulate**. **Premise**, the noun, in logic denotes a proposition, or one of the two propositions in a syllogism, from which an inference is drawn. In looser use, it commonly refers to any proposition which is the starting point in an argument. But a premise is not, even in this loose use, a proposition that is frankly an assumption, as a postulate often is. It may have been previously demonstrated or it may be admitted as true or axiomatic, but it is always advanced as true and not as assumed; as, his listeners could not assent to his conclusion because they doubted the truth of his **premises**. **Premise**, the verb, which means to lay down as a premise or as premises, usually refers to the broader rather than to the technical meaning of the noun; as, he **premised** his argument on a proposition which all but a few of his readers accept as true. The verb sometimes does not suggest the laying down of a proposition, but a statement of facts, principles, observations, or the like, which the speaker or writer considers fundamental to his argument or essential to laying a proper groundwork. "These observations are **premised** solely for the purpose of rendering more intelligible those which apply more directly to the particular case under consideration" (*Ch. Just. Marshall*). **Posit** and **position** differ from **postulate** chiefly in implying affirmation as a truth; they rule out the implication of an assumption which is often found in **postulate** and substitute that of a declaration of faith or conviction. "Hooker... rests his **positions** on one solid basis, the eternal obligation of natural law" (*Hal-lam*). "It seems to me an error to say that we have no grounds for **positing** the existence of God outside His relation to ourselves" (*Inge*).

Ana. Surmise, *conjecture, guess: *infer, deduce, gather, judge.

presupposition. Presumption, assumption, postulate, premise, position. See under PRESUPPOSE.

Ana. Surmise, conjecture, guess (see under CONJECTURE, *v.*); inference, deduction, judgment (see under INFER); belief, conviction, *opinion, view.

pretend. *Assume, affect, simulate, feign, counterfeit, sham.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. *Disguise, dissemble, cloak, mask: *deceive, delude, mislead, beguile.

pretense or pretence. 1 Pretension, *claim, title.

Ana. Plea, pretext, excuse, *apology, apologia: *right, birthright, privilege.

2 **Pretense (or pretence), pretension, make-believe, make-belief** are here compared only as terms that are sometimes confused, especially when they involve the idea of offering something false or deceptive as real or true. They are seldom synonymous terms because they rarely agree in denotation. **Pretense** may denote false show in general, or the evidence of it; as, she is utterly devoid of *pretense*; there is too much *pretense* in his piety; "the *pretense* that eludes the detection of others and that which deceives the pretender himself" (*Brownell*). The term may also apply to an act that is performed, an appearance that is assumed, or a statement that is made in the hope that it will convince others of the truth or reality of something that is false or unreal; as, "declining to dance before her, on a *pretense* of sickness, when in fact he was in perfect health" (*Cowper*); "No one was deceived by his *pretense* of professional activity" (*E. Wharton*); "rushing away from the discussion on the transparent *pretence* of quieting the dog" (*Conrad*); "my mother's affectionate *pretense* of his being the head of the family" (*M. Austin*). **Pretension**, as here compared (see also **CLAIM, AMBITION**), is now rarely if ever used in place of *pretense* as a concrete act, appearance, or statement, but it is often used in the sense of false show or the evidence of it, with, however, somewhat differing implications. Where *pretense* in this general sense often implies hypocrisy or intentional deceit, *pretension* suggests rather an unwarranted assumption that one possesses certain desirable qualities or powers, and therefore more often implies overweening conceit or self-deception; as, "Oh! how sick I am of theories, and systems, and the *pretensions* of men!... Give me nothing but commonplace unpretending people!" (*Meredith*); "His disdain of affectation and prudery was magnificent. He hated all *pretension* save his own *pretension*" (*Mencken*). **Make-believe**, or the rarer **make-belief**, applies usually to pretense or pretenses that arise not so much out of a desire to give others a false impression as out of a strong or vivid imagination, such as that of children or poets who like to take that which their fancies create as real or as true; as, in children, the love of *make-believe* usually expresses itself in games; in adults, in the reading of fiction or in attendance at the theater. Both terms are occasionally used to denote the acceptance against one's better judgment of that which is manifestly unreal or untrue because of some power in the thing itself or in its accompaniments. "The attitude of our own public towards popular superstitions, half belief and half *make-belief*, is too common among church-goers" (*Inge*).

Ana. Humbug, fake, sham, fraud, deceit, deception, *imposture: affectation, *pose, air, mannerism.

pretension. 1 *Claim, title, pretense.

Ana. *Right, privilege, prerogative: assertion, affirmation, declaration, protestation (see corresponding verbs at **ASSERT**).

2 *Pretense, make-believe, make-belief.

Ana. *Hypocrisy, sanctimony, cant: dissimulation, duplicity, guile, *deceit.

3 *Ambition, aspiration.

Ana. Hoping or hope, expectation (see corresponding verbs at **EXPECT**): dream, vision, *fancy.

pretentious. 1 *Showy, ostentatious, pompous.

Ana. *Gaudy, garish, flashy: *ornate, flamboyant, florid, baroque, rococo.

Ant. Unpretentious.

2 *Ambitious, utopian.

Ana. Aiming, aspiring, panting (see **AIM, v.**): conspicuous, striking, arresting (see **NOTICEABLE**).

preternatural. *Supernatural, supranatural, miraculous, superhuman.

Ana. Unnatural, anomalous (see **IRREGULAR**): *abnormal, atypic: outstanding, remarkable, salient (see **NOTICEABLE**): *exceptional.

pretext. Excuse, plea, alibi, *apology, apologia.

Ana. Ruse, *trick, maneuver, stratagem: subterfuge, *deception: justification, vindication, defending or defense (see corresponding verbs at **MAINTAIN**).

pretty. Bonny, comely, fair, *beautiful, lovely, handsome, good-looking, beauteous, pulchritudinous.

Ana. Charming, attractive, alluring, taking (see under **ATTRACT**): dainty, delicate, exquisite (see **CHOICE, adj.**).

prevail. In form **prevail on or upon.** *Induce, persuade.

Ana. *Move, actuate, drive, impel: influence, *affect, impress, sway.

prevailing. **Prevailing, prevalent, rife, current** come into comparison as meaning general, as in its circulation, acceptance, use, or the like, especially in a given place or at a given time. **Prevailing** applies especially to that which is predominant, or which generally or commonly obtains at the time or in the place indicated (often, the present, where no statement is made); as, the *prevailing* prices for shares of the ten largest industries; the *prevailing* opinion among booksellers; "the *prevailing* tendency to obliterate the dividing lines between all the arts" (*Lowes*); "the *prevailing* fatalism of Islam" (*A. Huxley*). **Prevalent** applies especially to that which is general or very common over a given area or at a given time: the term, however, does not suggest, as *prevailing* usually suggests, a predominance as in frequency, in favor, or the like: rather, it connotes a frequency without necessarily implying that it is the most frequent; thus, the *prevailing* (that is, the most frequently evident or the usual) wind in a section is from the southeast, but southwest winds may, nevertheless, be *prevalent* there; colds and gripe are *prevalent* in northern states during the winter; a widely *prevalent* pronunciation of a word may not necessarily be the *prevailing* pronunciation. **Rife** adds to *prevalent* an implication such as the rapid spread of the thing which is so qualified, or of a great increase in the number of its instances, or merely of commonness or abundance; as, "Rumour is already *rife* here as to Dr. Trefoil's successor" (*Trollope*); "spiritual maladies, so *rife* in our day" (*Carlyle*); "a heresy which is very *rife* just now" (*Inge*); "Legends were *rife* of its [Spain's] extraordinary wealth" (*Buchan*). **Current** (etymologically, running or flowing) applies especially to things such as language, philosophy, etc., that are constantly in process of change or development, or to things such as coins, diseases, etc., that circulate constantly from one person or thing to another; hence, *current* so often describes that which is widespread in its use, adoption, or acceptance at the time in question, that it has come to imply the present if no other time is indicated; thus, *current* English is the English language of the present time; a *current* notion is one that is widely accepted at the moment; banknotes, postage stamps, coins, etc., of the *current* series are those still being printed or minted for circulation or sale; so, *current* fashions; *current* tendencies; a *current* practice. However, when the term applies to periodicals or other things that come out in a series, in installments, or the like, *current* describes the one appearing during the present week, month, or the like, or the latest to appear; as, the *current* issue of a well-known magazine; the *current* installment of a new

novel (that is, of a novel appearing serially in a periodical). But *current* is often used in the place of the other words of this group when the time or place is definitely indicated and merely the passing from one person to another is stressed; as, "Shakespeare used the *current* language of his day" (J. R. Lowell); "As *current* in her time, the Evangelical creed was simple" (H. Ellis); "She had been given, at fourteen, the *current* version of her origin" (E. Wharton).

Ana. *Dominant, predominant, preponderant: *common, ordinary, familiar: general, *universal.

prevalent. *Prevailing, rife, current.

Ana. *Common, ordinary, familiar: pervading, impregnating, saturating (see PERMEATE): *usual, wonted, accustomed, customary.

prevaricate. *Lie, equivocate, palter, fib.

Ana. Evade, elude, *escape: *misrepresent, belie.

prevent. 1 **Prevent, anticipate, forestall** are comparable when they carry the meaning to be or get ahead of or to deal with beforehand, with reference especially to a thing's due time, its actual occurrence, the action of another, or the like. **Prevent**, except in deliberately archaic use, no longer carries its etymological meaning of to go or get before. This, however, was one of its common senses until about a century ago and is found in the work of the best writers before the Victorian era. "Oh! run; *prevent* them [the wise men from the East] with thy humble ode, And lay it lowly at his blessed feet; Have thou the honour first thy Lord to greet" (Milton). In current use, *prevent* additionally implies frustration, as of an intention or plan, or an averting, as of a threatened evil, or a rendering impossible, as by setting up an obstacle or obstacles. Sometimes the emphasis upon hindrance (see PREVENT, 2) is so strong that the etymological implication is nearly lost, but in the sense here considered (which affects strongly the meaning of the adjective *preventive*), advance provision or preparation against something possible or probable is clearly implied; as, to take measures to *prevent* an epidemic (cf. *preventive* measures, *preventive* medicine). "Who stands safest? tell me, is it he? ... whose *preventing* care In peace provides fit arms against a war?" (Pope). **Anticipate** (see also FORESEE) in modern use takes the place of *prevent* when merely getting ahead of another (especially as a precursor or forerunner) is implied. "Most of the great European thinkers of the eighteenth and early nineteenth centuries were in some measure inspired, influenced, or *anticipated* by Shaftesbury" (H. Ellis). "The pithy and succinct comparisons that our mediaeval ancestors, *anticipating* the modern Imagists, delighted in" (Lowes). Like *prevent*, *anticipate* sometimes suggests balking another in carrying out an intention or plan; but unlike the former word, it does not imply putting obstacles in the way of its performance or execution, but implies rather its prior performance or execution. "He would probably have died by the hand of the executioner, if the executioner had not been *anticipated* by the populace" (Macaulay). Distinctively, the word implies dealing with, using, treating, or the like, in advance of a thing's due time or proper order but it often involves another implication which can be gathered only from the context; as, to *anticipate* a payment on a loan (to make a payment before the date it is due); to *anticipate* one's salary (to spend one's salary before it is earned); to *anticipate* some details in telling a story (to mention details that chronologically should come later in the narrative). **Forestall**, in what is now the less common meaning, carries over from its earliest sense so strong an implication of intercepting that it means merely to stop in its course. "Something you were not in the least prepared to face,

something you hurried to *forestall*" (M. Austin). In what is generally regarded as most discriminating usage, the word carries only a suggestion of intercepting, or of a meeting halfway, not for the purpose of stopping, but of lessening its force or effectiveness. It thereby implies beforehand action that serves to render a thing (especially something inevitable) powerless to harm, or merely useless; thus, Thackeray's preface to "Pendennis" was an attempt to *forestall* criticism of his naturalism; "to *forestall* public opinion and guide its judgment" (L. P. Smith). "Posterity will still be explaining me, long after I am dead. Why, then, should I *forestall* their labours?" (R. Macaulay).

Ana. *Frustrate, thwart, foil, baffle, balk: *arrest, check, interrupt: avoid, shun, eschew, evade, *escape. 2 **Prevent, preclude, obviate, avert, ward off** come into comparison when they mean to hinder or stop something that may occur or, in the case of *prevent* and *preclude*, to hinder or stop someone from doing something. **Prevent** usually implies the existence of something which serves as an insurmountable obstacle or an impediment; as, there is no law to *prevent* you from erecting a building on this spot (or, to *prevent* the erection of a building on this spot). "Her indifferent state of health unhappily *prevents* her being in town" (Austen). "Small valvular folds directed in such a manner as to permit the exit of fluid from the heart, while they *prevent* its entrance" (T. H. Huxley). **Preclude** differs from *prevent* in stressing the existence of some situation or condition or the taking of anticipatory measures that effectually shuts out every possibility of a thing's occurring or of a person's doing something; as, he makes everything so clear that all misunderstanding is *precluded*; death *precluded* him from completing his investigation. "In wishing to put an end to pernicious experiments, I do not mean to *preclude* the fullest inquiry" (Burke). **Obviate** usually implies the use of intelligence or forethought; *preclude* also often implies these but sometimes it suggests the operation of chance. The chief distinction between these words when anticipatory measures are implied is that *obviate* usually connotes an attempt to forestall disagreeable eventualities by clearing away obstacles or by disposing of difficulties; as, the use of bills of exchange *obviates* the risk in transporting money from one country to another; prompt payment will *obviate* the necessity of our taking legal action against you. "No care, no art, no organization of society, could *obviate* the inherent incompatibility of individual perfection with the course of nature" (G. L. Dickinson). **Avert** and **ward off** differ from the other words of this group in always implying prevention of an approaching or oncoming evil. They suggest therefore immediate and effective measures in the face of what threatens. **Avert**, however, suggests the use of active measures to force back the evil before it is actually encountered; as, to *avert* a catastrophe by prompt action; "the satisfaction of *averting* war" (J. R. Green); "it was very doubtful whether the consequences could be *averted* by sealing my lips" (Shaw). **Ward off**, on the other hand, implies a close encounter and the use of defensive measures (cf. to *ward off* an opponent's blow or thrust) in order to avoid the evil or to diminish its disastrous effects; as, it is now too late to *ward off* a chill; to *ward off* an infestation of ants. "If we can *ward off* actual war till the crisis in England is over" (Jefferson).

Ana. *Hinder, impede, obstruct, block, bar, dam: deter, shut out (see EXCLUDE): prohibit, *forbid, interdict, inhibit.

Ant. Permit.

previous. Foregoing, prior, *preceding, antecedent, precedent, former, anterior.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ant. Subsequent; consequent.

prey, n. *Victim, quarry, ravin.

Ana. *Spoil or spoils, booty, prize.

price, n. **Price, charge, cost, expense**, as here compared, agree in meaning that which is given or asked in payment for a thing, or for services or the like. **Price and charge** in their ordinary nontechnical use commonly designate what is asked or demanded—in the case of *price*, especially for goods or commodities; in the case of *charge*, especially for services; as, what is the *price* of this book?; the *price* of meat has risen greatly; the market *price* of wheat; the *charge* for haulage (or portage); goods delivered free of *charge* within a radius of one hundred miles; there is a small *charge* for registering a deed. In economics, however, *price* does not necessarily refer to a fixed sum of money asked by a seller, but to the quantity or number of units of one thing exchanged in barter or sale for another thing; thus, the normal or natural *price* of a thing, in economics, is theoretically the amount (usually of money) which is proportionate to the amount (also usually of money) that has been spent in its production, not the amount which has been determined by external conditions or the will of the seller. "Labour was the first *price*, the original purchase-money that was paid for all things" (*Adam Smith*). *Charge*, especially in accounting, also applies to that which is imposed on one as a financial burden and with the payment of which one is charged; thus, the fixed *charges* of a business include rentals, taxes, interest, liens, and the like. **Cost and expense** in their ordinary nontechnical use commonly apply to what is given or surrendered for something—*cost* often implying somewhat specifically the payment of the price asked, and *expense* often designating the aggregate amount or, in the plural, the aggregate of the amounts, disbursed for something; as, they found the *cost* of the piano made too severe a drain on their resources; the *cost* of provisions; traveling *expenses*; the heavy *expense* of a long illness. In looser use, *cost* sometimes replaces *price*, with, however, a difference in connotation; thus, "What is the *price* of this article?" means "how much do you ask for it?"; "What is the *cost* of this article?" means "how much do you want from me in payment for it?" In highly precise use, *cost* applies to whatever must be given or sacrificed to obtain something, to produce something, or to attain some end, whether it be money, labor, lives, or the like, or whether it is actually given or sacrificed; as, the *price* of this article is below the *cost* of its manufacture; victory will be won only at great *cost* of life; he felt that the *cost* in effort was greater than he could afford. *Expense* also may denote expenditure, especially but not only of money; as, "Fresh news is got only by enterprise and *expense*" (*Justice Holmes*). "A convenient way of producing the maximum amount of 'copy' with the minimum *expense* of intellect" (*Babbitt*).

priceless. Invaluable, precious, *costly, expensive, dear, valuable.

Ana. Cherished, treasured, prized, valued (see APPRECIATE).

prick, v. Punch, puncture, *perforate, bore, drill.

Ana. *Enter, pierce, probe, penetrate: *cut, slit, slash.

pride, n. **Pride, vanity, vainglory** are here compared as meaning the quality or the feeling of a person who is keenly aware of his excellence or superiority in any way. The same distinctions in implications and connotations are found in their corresponding adjectives **proud, vain, vainglorious**. **Pride and proud** may imply either justified or unjustified self-esteem, in so far as that which one regards as a merit or a superiority is real or is imagined,

and as the feeling which governs one manifests itself either in proper self-respect and in abhorrence of that which is beneath one's standards of what is right and good or in inordinate and arrogant conceit: in one interpretation, pride is a sin or vice and the antithesis of humility (as, "Those that walk in *pride* he is able to abase"—*Daniel* iv. 37; "*Proud* she may be in the sense of respecting herself; but *pride* in the sense of contemning others less gifted than herself deserves the two lowest circles of a vulgar woman's Inferno"—*Holmes*); in the other interpretation, pride is either a virtue or a highly pardonable, even commendable, feeling or quality that is the antithesis of shame and that spurs one to equal or better one's best or gives one rightful gratification (as, to take *pride* in one's work; *proud* of one's ancestry, or of one's skill in fencing; "the solemn *pride* that must be yours to have laid so costly a sacrifice [five sons killed in Civil War] upon the altar of freedom"—*Lincoln*). **Vanity and vain** imply an excessive desire to win the notice, approval, or praise of others; both connote an interest centered on oneself and often suggest a concentration on things of little or no importance relatively; as, "Old Auchinleck had...not the gay, tail-spreading peacock *vanity* of his son [James Boswell]" (*Carlyle*); "The heart of the *vain* man is lighter than the heart of the *proud*" (*F. Marion Crawford*); "poor Robert looked only at himself; he had nothing but a small and worthless mortification, which was only wounded *vanity*" (*Deland*); "The idea flattered his *vanity*, which had had little to feed on of late" (*Arch. Marshall*). **Vainglory and vain-glorious** imply excessive pride which manifests itself in boastfulness and arrogant display of one's power, skill, influence, or the like; as, *vainglorious* conquerors; "*vain-glorious* boastings" (*Irving*); "It is not *vain-glory* for a man and his [looking] glass to confer in his own chamber" (*Shak.*); "*Vainglory's* a worm which the very best action Will taint, and its soundness eat through" (*C. & M. Lamb*).

Ana. Arrogance, haughtiness, superciliousness, disdainfulness or disdain, insolence (see corresponding adjectives at PROUD): complacency, smugness, priggishness (see corresponding adjectives at COMPLACENT): self-esteem, self-love, egotism, egoism, *conceit.

Ant. Humility: shame.

pride, v. **Pride, plume, pique, preen** come into comparison as reflexive verbs meaning to congratulate oneself because of something one is, or has, or has done or achieved. **Pride** usually implies a taking credit to oneself on or upon something that redounds to one's honor or gives just cause for pride in oneself; as, to *pride* oneself on one's ancestry, one's ability, one's success, or one's taste. "Mark *prided* himself upon maintaining outwardly a demeanour that showed not the least trace of overstrung nerves" (*C. Mackenzie*). **Plume** adds to *pride* the implication of a display of vanity or of a more obvious exhibition of one's gratification: the term usually, but not invariably, suggests less justification than does *pride*; as, "the Viceroy *plumed* himself on the way in which he had instilled notions of reticence into his staff" (*Kipling*); "Cicero *plumed* himself on flirting with disreputable actresses" (*Buchan*). **Pique**, as here compared (see also PROVOKE, 1), differs from *plume* chiefly in carrying a hint of stirred-up pride or satisfaction: usually the cause of the pride is a special accomplishment; as, "Every Italian or Frenchman of any rank *piques* himself on speaking his own tongue correctly" (*Walpole*); "'Pride,' observed Mary, who *piqued* herself upon the solidity of her reflections, 'is a very common failing. I believe'" (*Austen*). **Preen** (see also PREEN, 1) is sometimes, but infrequently, used in place of *plume*, with often a slight suggestion of

adorning oneself as with one's virtues; as, "he *preened* himself upon his sapience" (*Amy Lowell*).

Ana. *Boast, brag, vaunt, crow, gasconade: congratulate, *felicitate.

priest. Clergyman, *cleric, ecclesiastic, abbé.

priggish. Smug, self-complacent, self-satisfied, *complacent.

Ana. Righteous, ethical, *moral: conceited, egotistic, self-esteeming, self-loving (see corresponding nouns at CONCEPT).

primal. Primordial, primitive, pristine, primeval, *primary, prime.

Ana. *Ultimate, absolute, categorical: original, fresh, *new.

primary. Primary, primal, primordial, primitive, pristine, primeval, **prime** come into comparison as meaning first as in order, character, importance, or the like. That is **primary** which comes first in the order of development or of progression. Sometimes the term means little more than *initial* (as, the *primary* lesion of a disease); sometimes, however, it acquires the implications of *fundamental*, *elemental*, or *elementary*, and describes the first part or element as in time or in importance, or one of such parts or elements in a complicated structure, substance, system, or the like (as, the *primary* xylem [woody tissue] of a tree; the *primary* nerves; the *primary* schools; "The raw material of music is sound. Sound is a *primary*, a 'pure' medium. . . it has no meaning except in a context"—*Day Lewis*): at other times it means *original* in the sense of not derived (as, the *primary* colors; the *primary* qualities of matter; the *primary* cause). But *primary* may convey little or no suggestion of a time order and imply superiority in importance, thereby coming close to *principal*; as, the *primary* object of education; the *primary* end of poetry. "When a lexicographer speaks of the *primary* meaning of a word he means merely that this meaning is the first in point of time, that is, the oldest meaning. Thus, the *primary* meaning of *nice* is 'stupid, foolish.' But the ordinary man quite naturally thinks that the lexicographer means by *primary* something else altogether, namely, the chief or principal meaning of the word so marked" (*Kemp Malone*). That is **primal** (a term found chiefly in poetry or elevated prose) which is primary in the sense of *initial*, *fundamental*, or *elemental* (as, "the *primal* slip in Paradise"—*Meredith*; "[Some Christians] would say that the idea of sacrifice is a *primal* instinct of human nature"—*A. C. Benson*), or which goes back to the origin or to the beginnings, especially of the human race (as, "It hath the *primal* eldest curse upon't, A brother's murder"—*Shak.*; "the Biblical vocabulary is compact of the *primal* stuff of our common humanity"—*Lowes*; "Ultimate issues, *primal* springs"—*Kipling*). That is **primordial** which serves as the starting point in a course of development or growth or which is the earliest in order or in formation: the term often suggests a rudimentary quality or state; thus, the *primordial* ooze (or slime) is thought of as the substance out of which the earth was formed; a *primordial* cell is in biology a rudimentary cell without a wall; the *primordial* protoplasm; the *primordial* man; the *primordial* elements of matter; the *primordial* leaves of a plant. That is **primitive** which belongs to or is associated with an early stage, often but not necessarily a remote stage, in the development of something, especially of the human race or of a particular people: the term usually carries one or more important additional implications. Often, when used in reference to art or manufacture, it suggests lack of knowledge of modern techniques or conventions, such as of perspective in painting or of modes in mensurable music; as, *primitive*

potteries; the *primitive* French and Italian painters; the *primitive* music of a savage tribe; *primitive* design. When used in reference to persons, their ways of living, their instincts, emotions, laws, etc., it usually suggests either a connection with a very rudimentary civilization or a retention of a character or quality associated with such a civilization; as, "In *primitive* society the husband is allowed to punish an unfaithful wife with death" (*Cather*); "a *primitive* but effective police inquiry" (*T. S. Eliot*); "*primitive* laws to protect inheritance, to safeguard property" (*R. Macaulay*); "genuinely *primitive* traits that reveal themselves in the childhood of either the individual or the race" (*Babbitt*). Often, however, the term merely stresses an opposition to that which is highly civilized or sophisticated, and therefore unduly complicated, and suggests naturalness, simplicity, or the like. "Life is very *primitive* here. . . [which means] only going back to something immediate and simple. It's fetching and carrying and getting water and getting food" (*H. G. Wells*). That is **pristine** which is characteristic of something in its earliest and freshest and newest state or which, less often, characterizes something (such as an institution or race) that has just come into existence; as, "an image of the *pristine* earth" (*Wordsworth*); to revivify the qualities of *pristine* Christianity; restored to its *pristine* freshness or vigor; "its *pristine* ductility vanished forever" (*Lowes*). That is **primeval** in its strict sense which belongs to or is characteristic of the first ages of the earth; as, "For food you must still go to the earth and to the sea, as in *primeval* days" (*Jefferies*); "refreshing our minds with a savour of the. . . *primeval* world and the earliest hopes and victories of mankind" (*Binyon*). Often, however, the term merely suggests extreme antiquity or the absence of all signs of human trespass or influence; as, *primeval* ages; *primeval* forests. That is **prime** which is the first in rank, degree, dignity, or the like; as, the *prime* minister; "[He] makes his moral being his *prime* care" (*Wordsworth*); our *prime* men of letters; a matter of *prime* importance; tobacco of *prime* quality. *Prime* is often used briefly to imply choiceness or prime quality; as, "*prime* claret" (*Meredith*).

Ana. Initiating or initial, beginning, commencing, starting (see corresponding verbs at BEGIN): elemental, *elementary: basic, *fundamental, radical: *chief, leading, principal.

Con. Following, succeeding, ensuing (see FOLLOW): secondary, *subordinate.

primate. Metropolitan, archbishop, *bishop, ordinary.

prime, adj. *Primary, primal, primordial, primitive, pristine, primeval.

Ana. *Chief, leading, principal, main: *choice, exquisite, recherché.

prime mover. *Origin, source, provenance, provenience, inception, root.

primeval. Pristine, primitive, primordial, primal, *primary, prime.

Ana. Aboriginal, *native, indigenous, autochthonous: original, *new.

primitive. *Primary, primal, primordial, pristine, primeval, prime.

Ana. *Fundamental, basic, radical: elemental, *elementary: aboriginal, *native.

primordial. Primeval, pristine, primitive, primal, *primary, prime.

primp. Perk up, doll up, prink, prank, *preen, prune.

Ana. Beautify, deck, bedeck, *adorn.

princely. *Kingly, regal, royal, queenly, imperial.

Ana. *Luxurious, sumptuous, opulent: munificent, bountiful, *liberal.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

principal, adj. *Chief, main, leading, foremost, capital.

Ana. *Dominant, predominant, paramount: vital, cardinal, fundamental, *essential: pre-eminent, *supreme, superlative.

principle. Principle, axiom, fundamental, law, theorem come into comparison when they denote a proposition or other formulation stating a fact or a generalization accepted as true and basic. A **principle** is any such generalization, however derived, which provides a basis for reasoning or, more often in modern use, a guide for conduct or procedure. "If there is any *principle* of the Constitution that...imperatively calls for attachment...it is the *principle* of free thought" (*Justice Holmes*). "They laid down a set of *principles* for the guidance of leprosy research" (*V. Heiser*). *Principle* often implies fixity or, at least, insusceptibility to change; in modern use, however, this is not always clear without qualification. "Your devotee to abstract and eternal *principles*" (*W. James*). An **axiom**, in its historical definition, is a principle not open to dispute because self-evident; as, the geometrical *axiom* that there can be only one straight line between two points. In the older logic, *axioms* were sometimes called "first principles" because they provided the indisputable bases for reasoning. "Time has been consumed in the attempt to demonstrate propositions which may have been thought *axioms*" (*Ch. Just. Marshall*). In modern usage, *axiom* does not connote necessary truth, but universal acceptance as truth; thus, the *axioms* of political economy are the principles all economists accept, no matter how far they diverge in the conclusions they draw from them. A **fundamental** is usually a principle, but sometimes a fact, that is so essential to a philosophy, a religion, a science, or an art that its rejection or disproof would destroy all the conclusions resting upon it; as, the *fundamentals* of Christian belief. A **law**, as here compared, is a principle derived from observation and experiment that states an order or relation of phenomena which, so far as is known, has always held good and which may be expected to hold good under the given conditions; as, the *law* of gravitation; the *laws* of thought. "It is a *law* that no two electrons may occupy the same orbit" (*Eddington*). **Theorem**, a word once important in philosophy, but now chiefly used in the mathematical sciences, is here considered only in its older sense of a proposition that admits of rational proof. It is distinguished from an *axiom* in not being self-evident; and, in general, from a *law* in not being derived by induction. In strict use, it is a proposition not only fully demonstrable but also logically necessary. "Principles at other times are supposed to be certain fundamental *Theorems* in Arts and Sciences, in Religion and Politics" (*Berkeley*).

Ana. Basis, foundation, ground (see **BASE**): *law, rule, canon, precept: *form, usage, convention.

prink. Prank, *preen, prune, primp, perk up, doll up.

Ana. Beautify, bedeck, deck, garnish, embellish, decorate, ornament, *adorn.

print, n. *Impression, impress, imprint, stamp.

Ana. Mark, token, *sign: *trace, vestige.

print, v. **Print, publish** are often confused when used with reference to articles, books, journals, or the like. **Print** implies that the article, book, journal, or the like, has been through all the processes of typesetting, proof-reading, and striking off which means that it is finally in print; as, this book is *printed* by the Collegiate Press. **Publish** implies that the book, article, or journal in printed and often bound form is issued for sale to the public or is put in general circulation; as, this book has been *published* by the G. & C. Merriam Company; "Sir William Drummond's late book about the Bible—

printed, but not *published*" (*Byron*); "Moxon told me... that he was about to *print*, but (I think) not to *publish*, those elegiacs on Hallam" (*FitzGerald*); "the indecency of *publishing* intimate letters which were never written to be *published*" (*H. Ellis*). Similar distinctions obtain between the derived nouns **printer** and **publisher** as applied to the person or company that prints and the person or company that publishes. It should be noted, however, that the same person or company may be both printer and publisher, and that the publisher, though usually, is not necessarily, the owner of the copyright of a printed work.

printer. See under **PRINT, v.**

prior. Previous, foregoing, precedent, anterior, former, antecedent, *preceding.

Ana. Ahead, *before, forward.

Con. Behind, *after.

priority. **Priority, precedence** come into comparison when they mean the act, the fact, or, especially, the right of preceding another. When the reference is to the right, both terms usually imply an established or accepted code that determines which shall precede the other. **Priority** is the usual term in law and the sciences and chiefly concerns an order of time: when there is merely a question concerning the time relations of events, the term implies antecedence in occurrence; as, the courts established the *priority* of the wife's death in an accident; the right to inherit a title is dependent mainly on *priority* of birth. When, however, the question concerns a number of things which cannot be taken care of or dealt with all at once (such as debts, cases, etc.) and must be arranged in order of time, *priority* suggests a law, code, or other rule of arrangement that determines the order in which one goes before another; as, "In payment of debts he must observe the rules of *priority*" (*Blackstone*); liens on a property take *priority* in bankruptcy settlements; the "law of *priority*" in biological classification is the principle that the first published name of a genus or species has preference over any one subsequently published; to grant a man-of-war *priority* over several merchantmen seeking to enter a harbor. **Precedence**, though frequent in general use, is, as here considered, chiefly a term of formal etiquette; in this specific sense, it implies an established order as in receiving, greeting, seating, or the like, which gives preference to those who are superior in rank, dignity, or position; as, among ambassadors of equal rank, *precedence* is usually determined by order of seniority, or length of service; when a person has two claims to *precedence*, he is, as a rule, given the *precedence* that belongs to the higher rank. In general use, the term often suggests a prior place, chance, seat, or the like, accorded to one, often but not necessarily because of age, sex, social position, or as a mere courtesy; as, "Smiling blandly and saying, 'After you, ma'am,' to another lady... who had politely offered the *precedence* at the looking-glass" (*G. Eliot*); "No one lost anything by granting *precedence* to a man so flawlessly urbane" (*A. Repplier*). **Ana.** Ordering or order, arrangement (see corresponding verbs at **ORDER**): ascendancy, *supremacy: pre-eminence, transcendence (see corresponding adjectives at **SUPREME**).

priory. *Cloister, monastery, nunnery, convent, abbey.

prismatic. **Prismatic, iridescent, opalescent, opaline** agree in meaning marked by or displaying a variety of colors. **Prismatic** implies an exhibition of the colors of the spectrum (as when a ray of light is refracted by a prism) or of a rainbow. In its literary use, it merely suggests a brilliant or striking variety of colors; as, "Jeremy Taylor's style is *prismatic*. It unfolds the colours of the rainbow" (*Haslett*). "Have you ever observed a humming-

bird moving about in an aerial dance among the flowers—a living *prismatic* gem that changes its colour with every change of position?" (*Hudson*). *Iridescent* (etymologically from *iris*, a rainbow), implies a rainbowlike play of shifting colors such as is exhibited by a soap bubble, by mother of pearl, by the plumage of some birds, and the like; as, "The whole texture of his [Chaucer's] mind, though its substance seem plain and grave, shows itself at every turn *iridescent* with poetic feeling like shot silk" (*J. R. Lowell*); "*something iridescent*, like the shining of wet sand" (*A. Repplier*). *Opalescent*, and the somewhat rarer *opaline*, imply both the soft milky quality and the iridescence of an opal; as, "Titian hardly ever paints sunshine, but a certain *opalescent* twilight which has as much of human emotion as of imitative truth in it" (*Ruskin*); "The *opaline* light which comes through these lateral bays [of Auxerre Cathedral], and makes a sort of veil... under the lofty vaulting" (*Viollet-le-Duc*, *transl.* by *H. Adams*).

prisoner. *Prisoner, captive, convict* agree in denoting one who is deprived of his liberty and is held in custody. *Prisoner* is the general term, applicable to anyone covered by this definition, but it is frequently used in a more specific sense, and applied to one who is confined to a prison, or jail; as, *prisoners of war*; to take one *prisoner*; the *prisoners* in the penitentiary. *Captive* implies seizure by force, as in war, conquest, brigandage, and the like; it also often implies bondage or slavery, rather than imprisonment, and sometimes suggests capture for ransom. "He hath brought many *captives* home to Rome, Whose ransoms did the general coffers fill" (*Shak.*). *Convict*, although it literally means a person proved guilty of a crime by a competent tribunal, is more often applied to an imprisoned person serving a long sentence for a crime or felony and wearing the uniform characteristic of his class; as, an escaped *convict*; a chain gang of *convicts*.

pristine. *Primeval, primordial, primitive, primal, *primary, prime.*

Ana. Original, fresh, *new.

privation. 1 *Lack, absence, defect.

Ana. Negation, nullification, annulling, abrogation (see corresponding verbs at NULLIFY).

2 *Poverty, want, destitution, indigence, penury.

Ana. Depletion, draining, exhaustion, impoverishment (see corresponding verbs at DEPLET); *need, necessity, exigency: pinch, strait (see JUNCTURE).

privilege. *Right, prerogative, birthright, perquisite, appanage.

Ana. Concession, *allowance: favor, boon (see GIFT); *claim, title.

privy. Underhand, underhanded, surreptitious, backstairs, clandestine, furtive, *secret, covert, stealthy.

prize, v. Value, treasure, cherish, *appreciate.

Ana. Esteem, respect, admire, regard (see under REGARD, *n.*): *estimate, evaluate, assess, assay, rate.

prize, *n.*¹ *Spoil, booty, plunder, pillage, loot, swag.

prize, *n.*² *Premium, award, reward, meed, guerdon, bounty, bonus.

Ana. Recompensing or recompense, requital, compensation (see corresponding verbs at PAY): winning or winnings, earning or earnings (see corresponding verbs at GET).

Ant. Forfeit.

probable. *Probable, possible, likely* are here compared only in the sense of uncertain yet such as may be, or may become, true, real, or actual. That is *probable* (etymologically, provable) which has so much evidence in its support or seems so reasonable that it commends itself to the mind as worthy of belief, though not to be accepted as a certainty; thus, the most *probable* conclusion

from evidence at hand is the one which the weight of evidence supports even though it does not provide proof; the *probable* thief is the one at whom so much of the evidence points as to give grounds for a presumption that he is guilty; the "*probable* life" of a person, in the language of actuaries, is the period during which one half the persons of a given age at a given time will remain alive according to mortality tables; so, the *probable* cause of a fire; the *probable* author of an anonymous book; the *probable* expenses of a trip; the *probable* origin of a rumor. That is *possible* which is within the powers of performance, attainment, conception, or the like, of an agent or agency, especially a human agent (as, it is now *possible* to cross the Atlantic in an airplane; knowledge *possible* only to God; that we can relieve him is certain, that we can cure him is *possible*), or which is within the widest limits of a person's ability or a thing's capacity as determined by nature, necessity, circumstances, or the like (as, it is not *possible* to carry more than a thousand gallons of gasoline in this airplane; communication with Mars may never be *possible*; "the number of *possible* amusements [for an infant] is small until the child has learned to grasp objects that it sees"—*B. Russell*), or which, though not probable, may happen by chance or is dependent on a contingency or contingencies (as, his election is *possible*, but not *probable*; it is *possible* that she will come this way; "I think that 'so near as to obstruct' means so near as actually to obstruct—and not merely near enough to threaten a *possible* obstruction"—*Justice Holmes*). That is *likely* (see also APT, 2) which to all appearances is that which is alleged, suggested, required, or the like: in contrast with *probable*, *likely* does not as often or as invariably suggest grounds sufficient to warrant a presumption of truth, but in contrast with *possible*, it usually implies many more chances in favor of its being true; thus, the *probable* murderer is the suspect whose guilt is nearly but not completely established by the evidence; a *possible* murderer is merely one against whom suspicion is directed for some reason (often inadequate reason) or other; the *likely* murderer is the one among the *possible* murderers who, especially from a more or less superficial point of view, has had the strongest motive and the best opportunity to commit the murder, or toward whom the circumstantial evidence most distinctly points as the murderer; so, no *likely* heir to the bachelor millionaire's estate has been mentioned; the *likely* outcome of the war changes from month to month; this hut in the deep woods would be a *likely* rendezvous for gangsters. *Likely* is also often used in the sense of *promising* because of appearances, ability to win favor, and the like; as, a *likely* young man; a *likely* candidate.

Ana. Credible, believable, colorable, *plausible: *reasonable, rational.

Ant. Certain: improbable.

probationer. *Novice, novitiate, apprentice, postulant, neophyte.

probe, v. Pierce, penetrate, *enter.

Ana. Examine, inspect, *scrutinize: *prove, try, test.

probe, *n.* Investigation, *inquiry, inquisition, inquest, research.

probity. *Honesty, honor, integrity.

Ana. Uprightness, justness, conscientiousness, scrupulousness (see corresponding adjectives at UPRIGHT): *truth, veracity: rectitude, *goodness, virtue.

problem. *Mystery, enigma, riddle, puzzle, conundrum. *Ana.* Perplexity, mystification, bewilderment, distraction (see corresponding verbs at PUZZLE): *predicament, dilemma, plight, quandary.

Ant. Solution.

problematical, problematic. *Doubtful, dubious, questionable.

Ana. Ambiguous, equivocal, *obscure, vague, cryptic, enigmatic: uncertain, suspicious, mistrustful (see corresponding nouns at UNCERTAINTY).

procedure. *Process, proceeding.

Ana. Ordering or order, arrangement (see corresponding verbs at ORDER): *method, system, manner, way: conducting or conduct, management (see corresponding verbs at CONDUCT).

proceed. Issue, emanate, stem, flow, derive, *spring, arise, rise, originate.

Ana. *Follow, succeed, ensue: *come, arrive.

proceeding, n. *Process, procedure.

Ana. *Action, act, deed: *affair, business, concern: operation, functioning, working (see corresponding verbs at ACT).

process, n. *Process, procedure, proceeding* come into comparison as denoting the series of actions, operations, motions, and the like, involved in the accomplishment of an end. *Process* is the preferred term when progress from a definite beginning to a definite end is implied and something is thereby made or produced or is changed from one thing into another: the term usually suggests a division of the entire series into steps or stages; as, to describe the *process* of making sugar from sugar cane; the *process* of digestion; a complicated chemical *process*; "perfect knowledge is no mere intellectual *process*" (*Inge*). The idiomatic phrase "in *process*" means in the course of being made, produced, built, constructed, evolved, attained, or the like. "For men in practical life perfection is something far off and still in *process* of achievement" (*W. James*). *Procedure* is the preferred term when the stress is upon the routine method followed, or the routine course to be followed, not only in an industrial, a chemical, a mental, or other distinct process, but in doing anything such as conducting a meeting, a trial, a conference, a business, or the like, performing an experiment or an operation, and prosecuting an investigation or a search; as, to study the rudiments of parliamentary *procedure*; to know laboratory *procedure* better than any other graduate student in chemistry; the young lawyer was frequently embarrassed by his ignorance of correct legal *procedure*. *Proceeding*, a much less definite term than the others of this group, applies not only to the series, actions, or operations directed toward the attainment of an end, but also to any one of such acts or operations: the term throws more stress on the individual or collective acts or operations than on their closely knit relation to each other or on the final end which they have in view: often, the term means little more than an instance, sometimes a course, of conduct or behavior; as, "The law . . . stepped in to prevent a *proceeding* which it regarded as petty treason to the commonwealth" (*Froude*); to record the *proceedings* of a meeting of a society; "It's the precise habits, the incredible *proceedings* of human insects I like to note and study" (*L. P. Smith*).

Ana. Progress, advance (see under ADVANCE, *v.*): conducting or conduct, management, controlling or control, direction (see corresponding verbs at CONDUCT): performance, execution, accomplishment, fulfillment (see corresponding verbs at PERFORM).

prochronism. *Anachronism, metachronism, parachronism.

proclaim. *Declare, announce, publish, advertise, promulgate, broadcast.

Ana. *Reveal, disclose, discover, divulge, tell: voice, utter, vent, ventilate (see EXPRESS, *v.*): *inform, apprise, advertise.

proclamation. Declaration, announcement, publication, advertisement, promulgation, broadcasting. See under DECLARE.

proclivity. Propensity, *leaning, penchant, flair.

Ana. Knack, aptitude, *gift, bent, turn: inclination, disposition, predisposition (see corresponding verbs at INCLINE): *predilection, prepossession, prejudice, bias.

procrastinate. *Delay, lag, dawdle, loiter, dally, dillydally.

Ana. *Defer, suspend, stay, postpone: protract, prolong (see EXTEND).

Ant. Hasten, hurry.

procreate. *Generate, engender, beget, get, sire, breed, propagate, reproduce.

proctor. *Lawyer, counselor, barrister, counsel, advocate, attorney, solicitor, procurator.

procurator. *Lawyer, counselor, barrister, counsel, advocate, attorney, solicitor, proctor.

procure. *Get, obtain, secure, acquire, gain, win, earn.

Ana. *Negotiate, arrange, concert: *reach, compass, gain, achieve, attain: *manage, contrive, afford.

prodigal. *Profuse, lavish, exuberant, luxuriant, lush.

Ana. Extravagant, exorbitant, immoderate, *excessive: abundant, *plentiful, plenteous, ample, copious: *supererogatory, uncalled-for, gratuitous.

Ant. Parsimonious: frugal. — **Con.** Niggardly, penurious, *stingy: economical, *sparing, thrifty.

prodigious. *Monstrous, tremendous, stupendous, monumental.

Ana. *Enormous, immense, huge, vast, gigantic, mammoth, colossal: amazing, astounding, flabbergasting (see SURPRISE).

produce, v. *Bear, yield, turn out.

Ana. *Generate, breed, propagate: *make, form, shape, fabricate, manufacture: create, *invent.

produce, n. *Product, production.

product. 1 *Work, production, opus, artifact.

Ana. Forming or form, fabrication, manufacturing or manufacture (see corresponding verbs at MAKE): article, object, *thing.

2 Product, production, produce come into comparison only when they denote something produced or brought into being by any process or operation, especially one involving labor or effort. *Product* is the most general of these terms, for it is applicable to anything produced by generation, growth, labor, or thought, or by any industrial, chemical, mental, or other process, or by the operation of causes in no way controllable by man; as, specimens of all the *products* of this factory will be on exhibition in the railway station next week; the factory's entire *product* (that is, total output of manufactured goods) for the past year exceeds that of any two other factories of the same kind; the boy is a finished *product* of a well-known school; the literary *products* of the Age of Reason; soot is usually the *product* of the imperfect combustion of coal or other fuel; "[Man] is the flower and chief of all the *products* of Nature" (*Henry More*). *Production*, in the sense of the thing produced, is generally restricted in its application to human products involving intellectual or artistic labor. Some persons avoid the use of the term as grandiose, but it is the preferred term in theatrical and motion-picture use; thus, a work of sculpture, a philosophical or historical treatise, or a theatrical representation of a play may be described as a *production*; so, the greatest *production* of Hamlet that this country has been privileged to see and hear; "The finest *productions* of Praxiteles or Zeuxis" (*Froude*); Wagner believed Parsifal the climactic *production* of his career. But *production* is also used in a more abstract

sense to denote all things (sometimes all things of a specified or implied kind) manufactured or grown to satisfy human wants; as, to limit *production*; an increase of *production* in factories with defense contracts is extremely necessary; the problems of *production* and of distribution. **Produce** is ordinarily a collective noun applied to agricultural as distinguished from industrial products (as, "the meagre *produce* of the land"—*Couper*; the *produce* exchange [that is, the exchange in which contracts are made involving large-scale sales or purchases of wheat, corn, and other grains, and other agricultural products]); sometimes, however, it is applied especially to vegetables and fruits (as, the farmer sells his *produce* at the public market; a new store for the sale of fresh *produce*).

production. 1 *Work, product, opus, artifact.

Ana. Execution, fulfillment, performance (see corresponding verbs at **PERFORM**): *effort, exertion.

2 *Product, produce.

proem. *Introduction, prologue, induction, prelude, overture, preface, foreword, prolegomenon, exordium, preamble, prolusion, protasis, avant-propos.

profanation. Profanation, desecration, sacrilege, blasphemy are here compared as meaning a violation or a misuse of something regarded as sacred. **Profanation**, though strongly derogatory, does not impute such baseness to the act or conduct as do the other words. It usually implies an attitude of irreverence or contempt in the offender that leads him to show his feelings in acts or in words that outrage those who hold the place or the thing sacred. The term often specifically suggests bold, vulgar intrusion or irreverent vandalism; as, the *profanation* of a sanctuary by ignorant tourists; "a wall was built round the tomb to protect it from *profanation*" (*Froude*). **Desecration** in strict use carries a strong implication of defilement or pollution, as of churches, temples, sacred vessels, etc., and a consequent loss of a sacred or hallowed character or of ceremonial cleanliness (as, the *desecration* of a cathedral by its use as a barracks by invading troops): sometimes, however, mere deprivation of the sacred character is implied (as, "Various *profanations* of the sabbath... threaten a gradual *desecration* of that holy day"—*B. Porteus*). **Sacrilege** etymologically implies the stealing of sacred objects, such as the vessels used in the solemn Eucharistic service. This sense still obtains, especially in British use; as, "The very books that are used in the worship of God are Sacred. The man who steals them is guilty of *sacrilege*" (*Manning*). The more common sense in ecclesiastical use is that of reception (or sometimes, administration) of a sacrament, especially the Sacrament of Penance or of the Eucharist, under conditions that make one unworthy to receive (or administer) it. "I shall refuse to administer the Sacrament. In your present state of mind, it would be a *sacrilege*" (*Cather*). In more general use, *sacrilege* is applied to any act, situation, or the like, which constitutes an outrageous profanation of something regarded as sacred; as, "To religious minds this scientific inversion of solemn truths seems, and is, *sacrilege*" (*H. Adams*). **Blasphemy**, in loose use (for strict sense see **BLASPHEMY**, 1), is often employed in place of *sacrilege* in its general and nonecclesiastical sense, usually, however, with the implication of a base perversion of the truth. "This doctrine sounds like *blasphemy* against friendship" (*P. G. Hamerton*).

Ana. Defilement, pollution, contamination (see corresponding verbs at **CONTAMINATE**): debasement, vitiation, corruption, perversion (see corresponding verbs at **DEBASE**): violation, transgression, trespass (see **BREACH**).

profane, adj. 1 Profane, secular, lay, temporal as here compared agree in meaning not dedicated or set apart for

religious ends or uses. **Profane** (etymologically, outside the temple), in its strictest sense, implies an opposition to *sacred* (see **HOLY**): in this sense, it is purely descriptive and not derogatory; thus, *profane* history, as distinguished from *sacred* history, is history dealing with nations or peoples rather than with Biblical events or characters; *profane* literature, as distinguished from *sacred* literature, comprises all literature except the Scriptures, other sacred writings, and sometimes, writings having a definite religious end or use; *profane* love applies to human love as between man and woman, as distinguished from *sacred* love, the love of man for God and of God for man. The term is, however, used more widely to imply an opposition to *holy*, *religious*, *spiritual*, and the like; as, "I have observed that *profane* men living in ships, like the holy men gathered together in monasteries, develop traits of profound resemblance" (*Conrad*).

Secular (etymologically, of the age or time, therefore of the world) usually implies a relation to the world as distinguished from the church, or religion, or the religious life; it may be opposed to *sacred* and come close to *profane* (as, *secular* music; the *secular* drama); it may be opposed to *regular*, in the sense of governed by a monastic rule (thus, a *secular* priest is a priest who does not belong to a religious order; a *regular* priest is one who does); it is most often opposed to *religious* in the sense of belonging to or serving the ends of a religion or church, then coming close to *civil*, *public*, etc. (as, *secular* schools; *secular* journals; "the secular authority"—*C. Mackenzie*; "There are peoples in the world who have no *secular* dances, only religious dances"—*H. Ellis*). **Lay** is commonly applied to persons (sometimes to their activities, interests, duties, etc.) that do not belong to the clergy: it, therefore, usually implies an opposition to *clerical* or *ecclesiastical*; as, the *laymen* and *laywomen* of the parish; a *lay* preacher; *lay* sermon; *lay* delegates to a diocesan convention. In religious orders, the term is applied to a class of religious who are occupied chiefly with domestic and manual work as distinguished from those who are occupied with liturgical observances, teaching, study, etc.; as, the *lay* brothers in a monastery; the *lay* sisters in a convent. **Lay** is also used loosely in the sense of non-professional or of not having a professional source or character; thus, a *lay* opinion on a question of law is merely an opinion delivered by one who is neither a lawyer nor a judge. **Temporal** (as here considered: see also **TEMPORARY**, 1) implies an opposition to *spiritual* (in the sense of not concerned with material or mundane but with immaterial and eternal ends) and is applied chiefly to sovereigns, rulers, or dignitaries having political authority or civil power; thus, in British use, lords *temporal* are those members of the House of Lords who are not bishops or archbishops (these latter being called lords *spiritual*); the Papacy had no *temporal* power between 1870, the year of the fall of the Papal State, and 1929, the year of the establishment of Vatican City.

Ana. Worldly, mundane, *earthly, terrestrial.

Ant. Sacred. — **Con.** *Holy, divine, religious, spiritual.

2 *Impious, blasphemous, sacrilegious.

Ana. Foul, filthy, *dirty, nasty: ungodly, godless, *irreligious: iniquitous, nefarious, villainous, *vicious.

profanity. *Blasphemy, cursing, swearing.

Ana. Imprecation, *curse, malediction, malison: execration, objurgation, damning (see corresponding verbs at **EXECRATE**).

profession. Art, handicraft, craft, *trade.

proffer. *Offer, tender, present, prefer.

Ana. Propose, design, *intend: confer, bestow, present, *give.

Con. Reject, spurn, refuse, *decline.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

proficient. *Proficient, adept, skilled, skillful, expert* agree in meaning having the knowledge and experience necessary to success in a given line, especially of work or endeavor. All these terms are applied primarily to persons; when applied to things, the implication is that the quality of the person has been attributed to the thing. One is *proficient* who, as a result of training and practice, has acquired competency beyond that of the average. "*Proficient in the art of self-defence*" (*Shaw*). "Jane began to type. It bored her, but she was fairly *proficient* at it" (*R. Macaulay*). One is *adept* who has proficiency, aptitude, and often, cleverness; as, *adept* at legerdemain. "The Oriental is . . . *adept* in extracting himself plausibly from the most compromising situations" (*V. Heiser*). One is *skilled* who has mastered the details of a trade or handicraft or the technique of an art or profession. *Skilled* may imply aptitude or proficiency; in modern industrial use, however, it simply connotes that one has met a standard set up by employers for a special type of work or job; as, a *skilled* laborer; the *skilled* trades. "By long practice, he was *skilled* in the arts of teaching" (*Gibbon*). One is *skillful* who unites adeptness and dexterity in execution or performance; as, a *skillful* operator of an automobile; a *skillful* teacher; "a *skillful* economy of means" (*Palmer*). One is *expert* who has attained extraordinary proficiency or is marvelously adept; as, an *expert* accountant; an *expert* bridge player; *expert* knowledge of engines. "Neither of them was *expert* in the roping of cattle" (*M. Austin*).

Ana. Efficient, effectual, *effective: capable, *able, competent, qualified: finished, accomplished, *consummate: practiced, drilled, exercised (see under PRACTICE, v.).

Con. *Awkward, clumsy, maladroit, inept, gauche: *ignorant, untaught.

profile. *Outline, contour, silhouette, sky line.

profit, n. *Use, service, advantage, account, avail.

Ana. Reward, award, meed, guerdon (see PREMIUM): gaining or gain, winning, earning (see corresponding verbs at GET).

profit, v. *Benefit, avail, boot, bestead.

Ana. *Get, gain, win, earn: *advance, progress.

profitable. *Beneficial, advantageous.

Ana. *Favorable, auspicious, propitious: *expedient, advisable, politic.

Con. Detrimental, deleterious (see PERNICIOUS): harming or harmful, injurious, hurting or hurtful (see corresponding verbs at INJURE).

profligate. Dissolute, reprobate, *abandoned.

Ana. Debauched, corrupted, depraved, debased, perverted (see under DEBASE): degenerate, corrupt, *vicious: *loose, relaxed, slack, lax.

profound. *Deep, abysmal.

Ana. Penetrating, probing, piercing (see ENTER): scrutinizing, inspecting, examining (see SCRUTINIZE).

Ant. Shallow.

profuse. *Profuse, lavish, prodigal, luxuriant, lush, exuberant* come into comparison because they carry as their basic meaning giving out or given out in great abundance. That is *profuse* which seems to pour or be poured forth in abundance, without restraint, or in a stream; as, *profuse* apologies; *profuse* sweating; *profuse* in expenditure; "Poured thy full heart In *profuse* strains of unpremeditated art" (*Shelley*); "A land where life was great . . . and beauty lay *profuse*" (*Browning*). That is *lavish* (etymologically, deluging) which is so exceedingly profuse as to suggest, positively, munificence or extravagance, or negatively, the absence of all stint or measure; as, *lavish* gifts; a *lavish* feast; *lavish* expendi-

tures; "the *lavish* attentions of his mother" (*Meredith*); "Our *lavish* use of a bountiful supply of crude oil" (*A. C. Morrison*); "it is a noble, *lavish* and distinguished work" (*Lucas*). That is *prodigal* which gives or is given so lavishly and so recklessly as to suggest waste or the ultimate exhaustion of resources; as, the *prodigal* son of a wealthy father; "Chary of praise and *prodigal* of counsel" (*Stevenson*); "he had been *prodigal* of the excellencies of his nature . . . and, like Timon, he became bankrupt, and fell upon bitterness" (*Meredith*). That is *luxuriant* which produces or is produced in great and rich abundance: the term usually connotes not only profusion but gorgeousness or splendor in that which is produced; as, the *luxuriant* growth of nasturtiums; her *luxuriant* hair; the *luxuriant* imagination of Milton; "religion might well flourish quite as *luxuriantly* as it did in former times" (*J. W. Krutch*). That is *lush* which is not only luxuriant, but which has reached the peak of its perfection: the term distinctively connotes richness, fullness of development, or luxuriousness; as, "How *lush* and lusty the grass looked how green!" (*Shak.*); *lush* tropical forests; "*lush* dinners here, when anybody came, were the climactic experiences of Ouyard's . . . soul" (*Hervey Allen*); "The air was knife-keen and as fresh as lettuce . . . a far cry from the *lush* . . . full-blown landscape of the south through which they had set out that morning" (*Jan Struther*). That is *exuberant* (etymologically, prolific or fruitful) which produces or is produced so abundantly or luxuriantly as to suggest exceedingly great vigor, vitality, or creative power; as, an *exuberant* fancy; the *exuberant* genius of Shakespeare; *exuberant* foliage; "to restrain my too *exuberant* gesture" (*M. Austin*). In current use, *exuberant* applies chiefly to persons, their words, emotions, qualities, or the like, that display a vigor or vitality that is almost rampant; as, *exuberant* energy; the child's *exuberant* gaiety.

Ana. Copious, abundant (see PLENTIFUL): *excessive, immoderate, extravagant: *liberal, bountiful, munificent, generous.

Ant. Spare, scanty, scant. — **Con.** *Meager, skimpy, scrumpy, exiguous, sparse.

progenitor. *Ancestor, forefather, forebear.

Ant. Progeny.

prognostic. *Foretold, presage, omen, augury, portent.

Ana. Indication, betokening, bespeaking (see corresponding verbs at INDICATE): symptom, *sign, mark, token.

prognosticate. *Foretell, predict, forecast, prophesy, augur, presage, portend, forebode.

Ana. *Indicate, betoken, bespeak: *foresee, foreknow, apprehend, divine, anticipate.

program or programme. *Program (or programme), schedule, timetable, agenda* agree in denoting a formulated plan listing things to be done or to take place, especially in their time order. *Program* is the term of widest meaning. It may refer to a mental plan or to one that is written or printed; it may be applied not only to a plan for a meeting, an entertainment, a service, or the like, but to one made by an individual in ordering his own day or his own future, or to one made by a group that has certain ends in view and proposes their orderly achievement; as, what is your *program* for today?; the *program* of a concert; theater *programs*; the Five-Year Plan was the name given the industrialization *program* of the Soviet Union. *Schedule* stresses the importance of the time element and implies a plan of procedure which establishes not only the chronological order of events or steps but also their time limits; as, the *schedule* for a college year; a *schedule* of production in a factory;

a *schedule* for the erection of a building. *Schedule* is sometimes used, but *timetable* possibly more often, for a tabulated list of regularly recurring events, such as arrivals and departures of trains; as, a *timetable* of tides; a *schedule* of classes. *Agenda* (a plural noun sometimes construed as a singular) is more informal than the others in its implications; it is applied chiefly to an order of business for a meeting.

progress, n. 1 Advance (see under *ADVANCE*, v., 2).

Ana. Improvement, betterment (see corresponding verbs at *IMPROVE*): headway, impetus (see *SPEED*, n.).

2 **Progress, progression** are not always clearly distinguished, although in current usage they are more or less sharply differentiated. Both denote movement forward. **Progress** (for fuller treatment see *progress*, n., under *ADVANCE*, v., 2) usually applies to the movement considered as a whole, stressing the distance covered, the change or changes taking place, the amount of improvement made, or the like; as, we made little *progress* that day; to note the extent of his *progress* during the past year; "delightful never-ending *progress* to perfection" (*Haslitt*); the daily *progress* of the sun; the history of educational *progress*; the rapid *progress* of a disease. **Progression** (see also *SUCCESSION*) commonly applies to the movement in itself or in its detail, often implying a continuous series of steps, degrees, or stages toward an objective, but sometimes implying little more than a moving on more or less continuously; as, mode of *progression* (better than *progress*); "That slow *progression* of things, which naturally makes elegance and refinement the last effect of opulence and power" (*Sir J. Reynolds*); "Every generation... adds... its own discoveries in a *progression* to which there seems no limit" (*Peacock*); "the *progression* of sound waves" (*Karl K. Darrow*).

progress, v. *Advance.

Ana. *Move, drive, impel: further, forward, promote, *advance: develop, *mature.

Ant. Retrogress.

progression, n. 1 *Succession, series, sequence, set, suite, chain, train, string.

2 *Progress.

progressive, a. *Liberal, advanced, radical, left.

Ant. Reactionary.

prohibit, v. *Forbid, inhibit, enjoin, interdict, ban.

Ana. *Prevent, preclude, obviate: debar, shut out, *exclude: *hinder, impede, obstruct: *restrain, curb, check. *Ant.* Permit. — *Con.* *Let, allow, suffer: tolerate, endure, *bear.

project, v. Scheme, design, plot, plan. See under *PLAN*, n.

Ana. Propose, purpose, *intend: *sketch, outline, diagram, delineate.

project, n. Scheme, design, plot, *plan.

Ana. Sketch, delineation, draft, outline, diagram (see under *SKETCH*, v.): *device, contrivance.

projection, n. Projection, protrusion, protuberance, bulge come into comparison when they denote something which extends beyond a level or a normal outer surface. **Projection** is applicable to anything that juts out, especially at a sharp angle; as, buttresses are *projections* which serve to support a wall or a building at a point of great strain or pressure. "Machinery set in motion to keep a level smooth... feels the least *projection*, and tries to flatten it out" (*Hearn*). **Protrusion** applies to something which is thrust out or which pushes out, so that it seems more or less of an excrescence or deformity; as, the architect advised them not to spoil the roof line with *protrusions* such as dormer windows. A *protuberance* swells or pushes out, often in rounded rather than angu-

lar form; as, the *protuberances* of a potato; he has a *protuberance* on the cheek which has not as yet been diagnosed. "An obvious moral is indeed a heavy *protuberance* which injures the gracefulness of a poem" (*Landon*). A *bulge* is a protuberance or expansion of a surface caused usually by pressure from within or below; as, a *bulge* in a wall; there is a slight *bulge* in the soil before the first stalk of a plant appears.

projector, n. See under *PLAN*, n.

prolegomenon, n. *Introduction, prologue, induction, prelude, overture, preface, foreword, proem, exordium, preamble, prolusion, protasis, avant-propos.

prolific, a. Fruitful, *fertile, fecund.

Ana. Teeming, swarming, abounding, superabounding (see *TEEM*): generating, breeding, propagating, reproducing or reproductive (see corresponding verbs at *GENERATE*).

Ant. Barren, unfruitful.

prolificacy, prolificity, prolificness, n. Fruitfulness, fertility, fecundity. See under *FERTILE*.

Ant. Barrenness, unfruitfulness.

prolix, a. *Wordy, verbose, diffuse, redundant.

Ana. Tedious, *irksome, tiresome, wearisome: prolonged, protracted (see *EXTEND*): pleonastic, circumlocutory, redundant, tautological (see corresponding nouns at *VERBIAGE*).

prologue, n. *Introduction, induction, prelude, overture, preface, foreword, prolegomenon, proem, exordium, preamble, prolusion, protasis, avant-propos.

prolong, v. Protract, *extend, lengthen, elongate.

Ana. *Continue, last, persist, endure: *increase, augment, enlarge: *expand, amplify.

Ant. Curtail. — *Con.* *Shorten, abridge, abbreviate, retrench.

prolusion, n. *Introduction, prologue, induction, prelude, overture, preface, foreword, prolegomenon, proem, exordium, preamble, protasis, avant-propos.

prominent, a. Remarkable, conspicuous, salient, outstanding, signal, *noticeable, striking, arresting.

Ana. *Chief, leading, main, principal: important, significant (see corresponding nouns at *IMPORTANCE*).

promiscuous, a. Heterogeneous, motley, *miscellaneous. *Ana.* Mixed, mingled, blended, merged (see *MIX*): *random, haphazard, desultory, casual: *indiscriminate, wholesale, sweeping: *licentious, lewd, wanton, lascivious.

Con. Discriminating, perceiving, discerning (see corresponding nouns at *DISCERNMENT*): discreet, prudent, forethoughted (see under *PRUDENCE*).

promise, v. Promise, engage, pledge, plight, covenant, contract come into comparison as meaning to give one's word that one will do, make, give, accept, or the like, something stipulated. **Promise**, both as a transitive and as an intransitive verb, implies a giving assurance (usually orally or in writing) but it suggests no further grounds for expectation of the fulfillment of what is promised; as, he is a man of his word, what he *promises* he performs; he *promised* that he would pay his bill within thirty days; he *promised* each child that he would give her a doll for Christmas; to *promise* his daughter in marriage to his old friend's son (cf. his daughter is *promised*); she has *promised* herself a trip to Bermuda in the near future. **Engage**, both as a transitive and as an intransitive verb, implies more binding agreement than *promise*. Although it is usually far from explicit as to the nature of the agreement (sometimes specifically implying an agreement to marry, sometimes an agreement to accept as an employee), nevertheless it implies a promise that is not likely to be broken; as, to *engage* oneself to

provide accommodations for four delegates to the convention; an *engaged* couple; to *engage* a secretary; "Mr. Lorry readily *engaged* for that, and the conference was ended" (*Dickens*); "Mrs. Doria *engaged* to go down to the baronet" (*Meredith*); she said she was *engaged* for the next three dances. But *engage* may also imply the securing of a promise from a person, and the use of argument, persuasion, flattery, threats, or the like, in the attaining of that end; as, "Yes, and I hope to *engage* you to be serious likewise" (*Austen*); "Her highness... when I left her, *engaged* me to write to her" (*Lady M. W. Montagu*). **Pledge**, chiefly a transitive verb, may imply either the giving voluntarily of a promise by some act or words that suggest the giving of a solemn assurance, or the provision of a formal guarantee (as, to *pledge* one's honor that one will see that a dying friend's wish is respected; they *pledged* their loyalty to their sovereign as they lifted their wine glasses; "By the second [clause], they *pledge* themselves to maintain and uphold the right of the master"—*Ch. Just. Taney*), or the putting of another or of others under a solemn promise to do, to forbear, or the like (as, to *pledge* a thousand men to temperance; "Austria swarmed with excited and angry men *pledged* to destroy the Church"—*Belloc*; to *pledge* the children to allegiance to the flag). **Plight**, a very old and now archaic word, appears rarely except in certain idiomatic expressions where the entire phrase means to promise solemnly, as in to *plight* one's faith, or one's honor, or one's troth (then implying betrothal, or, as in the words used in some marriage ceremonies, marriage), or one's word; as, he *plighted* his faith that the injustice would be avenged. **Covenant**, more often an intransitive than a transitive verb, implies at least two parties to the promise, each making a solemn agreement with the other or others. "A man cannot grant any thing to his wife, or enter into covenant with her: for... to *covenant* with her, would be only to *covenant* with himself" (*Blackstone*). "The men of Ulster... *covenanted* to defeat the present conspiracy to set up a Home Rule Parliament in Ireland" (*R. Macaulay*). **Contract** (as here considered: see also **CONTRACT**, 3; **INCUR**) implies the entry into a solemn, and now usually legally binding, agreement (see **CONTRACT**, 2.): it is currently rare with a noun object (as, "We have *contracted* an inviolable amitie... with the aforesaid queene"—*Hakluyt*) but it is not uncommon with *for* or with an infinitive object; as, to *contract* for a large loan; the company has *contracted* to supply the schools of the state with textbooks.

Ana. Agree, consent, *assent, accede: assure, *ensure, insure.

promote. Forward, further, *advance.

Ana. *Help, aid, assist: *speed, quicken, hasten, hurry.

Ant. Impede. — **Con.** *Hinder, obstruct, block, bar.

promotion. 1 *Advancement, preferment, elevation.

Ana. *Progress, progression: exaltation, magnifying, aggrandizement (see corresponding verbs at **EXALT**).

Ant. Demotion. — **Con.** Degradation, humiliation, debasement (see corresponding verbs at **ABASE**).

2 *Publicity, propaganda, ballyhoo.

Ana. Advertisement, promulgation, broadcasting (see corresponding verbs at **DECLARE**).

prompt, adj. *Quick, ready, apt.

Ana. Alert, wide-awake, vigilant, *watchful: expeditious, speedy, swift (see **FAST**): trained, disciplined (see **TEACH**): *eager, keen, avid.

Con. Remiss, lax, slack (see **NEGLIGENT**): dilatory, *slow.

promulgate. Proclaim, announce, *declare, publish, advertise, broadcast.

Ana. *Reveal, disclose, divulge, discover: affirm, aver, avow, avouch (see **ASSERT**): *communicate, impart.

promulgation. Proclamation, declaration, announcement, publication, advertisement, broadcasting. See under **DECLARE**.

prone. 1 Subject, exposed, open, *liable, susceptible, sensitive, incident.

Ana. Inclined, predisposed, disposed (see **INCLINE**, 2.): addicted, habituated, accustomed (see **HABITUATE**).

2 **Prone, supine, prostrate, recumbent, reclining, couchant, dormant** are here compared as meaning lying upon the ground, floor, or other surface. **Prone** and **supine** as applied to men or animals are contrasted terms which are often incorrectly used. **Prone**, in strict use, implies a posture where the front of the body lies upon or is turned toward the ground: the term is applicable not only to serpents and the like that move along the ground, but to the natural position of most quadrupeds as distinguished from that of man; as, dogs *prone* upon the ground; "a creature who, not *prone* And brute as other creatures, but endued With sanctity of reason, might erect His stature" (*Milton*). The term is also used in reference to men, chiefly as a quasi-adverb, with verbs such as *lie, fall, land, etc.*, implying a position with face and abdominal side downward; as, he fell *prone* upon the ground; the doctor ordered him to lie *prone* for the examination. "Then falls, betrayed by shifting shells, and lands *Prone* in the jeering water, and his hands Clutch for support where no support can be" (*Amy Lowell*). **Supine** (see also **INACTIVE**), on the other hand, implies a lying upon one's back, usually a lying flat upon one's back; as, he always sleeps in a *supine* position; he fell backward and lay *supine* until help came; "jaded people lolling *supine* in carriages" (*Shaw*). **Prostrate**, in its earliest and still frequent sense, implies the posture of one who throws himself forward full length in a prone position as in adoration, submission, humility, surrender, or fear; as, to fall *prostrate* in worship at the most solemn moment of the liturgy; "*Prostrate* in homage, on her face" (*G. Bottomley*). In somewhat extended use *prostrate* is applicable to men or animals in either a prone or a supine position (as, "Quickly stooping I once more drove my weapon to the hilt in his *prostrate* form"—*Hudson*) and to trees and the like which lie full length upon the ground (as, "He clambered over half-visible rocks, fell over *prostrate* trees, sank into deep holes and struggled out"—*Cather*). **Recumbent** applies chiefly to a person or animal lying down in a position suitable for repose or for sleep; the term apart from the context carries no clear suggestion of the posture, and may imply a flat position or one with the head resting against pillows or the like; as, a *recumbent* alabaster figure on the top of a tomb; "Lady Blandish was *recumbent* upon the brown pine-droppings" (*Meredith*); "Rising proudly from her *recumbent* position" (*Lytton*). **Reclining** suggests either a supine position or a leaning back so as to rest against something; often, it is not clearly distinguishable from *recumbent*; as, she spent the afternoon *reclining* on her couch; *reclining* gracefully in a chaise longue. **Couchant** and **dormant** are used in heraldry to describe a lion or other animal on an escutcheon or coat of arms: both imply a prone position of the body but *couchant* applies only to an animal with head raised, and *dormant*, to one with head lowered as in a sleeping position; as, a sable lion *couchant* on an azure ground.

Ana. Flat, *level: groveling, wallowing, weltering (see **WALLOW**): crawl, *creep.

Ant. Erect.

pronounce. Pronounce, articulate, enunciate are here compared in the sense of to form speech sounds. **Pro-**

nounce involves the assignment of sounds to letters, groups of letters (as syllables and words), or to the words in general of a language, and the distribution of syllabic stress in utterances of more than one syllable in languages that do not have level or even stress; as "s" in "his" is pronounced "z"; "colonel" has the same pronunciation as "kernel"; he considers it incorrect to pronounce "adult" with primary accent on the first syllable; that Frenchman pronounces English pretty well. To **articulate**, in the broadest sense in which it comes into comparison here, is to break up, by manipulation of the vocal organs, an expiration of breath into distinct parts (syllables or words), a sequence of these constituting intelligible speech. "His agitation was so great that he could not articulate" (*Macaulay*). In a very specialized phonetic sense, to **articulate** is to close or narrow the vocal organs in such a manner as to produce a given sound (esp. a consonant) of a given language, more specifically by the adjustment of the tongue, with relation to the palate, at the place where the tongue has, for that sound, its maximum elevation. "In pronouncing the English variety of the sound t, the air passage is completely blocked by...raising the tip of the tongue to touch the teeth-ridge.... Many foreigners...articulate the sound t with the tip of the tongue against the upper teeth.... This articulation produces a very unnatural effect when used in English" (*D. Jones*). Hence, by a slight extension, **articulate** may also mean to make the manipulations or articulations for the sounds as a whole in one's speech with such care or carelessness that one's speech is distinctly or indistinctly heard. "A public speaker...must articulate more carefully than in ordinary conversation: unstressed vowels will have greater importance and be less reduced, consonants will never be slurred over" (*W. Ripman*). To **enunciate** is to be distinct or indistinct in one's speech as a result of careful or careless articulation and of whatever other factors contribute to distinctness or indistinctness (as sonority, lip action, presence or absence of nasal twang, etc.). "Should children be taught to enunciate correctly and to have pleasant manners, or are these mere relics of aristocracy?" (*B. Russell*). But **articulate** and **enunciate** are frequently used with little or no distinction of meaning.

proof. 1 Ground, *reason, argument.

Ana. Demonstration, trial, test (see under **PROVE**): corroboration, confirmation, substantiation, verification (see corresponding verbs at **CONFIRM**).

2 Demonstration, test, trial. See under **PROVE**.

Ant. Disproof.

propaganda. *Publicity, promotion, ballyhoo.

Ana. Propagation, engendering, generating (see corresponding verbs at **GENERATE**): spread, stretch (see **EXPANSE**): inculcation, instillment, implanting (see corresponding verbs at **IMPLANT**).

propagate. *Generate, engender, breed, beget, procreate, sire, reproduce.

Ana. *Increase, multiply, augment: *continue, persist: *extend, lengthen, prolong.

propel. *Push, shove, thrust.

Ana. *Move, drive, impel: *force, compel, constrain, oblige.

propensity. *Leaning, proclivity, penchant, flair.

Ana. *Predilection, prejudice, bias, prepossession: *gift, aptitude, bent, turn, knack: predisposition, disposition, inclination (see corresponding verbs at **INCLINE**).

Ant. Antipathy.

proper. 1 Meet, appropriate, fitting, apt, happy, felicitous, *fit, suitable.

Ana. Congruous, congenial, compatible, *consonant: *correct, nice, right: *due, rightful, condign.

Ant. Improper. — **Con.** Wrong, *false.

2 Seemly, *decorous, decent, nice, comme il faut, demure.

Ana. Formal, conventional, ceremonious, *ceremonial.

property. *Quality, character, attribute, accident.

Ana. Peculiarity, individuality, characteristic (see corresponding adjectives at **CHARACTERISTIC**).

prophecy. *Revelation, vision, apocalypse.

Ana. Communication, impartation (see corresponding verbs at **COMMUNICATE**): *inspiration, enthusiasm.

prophecy. Predict, forecast, *foretell, prognosticate, augur, presage, portend, forebode.

Ana. *Foresee, foreknow, divine, apprehend, anticipate.

propinquity. *Proximity.

Ana. Closeness, nearness (see corresponding adjectives at **CLOSE**): relatedness or relationship, kindredness or kindred (see corresponding adjectives at **RELATED**): *kinship, consanguinity.

propitiate. *Pacify, appease, placate, mollify, conciliate.

Ana. Reconcile, conform, adjust, *adapt: *satisfy, content: intercede, mediate (see **INTERPOSE**).

propitious. Auspicious, *favorable, benign.

Ana. Benignant, *kind, kindly: fortunate, *lucky, providential, happy.

Ant. Unpropitious: adverse. — **Con.** *Sinister, malefic, malign, baleful: *ominous, inauspicious, portentous, fateful.

proportion. *Symmetry, balance, harmony.

proportionable. Proportionate, *proportional, commensurate, commensurable.

Ana. Corresponding, harmonizing, according (see **AGREE**).

proportional. Proportional, proportionate, proportionable, commensurate, commensurable are not closely synonymous terms, but they are often used without marked distinction because all mean being duly proportioned to something else. *Proportional*, *proportionate*, and *proportionable* all imply due proportions either to a related thing or things, or of things that are related, as by belonging to the same set, series, design, or construction, or by being the effect of a cause, the response to a stimulus or the like. **Proportional** is the preferred term when several things that are closely related to each other and must be proportioned to each other as in size, amount, number, length, or the like, are under consideration; as, a good architect knows that the dimensions of a building should be *proportional*; the circumferences of all circles are *proportional* to the lengths of their radii; the increase in number of teachers and of schools has not been *proportional* to the increase in the number of pupils; *proportional* representation. *Proportional* may be used, but *proportionate* is more often used, when the term is intended to imply the adjustment (sometimes, but not invariably, the deliberate adjustment) of one thing that bears a reciprocal relationship to another thing, so that both are in keeping with each other or not out of keeping with what is just, fair, due, reasonable, or the like; as, the punishment should be *proportionate* to the crime; the results were not *proportionate* to the exertions of the workers; the return is not *proportionate* to the investment; "Ponderous bodies forced into velocity move with violence *proportionate* to their weight" (*Johnson*); "They rushed into freedom and enjoyment...with an energy *proportional* to their previous restraint" (*G. L. Dickinson*). **Proportionable** is now comparatively rare in use: the term has been and still may be employed in place of either *proportional* or *proportionate*, especially when there is the intent also to imply a capacity, in the thing or things so qualified, for being regarded as observing due

proportions or as being properly adjusted to each other; as, they have five married children and a *proportionable* number of grandchildren; "For us to levy power *Proportionable* to the enemy is all impossible" (*Shak.*). *Commensurate* and *commensurable* differ from the preceding words chiefly in carrying a stronger implication of equality between things each of which has a measure, a degree, an intensity, or the like, that is dependent on its relation to the other or others (as, his productiveness is *commensurate* with [that is, neither exceeds nor falls short of] his display of energy; "the meagreness of the result was *commensurate* with the crudity of the methods" (*Buchan.*). Sometimes both terms, but especially *commensurable*, differ from the other words in implying a common scale of values by which outwardly different things can be shown to be equal or proportionate in some significant way; as, the delight produced by a beautiful lyric and that produced by an equally beautiful movement of a sonata are *commensurable* because both imply the evocation of a mood; two heroes *commensurate* only in distinction, for one was a hero of the battlefield and the other a hero of the moral sphere.

Ana. Adequate, *sufficient, competent: correspondent, correlative, *reciprocal: relative, contingent, *dependent

proportionate. *Proportional, proportionable, commensurate, commensurable.

Ana. Correspondent, correlative, *reciprocal: adequate, *sufficient, competent.

Ant. Disproportionate.

proposal. *Proposal, proposition*, as here compared, denote something which is proposed to another or others for consideration. Although the dividing lines between the two terms are not always clear-cut, especially in current English, the tendency to distinguish them sharply still prevails in strict usage. *Proposal* usually carries a clear suggestion of the act of proposing; thus, one receives a *proposal*, or entertains a *proposal*, or listens to a *proposal*. It also commonly implies an offer, as of oneself as a would-be husband, or of a given amount of money in return for the transferring of a piece of property or other valuable possession; as, a *proposal* of marriage; to submit a *proposal* to the owner to take care of his grounds for a small weekly wage. "He offered to sweep the floor of the gymnasium then and there. This *proposal* convinced the Skenes" (*Shaw*). But it may imply the suggestion of a scheme, a plan, a project, or the like, which may be accepted or rejected at the will of the person or persons to whom it is proposed; as, "[the Constitution] when it came from their [the framers'] hands, was a mere *proposal*, without obligation, or pretensions to it" (*Ch. Just. Marshall*); "expressing regret that no *proposal* having for its object the readmission of Master Byron to the academy could be entertained" (*Shaw*). *Proposition* in its strictest sense applies to a statement (usually an affirmative statement) that is propounded for discussion, argument, proof, or disproof; as, to demonstrate the truth of a *proposition*; at first sight the *proposition* seemed absurd; "It is a *proposition* too plain to be contested, that the constitution controls any legislative act repugnant to it" (*Ch. Just. Marshall*). The term is also applicable to any implied or expressed principle that is or may be questioned or is regarded from the point of view of its truth or its falsity. "What you think about the stars, Padre?" "The wise men tell us they are worlds, like ours, Jacinto." "I think not," he said in the tone of one who has considered a *proposition* fairly and rejected it. "I think they are leaders—great spirits" (*Cather*). *Proposition* has been and to a restricted extent still is used instead of *proposal* in the sense of a proposal made formally that some course of action be followed,

some policy be adopted, some honor granted, or the like. In this sense, the term rarely, in strict use, refers to personal or to business affairs; as, "We hold it essential to our success . . . that the *proposition* of Sir George Clerk should be adopted" (*Bp. S. Wilberforce*); "The medical major at the first post declares it [a certain heroic act] is impossible. He has to sign the *proposition* for the citation" (*Hemingway*). In looser colloquial use, *proposition* is often used where *proposal* is still regarded by authorities as the preferred word; as, if you wish to buy this land, make me a *proposition*.

propose. Purpose, *intend, mean, design.

Ana. *Aim, aspire: plan, plot, scheme, project (see under PLAN, *n.*).

proposition. *Proposal.

propriety. *Decorum, decency, etiquette, dignity.

Ana. Grace, *elegance, dignity: *form, usage, convention, convenience.

prorate. *Apportion, portion, parcel, ration.

prorogue. *Adjourn, dissolve.

Ant. Convoke.

prosaic. *Prosaic, prosy, matter-of-fact* come into comparison as meaning having a plain, practical, unimaginative, unemotional character or quality. *Prosaic*, as here considered, implies an opposition to *poetic* in the extended sense of the latter word. Although the term etymologically suggests the quality of prose, it seldom refers to literary prose, but rather to the ordinary language of men in communicating their wants, their ideas, or their experiences, or in rendering intelligible that which is difficult to understand or make clear; hence, *prosaic* usually implies a commonplace, unexciting quality, and the absence of everything that would stimulate feeling or awaken great interest; as, "To make verse speak the language of prose, without being *prosaic* . . . is one of the most arduous tasks a poet can undertake" (*Cowper*); "Let me have none of your *prosaic* curates" (*Gray*); a *prosaic* and humdrum life; "The eighteenth century, from the religious point of view, is a period of rather cold and *prosaic* common sense" (*Inge*). *Prosy*, on the other hand, suggests a relation to *prose*, the verb, rather than to *prose*, the noun, and heightens the implication in the former of turning that which is poetry or interesting prose into dull plain prose, as by paraphrasing or by translating. Consequently, *prosy* stresses extreme dullness or tediousness and usually, but not invariably, implies a tendency to talk or write at length in a boring or uninviting manner; as, *prosy* preachers; a hopelessly *prosy* book; "It is his special comfort to smoke a pipe and be *prosy* with some good-natured fellow, the dullest of his acquaintance" (*Scott*). *Matter-of-fact* stresses a concern for fact or for facts as well as lack of interest in that which is imaginative, speculative, visionary, romantic or ideal; sometimes it connotes accuracy in detail, but often it suggests concern only for the obvious and a neglect of the deeper or spiritual reality; as, a *matter-of-fact* account of his experience in an air raid; a *matter-of-fact* historian; "Mr. Rose had got so dreamy . . . that he felt . . . the necessity of turning a little more *matter-of-fact* again" (*W. H. Mallock*); "Faced with this *matter-of-fact* scepticism you are driven into pure metaphysics" (*Shaw*).

Ana. Practical, *practicable: humdrum, tedious, *irksome.

proscribe. *Sentence, condemn, damn, doom, attain.

proselyte. *Convert.

prospect, n. *Prospect, outlook, anticipation, foretaste* are here compared as meaning an advance realization of something to come, especially of something foreseen or

expected. *Prospect* and *outlook* both imply a conjuring up of a picture or mental vision of what the future holds in store for one. *Prospect*, however, is chiefly applied to particular events or situations, especially to those of interest to one as an individual and evocative of an emotional response. "The *prospect* of the Netherfield ball was extremely agreeable to every female of the family" (*Austen*). "He had just received a box of new books... and had preferred the *prospect* of a quiet Sunday at home" (*E. Wharton*). "She asked her father if the *prospect* of living always with his daughter and being taken care of by her affection... was such an awful *prospect*" (*Conrad*). *Outlook* suggests an attempt to forecast the future from the point of view of a thinker, such as an economist or a philosopher, or from that of a practical man, as a politician or businessman, who is concerned not only with immediate but remote possibilities, and who demands accuracy in detail and soundness in conclusions; as, the *outlook* for business has been declared favorable. "The *outlook*, domestic and international, was still what those who think in terms of colour call black" (*R. Macaulay*). *Anticipation* usually implies a prospect or outlook, but in addition it involves the implication of advance suffering or enjoyment of that which is envisioned. "Lord Beaconsfield once said that the worst evil one has to endure is the *anticipation* of the calamities that do not happen" (*A. C. Benson*). *Foretaste* also implies advance experience or prior enjoyment or suffering, but it does not necessarily connote (as does *anticipation*) a mental as distinguished from an actual experience. It implies sufficient experience to give one a hint of what is to come, but the experience, or taste, may be actual enjoyment or suffering or a fleeting but poignant anticipation of it. "A trifle of torture to the flesh... While soul is spared such *foretaste* of hell-fire, Is naught" (*Browning*). "Giving me Amid the fretful dwellings of mankind A *foretaste*... of the calm That Nature breathes among the hills and groves" (*Wordsworth*).

Ana. Hoping, expectation (see corresponding verbs at EXPECT): foreseeing or foresight, foreknowing or foreknowledge, divining or divination (see corresponding verbs at FORESEE).

prostrate. *Prone, supine, recumbent, reclining, couchant, dormant.

Ana. Flat, *level: abject (see MEAN).

prosy. *Prosaic, matter-of-fact.

Ana. *Inspid, jejune, banal, inane: *irksome, hum-drum, tedious.

protasis. *Introduction, prologue, induction, prelude, overture, preface, foreword, prolegomenon, proem, exordium, preamble, prolusion, avant-propos.

protean. *Changeable, changeful, variable, mutable.

protect. Shield, guard, safeguard, *defend.

Ana. *Save, preserve, conserve: *ensure, insure, assure: shelter, *harbor.

protectorate. *Possession, dependency, territory, colony, dominion, mandate.

protest, v. 1 Avouch, avow, affirm, aver, *assert, declare, predicate, warrant.

Ana. *Swear, affirm, asseverate, testify.

2 *Object, remonstrate, expostulate, kick.

Ana. *Oppose, resist, combat: *demur, scruple, balk.

Ant. Agree (sense 1).

prototype. Prototype, archetype, antitype, ectype are not all synonyms, but they are often used carelessly or incorrectly because not clearly distinguished. A *prototype* is the original, or the first instance, of something which is imitated or reproduced, with or without changes and improvements, so that its successors follow in series

and form a type, or kind of thing; as, the Roman republic is not the *prototype* of modern republics such as the United States of America; it is a question whether Langley's flying machine was the *prototype* of the airplane. An *archetype* is the pattern which serves as the model for all created things of the same kind. It may be ideal, that is, a conception in the mind of the creator; as, according to Plato, the Ideas are the *archetypes*, of which sensible things are only the copies: it may be real, that is, it may have concrete existence, and thus be the pattern for all future things of the same kind. In this latter sense, it is often used interchangeably with *prototype*; discriminating writers, however, distinguish the words, for *prototype* does not preclude the implication of change and progress, but *archetype* in effect does, since it stresses the determining influence of the pattern. "The House of Commons, the *archetype* of all the representative assemblies which now meet" (*Macaulay*). *Antitype* is often misused as though it were a compound of anti- and -type and not, as it actually is, a word directly derived from the Greek. Originally a theological and philosophical term, it is now found frequently in literary use. An antitype is that which corresponds to or gives real existence to something that is prefigured or foreshadowed by a type (that is, in a rare sense of this word, a person or a thing that serves as a symbol or sign of what is to come); thus, in theological use, Christ is the *antitype* of many persons and things in the Old Testament, such as the goat slain in the wilderness, the paschal lamb, and Melchizedek. In literary use, *antitype* often means the person or thing that realizes or gives substantial form to a poet's or artist's conception; as, more than one actual person has been identified as the *antitype* of Wordsworth's "Happy Warrior." An *ectype* (now rare even in philosophical use) is the person or thing that is a copy of an archetype, or a successor of a prototype; thus, the works of the Creator are called *ectypes* in contrast with his designs, or predetermined patterns, the *archetypes*.

Ana. Pattern, *model, example, exemplar.

protract. Prolong, *extend, lengthen, elongate.

Ana. *Delay, retard, slow, slacken: *defer, suspend, stay, postpone.

Ant. Curtail. — **Con.** *Shorten, abridge, abbreviate.

protrusion. *Projection, protuberance, bulge.

protuberance. *Projection, protrusion, bulge.

proud. 1 Proud, arrogant, haughty, lordly, insolent, overbearing, supercilious, disdainful come into comparison when they mean filled with or exhibiting a sense of one's superiority and scorn for that which is regarded as beneath one. *Proud* does not always imply presumption or suggest assumed rather than genuine superiority; on the contrary, it may be used in praise as well as in derogation, but in all instances it usually connotes a lofty or imposing manner, attitude, or appearance, that may be interpreted as dignified, elevated, spirited, imperious, satisfied, contemptuous, inordinately conceited, or the like, according to the circumstances. "Oh, why should the spirit of mortal be *proud*? Like a swift-fitting meteor, a fast-flying cloud... He passeth from life to his rest in the grave" (*W. Knox*). "A strange shy lovely girl whose face Was sweet with thought and *proud* with race" (*Masefield*). "The high spirit and *proud* resolution of a real aristocracy" (*Inge*). "He has nothing to be ashamed of in you—rather everything to be *proud* of" (*Meredith*). *Arrogant* implies a disposition to claim for oneself, often domineeringly or aggressively, more consideration than is warranted or justly due; as, an *arrogant* nobility was in part responsible for the French Revolution. "In holidays, the atmosphere of home is apt to be dominated by the young people. Consequently they tend

to become *arrogant* and hard" (*B. Russell*). **Haughty** implies a strong consciousness of exalted birth, station, or character, and a more or less obvious scorn of those who are beneath one. "Pride goeth before destruction, and an *haughty* spirit before a fall" (*Proverbs* xvi. 18). "There was a deferential manner in the bearing of the men towards her, which those *haughty* creatures accord not save to clever women" (*Meredith*). The last four words of this group are more specific than the preceding terms and refer more to the ways in which arrogance or haughtiness is exhibited than to the temperament or attitude. **Lordly** usually suggests pomposity, strutting, or a display of power or magnificence; as, *lordly* officials; the *lordly* captain of a ship. "See yonder... wight... Who begs a brother of the earth To give him leave to toil; And see his *lordly* fellow-worm The poor petition spurn" (*Burns*). **Insolent** implies both haughtiness and extreme contemptuousness; it carries a stronger implication than the preceding words of a will to insult or affront the person so treated; as, "she could not determine whether the silent contempt of the gentlemen, or the *insolent* smiles of the ladies, were more intolerable" (*Austen*). **Overbearing** suggests a bullying or tyrannical disposition, or intolerable insolence; as, an *overbearing* employer; an *overbearing* snob. "No one had loved Hendrik van der Berg; he had been too strong, too *overbearing* to be loved" (*S. Cloete*). **Supercilious** stresses the superficial aspects of haughtiness, such as a manner intended to repel advances; it refers to one's behavior to others rather than to one's conceit of oneself, though the latter is always implied: often, it suggests not only scorn but also incivility and occasionally covert curiosity. "They have no blood these people. Their voices, their *supercilious* eyes that look you up and down" (*Galtsworthy*). "*Supercilious* and *haughty*, they [camels] turn this way and that, like the dowagers of very aristocratic families at a plebeian evening party" (*A. Huxley*). **Disdainful** implies a more passionate scorn for that which is beneath one than does *supercilious*: it as often as not suggests justifiable pride or justifiable scorn. "He [Caesar] makes me [Antony] angry with him; for he seems Proud and *disdainful*, harping on what I am, Not what he knew I was" (*Shak.*). "Don Manuel Chavez... very elegant in velvet and broadcloth, with delicately cut, *disdainful* features,—one had only to see him cross the room... to feel the electric quality under his cold reserve" (*Cather*).

Ana. Contemptuous, scornful, disdainful (see corresponding nouns under **DESPISE**): pretentious, pompous, ostentatious (see **SHOWY**): imperious, domineering, *masterful.

Ant. Humble: ashamed.

2 Vain, vainglorious. See under **PRIDE**, **n.**

Ana. Exalted, magnified, aggrandized (see **EXALT**): self-satisfied, *complacent, smug: contented, satisfied (see **SATISFY**).

Ant. Ashamed: humble.

prove. **1** **Prove, try, test, demonstrate** come into comparison as meaning to establish a given or an implied contention or reach a convincing conclusion by means of evidence, argument, experiment, or any other appropriate means. The same distinctions in implications and connotations are evident in their corresponding nouns **proof, trial, test, demonstration** when they denote the process or the means by which a contention is established or a convincing conclusion is reached. **Prove and proof** (as here compared: see also **INDICATE**; **REASON**, **n.**, **1**) are the most widely useful of these terms, for they are not only employed in reference to contentions and conclusions, but also in reference to persons or things whose

strength, genuineness, fitness, or the like, is in question. When used in reference to contentions or to conclusions reached by study, they imply that evidence sufficient in amount and sufficiently reliable in its character has been adduced to bring conviction of the truth of the contentions or conclusions and to make other contentions or other conclusions untenable. "This proposition may or may not be true; at present there is certainly no evidence sufficient to *prove* it true" (*B. Russell*). "The legislation of the different colonies furnishes positive and indisputable *proof* of this fact" (*Ch. Just. Taney*). But *prove* and *proof* when used in reference to persons or things about which there is doubt in some particular imply the settlement of this doubt or the establishing of certainty of his or its strength, genuineness, fitness for use or service, or the like, as by subjecting the thing to an experiment or by giving the person a chance to manifest his quality in experience, or by other means such as assaying, verifying, checking, or the like; as, to *prove* the strength of gunpowder; to *prove* a cannon (cf. *proving* ground); to *prove* useful members of society; to *prove* one's courage in action; to put a man to the *proof*; to demand visible *proof* of one's love; the *proof* of gold; the *proof* of the pudding is in the eating. **Try and trial** (as here compared: see also **ATTEMPT**, **v.**; **TRIAL**, **2**) still carry implications from their earliest senses of to separate (or the separation of) the good from the bad in a person or thing and, therefore, stress not so much the conclusion reached as the process by which the guilt or innocence of a person is definitely proved, or a thing's genuineness or falsity, its worth or worthlessness, its degree of strength, validity, or the like, is definitely established; as, to *try* a person for theft; to *try* a case in court; "The question whether a right has vested or not, is, in its nature, judicial, and must be *tried* by the judicial authority" (*Ch. Just. Marshall*); "A boy does not like to be called a fool, and is usually ready to *try* the question with his fists" (*Meredith*); the *trial* of metal by fire; the medieval *trial* by combat; the new employee is on *trial*; to take a new vacuum cleaner on *trial*. **Test**, both as a verb and as a noun, implies a putting to decisive proof by means of experiment, use, experience, or comparison with a high standard, or through subjection to a thorough examination or trial for the sake of such proof or a determination of the facts; as, "Experience is the surest standard by which to *test* the real tendency of the existing constitution" (*Washington*); the careful scientist subjects every experiment to severe *tests*; to submit to an intelligence *test*; "The first time he [Don Quixote] made a helmet, he *tested* its capacity for resisting blows, and battered it out of shape; next time he did not *test* it but 'deemed' it to be a very good helmet" (*B. Russell*); "how well his writing has stood the *test* of time" (*L. P. Smith*). **Demonstrate and demonstration** (as here compared: see also **SHOW**, **v.**, **2**), imply the conclusive proof of a contention or the reaching of a conclusion about which there can be no doubt. In such use, *prove* and *demonstrate* and their corresponding nouns are not distinguishable except in the latter term's emphasis upon the resulting certainty or formality of method; as, "[Lyell] first imagined, and then *demonstrated*, that the geologic agencies are not explosive and cataclysmal, but steady and patient" (*C. W. Eliot*); "The schools knew that their society hung for life on the *demonstration* that God... was a reality" (*H. Adams*). In current use, there is a tendency to distinguish them and to employ *demonstrate* so that it implies scientific certainty based on sensible evidence or clear experiment; as, "these arguments [for the existence of God] are sometimes called *proofs*, though they are not *demonstrations*" (*Inge*).

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

Ana. Corroborate, verify, substantiate, *confirm: *justify, warrant.

Antf. Disprove.

2 *Indicate, betoken, attest, bespeak, argue.

Ana. Evidence, manifest, evince, *show, demonstrate.

provenance, provenience. *Origin, source, inception, root, prime mover.

root. Beginning, commencement, starting (see corresponding verbs at BEGIN).

provender. *Food, fodder, forage, victuals, viands, provisions, comestibles, grub, eats, chow.

proverb. Maxim, adage, motto, *saying, saw, epigram, aphorism, apothegm.

provided. *If.

providence. *Prudence, foresight, forethought, discretion.

Ana. *Care, solicitude, concern: thoughtfulness, consideration (see corresponding adjectives at THOUGHTFUL): frugality, thriftiness, economicalness or economy (see corresponding adjectives at SPARING).

Antf. Improvidence.

provident. Prudent, foresighted, forethoughted, discreet. See under PRUDENCE.

Ana. Careful, solicitude, concerned (see under CARE, *n.*):

*thoughtful, considerate: *sparing, economical, frugal, thrifty.

Antf. Improvident.

providential. *Lucky, fortunate, happy.

Ana. Benign, auspicious, propitious, *favorable: benignant, kindly, *kind.

province. 1 *Field, domain, sphere, territory, bailiwick.

Ana. *Boundary, border, frontier, march: *limit, confine, bound, end.

2 *Function, office, duty.

Ana. *Work, calling, pursuit, métier, business: *task, duty, job.

provisional. 1 **Provisional, tentative** come into comparison as meaning not final or definitive. That is **provisional** which is adopted only for the time being and will be discarded when the final or definitive form is established or the need of it no longer exists. **Provisional**, therefore, is used to describe something made or devised while its permanent successor is in process of formation or construction (as, a **provisional** government; a **provisional** arrangement) or when proper materials are lacking or there is no time for permanent construction (as, a **provisional** postage stamp; a **provisional** bridge). "The French ministers have taken up this equality of government only **provisionally**, reserving liberty to alter it according to occurrences" (*Bp. J. Hall*). That is **tentative** which is of the nature of a trial or experiment or which serves as a test of a thing's practicability or feasibility; as, to adopt a **tentative** order of procedure; "The awakening of the modern world to consciousness, and its first **tentative**, then fuller, then rapturous expression of it" (*J. R. Lowell*); "It would be folly to treat the first **tentative** results as final" (*Jeans*).

Ana. *Temporary: conditional, *dependent, contingent.

Antf. Definitive.

2 *Temporary, ad interim, acting, supply.

provisions. *Food, victuals, viands, comestibles, provender, fodder, forage, grub, eats, chow.

provoke. 1 **Provoke, excite, stimulate, pique, quicken, galvanize** come into comparison as meaning to rouse one into doing or feeling something, or to call something into existence by so rousing a person or persons. **Provoke** (etymologically, to call forth) stresses a power in the agent or agency sufficient to produce such an effect, but it is often the least explicit of these terms as to the nature

or character of that power; it is, therefore, the preferred term when nothing more is to be implied than the effecting of the stated result; as, "It is one of the misfortunes of the law that ideas become encysted in phrases and thereafter for a long time cease to **provoke** further analysis" (*Justice Holmes*); "It is not in... the emotions **provoked** by particular events in his life, that the poet is in any way remarkable or interesting" (*T. S. Eliot*); "What happens when we prolong and intensify the rubbing to such a degree that we **provoke** a spark?" (*Karl K. Darrow*). **Excite** carries so strong an implication of a rousing that stirs up, moves profoundly, serves as a challenge to one's powers, or the like, that the term is often used merely in the sense of to rouse in any of these ways; as, "the ideas which **excited** my own generation" (*G. W. Russell*); "Have I ever even felt inclined to write anything, until my emotions had been unduly **excited**, my brain immoderately stirred?" (*Galsworthy*). Often, however, **excite** adds to these implications those found in **provoke**, and thereby becomes a more explicit or richer word than the latter by suggesting the powerful or stirring nature of the agent or agency and the degree or intensity of the activity stirred up; as, "the curiosity **excited** by his long absence burst forth in... very direct questions" (*Austen*); "no stimulus was omitted to **excite** and inspire the imagination and the sense" (*G. L. Dickinson*). **Stimulate** suggests a provoking or exciting by, or more often, as if by, a prick, a spur, or a goad; sometimes, therefore, it connotes a rousing out of lethargy, indifference, inaction, or inactivity, or a bringing forth into play something that is latent, dormant, or quiescent; as, to **stimulate** the growth of plants by the use of fertilizers; "Mrs. Yeobright, in her anxiety for her niece's future, had mentioned this lover to **stimulate** the zeal of the other" (*Hardy*); "the stupidity of the opposition **stimulated** him, and made him resolute" (*Mencken*); "Memory must be constantly **stimulated** and helped" (*Grandgent*); "I have always believed that it is better to **stimulate** than to correct, to fortify rather than to punish" (*A. C. Benson*). Often, **stimulate** specifically implies excitement or re-excitement of interest, especially of a deep intellectual interest; as, "some subjects, which are remarkably **stimulating** to the mind of the pupil, are neglected, because they are not well adapted for examinations" (*Inge*); advertising designed to **stimulate** the public's waning interest. **Pique**, a term of far more restricted application, suggests provocation or stimulation by or as if by something that pricks or irritates; as, a show of secrecy always **piques** her curiosity; "make a distinct declaration that she is to think no more of you as a possible husband. That will **poke** her into accepting him" (*Hardy*). **Quicken** implies a stimulation of life, vigor, energy, or activity with consequent beneficial results; as, "The mistress which I serve **quickens** what's dead" (*Shak.*); "Some effluence from her **quickened** him" (*Bennett*); there has been a **quickening** of interest in minorities since Hitler came into power. **Galvanize** (etymologically, to treat or revive by the use of electricity) suggests a highly artificial stimulating or quickening, especially of that which is old, or stiff, or dying; as, "He seemed a mere automaton, **galvanized** into moving and speaking" (*Hardy*); "sonnet-cycles are a treasure-trove of conventions, distorted in a mistaken endeavor to **galvanize** them into life, into sheer grotesquerie" (*Lowes*).

Ana. Arouse, rouse, *stir: *thrill, electrify, enthuse: *incite, instigate, foment.

2 *Irritate, exasperate, nettle, aggravate, roil, peeve.

Ana. Affront, *offend, insult, outrage: *anger, incense, madden: agitate, upset, perturb (see DISCOMPOSE).

Antf. Gratify.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

prowess. *Heroism, valor, gallantry.

Ana. Bravery, boldness, audacity, intrepidity (see corresponding adjectives at **BRAVE**): *courage, mettle, spirit: strength, might, puissance, *power.

prowl, *v.* *Wander, stray, roam, ramble, rove, range, gad, gallivant, traipse, meander.

proximity. Proximity, propinquity are often used interchangeably because both denote nearness. Proximity, however, in good current use, commonly implies nearness in space: it may be used with reference to either persons or things found in the same vicinity or neighborhood (as, owing to its proximity to the sea, the town usually enjoys mild winters; "for centuries and centuries their [swallows'] nests have been placed in the closest proximity to man"—*Jefferies*; "affected much as he might have been by the proximity of a large dog of doubtful temper"—*Shaw*), or it may be used as an equivalent of *vicinity* or *neighborhood* (as, there was no inn in the proximity). Propinquity may imply proximity, but it then usually distinctively suggests closeness, sometimes even contact. "We read a book because it happens to be near us and it looks inviting. It is a case where propinquity is everything" (*S. M. Crothers*). It is more often used where proximity is not possible to imply nearness in relationship, closeness in association, in age, in tastes, or the like, or even closeness in time; as, relations within the fourth degree of propinquity; they are both cousins of his, but not in the same degree of propinquity; propinquity is a powerful aid in fostering attachments; events in close propinquity to each other. "If you can put up with a tumultuous propinquity of...football-man—you can travel up and down England at single fare [for the round trip] with a football team while its luck prevails in the Cup" (*Manchester Guardian*).

Ana. Nearness, closeness (see corresponding adjectives at **CLOSE**): adjacency, contiguity, juxtaposition (see corresponding adjectives at **ADJACENT**).

Ant. Distance.

proxy. Deputy, attorney, *agent, factor.

prudence. Prudence, providence, foresight, forethought, discretion come into comparison when they denote a quality that enables a person to choose the wise and sensible course, especially in managing his practical affairs. The same differences in implications and connotations are apparent in the adjectives **prudent**, **provident**, **foresighted**, **forethoughted**, **discreet** when they mean manifesting such a quality. Prudence and prudent (see also **WISE**) are the most comprehensive of these words, for they imply both that one does not act rashly or unadvisedly and that one has foreseen the probable consequences of one's act. Consequently, the terms usually imply caution and circumspection, but may or may not connote selfishness, mercenaryness, calculation, or other unpleasant qualities. "One is given reason and common sense and prudence that one may use them" (*A. C. Benson*). "That type of person who is conservative from prudence but revolutionary in his dreams" (*T. S. Eliot*). "What is the difference in matrimonial affairs, between the mercenary and the prudent motive?" (*Austen*). "An old fort...where the Filipinos, although outnumbering their assailants [Moros]... had judged it more prudent to hide than to fight" (*V. Heiser*). Providence and provident imply thought for the future, especially with reference to its difficulties and its needs and, usually, the provision in advance of that which will then be required. "Early and provident fear is the mother of safety" (*Burke*). "The creature who bears His image is intended to exercise providence" (*F. D. Maurice*). "I see your [Indian] tribe as a provident, rather thoughtful people, who made their livelihood secure by raising crops

and fowl" (*Cather*). Foresight and foresighted stress a power, usually the result of a highly developed intelligence, of seeing what is likely to happen and of being prepared for it. "The more we study the making of the principate, the more we shall be impressed with the grasp and foresight of its founder" (*Buchan*). "Incapable of the foresighted control and adjustment of action which are the essence of all the higher forms of behavior" (*Wm. McDougall*). Forethought and the less frequent forethoughted suggest rather due consideration of contingencies. "In choosing the Yankee dialect, I did not act without forethought" (*J. R. Lowell*). Discretion and discreet stress the qualities which make for prudence or compel prudent action, such as good judgment, caution, self-control, and the like. In early use, discretion and valor were thought of as complementary qualities; as, "The better part of valour is discretion" (*Shak.*); "You put too much wind to your sail; discretion and hardy valour are the twins of honour" (*Beaumont & Fletcher*). In later use, discretion and discreet often imply the power to restrain oneself when one is tempted to be temerarious, passionate, incensed, loquacious, or the like. "Prudence and discretion forbade me to appeal against this decision" (*A. C. Benson*). "I dare say he will be a discreeter man all his life, for the foolishness of his first choice" (*Austen*). "He [Octavian] had been marvellously patient and discreet" (*Buchan*). "Well, you don't give me away. You are very discreet" (*Cather*).

Ana. Caution, circumspection, calculation (see under **CAUTIOUS**): expediency, advisableness (see corresponding adjectives at **EXPEDIENT**): frugality, thriftiness or thrift (see corresponding adjectives at **SPARING**).

prudent. 1 Judicious, sensible, sane, *wise, sage, sapient.

Ana. *Intelligent, brilliant, bright, smart, alert: *shrewd, perspicacious, sagacious, astute: disciplined, schooled (see **TEACH**).

2 Provident, foresighted, forethoughted, discreet. See under **PRUDENCE**.

Ana. *Cautious, circumspect, calculating, wary: politic, *expedient, advisable: economical, frugal, thrifty, *sparing.

3 Prudent, prudential are sometimes confused in use. Prudent applies to persons, their acts, their words, or the like, and implies qualities of mind or character such as caution, circumspection, and thrift (see prudent under **PRUDENCE**), or as wisdom in practical affairs (see **WISE**); as, a prudent man; a prudent course; a prudent way of life. Prudential, on the other hand, applies not to individuals but either to habits, motives, policies, considerations, or the like, which are dictated or prescribed by prudence, especially by forethought, or business sense, practical wisdom, or the like (as, "in a prudential light it is certainly a very good match for her"—*Austen*; "A journalist like Andrew Lang lives by quoting. But no prudential motive could bring him the gift. It is, at bottom, a present from Nature"—*C. E. Montague*), or to committees, groups, associations, or the like, having charge of practical affairs such as expenditures, or exercising discretionary or advisory powers in regard to these (as, "the prudential men," the former designation, especially in New England, of a group of men selected to look after town affairs; a prudential investment society; the prudential committee of a Congregational church).

Ana. Politic, *expedient, advisable: advising, counseling (see corresponding nouns at **ADVICE**).

prune, *v.* *Preen, prank, prink, primp, perk up, doll up.

prying. *Curious, inquisitive, snoopy, nosy.

Ana. Meddlesome, officious, *impertinent, intrusive, obtrusive.

psalm. *Hymn, laud, canticle, antiphon, anthem, canon.
pseudepigrapha. *Apocrypha.

pseudonym. Pseudonym, alias, nom de guerre, pen-name, nom de plume, incognito, allonym agree in denoting a name other than one's true or legal name. Pseudonym usually implies assumption of the fictitious name; it more often suggests a creditable than a discreditable motive for one's attempt to conceal one's identity. Alias, in strict legal use, covers not only assumed names, but those ascribed by others; thus, a boy's true name may be John Potter but he is better known by the *alias* John Rhoads (Rhoads being his stepfather's name). In loose use, however, *alias* is associated with offenders against the law and usually connotes an attempt to free oneself, by a change of name, from the onus of a criminal record. **Nom de guerre** (a French phrase adopted in English) is a pseudonym assumed by one who seeks anonymity or freedom of scope, especially, but not invariably, as an adventurer, a critic, a controversialist, or the like; **pen name** or **nom de plume** (not a French formation) is the pseudonym of a writer. **Incognito** (sometimes, colloquially, *incog*), when it denotes a disguise that is a pseudonym or alias, suggests a desire to remain unrecognized or a polite fiction by which one avoids the honors due because of one's rank or eminence; as, the Prince of Wales often traveled under the *incognito* of Baron Chester. **Allonym**, a rarely used word, designates a pseudonym that is the name of another person; it therefore implies not only the intent to deceive but also to shift responsibility for one's acts.

psyche. *Mind, intellect, soul, brain, brains, intelligence, wit, wits.

psychiatrist, psychiatrist. *Neurologist, alienist, psychopathologist, psychotherapist, psychoanalyst.

psychic, psychical. *Mental, intellectual, intelligent, cerebral.

psychoanalyst. *Neurologist, psychiatrist, alienist, psychopathologist, psychotherapist.

psychopathologist, psychopathist, psychopath. *Neurologist, psychiatrist, alienist, psychotherapist, psychoanalyst.

psychosis. *Insanity, lunacy, mania, dementia.

psychotherapist. *Neurologist, psychiatrist, alienist, psychopathologist, psychoanalyst.

puberty, pubescence. *Youth, adolescence.

public, n. *Following, clientele, clientage, audience.

publication. Declaration, announcement, advertisement, proclamation, promulgation, broadcasting. See under DECLARE.

publicity. Publicity, propaganda, promotion, ballyhoo are here compared as meaning either a systematic effort to inform the public regarding something or the means or the matter used in such an effort. Each implies a specialized form of advertising. **Publicity**, in the sense here considered, is used often but not exclusively in reference to the activities of and the information disseminated by a person or persons in the employ of individuals, corporations, organizations, associations, institutions, and the like, that seek advertising through more or less indirect means in order to attract attention to themselves, their products, their objectives, or the like, or that wish to provide a source of authoritative information on matters concerning themselves that are of interest to the public; thus, the work of a theatrical press agent and of a public relations counsel is *publicity*; in the first case, for an actor or producer seeking favorable notices in the press; in the second, for a corporation or institution that seeks to control the kind of information regarding itself that is published. "Some of his

[Beau Brummell's] carefully planned speeches, always made in the presence of the right listener, are perfect of their kind—their kind being advertisement, or, as we say now, *publicity*" (*Lucas*). **Propaganda** was originally used in English as a short term for the Congregation for the Propagation of the Faith (*L. propaganda de fide*), a department of the Roman Curia having charge of foreign missions or of churches in recently settled countries. Since the Congregation's objectives were the spread and the maintenance of the faith (the Roman Catholic faith), the term came to be applied to the concerted or systematic efforts of any group that tries to convert others or to hold others to its way of thinking, and to the means employed and the matter circulated. In current English the term has both derogatory and underogatory use. In derogatory use it frequently implies publicity sought through objectionable, usually underhand, methods or for a cause that cannot work in the open, and with the intent to win over the gullible or the unwary; as, to attempt to undermine the people's faith in democracy by communistic *propaganda*. "To bring Antony to reason two things were needed. He [Augustus] must acquire an armed following of his own, by lavish expenditure and adroit *propaganda*" (*Buchan*). In nonderogatory use *propaganda* often implies the ends of convincing a prejudiced or ignorant public and of inducing it to accept something it is disposed to reject. Even in this use the word often suggests indirect methods. "The reformers continued their *propaganda* [for Arabic numerals], and now and then made a convert" (*Grandgent*). "Gradually the terror it [a leper colony] caused was lost through our educational *propaganda*" (*V. Heiser*). **Promotion** is specifically applied to the systematic efforts of a business organization to gain advance publicity for a new venture, a new product, a new issue of bonds, or the like, in order to ensure its favorable reception by the public when it is launched; as, a two months' campaign of *promotion* before the new issue of bonds was floated; \$50,000 was appropriated for the *promotion* of the company's new line of soups. **Ballyhoo** (originally the commotion caused by barkers of side shows at a circus) is a slang term indiscriminately applied to any kind of advertising, publicity, or promotion which the speaker or writer regards as sensational, insincere, misleading, unduly obtrusive, and the like; as, the candidate's preconvention campaign was attended with too much *ballyhoo*; the company was too conservative to indulge in *ballyhoo* in its advertising.

Ana. Advertisement, publication, announcement, promulgation, broadcasting (see under DECLARE).

publish. 1 *Declare, announce, advertise, proclaim, promulgate, broadcast.

Ana. Divulge, disclose, *reveal, discover: *communicate, impart: vent, ventilate, utter, broach, *express.

2 *Print.

publisher. See under PRINT, v.

puck. *Fairy, faery, fay, elf, sprite, pixy, gnome, dwarf, goblin, brownie, nix.

puerile. *Youthful, juvenile, boyish, virgin, virginal, maiden.

Ana. *Immature, unmatured, unripe, unfledged: raw, callow, green, *rude.

Ant. Adult.

puff, n. *Criticism, critique, review, blurb.

pugnacious. *Belligerent, bellicose, quarrelsome, contentious, litigious.

Ana. *Aggressive, militant, assertive, self-assertive, pushing.

Ant. Pacific.

puissance. Might, strength, arm, *power, force, energy.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

puissant. *Powerful, potent, forceful, forcible.

Ant. Impuissant.

pulchritudinous. Beauteous, good-looking, comely, bonny, pretty, handsome, fair, lovely, *beautiful.

pull, v. Pull, draw, drag, haul, hale, tug, tow, as here compared, agree in meaning to move in the direction determined by the person or thing that exerts force. Pull, the general term, is often accompanied by an adverb or adverbial phrase to indicate the direction; as, two locomotives *pull* the heavy train up the grade; to *pull* a person toward one; to *pull* down goods from a shelf; to *pull* out a drawer; he felt *pulled* this way and that way by duty and by ambition. Draw usually but not invariably implies a pulling forward or toward the person or thing that exerts the force; commonly it implies smoother and often gentler motion than *pull*; as, to *draw* a chair to the fireside; the coach was *drawn* by six horses; to *draw* a sled over the snow; to *draw* the curtains; to *draw* lots from an urn. In extended use *draw* often specifically implies a result dependent on a drawing, as by lot (as, to *draw* a prize; to *draw* a jury), or by extracting, steeping, or the like (as, to *draw* a tooth; to *draw* tea), or by an inferring (as, to *draw* a conclusion), or by attracting (as, "the parasol *drew* him like a magnet"—*E. Wharton*; the *drawing* power of a play), or a bringing forth or eliciting from a source of supply (as, to *draw* money from the bank; "a... being from whom we *draw* power and refreshment"—*Day Lewis*). Drag implies a pulling slowly and heavily after one (the agent or thing exerting force), as over the ground or a surface; it usually suggests active or passive resistance; as, the horses *dragged* the overturned carriage half a mile; the vessel *dragged* her moorings in the storm; *drag* the laden net to the shore; to *drag* logs to the river. "It was just like Lady Pinkerton... to have gone round to Hobart inciting him to *drag* Jane from my office" (*R. Macaulay*). "The attempt which is now being made to *drag* Anglicanism away from its history and traditions" (*Inge*). Haul, in its strictest use, which still prevails in Great Britain, implies a forcible pulling, sometimes a dragging; as, when the hawser fell into the water, there was no means of *hauling* the boat to shore; to *haul* down the sails; "That dangling figure was *hauled* up forty feet above the fountain" (*Dickens*). "Mr. Bennett gasped and doubled up but without relaxing his grasp... silently *hauled* Kim to his own tent" (*Kipling*). In American usage, *haul* often implies transportation, whether, as originally, in a vehicle or conveyance actually hauled by man or animal power or, later, one hauled by a locomotive, or the like, or even, as now, in an automotive vehicle; as, wagons *hauling* loads of wood; motor trucks *hauling* loads of gravel; laden barges were *hauled* through canals by horses walking on the shore; trains that *haul* coal from the mines to the storeyards. Hale was formerly often, but is now seldom, used in place of *haul* merely in the sense of pulling forcibly; as, "The rope that *haled* the buckets from the well" (*Tennyson*). When, however, the idea of constraint or compulsion, or of dragging to prison, is involved, either *haul* or *hale* is possible. "Saul... made havock of the church, entering into every house, and *haling* men and women committed them to prison" (*Acts* viii. 3). "A pretty thing that would be: the Senior Shipping Master of the Port of London *hauled* up in a police court and fined fifty pounds" (*Conrad*). "Rather than pay rates to be used in making Roman Catholics or even Anglo-Catholics of little English children, Non-conformist Protestant ratepayers will let themselves be *haled* before the magistrates" (*Shaw*). Tug implies a strenuous pulling, but it may or may not suggest actual movement; as, the child *tugged* at his father's hand; to

tug a car out of the mire with a team of oxen. "There sweat, there strain, *tug* the laborious oar" (*Roscommon*). Tow implies pulling or drawing by a rope or chain something which is not using, or is unable to use, its own power; as, to *tow* a ship (by means of a tugboat) into its berth; to *tow* a wrecked automobile to a garage.

pulsate. Pulsate, pulse, beat, throb, palpitate agree in meaning to manifest a rhythmical movement such as or similar to that which occurs in the circulatory system when blood is forced along by alternate contractions and distentions of the ventricles of the heart and of the arterial walls. The same distinctions in implications and connotations are to be found in the nouns *pulsation*, *pulse*, *beat*, *throb*, *palpitation* when they are used of this rhythmical movement or of one distinct step in it. Pulsate and pulsation carry few specific or distinguishing connotations, but they usually imply regularity, continuity, and vigor in the rhythm whether it is apparent in movements or in sounds; as, when the heart no longer *pulsates*, death occurs; the *pulsation* or *pulsations* of a motor engine. Pulse (the verb) is not common in scientific use, *pulsate* being the preferred term. For *pulse* (originally to push or drive) still carries a strong implication of impelled movement; in distinction from *pulsate* it usually also connotes a lively succession of spurts, waves, gushes, or the like; thus, the arteries *pulsate* (not *pulse*) as the blood *pulses* (not *pulsates*) through them. The term, however, is common in literary use, where it sometimes takes as its subject that which flows or moves in this fashion (as the blood) and at other times, that which evidences the rhythmical movement (as the heart or blood vessels); as, the *pulsing* waters of the sea. "It [the vivacity of Chaucer] *pulses* through any book of lyrics printed yesterday" (*Quiller-Couch*). "Eustacia... set inwardly *pulsing* by his words" (*Hardy*). "They move and breathe in an environment that *pulses* and glows" (*Mencken*). On the other hand, *pulse*, the noun, is chiefly a scientific term; even its figurative use is affected by or dependent on the term's meaning in medicine and physiology. In this sense, *pulse* usually denotes the number of pulsations of the arteries in a minute as observed commonly by feeling the radial artery of the wrist; as, a normal *pulse*; a rapid *pulse*; to feel a patient's *pulse*. *Pulse* often also implies reference to the regularity, vigor, and continuity of the pulsation; as, an intermittent *pulse*; a strong *pulse*; a fluttering *pulse*. "In his eardrums hammers his heavy *pulse*" (*Amy Lowell*). In figurative use *pulse*, when it does not take the place of *pulsation*, commonly is but an extension of the scientific use; as, the group felt the *pulse* of public opinion before they decided to announce their program. "Rome was the heart and *pulse* of the empire... and on its well-being hung the future of the civilized world" (*Buchan*). Beat (both verb and noun) is the ordinary nontechnical word often used in place of *pulsate* and *pulsation* and sometimes in place of *pulse*. It stresses, however, rhythmical recurrence of sounds more often than rhythmical and continuous alternation in movement; thus, one hears the *beat* of his heart or tries to still his *beating* heart. It is the preferred designation therefore for something that strikes the ear at regular intervals, such as the tick or ticks of a clock, a stroke or a series of strokes on a drum, and the accented syllable in verse or note in music; as, to hear a watch *beat*; the *beat* of a bird's wing against a window-pane; the *beating* of tom-toms. "[The Negro evangelist] *Beat* on the Bible till he wore it out Starting the jubilee revival shout" (*V. Lindsay*). "The 'fourteener' [a fourteen-syllable verse]... repels readers who have not the patience to accustom their ears and nerves to its *beat*" (*T. S. Eliot*). Both the noun and verb *throb* imply violent,

often painful, pulsation; either is preferred to *pulsate*, or *pulse*, or *beat* (or corresponding nouns), when there is the intent to imply excitement, strain, emotional stress, or the like; as, every nerve in his body *throbbed*. "Here is a captain, let him tell the tale; Your hearts will *throb* and weep to hear him speak" (*Shak.*). "Godfrey felt a great *throb*: there was one terror in his mind at that moment" (*G. Eliot*). *Palpitate* and *palpitation* imply rapid (often abnormally rapid and fluttering) pulsation; in medical use, the term commonly implies overexertion, violent emotion, or a diseased condition; as, to suffer from spells of *palpitation* of the heart. In extended use, however, the words often imply a rapid vibration, quivering, or shaking, without any connotation of something amiss. "Then, delicate and *palpitating* as a silver reed, she stood up in the soft light of the morning" (*Hewlett*). *Ana.* Vibrate, fluctuate, waver, oscillate (see *SWING*): quiver, shudder, quaver, tremble (see *SHAKE*).

pulsation. Pulse, beat, throb, palpitation. See under *PULSE*.

pulse, n. Pulsation, beat, throb, palpitation. See under *PULSE*.

Ana. *Rhythm, cadence, meter: vibration, fluctuation (see corresponding verbs at *SWING*).

pulse, v. *Pulsate, beat, throb, palpitate.

Ana. *Move, drive, impel: vibrate, fluctuate, oscillate (see *SWING*).

pummel, v. *Beat, pound, buffet, baste, belabor, thrash, thresh.

Ana. *Strike, hit, smite, slug, punch.

punch, v. 1 *Strike, hit, smite, slug, slap, swat, clout, box, cuff.

Ana. *Beat, pound, pummel, baste, belabor.

2 *Perforate, puncture, prick, bore, drill.

Ana. Pierce, penetrate, probe, *enter.

punctilious. Punctual, meticulous, scrupulous, *careful
Ana. Particular, fussy, squeamish, fastidious, *nice: formal, conventional, ceremonious, *ceremonial.

punctual. Punctilious, meticulous, scrupulous, *careful
Ana. *Quick, prompt, ready: precise, *correct, nice, right.

puncture, v. *Perforate, punch, prick, bore, drill.

Ana. Pierce, penetrate (see *ENTER*): deflate, shrink (see *CONTRACT, v.*).

pungent. Pungent, piquant, poignant, racy, spicy, snappy come into comparison when they mean characterized by sharpness, zest, and piercing or gripping power. *Pungent* literally has reference to taste or smell and implies the stinging, pricking, or penetrating quality associated with that which is biting, acrid, caustic, or the like; as, *pungent* ginger ale; the *pungent* odor of ammonia; "a most *pungent* and sickening stench" (*Kipling*). In its figurative sense the word carries implications of great telling power or driving force, or of a capacity for exciting or stimulating keen attention or interest; as, his *pungent* wit; "If you would be *pungent*, be brief; for it is with words as with sunbeams—the more they are condensed, the deeper they burn" (*Southey*); "the *pungent* elegance of Pope" (*Hunt*); "The acidity of the lemon will very aptly figure *pungency* of raillery" (*Johnson*). *Piquant* literally has reference to a taste that is tart or pleasantly pungent to a degree that whets the appetite; as, a *piquant* sauce; a *piquant* flavor. In its figurative sense it applies to that which has an exciting savor or character that lifts it above the usual, or distinguishes it from the ordinary and gives it a zest, charm, or other quality that is peculiarly its own; as, "a little volume of verse...neat, lively, *piquant*" (*Macaulay*); "Often a drop of irony into an indifferent situation ren-

ders the whole *piquant*" (*Hardy*); "She made a *piquant*, pretty show, with her thirty years, and her agreeable, slightly roguish face" (*Bennett*). *Poignant* (as here compared: see also *MOVING*) originally applied either to that which literally cuts or pierces deeply (as, a *poignant* spear) or to that which is pungent to the taste or smell (as, "*poignant* sauce"—*Chaucer*; "the rich, *poignant* perfume"—*N. Hawthorne*). In current use it often applies to emotions that are keenly or deeply felt, or to experiences, words, or the like, that produce such emotions or have the power to pierce one's inmost consciousness; as, *poignant* sorrow; *poignant* memories; "tenderness...so *poignant* that perhaps neither of us knew whether it was joy or pain" (*H. Ellis*); "Which do you think is more *poignant*? Regret for what one has not done or remorse for what one has? I think regret" (*C. Mackenzie*). *Racy* literally has reference to that which has the peculiar character, taste, or piquancy associated with a thing of its kind in its best and, often, its freshest condition; as, *racy* cider; *racy* grapes; the *racy* flavor of some mushrooms. The term is now more often used in an extended sense, implying such qualities as native verve, dash, vitality, or tang, and the absence of all signs of decadence, sophistication, effiteness, or the like; as, "pure 'mother English,' *racy* and fresh with idiomatic graces" (*De Quincey*); "Yorkshire has such families here and there...peculiar, *racy*, vigorous; of good blood and strong brain" (*C. Brontë*); "The free and *racy* spirit of the soil had been banished from its [Barcelona's] amusements leaving a tame vacuity only too familiar at home" (*H. Ellis*). *Spicy* applies literally to that which has the piquant taste of a food seasoned or flavored with or as if with spice or an odor redolent of spice (as, a *spicy* cake; the *spicy* odors emanating from the kitchen), but in the extended sense in which it is here chiefly considered it usually implies the addition of qualities which give the thing affected decided piquancy or a pointed, often sensational, character, or in some use, a touch of smartness, of spiritedness, of scandalousness, or the like (as, *spicy* criticism; a clever *spicy* style; a columnist's *spicy* gossip). *Snappy* applies literally to that which emits shooting sparks or a series of sharp, quick reports (as, a *snappy* fire), but in slangy colloquial use it implies a somewhat comparable show of vitality, animation, smartness, or the like (as, a *snappy* young woman; *snappy* conversation; a *snappy* car).

Ana. *Incisive, trenchant, biting, cutting: penetrating, piercing, probing (see *ENTER*): exciting, stimulating, provoking or provocative (see corresponding verbs at *PROVOKE*).

Ant. Bland.

punish. Punish, chastise, castigate, chasten, discipline, correct agree in meaning to inflict pain, loss, or other suffering upon a person for his sin, crime, or fault. *Punish* implies violation of law, disobedience of authority, or intentional wrongdoing and subjection to the penalty imposed; as, "If ye will not...hearken unto me, then I will *punish* you" (*Leviticus* xxvii. 18); "no misdemeanour should be *punished* more severely than the most atrocious felonies" (*Macaulay*). *Chastise*, in literal use, commonly suggests the infliction of corporal punishment, sometimes in anger, often with a view to reformation or amendment. "My father hath *chastised* you with whips, but I will *chastise* you with scorpions" (*1 Kings* xii. 11); "All-sufficing nature can *chastise* Those who transgress her law" (*Shelley*). *Castigate*, once close to *chastise*, now implies severe, and often public, lashing by tongue or pen rather than by whip or rod, and so suggests painful censure or bitter rebuke. "Mr. Lowell...who courageously patronizes democracy in England, and with equal courage *castigates* it at home" (*Brownell*). *Chasten*

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

usually implies subjection to affliction or trial greater than is deserved: it therefore suggests as an aim, not punishment, but a testing whereby one may emerge humbled and purified or strengthened. "For whom the Lord loveth he chasteneth.... If ye endure chastening, God dealeth with you as with sons" (*Hebrews* xii. 6-7).

Discipline (see also **TEACH**) implies punishment, chastisement, or sometimes chastening, with the intent to subjugate, subdue, or bring under one's control; as, to *discipline* striking students by taking away certain privileges; these children show that they have never been *disciplined*. "But can he be *disciplined*...?" "Oh, there is no question of discipline! He has been a little potentate too long" (*Calher*). **Correct** implies punishment having for its aim the amendment or reformation of the offender. "His faults lie open to the laws; let them, Not you, correct him" (*Shak.*).

Ana. *Penalize, fine, amerce, mulct: *imprison, incarcerate, immure: *avenge, revenge.

Ant. Excuse: pardon. — **Con.** *Exculpate, acquit, exonerate, absolve, vindicate.

puny. *Petty, trivial, trifling, paltry, measly, picayunish, picayune.

Ana. Feeble, *weak, frail, infirm: *small, little, diminutive: slight, tenuous (see **TUN**, *adj.*).

pupil. *Scholar, student, disciple.

purblind. *Blind, sightless.

purchasable. *Vendible, salable, marketable.

Ana. *Mercenary, venal, hireling.

purchase, v. *Buy.

Ana. Hire, *employ: gain, win, earn, *get, obtain, procure, secure.

pure. 1 **Pure, absolute, simple, sheer** are here compared as used in the sciences, the arts, and to a certain extent, in philosophy. They agree in denoting free from everything that is foreign to the true nature or the essential character of the thing specified. **Pure** distinctively suggests freedom from intermixture. When applied to concrete things, it usually implies lack of contamination, adulteration, or pollution; as, *pure* water; a *pure* breed. When applied to an abstraction or to a concrete example of an abstraction, it implies the absence of everything that would obscure the thing in its essence or in its ideal character; as, *pure* poetry (poetry entirely free of prosaic elements); *pure* science (science where knowledge, and not the application of such knowledge, is the end). "This division into Realism and Romance... is the main cleavage in all the Arts; but it is hard to find *pure* examples of either kind" (*Galsworthy*). **Absolute** implies freedom from relation to or dependence on anything else; it is applied chiefly to abstractions such as space, time, and magnitude, viewed independently of experience and considered in their ultimate ideal character. Thus, "*absolute* space," as used in physics, is space conceived of as apart from the things which occupy it, and which limit or determine the ordinary person's notion of it. Because of such use, *absolute* often comes close to *real*, as opposed to *apparent*. "*Absolute* music," in musical theory, is music that depends solely on the distinctive properties of that art, such as tone, harmony, and rhythm, to produce its effects, and avoids, in contrast to "program music," all suggestion or characterization of external things. **Absolute** is applied to substances less often than is *pure*, but both are applied to alcohol: *pure* alcohol retains a modicum of water; *absolute* alcohol is completely dehydrated. **Simple** stresses singleness of character and is distinguished from that which is *compound* or *complex*. In very precise use it connotes homogeneity and incapacity for analysis or further reduction; as, an element is a *simple*

substance; "quality" and "relation" are *simple* notions. **Simple**, as applied to abstractions or conceptions, often suggests artificial freedom from complexity, and sometimes also unreality or untruth, when the simplicity is attained by eliminating essential factors. "The world to which your philosophy-professor introduces you is *simple*... The contradictions of real life are absent from it" (*W. James*). **Sheer**, more than any of these words, tends to lose its significance and to become a mere intensive; as, *sheer* nonsense. However, in precise use, it still implies such a dissociation from everything else that the pure and essential character of the quality (trait, virtue, power, or the like) to which it is applied is clearly displayed. "The 'Ancient Mariner'... is a work of *sheer* imagination" (*Loues*).

Ana. Elemental, *elementary: *clear, transparent, lucid, limpid: genuine, *authentic.

Ant. Contaminated, polluted: adulterated (*of foods, metals, etc.*): applied (*of science*).

2 *Chaste, modest, decent.

Ana. *Clean, cleanly: virtuous, *moral, ethical.

Ant. Impure: immoral.

purgation. *Purification, catharsis, ablution, lustration.

purgative. *Physic, cathartic, purge, laxative, aperient
purge, n. *Physic, cathartic, purgative, laxative, aperient.

purification. **Purification, ablution, lustration, purgation, catharsis** are synonyms in their etymological meanings, all of them denoting a cleansing. In their extended and figurative senses they do not lose this common denotation but they diverge so widely in their applications, especially in ceremonial use, that they are seldom interchangeable. **Purification** always implies prior defilement or pollution. It covers a variety of symbolic rites involving washing, particularly in orthodox Jewish practice; in Christian use it refers particularly to the expiation of sin, as through repentance, penance, or sacramental confession. **Ablution**, though literally meaning washing, does not in its liturgical use imply purification but prevention of profanation. To ensure the consumption of all particles of the consecrated bread and wine, the priest performs *ablution* after the Communion of the Mass by rinsing his index finger and thumb and the inside of the chalice and drinking this liquid. "The moving waters at their priestlike task Of *pure* *ablution* round earth's human shores" (*Keats*). **Lustration**, in strict use, is applicable only to certain purificatory ceremonies of the ancients, especially of the ancient Romans, as the cleansing of the people every five years after the census (the *lustrum*), or of a city after a plague, or of a fleet ready to depart. *Lustration* does not necessarily connote use of water, for fire, air, and other cleansing agents were used. Nor was it restricted to physical cleansing, for it often implied removal of bloodguiltiness. In best figurative use it connotes purification on a large scale. "St. Peter's mind is full of the Deluge as a type of the world's *lustration*" (*F. W. Farrar*). **Purgation** and its Greek equivalent **catharsis** always imply the elimination or discharge of impurities. Both are more often applied to a freeing of the soul or mind from that which interferes with spiritual or mental health than to a ceremony of purification. **Purgation** explicitly suggests the elimination of desires and interests that are sinful or hamper attainment of spiritual perfection. "Its [the soul's] attempts to eliminate by discipline and mortification all that stands in the way of its progress towards union with God constitute *Purgation*: a state of pain and effort" (*E. Underhill*). **Catharsis** was effectually introduced into English in Butcher's translation of Aristotle's description of the effect of tragedy as "through pity and fear effect-

ing a *catharsis* of these emotions." It has come to imply the attainment of emotional balance through actual or vicarious suffering that provides an outlet for disturbing emotions and cleanses them of what is morbid or selfish. "And what a tragic *catharsis* it may prove, a universal purge of evil passion!" (*Yale Review*).

purloin. *Steal, pilfer, filch, lift, pinch, snitch, swipe, cop. *Ana.* Abstract, *detach: *rob, plunder, rifle, loot, thief, burglarize: *defalcate, peculate, embezzle.

purpose, v. Propose, design, *intend, mean.

Ana. Meditate, *ponder: *consider, revolve, contemplate: plan, plot, scheme, project (see under PLAN, *n.*): determine, *decide.

purpose, n. *Intention, intent, design, aim, end, object, objective, goal.

Ana. *Ambition, aspiration: proposition, *proposal: determination, *decision: *plan, project, scheme.

pursue. *Follow, chase, trail, tag, tail.

Ana. *Persevere, persist: *practice, exercise: persecute, oppress (see WRONG, *adj.*): hound, ride, *bait, badger.

Con. Flee, fly, *escape: avoid, evade, elude, shun (see ESCAPE).

pursuit. Calling, occupation, employment, *work, métier, business.

purvey. *Cater, pander.

Ana. *Furnish, equip, outfit.

purview. *Range, reach, scope, compass, sweep, gamut, radius, ken, horizon, orbit.

push, v. Push, shove, thrust, propel come into comparison when they mean to use pressure or force upon a thing so as to make it move ahead or aside. Push implies the application of force by a body (often, but not necessarily, a person) already in contact with the body to be moved onward, aside, out of one's way, or the like; as, a boy pushing a wheelbarrow along the road; to push a door open; to push a man over a cliff; an extra locomotive was needed at the rear to push the long train up the grade; to push the excited children into another room. Shove often differs from push in carrying a stronger implication of the exercise of muscular strength and of forcing something along a surface such as the ground or a floor; as, the boys shoved the heavy chairs and tables from the center of the room up against the walls; it took three men to shove the piano into the adjoining room. Often, when muscular exertion is not strongly implied, haste, or roughness, or rudeness in pushing is suggested; as, he shoved the paper into his pocket; to shove the articles on the desk into a box; to shove a person out of one's way; to shove the platter across the table. Thrust, as here compared, differs from push, especially in its chief current senses, in carrying a weaker implication of steadiness or continuousness in the application of force and a stronger suggestion of rapidity in the movement effected or of violence in the force that is used: oftentimes, also, the use of actual physical force is not clearly implied; as, "They... thrust him out of the city" (*Luke* iv. 28-29); "Abraham... thrust the old man out of his tent" (*Jer. Taylor*); "Mark first that youth who takes the foremost place, And thrust his person full into your face" (*Pope*). Often, also, it implies the sudden and forcible pushing of a weapon, implement, or instrument, or of something held in one's hand, so that it enters into the thing at which it is aimed; as, to thrust (not push or shove) a spear into an opponent's breast; to thrust a spade into the ground; to thrust a bunch of flowers into her hand. Propel implies a driving forward or onward by a force or power that imparts motion. In some use, it still implies pressure exerted from outside or behind, usually, but far from invariably, by some power that is not human; as, boats propelled by the wind; "the flow of air

which propels the slow-sailing clouds" (*Lowes*); he grasped him by the collar and propelled him toward the door; "she walked—as if she were being propelled from the outside, by a force that she neither knew nor could control" (*A. Tate*). It is the preferred term, however, when the use of a mechanical aid (often called a propeller), or of some kind of actuating power, such as steam or electrical power, is implied; as, ships propelled by steam; a galley propelled by fifty oars; automobiles are usually propelled by internal-combustion engines.

In their figurative senses, push implies a pressing or urging forward, as with insistence, with vigor, with impetuosity, or the like, so that one's end may be gained, one's work may be completed, or one's goal be reached; as, to push the war into the enemy's country; to push a bill through Congress; to push one's theory to an extreme; to push oneself too hard in striving to attain one's ends. Shove often suggests obtrusiveness or intrusiveness or lack of firmness in making a way for oneself or another; as, to shove oneself into society; to shove a relative into a high appointive office. Thrust implies a forcing upon others of something that is not wanted, desired, or sought for; as, "some have greatness thrust upon 'em" (*Shak.*); "Amy had a grievance... because Sophia had recently thrust upon her a fresh method of cooking green vegetables" (*Bennett*). Propel is sometimes used in place of impel when a strong inner urge or appetite is implied as pushing one on to that which one desires; as, wolves at their very doors, propelled there by hunger.

Ana. *Move, drive, impel: *force, compel, constrain, oblige.

push, n. *Battle, engagement, action.

pushing. *Aggressive, militant, assertive, self-assertive.

Ana. *Vigorous, energetic, strenuous: officious, intrusive, obtrusive (see IMPERTINENT): self-confident, confident, self-assured, assured (see corresponding nouns at CONFIDENCE).

pusillanimous. *Cowardly, poltroon, craven, dastardly, recreant.

Ana. Timorous, *timid: apprehensive, *fearful, afraid: *contemtable, despicable, sorry, scurvy.

Ant. Courageous.

pus, n. *Face, countenance, visage, physiognomy, mug.

putative. *Supposed, supposititious, suppositious, reputed, conjectural, hypothetical.

Ana. Alleged, advanced (see ADDUCE): assumed, pretended, simulated (see ASSUME).

putrefy. Rot, decompose, *decay, spoil, disintegrate, crumble.

Ana. Corrupt, vitiate, deprave, *debase: dissolve, deliquescence (see LIQUEFY).

putrid. Fetid, noisome, stinking, *malodorous, rank, rancid, fusty, musty.

Ana. Decomposed, decayed, rotten, putrefied (see DECAY): corrupted, vitiated (see DEBASE).

putsch. *Rebellion, revolution, uprising, revolt, insurrection, mutiny.

put up. *Reside, live, dwell, sojourn, lodge, stay, stop.

puzzle, v. Puzzle, perplex, mystify, bewilder, distract, nonplus, confound, dumfound (or dumbfound) come into comparison when they mean to disturb and baffle mentally or to cause to be so disturbed and baffled. The first three words express various mental reactions to what is intricate, complicated, or involved. Puzzle implies such complication or intricacy that the mind finds it exceedingly, often distressingly, difficult to understand or to solve. "A great poet may tax our brains, but he ought not to puzzle our wits" (*Birrell*). "Every economic, political, psychological and moral problem that has puzzled civilized men for 2500 years" (*Lippmann*). Perplex adds to

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

puzzle the implications of worry and uncertainty, especially about reaching a decision on a course of action or the right solution of a personal problem. "Then must you speak Of one that loved not wisely but too well; Of one not easily jealous, but being wrought *Perplex'd* in the extreme" (*Shak.*). "Undaunted still, though wearied and *perplexed*" (*Cowper*). To **mystify** is to perplex, sometimes by playing upon one's credulity, but more often by concealing important facts or factors or by obscuring issues. "When she [Elizabeth] was weary of *mystifying* foreign statesmen, she turned to find fresh sport in *mystifying* her own ministers" (*J. R. Green*). **Bewilder** often implies perplexity, but it stresses a confused state of mind that makes clear thinking practically impossible; as, to be *bewildered* by contradictory statements or orders; "the *bewildering* flux of modern life" (*Day Lewis*). "Do not run to the Socialists or the Capitalists, or to your favorite newspaper, to make up your mind for you: they will only unsettle and *bewilder* you" (*Show*). **Distract** implies strong agitation arising from divergent or conflicting considerations or interests; as, "*distracted* between love and duty" (*Byron*). "She seemed nervous and *distracted*, kept glancing over her shoulder, and crushing her handkerchief up in her hands" (*Cather*). The last three words imply less mental disturbance and distress than some of the preceding terms, but they heighten the implication of bafflement and mental confusion. **Nonplus** implies blankness of mind or utter inability to find anything worth saying or doing. "The Problem which *nonplusses* the

wisest heads on this Planet, has become quite a familiar companion of mine. What is Reality?" (*L. P. Smith*). **Confound** (see also **MISTAKE**) implies mental confusion, but it stresses the implication either of mental paralysis or of profound astonishment. "So spake the son of God; and Satan stood A while as mute, *confounded*" (*Milton*). "Language to him is a means of communication with his fellows, and not a fine art cultivated for art's sake. He does not wish to dazzle or *confound* his friends, but only to make himself understood" (*S. M. Crothers*). **Dumbfound** (etymologically, to confound so as to strike dumb) in colloquial language tends to replace *confound*. Originally the term came close to *nonplus*, but it carried a stronger connotation of momentary mental paralysis; as, "to cramp and *dumbfound* his opponents" (*Sterne*); "I cannot wriggle out of it; I am *dumbfounded*" (*Darwin*); *dumbfounded* by the beauty of the scene; he stood *dumbfounded* with astonishment; "He captured the public and *dumbfounded* the critics" (*J. A. Macy*). In current use, *dumbfound* often so strongly implies astonishment that it is used in place of *astound*. "I was *dumbfounded* to hear him say that I was on a Quixotic enterprise" (*W. Lawrence*).

Ana. Amaze, astound, flabbergast (see **SURPRISE**): *confuse, muddle, bemuddle, addle: *embarrass, disconcert, discomfit.

puzzle, n. *Mystery, problem, enigma, riddle, conundrum.

pygmy. *Dwarf, midget, manikin, homunculus, runt.

Q

quack, n. *Impostor, faker, empiric, mountebank, charlatan.

Ana. Pretender, simulator, counterfeiter, shammer (see corresponding verbs at **ASSUME**): *deceit, duplicity, dissimulation, cunning, guile.

quail, v. *Recoil, shrink, flinch, wince, blench.

Ana. Cower, cringe (see **FAWN**): falter, waver, vacillate, *hesitate: quake, quaver, tremble, shudder (see **SHAKE**).

quaint. *Strange, odd, queer, outlandish, curious, peculiar, eccentric, erratic, singular, unique.

Ana. *Fantastic, bizarre, grotesque: droll, funny, *laughable: archaic, antiquated, antique (see **OLD**).

quake, v. *Shake, tremble, totter, quiver, shiver, shudder, quaver, wobble, teeter, shimmy, didder, dither.

Ana. Quail, shrink, *recoil: vibrate, fluctuate, waver (see **SWING**): falter, vacillate, *hesitate.

qualified. Competent, capable, *able.

Ana. Trained, instructed, disciplined (see **TEACH**): examined, quizzed, catechized (see **ASK**): tested, tried, proved (see **PROVE**).

Ant. Unqualified.

qualify. *Moderate, temper, attemper.

Ana. Modify, vary, alter, *change: *adapt, adjust, conform, accommodate, reconcile.

quality. **Quality, property, character, attribute, accident** are synonymous terms when they denote one of the intelligible marks or indications by means of which a thing may be identified or its constitution be understood. **Quality** is the term of widest application and may designate any of these marks, material or immaterial, individual or generic; as, distinguishing *qualities* of iron are resistance to fracture (tensile strength) and corrosive-

ness. "There was only one *quality* in a woman that appealed to him—charm" (*Galsworthy*). "The persistent contemporariness that is a *quality* of all good art" (*A. Huxley*). "The man was much greater than the sum of his *qualities*" (*Cather*). A **property** is a quality that is proper to the species or type; it, therefore, belongs to a thing by virtue of that thing's true or essential nature. "Sir Joseph Thomson. . . pointed out that weight is only an 'apparently' invariable *property* of matter" (*H. Ellis*). "Religion. . . is never found pure, and it is not at all easy to isolate it in order to learn its *properties*" (*Inge*). A **character** is a peculiar or distinctive quality of a class more often than of an individual. It is not today common in general use but is often found in scientific and philosophical writing with reference to the properties which distinguish a species (hence *specific characters*) from its generic properties; as, wheat and oats have common *properties*, but they are distinguished by certain *specific characters*. An **attribute** is a quality that is ascribed to a thing. In very precise use, it often implies a lack of definite knowledge of the thing in question; thus, one can speak of the *attributes* of God, meaning the qualities men ascribe to him. "Historical personages become invested with romantic *attributes*" (*T. Wright*). Sometimes, especially in law and philosophy, *attribute* denotes a quality that must belong to a thing by reason of its nature. "Mercy is. . . an *attribute* to God himself" (*Shak.*). "They [the States] possessed it [power to regulate commerce] as an inseparable *attribute* of sovereignty" (*Ch. Just. Marshall*). An **accident** is merely a quality; in philosophical use, however, it often means one of the qualities by which a thing manifests itself, and implies, therefore, a contrast with something deeper; that is, the

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

substance—or the real, but unapparent, nature—of the thing. "Waves [on a Japanese artist's screen] such as these, divested of all *accident* of appearance, in their naked impetus of movement and recoil" (*Binyon*). In general use, however, *accident* usually implies fortuitousness or lack of intrinsic value. "Rhyme is... an *accident* rather than an essential of verse" (*Loves*).

Ana. Predication, affirmation (see corresponding verbs at ASSERT): peculiarity, individuality, characteristic (see corresponding adjectives at CHARACTERISTIC).

qualm. *Qualm, scruple, compunction, demur* come into comparison when they denote a feeling of doubt or hesitation as to the rightness or wisdom of something one is doing or is about to do. *Qualm* (etymologically, a sudden illness, esp. nausea) implies an uneasy, often a sickening, sensation that one is not following the dictates of his conscience or of his better judgment; as, he is often tempted to lie, but is always deterred by *qualms* of conscience; "how few little girls can squash insects and kill rabbits without a *qualm*" (*R. Macaulay*); "I had *qualms* about setting forth over the treacherous waters of the China Sea, because the skipper had fortified himself with such huge quantities of alcohol" (*V. Heiser*). *Scruple* implies more or less mental disturbance occasioned by doubt of the rightness, the propriety, the fairness, or, sometimes, the outcome of an act: it may or may not imply an overnice conscience or an extremely delicate sense of honor; as, she has no *scruples* about carrying away any of my books; "some craven *scruple* Of thinking too precisely on the event, A thought which, quarter'd, hath but one part wisdom And ever three parts coward" (*Shak.*); "You are fairly safe in keeping your money at a big bank, and need have no *scruple* about availing yourself of its readiness to oblige you" (*Shaw*); "I respect your *scruple*, sir; but in this case I believe true delicacy requires you to do as I ask" (*E. Wharton*). *Compunction* (as here compared: see also PENITENCE) implies a prick or sting of conscience that warns a person that he is about to commit (or is committing) a sin, crime, or, now more often, slight offense, or is about to inflict (or is inflicting) a wrong or injustice; as, he had not the slightest *compunction* in pulling apples from his neighbors' trees; "he... felt little stirrings of *compunction* at getting married without his mother's knowledge" (*M. Austin*). *Demur* stresses hesitation to such an extent that it carries a stronger implication of delay than any of the other terms: it usually suggests, however, a delay caused by objections or irresolution rather than by an awakened conscience or by a scruple or compunction. "His own possessions, safety, life, he would have hazarded for Lucie and her child, without a moment's *demur*" (*Dickens*). "Rather than be brought into court he will pay without *demur*" (*Shaw*).

Ana. Misgiving, *apprehension, foreboding, presentiment: doubt, mistrust, suspicion, *uncertainty.

quandary. *Predicament, dilemma, plight, scrape, fix, jam, pickle.

Ana. *Juncture, pass, exigency, emergency, contingency, crisis: *difficulty, hardship, vicissitude: puzzling or puzzle, mystification, perplexity, bewilderment (see corresponding verbs at PUZZLE).

quantity. Amount, *sum, aggregate, total, whole, number.

quarrel, n. *Quarrel, wrangle, altercation, squabble, bickering, spat, tiff* agree in denoting a dispute marked by anger or discord on both sides. The same distinctions in implications and connotations are found in their corresponding verbs, *quarrel, wrangle, altercation, squabble, bicker, spat, tiff*. *Quarrel* usually implies heated verbal contention, but it stresses strained or severed relations

which may persist even after verbal strife has ceased; as, to patch up a *quarrel*. "Spectators of our dull domestic *quarrels*" (*Shelley*). "I don't complain of Betsey, or any of her acts, Exceptin' when we've *quarreled*, and told each other facts" (*W. Carleton*). *Wrangle* implies undignified and often futile disputation with noisy insistency on each person's opinion; as, a *wrangle* over a point of law. "Fill'd with... A scorn of *wrangling*, yet a zeal for truth" (*Pope*). *Altercation* and the rare verb *altercate* imply fighting with words as the chief weapons, though blows may also be connoted. "I have an extreme aversion to public *altercation* on philosophic points" (*Franklin*). "Lydia, foreseeing an *altercation*, and alarmed by the threatening aspect of the man, attempted to hurry away" (*Shaw*). *Squabble* stresses childish and unseemly wrangling over a petty matter; it does not necessarily imply anger or bitter feeling; as, children *squabble* over their toys; "*squabbles* with his fellow-faddists" (*L. P. Smith*); "I wish you chaps would not *squabble* over the picture" (*Wilde*). *Bickering* and *bicker* imply constant and petulant verbal sparring or interchanges of cutting remarks; they suggest an irritable mood or mutual antagonism; as, they never come together without *bickering*. "Tho' men may *bicker* with the things they love, They would not make them laughable in all eyes, Not while they loved them" (*Tennyson*). *Spat* (a colloquial or dialectal word) also implies an insignificant cause, but, unlike *squabble* and *bicker*, it suggests an angry outburst and a quick ending without hard feelings. "They was pretty apt to have *spats*" (*H. B. Stowe*). *Tiff* differs from *spat* chiefly in implying a disagreement that manifests itself in ill-humor or temporarily hurt feelings. "Having learned that storms Subside, and teapot-tempests are akin... *Tiffs* End properly in marriage and a dancel!" (*Browning*).

Ana. *Brawl, broil, fracas, melee, row, rumpus, scrap: contention, dissension, conflict, variance, strife, *discord. **quarrel, v.** *Wrangle, altercation, squabble, bicker, spat, tiff*. See under QUARREL, n.

Ana. *Contend, fight, battle, war: dispute, agitate, argue, *discuss.

Con. *Agree, concur, coincide.

quarrelsome. Pugnacious, bellicose, *belligerent, contentious, litigious.

Ana. Opposing, combating or combative, resisting (see corresponding verbs at OPPOSE): antagonistic, *adverse, counter: hostile, inimical, antipathetic, rancorous (see corresponding nouns at ENMITY).

quarry. *Victim, prey, ravin.

quarters. *Rooms, lodgings, chambers, diggings, digs, apartment, flat, tenement.

quash. *Annul, abrogate, void, avoid, vacate.

quaver, v. *Shake, tremble, shudder, quake, totter, quiver, shiver, wobble, teeter, shimmy, didder, dither.

Ana. Falter, waver, vacillate, *hesitate: vibrate, fluctuate, sway (see SWING).

queenly. Regal, royal, *kingly, imperial, princely.

queer, adj. *Strange, odd, erratic, eccentric, peculiar, quaint, outlandish, curious.

Ana. Dubious, *doubtful, questionable: droll, funny, *laughable: bizarre, grotesque, *fantastic.

querulous. Fretful, petulant, pettish, huffy, *irritable, peevish, fractious, snappish, waspish.

Ana. Crying, weeping, wailing, whimpering, blubbering (see CRY, v.): touchy, techy, cranky, cross (see TRASCIBLE): lamenting, deploring, bemoaning (see DEPLORE).

query, v. *Ask, question, interrogate, inquire, spear, examine, quiz, catechize.

quest. *Adventure, enterprise, emprise.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. Exploit, *feat, achievement.

question, *v.* *Ask, interrogate, query, inquire, examine, quiz, catechize, spear.

Ant. Answer. — **Con.** Reply, respond (see ANSWER, *v.*).

questionable. *Doubtful, dubious, problematical.

Ana. Uncertain, suspicious (see corresponding nouns at UNCERTAINTY): *obscure, vague, equivocal.

Ant. Authoritative: unquestioned.

quick. 1 *Living, alive, animate, animated, vital.

Ant. Dead: arid.

2 Fleet, swift, rapid, *fast, speedy, expeditious, hasty.

Ana. Brisk, nimble, *agile: abrupt, impetuous, *precipitate, headlong.

3 **Quick, prompt, ready, apt** come into comparison when applied to persons, their mental operations, their acts, and their words, and mean having or manifesting the ability to respond without delay or hesitation. **Quick** stresses instantaneity of response to such an extent that it usually connotes native rather than acquired power; as, *quick eyes*; *quick in perception, observation, or decision*. "He could at that time barely write his own name. Yet one felt in him a *quick* and discriminating intelligence" (*Calder*). Very often, the word suggests marked capacity for learning or for absorbing that which is taught. "And I would teach them all that men are taught; We [women] are twice as *quick*!" (*Tennyson*). "To be fit to direct, to know enough about roads to take the right one, the *quick* . . . must be taught according to their *quickness*" (*Grandgent*). **Prompt** also implies instantaneity of response, but it may or may not imply native quickness. Often it carries a suggestion of training, discipline, or some kind of preparation that fits one for quick response when the occasion demands it; as, *prompt service*; *prompt eloquence*. "Blest Statesman He . . . who holds his ministry, Resolute, at all hazards, to fulfil Its duties;—*prompt* to move, but firm to wait" (*Wordsworth*). Sometimes the word carries so strong an implication of willingness or eagerness that a lack of normal inhibitions is also suggested. "A low-born, cell-bred, selfish, servile band, *Prompt* or to guard or stab, to saint or damn" (*Pope*). **Ready**, like *prompt*, implies previous training or a strong predisposition as well as instantaneity of response, but it more often characterizes the person or his powers than his performance or his expression of thought or feeling. It therefore often implies, as *prompt* does not, skill, facility, fluency, ease in attainment, or the like. "Reading maketh a full man, conference a *ready* man" (*Bacon*). "Wherein lies happiness? In that which becks Our *ready* minds to fellowship divine" (*Keats*). "On graduation from the lycée, at seventeen, he [the French boy] . . . has as plentiful a supply of knowledge, as *ready* and accurate a judgment [as the American A. B. of twenty-two]" (*Grandgent*). The word is often applied to the bodily organ or to the instrument one uses in manifesting his skill, fluency, or the like; as, he has a *ready* tongue; he wields a *ready* pen; a pair of *ready* hands. **Apt**, as here compared (see also FIT; APT, 2), does not throw the emphasis on the quickness of the response though that is involved in its meaning, but on the possession of certain qualities which make for such quickness, such as a high degree of intelligence, a particular talent or gift, or a strong bent. It is therefore preferable to *quick* when the person in mind responds quickly only to particular stimuli or shows a capacity for a definite kind of work; as, she is *apt* at drawing but not at arithmetic; his *aptness* for all studies is unusual; "supple, sinew-corded, *apt* at arms" (*Tennyson*); "at the hands of a little people, few but *apt* in the field" (*Kipling*).

Ana. *Intelligent, clever, smart, quick-witted: deft, feat, adroit, *dexterous: *sharp, acute, keen.

Ant. Sluggish.

quicken, *v.* 1 **Quicken, animate, enliven, vivify** agree in meaning to make alive or lively. Originally, all of them meant literally to impart physical life to that which is devoid of it. "I have seen a medicine That's able to breathe life into a stone, *Quicken* a rock" (*Shak.*). "It told how first Prometheus did create A man, of many parts from beasts deryv'd, And then stole fire from heaven to *animate* His worke" (*Spenser*). "When God hath raised this body, he can *enliven* it with the same soul that inhabited it before" (*J. Wesley*). "The great Soul of the Universe. . . *vivifyeth* all manner of things" (*Rabelais, transl. by Urquhart*). This literal sense is now rare and the words have diverged more or less widely in their implications. **Quicken**, which is found chiefly in poetic and religious use, stresses either the renewal of life, especially of suspended life or growth, or the rousing into fullness of activity that which is inert. Sometimes the rekindled life is physical. "When her [spring's] breath *Quickens*, as now, the withered heath" (*Wordsworth*). More often, however, it is spiritual, intellectual, or imaginative. "It is the Spirit that *quickeneth* . . . the words that I speak unto you, they are spirit, and they are life" (*John vi. 63*). **Animate** emphasizes the imparting of motion and activity or, especially in modern use, the giving of the appearance of life to that which is mechanical or artificial; as, *animated cartoons*; the *animated* dolls of the puppet theater. "Lely on *animated* canvas stole The sleepy eye, that spoke the melting soul" (*Pope*). **Enliven** suggests a stimulating influence that kindles, exalts, or brightens; it therefore commonly presupposes dullness, depression, torpidity, or the like, in the thing affected; as, "the sun . . . was wonderfully warm and *enlivening*" (*D. H. Lawrence*). "But soon the feel of the paint on the canvas begins to *enliven* his mind; and the mind thus *quickeneth* conceives a livelier curiosity about the creature before him" (*C. E. Montague*). **Vivify** sometimes, like *quicken*, implies the renewal of life, and at other times, like *animate*, implies the giving of the appearance of life. In each case, however, it usually also suggests a freshening or energizing effect, and implies vitality more often than activity or motion. "The Russian ballet . . . illustrates once more the *vivifying* effect of transplantation on the art of Romantic dancing" (*H. Ellis*). "In . . . the Elizabethan age, English society at large was inaccessible to ideas, was permeated by them, was *vivified* by them" (*Arnold*). "That Promethean fire, which *animates* the canvass and *vivifies* the marble" (*Sir J. Reynolds*).

Ana. Activate, *vitalize, energize: rouse, arouse, *stir. **Ant.** Deaden.

2 Excite, stimulate, *provoke, pique, galvanize.

Ana. *Activate, actuate, motivate: spur, goad, induce (see corresponding nouns at MOTIVE): *incite, foment.

Ant. Arrest.

3 Hasten, hurry, *speed, accelerate, precipitate.

Ant. Slacken.

quick-witted. Clever, bright, smart, *intelligent, alert, knowing, brilliant.

Ana. Ready, prompt, *quick, apt: *sharp, keen, acute: *witty, humorous, facetious.

quiescent. *Latent, dormant, potential, abeyant.

Ana. Quiet, *still, silent: inert, *inactive, passive, supine.

quiet, *adj.* Silent, noiseless, *still, stilly.

Ana. *Calm, serene, placid, tranquil, peaceful.

Ant. Unquiet. — **Con.** *Rough, harsh: disturbed, agitated, upset, disquieted, perturbed (see DISCOMPOSE):

*vociferous, clamorous, boisterous, blatant, strident.

quip. *Jest, joke, jape, witticism, wisecrack, crack, gag.

quit. 1 Acquit, comport, deport, demean, conduct, *behave.

Ana. & Con. See those at **ACQUIT**.

2 *Go, leave, depart, withdraw, retire, scam, clear out.

Ana. Forsake, desert, *abandon: *relinquish, surrender, resign: *escape, flee, fly, abscond.

3 *Stop, cease, discontinue, desist.

quiver, v. *Shake, shiver, shudder, quaver, totter, tremble, quake, wobble, teeter, shimmy, didder, dither.

Ana. *Pulsate, pulse, beat, throb, palpitate: flutter, flicker, flitter (see **FLIT**).

quixotic. Chimerical, fantastic, visionary, fanciful, *imaginary.

Ana. *Sentimental, romantic: utopian, *ambitious: ideal, transcendental, *abstract.

quizz, v. 1 *Banter, chaff, rally, kid, rag, guy, rib, josh, jolly.

2 *Ask, question, interrogate, examine, catechize, query, inquire, spear.

quote, v. **Quote, cite, repeat** are not close synonyms, even though as here compared they agree in meaning to say or write again in identical words something already said or written by another. To **quote** is to reproduce exactly the words of another, usually with credit given

to their author; as, "Chaucer's account of himself must be **quoted**, for the delight and sympathy of all true readers" (*Hunt*). More loosely, to **quote** is to refer a statement in general terms to some one as its author, without implying the repetition of precisely the original words; as, Don't **quote** me in this connection. To **cite**, as here compared (see **ADDUCE**), is to quote an author or a passage as evidence offered in proof of a point or as an authority for one's statement or contention; as, "He persevered in his refusal to **cite** any distinct passages from any writing of mine" (*Newman*). To **repeat** is to reproduce exactly (or sometimes, almost exactly) the words of another, often without indication of or reference to their author; as, the children **repeated** the poem after the teacher; "I will not **repeat** your words, M. du Pallet, outside this cloister" (*H. Adams*). "When an uncopyrighted combination of words is published there is no general right to forbid other people **repeating** them—in other words there is no property in the combination or in the thoughts or facts that the words express" (*Justice Holmes*).

Ana. *Adduce, allege, advance.

quotidian. *Daily, diurnal.

R

race, n. **Race, nation, people** are frequently used as though they are interchangeable when they denote one of the great divisions of mankind, each of which is made up of an aggregate of persons who think of themselves, or are thought of, as comprising a distinct unit. In present technical use, the terms are commonly differentiated in meaning but in general, or popular, use they are often employed (justifiably on historical grounds, such as the usage of the best writers of the past) without a clear sense of these distinctions. In the ensuing discrimination, emphasis will be placed upon the current technical rather than upon the passing historical implications in these words. **Race** is chiefly an anthropological and ethnological term; it usually implies a distinct physical type. One race is distinguishable from another by its possession of certain unchanging characters, such as the color of the skin, the form of the hair, and the shape of the skull. The classification of primary races commonly followed today is that of J. F. Blumenbach (though his five races are sometimes reduced to four) into the Caucasian (or white), the Mongolian (or yellow), the Ethiopian (or black), the American (or red), the Malay (or brown). Secondary classifications, as of the Caucasian race, are numerous though not so universally accepted; thus, W. Z. Ripley distinguished three races in Europe (the Teutonic, the Alpine, the Mediterranean) on the basis of comparative stature, coloring (blond or brunet), and the shape of the head. Many other classifications or designations of groups as **races** are popularly received, even when they are still matters of controversy among scientists; they often imply a common origin or place of origin, a common root language, or the like; as, the Nordic **race**; the Aryan **race**; the Semitic **race**. In popular use, however, **race** is still often applied to any clearly defined group thought of as a unit because of a common past, even though remote, a common history, or the like; as, the Anglo-Saxon **race**; the Celtic **race**; the Hebrew **race**. **Nation** is primarily a political term, but it is also common in historical writing and is even more

frequent as a literary word with highly figurative connotations. Literally, it signifies the inhabitants, or more narrowly, the citizenry, of a sovereign state, or any body of persons who have been united under one independent government long enough to have acquired a distinct identity. It implies a certain homogeneity in these persons because of common laws, institutions, loyalties, and customs, but it does not necessarily imply, as **race** usually does, a common origin, or a common remote past, or a common physical or mental type. In this sense, it is often contrasted with **state**. "When the state fell to pieces, the **nation** held together" (*J. R. Seeley*). "A State is accidental; it can be made or unmade; but a **nation** is something real which can be neither made nor destroyed" (*J. R. Green*). Figuratively, **nation** often suggests an ideal to be realized, rather than an established entity; it is then, as a rule, personified; as, "a **nation** strong, train'd up in arms" (*Shak.*); "**nations**, like men, have their infancy" (*Bolingbroke*); "until **nations** are generous they will never be wise" (*Irving*); "the **nation's** honor is dearer than the **nation's** comfort" (*W. Wilson*). There still prevails a use of **nation** which is not clearly distinguishable from that of **race** in its popular sense; as, the Gypsy **nation**; "he hates our sacred [Jewish] **nation**" (*Shak.*). **People** is the preferred word in historical and sociological terminology when a body of persons as a whole and as individuals show a consciousness of solidarity and of peculiarity that is not entirely explainable by **race** or **nation**. The term usually designates an aggregate of persons who, irrespective of their individual racial origins or ancestral nationalities, have through close and long-continued association achieved a common culture, common interests and ideals, and a sense of race or kinship. **People** is interchangeable with **nation** only when the terms imply the same background and cover the same range of instances; as, Congress should voice the will of the American **people** (or **nation**); "Englishman" designates one of a **people** (the English **people**): Briton, one of a **nation** (the British

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

nation). *People* is usually far weaker in its implication of political unity and far stronger in its implications of cultural and social unity than *nation*. "The Cry of the Little Peoples goes up to God in vain. For the world is given over to the cruel sons of Cain" (*R. Le Gallienne*).

rack, *n.*¹ *Trot, pace, single-foot, lope, amble, walk, gallop, run, canter.

rack, *n.*² Track, vestige, *trace.

Ana. *Sign, mark, token.

rack, *v.*¹ Trot, pace, single-foot, lope, amble, walk, gallop, run, canter. See under TROT, *n.*

rack, *v.*² Torment, torture, grill, try, *afflict.

Ana. Persecute, oppress (see WRONG, *v.*): harry, harass, *worry, annoy.

rack, *v.*³ Variant of WRACK.

racket. *Din, uproar, pandemonium, hullabaloo, babel, hubbub.

racking. *Excruciating, agonizing.

Ana. Torturing, tormenting, grilling (see AFFLICT): *intense, vehement: *fierce, ferocious, barbarous, savage, cruel, inhuman.

racy. *Pungent, piquant, poignant, spicy, snappy.

Ana. Exciting, stimulating, quickening, provoking or provocative (see corresponding verbs at PROVOKE): *spirited, mettlesome, fiery, gingery, peppery.

Con. *Inspid, flat, jejune, banal, inane.

radiant. Brilliant, *bright, luminous, lustrous, effulgent, refulgent, beaming, beamy, lambent, lucent.

Ana. *Splendid, resplendent, glorious, sublime: sparkling, glittering, gleaming, flashing, scintillating (see FLASH, *v.*).

radical, *adj.* 1 *Fundamental, basic, basal, underlying, substratal, substrative.

Ana. Cardinal, *essential, vital: *inherent, intrinsic, constitutional.

Ant. Superficial.

2 Advanced, progressive, *liberal, left.

radius. *Range, reach, scope, compass, sweep, ken, purview, horizon, orbit.

rag, *v.* *Banter, chaff, rally, quiz, kid, guy, rib, josh, jolly.

rage, *n.* 1 *Anger, ire, fury, indignation, wrath.

Ana. *Acrimony, asperity, acerbity: frenzy, *mania, hysteria: agitation, upset, perturbation (see corresponding verbs at DISCOMPOSE).

2 *Fashion, style, mode, vogue, craze, cry, dernier cri, fad.

Ana. *Caprice, freak, vagary, crotchety, whim.

raid, *n.* *Invasion, incursion, irruption, inroad.

Ana. *Attack, assault, onslaught, onset.

rail, *v.* Revile, vituperate, rate, berate, upbraid, *scold, tongue-lash, jaw, bawl out, wig.

Ana. Censure, denounce, condemn, reprobate, reprehend, *criticize: reprimand, rebuke, *reprove, reproach.

railery. *Badinage, persiflage.

Ana. Bantering or banter, chaffing or chaff, rallying or rally (see corresponding verbs at BANTER): sport, *fun, game, jest, play: satire, sarcasm, irony (see WIT).

raiment. Apparel, attire, tire, *clothes, clothing, dress, vesture, array.

raise, *v.* *Lift, elevate, hoist, heave, rear, boost.

Ana. *Rise, ascend, mount, soar: *exalt, magnify, aggrandize: *advance, promote, forward, further.

rally, *v.*¹ *Stir, rouse, arouse, awaken, waken.

Ana. Excite, stimulate, quicken, *provoke: enkindle, fire, inflame (see LIGHT, *v.*): *renew, restore, refresh.

rally, *v.*² 1 *Ridicule, deride, mock, taunt, twit.

Ana. *Scoff, jeer, gibe, flout: tease, tantalize, *worry, harass, harry.

2 *Banter, chaff, quiz, kid, rag, guy, rib, josh, jolly.

ramble, *v.* *Wander, stray, roam, rove, range, prowl, gad, gallivant, traipse, meander.

rampant. *Rank.

Ana. Luxuriant, lush, exuberant, *profuse, lavish: immoderate, *excessive, inordinate.

Con. *Moderate, temperate: restrained, curbed, checked (see RESTRAINED).

rampart. *Bulwark, breastwork, parapet, barbette, bastion.

rancid. *Malodorous, stinking, fetid, rank, noisome, putrid, fusty, musty.

Ana. Decomposed, decayed, spoiled (see DECAY): *offensive, loathsome, repulsive.

rancor or rancour. Antagonism, animosity, animus, antipathy, *enmity, hostility.

Ana. Hate, hatred, detestation, abhorrence, abomination (see under HATE, *v.*): spite, *malice, malevolence, malignity, spleen, grudge.

random. *Random*, *haphazard*, *chance*, *chancy*, *casual*, *desultory*, *hit-or-miss*, *happy-go-lucky* come into comparison as meaning having a cause or a character that is determined by accident rather than by design or by method. That is *random* which comes, goes, occurs, is made, or the like, without a fixed or clearly defined aim, purpose, or evidence of method or system or direction: the term, therefore, implies no or little guidance by a governing mind, eye, objective, or the like; as, a *random* shot; a *random* answer to a question; a *random* collection of books; "My choice was as *random* as blindman's buff" (*Burns*); "They will throw out a *random* word in or out of season" (*Lamb*); "He had not heard her divorce spoken of since Janey's first *random* allusion to it" (*E. Wharton*). That is *haphazard* which is done, is made, is used, is said, or the like, without concern or without sufficient concern for its fitness, its effectiveness, its possible ill effects, or the like, and which, therefore, is more or less at the mercy of chance or of natural or logical necessity; as, a *haphazard* policy; *haphazard* methods of teaching French; a *haphazard* arrangement of shrubs and plants in a garden. That is described as *chance* which comes or happens to one or is done or made by one without prearrangement or preawareness or without preparation: the term is applicable not only to things but to persons with whom one comes into contact more or less by accident; as, a *chance* acquaintance; a *chance* meeting with an old friend; a *chance* remark of the stranger whose face seemed familiar led to my identification of him. "He explained that by a charming accident he had disposed of them to a *chance* buyer in Hanbridge, just before starting for Birmingham" (*Bennett*). That is *chancy* (a colloquial term) which is so haphazard that it involves uncertainty and risk, or that its results, actions, etc., cannot be predicted: the term may apply directly or indirectly to persons who are willing to take chances as well as to things that are precarious as a result of their haphazardness; as, "It's the instinct of the English and the Irish... to suspect government and take the risks of the *chancy* way" (*H. G. Wells*); "[The purchase of shares of a company about to undertake a project] is a *chancy* business" (*Shaw*). A person or a thing is *casual* (as here compared: see also ACCIDENTAL) that leaves, or seems to leave, things to chance, and that works, acts, or comes or goes, haphazardly or by chance, or without method or deliberation or other indication of intent or purpose: the term often also suggests offhandedness (as, a *casual* remark; he's a *casual* fellow; his treatment of his friends is *casual*), or lightness or spontaneity (as, "She was constantly referring to dear friends... in a *casual* and familiar way, and

there were so many of them that it was long before I could distinguish them"—*H. Ellis*), or lack of definiteness as in terms or intention (as, "their policy was opportunist at home and *casual* abroad"—*Speculator*). "Perhaps the dominant feeling about government today is distrust. The tone of most comment, whether *casual* or deliberate, implies that ineptitude and inadequacy are the chief characteristics of government" (*Frankfurter*). "The *casual* allusion, the *chance* reference to her" (*H. Adams*). That is *desultory* which is not governed by method or system and which therefore jumps or skips from one thing to another. Usually the term implies another quality as a consequence of these, such as irregularity or lack of continuousness or persistence (as, "He had begun, in a *desultory* way, to annotate the diary that Tom had kept on the mesa"—*Cather*), or rambling discursiveness (as, "The book, in short, is *desultory* to the last degree, and discourses in varying moods on a variety of topics"—*Quiller-Couch*), or the absence of a plan or a definite objective (as, "to make reading have a purpose instead of being *desultory*"—*B. Russell*). That is *hit-or-miss* which is so haphazard in its character or operation that one is indifferent as to how it turns out or as to what pattern or arrangement it makes; as, *hit-or-miss* hammering; *hit-or-miss* patchwork; "A *hit-or-miss* policy was pursued by the Department of Justice" (*W. Z. Ripley*). A person is *happy-go-lucky* who leaves everything to chance or who accepts with happiness or indifference whatever comes; a thing is *happy-go-lucky* that is governed by such a disposition; as, a *happy-go-lucky* race; a *happy-go-lucky* way of earning one's living. "A radical pragmatist on the other hand is a *happy-go-lucky*... sort of creature" (*W. James*). "To make Carter think and talk... in the *happy-go-lucky* way of his class" (*Reade*).

Ana. Fortuitous, *accidental, casual: vagrant, vagabond, truant (see corresponding nouns at VAGABOND).

range, v. 1 *Line, align, array.

Ana. Arrange, *order, marshal: *assort, sort, classify: *incline, dispose, predispose, bias.

2 *Wander, rove, ramble, roam, stray, prowl, gad, gallivant, traipse, meander.

range, n. 1 *Habitat, station.

2 **Range, reach, scope, compass, sweep, gamut, radius, ken, purview, horizon, orbit** come into comparison when they denote the extent that lies within the powers of something to cover, to grasp, to control, or the like. **Range** often applies to the extent taken in or covered as by the eye (as, there was no human being within my *range* of vision), or by the ear (as, he did not call until he was within the *range* of our hearing), or by the understanding mind (as, to find Kant's philosophy beyond the *range* of one's intellectual powers), or by the feelings (as, "a creative writer can do his best only with what lies within the *range* and character of his deepest sympathies"—*Cather*), or the like (as, he did not fire until they were within *range* of his rifle). Equally often the term applies to the literal or figurative extent determined by a thing's powers, possibilities, capacity, or performances, and the variety of types, gradations, kinds, etc., that it includes; as, some of the greatest tenors have had voices of remarkable *range*; "We may gather a fairly complete idea of the whole *range* of Greek political life" (*G. L. Dickinson*); "A contrivance... to extend the *range* of conversation in mixed company" (*Brownell*). "Monochrome is a starved and lifeless term to express the marvellous *range* and subtlety of tones of which the preparation of black soot known as Chinese ink is capable" (*Binyon*). When the reference is to something stretched out or stretching itself out as an arm, or in the

manner of an arm, so as to grasp, to attain, to embrace, or the like, **reach** (sometimes in the plural *reaches*) is the preferred term: usually it denotes that which lies within the limits or at the uttermost boundary of a thing's powers, influence, or capacity; as, "thoughts beyond the *reaches* of our souls" (*Shak.*); "Be sure yourself and your own *reach* to know, How far your genius, taste, and learning go" (*Pope*); "Mrs. Bennet was beyond the *reach* of reason" (*Austen*); "simple virtues... within every man's *reach* (*Irving*); "anything like sustained reasoning was beyond his *reach*" (*L. Stephen*); "Ah, but a man's *reach* should exceed his grasp, Or what's a heaven for?" (*Browning*). **Scope** (as here compared) occurs in two related but, to some extent, contrasted, senses. In one of these it denotes the extent between established or predetermined limits which encompass one on all sides and which for one reason or another cannot be overpassed; as, the subject does not lie within the *scope* of this book; "all matters within the *scope* of your understanding" (*Austen*); "I shall... put on one side all... speculations about the state, its *scope* and limits" (*Frankfurter*). In the other senses here considered, the term denotes room or space for free uncircumscribed activity, growth, expression, or the like; as, a type of education that gives a child *scope* for the development of all his powers; "We cannot offer you any work among poor or humble folk; but... you will find plenty of *scope* here [as a curate], both in the pulpit and in the box [the confessional]" (*C. Mackenzie*). **Compass**, like *range* and *reach*, applies to the utmost extent which can be taken in or reached by or as if by the eye, the arm, the mind, the imagination, or the like; but, like *scope*, it carries an implication of limits that have the character or quality of a circumference. The term therefore may suggest more restriction than *range* or *reach* but more freedom than *scope* in the sense of established limits; as, "To do this is within the *compass* of man's wit" (*Shak.*); "notes of an insect that lie above the *compass* of the human ear" (*Hardy*). **Sweep** differs from *compass* in implying a range that is determined by something that follows or seems to follow a circular or curving course; as, stars beyond the *sweep* of the most powerful telescope; watching for a fish to swim within the *sweep* of one's net; "London... was brought within the *sweep* of Royal extortion" (*J. R. Green*). **Gamut** (literally, a musical scale ascribed to Guido d'Arezzo) in its extended sense applies to a range which represents a graded series of all the notes, tones, varieties, kinds, etc., which lie between the limits of a thing's reach or scope. "We have the entire *gamut* [of people] run by the Southron [i.e., Southerner] describing a dinner party composed... of 'an elegant gentleman from Virginia, a gentleman from Kentucky, a man from Ohio, a fellow from New York, and a galoot from Boston'" (*Brownell*). "Only prose can give the full *gamut* of modern feeling" (*T. S. Eliot*). "Types of light each occupying its particular place in that far-reaching... *gamut* which is called the 'spectrum'" (*Karl K. Darrow*). **Radius** applies to the space (literal or figurative space) encircling a given point and therefore equidistant from it on all sides; as, "an hour's bus drive from London and outside the cab *radius*" (*H. G. Wells*); "the individual has a certain definite *range* and *radius* of sympathy" (*Day Lewis*). **Ken** strictly applies to the range of one's knowledge or understanding or vision; as, "above the reach and *ken* of a mortal apprehension" (*South*); "Eventually, after she had drifted out of his *ken*... [she] returned" (*Cather*). "Then felt I like some watcher of the skies When a new planet swims into his *ken*" (*Keats*). **Purview**, though strictly applied to the scope as of a document, a statute, a book, or the like (as, "The statute intended... to

include in its *purview* all the circumstances of the consecration of Parker"—*Gladstone*), is now more often used in a sense that is almost identical with that of *ken*. "Blake conceived that it was his vocation to bring this mystical illumination, this vision of reality, within the *purview* of ordinary men" (*E. Underhill*). **Horizon**, in its extended sense, suggests a compass that represents the utmost reaches on all sides of the human mind or soul, especially under given conditions; as, "the *horizon* of the human intellect has widened wonderfully during the past hundred years" (*C. W. Eliot*); "Your *horizon* contracts, your mind's eye is focused upon a small circle of exasperating detail" (*Jan Struther*). **Orbit** is often used in place of *scope* in the sense of circumscribing limits; as, "A small private income... confined us to a much narrower *orbit*" (*Quiller-Couch*); "the *orbit* within which Mr. Murry's discussion moves" (*T. S. Eliot*).

Ana. Extent, area (see *SIZE*): *field, domain, province, sphere, territory: spread, stretch, *expanse, amplitude.

rank, adj. 1 **Rank, rampant** are compared as meaning growing or increasing at an immoderate rate. **Rank**, as here considered, applies chiefly to vegetation, though it is sometimes applied to soil, land, and the like, or is used figuratively. The term implies vigorous, luxuriant, often unchecked, growth, sometimes of crops (as, "And, behold, seven ears of corn came up upon one stalk, *rank* and good"—*Genesis* xli. 5), but more often of coarse and unwanted plants, such as weeds or wild shrubs, or undergrowth (as, *rank* growth; *rank* vegetation; *rank* grass). "The even mead [meadow]... all uncorrected, *rank*... nothing teems. But hateful docks, rough thistles, kecksies, burs" (*Shak.*). "Weed your better judgements Of all opinion that grows *rank* in them" (*Shak.*). **Rampant** is far more widely applicable than *rank*, for it implies rapid, often unrestrained or wild, spreading and therefore is frequently applicable not only to that which literally grows but to that which extends or increases by contagion, diffusion, or the like; as, "It grieved him to see ignorance and impiety so *rampant*" (*Fuller*); "that curiosity which is so *rampant*, as a rule, in an Indian village" (*Kipling*); "the person in whose blood stream malaria is *rampant*" (*A. C. Morrison*).

Ana. *Coarse, gross, vulgar: exuberant, *profuse, lavish, luxuriant.

2 Fusty, musty, rancid, *malodorous, stinking, fetid, noisome, putrid.

Ana. Dank, humid (see *WET*): *offensive, loathsome, repulsive: decomposed, decayed, spoiled (see *DECAY*).

Ant. Balmy.

3 *Flagrant, glaring, gross.

Ana. Conspicuous, outstanding, *noticeable: foul, filthy, squalid, nasty (see *DIRTY*): *outrageous, heinous, atrocious, monstrous.

ransom, v. *Rescue, deliver, redeem, reclaim, save.

Ana. *Free, release, liberate, emancipate, manumit: *expiate, atone.

rant, n. *Bombast, fustian,rodomontade, rhapsody.

Ana. Inflatedness or inflation, turgidity, tumidity, flatulence (see corresponding adjectives at *INFLATED*).

rapacious. Ravening, ravenous, gluttonous, *voracious.

Ana. *Ferocious, fierce: greedy, grasping, *covetous.

rapacity. Greed, *cupidity, avarice.

Ana. Covetousness, avariciousness, greediness, graspingness (see corresponding adjectives at *COVETOUS*): exaction, demanding or demand, claiming or claim (see corresponding verbs at *DEMAND*).

rapid, adj. *Fast, swift, fleet, quick, speedy, hasty, expeditious.

Ana. Brisk, nimble, *agile: hurried, quickened (see *SPEED, v.*).

Ant. Deliberate: leisurely.

rapt. Absorbed, engrossed, *intent.

Ana. Ecstatic, transported, rapturous (see corresponding nouns at *ECSTASY*): enchanted, captivated, fascinated (see *ATTRACT*).

Con. *Indifferent, unconcerned, incurious: uninterested, *disinterested.

rapture. *Ecstasy, transport.

Ana. Bliss, beatitude, blessedness, felicity, *happiness: elation, exultation (see corresponding adjectives at *ELATED*).

rare. 1 Tenuous, slight, *thin, slender, slim.

Ana. *Subtle, subtle.

2 Delicate, dainty, exquisite, *choice, elegant, recherché.

Ana. Excelling or excellent, transcending or transcendent, surpassing (see corresponding verbs at *EXCEED*): superlative, *supreme, incomparable.

3 Scarce, infrequent, uncommon, occasional, sporadic.

Ana. *Exceptional: singular, unique, curious, *strange.

Con. *Usual, customary, wonted, accustomed, habitual: *common, ordinary, familiar.

rarefy. *Thin, attenuate, extenuate, dilute.

Ana. Diminish, reduce, lessen, *decrease: *expand, distend, inflate.

rash. Daring, daredevil, reckless, temerarious, foolhardy, *adventurous, venturous, venturesome.

Ana. *Precipitate, abrupt, impetuous, sudden, hasty: desperate, forlorn (see *DESPONDENT*).

Ant. Calculating. — **Con.** *Cautious, circumspect, wary, chary.

rate, n. Levy, assessment, *tax, excise, impost, customs, duty, toll, tariff, tribute, tithe, teind, cess.

rate, v.¹ Berate, upbraid, *scold, tongue-lash, jaw, bawl out, wig, rail, revile, vituperate.

Ana. *Reprove, reproach, rebuke, reprimand, admonish, chide: censure, condemn, denounce, reprehend, reprobate, *criticize.

rate, v.² Value, evaluate, appraise, *estimate, assess, assay.

Ana. *Calculate, compute, reckon, estimate: *decide, determine, settle.

ratify. **Ratify, confirm** are here compared only as meaning to make something legally valid or operative. Both terms presuppose previous action as by a person or body with power of appointing, of legislating, of framing a document such as a constitution, a treaty, or the like, and imply reference therefore only to the act of the person or body (or persons or bodies) endowed with the power to accept or to veto the appointment, bill, constitution, etc. The terms are occasionally interchanged without loss, but **ratify** usually carries a stronger implication of approval than **confirm** and is therefore used by preference when the acceptance of something such as a constitution, a treaty, a course of action, that has been framed or proposed by a committee or a small body is put up to a society, legislature, or nation as a whole for a vote that testifies to its approval; thus, the Constitution of the United States was framed by the Constitutional Convention in 1787 and went into effect in 1788 after it had been *ratified* by eleven states. "The Report of the [Lambeth] Conference is not intended to be an absolute decree on questions of faith and morals; for the matter of that, the opinions expressed have no compulsion until *ratified* by Convocation" (*T. S. Eliot*). **Confirm**, on the other hand, stresses the giving of formal or decisive assent as necessary to a thing's validity: it applies specifically to appointments made by a president, governor, or other top executive, that according to the constitution of a nation or state require the consent of a

senate, a legislature, a council, or other body before they are definitely settled and made legally valid; as, "The other executive function of the Senate, that of *confirming* nominations submitted by the President" (*Bryce*); the executive council yesterday refused to *confirm* two of the governor's appointments.

Ana. *Authorize, accredit, license, commission: sanction, *approve, endorse: validate, authenticate (see CONFIRM).

rating. *Mariner, sailor, seaman, tar, gob, matlow, bluejacket.

ratiocination. *Inference, illation.

Ant. Intuition.

ratiocinative. Illative, inferential. See under INFERENCE.

Ant. Intuitive.

ration, n. *Ration, allowance, dole, pittance* denote the amount of food, supplies, money, or the like, allotted to an individual. *Ration* always implies apportionment and, often, equal sharing. Specifically, it is applied in military and naval use to the daily supply of provisions given each man, and in stockbreeding to the daily (or periodical) supply of food for each animal. In these uses, it generally implies dietary variety and restricted amounts of each food. When used of a particular food or commodity, as wheat or coal, it implies a shortage in the supply and a limitation on the amount allowed each person; as, the sugar *ration* in 1918 was two teaspoonfuls a day. *Allowance*, though often interchangeable with *ration*, is far wider in its range of application. Both imply restriction in amount, but *allowance* stresses granting rather than sharing and is applicable to money and many other things besides food; as, a daily *allowance* of tobacco for the old pensioners; a schoolboy's weekly *allowance*; the court determines an heir's *allowance* during his minority. *Dole*, especially in modern use, tends to imply a grudging division and needy or, sometimes, grasping recipients; as, "cold charity's unwelcome *dole*" (*Shelley*). "No rich man's largesse may suffice his soul, Nor are the plundered succored by a *dole*" (*E. V. Cooke*). In current British use, *dole* is applied to a payment to unemployed workers, whether in the form of relief or insurance, by the national government. In the United States, it designates commonly the amount given periodically to a person on public relief. *Pittance*, though originally applied to a gift of money to a monastery to supply an additional allowance of food or drink to the monks on specified occasions, and then to the allowance itself, does not in modern use suggest increase, but, rather, scantiness or meagerness. It is now applicable to a ration, an allowance, a dolc, a wage, or the like, the context usually making clear the reference. "And gained, by spinning hemp, a *pittance* for herself" (*Wordsworth*). "In England, such a dowry would be a *pittance*, while elsewhere it is a fortune" (*Byron*).

Ana. Apportionment, portioning or portion (see corresponding verbs at APPORTION): sharing or share, participation, partaking (see corresponding verbs at SHARE).

ration, v. *Apportion, portion, prorate, parcel.

Ana. Divide, *distribute, dispense, deal, dole: *share, partake, participate.

rational. *Rational, reasonable* come into comparison when they are applied to men, their acts, utterances, policies, and the like, in the senses of having or manifesting the power to reason or of being in accordance with what reason dictates as right, wise, sensible, or the like. *Rational* is usually the preferred term when one wishes specifically to imply a latent or active power to make inferences from the facts of which one is aware and to

draw from such inferences conclusions that enable one to understand the world about him and to relate such knowledge to the attainment of personal and common ends: often, in this use, *rational* is opposed to *emotional, imaginative, animal*, and the like; as, man is a *rational* animal; "we are *rational*; but we are animal too" (*Cowper*); "In Octavian the emotional side was slow to develop, but from the start the *rational* was all-powerful" (*Buchan*); "To cure this habit of mind, it is necessary... to replace fear by *rational* prevision of misfortune" (*B. Russell*). When the term is applied to policies, projects, systems, or to anything already conceived or formulated, *rational* is preferred when justification on grounds that are satisfactory to the reason is specifically implied; as, "the advantages of a *rational* orthography" (*Grandgent*); "States may do a good deal of classifying that it is difficult to believe *rational*" (*Justice Holmes*). *Reasonable* usually carries a much weaker implication than *rational* of the power to reason in general, or of guidance by conclusions drawn by the reasoning powers: on the other hand, it commonly suggests enough guidance by the reason to enable one to avoid mistakes that will lead one into unforeseen difficulties or to make decisions or choices that are practical, sensible, just, or fair. "When I was a child and was told that our dog and our parrot... were not creatures like myself, but were brutal whilst I was *reasonable*, I... quite consciously and intellectually formed the opinion that the distinction was false" (*Shaw*). "If that belief, whether right or wrong, may be held by a *reasonable* man, it seems to me that it may be enforced by law" (*Justice Holmes*). "A *reasonableness*, a refusal to be stampeded into fanaticism, which... though it may be dismissed by some as compromise, will appeal to others as common sense" (*Day Lewis*). "I don't know any paper which takes a larger and more *reasonable* view of the war" (*H. Ellis*). "The formation of *reasonable* habits, of method, of punctuality, is a duty, not from an exalted point of view, but because it makes enormously for the happiness and convenience of every one about us" (*A. C. Benson*).

Ant. Irrational: animal (of nature): demented (of state of mind): absurd (of actions, etc.).

rationalize. *Explain, account for, justify.

rattle. Faze, *embarrass, discomfit, disconcert; abash.

Ana. *Confuse, muddle, bemuddle, addle: agitate, upset, perturb, disturb, fluster, flurry (see DISCOMPOSE): bewilder, distract, perplex (see PUZZLE, v.).

ravage. *Ravage, devastate, waste, sack, pillage, despoil, spoliare* come into comparison as meaning to lay waste or bare by plundering, destroying, or other acts of violence. *Ravage* usually implies the cumulative destruction accomplished by successive depredations, invasions, raids, storms, floods, and the like, but it may be employed when only one such act or event or the like achieves a like effect; as, the barbarians *ravaged* Greece and Italy during the first centuries of the Christian era; wolves *ravaged* the countryside during that bitter winter; "the psychic disease which *ravaged* Europe as mercilessly as the Spanish influenza" (*Day Lewis*). "An Indian hunt was never a slaughter. They *ravaged* neither the rivers nor the forest" (*Cather*). *Devastate* and the less common *waste* (lay waste being the commoner expression) stress the ruin and desolation which follow any act or series of acts, or event or series of events, which *ravage* or are in the process of ravaging a place or a country: it suggests demolition, burning, or other means of eradication of buildings, of forests, of crops, and the like; as, "A succession of cruel wars had *devastated* Europe" (*Macaulay*); "Gresham had *devastated* the neighbouring country to

get timber for his Royal Exchange" (*H. Ellis*); "He fell suddenly on the Nervii with four legions, seized their cattle, *wasted* their country" (*Froude*). **Sack** strictly suggests the act or acts of a victorious army entering a town or other place that has been captured and stripping it of all its possessions of value by looting or destruction; as, "We *sacked* the city after nine months' siege" (*T. Heywood*); the English monasteries were *sacked* by the invading Danes. In current use, *sack* often means to burglarize so successfully that little of value is left or that all genuinely valuable articles are taken; as, house after house was *sacked* that summer when their owners were away. **Pillage** stresses ruthless plunder, such as is characteristic of an invading or victorious army, but it carries a weaker implication of devastation than *sack* carries; as, "He *pillaged* many Spanish towns, and took rich prizes" (*Fuller*); the soldiers were allowed to *pillage* any town or fields through which they passed. In current nonmilitary use, *pillage* still implies ruthlessness, but it carries a stronger implication of appropriation to oneself of something that belongs to another as by fleecing, plagiarizing, or robbing; as, "humbled by their doctors, *pillaged* by their tradesmen" (*Shaw*). **Despoil**, like *sack*, implies a stripping of valuables, but it does not so often refer to places such as towns or cities which are ransacked for booty: it is usually the preferred term when a building, such as a church, a palace, an institution, or the like, or the person (or persons) connected with it is (or are) deprived of valuables by force or violence; as, the *despoiling* (or *despoliation*) of the English monasteries in the 16th century. "We are not yet So utterly *despoil'd* but we can spread The friendly board" (*Southey*). "We can endure that He should waste our lands, *Despoil* our temples . . . ; Such food a Tyrant's appetite demands" (*Wordsworth*). "Kill! crush! *despoil!* Let not a Greek escape!" (*Shelley*). *Despoil* may also imply wanton deprivation of valuable qualities or excellences; as, "*Despoiled* of innocence, of faith, of bliss" (*Milton*). **Spoliate** is more consistently a legal rather than a military term, but it has some general use: in its meaning it comes close to *despoil*, but it is the preferred term when piracy upon neutral ships in time of war is implied or, especially in current general use, when the gaining of spoils by means of exactions, graft, or various venal practices is suggested; as, the Tweed Ring was charged with *spoliating* (or the *spoliation* of) the people of New York City.

Ana. *Destroy, demolish, raze: plunder, loot, *rob: *ruin, wreck, wrack: invade, *trespass, encroach.

ravening. Rapacious, ravenous, gluttonous, *voracious.

Ana. Greedy, acquisitive, grasping, *covetous.

ravenous. Ravening, rapacious, *voracious, gluttonous.

Ana. Grasping, greedy, acquisitive, *covetous: *fierce, ferocious.

ravin or raven or ravine. *Victim, prey, quarry.

raw. Crude, callow, green, *rude, rough.

Ana. *Elementary, elemental: *ignorant, untaught, untutored: *immature, unmaturing, unripe.

Con. Practiced, exercised, drilled (see **PRACTICE**, *v.*): seasoned, hardened, inured (see **HARDEN**): *mature, matured, ripe, adult, grown-up.

rawboned. Gaunt, angular, *lean, lank, lanky, spare, scrawny, skinny.

ray. *Ray*, *beam* are here compared chiefly in their popular senses as denoting a shaft of light. This conception of light as a shaft is fixed in our language but is not always in keeping with modern scientific views of the nature of light. **Ray** (etymologically akin to *radius*) suggests emanation from a center in the manner of the spokes of a wheel: it is often applied to one of the apparently thin lines of light that seem to extend from a

radiant body, such as the sun or a star, or that are flashed by something brilliant, such as steel glittering in the sun; as, the more numerous the facets of a diamond the more numerous the *rays* of light it reflects. In physics, *ray* often implies a particular color (as, a red *ray*; a violet *ray*). **Beam** implies not a line but a long bar (*timber* was the original sense of the term); it suggests therefore a bar made up of a bundle of rays of light; as, the *beam* of an automobile headlight or of a searchlight. "Thither came Uriel, gliding through the even On a sunbeam, swift as a shooting star" (*Millon*). "Where a sunbeam enters, every particle of dust becomes visible" (*Ruskin*). A small beam is sometimes called a *ray*; as, a tiny hole in the window shade admitted a *ray* of sunlight into the room. In physics, a beam of white light is split by a prism into rays of light of the various colors of the spectrum. *Ray* is the usual term for implying heat-giving property; thus, *ray* is more often used of the sun than of the moon; as, the *rays* of the sun are more intense in summer than in winter. "How far that little candle throws his *beams!*" (*Shak.*).

raze. Demolish, *destroy.

Ana. Efface, obliterate (see **ERASE**): eradicate, extirpate (see **EXTERMINATE**): *ruin, wreck: *abolish, extinguish, annihilate.

reach, v. **Reach, gain, compass, achieve, attain** agree in meaning to arrive at a point by effort or work. **Reach** is the most general term, being capable of reference to anything that can be arrived at by exertion of any degree, as a point in space, in time, or in a development, or as a destination, a goal, a position of eminence, or the like; as, they *reached* Chicago that night; after a long discussion they *reached* an understanding; he *reached* success early in life. In extended use, *reach* may be predicated even of inanimate things; as, the hour hand has *reached* two; the depression has *reached* bottom. **Gain** usually implies a struggle to reach a contemplated or desired destination or goal. "At last, the top of the staircase was *gained*" (*Dickens*). "I had *gained* the frontier and slept safe that night" (*Browning*). **Compass** implies efforts to get around difficulties or to transcend limitations; it often connotes skill or craft in management. "A writer who is attempting a higher strain of elevation or pathos than his powers can *compass*" (*C. E. Montague*). "If you can *compass* it, do cure the younger girls of running after the officers" (*Austen*). **Achieve**, in discriminating use, stresses the skill or the endurance, as well as the efforts, involved in reaching an end. "Some are born great, some *achieve* greatness" (*Shak.*). "No government or private organization could give health; people had to *achieve* it" (*V. Heiser*). Often it implies accomplishment of that which is in itself a feat or triumph. "A complete moral unity such as England *achieved*" (*Bello*). **Attain**, in careful use, connotes more strongly than any of the others the spur of aspiration or ambition; as, his constant efforts to *attain* his ends. It is therefore especially referable to ends beyond the vision, the scope, or the powers of most men. "This indispensable condition of the safety and civilisation of the world is, indeed, very difficult to *attain*" (*J. A. Hobson*). "A fine balance of all the forces of the human spirit such as but once or twice has been *attained* in the world's history" (*Binyon*).

Ana. Effect, fulfill, execute, accomplish, *perform: *get, obtain, procure, secure.

reach, n. *Range, scope, compass, sweep, gamut, radius, ken, purview, horizon, orbit.

Ana. Extent, area, magnitude (see **SIZE**): spread, stretch, *expanse: capacity, capability, *ability.

react. Operate, work, function, *act, behave.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

readiness. Readiness, ease, facility, dexterity come into comparison when they denote the power of doing something without evidence of effort, or the quality of a work, performance, or the like, which manifests such effortlessness. Readiness lays stress on the quickness or promptitude with which anything is done; as, his *readiness* in repartee; "a happy *readiness* of conversation" (*Austen*). *Ease*, which is probably more often used of the quality than of the power, suggests not only a lack of all signs of strain or care, but an absence of signs of hesitation or uncertainty with resulting evenness in performance and, especially in spoken or written discourse, fluency, directness, grace, and simplicity in expression; as, "True *ease* in writing comes from art, not chance" (*Pope*); "*Ease* and strength, effort and weakness, go together" (*Shaw*); "Constance was surprised at the *ease* which he displayed in the conduct of practical affairs" (*Bennett*). *Facility*, though sometimes used in a derogatory sense (as, his fatal *facility* in composition; "His *facility* in language has been fatal only too often to his logic and philosophy"—*J. C. Van Dyke*), more frequently than *ease* expresses the power, proceeding from practice and use, of performing an act or dispatching a task with lightness and address. But *facility* and *ease* are often interchanged; as, "To this admirable precision she [Eugénie de Guérin] joins a lightness of touch, a feminine *ease* and grace, a flowing *facility* which are her own" (*Arnold*); "I loathed algebra at first, although afterwards I had some *facility* in it" (*B. Russell*). *Dexterity* implies both readiness and facility, but it carries a stronger implication than any of the preceding words of previous training or practice and of proficiency or skill; as, "the singular discernment and *dexterity* with which he had directed his whip" (*Austen*); his amazing *dexterity* in argument; "I should train school-children in forms of more or less dangerous *dexterity*, rather than in such things as football" (*B. Russell*).

Ana. Quickness, promptness, aptness (see corresponding adjectives at QUICK): alacrity, *celerity, legerity: fluency, eloquence, volubility (see corresponding adjectives at VOCAL).

Con. *Effort, exertion, pains, trouble.

ready. *Quick, prompt, apt.

Ana. Expert, adept, skilled, skillful, *proficient: *active, live, dynamic.

real. *Real*, *actual*, *true*, and their derivative nouns *reality*, *actuality*, *truth*, are often used interchangeably without marked loss when they mean correspondent (or that which is correspondent) to all the facts known and knowable; as, the *real*, or the *actual*, or the *true* state of affairs; his *real*, or *actual*, or *true* motive; the *real*, or *actual*, or *true* George Washington. They are also often used interchangeably, even by good writers, but with distinct loss in clearness and precision, when their common implication is merely that of substantial objective existence. *Real*, in this more inclusive sense, implies genuineness, or correspondence between what the thing appears or pretends to be and what it is; as, this is a *real* diamond; the British sovereign has little *real* power; he has a *real* interest in art. "To know the difference between *real* and sham enjoyment" (*Shaw*). *Actual* emphasizes occurrence or manifest existence; it is applied only to that which has emerged into the sphere of action or fact and is, therefore, inapplicable to abstractions; as, *actual* events; give me an *actual* instance of the workings of this law; the *actual* tests of the new airplane are yet to be made. "Sculpture and painting are not...capable of *actual* movement, but they suggest movement" (*Binyon*). "I'm no judge of the feelings of *actual* or prospective parents" (*R. Macaulay*). "The pos-

sible way—I am far from asserting it was the *actual* way—in which our legendary Socrates arose" (*H. Ellis*). *True* implies conformity either to that which is real or to that which is actual. If the former is intended, the term presupposes a standard, a pattern, a model, a technical definition, or a type by which that which is true is determined; as, a *true* Christian; the ladybird is not a *true* bug (an insect of the order Hemiptera), but a beetle (an insect of the order Coleoptera); the whale is not a *true* fish, but an animal; "As part of that resurrection...was born a *true* poet, Carducci" (*Quiller-Couch*); "The *true* refinement...that in art...comes only from strength" (*Wilde*). When *true* stresses conformity to that which is actual, it presupposes the test of correspondence to that which exists in nature or to all the facts known and knowable; as, *true* time; to run *true* to type; a *true* story; a *true* version of a story. "The same event can [not] be said to be *true* for faith but untrue for science" (*Inge*). "The language [of poetry]...must often, in liveliness and *truth*, fall short of that which is uttered by men in *real* life, under the *actual* pressure of those passions" (*Wordsworth*).

These words, especially *real* and *true*, are also used by philosophers and philosophical poets, critics, scientists and others in senses which are often at variance with those in ordinary use and which are, consequently, a source of confusion. All still imply substantial objective existence, but only *actual* necessarily implies existence in experience. *Real* is variously defined in philosophy; only two of those senses have come into use by others than philosophers. The older of these senses (often spoken of as the Platonic sense) distinguishes that which is *real* from that which is *phenomenal*, or existent in the world which is known to the senses. *Real* thus often becomes the equivalent of *ideal* when that word suggests, not a hazy conception but a profound intuition of a thing in its perfection. Thus, when a poet speaks of *real* beauty or of *real* justice, he seldom means the beauty that is seen or the justice that is experienced, but rather a beauty or a justice so far beyond that which occurs in the world of experience that it is apprehended only by the intellect or the imagination. "But from these create he [the poet] can Form more *real* than living man" (*Shelley*). In non-imaginative writing, *real* still retains its implied contrast to *phenomenal* but further implies the fullness of existence knowable only through the intellect. "A hypothesis... does not attempt to portray the *reality* of nature, but only what we see of nature—the phenomena of nature... But...science might legitimately progress along the road from phenomena to *reality*" (*Jeans*). In another but not so common use, *real* denotes having existence independently of the mind. This sense derives from the division of modern philosophy into two branches, realism and idealism. The idealists hold that one knows only the images or ideas of things that are in one's mind and not the things in themselves; the realists assert that the things one sees, hears, feels, understands, or the like, are real because they exist in their own right independently of human limitations in knowing them. "If the physical world is an inference, stars and electrons are inferential; if the physical world exists, stars and electrons are *real*" (*Eddington*). *True*, in philosophical and aesthetic use, implies conformity to reality in its perfection or completeness (often distinguished as *ultimate reality*). Its use often imputes falsehood to actuality, which is by implication imperfect, faulty, or incomplete. "Othello, Macbeth, Lear...are not transcripts of reality [here, actual reality]. They are *truer* than if they were" (*Loves*). "Thomas [one of Barrie's characters] affects me as a lie... Doubtless he was somebody you [Bar-

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

rie] knew; that leads people so far astray. The actual is not the *true*" (Stevenson).

Ana. Being, existing or existent, subsisting or subsistent (see corresponding verbs at BE): *certain, necessary, inevitable.

Ant. Unreal: apparent (sense 2): imaginary.

realize. *Realize, actualize, embody, incarnate, materialize, externalize, objectify, substantiate, substantialize, hypostatize, reify* are the chief words in English meaning to give concrete or objective existence to that which has existed either as an abstraction, a conception, or the like, or as a possibility. Except within smaller groups, they are, however, seldom interchangeable, because their implications vary widely and their applications are largely determined by idiom. **Realize** commonly implies emergence into the sphere of actual things, as of that which has been a dream, an ideal, a hope, or a plan; as, the project was never *realized* owing to a lack of funds; he did not *realize* his ambition until he was past middle life. "The ideal of economic efficiency is best *realized* by a machine" (Grandgent). The implication of attainment, of achievement, or of fulfillment is at times so strong in *realize* as to obscure or subordinate its fundamental idea. "To achieve a beautiful relation to another human being is to *realize* a part of perfection" (Binyon). "However evolution... is effected, a divine purpose is being *realized* in it" (Inge). **Actualize**, though sometimes used interchangeably with *realize*, is found chiefly in philosophical or technical writings with the implication of emergence, as of that which has existed only in potentiality, either into fullness or perfection of existence (as, powers of the mind never *actualized*) or into act or action (as, potential energy becomes kinetic energy when it is *actualized* by motion). **Embody** and **incarnate** sometimes imply investment with an outward or visible form of something abstract, as a principle, an idea, a trait, or a quality; as, "The poet cannot *embody* his conceptions so vividly and completely as the painter" (Binyon); Dickens *incarnated* hypocrisy in his Uriah Heap. **Materialize** stresses emergence into the sphere of that which is perceptible or tangible and usually presupposes prior vagueness, haziness, or elusiveness. "I had the glimmering of an idea, and endeavoured to *materialize* it in words" (N. Hawthorne). **Materialize**, as a transitive verb, is now used chiefly in Spiritualism (as, to *materialize* spirits, or to make them visible). **Externalize** and **objectify** emphasize the projection of that which is subjective, as a thought, an emotion, a desire, so that it takes form apart from the mind. **Externalize** often suggests a conscious or unconscious urge for expression or relief; as, hallucinations are frequently *externalizations* of a fear. "Madness has produced... valuable art...; the artist attempts to rid himself of his abnormality... by *externalizing* it into the work of art" (Day Lewis). **Objectify** is more likely to suggest a conscious attempt to overcome the limitations of subjectivity and to contemplate one's own mental processes; as, introspective psychology depends for its data upon the power of the investigator to *objectify* his own sensations, emotions, and thoughts. **Substantiate, substantialize, hypostatize, reify** occur chiefly in philosophical and technical writing. They all imply conversion by the mind of that which is a concept or abstraction into a thing that has real and objective yet not, as a rule, perceptible existence; thus, in the mind of the ordinary person, space and time are *substantiated*, *hypostatized*, etc., whereas in the view of philosophers and philosophic scientists they are relations.

Ana. Effect, fulfill, execute, accomplish, achieve, *perform.

2 *Think, conceive, imagine, fancy, envisage, envision.

Ana. *Understand, comprehend, appreciate.

rear, adj. *Posterior, after, back, hind, hinder.

Ant. Front.

rear, v. Raise, *lift, elevate, hoist, heave, boost.

Ana. *Rise, ascend, mount, soar: *nurse, nurture, foster: breed, propagate (see GENERATE).

reason, n. **1** Reason, ground, argument, proof are here compared as meaning a point or series of points offered or capable of being offered in support of something questioned or disputed. **Reason** usually implies the need of justification, either to oneself or another, of some practice, action, opinion, belief, or the like; it is therefore commonly (though not necessarily) personal in its reference; thus, a father asks the *reason* for his son's disobedience; a person gives the *reasons* for his preference. **Reason** is often applied to any motive, consideration, inducement, or the like, which one offers in explanation or defense. "So convenient it is to be a 'reasonable creature,' since it enables one to find or make a *reason* for everything one has in mind to do" (Franklin). **Ground** and its plural **grounds** are often used in place of *reason* and *reasons* because they too imply the intent to justify or defend. When, however, the emphasis is on evidence, data, facts, reasoning, etc., rather than on motives or considerations, **ground** is the acceptable word; thus, the *reasons* for a belief may explain why it is held, but the *grounds* for it give evidence of the validity of that belief; a scientist presents the *grounds* (better than *reasons*) for his conclusion. **Ground** also suggests more solid support in fact and therefore greater cogency than *reason*; thus, one may speak of frivolous or trumped-up *reasons* (but not *grounds*); there is *ground* (better than *reason*) for the popular belief in thought transference. "Suppose I have *grounds* to think that he can't take care of himself in a given instance?" (Conrad). **Argument** stresses the intent to convince another or to bring him into agreement with one's view or position. Strictly it implies the use of evidence and reasoning in the making and stating of a point in support of one's contention; as, the debaters came well provided with *arguments*; every possible *argument* in favor of the proposal has been advanced, but still the Congress is obdurate. Loosely, however, it often suggests reasoning without reference to fact. "When he was asked to argue the merits of vaccination, he always rejoined that one fact in such cases was worth a thousand *arguments*" (V. Heiser). **Proof**, in strict usage, emphasizes not an intent, but an effect: that of conclusive demonstration; therefore, in the sense here considered, a *proof* is any piece of evidence, such as a fact, a document, or the testimony of a witness or expert, or any argument, that evokes a feeling of certainty in those who are to be convinced. "These arguments [for the existence of God] are sometimes called *proofs*, though they are not demonstrations; they are, however, closely inwoven with the texture of rational experience" (Inge).

Ana. Explanation, justification, rationalization (see corresponding verbs at EXPLAIN).

2 *Cause, determinant, antecedent, occasion.

Ana. *Motive, incentive, inducement, impulse: basis, foundation, ground (see BASE, n.).

3 Reason, intuition, understanding are here compared as terms denoting that power of the intellect by which man arrives at truth or knowledge. Like the terms discriminated at MIND, these words have been variously defined by psychologists and philosophers, with the result that their precise interpretation in literary use often depends upon a knowledge of the author's philosophical or psychological background. **Reason**, though often loosely used as though it were an equivalent of *mind* and *intellect* (see MIND), as here compared (see also

CAUSE, 1; REASON, 1), applies mainly to the thinking power of the intellect; as such it implies a power which works upon facts gained by perception, or upon facts or principles instilled into one's mind by others, and which orders and relates those facts and principles by drawing inferences from them and a conclusion or conclusions from a body of inferences, thereby increasing one's knowledge or reaching a comprehension of that which was formerly vague or obscure. "Those who use their *reason* do not reach the same conclusions as those who obey their prejudices" (*Lippmann*). "Facts have a double value: they give us wherewithal to think straight and they stimulate the imagination; for imagination, like *reason*, cannot run without the gasoline of knowledge" (*Grandgenet*). *Reason* often specifically applies to a power of arriving at knowledge which is higher than perception, or the power of gaining knowledge through the medium of the senses, because it starts from the point where perception ends, and yet which is lower than another power (variously named; e.g., "intuition") which enables one to attain knowledge or comprehension of that which is invisible and immaterial without the aid of the senses; as, truths beyond *reason*; "To admit... that *reason* cannot extend into the religious sphere" (*H. Ellis*); Thomas Aquinas believed that the existence of God could be demonstrated by *reason*. Nevertheless, the term is often used in a very general sense to denote the power of arriving at knowledge or truth by logical processes, whether one starts with observed facts, with principles regarded as axioms or necessary postulates, or the like; thus, in Kant's definition "pure *reason*" does not start with facts derived from experience or observation, but with truths derived through the medium of a higher intellectual power. *Intuition* is the most varied in its applications of all these terms, except possibly *understanding*: in all of its senses, however, it implies a power to know immediately and not through the agency of the reason. The term usually also suggests a knowledge that is comparable to that which one gains through seeing or perceiving, but since it frequently implies knowledge of that which is beyond the senses, it may denote a power, higher than reason, which enables the mind to attain immediate knowledge of the supersensible or supernatural. "One in whom persuasion and belief Had ripened into faith, and faith become A passionate *intuition*" (*Wordsworth*). In philosophical, psychological, and aesthetic use the term commonly denotes a power of arriving at truth or knowledge that is different from though not necessarily higher than reason, and may have its basis in perception, in a power akin to that of imagination, in mystical experience, or the like. "He [Shakespeare] seems to have known the world by *intuition*, to have looked through nature at one glance" (*Pope*). "The man of letters does most of his work not by calculation, not by the application of formulas, but by aesthetic *intuition*" (*A. Huxley*). "All great achievements in science, he [Einstein] holds, start from *intuition*" (*H. Ellis*). In its loosest and most generally current sense, *intuition* (cf. *intuitive*, under *INSTINCTIVE*, 1) implies a gift or an instinct for immediate comprehension of the significance of facts or of a situation. "Do we not really trust these faint lights of *intuition*, because they are lights, more than *reason*, which is often too slow [a counselor] for us to resort to?" (*G. W. Russell*). "With one of her quick leaps of *intuition* she had entered into the other's soul and once more measured its shuddering loneliness" (*E. Wharton*). *Understanding*, in its usual current sense, applies to the power of the intellect to comprehend or grasp whatever is taught or whatever is studied, or the true purport or significance of a term, a situation, or a set of related

facts, or what is required of one to meet adequately a situation or exigency; as, "To have a really precise *understanding* of this matter" (*Shaw*); "Knowledge he has gained... but not... *understanding*" (*A. Repplier*). In its philosophical and here pertinent sense, *understanding* applies to a power to see a thing not as an individual but as an instance of the class or species to which it belongs; thus, in theory, one who regards a thing as an individual may recognize it as belonging to a class, but because his emotions or imagination are stimulated may be prevented from seeing it in its underlying or essential character and therefore from having an understanding of it: one who regards a thing from the point of view of *understanding* sees it in its universal and often, by implication, its eternal essence. In this sense, *understanding* (especially as a translation of the German *Verstand*) is often, but not invariably, distinguished from *reason* (especially as a translation of the German *Vernunft*, which usually includes intuition in its higher sense) in that understanding is thought of as the power of the intellect whereby the external objective world becomes orderly and intelligible, and reason, as the power by which one ascends from what is known to new knowledge. "*Understanding* is the entire power of perceiving and conceiving [that is, making concepts], exclusive of the sensibility; the power of dealing with the impressions of sense, and composing them into wholes" (*Coleridge*). "The neo-classicists, by admitting only what is probable to the *understanding*, reduced unduly the rôle of illusion, the element of wonder and surprise" (*Babbitt*).

Ana. *Mind, intellect, intelligence, brain: ratiocination, illation, inference.

reason, v. Reflect, *think, deliberate, speculate, cogitate.

Ana. *Infer, deduce, conclude, judge, gather.

reasonable. *Rational.

Ana. Sensible, sane, prudent, judicious, *wise: *fair, equitable, just.

Ant. Unreasonable.

rebate. *Deduction, abatement, discount.

rebel, n. *Rebel, insurgent, iconoclast* come into comparison when they denote a person who rises up against constituted authority or the established order. *Rebel* carries the strongest implication of a refusal to obey or to accept dictation and of actual, often armed, resistance to that which one opposes; the term does not necessarily imply antagonism to the government of a state or church, however, but is comprehensive enough to cover one who defies the authority such as of a law, a tradition, a custom, or the like; as, "all their friends were protesters and *rebels* and seceders" (*H. G. Wells*); "'[Woman is] a tyrant till she's reduced to bondage, and a *rebel* till she's well beaten'" (*Meredith*). "The *rebel*, as a human type entitled to respect and often to sympathy, was not recognized in Europe till the period of the French Revolution... The term '*rebel*' was in itself a term of reproach... till the days of Byron" (*R. E. N. Dodge*). *Insurgent* applies chiefly to a rebel who rises in revolt but who is not regarded by the authorities as having the status of an enemy or belligerent; hence, *rebels* in a colony or dependency of an empire may, from the imperial point of view, be designated as *insurgents*, even though they call themselves *rebels*; as, the colonial forces were found able to cope with the *insurgents* in India. In a more extended sense, *insurgent* applies to any rebel in a political party, a church, a group of artists or writers, or the like, who rises in revolt not so much in an attempt to destroy the organization or institution or its laws or conventions as in the hope of effecting changes or reforms believed to be necessary; as, never were there so many *insurgents* in the dominant political party as at present;

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

the free verse movement was led by a group of *insurgents*. **Iconoclast** (etymologically, an image breaker, originally one of a party of insurgents in the Eastern Church in the 8th and 9th centuries who opposed the use of icons [see *icon* under **IMAGE**, 1]) is now applied in an extended sense to any person who violently attacks an established belief, a venerated custom, a highly respected tradition, or the like, as an obstacle to reform or progress or as a mere fetish. "I have become a reformer, and, like all reformers, an *iconoclast*...I shatter creeds and demolish idols" (*Shaw*). "Julius was a bold *iconoclast* about republican forms which had survived their usefulness; Augustus sought to cherish whatever of these forms could be made to work" (*Buchan*).

Ana. *Opponent, antagonist, adversary: assailant, attacker (see **ATTACK**, v.).

Rebellion. *Rebellion, revolution, uprising, revolt, insurrection, mutiny, Putsch* come into comparison only when they denote a war or a warlike outbreak against a government or against powers in authority. **Rebellion** in this narrow sense implies open, organized, and usually armed, resistance to constituted authority or to the government in power: the term is usually applied (only after the event) to an instance of such resistance as has failed to overthrow the powers that be; as, Jack Straw's *Rebellion*; the Jacobite *rebellions* of 1715 and 1745. **Revolution**, on the other hand, applies strictly to a rebellion that has been successful to the extent that the old government is overthrown and a new one substituted; as, the French *Revolution*; the American *Revolution*. The term, however, does not invariably imply a war or a warlike outbreak or even a change in government; as, the industrial *revolution* of the nineteenth century; to effect a bloodless *revolution* by a coup d'état. The words are often applied to the same event according to the point of view of the user or sometimes according to the time in which it is used; thus, the American Civil War of 1861-1865 was called the "War of the *Rebellion*" by Northerners, not only during its progress but for a long time after; a *revolution* is often called a *rebellion* by the overthrown government or its supporters until bitterness has faded; thus, the English Civil War (1642-1652) was, after the Restoration (1660), and still sometimes is, called the Great *Rebellion*. **Uprising** is a somewhat general term applicable to any act of violence that indicates a popular desire to defy or overthrow the government: it is often used in reference to a small and ineffective movement among an insurgent class or section of the people but it is applicable also to the first signs of a general or widespread rebellion; as, there was fear of *uprisings* in different parts of the country; "Whenever the whole nation should join together in one sudden and vigorous *uprising*" (*Freeman*). **Revolt** and **insurrection** in strict use apply to an armed uprising which does not attain the extent of a rebellion, either because it is quickly put down or is immediately effective. *Revolt*, however, carries a stronger suggestion of a refusal to accept conditions or continue in allegiance than does *insurrection*, which often suggests a seditious act such as an attempt to seize the governing power or to gain control for one's party. "The Reformation...was no sudden *revolt*, but the culmination of a long agitation for national independence in religious matters" (*Inge*). "Baltazar's tyranny grew little by little, and the Acoma people were sometimes at the point of *revolt*" (*Calder*). "*Insurrections* of base people are more furious in their beginnings" (*Bacon*). "Excess of obedience is...as bad as *insurrection*" (*Meredith*). **Mutiny** applies chiefly to an insurrection against military or, especially, maritime or naval authority; as, the ship's master feared *mutiny* long before it occurred; the *mutiny*

of a regiment made the situation desperate for the invaders. **Putsch**, a Swiss-German term in some use in English, applies to a small popular uprising; as, the Kapp *Putsch* in Germany in 1920; the Munich beer hall *Putsch* of Hitler's supporters in 1923.

Ana. *Sedition, treason: resistance, opposition, combatting, withstanding (see corresponding verbs at **OPPOSE**).

rebellious. *Insubordinate, mutinous, seditious, factious, contumacious.

Ana. Recalcitrant, refractory, intractable, *unruly, ungovernable: estranged, alienated, disaffected (see **ESTRANGE**).

Ant. Acquiescent, resigned: submissive.

rebound, v. **Rebound, reverberate, recoil, resile, repercuss** come into comparison when they mean to spring back, especially after being thrown, stretched, or the like. **Rebound** literally implies a springing back after a collision or impact; as, the ball readily *rebounds* when thrown against a wall. In figurative use, the term implies a springing back, as from one extreme to another or from an abnormal condition to one that is normal; as, his heart *rebounded* with hope. **Reverberate** is now used chiefly in reference to sounds which are forced back in the manner of an echo or series of echoes, but it is still employed with reference to rays of light, flames, or waves of heat which are repelled or reflected from side to side or from one surface to another. "The evening gun thundered from the fortress, and was *reverberated* from the heights" (*N. Hawthorne*). "The far flashing of their starry lances *Reverberates* the dying light of day" (*Shelley*). **Recoil** in its literal use (see also **RECOIL**, 1) often implies a springing back after being stretched, strained, or depressed; as, the springs of a mattress *recoil* after the pressure has been removed; the gun *recoils* when a shot is fired. This implication is even more often apparent in one of the figurative senses of the verb, where the suggestion of a return to the source or point of origin in the manner of a boomerang is also evident. "That evidence missed the mark at which it was aimed, and *recoiled* on him from whom it proceeded" (*Macaulay*). But *recoil* often implies a springing back in the sense of being forced back by or as if by a blow: it then may or may not connote a retreat, a receding, a reeling, or the like; as, "Ten paces huge He back *recoiled*" (*Milton*); "As deep *recoiling* surges foam below" (*Burns*); "Cashel [in a fight] *recoiled*, wringing his hand to relieve the tingling of his knuckles" (*Shaw*). **Resile** (the least common of these words), like *recoil*, may imply a springing back into the original state or position, but in this sense it is commonly used in reference to resilient bodies or substances and suggests either literally or figuratively a drawing back that is normal or lacking in abruptness; as, to give a tube time to *resile* after it has been stretched; many of the converts to the new religion *resiled* in the course of time. **Repercuss**, which is now rare (its corresponding noun *repercussion* and adjective *repercussive* are common), is a close synonym of *reverberate* and *rebound*, for it implies the return of something moving ahead with great force or, in figurative use, set in motion or operation, back to or toward the starting point. However, it (or especially, the noun or the adjective) distinctively suggests repulsion upon impact and a return with undiminished force, or sometimes even greater force, and often, when persons are involved, with a marked effect upon the one or the ones who initiated the action; as, the waves dashed against the rocks and *repercussed* with a great roar; the attack was violent but its *repercussion* was destructive; few foresaw the inevitable *repercussions* of the Treaty of Versailles.

Ana. Bound, *skip, ricochet.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

rebuild. Remodel, *mend, repair, patch.

Ana. *Renew, restore, renovate, refresh.

rebuke. *Reprove, reprimand, admonish, reproach, chide.

Ana. Rate, upbraid, *scold, berate: *criticize, reprehend, reprobate.

rebut. *Disprove, refute, confute, controvert.

recalcitrant. Refractory, intractable, headstrong, willful, *unruly, ungovernable.

Ana. Rebellious, *insubordinate, factious, contumacious: *obstinate, stubborn: resisting, opposing, withstanding, combating or combative (see corresponding verbs at OPPOSE).

Ant. Amenable (sense 2).

recall, v. Recollect, *remember, remind, reminisce, bethink, mind.

Ana. Evoke, elicit, extract, *educe: *stir, rouse, arouse, waken, awaken.

recant. Retract, *abjure, renounce, forswear.

Ana. Withdraw, remove.

recede. **Recede, retreat, retrograde, retract, back, crawl** come into comparison when they mean to move or seem to move in the direction that is exactly the opposite of ahead or forward. **Recede** stresses marked and, usually, increasing distance from a given point, line, or position, but it implies movement on the part of that which recedes only when a fixed point of view is indicated or understood; as, the tide is *receding*; until the flood waters *recede*, the extent of the damage will not be known. "While I stood gazing, both the children gradually grew fainter to my view, *receding*, and still *receding*" (*Lamb*). When the point of view is that of a traveler or the distance is in time, not in space, the receding thing is stationary and the point of view changes. In such a case, either a gradual disappearance as from view or consciousness or a change in perspective is implied; as, he stood at the ship's stern watching the shore *recede* from view; "past events as they *recede* appear in truer proportions" (*L. P. Smith*); "the possibility of certain ultimate solutions has rather *receded* than approached as the years went by" (*J. W. Krutch*). When used of persons and their ideas, attitudes, or the like, *recede* (often followed by *from*) suggests departure from a fixed idea, or determined attitude, or a definite stand. "He was far too self-willed to *recede* from a position, especially as it would involve humiliation" (*Hardy*). **Retreat** implies withdrawal from a point or position reached, usually because one is averse to remaining or to advancing further or is for some reason, such as imminent defeat or danger, or obedience to orders, unable to remain or advance; as, after the failure of the first attack, the army *retreated*; "Some... who picture... Religion as *retreating* from one position to another before the victorious advance of science" (*Inge*). "They frequently approached this theme, and always *retreated* from it" (*Meredith*). **Retrograde** implies movement contrary to that which is normal or natural; thus, a planet *retrogrades* when it moves or seems to move from east to west, or in a direction opposite to that of the usual planetary course. The verb is also used to imply the reverse of progress in the development of a species, a race, or an individual. "Some races have been stationary, or even have *retrograded*" (*J. Lubbock*). "In his Latin and Greek he was *retrograding*" (*Meredith*). Occasionally, it is used to imply a going backward in time or an inversion of the chronological order; as, "Our narrative *retrogrades* to a period shortly previous to the incidents last mentioned" (*Scott*). The next two words, *retract* and *back*, are commonly employed as transitive as well as intransitive verbs. **Retract** is used chiefly, but not exclusively, in the biological sci-

ences as the opposite of *protract*, in reference to those parts of an organism which can be thrust forward or drawn backward; as, to *retract* the tongue; to cause a cat's claws to *retract*; "throwing out and *retracting* their left fists like pawing horses" (*Shaw*). **Back**, in this sense, is usually but not invariably a transitive verb, except when followed by *up*, *out*, or *down*, when it is more often intransitive than transitive. Often it implies retrograde motion; as, to *back* an automobile; the water in a drain *backs up* when a pipe cannot carry it off and it returns to the bowl or sink; to *back out* of a room; a wind *backs* when it shifts to a counterclockwise direction. Often when followed by *out* or *down* it implies a receding, as from a stand or attitude, or a retreating, as from a promise, an engagement, or the like; as, he will never *back down* once his word is given; he is trying to *back out* now that he sees how much work the project entails; the opposition forced the governor to *back down* and to recall his recommendations. **Crawfish** (a colloquialism in the United States) implies reference to the retrograde motion of the crayfish, or crawfish, but it often also carries the implication of cowardly retreat from a position or stand; as, "I *crawfished* as good as I could about ten yards" (*Twain*); he tried to *crawfish* out of it, when he saw how he had blundered in his speech.

Ana. Withdraw, retire, depart (see GO): *rebound, recoil.

Ant. Proceed: advance (sense 2).

receipt, n. 1 *Reception.

2 Receipt, recipe, prescription are here compared as meaning a formula or set of directions for the compounding of ingredients especially, but not exclusively, in cookery and medicine. **Receipt**, the oldest of these terms, is now increasingly rare though it is still often employed as a designation of a formula for making a homemade medicine (as, she has an excellent *receipt* for a cough medicine; a *receipt* for a spring tonic that has been followed by the family for several generations), and less often in reference to cookery formulas, the term being gradually displaced in this sense by *recipe*. **Recipe** (etymologically, the Latin imperative meaning *take*) in its earliest use in an English text meant no more than "take" and was used as the initial word (now abbreviated to *R* or *Ry*) of a physician's formula for a medicine. Not until the sixteenth century did the term become a noun denoting such a formula, and not until the mid-eighteenth century was it also applied to a cookery receipt. In the former sense, *recipe* is now rare; in the latter sense, for reasons which are not clear, it is generally preferred to *receipt*. The accepted term in both American and British use for the physician's formula is **prescription**. That term is also applied to the medicine which is compounded according to the terms of the formula; as, Doctor Blank gave him three *prescriptions*; he is still taking the *prescription* for bronchitis.

receive. **Receive, accept, admit, take** are synonymous only when they mean to take or let someone or something come into one's possession, one's presence, one's group, one's mind, one's substance, or the like. They are seldom interchangeable except within a narrow range and, even then, rarely without modification of the thought expressed. **Receive** very often implies nothing more than that which has been stated in the common definition: it may be predicated of persons or of things; as, he did not *receive* the news gladly; the barrel *receives* excess rain water. In general, *receive* implies passiveness in the receiver even when the subject is a person and his response is indicated in the context; as, an infant merely *receives* impressions, for he does not understand them (cf. to be *receptive* to new ideas; to be in a *receptive* frame of mind);

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

soft wax *receives* the impression of anything that touches it. Only when it implies welcoming or recognition does *receive* connote activity in the receiver; as, after some delay, the king *received* the ambassador; the social leaders refused to *receive* the newcomers. "The indifference and hostility with which his earlier work was *received*" (*Day Lewis*). *Accept*, in contrast with *receive*, always implies a measure of mental consent, even of approval. Thus, a person may be *received*, but not necessarily *accepted*, in society; an idea may be *received*, but not *accepted*, by the mind. "In [Dante's] purgatory the torment of flame is deliberately and consciously *accepted* by the penitent" (*T. S. Eliot*). Frequently, *accept* suggests tacit acquiescence rather than active assent or approval. Sometimes, in such cases, it connotes an uncritical attitude. "The man who... *accepted* simply, as a matter of course, the tradition" (*G. L. Dickinson*). Sometimes it implies a surrender to the inevitable. "It is the business of the sensitive artist in life to *accept* his own nature as it is, not to try to force it into another shape" (*A. Huxley*). *Admit* comes into comparison with *receive* only when the agent (the one that lets in) is the one that receives rather than introduces; as, the king *admitted* the ambassador to his presence (cf. the major-domo *admitted* the ambassador to the throne room); the heart *admits* fluid through these apertures (cf. these apertures readily *admit* fluid into the heart). *Admit*, in this restricted sense, is distinguishable from *receive* by slight syntactical differences but chiefly by its strong implications of permission, allowance, or sufferance. Thus, a judge *admits* evidence only after its admissibility has been questioned and he has allowed its entrance. The situation remains the same when the subject is impersonal; as, the archway was wide enough to *admit* ten men abreast. Sometimes these implications are so strong that the idea of receiving is lost; as, this *admits* of no argument. *Admit*, in contrast with *accept*, often adds the implication of concession. Thus, one who *admits* the truth of a contention *accepts* it more or less unwillingly; one can *accept* a proposition without question, but one *admits* it only after one has questioned it. *Take* is a synonym of *receive* only when it suggests no reaching out on one's own part or of one's own initiative to get hold of something (for the usual sense, see *TAKE*, 1) or when it suggests an offering, presenting, conferring, inflicting, or the like, by another: it then implies merely a letting something be put into one's hands, one's mind, one's possession, one's control, or the like; as, this gift was meant for you: *take* it or leave it as you please; he *takes* whatever fortune sends him; the British showed that they can *take* the German bombing. "What was it that made men follow Oliver Cromwell and *take* at his hands that which they would not receive from any of his contemporaries?" (*S. M. Crothers*). "You don't have to *take* anything from him, or to stand his bad manners" (*Cather*).

Ana. *Enter, penetrate: seize, *take, grasp.

receivership. *Insolvency, bankruptcy, failure, suspension.

reception. *Reception*, *receipt* agree in meaning a receiving, but they are not now interchangeable, their correct use being dependent upon accepted idiom. *Reception* is now the preferred term when that which is received is a person, especially a caller, a visitor, a guest, or the like: the term may then apply to the act, fashion, or manner of receiving (as, they are now in line, ready for the *reception* of their guests; she gave all her friends a warm *reception*), or the manner of being received (as, "much pleased with the *reception* she had"—*Pepys*), or a ceremonious receiving or entertaining (as, to invite one's circle of friends to a *reception*; to hold a *reception*

for the out-of-town delegates and their wives), or an admission or entrance as into a place, a society, a company, or the like (as, the house is ready for the *reception* of its new tenants; to call attention to the *reception* of several new members into the society). When that which is received is a thing, *reception* is employed only when to the idea of receiving is added the idea of admitting into, or as if into, a space or enclosure (as, the tower is large enough for the *reception* of several bells), or of apprehension as by a sense, or by the senses, or by the mind (as, the *reception* [i.e., the hearing of sound transmitted by the radio] is not good tonight; their minds are not ready for the *reception* of such ideas; the proposal met a favorable *reception*). *Receipt* (see also *RECEIPT*, 2) is now the preferred term when that which is received is a thing given or sent by another and delivered by hand, by mail, by express, or the like, into one's custody or possession: such a thing may be a sum of money, a piece or lot of goods, a letter or other communication, or the like; as, to acknowledge the *receipt* of goods ordered; I am awaiting the *receipt* of a letter before making my decision. *Receipt* is also applied to a signed paper or document testifying to the receipt of money due, of goods ordered, etc.

recess, n. *Recess*, *alcove*, *nook*, *niche*, *embrasure*, *bay*, *cubicle*, *carrell*, *carol* are comparable only in their architectural senses. *Recess*, the comprehensive term, names any outward, or seemingly outward, projecting space formed by a break in the straight line of a wall. An *alcove* is a recess large enough to contain a bed, or a secretary, or the like. A *nook* is a recess usually formed by something that projects inward and makes a new wall line, such as a chimney, a row of built-in bookcases, or by partitions. A *niche* is a recess in a wall, usually above the floor and below the ceiling, large enough to contain a piece of sculpture or other decorative object. An *embrasure* is a recess formed by an outward projecting window (or windows) or door; a *bay* is a deep embrasure formed by windows arranged in a rectangular, polygonal, or curved line. A *cubicle* may be a very small room, but the term is often applied to an alcove or nook by a window or in an embrasure, for the use of a student or writer. In technical language *carrell* is commonly used when the cubicle is in a library, and *carol* when it is in a monastery.

recherché. Elegant, *choice, exquisite, delicate, dainty, rare.

Ana. Fresh, original, *new, novel: *select, exclusive, picked.

Ant. Banal.

recidivate. *Lapse, relapse, backslide.

Ana. Degrade, deteriorate, decline (see corresponding nouns at *DETERIORATION*).

Con. *Improve, better: reform, amend, remedy, redress, *correct.

recidivation, recidivism. Lapse, relapse, backsliding. See under *LAPSE*, *v*.

Ana. *Deterioration, degeneration, decline, declension, decadence, devolution.

Con. *Reformation, reform.

recipe. *Receipt, prescription.

reciprocal. 1 **Reciprocal**, **mutual**, **common** come into comparison as meaning shared, experienced, shown, or the like, by each of the persons or things concerned. **Reciprocal** has for its distinctive implication the return in due measure by each of two sides of that which exists on the other or of that which is offered, given, or manifested by the other. Usually therefore it implies not only a "this for that," but an equivalence in value (though not necessarily in kind) on each side, as of love, hate, understanding, courtesies, concessions, duties, and the

like; as, *reciprocal* reproaches; the *reciprocal* obligations of capital and labor; "the *reciprocal* feelings of man and woman towards each other" (T. S. Eliot). *Mutual* is often used in place of *reciprocal* when the idea of return or interchange is suggested and that of sharing equally or jointly is stressed; as, *mutual* (or *reciprocal*) affection; *reciprocal* hate (often better than *mutual* in this phrase); *mutual* enthusiasm (often better than *reciprocal* except when there is the intent to imply a giving to and a getting back from each other). But *mutual* only (and not *reciprocal*) is possible when the adjective applies to two persons who entertain reciprocal feelings to each other; as, they are *mutual* friends; *mutual* foes. When there is very little or no suggestion of a reciprocal relation between thoughts, feelings, and the like, and the emphasis is upon the fact that the two persons or things involved entertain the same feelings towards each other, perform the same actions, suffer the same results, or the like, *mutual* is always preferable to *reciprocal*. "They parted at last with *mutual* civility, and possibly a *mutual* desire of never meeting again" (Austen). "Even Shelley sometimes mingles poetry and propaganda to their *mutual* disaster" (Lowes). Both *reciprocal* and *mutual* are sometimes used, even by good writers, when more than two persons, classes, or things are involved. This use is not generally approved when there is no implication of reciprocity, *common* being the preferred term in such a case; thus, one says "we (two, three, or more persons) are *mutual* friends" (i.e., we are all friends of each other) but they have *common* friends (i.e., each of them has friends who are friends of the other or others) or a *common* friend [though Dickens entitled one of his novels *Our Mutual Friend*]; the members of a group may have a *common* (not *mutual* unless reciprocity is involved) purpose. For *common*, as here compared (see also *COMMON*, 3; *UNIVERSAL*, 2), implies a sharing by, or a joint possession of, two or more persons, and differs from *mutual* in not being restricted as to the number involved and in not carrying, when two persons or things are concerned, any suggestion of a reciprocal relation or of an equivalence of feeling, performance, effort, or the like; as, the barons made a *common* cause against the king; "their *common* fund of intellectual interests and curiosities made their talks exhilarating" (E. Wharton); husband and wife have a *common* purse.

Ana. Shared, participated, partaken (see *SHARE*): interchanged, exchanged (see *EXCHANGE*): balancing, compensating, counterpoising (see *COMPENSATE*).

2 Reciprocal, correspondent, correlative, complementary, complemental, convertible are not close synonyms, although in some instances they are interchangeable. All, however, agree basically in meaning like, equivalent, or similarly related to each other as in kind, quality, value, or the like. **Reciprocal**, as here compared (see also *RECIPROCAL*, 1), implies that the likeness or equivalence of two things or of one thing to another rests on the fact of their being returns or a return in kind, value, or quality for that which one side has given to the other; as, the *reciprocal* courtesies manifested in the meeting of the two generals; *reciprocal* attacks in a battle; a treaty providing for *reciprocal* privileges; a teacher hopes for a *reciprocal* interest on the part of his pupils; "believing in the *reciprocal* friendship of the British" (W. Wilson). **Correspondent** implies that the likeness or equivalence proceeds from the fact that one answers to the other or conforms to it so that they are fitted to each other, proportionate to or commensurate with each other, or in perfect accord with each other; as, he found the results *correspondent* to his hopes; "an order of things more *correspondent* to the sentiments of our constituents"

(Jefferson); her ideas of proper housekeeping were not *correspondent* to those of her mother-in-law. **Correspondent** also applies to things which are analogous in position, character, use, and the like, though found in different places, different arts, different plants or animals, or the like; as, *correspondent* organs such as the stomach of a human being and the gizzard of a fowl; the stripes on the blouse are *correspondent* to those on the skirt. **Correlative** implies a close relationship rather than a likeness, but it is applicable chiefly to two things (or one of two things) which cannot exist independently of each other either because one logically implies the other (as, "husband" and "wife," "father" and "son," are *correlative* terms), or one cannot exist without the other (as, "the 'right' of the worker to demand work on reasonable terms, and the *correlative* obligation of the organized community to provide it"—J. A. Hobson; the *correlative* rights and duties of every citizen). In somewhat looser, but correct, use, *correlative* may imply nothing more than so close a correspondence or relation between two things that they come naturally, necessarily, or logically together; as, major changes in social conditions and *correlative* changes in human attitudes; "two *correlative* rules: first, that no one shall be allowed to undertake important work without having acquired the necessary skill; secondly, that this skill shall be taught to the ablest of those who desire it" (B. Russell). **Complementary** (or less often, **complemental**) also implies a close relationship rather than a likeness: the term carries a strong suggestion that one thing is so necessary to another or to others that without it an entire or perfect whole is not possible; as, "It is important to recognise that these two uses of the surplus are *complementary* and not competitive" (J. A. Hobson); "the corpuscular and undulatory concepts of light must be regarded as *complementary* rather than *antithetical*" (Jeans); revelation is regarded by many theologians as *complemental* to reason. **Convertible**, in the sense here considered, implies so strong a likeness that the things, though not identical, are virtually interchangeable; as, "The law, and the opinion of the judge, are not always *convertible* terms, or one and the same thing" (Blackstone); "truth and beauty [as in Keats's line 'Beauty is truth, truth beauty'] have never been recognised as identical, and...to employ their names as *convertible* terms would lead to no end of confusion" (Quiller-Couch).

Ana. Equivalent, identical, *same: related, associated, linked, united (see *JOIN*).

recite. Rehearse, recount, *relate, narrate, describe, state, report.

Ana. Enumerate, tell, *count, number: detail, itemize, particularize (see corresponding adjectives at *CIRCUMSTANTIAL*).

reckless. Daring, daredevil, rash, temerarious, foolhardy, venturesome, venturous, *adventurous.

Ana. *Precipitate, sudden, hasty, headlong, impetuous, abrupt: desperate, hopeless (see *DESPONDENT*).

Ant. Calculating. — **Con.** *Cautious, circumspect, wary, chary.

reckon, v. 1 *Calculate, compute, estimate.

Ana. Enumerate, *count, number: figure, total, *add, sum, cast, foot.

2 *Consider, regard, account, deem.

Ana. *Think, conceive, imagine, envision: *conjecture, surmise, guess.

3 Count, bank, *rely, trust, depend.

reclaim. Save, ransom, redeem, deliver, *rescue.

Ana. *Renew, restore, renovate: reform, rectify, remedy, *correct, amend.

Ant. Abandon. — **Con.** Desert, forsake (see *ABANDON*).

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

reclining. Recumbent, *prone, supine, prostrate, couchant, dormant.

Ana. Resting, reposing (see corresponding nouns at **REST**): leaning, inclining (see **SLANT**, *v.*).

recluse. **Recluse**, **hermit**, **eremite**, **anchorite** (or **anchoret**), **cenobite** (or **coenobite**) are comparable when they designate a person who lives apart from the world to devote himself to prayer, contemplation, and penance. **Recluse** and **hermit** are now also applied to persons who avoid intercourse with men for other than religious motives, but even in their extended senses they retain their original distinguishing implications, for **recluse** stresses retirement from the world into seclusion, and **hermit**, a solitary life lived apart from men and, usually, in a place or under conditions where there is little likelihood of intrusion. **Recluse** is the broader term for it may be applied either to a hermit or to a religious who lives in a cloistered community. In modern Christian use, **hermit** is often applied to a member of one of the very few religious orders, such as the Carthusians, where the monks dwell alone and meet other members of the community only in church and in the refectory on Sundays. **Eremite**, though an archaic variant of **hermit**, is sometimes preferred in modern use because it unequivocally designates a solitary who is under a religious vow. For this reason, its derivative **eremitical** is the preferred adjective, even when **hermit** or **anchorite** is the chosen noun. **Anchorite** and **cenobite** are contrasted terms for the two leading types of recluses in the Eastern and in the Western Church. **Anchorite** designates the type known as **hermit** or **eremite**; **cenobite**, the type that dwells in a community, esp. a strictly cloistered community, as a monk or nun.

recognition. **Recognition**, **identification**, **assimilation**, **apperception** come into comparison only when they designate a form of cognition which relates a perception of something new to knowledge already acquired. **Recognition** implies that the thing now seen, heard, or otherwise perceived has been previously seen, heard, or otherwise perceived, if not in itself, then in another instance of the same species or type, and that the mind is aware that the two things are identical or of the same kind. **Identification** implies not only recognition, but a previous knowledge of the name which belongs to the thing as an individual or as a member of a class, and an ability to apply the name correctly. **Assimilation** implies that the mind responds to new facts, new ideas, and the like, by interpreting them in the light of that which is already known, thereby making them also an integral part of one's body of knowledge. **Apperception**, a word of many meanings, but here compared only as used in educational psychology, denotes a method of learning regarded as normal and therefore as a determinant of methods of instruction. The term implies that the mind responds to new facts, ideas, or situations when it can relate them to that which is already known, and that, on the contrary, it rejects, or is incapable of assimilating, that which it is at the time unprepared to receive.

recognize. *Acknowledge.

Ana. Accept, admit, *receive: notice, note, observe, remark (see **SEE**).

recoil, *v.* 1 **Recoil**, **shrink**, **flinch**, **wince**, **blench**, **quail** agree in meaning to draw back through fear, faintheartedness, or the like. **Recoil** more than any of the succeeding terms suggests the physical signs of such drawing back or the sensations that accompany it. Often the term implies a start, a movement away, a prolonged hesitation, or the like; as, "She sat down on the bench beside him. He recoiled" (*Dickens*); to recoil from the sight of the old man's misery. "Lord Worthington has been telling us about you," said Lydia. He recoiled, evidently deeply

mortified" (*Shaw*). " 'Why shouldn't we go abroad together?'... 'Abroad?' murmured Constance, aghast, recoiling from the proposition as from a grave danger" (*Bennett*). Often, however, the term suggests an inner or not outwardly apparent shaking or stirring that affects one mentally more than physically; as, his mind recoils from the prospect of war; she recoiled from the marriage suggested by her parents. "Archer was too intelligent to think that... Ellen Olenska would necessarily recoil from everything that reminded her of her past" (*E. Wharton*). **Shrink** implies an instinctive recoil, as from something painful or unpleasant or horrible; it often implies cowardice, but it may imply extreme sensitiveness or scrupulousness. "Guilt and misery shrink, by a natural instinct, from public notice" (*De Quincey*). "She shrank from the words which would have expressed their mutual consciousness, as she would have shrunk from flakes of fire" (*G. Eliot*). "He might have shrunk from defending himself at the expense of a frightened, unhappy girl" (*R. Macaulay*). **Flinch**, in precise use, implies a failure in resolution or an inability to overcome one's desire to avoid or evade something that is painful, difficult, or abhorrent; as, he gritted his teeth and did not flinch when the knife cut into his flesh. "She read and took notes incessantly, mastering facts with painful laboriousness, but never flinching from her self-imposed task" (*Hardy*). "Though the color had heightened in his cheek, he did not flinch from his friend's gaze" (*Joyce*). **Flinch** is sometimes used but **wince** is better when, by some involuntary, often slight, physical movement such as starting or recoiling, one manifests his pain, or fear, or acute sensitiveness. "He is as tender as a man without a skin, who cannot bear the slightest touch without flinching" (*Smollett*). "His horse stands wincing at the flies, giving sharp shivers of his skin" (*Hunt*). "Old Lady Kew's tongue was a dreadful thong which made numbers of people wince" (*Thackeray*). "Dinner at the Bronckhorsts' was an infliction... Bronckhorst took a pleasure in saying things that made his wife wince" (*Kipling*). **Blench** is often indistinguishable from **flinch**; it often, however, carries a stronger suggestion of faintheartedness or of signs of fear. "This painful, heroic task he undertook, and never blenched from its fulfillment" (*Jeffrey*). "That glaring and dazzling influence at which the eyes of eagles have blenched" (*Burke*). To **quail** is to shrink coweringly, as from something which strikes terror; as, "There quails Count Guido armed to the chattering teeth. Cowers at the steadfast eye and quiet word O the Canon" (*Browning*); "quailing before his... adversary" (*Shelley*).

Ana. Waver, falter, *hesitate: shy, balk, stick, stickle (see **DEMUR**).

Ant. Confront: defy.

2 *Rebound, reverberate, recoil, resile, repercuss.

Ana. Retreat, *recede, back, retract: *return, revert.

recollect. *Remember, recall, remind, reminisce, bethink, mind.

Ana. *Stir, rouse, arouse, rally, waken, awaken.

recollection. *Memory, remembrance, reminiscence, mind, souvenir.

recommend. *Commend, compliment, applaud.

Ana. *Approve, endorse, sanction: *praise, extol, acclaim.

recompense, *v.* Requite, reimburse, indemnify, repay, satisfy, remunerate, compensate, *pay.

Ana. Award, accord, vouchsafe, *grant: balance, offset, *compensate.

reconcile. Conform, accommodate, adjust, *adapt.

Ana. Harmonize, accord, square, *agree: *correct, rectify, amend, revise.

recondite. *Recondite, abstruse, occult, esoteric* agree in denoting beyond the power of the average intelligence to grasp or understand. *Recondite* stresses difficulty resulting from the profundity of the subject matter or its remoteness from ordinary human interest. It often implies scholarly research carried beyond the bounds of usefulness. "*Recondite* points of law" (*Maine*). *Abstruse* suggests extreme complexity or abstractness in the material as well as its remoteness from the ordinary range of human experience or interest. "The Hibbert Journal, which was endowed to promote *abstruse* theological discussion" (*C. Mackenzie*). "Astronomers watch the stars and mathematicians make *abstruse* calculations" (*Shaw*). *Occult* implies secret, mysterious knowledge purporting to be attainable only through supernatural or magical agencies and not through human reason; as, the *occult* sciences. Often it implies the operation of agencies beyond the reach of human understanding. "Whether it be from natural predisposition or from some *occult* influence of the time" (*J. R. Lowell*). *Esoteric* implies knowledge imparted only to members of a cult or inner circle of initiates. It, however, is extended in use to describe knowledge in the possession only of adepts, specialists, and the like. "To the idea of poetry as exclusive, *esoteric*, a-moral, the private affair of the poet. . . I should oppose the idea of poetry as catholic, diverse in function, moral, everyone's business" (*Day Lewis*).

Ana. Scholarly, erudite, polymathic, *learned: *pedantic, scholastic, academic.

record, n. *Document, monument, muniment, archive.

recount. Recite, *relate, rehearse, narrate, describe, state, report.

Ana. Enumerate, *count, number, tell: detail, itemize, particularize (see corresponding adjectives at CIRCUMSTANTIAL).

recoup, v. Recruit, retrieve, regain, *recover.

Ana. *Compensate, balance, offset, counterpoise.

recover. *Recover, regain, retrieve, recoup, recruit* agree in meaning to get back something that has been let go or lost. *Recover*, the most comprehensive of these terms, may imply a finding or obtaining something material or immaterial that has been lost in any way (as, to *recover* a lost watch; to *recover* one's health; to *recover* one's peace of mind; to *recover* one's balance) or a getting of something in reparation or compensation (as, to *recover* damages in a lawsuit). *Regain*, though often used interchangeably with *recover*, carries a stronger implication of winning back or getting once more in one's possession something of which one has been deprived as by capture, seizure, or by any power natural or human; as, to *regain* a fortress; to *regain* a person's good will; to *regain* one's sight; to *regain* one's freedom. *Regain* also may imply, as *recover* seldom implies, success in reaching again a place or point at which one has been before; as, "in his efforts to *regain* his hotel" (*Meredith*); "the trench allowed the performers, after being thrust down into perdition, to *regain* the green-room unobserved" (*Quiller-Couch*). *Retrieve*, originally and still often a hunting term used in reference to dogs which (in the earlier sense) find or arouse game that has sought cover or which (in the more common sense) seek out and bring back wounded or killed game, in extended use implies a recovering or regaining after assiduous effort or search; as, desperate efforts to *retrieve* lost territory; it now seemed impossible to *retrieve* the foreign trade lost by war; "his desire to *retrieve* his military reputation" (*Bello*); "marvelling at the silent untiring activity with which her popularity had been *retrieved*" (*E. Wharton*). But *retrieve* sometimes takes for its object words such as *loss, error, failure, disaster*, etc., then implying not re-

covery but a repair, as by making that which is bad good, or a reparation, as by making up for that which was wrong or unsuccessful by a series of acts which set things right; as, life is not long enough to *retrieve* so many mistakes; "One false step is ne'er *retriev'd*" (*Gray*); "he is to *retrieve* his father's failure, to *recover* the lost gentility of a family that had once been proud" (*Van W. Brooks*). This latter sense of *retrieve* comes out especially in the adjectives *retrievable* and *irretrievable*; as, an *irretrievable* loss. *Recoup* was originally and still is a legal term implying a rightful deduction, as by a defendant from damages sought by a plaintiff in a lawsuit; thus, when a physician sues a former patient for the payment of his fee, the patient may, if he loses his case, and if he has shown the physician's lack of skill, *recoup* some of the damages. In its extended use *recoup* implies recovery or retrieval by some form of compensation or by reimbursing (oneself); as, he was unable to *recoup* his gambling losses by further play; to *recoup* oneself for expenses incurred in giving shelter and care to the victims of an accident; how will he ever *recoup* the amount lost through reckless investments? "Elizabeth had lost her venture; but if she was bold, she might *recoup* herself at Philip's cost" (*Froude*). *Recruit* literally implies growth through fresh additions: in military use it implies an increase through drafting, enlisting, and the like. However, since the term has often been used in the sense of to fill up vacancies in an army or force resulting from casualties (as, "It was his custom to *recruit* his army with conquered people"—*Newton*), it has come to imply a regaining of that which has been lost (such as vigor through illness, or money through extravagance or heavy expenditures) by fresh additions or replenishment of the supply; as, "*recruiting* his strength with a good plain dinner" (*Dickens*); "[the middle class] is continually *recruited* from the capitalist families" (*Shaw*).

Ana. Redeem, reclaim (see RESCUE): *compensate, offset, balance.

recreant, adj. *Cowardly, pusillanimous, poltroon, craven, dastardly.

Ana. *Timid, timorous: submissive, *tame, subdued: *mean, abject, ignoble.

recreant, n. *Renegade, apostate, turncoat, backslider, pervert.

Ana. Treacherousness or treachery, perfidiousness or perfidy, traitorousness (see corresponding adjectives at FAITHLESS).

recreate. *Amuse, divert, entertain.

Ana. *Renew, restore, refresh, rejuvenate: enliven, *quicken, animate.

recreation. Amusement, diversion, entertainment. See under AMUSE.

Ana. Relaxation, repose, ease (see REST): play, sport, frolic, rollick (see under PLAY, v.): *mirth, jollity, hilarity.

recrudesce. *Return, revert, recur.

Ana. *Renew, renovate, refurbish.

Con. *Suppress, repress: *stop, cease, discontinue.

recrudescence. Return, reversion, recurrence. See under RETURN, v.

Ana. Renewal, restoration, refreshment, renovation (see corresponding verbs at RENEW).

Con. Suppression, repression (see corresponding verbs at SUPPRESS).

recruit, v. *Recover, regain, retrieve, recoup.

Ana. *Renew, restore, renovate, refresh: repair, *mend, rebuild.

rectify. *Correct, emend, amend, reform, revise, remedy, redress.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. *Improve, better, help, ameliorate: *mend, repair, rebuild: *adjust, regulate, fix.

rectitude. Virtue, *goodness, morality.

Ana. Integrity, probity, *honesty, honor: righteousness, nobility (see corresponding adjectives at MORAL): uprightness, justness, conscientiousness, scrupulousness (see corresponding adjectives at UPRIGHT).

recumbent. *Prone, supine, prostrate, reclining, couchant, dormant.

Ant. Upright, erect.

recur. *Return, revert, recrudescence.

Ana. *Repeat, iterate, reiterate.

recurrence. Return, reversion, recrudescence. See under RETURN, *v*.

Ana. Relapse, recidivation, recidivism (see under LAPSE, *v*): repeating or repetition, iteration (see corresponding verbs at REPEAT).

recurrent. *Intermittent, periodic, alternate.

Ana. Rhythmic, metrical (see corresponding nouns at RHYTHM): returning, reverting, recrudescing (see RETURN): *fitful, spasmodic.

redeem. Deliver, *rescue, ransom, save, reclaim.

Ana. *Free, liberate, release, emancipate, manumit: restore, *renew, renovate: *recover, regain.

redintegrate. *Renew, restore, refresh, rejuvenate, renovate, refurbish.

redolence. *Fragrance, perfume, scent, incense, bouquet.

Ana. Odor, aroma, *smell: balminess, aromaticness or aromaticity (see corresponding adjectives at ODOROUS).

redolent. Aromatic, balmy, fragrant, *odorous.

Ana. *Pungent, poignant, piquant, racy, spicy: penetrating, piercing (see ENTER).

redoubtable. *Formidable.

Ana. *Fearful, terrible, dreadful, frightful, awful: intrepid, valiant, doughty, valorous, *brave.

redound. *Conduce, contribute, accrue.

Ana. *Help, aid, assist: further, forward, promote, *advance.

redress, *v*. Emend, remedy, amend, *correct, rectify, reform, revise.

Ana. *Relieve, lighten, alleviate, assuage, mitigate, allay: repair, *mend.

redress, *n*. *Reparation, amends, restitution, indemnity.

Ana. Compensation, offsetting, balancing (see COMPENSATE): *retaliation, reprisal, vengeance, retribution.

reduce. 1 *Decrease, lessen, diminish, abate, dwindle.

Ana. *Shorten, abridge, abbreviate, curtail, retrench: *contract, shrink, condense.

Con. *Increase, augment, enlarge, multiply: *extend, lengthen, elongate, prolong, protract: *expand, swell, amplify.

2 *Conquer, vanquish, defeat, subjugate, beat, overcome, lick, subdue, surmount, overthrow, rout.

Ana. *Weaken, cripple, disable, undermine, enfeeble: humble, humiliate, degrade, debase (see ABASE).

redundancy. *Verbiage, tautology, pleonasm, circumlocution, periphrasis.

Ana. Wordiness, verbosity, prolixity, diffuseness (see corresponding adjectives at WORDY): inflatedness or inflation, turgidity, tumidity, flatulence (see corresponding adjectives at INFLATED): *bombast, rant, fustian.

redundant. *Wordy, verbose, prolix, diffuse.

Ana. *Superfluous, surplus, supernumerary, extra, spare: repeating or repetitious, iterating, reiterating (see corresponding verbs at REPEAT).

Ant. Concise. — **Con.** Terse, succinct, laconic, pithy, summary (see CONCISE): compact, *close.

reef, *n*. *Shoal, bank, bar.

reeve. *Steward, bailiff, agent, factor, seneschal, major-domo, oeconomus.

refer. 1 Assign, credit, accredit, *ascribe, attribute, impute, charge.

Ana. Associate, relate, connect (see JOIN): *direct, aim, point, lay.

2 *Resort, apply, go, turn.

Ana. Consult, *confer, commune, advise: address, *direct.

3 Refer, allude, advert are synonymous when they mean to mention something so as to call or direct attention to it. **Refer**, when unqualified, usually suggests intentional introduction and distinct mention, as by a thing's true name; as, he frequently *referred* to his friends in his letters to us. "Nor do we any longer suppose that we are impertinent in *referring* to the philosopher's personality. . . . For personality is the very stuff of morals" (*H. Ellis*). **Allude**, in correct use, always implies indirect reference, as by a hint, a suggestive phrase, a roundabout or covert method of expression, a figure of speech; it often connotes modesty, timidity, or reticence in the one who alludes. "When Sir Roger . . . said he was glad to meet me among his relations. . . I knew he *alluded* to the pictures" (*Spectator*). Sometimes, however, it connotes bias or ill will. "Proposals, which were never called proposals, but always *alluded* to . . . as innovations" (*C. Mackenzie*). In its strictest etymological sense, *allude* and its derivatives *allusion* and *allusive* imply a play of fancy or a play upon words, especially so as to evoke their emotional, literary, or historical associations. "The works of Bergson, in which pyrotechnical *allusions* are . . . frequent" (*H. Ellis*). "We need not wonder that . . . poets preferred to tell of their emotions and experiences, not directly but *allusively*" (*Binyon*). **Advert** (see ADVERT, 1) is interchangeable with *refer* only in loose use; then the words are scarcely distinguishable in meaning. "I never heard him [Carlyle] *advert* to his works and his fame" (*FitzGerald*).

Ana. *Introduce, insert, interpolate: *quote, cite.

referee, *n*. Umpire, arbiter, *judge, arbitrator.

referendum. Initiative, *mandate, plebiscite.

refinement. *Culture, cultivation, breeding.

Ana. Suavity, urbanity (see corresponding adjectives at SUAVE): courtesy, politeness, civility (see corresponding adjectives at CIVIL): *elegance, grace, dignity.

Ant. Vulgarity.

reflect. *Think, cogitate, reason, speculate, deliberate.

Ana. *Consider, contemplate, study, weigh, revolve: *ponder, muse, meditate, ruminate.

reflection. *Animadversion, stricture, aspersion.

Ana. Imputing or imputation, ascribing or ascription (see corresponding verbs at ASCRIBE): criticizing or criticism, reprehending or reprehension, blaming or blame (see corresponding verbs at CRITICIZE): *attack, assault, onslaught, onset: disparagement, derogation, depreciation (see corresponding verbs at DECRY).

reflective. *Thoughtful, contemplative, meditative, pensive, speculative.

Ana. Thinking, reasoning, deliberating, cogitating (see THINK): analytical, *logical, subtle.

reform, *v*. *Correct, rectify, emend, amend, remedy, redress, revise.

Ana. *Mend, repair, rebuild: better, *improve, help, ameliorate.

reform, *n*. *Reformation.

reformation. **Reformation, reform** are not always clearly distinguished when they mean a making better or a giving of a new and improved form or character and are, therefore, sometimes interchangeable without loss;

as, the *reformation* (or *reform*) of a criminal; the *reformation* (or *reform*) of society. **Reformation** is, however, the preferred term as a designation of a movement that has brought about many revolutionary amendments or improvements, especially in morals or religious practices; as, the Protestant *Reformation* (often, simply *The Reformation*); the English *Reformation*; the Counter *Reformation*. It is also preferred when the idea of reforming, or of remaking, so as to eradicate defects, is stressed; as, "not directed to the *reformation* of what was ill" (*Belloc*); "Never came *reformation* in a flood, With such a heady curranee, scouring faults" (*Shak.*); "It is the moral basis of this *reformation* that I wish to lay" (*J. A. Hobson*). **Reform**, on the other hand, is preferred as a designation of an attempt (whether successful or unsuccessful) to remove abuses, correct corrupt practices, or to make changes for the better in any way; as, to be hostile to all persons advocating *reform*; "Boeotia, choose *reform* or civil war!" (*Shelley*); "a wave of municipal *reform* had passed over it [Barcelona]" (*H. Ellis*). *Reform* also applies, as *reformation* never does apply, to a particular or specific amendment, whether achieved or proposed, as a measure of reform; as, to initiate sweeping *reforms* [not *reformations*] in the government; "a *reform* worthy of a good prince and of a good parliament" (*Macaulay*).

refractory. Recalcitrant, intractable, ungovernable, *unruly, headstrong, willful.

Ana. *Contrary, perverse, froward, wayward: *in-subordinate, rebellious, contumacious.

Ant. Malleable: amenable (sense 2).

refrain, v. **Refrain, abstain, forbear** agree in meaning to keep or withhold oneself voluntarily from something to which one is moved by desire or impulse. **Refrain** is especially suitable when the checking of a momentary inclination is implied; as, to *refrain* from laughter. At times, to *refrain* from an action implies merely its non-performance. "He could scarcely resist calling him in to consult. But by sheer self-coercion he *refrained*" (*Hardy*). **Abstain** is more emphatic than *refrain*, because it usually stresses deliberate renunciation or self-denial on principle. "I have...*abstained* from the use of many expressions, in themselves proper and beautiful, but which have been foolishly repeated by bad Poets" (*Wordsworth*). It also applies with greater frequency to the appetites or passions control over which is essential to self-discipline; as, to *abstain* from intoxicating liquors. "Abstain from fleshly lusts" (1 Peter ii. 11). **Forbear**, as here compared, usually implies self-restraint rather than self-denial, and the exercise of patience or charity. "Few have repented of having *forborne* to speak" (*Johnson*). "Both bear and *forbear*" (*Old Proverb*). In its derivative forms (*forbearance, forbearing*), it implies great patience under provocation or in trial. "I have now put an end to my *forbearance* of him" (*C. Middleton*). "There is a time...For long-*forbearing* clemency to wait" (*Cowper*).

Ana. Check, *arrest, interrupt: *restrain, curb, inhibit.

refresh. *Renew, restore, reintegrate, rejuvenate, renovate, refurbish.

Ana. Enliven, *quicken, animate, vivify: recruit, *recover, regain: recreate, *amuse, divert.

Ant. Jade, addle.

refuge. Asylum, sanctuary, *shelter, cover, retreat, ark.

Ana. Safety, security (see corresponding adjectives at SAFE): stronghold, citadel, *fort, fortress: *harbor, haven, port.

refulgent. Effulgent, luminous, radiant, lustrous, *bright, brilliant, beaming, beamy, lambent, lucent.

refurbish. Renovate, *renew, refresh, restore, rejuvenate, redintegrate.

Ana. *Polish, burnish, furbish, shine, buff.

refuse, v. *Decline, reject, repudiate, spurn.

Ana. *Deny, gainsay: balk, baffle, *frustrate, thwart, foil: debar, *exclude, shut out.

refute. Confute, rebut, *disprove, controvert.

Ana. Contradict, impugn, traverse, negative, contravene (see DENY).

regain. *Recover, recruit, recoup, retrieve.

Ana. Gain, *reach, compass, attain, achieve: redeem, reclaim, save (see RESCUE): redintegrate, restore, *renew.

regal. Royal, *kingly, queenly, imperial, princely.

Ana. Majestic, imposing, stately, magnificent, august (see GRAND): *splendid, resplendent, glorious, sublime.

regale. Tickle, arride, gratify, delight, *please, rejoice, gladden.

Ant. Vex.

regard, v. 1 Respect, esteem, admire. See under REGARD, *n.*

Ana. *Appreciate, cherish, value, prize, treasure.

Ant. Despise. — **Con.** Contemn, scorn, disdain (see DESPISE): reject, repudiate, spurn (see DECLINE, *v.*).

2 *Consider, account, reckon, deem.

Ana. Rate, *estimate, value, assess, assay.

regard, n. **Regard, respect, esteem, admiration,** and their corresponding verbs (**regard, respect, esteem, admire**) agree in denoting a feeling (or to have a feeling) for someone or something which involves recognition of that person's or thing's worth, and some degree of liking. **Regard** is the most colorless as well as the most formal of these words; as, please give him my *regards*. It usually requires qualification to complete its meaning. "She learned to hope that it [the past]...might not cost her Henry's entire *regard*" (*Austen*). "Steve had not been highly *regarded* in his home town" (*S. Anderson*). **Respect** usually implies careful evaluation or estimation of the worth of a person or thing and of the measure of recognition which is due him or it; as, he *respected* their opinions even though he could not agree with them; he held their word in slight *respect*. "One wants to produce in the child the same *respect* for the garden that restrains the grown-ups from picking wantonly" (*B. Russell*). Oftentimes, when the person or thing is rated highly, *respect* implies a show of deference or veneration. "The *respect*, amounting almost to worship, he sometimes saw in the eyes of the people" (*S. Anderson*). Sometimes it suggests observance of that which is proper or fitting; as, to show *respect* for the dead; to *respect* the wishes of one's parents: sometimes it suggests recognition of something as sacred or inviolable; as, to *respect* a person's privacy; to have *respect* for the rights of others. **Esteem** adds to *respect* the implications of a high valuation, a consequent prizing, and of warmth of feeling or attachment. "What things there are Most abject in *regard* and dear in use! What things again most dear in the *esteem* And poor in worth!" (*Shak.*). "In the Renaissance, no Latin author was more highly *esteemed* than Seneca" (*T. S. Eliot*). **Admiration** and **admire**, like *esteem*, imply a recognition of superiority, but they usually connote more enthusiastic appreciation, and sometimes suggest genuine affection. "Miss Welwood, I have long felt the deepest *esteem* for you, and your present courageous attitude in this distressing financial crisis has added *admiration* to *esteem*" (*Deland*). In somewhat looser use, the words stress the personal attractiveness of the object of admiration, and weaken the implication of *esteem*. "What sight...is sadder than the sight of a lady we *admire* *admiring* a nauseating picture?" (*L. P. Smith*).

Ana. Deference, *honor, homage, reverence: apprecia-

tion, cherishing, prizing, valuing (see corresponding verbs at APPRECIATE).

Ant. Despite. — **Con.** Contempt, scorn, disdain (see under DESPISE).

regarding. *About, concerning, respecting, anent.

region. *Area, tract, zone, belt.

Ana. *Locality, vicinity, district, neighborhood: section, sector, division, *part: *field, territory, province.

register, n. *List, table, catalogue, schedule, roll, roster, rota, canon, inventory.

regressive. Retrogressive, retrograde, *backward.

Ant. Progressive.

regret, n. *Sorrow, grief, heartache, anguish, woe, dole.

Ana. Compunction, remorse, *penitence, repentance, contrition: *qualm, scruple, demur.

regular, adj. 1 **Regular, normal, typical, natural** come into comparison when they mean being of the sort or kind that is expected as usual, ordinary, or average. A person, or far more often, a thing, is **regular** (opposed to *irregular*) that conforms to what is the prescribed rule or standard or the established pattern for its kind; as, to undergo the *regular* tests for admission to the army; a *regular* verb; a *regular* meeting of a society; he is a *regular* practitioner (as opposed to a quack). A person or a thing is **normal** (opposed to *abnormal* or *exceptional*) that does not deviate in any marked way from what has been discovered or established as the norm (see *norm* under AVERAGE, *n.*) for one of its kind: In contrast with *regular*, the term carries a stronger implication of conformity within certain prescribed limits or under certain given conditions, and therefore sometimes admits a wide range of difference among the things that may be described as normal for a class or kind; as, *normal* winter weather; he is a perfectly *normal* child physically as well as mentally; his pulse is *normal* for a person of his age. But when applied to persons, *normal* often specifically connotes mental balance or sanity (as, his actions are not those of a *normal* person): on the other hand, it may connote merely an approach to the average in mentality, implying the exclusion of those below or above this average. "Exceptional capacities are not infrequently associated with mental instability, and in such cases it is desirable to adopt methods [of education] which would be bad for the *normal* boy" (*B. Russell*). "The twins, since they had gone to Oxford, never admitted that they cared for any books that *normal* people cared for" (*R. Macaulay*). A person or thing is **typical** (opposed to *individual*) that markedly exhibits the characters or characteristics peculiar to the type, class, species, group, or the like, to which he (or it) belongs, often to the exclusion or the obscuring of any that differentiate him (or it) as a particular member of the type, class, or species; as, a *typical* example of Browning's style; "I would suggest that the most *typical*, as it is probably the oldest of the arts, is the Dance" (*Binyon*); "The political situation in Ceylon was *typical* of that encountered elsewhere in the East" (*V. Heiser*); "only that is good even on this level which pleases the *typical* or *normal* or generic man" (*S. Alexander*); "a *typical* English country town with wide High Street, narrow Market Street, picturesque Market Square" (*C. Mackenzie*). A person or thing is **natural** (as here compared: see also NATURAL, 2) that acts, behaves, operates, or the like, in accordance with the nature or essence of his (or its) kind or constitution or that is normal in or suitable to him (or it) because of that nature or constitution; as, the father is the *natural* protector of his children; the *natural* love of a mother; flesh is the *natural* food of a dog; he died from *natural* causes.

Ana. *Usual, habitual, customary: *common, ordinary, familiar.

Ant. Irregular.

2 *Orderly, methodical, systematic, regular.

Ana. Fixed, set, settled (see SET): constant, even, equable, *steady, uniform.

Ant. Irregular.

regulate. *Adjust, fix.

Ana. *Order, arrange, organize, systematize, methodize: temper, attemper, *moderate: *correct, rectify.

regulation. Rule, *law, precept, statute, ordinance, canon.

Ana. Instruction, direction, bidding (see corresponding verbs at COMMAND): deciding or decision, determination, ruling (see corresponding verbs at DECIDE).

rehearse. *Relate, narrate, describe, recite, recount, state, report.

Ana. *Repeat, iterate, reiterate: detail, itemize, particularize (see corresponding adjectives at CIRCUMSTANTIAL).

reify. *Realize, actualize, embody, incarnate, materialize, externalize, objectify, substantiate, substantialize, hypostatize.

reimburse. Indemnify, repay, recompense, requite, compensate, remunerate, satisfy, *pay.

Ana. Recoup, *recover: *compensate, balance, offset.

reiterate. *Repeat, iterate, ingeminate.

reject, v. Repudiate, spurn, refuse, *decline.

Ana. *Discard, cast, shed: oust, expel, dismiss, *eject: *exclude, debar, shut out, eliminate.

Ant. Accept: choose, select.

rejoice. Delight, gladden, *please, gratify, tickle, arride, regale.

Ana. Elate, exult (see corresponding adjectives at ELATED).

Ant. Grieve: aggrieve: bewail.

rejoin. *Answer, respond, reply, retort.

Con. Question, interrogate, *ask, inquire, query, catechize, examine.

rejoinder. Answer, response, reply, retort. See under ANSWER, *v.*, 1.

Ana. Returning or return, reverting or reversion (see under RETURN, *v.*): *retaliation, reprisal.

rejuvenate. *Renew, restore, refresh, reintegrate, renovate, refurbish.

relapse, v. *Lapse, backslide, recidivate.

Ana. Revert, *return: degenerate, decline, deteriorate (see corresponding nouns at DETERIORATION).

relapse, n. Lapse, backsliding, recidivation, recidivism. See under LAPSE, *v.*

Ana. *Reversion, atavism, throwback: degeneration, decline, declension, decadence, *deterioration.

relate, v. 1 **Relate, rehearse, recite, recount, narrate, describe, state, report** come into comparison when they mean to tell orally or in writing the details or circumstances necessary to others' understanding or knowledge of a real or imagined situation or combination of events. **Relate** implies the giving of an account, usually a detailed or orderly account, of something one has witnessed, experienced, or otherwise directly known; as, to *relate* the story of one's life; to *relate* an experience; "Then Father Junipero and his companion *related* fully their adventure" (*Cather*). **Rehearse** (etymologically, to harrow over again) usually suggests a repetition: it may imply a summary of what is known (as, "let us *rehearse* the few facts known of the inconspicuous life of Thomas Traherne"—*Quiller-Couch*), or a second or third or oft-repeated telling (as, "his mother. . . proceeded to *rehearse* once more the monstrous tale of the affront inflicted on

Mrs. Lovell Mingott"—*E. Wharton*), or a going over and over in one's mind, or with another person, or in privacy before relating (and, by extension, delivering, performing, presenting, etc.) it to others or to an audience (as, "Mr. Hynes hesitated a little longer.... He seemed to be *rehearsing* the piece in his mind"—*Joyce*; "On his way across the Atlantic... he had *rehearsed* this meeting in varying keys"—*H. G. Wells*). *Recite* and, in the sense here considered, the now more common *recount* imply greater particularity of detail than the preceding terms; in fact, the implication of enumeration or of mention of each particular is so strong that both verbs commonly take a plural object; thus, one *relates* an experience, but he *recites* or *recounts* his experiences; so, to *recite* (or *recount*) the events of the day; "she often *recounts* the conversations with which they filled the long, hot days of driving" (*L. P. Smith*). *Narrate* suggests the employment of devices characteristic of the literary narrative, such as plot, excitement of suspense, movement toward a climax, and the like; as, "What verse can sing, what prose *narrate* The butcher deeds of bloody Fate" (*Burns*); "The discovery of Madeira is *narrated* with all the exaggerations of romance" (*Southey*). *Describe* now usually implies emphasis upon details that give the hearers or readers a clear picture or that give not only a visual representation but one that appeals to the other senses. "Bitter sea and glowing light, bright clear air, dry as dry,—that *describes* the place" (*Jeffries*). "It had never occurred to him that a captain's wife could be anything but a woman to be *described* as stout or thin, as jolly or crabbed, but always mature" (*Conrad*). *State* stresses particularity, clearness, and definiteness of detail, and suggests the aim of presenting facts, ideas, feelings, etc., in their naked truth so that they will be distinctly understood or fixed in others' minds. "Swinburne was also a master of words, but Swinburne's words are all suggestions and no denotation.... Dryden's words, on the other hand, are precise, they *state* immensely, but their suggestiveness is often nothing" (*T. S. Eliot*). "One should know what one thinks and what one means, and be able to *state* it in clear terms" (*R. Macaulay*). *Report* implies a recounting and narrating, often after investigation, for the information of others, especially the readers of a newspaper; as, to *report* the progress on defense projects to the cabinet; the ambassador to Great Britain is returning to Washington to *report* on the war situation; he was assigned to *report* the murder trial; he must *report* the events of each day to his father and mother when he returns from school.

Ana. Tell, *reveal, disclose, divulge; detail, itemize, particularize (see corresponding adjectives at CIRCUMSTANTIAL).

2 Associate, link, connect, *join, combine, unite.

Ana. Attach, *fasten, fix: refer, assign, credit, impute, *ascribe.

Con. Disengage, *detach, abstract, prescind: divorce, sever, sunder, *separate.

3 *Bear, pertain, appertain, belong, apply.

related. *Related*, *cognate*, *kindred*, *allied*, *affiliated* come into comparison when they mean connected by, or as by, close family ties. *Related*, when referred to persons, usually implies consanguinity, or a blood connection; sometimes, however, it implies connection by marriage; as, the royal families in Europe are nearly all *related* to each other. When applied to things, *related* suggests some connection, often a close one, the nature of which is to be gathered from the context and which may be, variously, a common origin, a common cause, interdependence, reciprocal action, mutual opposition,

etc.; as, *related* species; *related* events; *related* activities; every part of an organism is *related* to the other parts; body and soul are contrasted, but *related*, concepts. *Cognate*, in discriminating use, differs from *related* in being referable only to things that are generically alike or that can be shown to have a common ancestor or source or to be derived from the same root, stock, or the like; as, *cognate* races; *cognate* languages; *cognate* words in various languages, such as "pater," "Vater," "father"; physics and chemistry are *cognate* sciences. *Kindred*, in its primary sense, stresses blood relationship; as, the *kindred* members of a community. In its more common extended sense, it implies likenesses that might be characteristic of a family, such as common interests, tastes, aims, qualities, and the like. When the reference is to persons, congeniality is usually connoted. "He would never be popular... but he might appeal to a little circle of *kindred* minds" (*Joyce*). When applied to things, a more obvious connection or a closer likeness is implied than in *related*. "*Kindred* qualities in two otherwise alien tongues [Hebrew and English]" (*Lowes*). *Allied* more often implies connection by union than by origin, and especially by marriage or by voluntary association. It often connotes a more remote family connection than *related*. "The Raycie blood was... still to be traced in various *allied* families: Kents, Huzzards, Cosbys" (*E. Wharton*). In its extended use it usually stresses the possession of common characters, qualities, aims, effects, and the like, which lead either to union or to inclusion in the same class or category; as, *allied* genera; *allied* physical types; *allied* societies; *allied* diseases. *Affiliated* also stresses connection by union, but in precise use, it implies a dependent relation such as that of a child to a parent. Sometimes it implies the adoption of the weaker by the stronger; as, a small college *affiliated* to a university. Sometimes it connotes a loose union in which the affiliating units retain their independence, but derive support or strength from the main, central, or parent body, or co-operate in its work; as, Monte Cassino and *affiliated* monasteries; the CIO and its *affiliated* unions.

Ana. Associated, connected (see JOIN): *reciprocal, correspondent, correlative, convertible, complementary: akin, identical, alike, analogous (see SIMILAR): *relevant, germane, pertinent.

relative. *Dependent, contingent, conditional, adjective. **Ant.** Absolute.

relaxation. *Rest, repose, leisure, ease, comfort.

Ana. Amusement, diversion, recreation (see under AMUSE, v.): relieving or relief, assuagement, alleviation, mitigation (see corresponding verbs at RELIEVE).

relaxed. *Loose, slack, lax.

Ana. Mitigated, lightened, alleviated, assuaged, relieved (see RELIEVE): flexuous, sinuous (see WINDING): *soft, mild, gentle, lenient.

Ant. Stiff. — **Con.** Strict, *rigid, rigorous, stringent: *severe, stern, austere, ascetic.

release, v. *Free, liberate, emancipate, manumit, deliver, discharge, enfranchise, enfranchise.

Ana. *Detach, disengage: *exculpate, exonerate, acquit: surrender, resign, yield, *relinquish.

Ant. Detain (as a prisoner): check (as thoughts, feelings, etc.): oblige (as a promise, pledge, etc.).

relegate, v. *Commit, entrust, confide, consign.

Ana. Refer, assign, credit, accredit, charge (see ASCRIBE).

relent. *Yield, submit, capitulate, succumb, defer, bow, cave in.

Ana. Comply, acquiesce (see corresponding adjectives

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

at COMPLIANT): forbear, *refrain, abstain: *abate, subside, wane, ebb.

relentless. Unrelenting, merciless, implacable, *grim. *Ana.* Inexorable, obdurate, adamant, *inflexible: strict, stringent, *rigid, rigorous: *fierce, ferocious, cruel, inhuman.

Con. *Soft, lenient, mild, gentle: *tender, compassionate: yielding, submitting or submissive (see corresponding verbs at YIELD).

relevant. Relevant, germane (or german), material, pertinent, apposite, applicable, apropos (or, sometimes, à propos) agree in meaning having a relation to or a bearing upon the matter in hand or the present circumstances. That is **relevant** which has any traceable connection, especially logical connection, with the thing under consideration and which has significance in any degree for those who are engaged in such consideration; as, the judge decided that the evidence was *relevant* and therefore admissible. "The controversy between the useful and the ornamental is *relevant* [to a discussion of the ends of education], though not decisive. Should children be taught to enunciate correctly and to have pleasant manners, or are these mere relics of aristocracy?" (*B. Russell*). That is *germane* which is so closely related as in spirit, tone, or quality, to the subject, the matter, the occasion, the issue, or the like, that the fitness or appropriateness of their association is beyond question; as, to enliven his lecture by introducing amusing anecdotes *germane* to his subject; an interesting point but not *germane* to the issue; to rule out all festivities not *germane* to the celebration of Memorial Day. "To a writer happily engaged on his work and excited by it, there may come a curious extension of his ordinary faculties...; *relevant* passages will quote themselves to his mind from books that he scarcely remembers to have ever read; and he suddenly sees *germane* connections where in his ordinary state of mind he would see nothing" (*C. E. Montague*). That is *material* which is so closely related to the matter in hand that it cannot be dispensed with without having an evident effect, especially a harmful effect; as, these facts, though *relevant*, are not *material* to the defendant's case. "Certain passages *material* to his understanding the rest of this important narrative" (*Scott*). That is *pertinent* which is so decisively or significantly relevant that it touches the real point at issue or contributes materially to the understanding of what is under discussion or to the solution of that which is in question. "Be humble and gentle in your conversation; and of few words, I charge you; but always *pertinent* when you speak" (*Penn*). "It is more *pertinent* to observe that it seems to me that logically and rationally a man cannot be said to be more than once in jeopardy in the same cause, however often he may be tried" (*Justice Holmes*). That is *apposite* which is relevant and germane to such a degree that it strikes one both by its pertinency and by its felicitousness; as, an *apposite* illustration. "Judged by standards that have no intelligible *appositeness* when applied to an artist" (*Mencken*). That is *applicable* which may be brought to bear upon or be used fittingly in reference to a particular case, instance, problem, or the like; as, the word "tool" is *applicable* to a plow only when used in a general sense; the principle is not *applicable* to the case in question. "Although... I do not get much help from general propositions in a case of this sort, I cannot forbear quoting what seems to me *applicable* here" (*Justice Holmes*). That is *apropos* (sometimes found in its French form *à propos*) which is both appropriate and opportune; as, a person who is not aware of an undercurrent of feeling may make remarks that are far from *apropos*. "The wit of man could not

have found out a conduct more *à propos* in that conjuncture, than what the king used" (*R. North*). When followed by a preposition (in precise use of, but often also *to*), it usually suggests relevancy rather than appropriateness or opportuneness; as, "tell you a story *apropos* of two noble instances of fidelity and generosity" (*Walpole*).

Ana. *Related, cognate, allied: fitting, appropriate, proper (see FIT): important, significant, weighty (see corresponding nouns at IMPORTANCE).

Ant. Extraneous. — *Con.* Alien, foreign, *extrinsic.

reliable. Reliable, dependable, trustworthy, trusty, tried come into comparison when they are applied to persons, their utterances, views, methods, instruments, or the like, and mean having or manifesting qualities which assure one that he or it merits confidence or trust. A person or thing is *reliable* when one can count upon him or it not to fail in doing what he or it is expected to do competently (as, she is a very *reliable* servant; one of the most *reliable* of our employees; a *reliable* washing machine), or to give or tell the exact truth (as, a *reliable* work of reference; *reliable* testimony). A person or thing is *dependable* to whom (or which) one can go in full confidence that one will get the support or assistance required in time of need or in an emergency; as, to ask a friend to recommend a *dependable* physician; he is the most *dependable* of our friends; a *dependable* source of information. *Dependable* is also used merely as a descriptive term implying a character that admits nothing that is incalculable, or that is the antithesis of that which is fickle, capricious, or the like. "Laura wasn't pretty, but... healthy-looking and *dependable*" (*M. Austin*). A person, or less often, a thing, is *trustworthy* that merits or has earned one's complete confidence in his (or its) soundness, integrity, veracity, discretion, reliability, or the like; as, a *trustworthy* confidant; a *trustworthy* witness; a *trustworthy* wife. "The most *trustworthy* comment on the text of the Gospels and the Epistles is to be found in the practice of the primitive Christians" (*Macaulay*). A person is *trusty* who has been found by experience to be reliable and trustworthy; as, a *trusty* guide; a *trusty* servant; a *trusty* prisoner (often called a "trusty"). A thing is *trusty* that has been found never to have failed one in need or in an emergency, or that has been found dependable whenever needed; as, "his *trusty* sword" (*Spenser*); "he wrapped the *trusty* garment about him" (*Cather*). A person or thing is *tried* that has demonstrated his (or its) reliability, dependability, trustworthiness, or trustiness again and again; as, a *tried* and true friend; a *tried* remedy; a *tried* soldier; "his *tried* expedients" (*Bagehot*).

Ana. *Safe, secure: *infallible, inerrable, inerrant, unerring: cogent, *valid, sound, convincing, telling.

Ant. Dubious. — *Con.* *Doubtful, problematical, questionable.

reliance. *Trust, confidence, dependence, faith.

Ana. Credence, credit, *belief, faith: assurance, conviction, certitude, *certainty.

reliant. Reliant, self-reliant are often contrasted rather than synonymous terms. *Reliant* usually suggests dependence on another (or on others) that is the result either of confidence in his (or their) powers or, more often, of one's own weakness and need of external support; as, a religious man, always *reliant* on the help of God; she is too *reliant* on her husband; "Seem not *reliant*,—loose thy clinging hand" (*B. Taylor*). *Self-reliant*, on the other hand, carries a strong implication of independence and of trust in oneself; however, it suggests courage and backbone more than overweening self-confidence; as, to bring up one's children to be

self-reliant; "Johnson first taught literary men the lesson of *self-reliance*" (*Jowett*); doles which tend to pauperize even the *self-reliant* poor.

relics. Remains,avings, *remainder, residue, residuum, rest, balance, remnant.

relieve. Relieve, alleviate, lighten, assuage, mitigate, allay agree in meaning to make something tolerable or less grievous. Though they are often used interchangeably, they are clearly distinguishable. *Relieve* implies a lifting of enough of a burden to make it definitely endurable or temporarily forgotten; as, drugs that *relieve* pain; to *relieve* the misery and suffering caused by a disaster. Occasionally *relieve*, when used in the passive, implies a release from anxiety or fear; as, they were greatly *relieved* when her letter came: sometimes, it suggests a break in monotony or in routine. "I've had some trouble to get them together to *relieve* the dullness of your incarceration" (*Meredith*). *Alleviate* stresses the temporary or partial nature of the relief and usually implies a contrast with *cure* and *remedy*; as, oil of cloves will *alleviate* the toothache. "It has always been considered as an *alleviation* of misery not to suffer alone" (*Johnson*). *Lighten* implies reduction in the weight of that which oppresses or depresses; hence it often connotes a cheering or refreshing influence; as, his interest in his work *lightened* his labors. "That blessed mood... In which the heavy and the weary weight Of all this unintelligible world Is *lightened*" (*Wordsworth*). *Assuage* suggests the moderation of violent emotion by influences that soften or mollify or, sometimes, sweeten. "The good gods *assuage* thy wrath" (*Shak.*). "My sorrows I then might *assuage* In the ways of religion and truth" (*Cowper*). *Mitigate* also suggests moderation in the force, violence, or intensity of something painful; it does not, as *assuage* does, imply something endured but something inflicted or likely to inflict pain; as, "to *mitigate* the barbarity of the criminal law" (*Inge*); to *mitigate* the rigors of an explorer's life; to *mitigate* the severity of a winter. *Allay*, though it seldom implies complete release from that which distresses, disquiets, or the like, does suggest an effective calming or quieting; as, the report *allayed* their fears; to *allay* one's thirst; his suspicions were *allayed*. "These... words... were of sobering tendency; they *allayed* agitation; they composed, and consequently must make her happier" (*Austen*).

Ana. *Comfort, console, solace. *moderate, qualify, temper, attemper: diminish, reduce, lessen, *decrease. **Ant.** Intensify: embarrass: alarm.

religion. Religion, denomination, sect, cult, communion, faith, creed, persuasion, church come into comparison when they denote a system of religious belief and worship or the body of persons who accept such a system. Religion, the usual uncolored term, may apply to any system, such as Christianity, which represents the beliefs and worship of all those who accept a given revelation, or to one, such as Anglicanism, which represents the beliefs and practiced worship of a specific body of those who accept the same revelation; as, the great religions such as Judaism, Christianity, Buddhism, and Mohammedanism; the Methodist religion; the religion of the Arabs; the religion of the Scribes and Pharisees. Denomination strictly applies to a body of people holding common and distinctive religious beliefs and called by a particular name so as to distinguish them from a more inclusive body; as, the various denominations of Protestants; the leading Christian denominations. Sect strictly means a following and was formerly often, but is now rarely, applied to a group of persons who follow a particular philosopher or school of thought or rule of conduct, or the like (as, "For we have found this man

[Paul] a pestilent fellow, and a mover of sedition among all the Jews throughout the world, and a ringleader of the sect of the Nazarenes"—*Acts* xxiv. 5; "Einstein... is not even to be included... in that rigid sect which asserts that all real science is precise measurement"—*H. Ellis*): rather through a confusion of its true etymology with a false one, *sect* has come to be applied to a group cut off from a larger body, such as that of Christians, or, more specifically, of an established or a parent church, by differences in the interpretation or application of what all regard as the same revelation; thus, one speaks of the Christian religion (never *sect*) as comprising all who accept the New Testament as divine revelation, or of the various sects (not religions, or even denominations) into which the seventeenth-century and eighteenth-century Protestant denominations were divided. Cult is applied either to a form of religious worship followed by a group, often by a group in a nontheistic religion, or to the group which practices such a form of worship; as, "Ever since the close of the Punic War foreigners had been thronging to Rome, bringing with them their foreign cults" (*Buchan*); "The romantic error has been... in short, to turn the nature cult into a religion" (*Babbitt*). Communion stresses not difference from others but union in essentials such as of religious belief and discipline: the term applies therefore not only to a large body (as, the Roman Catholic communion) but especially to one comprising several smaller bodies or organizations such as national churches (thus, the Anglican communion includes all who are united with the Church of England in matters of faith and order) or even several sects of a denomination (as, the Presbyterian communion). Faith and creed apply to any system of belief and worship that is clearly formulated and definitely accepted; as, men of all faiths were present; creeds are often a cause of division. Persuasion, like sect, does not invariably imply reference to religious beliefs and worship (as, men of the same political persuasion): very commonly, however, it does imply such reference, then carrying suggestions very much like those of faith; as, men and women of the Baptist persuasion. Church is often used colloquially, by Christians, in either of these senses, and with implications that closely relate it to denomination. Distinctively, it always suggests a clearly defined character, both as a system of beliefs or as a body of persons, and often carries a stronger connotation of organization than denomination carries; as, to what church does he belong?; some churches that forbade dancing now countenance it.

religious, adj. 1 *Devout, pious, pietistic, sanctimonious.

Ana. *Faithful, stanch, steadfast, leal, true: virtuous, righteous, noble, *moral, ethical: *upright, just, honorable, honest.

Ant. Irreligious. — **Con.** Ungodly, godless (see IRRELIGIOUS).

2 Spiritual, *holy, sacred, divine, blessed.

Ant. Secular (of schools, journals, authorities, etc.): profane (of music, drama, etc.).

religious, n. Religious, monk, friar, nun agree in meaning a member of a religious order all of whose members are bound by the monastic vows of poverty, chastity, and obedience, and who lead, to a greater or lesser extent, a cloistered life. Religious is the comprehensive term, applicable either to a man or a woman: it implies a living apart from the world either in a cloistered community formed of members of the same order, or as a hermit (see RECLUSE) under the governance of the superior or superiors of an order. Monk is often used, especially in current English, to designate any male

religious; strictly, however, the term applies to a member of certain religious orders for men, such as the Benedictine or Cistercian orders, whose members live an ascetic life in a cloistered community, originally, and still commonly, in the same establishment for life, and devote themselves mainly to contemplation and prayer and to liturgical observances, carrying on in the meantime other labors such as, in medieval days, the copying of manuscripts, and in the present day, various scholarly, artistic, scientific, and other employments. **Friar** (etymologically, *brother*) applies strictly to a member of any mendicant order, especially to one of four, the Franciscan (often called *Gray Friars*, because of the original color of their habit), the Dominican (or *Black Friars*), the Carmelite (or *White Friars*), the Augustinian (or *Austin Friars*), under whose original regulations neither personal nor community tenure of property was allowed, whose members lived by alms, and wandered from place to place preaching the Gospel, administering the sacraments, and the like. At the present time, *friar* applies to any member of these four orders or of any order patterned after them, whether he lives as a mendicant or in a cloistered community and whether he serves as a pastor, a curate, a missionary, a preacher, a teacher, or the like. Both *monk* and *friar* in the strict sense of each term are also distinguished from other types of religious, as the *hermit* (see **RECLUSE**), the *canon regular*, such as a member of the Premonstratensians, who combines the life of the cloister with the charge of a cathedral or collegiate church, the *clerk regular*, such as a member of the Society of Jesus (the Jesuit order) whose members though bound by monastic rules go abroad as ministers of the gospel, and from members of various other congregations, such as the Vincentians, who serve as teachers, hospitalers, missionaries, and the like. **Nun** applies only to a female religious: since there are no terms to distinguish nuns according to the severity of their discipline, the rigor of their cloistered life, and the nature of their duties, the word is generally applied to any member of a religious order of women who wear a habit and devote themselves to prayer and their chosen work.

relinquish. *Relinquish, yield, leave, resign, surrender, cede, abandon, waive* come into comparison when they mean to let go from one's control or possession or to give up completely. **Relinquish** in itself seldom carries any added implication, but it often acquires color from the words with which it is associated or from the character of the thing given up; as, he was disinclined (or glad) to *relinquish* his command; he *relinquished* his grasp only after a struggle. "He had let something go . . . something very precious, that he could not consciously have *relinquished*" (*Cather*). **Yield** adds to *relinquish* the implication of concession or compliance: in some collocations it does not even suggest finality—a prevailing but not always necessary implication in the words of this group—but rather, a giving way as a favor, or as a sign of weakness, or as an indulgence. "Yield not thy neck To fortune's yoke, but let thy dauntless mind Still ride in triumph over all mischance" (*Shak.*). **Leave** is often used colloquially in place of *relinquish*, sometimes implying a forsaking (as, "we have *left* all, and have followed thee"—*Mark* x. 28; "He has *left* me . . . Quitted me! Abandoned me!"—*Bennett*), sometimes a giving up or letting go that may suggest motives or intentions as far apart as sacrifice (as, "the opium eater who cannot *leave* his drug"—*T. Wolfe*) and as neglect (as, "By all ye *leave* or do, The silent, sullen peoples Shall weight your Gods and you"—*Kipling*) and as concession (as, "the constitution *leaves* them [the States] this right in the confidence that they will not abuse it"—*Ch. Just. Marshall*) and as

imposition upon others (as, she *leaves* most of the work to her sister). **Resign** emphasizes voluntary or deliberate sacrifice: it usually connotes either renunciation or acceptance of the inevitable. (These connotations are especially strong in *resigned* and *resignation*.) "Resign our own and seek our Maker's will" (*Cowper*). "In her face . . . was that same strange mingling of *resigned* despair and almost eager appeal" (*Galsworthy*). **Surrender**, in precise use, distinctively implies the existence of external compulsion or demand: it commonly suggests submission after a struggle but carries no connotation of submissiveness. "When they saw all that was sacred to them laid waste, the Navajos . . . did not *surrender*; they simply ceased to fight" (*Cather*). At times, the implication of resistance is blurred and that of conscious sacrifice, as for a greater advantage, is heightened; as, to *surrender* one's right to a portion of an estate for the sake of another member of the family. **Cede** is narrower in its application than *surrender*: as a rule, it suggests juridical pressure, as expressed in a court decision, the findings of arbitrators, or the terms of a treaty, though it may suggest previous negotiation, and is used in reference to the transfer of lands, territory, or the like. **Abandon** (as here compared: see also **ABANDON**, 1) stresses finality and completeness in relinquishment, especially of intangible things such as hopes, opinions, methods, or schemes. "No, no; you stick to your prejudices, or at any rate don't *abandon* them on my account" (*C. Mackenzie*). **Waive**, like *yield*, does not invariably imply finality and often suggests a concession, but unlike *yield* and the other terms of this group, it seldom implies the compulsion of force or necessity. Its main implication is a refusal to insist on something, such as a right, a claim, one's preference, one's immunity, obedience to a rule, law, or convention, or the like, usually for the sake of courtesy, simplicity, or concentration on that which is relatively more important; as, to *waive* extradition proceedings; to *waive* a jury trial; he *waived* his right to be heard in his own defense; "He *waived* the ceremony of introduction" (*Burney*); "If art can enthral him, he is willing to *waive* all question of logic or rationality" (*Babbitt*).

All of these words except *relinquish, leave, cede, and waive* may be used reflexively in the sense of giving oneself up to someone or something. They retain their distinctive implications in this usage but they show their differences mainly in their indirect objects. One *surrenders oneself* or, now less often, *yields oneself* to a superior power or force, as a conqueror or a court of justice or an overwhelming emotion; one *resigns oneself* to that which is inevitable or inescapable; one *abandons oneself* to an emotion, a mood, an irresistible influence, a temptation, because of loss of self-control or of relaxation of the will; as, the alleged thief *surrendered himself* to the police today; he will never *resign himself* to the thought of death. "Delia . . . *abandoned herself* to the spell of the moonlit hour" (*E. Wharton*).

Ana. *Abdicate, renounce, resign, demit: *abandon, desert, forsake: *forgo, forbear, abnegate, sacrifice: *discard, shed, cast.

Ant. Keep.

relish, n. 1 Savor, tang, flavor, *taste, sapidity, smack. 2 *Taste, palate, gusto, zest.

Ana. Liking, loving, enjoying, relishing (see **LIKE**): *predilection, partiality, prepossession, prejudice, bias: propensity, *leaning, flair, penchant.

relish, v. Fancy, dote on or upon, enjoy, *like, love.

Ana. Appreciate, *understand, comprehend: *approve, endorse, sanction.

relishing. *Palatable, appetizing, savory, sapid, saporous, tasty, toothsome, flavorful.

Ana. Pleasing, gratifying, delighting, rejoicing, tickling, regaling (see **PLEASE**).

Con. Flat, *insipid, jejune, banal, inane.

reluctant. *Disinclined, indisposed, hesitant, loath, averse.

Ana. *Cautious, circumspect, chary, wary, calculating: *antipathetic, unsympathetic.

Con. Inclined, disposed, predisposed (see **INCLINE**, *v.*):

*eager, avid, keen.

rely. **Rely, trust, depend, count, reckon, bank** come into comparison (as intransitive verbs) when they mean to have or place full confidence. One **relies on** or **upon** someone or something that one believes will never fail in giving or doing what one wishes or expects. **Rely** usually connotes a judgment based on previous experience and, in the case of persons, actual association; as, he **relies** on his father to help him out of any trouble he gets into; he never **relies** on the opinions of others; a physician upon whom all his patients **rely**. "Even in Miss Jekyll's gardens, with all his admiration for them, Britten could be **relied** upon to find some fault or other" (*L. P. Smith*). "Bitter experience soon taught him that lordly patrons are fickle and their favour not to be **relied** on" (*A. Huxley*). "She bored no one who read her [novels], because she could be **relied** on to give them what they hoped to find" (*R. Macaulay*). One **trusts** (often followed by *in* or by *to*) when one is completely assured or wholly confident that another (often the Supreme Being) will not fail one in need. **Trust** stresses unquestioning faith, though it does not rule out experience as an aid to faith. "I will **trust**, and not be afraid" (*Isaiah* xii. 2). "Take short views, hope for the best, and **trust** in God" (*Sydney Smith*). "There is a great Field-Marshal, my friend, who arrays our battalions; Let us to Providence **trust**, and abide and work in our stations" (*Clough*). One **depends on** or **upon** someone or something when one, with or without previous experience, rests confidently on him or it for support or assistance. **Depend**, except when followed by *on oneself*, *upon one's own efforts*, and the like, may connote a lack of self-sufficiency or even weakness; in most cases, however, it implies so strong a belief or so confident an assumption that the hoped-for support or assistance is forthcoming that no provision for the contrary is made. "His diffidence had prevented his **depending** on his own judgment. . . but his reliance on mine made everything easy" (*Austen*). "The captain of the ship at sea is a remote, inaccessible creature. . . **depending** on nobody" (*Conrad*). "The man never cared; he was always getting himself into crusades, or feuds, or love, or debt, and **depended** on the woman to get him out" (*H. Adams*). One **counts** or **reckons** (more colloquial than **count**) on something when one takes it into one's calculations as certain or assured; the words often imply even more confidence in expectation than **depend**, but they seldom carry the latter's frequent suggestion of possible disaster if one's expectations are not fulfilled; thus, a captain **counts** (not **depends**) on replenishing his fuel supply at certain ports, when making his calculations for a voyage; the party **counts** (not **depends**) on a much larger representation in congress after the next election; he **reckoned** on the train's being late. "I've told her. . . that she shall always have a special sum set apart for her poor children. . . ; on that she may absolutely **count**" (*E. Wharton*). One **banks** (a colloquialism) on something in which one's confidence is so strong that one is willing to place a heavy wager on it in the certainty one cannot lose; as, I'll **bank** on his succeeding in any venture he undertakes; you can **bank** on his honesty.

Ana. Confide, entrust, *commit: *hope, expect, look, look for, await.

remain. *Stay, wait, abide, tarry, linger.

Ant. Depart.

remainder, *n.* **Remainder, residue, residuum, remains, leavings, relics, rest, balance, remnant** come into comparison in the sense of that which is left after the subtraction or removal of a part. **Remainder** is the technical term for the result in the arithmetical process of subtraction (as, subtract 8 from 10 and the **remainder** is 2); it is otherwise a comprehensive term for any things that remain after the others of a collection, assemblage, or the like, have been taken away, or for any persons that remain after the others of the group have departed; as, he spent the **remainder** (that is, the remaining days, months, or years) of his life in seclusion; it took a week to eat up the **remainder** of their Thanksgiving feast; the **remainder** (that is, those who had not gone further) of the party turned homeward; a sale of publisher's **remainders** (that is, unsold copies of various books). **Residue** and **residuum** are often interchanged with **remainder**, but in current use they usually imply whatever may be left of a former whole, often a previously intact whole, after it has been subjected to some process which depletes or diminishes it but does not annihilate it. Both terms, but especially **residue**, have acquired specific meanings; thus, a testator, after making certain bequests and providing for the payment of all his debts and charges, usually leaves the **residue** of his estate to a legatee, or to legatees, of his choice; water after evaporation often leaves a **residue**, as of lime or some other mineral substance; the **residue** of anything destroyed by burning is called ash or ashes. **Residuum** is frequently used in place of **residue**, especially when evaporation, combustion, or the like, is implied; it is often preferred to **residue** when what is left after a process (not only a physical or chemical, but also a mental, process) is such that it cannot be ignored or left out of account, or may have value as a product or significance as a result; thus, the **residuum** of the process by which sugar is extracted from cane is called molasses; there is always a **residuum** of air in the lungs after the most forcible expiration possible; every severe emotional experience leaves its aftereffect, or **residuum**. "One might say that every fine story must leave in the mind of the sensitive reader an intangible **residuum** of pleasure" (*Cather*). **Remains** (the singular form **remain** has given way to the plural) is now chiefly used of that which is left after death, decay, decline, disintegration, or consumption; the term is specifically applied to a corpse, to the unpublished works of a dead author, and to the ruins of an ancient civilization; as, they buried Keats's **remains** in the Protestant cemetery in Rome; to be appointed executor of a friend's literary **remains**; the **remains** of Pompeii; the **remains** of a meal. **Leavings** usually, but not invariably, implies that the valuable or useful parts or things have been culled out and used up or taken away or that what is left has been rejected or discarded. "How like the **leavings** of some vast over-turned scrap-basket" (*Van W. Brooks*). The term is sometimes humorously applied to a rejected suitor. "Truly, she'd have none of Polly's **Leavings**; no, not shel!" (*Richardson*). **Relics**, as here compared, is now chiefly found in poetic use in the senses in which **remains** is more commonly employed. It differs from **remains** in connoting a cherishing or treasuring. "Scooped from the sacred earth where his dear **relics** lie" (*Wordsworth*). "The **relics** [that is, the ruins] of a weed-inwoven cot" (*Shelley*). **Rest** is seldom distinguishable from **remainder** (except in the latter's technical arithmetical sense), and the two are commonly used interchangeably without loss. However, it is preferred to **remainder** by discriminating writers and speakers

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

when it means simply the persons or things not previously referred to or mentioned, as in an enumeration or list, and carries no implication of subtraction, deduction, depletion, and the like; as, England, as well as the *rest* of Europe, awaited the effect of the ultimatum with anxiety; only two stories in this book are interesting but the *rest* are uniformly dull. **Balance**, in the sense of *remainder* or *rest*, has never been fully accepted by authorities even in the United States where it is more common than in England. "Presently I began to receive letters asking for the *rest* of it, sometimes for the *balance* of it" (*J. R. Lowell*). In this sense, the term derives from the commercial use of *balance* for the sum in which one side of an account falls short of the other and which must be added in order that the two sides balance, or become equal. In reference to a banking account, *balance* usually is applied only to the amount left after withdrawals and other charges have been deducted from the deposits and accumulated interest (the reverse being called an *overdraft*); in a mercantile charge account, *balance* is usually applied to the amount owed after credits have been deducted from the debits; thus, a *balance* (strictly, a *deposit balance*) in the bank is a sum of money to the depositor's credit; a *balance* of a bill (or more explicitly, a *balance due*) is an amount still owed by the debtor; a *balance* in hand is an amount left when all assets are reckoned after all liabilities have been discharged. **Remnant**, and its increasingly common plural *remnants*, are now applied only to a remainder that is small in size or numbers or that represents only an insignificant part or piece left from a former whole; as, the *remnant* of a once powerful army; a sale of *remnants* of cloth. "The last representative of the original Cardenas y Barrenuevos was supposed to be living in Santa Fé on the *remnants* of the family fortune" (*M. Austin*). "Sleeping bits of woodlands—*remnants* of the great forests in which Tom had worked as a boy" (*S. Anderson*).

remains. I.eavings, residue, *remainder, residuum, relics, rest, balance, remnant.

remark, *v.* 1 Notice, note, observe, perceive, discern, *see, behold, descry, spy, view, survey, contemplate.

2 **Remark**, **comment**, **commentate**, **animadvert** come into comparison in their intransitive senses where they are usually followed by *on* or *upon*. They agree in meaning to make observations or to pass judgment but they diverge in their implications regarding the motive and the nature of these observations and judgments. **Remark** usually implies little more than a desire to call attention to something; as, a bore *remarks* upon everything he sees. "So I *remarked* upon our Schumann's victories Over the commonplace, how faded phrase grew fine" (*Browning*). **Comment** stresses interpretation, as by bringing out what is not apparent or by adding details that help to clarify; as, the dramatic reader frequently interrupted his performance to *comment* upon a scene. Very frequently, in modern use, the word implies unfavorable interpretation. "The Vicar told his curate . . . One or two of the parishioners have *commented* on your passion for Oaktown, and I fancy that you have given a little offence" (*C. Mackenzie*). **Commentate**, an old word that had been falling into disuse, has recently been revived as a substitute for *comment*, to suggest a purely expository or interpretative intent. The verb is, however, less frequently used than its agent noun, **commentator**; as, radio *commentators* on the news of the day. **Animadvert** implies a turning of one's attention to something for the sake of judging it; as, "Adrian *animadverted* on everybody very sympathetically" (*Meredith*). In modern use, however, this, its basic implication, is often obscured by an emphasis on passing an adverse judgment (see

ANIMADVERSION). "You know you have grievously offended him. I wish not to *animadvert* on your conduct" (*Meredith*).

remark, *n.* **Remark**, **observation**, **comment**, **commentary**, **note**, **descant**, **obiter dictum** come into comparison when they denote a brief expression intended to enlighten, clarify, express an opinion, or the like. A **remark** is a more or less casual expression in speech or writing of an opinion or judgment, as of something seen in *passing*, something read for the first time, something to which one's attention has been called, or the like: the term usually carries no implication of a final or considered judgment; as, "Perhaps . . . you may now and then amuse yourself with my translation. Should your *remarks* reach me . . . they shall be all most welcome" (*Cowper*); "Brousson had a genius for remembering the most telltale gestures as well as the most self-revelatory *remarks* . . . of his master" (*J. W. Krutch*). **Observation** suggests a reasoned judgment based on more or less careful scrutiny of the evidence. "He apparently was impressed by my *observation* that disease had made it largely impossible for Indians to smile" (*V. Heiser*). "In reading over a package of letters from Sarah Orne Jewett, I find this *observation*: 'The thing that teases the mind over and over for years, and at last gets itself put down rightly on paper . . . belongs to Literature'" (*Cather*). **Comment** applies to a remark or an observation made in criticism, in interpretation, or in elucidation of something; as, the candidate said he would make no *comment* on the suggestion; "Very often she gave him some wise *observation* or discreet *comment* to begin the day with" (*Cather*). "Katherine seldom does much of the talking . . . She listens, and puts in from time to time some critical *comment* that often extraordinarily clears up any subject one is talking round" (*R. Macaulay*). **Commentary** may be used in place of *comment* for an annotation or gloss of a passage or text. More often, however, it is employed as a collective noun, designating the series of annotations or glosses provided for the elucidation of a text or literary work. **Note** applies chiefly to a written or printed comment, gloss, or the like, on a particular point, such as the historical origin of an idea, the exact meaning of a term, or the source of the writer's information, made either by the reader of an article or book on the margin of a page or by the author to be printed at the bottom of the page (then called a *footnote*) or, with other comments or glosses, in an appendix. "The author . . . was advised . . . to subjoin some few explanatory *notes*" (*Gray*). **Note** is also applicable to any brief statement jotted down, such as one of the minutes of a meeting, a memorandum of a point developed or to be developed in a speech, or of a point made by a speaker or lecturer, or the like; as, to make *notes* of what happened at the conference; to preach from *notes*. **Descant** (originally a musical term designating a voice part above the main one or serving as an accompaniment to it) is often used as a synonym of *remark* or *comment* with, however, a stronger suggestion of addition to or variation of the main theme (as, "Neither shall I make any *descant* or reflection thereon"—*Barrow*); very often, also, the term does not imply brevity, but a playing with or upon a thought or subject. "Charlotte Brontë makes no break in the artistry of her *Villette* when she imbeds in it a *descant* on a piece of acting by Rachel" (*C. E. Montague*). **Obiter dictum** (*pl. obiter dicta*) is a Latin phrase (meaning literally a word on the way, that is, in *passing*) applied in law to an incidental opinion delivered by a judge on a matter bearing upon but not material to the case being tried, and therefore having no binding force. In literary use, its connotations have been determined largely by Augustine

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

Birrell who in his book of informal essays called *Obiter Dicta*, defines it (*obiter dictum*) humorously as "A gratuitous opinion, an individual impertinence which, whether it be wise or foolish, right or wrong, bindeth none, not even the lips that utter it." The term is usually applied to a remark or observation made more or less on the spur of the moment but not intended to be taken as a final opinion or definitive statement.

remarkable. *Noticeable, prominent, outstanding, conspicuous, salient, signal, striking, arresting.

Ana. *Exceptional: important, significant, weighty, momentous (see corresponding nouns at IMPORTANCE): singular, unique, peculiar, *strange.

remedy, n. *Remedy, cure, medicine, medicament, specific, physic* come into comparison when they mean something prescribed or taken for the treatment of disease. *Remedy*, the most general of these terms, is applied to any substance or method of treatment that is known to be, or is said to be, effective in contributing to or in bringing about recovery or restoration to health; as, aspirin is a common *remedy* for headache; sunlight and rest are *remedies* for tuberculosis. *Cure* is more positive in its suggestion of restoration to health or of complete recovery than *remedy*; it is therefore avoided in scientific or very precise writing, but it is the common or popular designation for anything (substance, method of treatment, diet, or the like) which is advocated as being, or is widely believed to be, conducive to recovery; as, sunshine and vitamin D are *cures* for rickets; a water *cure*; a faith *cure*; the *cure* for a psychic disorder. *Medicine*, except in extended and more or less humorous use (as, a year's vacation is the only *medicine* I need), is the ordinary term for any substance or preparation (especially one in the form of a pill, a powder, a capsule, a liquid, or the like) which is used in treating a disturbance of the normal functions of the body and taken internally; as, the doctor prescribed a *medicine* to be taken every hour; proprietary *medicines*; a diuretic *medicine*. *Medicine* is now rarely applied to a substance or preparation used externally, as by applying, rubbing, or spraying. The term generally used by physicians and pharmacists to cover all substances and preparations whether taken internally or applied externally is *medicament*; as, a nasal *medicament* for treating hay fever; a drug is a substance used in the preparation of *medicaments*. *Specific* is applied usually to a drug, sometimes to a medicine, known to be effective in curing a certain disease; thus, quinine is the *specific* for malaria. "Most medicines are alleviative in their action and not definitely curative.... A very few actual curatives are known and these are generally classified as *specific*, denoting thereby that they will definitely cure one disease and presumably no other" (A. C. Morrison). *Physic*, the archaic equivalent of *medicine*, is now used chiefly in historical romances. "Throw *physic* to the dogs; I'll none of it" (Shak.).

remedy, v. 1 *Cure, heal.

2 *Correct, rectify, emend, amend, redress, reform, revise.

Ana. *Relieve, assuage, alleviate, lighten, mitigate: restore, *renew, refresh.

Con. *Intensify, aggravate, heighten.

remember. *Remember, recollect, recall, remind, reminisce, bethink, mind* are not as a group synonymous terms, although they all carry as their basic meaning to put one (often oneself) in mind of something. *Remember*, except in a few idiomatic expressions such as "*remember me to him*" (i.e., put me and my regard for him in his mind) and in older literary use (as, "*Remembering them the truth of what they themselves know*"—Milton), now implies a putting oneself in mind of something. The term

in current use carries so strong an implication of keeping in one's memory that it often implies no conscious effort or willing; as, he *remembers* every detail of that occurrence as though it happened yesterday; "The average reader of the newspaper or short story reads to forget, not to *remember*" (C. W. Eliot); "Years—so many of them that no one *remembered* the exact number" (R. Bradford). *Recollect* (which is distinguished from *re-collect* only in pronunciation and in bearing a more specific significance) etymologically presupposes a scattering and implies a gathering of that which has been scattered: it is distinguished from *remember* in presupposing a letting go from rather than a retaining in one's memory and therefore implies a bringing back, sometimes with effort, to one's own mind that which has not been in it for an appreciable period of time; as, "She tried to *recollect* some instance of goodness, some distinguished trait of integrity or benevolence, that might rescue him from the attacks of Mr. Darcy" (Austen); "Beasts and babies *remember*, that is, recognize: man alone *recollects*" (Coleridge); "certain phrases... which I have often found myself *recollecting* from a distant past" (Lucas). When used reflexively, *recollect* usually implies a remembrance of something one has forgotten in one's eagerness, excitement, anger, or the like, such as one's manners or one's real intention (as, "Catherine, *recollecting* herself, grew ashamed of her eagerness"—Austen; "He pointed a foot; *recollected* himself; took it back"—V. Sackville-West), but it may imply a gathering together of thoughts one wishes to have in mind and a dismissal of all others that are distracting or that weaken one's powers of concentration (as, to *recollect* oneself in prayer). *Recall* often comes close to *recollect* in implying volition or an effort to bring back what has been forgotten, but it differs from *recollect* in suggesting a summons rather than a process of thought; often, also, it connotes a telling of that which is brought back; as, "Let me *recall* a case within my own recent experience" (Mencken); "I will permit my memory to *recall* The vision of you, by all my dreams attended" (Millay). "Miss Manette, had you any conversation with the prisoner on that passage across the channel?" "Yes, sir." "*Recall* it." In the midst of a profound stillness, she faintly began" (Dickens). But *recall* may imply, as *recollect* does not and as *remember* now rarely does, an agent or an agency other than oneself, in such use always suggesting the awakening or the evocation of a memory; as, "Forty years later Mr. Wilson *recalled* this circumstance to my memory" (A. Repplier); "That tree always awakened pleasant memories, *recalling* a garden in the south of France where he used to visit young cousins" (Cather). *Remind* is a closer synonym of *recall* than of *remember* (though only within a century has it become quite obsolete in this sense) or of *recollect*, because it implies the evocation of something forgotten or not at the time in one's mind by some compelling power or agent. Often also, it strongly implies a joggling of one's memory. Usually the agent or agency is someone or something external that causes one to remember; as, he *reminded* me of my promise (or, he *recalled* my promise to me); this incident *reminded* him (or *recalled* to his memory) another and similar one. But when the agent is the person who remembers, *remind* is always a reflexive verb, thereby differing from *recall* in another important particular; as, he *reminded* himself (or he *recalled*) that he had made an appointment for eight o'clock; he found it necessary to keep on *reminding* himself that the time was short and the work must be finished according to schedule. *Reminisce* rarely occurs as a transitive verb, but as an intransitive verb it usually implies the process of recollecting or of recalling

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

something. "She could not have remembered much of Keats. . . . How do people remember anything? How do they reminisce?" (*A. Lang*). In current use, *reminisce* implies not only the recollection but the retelling of events or circumstances of one's past life; as, "Well, anyhow, we old fellows can reminisce" (*H. Garland*); "he cut me short to reminisce of his schoolmates" (*Hervey Allen*). *Bethink*, an archaic and commonly reflexive verb, usually implies recollection or recalling after reflection, or a reminding oneself by thinking back; as, "I have *be-thought* me of another fault" (*Shak.*); "To *bethink* themselves how little they may owe to their own merit" (*Sir A. Helps*). *Mind* (as here compared: see also *TEND*) is chiefly dialectal, though its use obtains in Scotland and Ireland, in the sense of *remember*: the term, however, is often found in literary use where a dialectal word makes for simplicity or atmosphere; as, "I *mind* him coming down the street" (*Tennyson*); "The lads you leave will *mind* you Till Ludlow tower shall fall" (*Housman*); "I can *mind* her well as a nursing mother—a comely woman in her day" (*Quiller-Couch*).

Ant. Forget. — *Con.* Ignore, disregard, *neglect, overlook.

remembrance. *Memory, recollection, reminiscence, mind, souvenir.

Ant. Forgetfulness.

remind. *Remember, recollect, recall, reminisce, bethink, mind.

Ana. *Suggest, intimate, hint, imply.

reminisce. *Remember, recollect, recall, remind, bethink, mind.

reminiscence. *Memory, remembrance, recollection, mind, souvenir.

remiss. Lax, slack, neglectful, *negligent.

Ana. *Careless, heedless, thoughtless: *forgetful, oblivious, unmindful: indolent, slothful, faintant, *lazy.

Ant. Scrupulous.

remit. 1 Pardon, forgive, *excuse, condone.

Ana. *Exculpate, exonerate, acquit, vindicate, absolve.

2 *Confess, shrive, absolve.

remnant. *Remainder, residue, residuum, remains, leavings, relics, rest, balance.

Ana. *Part, piece, fragment, segment, section: vestige, *trace.

remodel. Rebuild, *mend, repair, patch.

remonstrate. Expostulate, *object, protest, kick.

Ana. *Oppose, combat, resist, withstand: *criticize, denounce, reprobate.

remorse. *Penitence, repentance, contrition, attrition, compunction.

Ana. Regret, *sorrow, grief: *qualm, scruple, compunction, demur.

remote. *Distant, far, faraway, far-off, removed.

Ant. Close.

remove, v. 1 *Move, shift, transfer.

Ana. Convey, *carry, bear, transport, transmit: eradicate, extirpate, uproot (see *EXTERMINATE*).

2 **Remove, draw, withdraw** come into comparison not as close synonyms, but as transitive verbs that have for their basic and general meaning to move someone or something from or out of its present position (usually without statement of new location). **Remove** (for more specific meaning see *MOVE*, 2) is the least explicit as well as the most general of these terms. In the sense here considered, apart from its context it seldom suggests the acts or movements involved; therefore, it may be used with reference to persons and to immaterial things as well as to material things; as, to *remove* oneself from observation; to *remove* a cork from a bottle; to *remove* one's

shoes; "the scientific view of the world. . . . regards disorder and inexplicable irregularity as a scandal to be removed by more patient observation" (*Inge*); the news removed a great load from his mind; to *remove* spots from a coat. **Draw** (as here considered: see also *PULL*) implies removal from its place by or, often, as if by pulling; it is therefore preferred to *remove* when this idea is uppermost; thus, idiomatically one *removes* a tablecloth or *draws* the cloth; to *draw* a cork is more explicit than to *remove* a cork; however, one *removes* (not *draws*) a stain with gasoline; one *draws* (not *removes*) the truth from a reluctant witness at a trial. **Withdraw** is more restricted in its range of application and more clearly defined in its meaning than the other terms. As here compared (see also *GO*, 1), it implies a taking back or away someone or something that has been placed elsewhere, as by oneself, or by the will of another, or by nature, or the like; as, to *withdraw* one's money from a bank; she decided to *withdraw* her child from the school; "he looked for a moment at Elizabeth, till catching her eye, he *withdrew* his own" (*Austen*). "A favorite ruse of the opium smugglers was to insert a hypodermic needle into an egg, *withdraw* carefully all the albumen and then refill the cavity with opium" (*V. Heiser*). "They also feel that the classification of events as natural or supernatural *withdraws* the natural order from the immediate jurisdiction of God" (*Inge*). *Withdraw* may also specifically imply a recanting of something said or charged; as, to *withdraw* one's remarks with an apology; to *withdraw* an accusation.

Ana. Eliminate, *exclude, debar: *separate, part, divorce, sever, sunder.

removed. Remote, far-off, faraway, far, *distant.

remunerate. *Pay, compensate, satisfy, reimburse, indemnify, repay, recompense, requite.

Ana. Award, accord, vouchsafe, *grant.

rend, v. Split, cleave, rive, rip, *tear.

Ana. *Separate, divide, sever, sunder: rupture, fracture (see corresponding nouns at *FRACTURE*).

rendezvous. Tryst, *engagement, appointment, assignation, date.

renegade or renegado, n. *Renegade (or renegado), apostate, pervert, turncoat, recreant, backslider* are strongly derogatory terms denoting a person who forsakes his faith or party, a cause, or an allegiance, and aligns himself with another. *Renegade*, or its earlier form *renegado*, was originally applied to a Christian who became a Mohammedan. Consequently, it came to mean one who completely denies all he has been brought up to believe by going over to the enemy or the opposition. "Still violent. . . But most against the party he forsook: For *renegadoes*, who ne'er turn by halves, Are bound in conscience to be double knaves" (*Dryden*). "He was, in the proper sense of the word, a *renegade*, for he had grown into manhood on the Catholic side, and he had abjured his religion wholly for the prospect of gain and power" (*Belloc*). *Apostate* stresses the giving up, either voluntarily or under compulsion, of something one has formerly professed, such as one's religious beliefs, one's principles, etc., and the acceptance of others, usually, by implication, of a less exalted character. *Apostate* therefore usually connotes surrender, but it does not, as *renegade* often does, imply treachery, or hostility to that which is forsaken. *Pervert*, in older English, implied a change in religious faith from one that is regarded as true to another that is held to be false; as, "that notorious *pervert*, Henry of Navarre" (*Thackeray*). In modern English, this sense is dying out, for the term is now applied to one who seeks sexual satisfaction in unnatural and aberrant ways, such as in homosexuality, sadism, or ex-

hibitionism. **Turncoat**, a contemptuous designation, differs from **renegade** and **apostate** chiefly in its implications that profession of faith or allegiance is regarded lightly and that convenience or profit rather than conviction motivates the change. "An' monie mae that I could tell, Wha fain would openly rebel, Forby [besides] *turn-coats* amang oursel" (*Burns*). "An American who went abroad and stayed, without an official excuse... was regarded as a *turncoat*" (*Van W. Brooks*). **Recreant**, like **apostate**, implies a retreat from a stand one has taken, but it stresses cowardice and mean-spiritedness, and usually connotes treachery to the party or cause once supported. **Backslider**, in contrast to the other terms, usually implies a previous conversion and a reversion to the old indifference or the old beliefs; thus, a convert who goes back to his earlier state morally or to his earlier religious affiliation is regarded as a *backslider*.

Ana. *Rebel, insurgent, iconoclast: deserter, forsaker, abandoner (see corresponding verbs at **ABANDON**): *heretic, schismatic.

Ant. Adherent.

renew. **Renew**, **restore**, **refresh**, **renovate**, **refurbish**, **redintegrate**, **rejuvenate**, **rejuvenize**, **rejuvenesce** come into comparison when they mean to give a person or thing that has become old, worn, exhausted, or the like, the qualities or appearance of that which is fresh or new or young. **Renew** is so inclusive a term that it may imply a making something new to replace the old that has died, decayed, disintegrated, or the like (as, each spring the trees *renew* their foliage; "I think I will be extravagant enough to *renew* my entire wardrobe"—*Shaw*), or a re-making so that it seems like new, of a thing which has depleted its vitality or force or has lost its freshness (as, "They that wait upon the Lord shall *renew* their strength"—*Isaiah* xl. 31; "so that thy youth is *renewed* like the eagle's"—*Psalms* ciii. 5; "to *renew* and rebuild civilization, and save the World from suicide"—*T. S. Eliot*), or a making a fresh start (as, to *renew* one's efforts; to *renew* one's offer of assistance). **Restore** definitely implies a return to an original state or to a prime condition, as after depletion, exhaustion, illness, or the like (as, to *restore* one's vigor; to *restore* one's good humor; a long rest *restored* him to health), or after having been marred, injured, or wrecked as by passage of time, use, accident, or assault in war (as, Rheims Cathedral was *restored* after the World War; an attempt to *restore* a picture or mutilated statue), or after the loss of any vital or essential quality or character (as, "If I quench thee, thou flaming minister, I can again thy former light *restore*, Should I repent me"—*Shak.*; "great artists... have never been able to *restore* the scent and the savour and the substance [of French speech] which Villon and Montaigne... could once find within its borders"—*H. Ellis*). **Refresh** often implies the supplying of something necessary to restore lost strength, animation, power, or the like (as, sleep *refreshes* both body and mind; the tired soldiers were *refreshed* after they had partaken of food; a cool, refreshing drink), or to make up for that which has been lost through forgetfulness or disuse or has never been known or used (as, "he made it his business to see Dr. Lavendar, and be *refreshed* as to facts"—*Deland*; "convinced that our nation, in this storehouse of Latin [as the language of the medieval church] to *refresh* and replenish its most sacred thoughts, has enjoyed a continuous blessing"—*Quiller-Couch*). Equally often the term implies the imparting of freshness to something by or as if by cooling, wetting, or allaying thirst: it then usually connotes an enlivening, invigorating, or exhilarating effect; as, "a dew coming after heat *refresheth*" (*Ecclesiasticus* xlii. 22); "the springs... under

the earth... break forth to *refresh* and gladden the life of flowers and the life of man" (*Binyon*); "The presence of Helen renewed and *refreshed* him" (*S. Anderson*). **Renovate** and **refurbish** differ from the preceding terms chiefly in being referred almost, but not quite, exclusively to material things and, as a consequence, in not having gathered the finer poetic connotations so often found in **renew**, **restore**, and **refresh**. **Renovate** is often used in place of **renew** when cleansing, repairing, rebuilding, or the like, is implied; as, to *renovate* both the rooms and the furnishings of an old colonial house; to *renovate* an old automobile by renewing the upholstery and adding new fenders. **Refurbish** (cf. *furbish*, under **POLISH**) implies the restoration of newness or freshness by or as if by scouring or polishing: it suggests little more than a freshening up of the appearance or the external aspects of a thing (as, to *refurbish* an old table by sandpapering and waxing it), and therefore occasionally is used in depreciation; as, "the true ring [i.e., distinguishing mark] by which, in this *refurbishing* age, a fossilized survival may be known from a spurious reproduction" (*Hardy*); the *refurbishing* of trite thoughts is the sole accomplishment of many would-be poets. **Redintegrate**, a useful term now seldom used, carries a strong implication of a return to original soundness, integrity, or perfection: it is employed especially with reference to things whose wholeness, soundness, or perfection depends chiefly on a spiritual or an organic unity or on the fine adjustment of each part or element to all of the others; as, only a spirit of good will and a passion for justice will *redintegrate* a warring world; to *redintegrate* an empire. **Rejuvenate** (or the less frequent **rejuvenize** or **rejuvenesce**) implies a restoration of youthful vigor, powers, appearance, activities, or the like: sometimes it merely suggests a giving that which is old a youthful aspect; as, a *rejuvenating* operation; "He... had the air of an old bachelor trying to *rejuvenate* himself" (*Irving*); "Outworn themes may be *rejuvenated* by taking on contemporary garb" (*Lowe*s).

Ana. *Mend, repair, rebuild, remodel: reform, revise, rectify, *correct.

Con. Exhaust, *deplete, drain, impoverish, bankrupt.

renounce. 1 *Abdicate, resign, demit.

Ana. Sacrifice, abnegate, *forgo, forbear, eschew.

Ant. Arrogate: covet (sense 2): — **Con.** Usurp, pre-empt, appropriate (see **ARROGATE**).

2 *Abjure, forswear, recant, retract.

Ana. Reject, repudiate, spurn (see **DECLINE**, *v.*): *forgo, forbear, eschew.

Ant. Confess (sense 1): claim.

renovate. Refurbish, rejuvenate, *renew, restore, refresh, redintegrate.

Ana. *Mend, repair, patch, remodel: *clean, cleanse: *polish, shine, burnish.

renown. *Fame, honor, glory, celebrity, reputation, repute, notoriety, éclat.

Ana. Prestige, authority, *influence, weight, credit.

Con. Contempt, despite, disdain, scorn (see under **DESPISE**): disrepute, *disgrace, dishonor, obloquy.

renowned. *Famous, famed, noted, celebrated, distinguished, eminent, illustrious, notorious.

Ana. Praised, acclaimed, lauded, extolled (see **PRAISE**): outstanding, signal, prominent (see **NOTICEABLE**).

rent, v. *Hire, let, lease, charter.

renunciation. **Renunciation**, **abnegation**, **self-abnegation**, **self-denial** agree in meaning voluntary surrender or putting aside of something desired or desirable. **Renunciation** commonly connotes personal sacrifice for a higher end, such as the good of others, or moral discipline, or the attainment of the highest good. "She had learnt the lesson of *renunciation*, and was as familiar with the wreck

of each day's wishes as with the diurnal setting of the sun" (*Hardy*). **Abnegation** is scarcely distinguishable from **self-abnegation** in historical use. Modern writers, however, prefer the latter or its equivalent **abnegation of self**. Both words (except the former in rare instances) more often denote a quality of character than an act; both imply a very high degree of unselfishness or a capacity for putting aside all personal interests or desires. "Individuals who are willing to abandon the pleasures of the world for lepers are rare, but, when found, usually exhibit complete **abnegation of self**" (*V. Heiser*). **Self-denial**, unlike **abnegation**, is usually applied to an act or a practice. Though it means denial of oneself, or forbearance from gratifying one's own desires, it does not necessarily connote nobility in the act, its motive, or its end, and is therefore applicable to a larger range of instances than either **abnegation** or **renunciation**. "Her still face, with the mouth closed tight from suffering and disillusion and **self-denial**" (*D. H. Lawrence*).

Ana. Sacrificing or sacrifice, forgoing, forbearing, eschewing (see corresponding verbs at **FORGO**).

repair, v. *Mend, patch, rebuild, remodel.

Ana. Remedy, redress, amend, emend, rectify, *correct: *renew, renovate, refurbish, restore.

reparation. **Reparation, redress, amends, restitution, indemnity** agree in meaning a return for something lost or suffered, usually through the fault of another. **Reparation** commonly implies an attempt to restore things to their normal or sound condition. Though now chiefly applied to recompense for material losses or damages, or reimbursement for repairs (as, war **reparations**; to seek **reparation** from the state for flood damages), it is still frequently applied to atonement for an offense, especially one incurring injury to others; as, to make **reparation** for one's sins. "I am sensible of the scandal I have given by my loose writings, and make what **reparation** I am able" (*Dryden*). **Redress** heightens the implications of a grievance and, therefore, connotes compensation or satisfaction, or even, at times, retaliation or vengeance; as, to seek **redress** in the courts or by the sword. "**Redress** is always to be had against oppression, by punishing the immediate agents" (*Johnson*). "The civil law by which contracts are enforced, and **redress** given for slanders and injuries that are not dealt with by the police" (*Shaw*). "Particular grievances call not only for **redress**, but also for the formulation of universally valid reasons why they should be **redressed**" (*A. Huxley*). **Amends** is as strong as **redress** in its suggestion of due satisfaction but weaker in its implication of a grievance. It often implies a correction or restoration of a just balance. "If I did take the kingdom from your sons, To make **amends**, I'll give it to your daughter" (*Shak.*). "Love, freedom, comrades, surely make **amends** For all these thorns through which we walk to death" (*Masefield*). **Restitution** implies the restoration in kind or in value of that unlawfully taken from one; as, to make **restitution** for a theft or for slander; a **restitution** of civil rights. **Indemnity** is the specific term for money given, as by an insurance company in reparation for losses caused by fire, accident, illness, etc., or as by a defeated country for losses caused by war.

Ana. Expiation, atonement (see under **EXPIATE**): compensation, remuneration, requital, recompensing or recompense (see corresponding verbs at **PAY**).

repatee. *Wit, humor, irony, sarcasm, satire.

Ana. Retort, rejoinder, response (see under **ANSWER, v.**): *badinage, persiflage, rallery.

repay. *Pay, compensate, remunerate, recompense, requite, satisfy, reimburse, indemnify.

Ana. Balance, offset, *compensate: accord, award (see **GRANT, v.**).

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

repeat, v. 1 Repeat, iterate, reiterate, ingeminate come into comparison as meaning to say or do again. **Repeat**, the word in ordinary use, may be used in reference not only to what is said or uttered again (as, to **repeat** a command; to **repeat** a request; the teacher **repeated** her question not once but three times) but to what is made, done, presented, performed, or studied again (as, to **repeat** an attempt to swim the river; to **repeat** a step in a process; the Glee Club will **repeat** the concert tomorrow night; they were asked to **repeat** the performance; to **repeat** a lesson; to wish to **repeat** a pleasant experience). **Repeat** sometimes implies a change in the speaker or doer; as, please do not **repeat** what I have told you; the teacher asked the children to **repeat** the verses after her. Although the use of "again" after **repeat** is regarded as redundant, the use of a word or phrase indicating the number of times something is repeated is not always necessarily redundant, for the verb sometimes implies not one time but an indefinite number of times; as, the same figure is **repeated** (or **repeated** ten or twenty times) in the design. **Iterate** in current use commonly implies one repetition after another, especially of something that is said; as, "matter of hardly less surprise and **iterated** talk in the village" (*G. Eliot*). There is very little difference between **iterate** and **reiterate**, except that the former occasionally refers to a second saying, doing, etc., and the latter carries an even more emphatic implication of manifold repetitions: consequently the two words are often used together when insistency is implied (as, "scientific research **iterates** and **reiterates** one moral . . . the greatness of little things"—*Sat. Review*), though when only one term is desired to make this point, **reiterate** is usually preferred (as, "Mother is wonderful." Over and over, thought Edith, they had **reiterated** that phrase"—*V. Woolf*; "the muffled footsteps of innumerable pilgrims, and the **reiterated** mantra, Nam-Mo, O-mi-to-Fo, which they murmured"—*L. P. Smith*). **Ingeminate** [from a Latin verb meaning to double], a somewhat rare term still occasionally found in the work of good writers, implies reiteration not for the sake of insistency but for special emphasis or impressiveness. It therefore seldom implies indefinite repetition but rather duplication or triplication for the sake of the effect produced. "[Falkland] often, after a deep silence and frequent sighs, would with a shrill and sad accent, **ingeminate** the word, Peace, Peace" (*Clarendon*).

Ana. *Return, recur, revert, recrudescence: rehearse, recite, recount, *relate.

2 *Quote, cite.

repellent or repellant. *Repugnant, abhorrent, distasteful, obnoxious, invidious.

Ana. *Offensive, loathsome, repulsive, revolting.

Ant. Attractive: pleasing. — **Con.** Alluring, charming, captivating, bewitching (see under **ATTRACT**): enticing, seductive, tempting, luring (see corresponding verbs at **LURE**).

repentance. *Penitence, contrition, attrition, remorse, compunction.

Ana. Regret, *sorrow, grief: confessing or confession, absolving or absolution (see corresponding verbs at **CONFESS**).

Con. Complacency, self-complacency, self-satisfaction (see corresponding adjectives at **COMPLACENT**).

repercuss. Reverberate, recoil, *rebound, resile.

replace. **Replace, displace, supplant, supersede** come into comparison in spite of the fact that they are rarely interchangeable terms, for they sometimes carry the same basic meaning—to put a person or thing out of his or its place or into the place of another. A person **replaces** that which has been lost, destroyed, used up,

worn out, dismissed, or the like, either by filling his or its place with another (as, "A broken toy should not be immediately *replaced* if it has been broken by the child's carelessness"—*B. Russell*; to *replace* a servant; "Mr. Baines had decided not to *replace* it [a signboard destroyed by a gale]"—*Bennett*) or by taking and filling the place of another (as, the children opposed their widowed father's remarriage by saying that no woman could *replace* their mother; although he enjoyed marionettes, he declared that they could never *replace* human actors). Also, one *replaces* a thing when he puts it back in its proper or its assigned place (as, to *replace* a book on a shelf; "the guard soon *replaced* his blunderbuss in his arm-chest"—*Dickens*). In contrast, a person or thing *displaces* a thing (sometimes a person) when he or it puts it (or him) out of the place it (or he) has filled, and either takes the place of that which has been dislodged, crowded out, or ousted, or replaces it (or him) by another. This dual implication of putting out of place and of replacing is the chief distinction of *displace* in contrast with *replace*; as, the weight of water *displaced* by a floating body such as a ship is equal to that of the displacing body. However, one of these ideas is sometimes, but far from always, stressed more than the other so that the emphasis is either on ousting (as, "The trustees have power to appoint and *displace* professors, tutors, and other officers"—*Ch. Just. Marshall*) or on replacing (as, "His eyes rested on a large photograph of May Welland, which . . . had now *displaced* all the other portraits on the table"—*E. Wharton*). In strictest use, a person *supplants* (etymologically, trips up, or overthrows) another when by craft, fraud, treachery, or the like, he dispossesses or ousts the other and takes or usurps his place, possessions, privileges, etc.; as, "you three From Milan did *supplant* good Prospero" (*Shak.*); "to see myself *supplanted* in your friendship by strangers does cut me to the quick, I own" (*Austen*); "eager to succeed Louis and even to *supplant* him" (*Belloc*). But *supplant*, largely as the result of a false etymology, sometimes implies an uprooting and replacing rather than a dispossessing and usurping; in such cases, trickery or treachery is no longer implied; as, his tutor tried to *supplant* his fears by arousing his sense of curiosity; "the Modernists . . . don't claim that the Divine revelation has been *supplanted* . . . but that it has been amplified" (*C. Mackenzie*). A thing, or less often, a person, *supersedes* (etymologically, sits above) another when it (or he) directly or indirectly causes that other to be set aside, abandoned, or rejected as inferior, no longer of use or value, superannuated, obsolete, or the like; as, a new history of the United States which bids fair to *supersede* all others; "Carpets *superseded* the filthy flooring of rushes" (*J. R. Green*); they believe that Christianity because of its perfection can never be *superseded*. "That is the worst of erudition—that the next scholar sucks the few drops of honey that you have accumulated, sets right your blunders, and you are *superseded*" (*A. C. Benson*). A person supersedes another in a position, an office, a rank, or the like, either when, as the one having authority or appointive power, he replaces the present incumbent by another (as, to *supersede* a dishonest public official), or when, as the one who takes the place, he supplants the present occupant or goes ahead of one in line for promotion (as, "His brilliant and impetuous colleague was in both quarters rapidly *superseding* him"—*Lecky*).

Ana. Restore, *renew: *change, alter: *recover, regain, recoup, retrieve.

replete. *Full, complete, plenary.

Ana. Abundant, *plentiful: sated, satiated, surfeited (see SATIATE).

replica. Facsimile, *reproduction, duplicate, copy, carbon copy, transcript.

reply, v. *Answer, respond, rejoin, retort.

Con. *Ask, question, interrogate, query, inquire, catechize, examine: *accuse, charge, impeach, indict: salute, greet, *address.

reply, or, in law, replication, n. Answer, response, rejoinder, retort. See under ANSWER, v., 1.

Ana. Acknowledgment, recognition (see corresponding verbs at ACKNOWLEDGE).

Con. Asking, requesting or request, solicitation (see corresponding verbs at ASK): accusation, charging or charge (see corresponding verbs at ACCUSE): *argument, dispute: *greeting, salute.

report, v. *Relate, narrate, describe, state, recite, recount, rehearse.

Ana. *Communicate, impart: *reveal, disclose, discover, tell, divulge.

report, n. 1 *Account, story, chronicle, version.

2 Dispatch, message, note, *letter, epistle, missive, memorandum.

repose, n. *Rest, relaxation, leisure, ease, comfort.

Ana. Calmness, tranquillity, serenity, placidity, peacefulness (see corresponding adjectives at CALM): refreshment, restoration, renewal, reintegration (see corresponding verbs at RENEW).

Con. *Work, labor, toil, grind, drudgery: *stress, strain: agitation, perturbation, discomposure (see corresponding verbs at DISCOMPOSE).

reposeful. Restful, *comfortable, cozy, snug, easy.

Ana. Tranquil, serene, placid, peaceful, *calm: *still, quiet, silent.

reprehend. *Criticize, censure, reprobate, condemn, denounce, blame.

Ana. *Reprove, rebuke, reprimand, admonish, reproach, chide: *scold, upbraid, berate, rate.

repress. *Suppress.

Ana. *Restrain, curb, check, inhibit: subdue, overcome (see CONQUER).

reprimand, v. *Reprove, rebuke, reproach, admonish, chide.

Ana. Upbraid, rate, berate, *scold: censure, denounce, blame, reprehend, reprobate, *criticize.

reprisal. *Retaliation, retribution, revenge, vengeance.

reproach, v. Chide, admonish, *reprove, rebuke, reprimand.

Ana. *Criticize, reprehend, censure, reprobate: *warn, forewarn, caution: counsel, advise (see under ADVICE).

reprobate, adj. *Abandoned, profligate, dissolute.

Ana. *Vicious, iniquitous, corrupt, degenerate: *blame-worthy, guilty, culpable.

Ant. Elect (*in theology*). — **Con.** Righteous, virtuous, *moral, ethical.

reprobate, v. Censure, reprehend, *criticize, blame, condemn, denounce.

Ana. *Decry, derogate from, detract from, depreciate, disparage: reject, repudiate, spurn (see DECLINE, v.): reprimand, rebuke, *reprove.

reproduce. Propagate, *generate, engender, breed, beget, get, sire, procreate.

Ana. Produce, *bear, yield: multiply (see INCREASE).

reproduction. Reproduction, duplicate, copy, carbon copy (or carbon), facsimile, replica, transcript agree in denoting one thing which closely resembles something that has already been made, produced, written, or the like. Reproduction may imply identity in material or substance, in size, and in quality, or it may imply differences, provided that the imitation gives a fairly true likeness of the original; thus, a reproduction of an

Elizabethan theater may be on a very small scale; a reproduction of a Sheraton chair may be in cherry rather than in the mahogany of the original. A **duplicate** is strictly a double of something else; the word may be used of that which exactly corresponds to, or is the counterpart, of any object whatsoever; as, a *duplicate* of a book, an engraving, a postage stamp, a bill, a piece of furniture; to make out a receipt in *duplicate*. A **copy** is a reproduction of something else, often without the exact correspondence which belongs to a duplicate; as, two antique medals from the same die are *duplicates*, while a modern reproduction of either is a *copy*. However, **copy**, rather than *duplicate* (which properly may be used only when there is but a single reproduction) is applicable to any one of a number of things printed from the same type format, or struck off from the same die, or made in the same mold, or the like; as, a thousand *copies* of a magazine; fifty *copies* of a medal; mimeographed *copies* of a letter; she ordered two dozen *copies* of the photograph. **Carbon copy**, literally a copy of something typed or written made by use of carbon paper, denotes by extension an exact duplicate; as, the best passages in this poem are *carbon copies* of passages found in a poem written a hundred years ago. A **facsimile** is an exact reproduction; it may imply differences as in scale, but it implies strict identity or close imitating in details, material, and the like; as, "The square-shouldered, clumsy, high-featured Priscilla wore a dress the *fac-simile* of her pretty sister's" (*G. Eliot*). "The heavy chandeliers were loaded with flattened brass balls, magnified *fac-similes* of which crowned the uprights of the . . . massively-framed chairs" (*Shaw*). **Replica**, in strict use, applies only to an exact reproduction of a statue, a painting, a building, or the like, made by the same artist, architect, or artisan; hence, a replica is not always distinguishable from the original, and is thought of as its equal in value; thus, one does not correctly speak of a modern *replica* of the Winged Victory, but of a modern *reproduction*; one may speak of the confusing tendency of some Renaissance artists to make *replicas* of their paintings. However, the word is often used loosely when very close likeness is indicated. "The young girl . . . was a slim *replica* of her mother" (*E. Wharton*). **Transcript** applies only to a written, typed, printed, or other copy made directly from an original (either handwritten or typed), from shorthand notes, or the like; as, a stenographer's *transcript* of a letter; to ask for a *transcript* of a will.

reprove. **Reprove**, **rebuke**, **reprimand**, **admonish**, **reproach**, **chide** agree in meaning to criticize adversely, especially in order to warn or to correct a fault. The same differences in implications are usually found in their corresponding nouns. To **reprove** is to blame or censure, often kindly or without harshness and, usually, in the hope of correcting the fault; **rebuke** implies sharp or stern reproof; **reprimand** suggests reproof that is formal, and often public or official. "Marcus with blushes owns he loves, and Brutus tenderly *reproves*" (*Pope*). "I have not lacked thy mild *reproof*" (*Tennyson*). "He *rebuked* Peter, saying, Get thee behind me, Satan" (*Mark* viii. 33). "The Lord will come with fire . . . to render his anger with fury, and his *rebuke* with flames of fire" (*Isaiah* lxvi. 15). "A word . . . which the Duke of Wellington, or Admiral Stophord, would use in *reprimanding* an officer" (*Macaulay*). **Admonish** stresses the implication of warning or counsel. "Count him not as an enemy, but *admonish* him as a brother" (2 *Thessalonians* iii. 15). "Sincere acknowledgments to both my private and public censors for their friendly *admonitions*" (*Coleridge*). **Reproach** and **chide** imply dissatisfaction or displeasure; **reproach** usually connotes criticism or faultfinding; **chide**

(which once implied rebuke), in current use, almost invariably implies mild reproof or a slight scolding. "If he came home late, and she *reproached* him, he frowned and turned on her in an overbearing way" (*D. H. Lawrence*). "He *reproached* himself for ascribing motives to other people without taking care first to look at his own" (*C. Mackenzie*). "Approach her [the Queen]: do not fear; She will not *chide* you" (*G. Bottomley*).

Ana. *Criticize, reprehend, censure, reprobate: chasten, correct, discipline, *punish.

repudiate. Spurn, reject, refuse, *decline.

Ana. Renounce, *abjure: *forgo, forbear, eschew, sacrifice.

Ant. Adopt. — **Con.** *Acknowledge, own, admit, avow, confess: embrace, espouse (see **ADOPT**).

repugnant. 1 **Repugnant**, **repellent** (or **repellant**), **abhorrent**, **distasteful**, **obnoxious**, **invidious** are synonyms when they mean so alien or unlikable as to arouse antagonism and aversion. **Repugnant** is applied to that which is incompatible with one's ideas, principles, or tastes, and stirs up resistance and loathing. "Nor was this state of things [slavery] in the least *repugnant* to the Greek mind" (*G. L. Dickinson*). "The bloomless side of life . . . when he had to face it . . . wasn't altogether *repugnant*" (*Cather*). **Repellent** is applied to that which drives one away: it usually implies a forbidding or unlovely character in the thing avoided that causes one to back away from it. "The mediocre was *repellent* to them; cant and sentiment made them sick" (*R. Macaulay*).

Abhorrent tends to merge with its other and more common sense (see **HATEFUL**), but it is still found applied to that which is incapable of association or existence with something else, and it often implies profound antagonism. "Dictatorial methods *abhorrent* to American ways of thinking" (*Forum*). **Distasteful** is applied to that from which one instinctively shrinks, not because it in itself is unlikable but because it is contrary to one's taste or inclination. "Even the partition of the world into the animate and the inanimate is *distasteful* to science, which dislikes any lines that cannot be crossed" (*Inge*). **Obnoxious** is applied to that which is so highly objectionable, usually on personal grounds, that one cannot endure the sight or presence of it (or, often, him) with equanimity; as, "He would renounce me for a sister, If I encouraged the addresses of a man so *obnoxious* to them all" (*Richardson*); "The Prussian Government, too, during the war, offered a tempting prize for a song to displace 'Heil dir im Siegerkranz,' which had become *obnoxious* because of its close similarity to the British National Anthem" (*Manchester Guardian*). **Invidious** is applied to that which cannot be used (such as a word) or made (such as a distinction) or undertaken (such as a task or project) without arousing or creating ill will, envy, odium, or the like; as, "the *invidious* word usury" (*Hume*); "What I would urge, therefore, is that no *invidious* distinction should be made between the Old Learning and the New" (*J. R. Lowell*). "If the public wants a standardized pronunciation, I have no doubt that some appropriate standard will evolve itself. If there are any who think otherwise, it must be left to them to undertake the *invidious* task of deciding what is to be approved and what is to be condemned" (*D. Jones*).

Ana. Foreign, alien, extraneous, *extrinsic: uncongenial, incompatible, incongruous, *inconsonant: *antipathetic, aversive, unsympathetic.

Ant. Congenial.

2 **Repulsive**, **revolting**, ***offensive**, **loathsome**.

Ana. Odious, *hateful, abominable, detestable: foul, nasty (see **DIRTY**): vile, *base, low.

repulsive. **Repugnant**, **revolting**, ***offensive**, **loathsome**.

Ana. Repellent, *repugnant, abhorrent, obnoxious.

Ant. Alluring, captivating.

reputation. Repute, *fame, renown, honor, glory, celebrity, éclat, notoriety.

Ana. Credit, weight, *influence, authority, prestige.

repute, n. Reputation, *fame, renown, celebrity, notoriety, éclat, honor, glory.

Ant. Disrepute.

reputed. *Supposed, supposititious, suppositious, putative, conjectural, hypothetical.

Ana. Assumed, presumed (see PRESUPPOSE): *traditional, legendary.

request, v. *Ask, solicit.

Ana. *Beg, entreat, beseech, implore, supplicate, importune: appeal, petition, sue, pray (see under PRAYER).

require. 1 Exact, claim, *demand.

Ana. *Prescribe, assign, define: warrant, *justify.

2 *Lack, want, need.

requirement. Requirement, requisite, prerequisite agree in denoting something that is regarded as necessary to the success or perfection of a thing. Although requirement, the more general term, may be employed in place of requisite, in current use it is the customary term when the idea to be conveyed is of something more or less arbitrarily demanded or expected, especially, but not exclusively, by those who lay down conditions as for admission to college, for enlistment in the army or navy, for membership in a church, for entrance into a course, or the like; as, college entrance requirements; a list of requirements for all campers; "Edward Casaubon was bent on fulfilling unimpeachably all requirements" (G. Eliot); "My wardrobe had to provide for a wide range in temperature, and social, business, and sport requirements" (V. Heiser). Requisite is the customary term when the stress is on the idea of something that is indispensable to the end in view, or is necessitated by a thing's nature or essence or is otherwise essential and not arbitrarily demanded; as, the prime requisite of a good speech is to have something to say that needs to be said; "the first requisite of literary or artistic activity, is that it shall be interesting" (T. S. Eliot); the requisites of our present social economy are capital and labor. Prerequisite differs from requisite only in a stress on the time when it becomes indispensable: it applies therefore to things which must be known, or accomplished, or acquired as preliminaries to the study of a subject, the doing of a kind of work, or the attainment of any end; as, "he possesses the prerequisite of an original poet—a perception unifying, exact and exhilarating" (Day Lewis).

requisite, adj. *Needful, necessary, indispensable, essential.

Ana. Compelled or compulsory, constrained, obliged or obligatory (see corresponding verbs at FORCE): fundamental, *essential, cardinal, vital.

requisite, n. *Requirement, prerequisite.

requite. Recompense, repay, compensate, remunerate, *pay, satisfy, reimburse, indemnify.

Ana. Retaliate, revenge (see corresponding nouns at RETALIATION): regain, *recover, retrieve, recoup.

rescue, v. Rescue, deliver, redeem, ransom, reclaim, save come into comparison as meaning to free a person or thing from that which subjects him or it to confinement, danger of death or destruction, or any serious evil. One rescues a person who is in imminent danger such as of death, of capture, or of assault, by prompt or vigorous action (as, "We are beset with thieves; Rescue thy mistress"—Shak.); to rescue the crew of a sinking ship; to rescue a child in danger of being run down by an

automobile); less often, one rescues a thing that is in danger of destruction, or that has been forcibly seized, by freeing it from danger or from its captors (as, "Rescued is Orleans from the English"—Shak.; "Diamonds that I rescued from the tarn"—Tennyson; "a main object of his teaching to rescue the idea of justice from identification with the special interest of the strong"—G. L. Dickinson). One delivers a person (rarely, in the sense here considered, a thing) by setting him (or it) free from prison, confinement, suffering, temptation, embarrassment, or the like; as, "Lead us not unto temptation, but deliver us from evil" (Matthew vi. 13); to deliver the prisoners from the Bastille; "to deliver mankind from the paralyzing grip of determinism" (Inge); "the population of Russia had only just been delivered, nominally at least, from serfdom" (H. Ellis). One redeems a person in bondage, in captivity, or from suffering the consequences of his sin, crime, or the like, by paying the price that is demanded for his release. "Ye know that ye were not redeemed with corruptible things, as silver and gold. . . . But with the precious blood of Christ" (1 Peter i. 18-19). "Let me redeem my brothers both from death" (Shak.). Also, one redeems a thing from pawn or like condition by paying the amount that is due or is asked for its recovery (as, at last he was able to redeem his watch) or from a state of neglect, deterioration, or decay by spending the money or the time necessary to restore it to good condition (as, "a plot of land redeemed from the heath, and after long and laborious years brought into cultivation"—Hardy). One ransoms a person who has been captured, enslaved, kidnapped, or the like, by paying the amount that is demanded by his captor or owner; as, "My son, whom nought can ransom or redeem" (Kyd); "His wife ransomed him at a heavy price" (Freeman). Ransom is often employed in place of redeem in religious use, especially in reference to Christ as the Redeemer, when the emphasis is on the price he paid in accepting crucifixion; as, "His brethren, ransomed with his own dear life" (Milton). One reclaims that which has become debased, wild, savage, waste, desert, or the like, by bringing it back to its former state or condition. Specifically, one reclaims a person who has wandered from rectitude or has become a sinner, a prostrate, a degenerate, or the like, when one reforms him or restores him to moral, decent ways of life (as, "I fear he is not to be reclaimed; there is scarcely a hope that anything in his character or fortunes is reparable now"—Dickens), or a thing that has been abandoned or neglected, when one works with it so that, if it is land, it becomes productive or, if it is waste of any sort, it finds a new use or is made to give up what is still usable in it (as, to reclaim long-abandoned farms; to reclaim discarded wool). One saves (as here compared: see also SAVE, 2) a person or thing when one rescues, delivers, redeems, ransoms, or reclaims him (or it) and enables him (or it) not only to be free from the evil that involves or threatens, but to continue in existence, to enjoy security or happiness, to be of future use or service, or the like; as, to save a house from flames; to save a tree from destruction by parasites; his life was saved by an operation; the lifeguard saved him from drowning by throwing him a rope; "He cried, saying, Lord, save me" (Matthew xiv. 30).

Ana. *Free, release, liberate, emancipate, manumit: preserve, conserve (see SAVE): *extricate, disentangle, disembarass.

research. Investigation, *inquiry, inquisition, inquest, probe.

resemblance. *Likeness, similarity, similitude, analogy, affinity.

Ana. Correspondence, agreement, harmonizing or

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

harmony, conformity (see corresponding verbs at AGREE): *comparison, parallel.

Ant. Difference: distinction.

resentment. *Offense, umbrage, pique, dudgeon, huff.
Ana. Rancor, animus, animosity, antipathy, antagonism (see ENMITY): ill will, spite, *malice, malignity.

reserve, v. *Keep, keep back, hold back, retain, withhold, detain.

Ana. *Save, preserve, conserve: appropriate, pre-empt, confiscate, *arrogate.

reserved. *Silent, reticent, uncommunicative, taciturn, secretive, close, close-lipped, closemouthed, tight-lipped.

Ana. Aloof, detached, disinterested (see INDIFFERENT): *shy, diffident, modest, bashful: formal, ceremonious, conventional (see CEREMONIAL).

Ant. Affable: expansive: blatant.

reside. **Reside, live, dwell, sojourn, lodge, stay, put up, stop** agree in meaning to abide in a given place as one's habitation or domicile. **Reside**, the more formal term, and **live**, the word in everyday use, express this idea, often without further implications; as, he *resides* (or *lives*) in New York City. Usually, however, when the term is intended to suggest the fixed, settled, or legal abode of a person or group such as a family, *reside* is the preferred word: when the idea to be emphasized is the spending of one's time in a given place and the carrying on of the normal activities of one's way of life, *live* is usually the better and less formal word; as, the senator *resides* in San Francisco but he *lives* for the better part of the year in Washington. When the reference is not to persons but to things, *reside* is the term to be used when the thing referred to is a quality, an element, a condition, or the like; as, the power of decision *resides* in the electorate; "His peculiar merit as a critic...*resided* in the combination of this personal gusto and curiosity" (T. S. Eliot). "When we have in our minds the idea of art as imitation, we are prone to think of beauty as *residing* in particular objects, particular colours" (Binyon). When the thing is something concrete and the idea of making one's abode or home is suggested, *live* may be used; as, "They say that sherry ought to *live* for a while in an old brandy-cask, so as to contract a certain convincing quality from the cask's genial timbers" (C. E. Montague). **Dwell** is also a close synonym of these words, but it is more frequently employed in elevated or poetic language (as, "She *dwell* among the untrodden ways Beside the springs of Dove"—Wordsworth; "I dreamt that I *dwell* in marble halls"—Alfred Bunn) or, in extended use, it carries a stronger implication of abiding as in thought or in spirit (as, "The bad poet *dwells* partly in a world of objects and partly in a world of words, and he never can get them to fit"—T. S. Eliot). **Sojourn** differs from all the preceding terms in usually implying a temporary habitation or abode or a more or less uncertain place or way of living; as, he *sojourns* in Washington while Congress is in session. "For what purpose, it may be asked, was the world created, and immortal spirits sent to *sojourn* in it, if we have no duties except to make our escape from contaminating surroundings?" (Inge). **Lodge** (see also HARBOR) also implies an abode for a time or for the time being. When used in reference to persons, it often implies the status of a lodger or a boarder, and not that of one living in his own house or apartment (as, he *lodes* at the Y.M.C.A. when he is in town; he *lodged* at the inn last winter); when used in reference to animals or things, it implies a stowing away in a place for protection or safety (as, to *lodge* money in a bank; to *lodge* the cattle in the barn for the winter). **Stay** is the term commonly used in colloquial

language in place of *sojourn* and often of *lodge*; as, he is *staying* at Miami Beach for the winter; whenever he was in Paris he *stayed* at that hotel. **Put up** is also a common colloquial term but it is used only in the sense of *lodge* and commonly suggests the status of a guest in a hotel or in a home; as, where does he *put up* (i.e., in what hotel does he *stay*) when he is in Chicago?; we can *put you up* any night you are in town. **Stop**, which is often used in the sense of *stay* (as, he is *stopping* at the Ritz-Carlton), is regarded as a colloquial use of the term which is avoided by very precise writers and speakers.

Ana. Remain, abide (see STAY): *continue, endure.

residence. *Habitation, dwelling, abode, domicile, house, home.

resident, n. *Inhabitant, denizen, citizen.

residue. Residium, remains, leavings, *remainder, relics, rest, balance, remnant.

residium. Residue, *remainder, remains, leavings, relics, rest, balance, remnant.

resign. 1 Yield, surrender, leave, abandon, *relinquish, cede, waive.

Ana. *Forgo, eschew, sacrifice, forbear, abnegate: *abjure, renounce, forswear.

2 *Abdicate, renounce, demit.

resignation. 1 Compliance, acquiescence. See under COMPLIANT.

Ana. Submitting or submission, yielding, deferring or deference (see corresponding verbs at YIELD): meekness, modesty, humbleness or humility, lowliness (see corresponding adjectives at HUMBLE).

2 *Patience, long-suffering, longanimity, forbearance.

Ana. Endurance, toleration, suffering or sufferance (see corresponding verbs at BEAR): *fortitude, backbone, pluck.

resigned. *Compliant, acquiescent.

Ana. Submissive, subdued (see TAME): reconciled, adjusted, adapted, accommodated, conformed (see ADAPT).

Ant. Rebellious.

resile. Recoil, *rebound, reverberate, repercuss.

resilient. 1 *Elastic, springy, flexible, supple.

Ana. Recoiling, resiling, rebounding (see REBOUND): recovering, regaining, retrieving (see RECOVER).

Con. Rigid, *stiff, inflexible, tense.

2 *Elastic, expansive, buoyant, volatile, effervescent.

Ana. Responsive, sympathetic (see TENDER): *spirited, high-spirited, mettlesome.

Ant. Flaccid.

resist. *Oppose, combat, withstand, antagonize.

Ana. Assail, *attack, assault: impugn, gainsay, contravene (see DENY): thwart, baffle, balk, foil, *frustrate.

Ant. Submit: abide.

resolute. Steadfast, stanch, *faithful, true, leal, loyal.

Ana. Determined, decided, resolved (see DECIDE): intrepid, valiant, *brave, courageous: stubborn, *obstinate, pertinacious.

resolution. 1 Analysis, dissection, anatomy, breakdown. See under ANALYZE.

Ana. Separation, division (see corresponding verbs at SEPARATE): elucidation, interpretation, expounding or exposition, explaining or explanation (see corresponding verbs at EXPLAIN).

2 Mettle, spirit, tenacity, *courage.

Ana. Determination, *decision: pluck, grit, *fortitude, backbone, guts.

resolve. 1 *Analyze, dissect, anatomize, break down.

Ana. *Separate, part, divide: reduce, diminish (see DECREASE): dissolve, melt, fuse (see LIQUEFY).

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

Ant. Blend.

2 Determine, *decide, settle, rule.

Ana. Purpose, propose, design, *intend, mean: plan, scheme, project (see under PLAN, n.).

resolvent. *Solvent, dissolvent, menstruum, alkalest.

resort, v. **Resort, refer, apply, go, turn** come into comparison when they carry the meaning to betake oneself or to have recourse when in need of some help or external aid. **Resort** often implies that one has encountered difficulties or has tried ineffectually to surmount them; when it carries the latter implication, it often also connotes an approach to desperation; as, he found he could not get relief, unless he *resorted* to the courts; cf. court of last resort. "Most powers conceivably may be exercised beyond the limits allowed by the law. . . . But we do not on that account *resort* to the blunt expedient of taking away the power" (*Justice Holmes*). **Refer** usually suggests a need of authentic information and recourse to someone or something that will supply such information; as, every time he comes across a new word he *refers* to the dictionary; most men *refer* to their own watches when someone reports the time. **Apply** suggests having direct recourse, as in person or by letter, to a person or persons having the power to grant one's request or petition; as, to *apply* to a hospital for aid; to *apply* to the court for relief; a letter of *application* for a post. "[She was] determined, that if he persisted in considering her repeated refusals as flattering encouragement, to *apply* to her father, whose negative might be uttered in such a manner as must be decisive" (*Austen*). **Go** and **turn** are more general, but are often more picturesque or dramatic terms than the words previously considered, for they suggest action or movement; as, the president decided to *go* to the people with his plan for reorganization; there was no one to whom she could *go* (or *turn*) for sympathy; "she had taken fright at our behavior and *turned* to the captain pitifully" (*Conrad*).

Ana. *Direct, address, devote: *use, employ, utilize.

resort, n. *Resource, expedient, shift, makeshift, stopgap, substitute, surrogate.

Ana. See those at RESOURCE, 2.

resource. 1 In plural forms **resources**. Assets, belongings, effects, *possessions, means.

2 Resource, resort, expedient, shift, makeshift, stopgap, substitute, surrogate come into comparison as denoting something to which one turns for help or assistance in difficulty or need when the usual means, instrument, source of supply, or the like, fails one, is not at hand, or is unknown to one. **Resource** applies to any action, activity, person, method, device, or contrivance upon which one falls back when in need of support, assistance, diversion, or the like; as, he has exhausted every *resource* he can think of; "I must e'en hasten to matters of fact, which is the comfortable *resource* of dull people" (*Shenstone*); "The Japanese designer was debarred by instinct and tradition from using the *resources* of texture and of light and shade" (*Binyon*). **Resort** is now far less often used than *resource* except when qualified by "last" or in the phrase "to have (or make) *resort* to (something)"; as, to have *resort* to a fortune teller; "Mercy, fled to as the last *resort*" (*Cowper*); "Thus the income tax became a . . . last *resort*" (*Shaw*). **Expedient** applies to any means, device, contrivance, or the like, which serves often in lieu of the usual or ordinary means, device, etc., but sometimes merely as a means, a device, or a contrivance to accomplish a difficult end immediately, easily, or without waste of time; as, "Everything is brought about . . . through the medium of the author's reflections, which is the clumsiest of all *expedients*" (*Scott*). "To classify in a science is necessary for the purpose of that science: to

classify when you come to art is at the best an *expedient*, useful to some critics and to a multitude of examiners" (*Quiller-Couch*). A *shift* is commonly a tentative or temporary expedient: the term frequently implies evasiveness or trickery; as, "The dear delicious *shifts* I used to be put to, to gain half a minute's conversation with this fellow!" (*Sheridan*). **Makeshift** is even more derogatory than *shift*, for it implies substitution of the inferior for the superior, and often, though far from always, it imputes carelessness, indifference, or laziness to the one who chooses or makes use of it; as, "Not a model clergyman, only a decent *makeshift*" (*G. Eliot*); using oiled paper in their windows as a *makeshift* for glass. **Stopgap** applies to any person or thing that momentarily or temporarily supplies a need, or fills a gap, hole, vacancy, or the like; as, his monograph just published is said to be a *stopgap* until his book is ready to appear; the new appointee said modestly that he was only a *stopgap* and would retire when a better man was available. **Substitute** (as here compared: for its application to persons, see SUBSTITUTE, 2) does not carry as strong a suggestion of an emergency or exigency as the preceding terms do: the word is applicable to anything one chooses, accepts, or prefers, whether rightly or wrongly, rationally or irrationally, in place of the usual or original thing, or which has been invented or devised to take its place or to do its work; as, "Another discovery . . . was that a *substitute* for milk . . . could be manufactured from the soya bean" (*V. Heiser*); "Daydreams, in adult life, are recognized as more or less pathological, and as a *substitute* for efforts in the sphere of reality" (*B. Russell*). **Surrogate** is a somewhat learned word for a substitute, often, but far from always, for a synthetic or artificial product designed to replace a natural product that is scarce or comparatively expensive; as, *surrogates* for various foodstuffs, such as butter; "slang is . . . a facile *surrogate* for thought" (*Lowes*). **Ana.** *Device, contrivance, contraption: *invention, creation (see corresponding verbs at INVENT): *method, manner, way, fashion, mode, system.

respect, v. Regard, esteem, admire. See under REGARD, n.

Ana. Reverence, *revere, venerate: value, prize, cherish, *appreciate.

Ant. Abuse: misuse.

respect, n. *Regard, esteem, admiration.

Ana. *Reverence, awe, fear: *honor, homage, deference: veneration, reverence, worship, adoration (see under REVERE).

Ant. Contempt.

respecting. Concerning, regarding, *about, anent.

respective. Individual, particular, *special, especial, specific, concrete.

respectively. *Each, apiece, severally, individually.

resplendent. *Splendid, gorgeous, glorious, sublime, superb.

Ana. Effulgent, refulgent, radiant, brilliant, *bright: blazing, glowing, flaming (see BLAZE, v.).

respond. *Answer, reply, rejoin, retort.

Ana. React, behave, *act.

Con. Stimulate, excite, quicken (see PROVOKE).

response. Answer, reply, rejoinder, retort. See under ANSWER, v., 1.

responsible. **Responsible, answerable, accountable, amenable, liable** are comparable when they mean subject to an authority which may exact redress in case of default. **Responsible, answerable,** and **accountable** are etymologically very close, all meaning capable of being called upon to answer, or to make amends, to someone for something. They are, therefore, often used interchangeably. In precise English, however, they are

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

distinguishable largely in their applications. One is **responsible** for the performance of a task or duty, or the fulfillment of an obligation, or the execution of a trust, or the administration of an office, to the person or body that imposes the task, duty, trust, or the like, or delegates the power; as, the Governor is **responsible** to the electorate for the administration of the laws. Sometimes the *to* phrase or the *for* phrase is suppressed but still implied; as, the salesmen are **responsible** to the manager, and the manager is **responsible** to the owner; a teacher is **responsible** for the conduct of pupils in the classroom. "The ideally free individual is **responsible** only to himself" (*H. Adams*). Sometimes, when both phrases are suppressed, **responsible** implies manifest ability to fulfill one's obligations; as, his record shows that he is a **responsible** person. Still narrower meanings are possible when the word is so used that with the aid of the context a sense of one's moral obligations or the power of judgment is connoted. "James arrived at an age when he could be treated as **responsible**" (*Froude*). One is **answerable** (to someone for something) who, because of a moral or legal obligation or because of the acceptance of such an obligation for another, may be called upon to pay the penalty for a violation of the law or a neglect of duty; it usually indicates or implies the existence of a judge or tribunal; as, the father made himself **answerable** to the court for his son's behavior. "Men in business, who are **answerable** with their fortunes for the consequences of their opinions" (*Haslitt*). One is **accountable** (to someone for something) who because of something entrusted to one is bound to be called upon to render an account of how that trust has been executed. **Accountable** is much more positive than **responsible** or **answerable** in its suggestion of retributive justice in case of default. "We are held **accountable**, and God... will reckon with us roundly for the abuse of what he deems no mean or trivial trust" (*Cowper*). **Amenable** and **liable** especially stress subjection and suggest the contingency rather than the probability or certainty of being called to account. One is **amenable** (to someone or to something) whose acts are subject to the control or the censure of a higher authority, and who, therefore, is not self-governing or absolute in power; as, a despot is **amenable** to no will other than his own. "Is it to be contended that the heads of departments are not **amenable** to the laws of their country?" (*Ch. Just. Marshall*). One (a person or thing) is **liable** that by the terms of the law may be made answerable in case of one's own or another's default; as, a surety is **liable** for the debts of his principal. "The present United States... took nothing by succession from the Confederation. It... was not **liable** for any of its [the Confederation's] obligations" (*Ch. Just. Taney*). **Liable** does not, however, always imply answerability. It may imply mere contingent obligation; as, every citizen is **liable** for jury duty (or **liable** to be called to serve on a jury).

Ana. Subject, open, exposed (see **LIABLE**): *reliable, dependable, trustworthy.

responsive. Sympathetic, warm, warmhearted, compassionate, *tender.

Ana. Gentle, mild, lenient (see **SOFT**): sensible, conscious, alive, awake, *aware: sensitive, susceptible, prone (see **LIABLE**).

rest, n.¹ **Rest, repose, relaxation, leisure, ease, comfort** used in comparison when they mean freedom from toil or strain. **Rest**, the most general of these terms, implies withdrawal from labor or exertion of any kind, and therefore suggests an opposition to the term **work**, but it may imply freedom from activity of any kind: it does not in itself explicitly imply any particular way of spending one's time, but it always suggests an aim or

as a result the overcoming of physical or mental weariness; as, "There the wicked cease from troubling; and there the weary be at rest" (*Job* iii. 17); "Sleep on now, and take your rest" (*Matthew* xxvi. 45); "Night came, and with it but little rest" (*Hardy*). **Repose** implies freedom from motion or movement, and therefore not only suggests physical quiet (often, specifically, the state of sleeping or slumbering), but also mental quiet and freedom from that which disturbs, annoys, agitates, confuses, or the like: the term, therefore, usually suggests tranquillity or peace or the refreshment that comes from complete quiet or rest. "Heavily passed the night. Sleep, or **repose** that deserved the name of sleep, was out of the question" (*Austen*). "Eighteen years of commotion had made the majority of the people ready to buy **repose** at any price" (*Macaulay*). "Walls... that shut out the world and gave **repose** to the spirit" (*Calver*). **Repose** is also used in aesthetics and art criticism for a principle that is opposed usually to that of motion or action: sometimes the term implies a flawless harmony of colors, hues, or tones or a harmonious disposition of parts, so that the whole rests the eye (or ear) and satisfies the mind (as, "The **repose** of classical art, not in sculpture alone, is gone from our ideals"—*S. Alexander*), but at other times it suggests rather the absence of any straining for effect or of any signs of a difference between that which is attempted (or suggested) and that which is achieved (as, "the new tower [of Chartres Cathedral] is a little wanting in **repose** for a tower whose business is to counterpoise the very classic lines of the old one"—*H. Adams*). **Relaxation** may imply rest that comes from diversion or recreation but, in the sense here stressed, it implies either a releasing of the tension that keeps muscles taut and fit for work or the mind keyed up to the processes of clear and prolonged thinking, or a physical and mental slackening that finally induces repose. "[Amusements] catering to those who wish **relaxation** from analysis—to the tired scientist, and the fagged philologist and the weary man of business" (*Babbitt*). "The hours of the day at which people can work under highest tension, the proportion of pressure and **relaxation** conducive to a maximum output" (*Grandgent*). "Now and then came **relaxation** and lassitude, but never release. The war towered over him like a vigilant teacher" (*H. G. Wells*). **Leisure** implies exemption from labor imposed upon one by a trade or profession, by duties, etc.: it may apply to the hours in which one is not engaged in one's daily work, or to the period in which one is on vacation, or to the entire time of a person who is not compelled to earn his living; as, to have little **leisure** for reading; he looked forward to the prospect of a full month of **leisure**; those who lead lives of **leisure**. **Leisure**, therefore, stresses freedom from compulsion, or routine, or continuous work: it usually suggests not freedom from activity but the freedom to determine one's activities. "Labor is doing what we must; **leisure** is doing what we like; **rest** is doing nothing whilst our bodies and minds are recovering from their fatigue" (*Shaw*). "I cannot include under the pleasant name of '**leisure**' those activities that are carried on systematically after business hours. Very soon they become things that *must* be done" (*S. M. Crothers*). **Ease** (see also **READINESS**) stresses exemption from toil, but it also implies a freedom from that which worries or disturbs and from that which demands physical or mental activity. In contrast to **leisure** it implies rest and repose: in addition it suggests either complete relaxation of mind and body or a state of mind that finds no attraction in work or activity; as, "lasting **ease**, Elysian quiet, without toil or strife" (*Wordsworth*); "all day I sit in

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

idleness, while to and fro About me thy serene, grave servants go; And I am weary of my lonely *ease*" (*Mil-lay*). But *ease* may also imply absence of strain of any sort, especially mental or nervous strain, rather than freedom from toil; as, "She had never been quite at her *ease* with him" (*Dickens*); "an able one...not only de-voted, but resourceful and intelligent, one who would be at his *ease* with all sorts of men" (*Cather*). *Comfort* differs from all the other words of this group in carrying little, if any, suggestion of freedom from toil: it applies rather to a state of mind induced by relief from all that strains or inconveniences or causes pain, disquiet, or discontent. Positively it suggests perfect well-being and a feeling of quiet enjoyment or content; as, "[a life] of *ease* and *comfort*" (*Cather*); he had not known *comfort* for many years. "He had bought for himself out of all the wealth streaming through his fingers neither adulation nor love, neither splendour nor *comfort*" (*Conrad*).

Ana. Intermitting or intermission, suspending or suspension, deferring (see corresponding verbs at DEFER): stillness, quietness or quiet, silentness or silence (see corresponding adjectives at STILL): calmness or calm, tranquillity, serenity (see corresponding adjectives at CALM).

rest, *n.*² *Remainder, residue, residuum, remains, leavings, relics, balance, remnant.

Ana. *Excess, superfluity, surplus, surplusage, overplus.

restful. Reposeful, *comfortable, cozy, snug, easy.

Ana. *Soft, gentle, mild, lenient: *still, quiet, silent: placid, peaceful, *calm, serene, tranquil.

restitution. Amends, redress, *reparation, indemnity.

Ana. Repayment, recompense, reimbursement, requital (see corresponding verbs at PAY).

restive. 1 *Contrary, perverse, balky, froward, way-ward.

Ana. Intractable, *unruly, ungovernable, refractory: *obstinate, stubborn, mulish, stiff-necked, pigheaded.

2 Restless, *impatient, nervous, unquiet, uneasy, fidgety, skittish, feverish, hectic, jumpy, jittery.

Ana. See those at RESTLESS.

restless. Restive, *impatient, nervous, unquiet, uneasy, fidgety, skittish, feverish, hectic, jumpy, jittery.

Ana. *Fitful, spasmodic: *inconstant, capricious, unstable, fickle: agitated, disquieted, perturbed, discomposed (see DISCOMPOSE).

restorative. **Restorative**, **alternative**, **tonic** are synonymous terms in medicine, denoting an agent that tends to restore a person to normal health or vigor. **Restorative** may be used generally, but it is most often applied to a substance, such as smelling salts or adrenalin, that has a rapid action in restoring a person to consciousness, as after fainting, apparent drowning, or the like. **Alternative** is applied to a medicine or treatment prescribed for building up the body, especially after an illness. An *alternative* acts gradually, having a favorable effect upon the general processes of nutrition and repair in the body, but not having a demonstrable effect on any particular organ. Typical *alternatives* are iron, mercury compounds, and cod-liver oil. **Tonic** is applied to an agent, usually a medicine, that gradually restores normal vigor to the body or to one of its organs or parts, weakened, as by disease or overexertion, and impaired in its normal functioning. Certain medicines, such as compounds of iron or arsenic, as well as exercise, cold baths, and other physical agents, are general tonics. Sometimes a tonic has a specific action; thus, strychnine is a nerve *tonic*.

restore. *Renew, refresh, reintegrate, rejuvenate, renovate, refurbish.

Ana. Save, reclaim, redeem, *rescue: reform, revise,

amend (see CORRECT, *v.*): *recover, regain, retrieve, recoup, recruit.

restrain. **Restrain**, **curb**, **snaffle**, **check**, **bridle**, **inhibit** come into comparison when they mean to hold a person or thing back from doing something or from going too far in doing something. **Restrain**, the most comprehensive of these terms, may imply the intent either to prevent entirely or to keep under control or within bounds, but it usually suggests the operation of some force, authority, or motive that is so strong or compelling that it achieves the desired end. "Pleasant, excited by the strangeness of the occasion, could not be *restrained*; she was bubbling over with information" (*Deland*). "To produce in the child the same respect for the garden that *restrains* the grown-ups from picking wantonly" (*B. Russell*). "A law of 17 B.C. gave a legal position to slaves informally manumitted and made their children free-born, but drastically *restrained* their power to acquire and be-queath property" (*Buchan*). **Curb** suggests the use of a method comparable to that of a curb (i.e., a chain or strap) which, when pulled back by a rider, draws tightly against the lower jaw of a speeding or unruly horse and brings him under control: it therefore differs from *restrain* in implying either a sharp, drastic method that produces its effect immediately (as, "He's often been on the point of blurring out with it, but I've *curbed* him"—*Cather*) or the influence of something that serves to shackle one or to prevent a thing's free or efficient operation (as, "Authority *curbs* the will power of the individual"—*C. W. Eliot*; "The sober scientific method does not stimulate the imagination; it *curbs* it"—*S. M. Crothers*). **Snaffle** suggests a method comparable to the use of a snaffle (a bit which produces a lighter effect than a curb): the term therefore implies a restraint that guides rather than brings one summarily under control; as, "The guilt and terror that thy sins will *snaffle* thee with" (*Bunyan*). **Check** (as here considered: see also ARREST, 1) often implies the use of a method suggestive of a check rein (or check) of a horse's harness which pulls up a horse's head and slows up his speed or holds him still (as, "Alice... soon *checked* her [horse's] speed; and the white horse subsided to a walk"—*Shaw*; "Father Latour *checked* his impetuous vicar"—*Cather*) but it may carry implications derived from other senses of the noun, such as those of delaying or impeding motion or progress (as, "the ship, hauled up so close as to *check* her way"—*Conrad*; "a spot where her footsteps were no longer *checked* by a hedge-*row*"—*G. Eliot*) or of attacking or defeating some force or influence (as, "endeavour to *check* that little something, bordering on conceit and impertinence, which your lady possesses"—*Austen*; "the ambition of churchmen...disciplined and *checked* by the broader interests of the Church"—*H. Adams*). **Bridle** (as here compared: see also STRUT) also derives its implications from the use of a part of a horse's harness, in this case the one called a *bridle* and consisting of all the parts of the headgear by means of which a horse is guided or controlled. The verb carries a stronger implication of keeping under one's control by subduing, moderating, or holding in than does *curb* or *check*: it is used chiefly in respect to strong or vehement emotions or desires; as, to *bridle* one's wrath; to *bridle* one's curiosity; he could no longer *bridle* his passion. **Inhibit** (for fuller treatment see FORBID) is a synonym of these terms only in its current psychological and psychiatric sense, where it implies the repression or suppression of certain emotions, desires, thoughts, or the like (see SUPPRESS) by the curbing influence of one's conscience, religious principles, the social conventions of one's class, or the like; as, he blamed his upbringing and its *inhibiting* influence for his failure as a poet.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. *Arrest, check, interrupt: abstain, *refrain, forbear: *hinder, impede, obstruct, block.

Ant. Impel: incite: activate: abandon (*oneself*).

restraint. Constraint, compulsion, *force, coercion, duress, violence.

Ana. Curbing, checking, inhibiting (see **RESTRAIN**): hindering, impeding, obstructing, blocking (see **HINDER**).

Ant. Incitement: liberty.

restrict. *Limit, circumscribe, confine.

Ana. Bind, *tie: *contract, shrink: *restrain, curb, check.

Con. *Extend, lengthen: *expand, amplify, swell: enlarge, *increase.

result. Consequence, *effect, aftereffect, event, aftermath, issue, outcome, upshot, sequel.

Ana. Concluding or conclusion, ending or end, closing or close, termination (see corresponding verbs at **CLOSE**): *product, production.

Con. *Origin, source, root: *cause, determinant, antecedent.

ret. *Soak, saturate, drench, steep, impregnate, sog, sop, waterlog.

retain. *Keep, keep back, detain, withhold, reserve, hold back.

Ana. *Have, hold, own, possess, enjoy: *save, preserve, conserve.

Con. *Discard, shed, cast: *relinquish, surrender, abandon, yield: *abdicate, resign: *abjure, renounce, forswear, recant, retract.

retaliation. Retaliation, reprisal, revenge, vengeance, retribution agree in meaning both the act of inflicting or the intent to inflict injury in return for injury, and the injury so inflicted. **Retaliation** implies a return of like for like, commonly but not exclusively a return of evil for evil; as, raid after raid occurred, each in *retaliation* for one perpetrated by the other side; to be so astonished by a blow as to lose the opportunity for *retaliation*; he is never satisfied until he inflicts a *retaliation* for every injury, real or fancied. **Reprisal** applies specifically to an act of retaliation indulged in for the sake of gaining redress of a grievance or of compelling an enemy or antagonist to cease unlawful acts. The term in legal use commonly, but not invariably, implies the seizure of property by force either as a means of getting compensation for one's own injuries or of inflicting punishment: when used in reference to nations, it may or may not imply an act of war; as, in *reprisal* for the blockade of her ports, Germany engaged in a vigorous submarine campaign against British shipping; air raids on Berlin in *reprisal* for German air raids on London; to make *reprisals* on a neighbor's orchard for the stealing of one's fruit by his children. "Lest Mr. Raycie's mysterious faculty of hearing what was said behind his back should bring sudden *reprisals* on the venerable lady" (*E. Wharton*). **Revenge** usually carries a strong implication of vindictiveness or, sometimes, of justifiable anger that is lacking in *retaliation*: the term therefore more often applies to the strong desire or intent to inflict injury than to the fulfillment of that desire or intent (as, "A man that studieth *revenge* keeps his own wounds green"—*Bacon*), or more pointedly implies the gratification of that desire than the actual infliction of injury (as, he had his *revenge*; "*revenge* is sweet"—*Old Proverb*; " 'Tis sweet to love; but when with scorn we meet, *Revenge* supplies the loss with joys as great"—*G. Granville*). **Vengeance** may imply the avenging of a wrong done to oneself or another by measures that punish the offender so that he suffers in the same degree as his victim, but the term is also applicable to the act or acts committed in

gratification of one's revenge; as, "*Vengeance* is mine; I will repay, saith the Lord. Therefore if thine enemy hunger, feed him; if he thirst, give him drink" (*Romans* xii. 19-20); "There was a time in my imprisonment, when my desire for *vengeance* was unbearable" (*Dickens*); "The burning of a rick is an act of *vengeance*, and a ploughman out of employ is a vengeful animal" (*Meredith*). **Retribution** also applies chiefly to a punishment inflicted in return, but it carries less suggestion of a grievance on the part of a victim, and a far stronger implication than any of the others of the operation of strict justice: in fact, the word is often qualified by *just*, *deserved*, or the like, and the punishment is seldom meted out by the victim, but by a higher power. Therefore it commonly implies merited punishment brought upon oneself, usually, though far from always, by an infraction of law, especially of a law or the laws of God or of nature. "He only retained his boozing dyspeptic brother Hippias at Raynham, in order to exhibit to his son the woful *retribution* Nature wreaked upon a life of indulgence" (*Meredith*). "To be left alone And face to face with my own crime, had been *Just retribution*" (*Longfellow*).

Ana. Punishment, disciplining or discipline, correcting or correction (see corresponding verbs at **PUNISH**): requital, recompensing or recompense, indemnification, repayment (see corresponding verbs at **PAY**).

retard. *Delay, slow, slacken, detain.

Ana. Reduce, lessen, *decrease: *arrest, check, interrupt: clog, fetter, *hamper: balk, baffle (see **FRUSTRATE**).

Ant. Accelerate: advance, further.

reticent. *Silent, reserved, uncommunicative, taciturn, secretive, close, close-lipped, close-mouthed, tight-lipped

Ana. Restrained, inhibited, curbed, checked (see **RESTRAIN**): discreet, prudent (see under **PRUDENCE**).

Ant. Frank. — **Con.** Candid, open, plain (see **FRANK**).

retire. Withdraw, *go, leave, depart, quit, scam, clear out.

Ana. *Recede, retreat: recoil, *rebound, resilie: *relinquish, yield, surrender, abandon.

retort, n. Rejoinder, answer, reply, response. See under **ANSWER, v., 1.**

retort, v. Rejoin, reply, *answer, respond.

Ana. Retaliation, reprisal, revenge: repartee (see **WIT**).

retract. 1 Retrograde, back, *recede, retreat, crawlfish.

Ant. Protract.

2 Recant, *abjure, renounce, forswear.

Ana. Eliminate, *exclude, suspend, rule out.

retreat, n. *Shelter, cover, refuge, asylum, sanctuary, ark.

Ana. *Harbor, haven, port: safety, security (see corresponding adjectives at **SAFE**): seclusion, *solitude.

retreat, v. *Recede, retrograde, back, retract, crawlfish.

Ana. Withdraw, retire, depart, *go: *recoil, shrink, quail.

retrench. Curtail, abridge, *shorten, abbreviate.

Ana. *Decrease, lessen, reduce, diminish.

retribution. Reprisal, vengeance, revenge, *retaliation.

Ana. *Reparation, redress, amends, restitution: visitation, tribulation, *trial, affliction.

Con. *Mercy, clemency, lenity, grace: forgiveness, pardoning or pardon, remitting or remission (see corresponding verbs at **EXCUSE**).

retrieve. *Recover, regain, recoup, recruit.

Ana. Amend, remedy, redress, reform (see **CORRECT, v.**): repair, *mend, rebuild.

Ant. Lose.

retrograde, adj. *Backward, retrogressive, regressive.

Ana. Reversed, inverted (see **REVERSE, v.**): relapsing, lapsing, backsliding, recidivating (see **LAPSE, v.**).

retrograde, v. *Recede, retreat, back, crawfish, retract.
Ana. *Return, revert: *reverse, invert: relapse, *lapse, backslide, recidivate.

retrogressive. Regressive, retrograde, *backward.

Ana. Reversing, inverting (see REVERSE, v.): receding, retreating, retrograding (see RECEDE).

Ant. Progressive. — **Con.** Advancing, furthering, forwarding (see ADVANCE, v.): improving, bettering (see IMPROVE).

return, v. Return, revert, recur, recrudescence come into comparison when they mean to go or come back, as to a person, place, or condition. The same distinctions in implications and connotations are evident in their corresponding nouns **return**, **reversion**, **recurrence**, **recrudescence**. **Return** is the ordinary term of this group: it usually implies either a going back to the place or person from which it started (as, "They returned as wolves return to cover, satisfied with the slaughter that they had done"—*Kipling*; "White surf rushing in and returning immediately"—*Jefferies*; the sickness of a child caused their sudden return; there will be no return to good health, we fear), or it may imply, especially in the case of the noun, a coming back to the place or condition where it had formerly been or where it belongs in its turn (as, to look forward to the return of spring; he was greeted with enthusiasm on his return home; he returns here tomorrow; we do not expect any return of the fever). **Revert** and **reversion** (for specific sense, as applied to a return to an ancestral type or quality, see REVERSION, 2) most frequently imply a going back to a previous, often an original, state or condition, especially after the person or thing has advanced or progressed; as, to revert (or a reversion) to barbarism; "the conception of a lordly splendid destiny for the human race, to which we are false when we revert to wars and other atavistic follies" (*B. Russell*). Both terms, however, are often used when a return after an interruption is implied, as to a previous owner, to a previous topic, to a previous decision, or the like; as, when the lease expires, the property reverts to the lessor; to revert (or a reversion) to a topic previously discussed. "First Mr. Britling thought that he would not pass between these two, then he decided that he would hurry up and do so, then he reverted to his former decision" (*H. G. Wells*). The terms may also imply merely a turning back to the next in line, as for a promotion, a scholarship, an office, or the like; as, when Smith found himself unable to accept the fellowship, it reverted to the next best candidate. **Recur** and **recurrence** imply a return (sometimes repeated returns at more or less regular intervals) of something that has previously happened, that has previously affected a person or thing, that has previously been in one's mind, that has been previously known or experienced, or the like; as, there will be no recurrence of this dream if you clear your mind of fears; "The relapses [into old ways]...recur not only from effort to effort in the case of the individual, but from generation to generation in the case of the race" (*Shaw*); "Incessant recurrence without variety breeds tedium; the overiterated becomes the monotonous" (*Lowes*); "Lydia, suddenly recurring to their former subject, said..." (*Shaw*); "He had forgotten it [a cynical novel he had once read] when confronted by the author, whose face was not marked by cynicism; but it recurred to him now" (*Arch. Marshall*). **Recrudescence** and the far more frequent **recrudescence** imply a return to life or activity: usually the terms imply a breaking out again of something that has been repressed, suppressed, kept under control, or the like; as, boils that recrudescence from time to time; the recrudescence of an epidemic of influenza; "a recru-

descence of Ferdinand's power" (*Belloc*). "We are not here concerned with the question whether this *recrudescence* of energy that has communicated itself to verve is the death throes of a social order or the birth-pangs of a new one" (*Day Lewis*).

Ana. *Advert, revert: *turn, rotate, revolve: restore, *renew: *recover, regain: reverberate, repercuss, *rebound.

return, n. Reversion, recurrence, recrudescence. See under RETURN, v.

reveal, v. Reveal, discover, disclose, divulge, tell, betray, **bewray** come into comparison when they mean to make known that which has been or should be concealed or is intended to be kept concealed. **Reveal** implies a setting forth or exhibition by or as if by lifting a curtain that veils or obscures. In its earliest and still not uncommon sense, it implies supernatural communication by means of vision, inspiration, or the like, of truths beyond or above the range of human sight or reason; as, "Sacred laws...unto him revealed in vision" (*Spenser*); "There is a God in heaven that revealeth secrets, and maketh known to the king Nebuchadnezzar what shall be in the latter days" (*Daniel* ii. 28); "in laws divine, Deduced by reason, or to faith revealed" (*Wordsworth*); cf. *revealed* religion. But the term may also imply an imparting by a human being such as a seer or a poet whose vision penetrates into that which cannot be seen or understood by the ordinary man (as, "The artist, the man of genius, raises this veil and reveals Nature to us"—*H. Ellis*; "he must feel as a man what he reveals as a poet"—*Day Lewis*) or as a person in possession of a secret (as, "His mind...vibrating between the wish to reveal himself to her [as her father], and the policy of leaving well alone"—*Hardy*). In somewhat less strict, but nevertheless correct use, *reveal* may carry no suggestions of an intentional communication, but rather an affording of signs or other evidence from which the truth may be inferred; as, "The paradox of both distrusting and burdening government reveals the lack of a conscious philosophy of politics" (*Frankfurter*). **Discover** (as here compared: see also DISCOVER, 2; INVENT) implies an exposing to view by or as if by uncovering: the term usually suggests that the thing discovered has been hidden from sight or perception, and is not, as often in the case of *reveal*, in itself beyond the range of human vision or comprehension. "Go draw aside the curtains and discover The several caskets to this noble prince" (*Shak.*). "It is a test which we may apply to all figure-painters—a test which will often discover the secret of unsatisfactory design" (*Binyon*). **Disclose** is more often used in current English than *discover*, which seems slightly archaic in the sense in which it has here been considered; as, "The door opened and disclosed Gerald" (*Bennett*); "The stress of passion often discloses an aspect of the personality completely ignored till then by its closest intimates" (*Conrad*). More often, however, *disclose* implies the making known of something that has not been announced or has previously been kept secret; as, the court refused to disclose its decision before the proper time. "The confessions of St. Austin and Rousseau disclose the secrets of the human heart" (*Gibbon*). "The Bishop did not disclose his objective, and the Vicar asked no questions" (*Cather*). **Divulge** differs little from *disclose* in this latter sense except in often carrying a suggestion of impropriety or of a breach of confidence (as, "Horace...declares in sober sadness that he would not for all the world get into a boat with a man who had divulged the Eleusinian mysteries"—*Cowper*) or in implying more or less publicity (as, "Legally the execution of de Thou was justified, because he knew of the conspiracy and did not divulge it"—*Belloc*;

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

"it seemed to me an occasion to *divulge* my real ideas and hopes for the Commonwealth"—*L. P. Smith*). Tell (as here compared: see also *COUNT*, 1) may come very close to *divulge* in the sense of making known something which should be kept a secret (as, gentlemen never *tell*) but more often, it implies the giving of necessary or helpful information, especially on request or demand (as, to *tell* one's name or one's intentions; "Why didst thou not *tell* me that she was thy wife?"—*Genesis* xii. 18). *Betray* (as here compared: see also *DECEIVE*) often implies a divulging of a secret, but it carries either a stronger and more obvious suggestion of a breach of faith (as, "[he] had... written no letters that would *betray* the conspiracy he had entered into against Steve"—*S. Anderson*) or of a disclosure, as through signs or appearances, against one's will (as, "Only May Welland *betrayed*, by a heightened colour... a sense of the gravity of the situation"—*E. Wharton*; "Life moves on, through whatever deserts, and one must compose oneself to meet it, never *betraying* one's soul"—*R. Macaulay*). *Bewray*, an archaic term, carries a slighter implication of intentional secrecy than any of the other terms, but it does imply a making known that which was not known or not clearly recognized; as, "Write down thy mind, *bewray* thy meaning so" (*Shak.*); "thy speech *bewrayeth* thee" (*Matthew* xxvi. 73).

Ana. Impart, *communicate: *suggest, adumbrate, shadow: *declare, announce, publish.

Ant. Conceal.

revelation. *Revelation, vision, apocalypse, prophecy* are here compared in senses derived mainly from their Scriptural uses and employed not only by religious writers but also by poets, critics, and others. In this use they agree in meaning a (or the) disclosure by divine or preternatural means of something not apparent to the senses nor comprehensible by the unaided reason. **Revelation**, in this sense, is often specifically applied to the religious ideas transmitted by writers of books regarded as sacred, or divinely inspired, especially the Bible; by extension, therefore, it has come to mean a body of knowledge distinguishable from that attained by the normal human processes of observation, experiment, and reason; as, the truths of science and the truths of *revelation*. " 'Tis *revelation* satisfies all doubts, Explains all mysteries, except her own" (*Cowper*). "*Revelation* differs from natural knowledge, he [Spinoza] says, not by being more divine or more certain than natural knowledge, but by being conveyed in a different way" (*Arnold*). **Vision** implies, as *revelation* does not, a seeing of something not corporeally present; often, especially in mystical and poetic language, it suggests a profound intuition of something not comprehensible to the ordinary or unaided reason; commonly, therefore, it implies the operation of some agent, such as the Holy Spirit, or the gift (or accession) of some inexplicable power not attributable to all men, such as genius, poetic rapture, or the like. *Vision*, however, unlike *revelation*, does not necessarily imply that what is seen or realized is true, or of value to oneself or others. "And some had *visions*, as they stood on chairs, And sang of Jacob, and the golden stairs" (*V. Lindsay*). "Dante's... imagination... is visual in the sense that he lived in an age in which men still saw *visions*... We have nothing but dreams, and we have forgotten that seeing *visions*—a practice now relegated to the aberrant and uneducated—was once a more significant, interesting, and disciplined kind of dreaming" (*T. S. Eliot*). **Apocalypse** is, in its etymological sense, the equivalent of *revelation*; it is, in the Douay Version, the designation of the New Testament book called *Revelation* in the Authorized Version. It also specifically denotes a type of sacred book (of which the Book of Revelation is an ex-

ample) usually of unknown or pseudonymous authorship, which was common in Jewish and Christian literature in the centuries immediately preceding and following the birth of Christ and which presented a vision of the future in which the enemies of Israel or of Christianity would be defeated and God's justice and righteousness prevail. In its modern general application, *apocalypse* usually denotes a vision of the future, when all the mysteries of life shall be explained and good shall magnificently triumph over evil. The noun and, still more, its adjective **apocalyptic** (or **apocalyptical**) often carry one or more connotations as various as those of a spectacular splendor or magnitude suggestive of the Book of Revelation or, especially in present use, suggestive of wild and extravagant dreams of the visionary or passionate reformer; as, "the *apocalyptic* imagination of Michelangelo" (*N. Y. Times*). "Slowly as out of the heavens, with *apocalyptical* splendors... Sank the broad red sun" (*Longfellow*). "These problems [race problems], which the Austrian monarchy sought to solve by tolerance, do not concern the *apocalyptic* dreamer [Hitler]" (*D. Thompson*). **Prophecy** is now rarely found in its original meaning except in learned use and in some religious use. Its occasional and permissible connotation of the prediction of future events has been emphasized to such an extent that its historical and etymologically correct implications have almost been lost, with the result that the word in older writings is often misinterpreted. *Prophecy* in this strict sense implies a commission to speak for another, especially and commonly for God or a god. It therefore further implies that the prophet has been the recipient of divine communications or revelations, or that he has been granted a vision or visions. "And though I have the gift of *prophecy*, and understand all mysteries, and all knowledge... and have not charity, I am nothing" (*I Corinthians* xiii. 2). "The word of *prophecy*, those truths divine, Which make that heaven, if thou desire it, thine" (*Cowper*).

Ant. Adumbration.

revenant. *Apparition, phantasm, phantom, wraith, fetch, ghost, spirit, specter, shade, spook, haunt.

revenge, v. *Avenge.

Ana. Requite, recompense, repay (see *PAY, v.*): vindicate, defend, justify (see *MAINTAIN*).

revenge, n. Vengeance, *retaliation, retribution, reprisal.

Ana. *Reparation, redress, amends: requital, recompensing or recompense, repayment (see corresponding verbs at *PAY*).

revengeful. *Vindictive, vengeful.

Ana. Implacable, relentless, unrelenting, merciless.

*grim: inexorable, obdurate, adamant, *inflexible.

reverberate. Repercuss, *rebound, recoil, resile.

Ana. *Return, revert, recur.

revere. *Revere, reverence, venerate, worship, adore* agree in meaning to regard with profound respect and honor. All imply a recognition of the exalted character of that which is so respected and honored, but they differ mainly in regard to their objects and to the feelings and acts which they connote. Their differences in implication extend to their corresponding nouns, **reverence** (for both verbs *revere* and *reverence*), **veneration, worship, and adoration**. One *reverses* not only persons who are entitled to respect and honor but also things which are associated with such persons; the word commonly connotes tenderness of feeling and deference. "That makes her lov'd at home, *rever'd* abroad" (*Burns*). "Islands and cities which he *reversed* as the cradle of civilization" (*Buchan*). "Towards Johnson... his [Boswell's] feeling was not sycophancy, which is the lowest, but *reverence*, which is

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

the highest of human feelings" (*Carlyle*). One **reverences** things more often than persons, especially things, such as laws and customs, which have an intrinsic claim to respect or are commonly regarded as inviolable. "We *reverence* tradition, but we will not be fettered by it" (*Inge*). "Sincerity and simplicity! if I could only say how I *reverence* them" (*A. C. Benson*). One **reveres** persons as well as things that are regarded as holy, sacred, or sacrosanct because of character, associations, or age; as, to *revere* saints and heroes; to *revere* the relics of a saint. "For Socrates he [Gray] had an almost religious *veneration*" (*N. Nicholls*). In strictest use, one **worships** only a divine being, God, a god, or a thing deified, when one pays homage by word or ceremonial; as, churches are buildings in which God is *worshiped*; pagans *worship* idols, the sun, and the stars. In somewhat looser, but still correct, use, *worship* implies any kind of veneration that involves the offering of homage or the attribution of an especially exalted character, whether the object is a divine being or not. "There is a difference between admiring a poet and *worshipping* at a shrine" (*A. Repplier*). "In his calm, unexcited way, he *worships* success" (*R. Macaulay*). As here compared (see also **adore**, 2), one **adores**, as one *worships* (in the strictest sense), a divine being. *Worship*, however, usually suggests the group approach, and *adore* the personal approach, to deity. *Adore* therefore commonly implies love and the performance of individual acts of worship, such as obeisance, prostration, prayer, and the like. "And [the devil] said to him [Jesus]: All these will I give thee, if falling down thou wilt *adore* me" (*Matthew* iv. 9 [*D. V.*]). "Quiet as a Nun Breathless with *adoration*" (*Wordsworth*).

Ana. Esteem, respect, regard, admire (see under **REGARD**, *n.*): cherish, prize, value, treasure, *appreciate. **Ant.** Flout.

reverence, n. 1 *Honor, homage, deference, obeisance.

Ana. Piety, devotion, fealty, loyalty, *fidelity: esteem, respect, *regard, admiration.

2 Veneration, worship, adoration. See under **REVERE**.

Ana. Fervor, ardor, zeal, *passion: devoutness, piety, religiousness (see corresponding adjectives at **DEVOUT**).

3 **Reverence, awe, fear** come into comparison only when they denote the emotion inspired by something which arouses one's deep respect or veneration. **Reverence** distinctively implies a recognition of the sacredness or inviolability of the person or thing which stimulates the emotion; as, to have *reverence* for the law; "a profound *reverence* for and fidelity to the truth" (*Mencken*); "Richelieu's *reverence* for the throne was constant" (*Belloc*); "treating him almost with *reverence*" (*D. H. Lawrence*); "Like you, I feel a *reverence* for this place. Wherever humanity has made that hardest of all starts and lifted itself out of mere brutality, is a sacred spot" (*Cather*). **Awe**, in all of its shades of meaning, has for its fundamental implications a sense of being overwhelmed or overcome by a person's or thing's superiority or greatness and either an inability to speak in his (or its) presence or to come near to him (or it). Otherwise, it may suggest any one of several widely different reactions, such as adoration, profound reverence, wonder, terror, submissiveness, abashment, and the like; as, to be filled with *awe*; to stand in *awe* of one's teachers. "My heart standeth in *awe* of thy word" (*Psalms* cxix. 161). "Make me as the poorest vassal is That doth with *awe* and terror kneel to it [the crown as symbol of sovereignty]" (*Shak.*). "He is a great man of the city, without fear, but with the most abject *awe* of the aristocracy" (*T. S. Eliot*). **Fear** (for the more familiar sense see **FEAR**, 1)

occurs, in the sense here considered, chiefly in religious use; as, to put the *fear* of God in the hearts of men. In this sense, and as referred chiefly to the Supreme Being as its cause, it implies awed recognition of his power and majesty and, usually, reverence for his law. "And [those] walking in the *fear* of the Lord, and in the comfort of the Holy Ghost, were multiplied" (*Acts* ix. 31). "And calm with *fear* of God's divinity" (*Wordsworth*).

reverence, v. Venerate, worship, adore, *revere.

Ana. Love, enjoy (see **LIKE**): esteem, respect, regard, admire (see under **REGARD**, *n.*).

reverse, n. *Converse, obverse.

Ana. Back, rear, posterior (see corresponding adjectives at **POSTERIOR**): opposite, contrary (see under **OPPOSITE**, *adj.*).

reverse, v. **Reverse, transpose, invert** agree in meaning to change to the contrary or opposite side or position. **Reverse** is the most general of these terms, implying a change to the opposite not only in side or position but also in direction, order, sequence, relation, bearing; thus, to *reverse* a coin is to turn it upside down; to *reverse* a process is to follow the opposite order of sequence; to *reverse* a judgment is to change a previous judgment to another that is contrary to it; to *reverse* a policy is to change a policy so that it will have a contrary trend or induce a distinctly different result; to *reverse* a garment or part of a garment is to turn it inside out; to *reverse* the direction of a locomotive is to make it go backward instead of forward; so, "having his shield *reversed*" (*Scott*); "Half were put on a diet of unpolished rice; half on polished. The latter group came down with beriberi. Then the diets were *reversed*" (*V. Heiser*). **Transpose** implies a change in position, usually by reversing the order of two or more units such as letters or words, or by an exchange of position; as, the printer was instructed to *transpose* the letters *sr* in the word set up as *vesre*; if the term *b* in the equation $a + b = c$ is *transposed* (i.e., transferred to the other side of the equation) the result obtained is $a = c - b$. But *transpose* often, especially in grammar, anatomy, and the like, implies merely a change in the natural order or position; as, he frequently *transposes* words for the sake of effect; a *transposed* heart. **Invert** literally implies a change from one side to another chiefly by turning upside down but occasionally, especially in surgery, by turning inside out or outside in; as, to *invert* a tumbler; to *invert* a comma; to *invert* the uterus; the photograph of the pond showed the *inverted* images of the trees on its bank. In its secondary senses it approaches *reverse*, but applies within narrower limits; as, to *invert* the order of words in a sentence; to *invert* the relation of cause and effect; an *inverted* chord. "The custom... to *invert* now and then the order of the class, so as to make the highest and lowest boys change places" (*T. Moore*).

Ana. *Overturn, overset, upset, capsize.

reversion. 1 Return, recurrence, recrudescence. See under **RETURN**, *v.*

2 **Reversion, atavism, throwback** come into comparison as meaning return to an ancestral type or an instance of such return. The same distinctions in implications and connotations are evident in the adjectival forms **reversionary** (or **reversive**), **atavistic**. **Reversion** and **reversionary** (occasionally **reversive**) are the technical terms in the biological sciences for any mutation marked by the reappearance of an ancestral character or characters in an individual, or for the organism or the individual that manifests such a mutation. "We could not have told, whether these characters in our domestic breeds were *reversions* or only analogous variations" (*Darwin*). "Similar mutations are paired together [in the illustra-

tion]; divergent or *reversionary* individuals are eliminated" (J. A. Thomson). *Atavism* and *atavistic* are widely used both in general and in technical English. Their implication of reversion to a remote rather than to an immediate ancestral type is so strong that some biologists use them not as synonyms of *reversion* and *reversionary* but as far more specific terms implying the reappearance of remote, even primitive, characters after a long period of latency. Often, in general use, this connotation of primitiveness carries with it a suggestion of barbarism or degeneration. "Some mysterious *atavism*—some strange recurrence to a primitive past" (Bagehot). "Those who had made England what it was had done so by sticking where they were, regardless of their own *atavistic* instincts, which might have led them back to France or Denmark" (Van W. Brooks). *Throwback* is preferred to *reversion* or *atavism* by those who seek a picturesque or more colloquial word. It is, however, chiefly applied to the concrete instance, usually being avoided as an abstract term; as, the youngest son could not be explained except as a *throwback* to his pioneering ancestors.

Ana. Relapse, lapse, backsliding, recidivation, recidivism (see corresponding verbs at LAPSE).

reversionary, reversive. Atavistic (see under REVERSION).

revert. 1 *Return, recur, recrudescence.

Ana. *Recede, retreat, retrograde, back: *lapse, relapse, backslide, recidivate.

2 *Advert.

Ana. *Return, recur.

review, n. 1 *Criticism, critique, blurb, puff.

2 *Journal, periodical, magazine, organ, newspaper.

revile. Vituperate, rail, berate, rate, upbraid, *scold, tongue-lash, jaw, bawl out, wig.

Ana. Vilify, calumniate, *malign, traduce, defame, asperse, slander, libel: *execrate, objugate, curse.

Ant. Laud. — **Con.** *Praise, extol, eulogize, acclaim.

revise. *Correct, rectify, emend, remedy, redress, amend, reform.

Ana. *Improve, better, ameliorate: *change, alter, modify.

revivalist. *Missionary, evangelist, apostle.

revolt, n. Revolution, uprising, insurrection, *rebellion, mutiny, Putsch.

Ana. Insubordination, seditiousness or sedition, factiousness, contumaciousness or contumacy (see corresponding adjectives at INSUBORDINATE).

revolting. *Offensive, loathsome, repulsive, repugnant.

Ana. *Horrible, horrid, horrific: repellent, distasteful, obnoxious, abhorrent (see REPUGNANT): odious, *hateful, abominable.

revolution. *Rebellion, uprising, revolt, insurrection, mutiny, Putsch.

Ana. Overthrowing or overthrow, subverting or subversion, upsetting or upset, overturning or overturn (see corresponding verbs at OVERTURN): change, modification, alteration (see under CHANGE, v.).

revolve. 1 Weigh, excogitate, *consider, study, contemplate.

Ana. Reflect, deliberate, speculate, *think, reason, cogitate: *ponder, muse, meditate, ruminate.

2 *Turn, rotate, gyrate, circle, spin, whirl, twirl, wheel, eddy, swirl, pirouette.

Ana. *Swing, sway, oscillate, vibrate.

reward, n. *Premium, prize, award, meed, guerdon, bounty, bonus.

rhapsody. *Bombast, rant, fustian,rodomontade.

rhetorical. Rhetorical, grandiloquent, magniloquent,

aureate, flowery, euphuistic, bombastic are here compared in the sense of emphasizing style, often, but not invariably, at the expense of thought. *Rhetorical* describes any style, discourse, passage, phrase, or word which, however skillfully constructed or chosen and however effective, impresses the reader or hearer as not natural or effortless, but the result of conscious endeavor to produce an effect; as, the *rhetorical* style of Cicero; the *rhetorical* perorations of Daniel Webster. "Burke catches your eye by *rhetorical* inversions" (Quiller-Couch). *Grandiloquent* suggests "tall" talking or writing; it is applicable not only to what is spoken but also to what is written and catches an oratorical tone; it frequently implies a pomposity or an attempt at eloquence that not only is out of keeping with the subject but approaches absurdity; as, a *grandiloquent* tribute. "I find in Johnson's books... a measured *grandiloquence*, stepping or rather stalking along in a very solemn way" (Carlyle). *Magniloquent* is not always distinguishable from *grandiloquent*, but in discriminating usage it more often suggests boastfulness or extravagance than an overreaching eloquence; as, the *magniloquent* utterances of the drunken Falstaff. "In his public lectures and speeches, to which the students flocked, he [Everett] let his fancy soar... That he was *magniloquent* they did not know. That he was theatrical, they did not care" (Van W. Brooks). *Aureate*, which is itself a rhetorical term in favor in the early Renaissance and revived by some modern critics of literature, implies excessive embellishment of style by figures of speech, high-sounding words, and the like; in ordinary language and in reference to writings which have no pretensions to literature the same quality is described by *flowery*; as, the *aureate* prose of the Elizabethans; the *flowery* style of many young, ambitious writers. *Euphuistic* describes the highly rhetorical and aureate style of John Lyly (1554?–1606), author of *Euphues, the Anatomy of Wit* and *Euphues and his England*. In extended use, it more often suggests extreme artificiality and a straining after effects that distract attention from the thought, rather than the affectation of elegance and the excessive use of alliteration, antithesis, similes, and the like, that characterized Lyly's prose, and are implied in *euphuistic* when used in its strict historical sense; as, in *Love's Labour's Lost*, Shakespeare burlesqued many affectations of language in his own time, most of which are now loosely described as *euphuistic*. *Bombastic* (derived from *bombast*, which originally meant cotton wool, or raw cotton, a use of which is for padding) always implies inflation or grandiosity of style. It suggests verbosity and grandiloquence rather than a straining for rhetorical effects. "These lines of Milton's:—Up to a hill anon his steps he reared From whose high top to ken the prospect round... would be merely *bombastic* if the poet were starting to set forth how So-and-so climbed a hill for the view—just that, and nothing else" (Quiller-Couch).

Ana. Eloquent, articulate, *vocal, fluent, voluble, glib: florid, *ornate, flamboyant: *inflated, turgid, tumid, flatulent.

rhymester, rhymester or rimer, rimester. *Poet, versifier, poetaster, bard, minstrel, scop, gleeman, jongleur, troubadour, trouvère, minnesinger, scald.

rhythm, n. *Rhythm, meter (or metre), cadence*, as here compared, agree in meaning the more or less regular rise and fall (in intensity) of sounds that one associates chiefly with poetry and music. *Rhythm*, which of these three terms is the most inclusive and the widest in its range of application, always implies movement and flow as well as an agreeable succession of rising and falling sounds; it may or may not suggest regular alternation

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

of these sounds, but it fundamentally implies the recurrence at fairly regular intervals of the accented or prolonged syllable in poetry or of the heavy beat or the strongly accented note in music, so that no matter how many unaccented or unstressed syllables or notes lie between these, the continuing up and down movement is strongly apparent to the senses. Consequently, *rhythm* is used not only in reference to speech sounds and musical tones ordered with relation to stress and time, but also to dancing, games, natural phenomena, and the like, where a comparable pulsing movement is apparent, and even to the arts of design, where fluctuations in line or pattern suggest a pulsing movement. "The loveliness, like the wavering, lovely *rhythms* of the sea, of W. B. Yeats, took her, as it took her whole generation, by storm" (*R. Macaulay*). "Even the style of Thoreau was to be tinged faintly here and there with the *rhythms* [of Carlyle]" (*Van W. Brooks*). "Every one learned music, dancing, and song. Therefore it is natural for them to regard *rhythm* and grace in all the actions of life" (*H. Ellis*). *Meter* implies the reduction of rhythm to system and measure. Poetry that has meter (in general, this is true of all poetry except free verse) has a definite rhythmical pattern which determines the typical foot (sometimes the arrangement of feet) in each verse and either the number of feet in every verse or, if a stanzaic pattern is implied, in each verse of a stanza; as, the epics of Homer and Vergil are written in the *meter* called dactylic hexameter; the revolt against *meter* in poetry in the late nineteenth and early twentieth centuries; prose may have *rhythm* but not *meter*. In music, *meter* implies the division of the rhythm into measures, all of which are uniform in number of beats or time units, and each of which begins with the heavily accented tone. *Cadence* (etymologically, a falling) is the least clearly fixed in meaning of these words. The term has often been used as though it were equal to *rhythm*, or sometimes to *meter*, especially when the reference is to poetry; as, "golden *cadence* of poesy" (*Shak.*). "Wit will shine Through the harsh *cadence* of a rugged line" (*Dryden*). "Poetry can never again become a popular art until the poet gives himself wholly to 'the *cadence* of consenting feet'" (*H. Read*). In current English, however, the term is gradually being distinguished from *rhythm*, especially as the latter word increasingly stresses flow and movement not as heard but as felt, as associated with measured time and recurrent stress, and as stimulating a muscular response such as in dancing, in beating with one's hand, or in tapping with one's foot. *Cadence* now often stresses the rise and fall of sound or the rhythm as heard (now often in prose as well as in poetry), and as influenced by tone or modulation, choice of words, feeling, and the like; thus, one remembers the *cadence* (not *rhythm*) of a great Miltonic passage long after its phrasing is forgotten; the *rhythm* (not *cadence*) of Browning's "How They Brought the Good News from Ghent to Aix" sets the feet tapping; so, "the phrases and *cadences* of the Prayer Book [Book of Common Prayer]" (*H. Ellis*); "Great music like that of Prospero's speech in *The Tempest* or the *cadence* of Cleopatra's 'Give me my robe'" (*S. Alexander*). "I could hear the *cadence* of his voice and that was all, nothing but the measured rise and fall of syllables" (*J. P. Marquand*).

rib, *v.* *Banter, chaff, rally, quiz, kid, rag, guy, josh, jolly.

ribald. Obscene, gross, *coarse, vulgar.

Ana. *Offensive, loathsome: indecent, indelicate (see **INDECOROUS**): lewd, lascivious, wanton (see **LICENTIOUS**): scurrilous, opprobrious (see **ABUSIVE**).

ribbon. Fillet, band, *strip, stripe.

rich. Rich, wealthy, affluent, opulent come into com-

parison not only as applied to persons but also to things. The last three are close synonyms of *rich*, the general term, but they are far more explicit in their implications and more limited in their range of application. One is *rich* that possesses more than enough to gratify normal desires and needs. *Rich*, therefore, may describe anyone or anything above the normal (a variable quantity or standard) in possessions. When used of persons, without qualification, it implies the possession of money or of property, especially income-producing property; as, a *rich* citizen; a *rich* state. In its extended use, one may be *rich* in friends, or in gifts, or in interests; a soil may be *rich* in nitrogen; a poem may be *rich* in meaning, a career in promise, a flower in fragrance. That is *rich* also which is above the line dividing the cheap from the costly or precious, or dividing the stinted in elements or ingredients from the bountifully supplied, and the like; as, a *rich* fabric; a *rich* tone; a *rich* red; a *rich* soil; a *rich* cake. One is *wealthy* that possesses money, income-producing property, or intrinsically valuable things in great abundance. *Wealthy* is far rarer than *rich* in extended use, and, therefore, usually connotes material possessions. It also far more often than *rich* implies living conditions in keeping with one's income and a commanding position in the community, state, or world; as, power is in the hands of the *wealthy*; the *wealthy* nations of Europe. "She was indeed *rich*, according to the standards of the Square; nay, *wealthy*!" (*Bennett*). One is *affluent* that is prosperous and therefore continually increasing one's material possessions. *Affluent*, though often used to describe persons, groups, nations, etc., is more often applied to their circumstances or to their state; thus, a rich man is in *affluent* circumstances if his income is increasing or, at least, not decreasing; one is reduced from an *affluent* position, or *affluence*, but not from riches or wealth, for only *affluent* implies increase and therefore suggests decrease as its opposite; the days of a nation's *affluence* are over when its natural resources are used up. "Mrs. Manson Mingott had...lived in *affluence* for half a century; but memories of her early straits had made her excessively thrifty" (*E. Wharton*). One is *opulent* that is ostensibly and ostentatiously rich or wealthy; thus, a person in *affluent* circumstances may or may not maintain an *opulent* establishment, for *affluent* suggests the inflow of money and *opulent* lavish expenditure. Hence, *opulent* usually qualifies things that are luxurious, prodigal, expensively splendid, sumptuous, and the like; as, *opulent* decorations; *opulent* entertainment. "The almost bare simplicity of life in his grandfather's house...as compared with the *opulence* of his own home" (*Arch. Marshall*). When applied to persons, *opulent* usually qualifies a specific term which harmonizes with it in implications; as, *opulent* industrialists; an *opulent* aristocracy; the *opulent* Mr. Croesus. Occasionally, *opulent* does not connote display but inexhaustible richness; as, the *opulent* genius of Shakespeare.

Ant. Poor. — **Con.** Destitute, indigent, penurious (see corresponding nouns at **POVERTY**).

ricochet, *v.* *Skip, bound, hop, curvet, lope, lollap.

riddle, *v.* *Sift, sieve, screen, bolt, winnow.

riddle, *n.* Puzzle, conundrum, enigma, problem, *mystery.

ride, *v.* 1 **Ride**, **drive**, both as verbs (transitive and intransitive) and as nouns, are frequently confused, especially when they involve the idea of moving in a vehicle or conveyance or upon the back of something. The basic meaning of *ride* is a being borne along in or upon something: when this idea is uppermost, it makes little difference who or what controls the animal, the vehicle, or mechanism by which one is borne along; thus,

one *rides* a horse, a bicycle, or a motorcycle when, mounted upon it, one controls its operation or movements; a woman seated on a pillion behind the man's saddle may also be said to *ride* the horse, and a person in the rear seat of a tandem bicycle may be said to *ride* the bicycle, but a person in a sidecar of a motorcycle *rides* in the sidecar (not *rides* the motorcycle). Some, however, prefer *ride*, the transitive verb, when the management of the horse and vehicle is also implied, and *ride*, the intransitive verb, when merely the being mounted upon a moving horse or vehicle is suggested; as, when he *rides* his horse his small daughter usually *rides* on it with him. In the case of the noun *ride*, when there is no expressed or implied opposition to *drive*, the term implies the act or fact of being borne along, usually upon the back of a horse, but sometimes upon the seat of a cycle; as, I think I'll take a *ride* for exercise; he is out for a *ride*. The basic meaning of *drive* (see MOVE, 1) is a causing to move in a given direction: the term therefore primarily refers to the action of an agent that controls either the movements of the horse or other beast of burden or the operation of the mechanism which supplies the power whereby a vehicle, conveyance, or the like, is moved; as, only the coachman *drives* the Victoria; the chauffeur *drives* their car at high speed when Mrs. B—is not in the car; to *drive* a locomotive; they haven't an automobile because there is no one in the family who wants to *drive*. In the case of the noun *drive*, when there is no expressed or implied opposition to *ride*, the term usually implies the act or fact of guiding or controlling the operation of a vehicle; as, he asked her to accompany him on a short *drive*; take as many *drives* in the small sleigh as you wish.

Current good use tends to bring about further distinctions between *ride* and *drive*, sometimes as verbs, but more often as nouns, when movement in a vehicle or conveyance of any sort is implied. *Ride* usually suggests movement in a vehicle which is not in any sense under one's control, such as a train, a bus, a trolley car, or a stranger's automobile; as, it is a long *ride* from New York to Chicago; he said he preferred *riding* in a bus to *riding* in a train; will you give me a *ride* to the next town? *Drive* now often suggests movement in a horse-drawn or motor vehicle the course of which is in some way or in some degree under one's control, whether one is the actual driver or an employer, patron, guest, etc., whose wishes the actual driver observes; as, to take a *drive* along the shore of the lake; we are going for a short *drive*; we'll *drive* to the station in a taxi. In these senses, it will be seen, *ride* still stresses a being borne along and *drive* a causing to move in a given direction. But *ride* is less common in British than in American use when applied to movement in a vehicle or conveyance.

2 *Bait, badger, heckle, hector, chevy, hound.

Ana. *Worry, annoy, harass, harry: persecute, oppress (see WRONG, v.): torment, torture (see AFFLICT).

ride, n. Drive (see under RIDE, v.).

Ana. *Journey, tour, trip, excursion, expedition.

ridicule, v. Ridicule, deride, mock, taunt, twit, rally agree in meaning to make a person or thing the object of one's own or another's laughter. **Ridicule** may or may not involve unkindness or malice, but it usually implies the belittling of the person or persons affected; as, the critics *ridiculed* his play; "the old State religion which Augustine attacks, *ridiculing* the innumerable Roman godlings whose names he perhaps found in Varro" (Inge). **Deride** implies a bitter or contemptuous spirit. "All fools have still an itching to *deride*, And fain would be upon the laughing side" (Pope). "He took his revenge on the fate that had made him sad by fiercely *deriding* every-

thing" (A. Huxley). "There is no temptation so strong for the aesthetic nature, as to *deride*... the art that we have just outgrown" (A. C. Benson). **Mock** stresses scornful derision and, usually, implies words or gestures expressive of one's defiance or contempt. "There came forth little children out of the city, and *mocked* him [Elisha], and said unto him, Go up, thou bald head; go up, thou bald head" (2 Kings ii. 23). When used in reference to things, *mock* often implies a setting at naught that suggests scorn or derision. "A perishing That *mocks* the gladness of the Spring!" (Wordsworth). "An impenetrable mystery that *mocked* investigation" (G. Eliot). **Taunt** implies both mockery and reproach; it often connotes jeering insults. "Some words arose between us. At last he *taunted* me beyond endurance, and offered me—characteristically—twenty pounds to strike him" (Shaw). **Twit** implies taunting and a casting something up to someone. "I was *twitted*... unmercifully with my mealy complexion" (Symonds). "The upper classes... are not vulgar, in spite of the absence of ideas with which Matthew Arnold *twits* them" (Inge). **Rally** stresses raillery, or good-humored ridicule or banter; nevertheless, it often implies an approach to taunting. "Honeycomb... *rallies* me upon a country life" (Addison). "They *rally'd* next Vanessa's dress" (Swift).

Ana. *Scoff, flout, jeer, gibe: caricature, burlesque, travesty (see under CARICATURE, n.).

ridiculous. *Laughable, ludicrous, droll, funny, comic, comical, farcical, risible.

Ana. Absurd, preposterous, *foolish, silly: amusing, diverting, entertaining (see AMUSE): *fantastic, grotesque, bizarre, antic.

rife. *Prevailing, prevalent, current.

Ana. Abundant, *plentiful, copious, ample: *common, ordinary, familiar.

rifle, v. Plunder, *rob, loot, thief, burglarize.

Ana. Despoil, spoliage, *ravage, pillage, sack, devastate: *steal, pilfer, purloin, filch.

right, adj. 1 *Good.

Ant. Wrong.

2 *Correct, accurate, exact, precise, nice.

Ana. Fitting, proper, meet (see FIT): *decorous, decent, seemly, comme il faut: true, *real, actual.

Ant. Wrong.

right, n. **Right, prerogative, privilege, perquisite, appanage, birthright** come into comparison when they mean something to which a person has a just or legal claim. They differ, however, in their implications both of the nature of the thing claimed and of the grounds of the claim. **Right** is by far the most inclusive term, for it may be used to designate anything such as a power, a condition of existence, or a possession, to which one is entitled by nature or by the principles of morality, or by grant, as by the laws of the land, or by purchase; as, the *right* to life, liberty, and the pursuit of happiness; *rights* in a patent. "We do not lose our *right* to condemn either measures or men because the country is at war" (Justice Holmes). "Every person has a *right* to a certain amount of room in the world, and should not be made to feel wickied in standing up for what is due to him" (B. Russell). A **prerogative** is a right which belongs to a person (actual or legal) by virtue of being what one is, as in sex, rank, office, character, or the like, and which thereby gives him precedence, superiority, or an advantage over others. "The fundamental fact is that eminent domain is a *prerogative* of the State" (Justice Holmes). "To dread no eye, and to suspect no tongue, is the greatest *prerogative* of innocence" (Johnson). "Man, whose *prerogative* it is to be in a great degree a creature of his own making" (Burke). A **privilege** is a peculiar right,

either granted to one as a favor or concession, or belonging to one as a prerogative; *privilege* often but not invariably implies an advantage over others; as, only passengers with Pullman tickets have the *privilege* of using the club car; it is the *privilege* of a few public officials to collect a fee for their services. "Equal *rights* for all, special *privileges* for none" (*Jefferson*). "What men prize most is a *privilege*, even if it be that of chief mourner at a funeral" (*J. R. Lowell*). A *perquisite* is something, usually money or a thing of monetary value, to which one is entitled, especially by custom, as an addition to one's regular revenue, salary, wages, or the like; thus, a registrar of deeds often receives a small salary and the *perquisites* of his office, as the fees received for search of titles, recording transfers of property, and the like; a domestic servant often regards her mistress's cast-off clothing, shoes, and hats as her *perquisite*. "The pillage of a place taken by storm was regarded as the *perquisite* of the soldier" (*Prescott*). *Appanage* is often loosely used as if it meant merely an adjunct or appurtenance. Historically, the word designates the provision made for the support of a younger son of a great family, as by a grant of land or of money, a lucrative office, or the like; since the same territory or office was granted to a younger son in each succeeding generation, it was thought of as belonging to the family and the perquisite of a member of it; by extension, therefore, *appanage* came to denote anything to which one has a claim through custom, through tradition, or through natural necessity, as an adjunct or appurtenance. "Only from that year [1584] was it [the See of Luçon] regarded as an *appanage* of the House of Richelieu" (*Belloc*). "The religious supremacy became a kind of *appanage* to the civil sovereignty" (*Milman*). "Beauty, which is the natural *appanage* of happiness" (*Palmore*). *Birthright*, originally applied to the property or possessions which belong to one by right of inheritance (see *HERITAGE*) is now far more extended in its application. It differs from *right* only in being restricted to a right to which one is entitled by some reason connected with one's nativity, as by being a man, a native-born citizen, a descendant of a particular line, or the like. "We sell our *birthright* whenever we sell our liberty for any price of gold or honor" (*E. P. Whipple*).

Ana. *Claim, title: *freedom, license, liberty.

right away. Straightway, *directly, immediately, instantly, instantaneously, forthwith, at once, anon.

righteous. Virtuous, noble, *moral, ethical.

Ana. *Upright, honest, just, honorable.

Ant. Iniquitous. — **Con.** *Vicious, nefarious, flagitious, corrupt; profligate, dissolute, reprobate, *abandoned.

rightful. *Due, condign.

Ana. *Fair, equitable, just, impartial: *lawful, legal, legitimate.

rigid. 1 *Stiff, inflexible, tense, stark, wooden.

Ana. *Firm, hard, solid: compact, *close: tough, tenacious, *strong.

Ant. Elastic. — **Con.** Resilient, flexible, supple, springy (see *ELASTIC*).

2 **Rigid, rigorous, strict, stringent** are often used interchangeably in the sense of extremely severe and stern, especially when applied to laws or imposed conditions or to the persons who enforce them. There are, however, differences in implications and in range of application which give to each adjective its precise shade of meaning. Literally, *rigid* and *rigorous* imply extreme stiffness or utter lack of elasticity or flexibility, *strict* and *stringent* imply tightness so extreme as to permit no looseness, laxity, or latitude. These implications are preserved even in their figurative senses, which are now more common, the literal senses being, in the case of all the words except

rigid (see also *STIFF*), now very seldom used. In its literal sense *rigid* implies great, often extreme, resistance to forces that would deform; as, a *rigid* bar; a *rigid* framework. In its figurative senses, in which it is applied less often to persons than to their acts or to the conditions the persons make for themselves or others, it usually suggests uncompromising inflexibility; as, *rigid* laws; *rigid* discipline; "[a] *rigid* Churchman" (*Quiller-Couch*); a *rigid* definition of "morality"; "A *rigid* system, faithfully administered, would be better than a slatternly compromise" (*A. C. Benson*). **Rigorous** is applied to persons, to their acts, to their way of life, and to the natural or artificial conditions under which they live. It commonly implies imposed severities or hardships or the conscientious acceptance of them; thus, a *rigid* rule admits of no change or compromise; a *rigorous* rule imposes exacting or harsh conditions; a *rigorous* enforcement of a law makes the people feel its rigors; a *rigid* enforcement of a law admits of no relaxations in anyone's favor; we can speak of a *rigorous* (not *rigid*) winter; a *rigorous* (usually better than *rigid*) disciplinarian; the *rigorous* (not *rigid*) life of an explorer or a monk. **Strict** is applied chiefly to persons or their acts and denotes showing or demanding undeviating conformity to rules, standards, conditions, or requirements; thus, a *strict* rule or a *strict* teacher demands obedience; a *strict* watch admits no relaxing of vigilance, and *strict* silence no freedom to speak; a *strict* construction of a law is one confined to the letter of that law; so, "the *strictest* obligations of intellectual honesty" (*Inge*); "*Strict* justice, either on earth or in heaven, was the last thing that society cared to face" (*H. Adams*). **Stringent** is to *strict* as *rigorous* is to *rigid*, in that it usually emphasizes the effect or effects rather than the presence of a quality in an agent or his act. Both *stringent* and *rigorous* connote imposition, but the former suggests impositions that limit, curb, or sometimes coerce; thus, a *stringent* rule narrows one's freedom or range of activities; a *stringent* interpretation of the constitution may either be narrower or more restrictive in its effects than the letter of the constitution warrants; poverty may be described as *stringent* when it narrows one's opportunities to satisfy one's aspirations; necessity may be called *stringent* when it forces one to live within bounds or forces one into certain distasteful acts; so, "he endeavours by the most *stringent* regulations to prevent the growth of inequalities of wealth" (*G. L. Dickinson*); "Not until... Rockefeller Foundation aid [was] eagerly sought everywhere... were we able to lay down more and more *stringent* conditions" (*V. Heiser*). **Ana.** *Inflexible, inexorable, obdurate, adamant, adamantine: stern, *severe, austere.

Ant. Lax.

rigor or rigour. *Difficulty, hardship, vicissitude.

Ana. Austerity, severity, sternness (see corresponding adjectives at *SEVERE*): harshness, roughness (see corresponding adjectives at *ROUGH*): *trial, tribulation, visitation, affliction.

Ant. Amenity.

rigorous. *Rigid, strict, stringent.

Ana. *Stiff, rigid, inflexible: stern, austere, ascetic, *severe: exacting, *onerous, burdensome, oppressive.

Con. *Easy, facile, light, smooth, effortless.

ring, v. Variant of *ROLL*.

riled, riley. Variants of *ROILED, ROILY*.

rim. Brim, brink, *border, margin, verge, edge.

rimer or rimester. Variants of *RHYMER, RHYMESTER*.

rind. *Skin, bark, peel, hide, pelt, fell.

ring, n. 1 *Combination, combine, party, bloc, faction, cabal, junto.

2 *Arena, circus, lists, cockpit, court, field, gridiron, diamond, rink.

rip, *v.* *Tear, rend, split, cleave, rive.

ripa. *Shore, coast, beach, strand, bank, littoral, foreshore.

ripe. *Mature, matured, mellow, adult, grown-up, full-fledged.

Ana. *Seasonable, timely, well-timed: *consummate, finished, accomplished.

Ant. Green: unripe. — **Con.** Raw, *rude, crude, callow: *immature, unmaturing, unmellow.

ripen. *Mature, develop, age.

Ana. *Improve, better: enhance, heighten, *intensify: season, inure (see HARDEN).

ripple, *n.* *Wave, undulation, billow, roller, breaker, comber, beachcomber, surge.

rise, *v.* 1 *Spring, arise, originate, derive, flow, issue, emanate, proceed, stem.

Ana. *Appear, emerge, loom.

Ant. Abate (sense 3). — **Con.** Ebb, subside, wane (see ABATE).

2 Rise, arise, ascend, mount, soar, tower, rocket, levitate, surge, as here compared, agree in meaning to move or come up from a lower to a higher level. **Rise** is the comprehensive term interchangeable with all the others, but often at a sacrifice of explicitness or picturesqueness. **Rise** is idiomatic, and therefore the preferred word, when used: (1) in reference to persons, sometimes animals, that erect themselves from a recumbent position, as in bed or after a fall, or from a sitting or kneeling position (as, to *rise* every morning at six; the injured horse was unable to *rise*; the audience *rose* when the national anthem was sung); (2) in reference to certain things that give the impression of coming up into view (as, the sun *ris*es at 5:30; the moon will *rise* at eight o'clock) or an object that seems to lift itself up (as, the hills *rise* in the distance); (3) in reference to water or other fluid under the influence of some natural force that sends it upward (as, the river *ris*es regularly each spring; the mercury is *ris*ing) or to any natural phenomenon indicated by such rising of water or other fluid (as, the tide *ris*es early tonight; the temperature is *ris*ing). The word may be used far more widely than these instances indicate, but in these and in closely related figurative applications, *rise* is specifically necessary. "For the first two weeks, or three... the work *rose* about him like a tide" (*M. Austin*). "Now he felt his mother counting the week's money, and her wrath *ris*ing" (*D. H. Lawrence*). **Arise** (see also **SPRING**) is not only far narrower in its range of application than *rise*, but it is also generally felt to be rhetorical or poetic. It is still far from uncommon in spoken English in the senses of to get up in the morning after a night's sleep or to rise from the grave, but such usage (especially the former) is regarded as poetic, formal, or archaic. "**Arise, arise**; Awake the snorting citizens with the bell" (*Shak.*). "The temple rends, the rocks burst, the dead *arise*" (*Steele*). **Ascend** and **mount** (for transitive use of both words see **ASCEND**, 2) carry a much stronger suggestion of continuous or progressive upward movement and of climbing than *rise* and may therefore be used in distinction from the latter word; thus, the sun *ris*es at dawn, but it *ascends* from dawn to noon; smoke *ris*es from a fire and *ascends* to the tree tops; a lark *ris*es from the ground and *mounts* to the skies; a scientist's hopes *rise* at the first indication of his success and *mount* as one experiment after another turns out as expected. "The third day he *rose* again from the dead, He *ascended* into heaven" (Apostles' Creed, *Bk. of Com. Prayer*). **Soar** always, even in its figurative use, suggests the straight upward flight

of a bird, especially of one that mounts without flapping of wings; it therefore usually connotes continuous, often swift, ascent into high altitudes, especially into very high altitudes (intellectually, spiritually, aesthetically, or the like). "[The skylark] singing still dost *soar*, and *soaring* ever singest" (*Shelley*). "What would this man? Now upward will he *soar*, And little less than Angel, would be more" (*Pope*). "The *soaring* melody of the rondo in the Waldstein sonata is Beethoven's... transfiguration of the air of a ribald folk-song" (*Lowes*). **Tower** is used more often in reference to things that attain conspicuous height through growth, building up, or the like, than in reference to things that actually move upward; it also frequently connotes extension to a height beyond that of comparable neighboring objects, such as buildings, trees, mountains or, when eminence is suggested, persons; as, the Empire State Building *towers* above all the New York City skyscrapers; Shakespeare *towers* above all the dramatists of his time. "Full thirty foot she *towered* from waterline to rail" (*Kipling*). When the word does imply movement upward, it usually evokes a picture of something shooting up so as to suggest a tower or steeple. "The nimble flames *towered*, nodded, and swooped through the surrounding air" (*Hardy*). **Rocket** suggests the inordinately swift ascent of a projectile, or especially, of the firework of that name; hence, it is used chiefly with reference to things that rise with incredible or extraordinary rapidity, as under the impetus of events; as, with the first hint of a shortage, wheat prices *rocketed* on the market. **Levitate** (opposed to *gravitate*) implies a force that causes a thing to rise through its actual or induced lightness or buoyancy; in general use, the word may be, but seldom is, used of the rising of balloons, kites, and the like; it is associated chiefly with spiritualistic practices (as, the *levitation* of a table at a séance) and with illusory risings of a person or thing. "It is asserted that a man or a woman '*levitated*' to the ceiling, floated about there, and finally sailed out by the window" (*T. Huxley*). **Surge** suggests heaving or spurring upward, as of waves. It is often used with *up* in reference to emotions and thoughts that rise powerfully from the depths of subconsciousness. "All the enthusiasm of old *surged* up to answer this appeal" (*Mrs. Oliphant*). "Things half-guessed, obscurely felt, *surged* up from unsuspected depths in her" (*E. Wharton*). Quite as often, especially with *forward*, it also suggests a rolling movement comparable to that of oncoming waves; as, the troops *surged* forward.

Ana. Climb, *ascend, mount, scale: *increase, enlarge, augment: *lift, raise, elevate.

Ant. Decline: set (as the sun).

risible. Droll, funny, *laughable, ludicrous, ridiculous, comic, comical, farcical.

Ana. Amusing, diverting, entertaining (see **AMUSE**).

risk, *n.* Hazard, *danger, peril, jeopardy.

Ana. *Chance, fortune, luck, accident: exposedness or exposure, lability or liability, openness (see corresponding adjectives at **LIABLE**).

Con. Safety, security (see corresponding adjectives at **SAFE**): *exemption, immunity.

risky. Precarious, hazardous, *dangerous, perilous, jeopardous.

Ana. *Adventurous, venturesome, chancy, *random, haphazard, hit-or-miss, happy-go-lucky.

rite. Ritual, liturgy, ceremonial, ceremony, *form, formality.

ritual. Rite, liturgy, ceremonial, ceremony, *form, formality.

rival, *v.* 1 **Rival**, compete with, vie with, emulate, as here compared, agree in meaning to strive to equal or

surpass another person or his achievements. **Rival** (see also **MATCH**) now occurs with increasing rareness with reference to the act of a person or persons; it is, however, still preferred when a struggle to win the hand of a particular woman in marriage is implied; as, to *rival* another in love. The term also may be used when an attempt to outdo each other is suggested; as, "a work... which contending sects have *rivalled* each other in approving" (*Heber*). **Compete with** implies a struggle for the same object, the same position or standing, the same reward, or the like; it may or may not connote a desire to master one's opponents or get the better of them; as, the grocer found that in his new location he must *compete with* two businesses already well established; the track teams of the city high schools will *compete with* each other for the cup next Friday; the child was not strong enough physically or mentally to *compete with* other children of his age. **Vie with** carries less suggestion of arduous struggle to hold one's own or to excel than *compete with*; it sometimes suggests the excitement of contest that is a game rather than a combat; as, the men *vied with* one another in paying her attention; the boys *vied with* each other in showing off. "When they died, and their wills became public, it was found that they had *vied with* one another in enriching her" (*Shaw*). Both *compete with* and *vie with* are sometimes shortened into the intransitive verbs *compete* and *vie* when the *with* phrase is clearly understood; as, to *compete* for a trophy; to *vie* for a prize. **Emulate** implies a conscious effort to equal or surpass someone or something by imitation or by using him or it as a model; as, "a simplicity [that of George Herbert's poetry] *emulated* without success by numerous modern poets" (*T. S. Eliot*). "Her companions she loved and admired, but could not *emulate*, for they were wise about things she knew not of" (*R. Macaulay*). "Modern water-colour... when it tries... to *emulate* the force and solidity of oil-painting, only succeeds in sacrificing its own special felicities" (*Binyon*).

Ana. Strive, struggle, try, *attempt: cope, *contend, fight.

2 *Match, equal, approach, touch.

rive, v. Cleave, split, rend, *tear, rip.

Ana. Sever, sunder, divide, *separate: *cut, hew, chop.

rirel. *Wither, shrivel, wizen.

rivet, v. *Secure, anchor, moor.

Ana. *Fasten, attach, affix, fix: *join, unite, connect, link.

road. Road, roadway, highway, highroad, street, avenue, boulevard, terrace, drive, parkway, thoroughfare, byway, lane, alley, alleyway, as here compared, denote in common a paved or unpaved way over which vehicles, persons, or animals may pass from one point to another. A *road* is a way, generally outside an urban district and primarily for vehicles and horses, between one place and another. A *roadway* is that part of a road over which traffic travels, as distinct from curbs, shoulders, sidewalks, and the like. A *highway* is a main, often much-traveled, road. **Highroad** stresses the idea of freedom from whatever tends to reduce the speed of traffic, as windings, narrowness, ruts, steep grades, etc. A *street*, originally a paved way, is a public way in a city, town, or village, commonly with a footwalk at one or both sides for pedestrians. An *avenue* is a broad street, often planted with trees; the word suggests a certain degree of stateliness, but is often loosely applied. A *boulevard* is a broad avenue decoratively laid out with trees, belts of turf, and often flowers. In the United States the word is frequently used for a principal street on which traffic is so heavy that traffic from a side street may not enter without first coming to a stop. A *terrace*, as here com-

pared, is a street having houses situated along the side or top of rising ground, above the level of the roadway, or a street with a raised belt of turf, planted with trees, shrubs, flowers, etc., running down the middle. A *drive* is either a private vehicle road leading to a residence, or a public street or road, primarily or only for pleasure vehicles, that is a scenic attraction in itself or that affords a prospect of scenery. A *parkway* is a street or road having enough turf, trees, flowers, etc., along the sides or down the middle, or both, to constitute a park. A *thoroughfare* is a public road, street, or avenue open at both ends, and usually heavily traveled. A *byway* is an obscure or unfrequented side road. A *lane* is a narrow unpaved passage or byway, especially between hedges, fences, or walls. An *alley* is a narrow passageway between buildings in a town or city, as distinguished from a public street; in many American cities it is a passageway for vehicles, providing access to the rear of buildings or lots. **Alleyway** places more emphasis than *alley* on high enclosing walls.

roadway. *Road, street, highway, highroad, avenue, boulevard, terrace, drive, parkway, thoroughfare, byway, lane, alley, alleyway.

roam. *Wander, stray, ramble, rove, range, prowl, gad, gallivant, traipse, meander.

roast, v. *Bake, broil, grill, barbecue.

rob, v. **Rob, plunder, rifle, loot, thief, burglarize** come into comparison as meaning to despoil a person of possessions or a place of valuables. In strict legal use, **rob** implies the taking of personal property or valuables from another or from a place in a felonious manner, as by the exercise of violence, by the arousing of fear, or by trickery or fraud; as, to *rob* a bank; to *rob* a man of his savings by selling him worthless securities; to *rob* the poor box of a church. In extended use, *rob* implies deprivation by unjust means or by powers beyond one's control; as, to *rob* a person of his good name; the high winds *robbed* the trees of their fruit; a tree *robs* the adjacent soil of moisture and fertility. **Plunder** implies a despoliation by force, as by armies in war, organized gangs, bandits, or the like: it often suggests robbery on an extensive scale or a ravaging or pillaging of a territory; as, travelers through the remote sections of the country were in constant danger of being *plundered*; to *plunder* the warehouses; "*plundering* wrecked ships... was a well-established business in many places on our shores" (*Shaw*). **Rifle**, like *plunder*, usually implies a despoliation of possessions or valuables, but it distinctively stresses a ransacking and therefore usually takes as its object a place, building, treasury, receptacle, or the like: consequently, it may be used in place of *plunder* when the latter idea is to be clearly implied (as, to *rifle* [or *plunder*] a warehouse; to *rifle* a palace; to *rifle* a man's pockets). But the word may also be used when ransacking for the sake of finding something, such as stolen goods or evidence against a person, is the chief implication. "You cannot accuse a man on the Government House List of stealing. And if you *rifle* his room, you are a thief yourself" (*Kipling*). **Loot** differs from *plunder* chiefly in its suggestion of circumstances which explain the despoliation or make it exceedingly reprehensible: it sometimes implies defiance of all laws governing civilized man (as, to *loot* the bodies of those killed in a train wreck; to *loot* the ruins of a bombed building), or desperation as a motive (as, "if we left them to starve they would begin by breaking our windows and end by *looting* our shops and burning our houses"—*Shaw*), but it quite commonly refers to the pillaging of a captured place (as, soldiers *looted* the town after it was captured). **Loot** also is used when venality and graft, rather than acts of violence, are

implied; as, a group of officials who *looted* the state treasury. **Thieve** implies a taking of possessions or valuables by stealth: unlike the other terms of this group, the word is used chiefly, but not exclusively, as an intransitive verb, often implying habitual stealing of goods from persons or places; as, he lives by *thieving*; "When a thief *thieves* from a thief, God laughs" (*West Indian Negro Proverb*); "I never did such a thing as *thieve*" (*Dickens*). **Burglarize** implies an act of burglary, or a breaking and entering by night in order to steal; usually, however, it carries, as *burglary* in law does not necessarily carry, an implication that one's purpose has been accomplished; as, the house was *burglarized* while its occupants were asleep.

Ana. *Steal, pilfer, purloin, filch, lift: defraud, swindle, *cheat: despoil, pillage, sack, *ravage: embezzle, *defalcate, peculate.

robber. Larcener, thief, burglar. See under **THEFT**.

robbery. Larceny, *theft, burglary.

robe, v. *Clothe, attire, tire, dress, apparel, array, vest, invest.

robust. *Healthy, sound, wholesome, hale, well.

Ana. *Strong, sturdy, stout, stalwart: athletic, husky, *muscular, sinewy: *vigorous, energetic, lusty.

Ant. Frail, feeble.

rock, v. *Shake, agitate, convulse.

Ana. *Swing, sway, undulate, oscillate: totter, quake, tremble (see **SHAKE**).

rocket, v. *Rise, arise, ascend, mount, soar, tower, levitate, surge.

rococo, adj. *Ornate, baroque, flamboyant, florid.

rodomontade. *Bombast, rhapsody, rant, fustian.

Ana. Boasting, bragging, vaunting (see **BOAST, v.**): vain-glory, vanity, *pride: magniloquence, grandiloquence (see corresponding adjectives at **RHETORICAL**).

roguish. *Playful, frolicsome, sportive, waggish, impish, mischievous, wanton.

roil or rile. Provoke, aggravate, nettle, *irritate, exasperate, peeve.

Ana. *Anger, incense, enrage, infuriate, madden: vex, *annoy, irk, bother.

roiled or riled, roily or riley. *Turbid, muddy.

roll, n. *List, table, catalogue, schedule, register, roster, rota, canon, inventory.

roller. *Wave, undulation, billow, breaker, comber, beachcomber, surge, ripple.

rollick, v. Frolic, disport, sport, *play, romp, gambol.

rollick, n. Frolic, disport, sport, play, romp, gambol. See under **PLAY, v.**

romance, n. *Novel.

romantic, adj. *Sentimental, mawkish, maudlin, soppy, mushy, slushy.

Ana. Fanciful, *imaginary, quixotic, fantastic, visionary: invented, created (see **INVENT**): picturesque, pictorial, vivid, *graphic.

romp, v. Frolic, rollick, gambol, disport, sport, *play.

romp, n. Frolic, rollick, gambol, disport, sport, play. See under **PLAY, v.**

room, n. 1 **Room, chamber, apartment** are here compared as used of space in a building, enclosed or set apart by a partition. **Room** is the word in ordinary use. **Chamber** is chiefly elevated or poetical; it is commonly used of a private room, especially of a bedroom on an upper floor. "High in her *chamber* up a tower to the east" (*Tennyson*). "He . . . hardly ever slept two nights successively in one *chamber*" (*Southey*). **Apartment** is now rare in the sense of a single room. "Her morning-room was an airy *apartment* on the first-floor" (*M. E. Braddon*). 2 In plural form **rooms, lodgings, chambers,**

quarters, diggings, digs, apartment, flat, tenement denote in common one or more rooms used as a separate residence in a building in which there are other dwellers. A **room** or **rooms** are engaged in a private house or in a dormitory or hotel, usually by a single person; commonly, certain facilities (as the bathroom) are shared; and there is no provision, or very limited provision, for housekeeping. **Lodgings** are a room or rooms rented in a private house. The term is not much used colloquially in the United States. **Chambers** (chiefly British) are rooms for single persons living alone, either in a private house or in a building containing only such rooms. The term is little used in the United States. **Quarters** are usually an assigned place of residence occupied for a precarious term, especially by soldiers, as in a house or in barracks. With a qualifying word, *quarters* may characterize, or appraise the accommodations of, any place of residence; as, bachelor *quarters*; cramped or spacious *quarters*. **Diggings** is colloquial, **digs** slang (both especially British), for any of the preceding terms. An **apartment**, in the United States and Canada, is usually a suite of rooms having complete facilities for private living and housekeeping, in a building composed exclusively of similar suites. Less often the term is applied to a single room, with bath, and without kitchen, especially in the so-called apartment hotels. In England the singular form *apartment* is now rarely used; the plural form *apartments* is a colloquial and somewhat pretentious term for a set of rooms in a private house, hired for short-term occupancy. "The curate's lodgings—*apartments* his landlady would call them" (*M. R. Milford*). A **flat** is an apartment occupying the whole or a part of one floor, as distinguished, for instance, from the so-called duplex apartment, which has rooms on two floors. Since, however, the rooms of an apartment are commonly all on one floor, this distinction does not often come into play; and in England *flat* is the term in general use for what in the United States is usually called an apartment. In the United States, *flat* is sometimes used as in England, and thus is applied interchangeably with *apartment* to a suite, of any size, the rooms of which are all on one floor; however, it is perhaps more often applied to a suite of rooms, usually with private entrance from the outside, occupying the whole of one floor, or half of one floor and separated from the other suite on the same floor by a corridor, in a building smaller than the largest of apartment houses, and often of less substantial construction and with less elegant appointments. **Tenement** in the United States usually suggests an inferior apartment or flat, especially a crowded one in the slums. But sometimes the word is so devoid of derogatory connotation that one sees in the windows of buildings containing vacant apartments or flats signs reading "Tenement to Let." In England the word is not derogatory, and differs from *flat* in being applicable to a suite on more than one floor, and from *apartments* in implying more permanent tenure. *Tenement* is often also used for *tenement house*.

roost, v. Perch, *alight, light, land.

root, v. *Applaud, cheer, hurrah, huzza.

root, n. *Origin, source, inception, provenance, provenience, prime mover.

Ana. Beginning, commencing or commencement, starting or start (see corresponding verbs at **BEGIN**): foundation, basis, ground (see **BASE**).

roseate. *Hopeful, optimistic, rose-colored.

rose-colored. *Hopeful, optimistic, roseate.

roster. *List, table, catalogue, schedule, register, roll, rota, canon, inventory.

rot, v. *Decay, decompose, putrefy, spoil, disintegrate, crumble.

Ana. Corrupt, vitiate, *debase: taint, *contaminate, pollute, defile.

rota. *List, table, catalogue, schedule, register, roll, roster, canon, inventory.

rotate. 1 *Turn, revolve, gyrate, circle, spin, whirl, twirl, wheel, eddy, swirl, pirouette.

2 **Rotate, alternate** are synonyms when they mean to succeed or cause to succeed each other in turn. **Rotate** may be used in reference to two or more persons or things; it implies indefinite repetition of the order of succession. Thus, persons *rotate* in jobs or offices when they periodically interchange their jobs or offices according, usually, to a predetermined scheme; one *rotates* crops who grows different things on the same land in successive seasons in an order calculated to maintain soil fertility or to enrich exhausted soil. **Alternate** differs from *rotate* in being referable only to two persons or things; though it also implies repetition of the order, it does not convey so strong a suggestion of continuity; as, to *alternate* workers on an exhausting job; to *alternate* hot and cold applications in the treatment of a bruise. "The weather *alternated* between blinding sand-storms and brilliant sunlight" (*Cather*).

Ana. Interchange, *exchange, swap, bandy: succeed, *follow, ensue.

rotund. Plump, chubby, portly, stout, *fleshy, fat, corpulent, obese.

Ant. Angular. — **Con.** *Lean, spare, lank, lanky, gaunt, rawboned, skinny, scrawny.

rough, adj. 1 **Rough, harsh, uneven, rugged, scabrous** come into comparison when they mean not having a smooth or even surface, exterior, texture, or the like. **Rough**, the usual and comprehensive word, applies literally to anything that may be said to have a surface or an exterior which to the sense of touch or the sense of sight is not smooth but is covered with points, bristles, projections, or ridges of any kind or nature; as, *rough ground*; the *rough surface* of a body of water (or, the sea is *rough* today); a *rough block* of stone; the *rough skin* of chapped hands; a *rough tweed*; a *rough, unshaved face*. Often in literal use, when applied to materials and substances employed in the arts and crafts, *rough* means unpolished, unworked, unwrought, etc.; as, a *rough diamond*; *rough steel*; *rough lumber*. By extension, the term also applies to things which impress another than the tactile sense or one's nerves or one's feelings as lacking in smoothness and evenness; as, *rough words*; *rough winds*; *rough sounds*; a *rough disposition*; he has had a *rough time* (for fuller treatment of extended senses, see RUDE). **Harsh** suggests an even more disagreeable sensation or impression than *rough*; when applied to that which is felt with the hand, it implies a surface or texture that is distinctly unpleasant to the tactile nerves (as, a *harsh fabric*; *harsh cinders*; *harsh sand*); when applied to that which is heard, it suggests a rasping, grating quality (as, *harsh voices*; "*harsh din* Broke the fair music"—*Milton*; a *harsh language*); when applied to anything seen, tasted, or the like, it suggests a character or quality that is offensive or repellent to a sensitive person (as, a *harsh liquor*; *harsh features*; a *harsh combination* of colors). Unlike *rough*, *harsh* in its extended senses seldom implies lack of polish or refinement, but rather it stresses a nature that is unfeeling, cruel, and indifferent to the pain it inflicts (as, a *harsh critic*; a *harsh parent*), or when applied to things, effectiveness in promoting discomforts or in imposing rigors (as, a *harsh rebuke*; a *harsh climate*; a *harsh sentence*). **Uneven** applies not only to surfaces but to lines, and suggests a lack of uniformity in height through all the points of the surface (as, an *uneven road*; an *uneven floor*) or a lack of straightness and the presence

of curves or angles (as, an *uneven edge*; an *uneven hem*). In figurative use, it implies a lack of uniformity in excellence, or agreeableness, or the like, in all the parts, as of a life, a performance, a work of art, etc.; as, the artist's brushwork in this painting is *uneven*; the trio's playing of the sonata was *uneven*. **Rugged**, though now chiefly applied to persons so strong and healthy that they can survive great stress and strain, is still frequently employed in the sense of *rough*: in current use, however, it applies chiefly to surfaces marked with ridges, prominences, and the like, such as those which offer obstacles to the traveler, the worker, and the like (as, a *rugged road* up a mountain; "the rice-fields, all clothed in their *rugged stubble*"—*F. Kemble*), or which, as in the case of faces or countenances, are gaunt, seamed, or heavy-featured, and suggest strength or maturity (as, "any resemblance between you, with your *rugged* strong face and your coal-black hair, and this young Adonis"—*Wilde*; "His face had already lost its youthful chubbiness, and was becoming somewhat like William's—*rough*-featured, almost *rugged*"—*D. H. Lawrence*). **Rugged** is also applicable to writing, especially metrical writing, which has not been made smooth, flowing, and agreeable to the ear, sometimes, but not necessarily, through lack of care or skill; as, "the harsh cadence of a *rugged line*" (*Dryden*); "the most *rugged*-seeming of prose dialogue, the kind... that people sometimes praise as 'simply a page torn from the book of life'" (*C. E. Montague*). **Scabrous** applies literally to a surface that is rough to the touch, though not necessarily uneven: in this sense it is a general term including *scaly*, *scurfy*, *scabby*, *thorny*, *prickly*, *knobby*, *knolly*, and the like, when applied to surfaces; as, a *scabrous leaf*; a *scabrous stem*; a *scabrous hide*. In figurative use, *scabrous* applies chiefly to subject matter or to writings and works of art having subject matter that is prickly or thorny, or difficult to treat, often because it is offensive to the tastes or morals of the community; as, "What writer... has spoken more acutely on the somewhat *scabrous*, but none the less important subject of feminine 'temperament'?" (*A. Huxley*).

Ana. Hard, solid, *firm: *coarse, gross: *rank, rampant. **Ant.** Smooth.

2 *Rude, crude, raw, callow, green.

Ana. Brusque, crusty, gruff, curt, blunt, *bluff: ungracious, uncivil, discourteous, impolite (see RUDE): *indecorous, unseemly, indecent, indelicate.

Ant. Gentle.

round, adj. **Round, spherical, circular, globular (or globose, globate, globoid), orbicular (or orbiculate), annular, discoid (or discoidal)** are not all synonyms of each other but they are all synonyms of **round**, the comprehensive term, when it means having an edge, or circumference, or outer surface every point of which is equidistant (often, approximately equidistant) from the center. **Spherical** is applied to round bodies or masses, such as balls, globes, drops, bubbles, thought of as figures of solid geometry: **circular** is applied to round flat surfaces, such as cross sections, tops, or bottoms, or to round bodies thought of as figures of plane geometry and having either the shape of a circle, such as rings and hoops, or the shape of a disk, such as plates, lids, etc. **Globular** and its variant forms are less mathematical and more concrete in their connotations than *spherical*: they often suggest merely an approximation to the spherical in shape (as, the earth is *globular* but not actually *spherical*); as, *globular (or globose) berries*; *globular (or globoid) grains*; *globular bowls* or wine glasses. **Orbicular** may also mean approximately spherical, as are the orbs, or heavenly bodies, as known; the word frequently, however, means approximately circular, as are the orbs, or

heavenly bodies, as seen. Thus, the socket of some bones is described as an *orbicular* (that is, globe-shaped) socket, and the muscle which surrounds the eye socket and controls the opening and closing of the eye is describable as an *orbicular* (that is, *circular*) muscle. *Annular* adds to *circular* the implication of being hollow in the center and therefore ring-shaped; as, *annular* markings on trees; an *annular* eclipse of the sun. *Discoid* adds to *circular* the implications of a continuous surface and of flatness; thus, a *discoid* shell is one like the shell of the nautilus, spiral yet having all its coils practically in the same plane.

round, *adv.* Around, *about.

roundabout. *Indirect, circuitous.

Ana. Sinuous, *winding, tortuous, anfractuous, flexuous.

rouse. Arouse, *stir, awaken, rally, waken.

Ana. Enliven, *quicken, animate, vivify: stimulate, excite, *provoke: *incite, foment, instigate.

roustabout. *Worker, workman, workingman, laborer, mechanic, artisan, operative, hand, craftsman, handicraftsman.

rout, *n.* *Crowd, throng, press, crush, mob, horde.

rout, *v.* *Conquer, vanquish, defeat, subdue, subjugate, reduce, overcome, surmount, overthrow, beat, lick.

route, *n.* *Way, course, passage, pass, artery.

rove. *Wander, stray, roam, ramble, range, prowl, gad, gallivant, traipse, meander.

row, *n.* *Brawl, broil, fracas, melee, rumpus, scrap.

Ana. Fight, affray, fray, combat, conflict, *contest: altercation, wrangle, *quarrel, squabble.

royal. Regal, *kingly, queenly, imperial, princely.

Ana. *Splendid, resplendent, glorious, superb: august, majestic, stately, imposing (see **GRAND**).

rude. 1 *Rude, rough, crude, raw, callow, green* are synonyms when they mean lacking in most or in all of the qualities that make for finish or for perfection in development or in use. *Rude*, which etymologically means unwrought or unformed, is applicable not only to men, to their minds, to their manners, but also to the things they make or do. As applied to men and their minds, it suggests a comparatively low state of culture or a dearth of learning more often than savagery or barbarism, although it may suggest the latter; as, "Like a *rude* and savage man of Ind" (*Shak.*); "His companies [companions] unletter'd, *rude* and shallow" (*Shak.*). "The melody that was at first designed To cheer the *rude* forefathers of mankind" (*Cowper*). As applied to the things which men make or do, *rude* suggests the makers' ignorance of technique or of proper materials, their inexperience or inexperience, a deficiency of materials, or the like; as, *rude* attempts at verse; *rude* implements; *rude* workmanship; a *rude* hut. "Our father Adam sat under the Tree and scratched with a stick in the mould; And the first *rude* sketch that the world had seen was joy to his mighty heart" (*Kipling*). *Rough*, as here compared (see also **ROUGH**, 1), is also applicable to men, their manners, and their works and products; it usually suggests more harshness or violence than *rude* and a more culpable ignorance or inexperience. As applied to men and their manners the term usually implies the absence of signs not only of polish and refinement but of gentleness, politeness, and often even civility. It does not, however, necessarily imply boldness, insolence, boorishness, or other unpleasant qualities; as, "A plain, *rough*, honest man, and wise, tho' not learned" (*Addison*); a couple of *rough* fellows appeared at the door; to use *rough* language; a *rough* but hearty welcome. As applied to men's works and products, *rough* suggests more offhandedness, haste, indifference to technique, or the like, than *rude*; it is therefore usually applied to things which are not carefully made, often intentionally, because they suffice

for the purpose, or are not yet finished, being in an early stage of a process or development; as, to make a first *rough* draft of his argument; to show a *rough* sketch of the proposed garden; a *rough* guess; a *rough* buffing of cutlery precedes what is called a gloss buffing. *Crude* may be applied to men and their acts, words, products, and the like, but it gets its fundamental implications from its historically earlier application to things which have been untouched by man, as by being unprocessed, unrefined, untreated, and the like, and are as yet, therefore, in their natural state or in an undeveloped state; as, *crude* petroleum; *crude* rubber; *crude* sugar. Consequently, when applied to men, their acts, words, products, and the like, *crude* implies the far remove of that which is so described from that which is perfected, is highly developed, or fully civilized, as by toning down, refining, disciplining, or the like; as, *crude* colors; *crude* methods; *crude* emotions; a *crude* philosophy. "The blank verse of Tennyson... is *cruder* (not 'rougher' or less perfect in technique) than that of half a dozen contemporaries of Shakespeare; *cruder*, because less capable of expressing complicated, subtle, and surprising emotions" (*T. S. Eliot*). "Our ordinary high school pupils, *crude* as they may appear, represent a degree of refinement notably higher than the stage attained by their parents" (*Grandgent*). *Raw*, which in the earliest of its present senses describes the condition of uncooked food, especially of meat, fish, eggs, and vegetables, is often further applied to natural products which are gathered, mined, or otherwise removed from their native places, but are not yet processed or are in the earliest stage of manufacture or processing; thus, *raw* silk names the fiber from the cocoons of the silkworm as it is drawn from them and reeled; *raw* hides are stripped from the carcasses of animals but are not yet tanned or otherwise dressed; *raw* milk is as yet unpasteurized; the *raw* materials from which the miller produces flour are various cereals such as wheat, barley, rye, and the like; "The *raw* material of music is sound" (*Day Lewis*). As applied to men, their minds, their products, and the like, *raw*, far more than *crude*, suggests the elementariness of the untried and the inexperienced; as, *raw* recruits; "to raise ill-armed, half-starved, under-aged, *raw* levies" (*Brownell*); "the *raw* judgment of the multitude" (*De Quincey*). "Over and over again he had seen her take some *raw* youth, twist him, turn him, wake him up; set him going" (*V. Woolf*). *Callow*, originally applied to an unfledged bird, especially one covered with down, is now more often applied to youths or to those who retain the signs of immaturity in manhood. It usually suggests naiveté, simplicity, lack of sophistication, but not so strikingly as does *crude*, and its suggestions of inexperience or present unfitness are not so strong as those of *raw*. "Souls and wits which have never got beyond the *callow* and boarding-school stage" (*Arnold*). "Pluffies was a subaltern in the 'Unmentionables.' He was *callow*, even for a subaltern" (*Kipling*). *Green*, as here compared, derives most of its connotations from *green* as applied to fruit and implying unripeness and unfitness for use. The term often comes pretty close to *raw* when applied to persons and their abilities, because it suggests inexperience and lack of necessary training; as, to employ *green* hands in a factory. Often, however, it additionally connotes simplicity or gullibility. "He has taken me for a *green* country girl, impressed with him because he is from the city and dressed in fine clothes" (*S. Anderson*). But *green* is also used of products (sometimes of the raw materials) of manufacture or processing which are not yet fully seasoned, cured, dried, or the like; as, *green* liquors (not as yet mellowed by age); *green* sugar (not yet perfectly dried); *green* pelts (fresh from the animal); *green* manure (not yet sufficiently rotted).

Ana. Boorish, churlish, clownish, loutish (see under BOOR): rustic, *rural, bucolic: barbarous, savage, *barbarian: primitive, *primary, primeval.

2 Rude, ill-mannered, impolite, discourteous, uncivil, ungracious come into comparison as meaning not observant of the manners or forms required by good breeding. **Rude** suggests lack of delicacy or consideration for the feelings of others: it does not, however, necessarily suggest lack of breeding, for it is applicable to persons of all stations or conditions. It usually stresses impudence, insolence, or a generally insulting manner; as, a *rude* answer; to brush one aside *rudely*; "demanding an explanation of the *rude* familiarity with which Jim had treated him" (*S. Anderson*). **Ill-mannered** is a more general and less explicit term, and it seldom carries a suggestion of an intent to offend or insult, as *rude* usually carries: it is therefore applicable to any person, act, or utterance that shows ignorance of, indifference to, or a disregard of, the proprieties; as, "Our Royal family are getting a little tired of the well-meant, but at the same time *ill-mannered*, homage of well-dressed crowds" (*Daily News*). **Impolite, discourteous, and uncivil**, as the negatives of *polite, courteous, civil* (for all three, see CIVIL), respectively imply merely the reverse of the care in observing the proprieties of good or formal society that is suggested by *polite* (as, "The real Smiths might with equal accuracy have been called the poor Smiths, except that Old Chester could not have been so *impolite*" —*Deland*), of the considerate, dignified politeness that is suggested by *courteous*, thereby implying something like rudeness (as, the clergyman was much humiliated by the *discourteous* reply to his appeal), or of the modicum of good manners that is suggested by *civil*, thereby implying an utter disregard of every rule governing social intercourse among civilized persons (as, "No profanity, Señor. We want nothing from you but to get away from your *uncivil* tongue"—*Cather*). **Ungracious** stresses the lack of kindness, or courtesy, that enables one to keep gracious (see GRACIOUS); as, an *ungracious* refusal; an *ungracious* answer to a *rude* question; "Richard... gave way *ungraciously*. 'There, do as you like'" (*Meredith*). **Ana.** Brusque, curt, gruff, crusty (see BLUFF): *impertinent, intrusive, meddlesome: surly, crabbed (see SULLEN).

Ant. Civil: urbane.

rueful. Dolorous, doleful, lugubrious, plaintive, *melancholy.

Ana. Depressed, weighed (down), oppressed (see DEPRESS): piteous, *pitiful: despairing, *despondent, hopeless.

ruffian, n. **Ruffian, thug, desperado, gangster, Mohock, apache** agree in denoting a brutal fellow given to wanton violence and to criminal acts such as waylaying, attacking, or murdering his victims. **Ruffian** designates the type, and though it usually distinctively implies rowdiness and marauding, it may be applied to any excessively brutal person who mercilessly inflicts pain or death on others. "Now, ere you sleep, See that your polished arms be primed with care, And drop the nightbolt; *ruffians* are abroad" (*Cowper*). **Thug** usually implies thievery or other definite motive, as well as ruffianry. Originally applied in India to a member of an organization of thieves who waylaid and strangled their victims, the term is now applied, especially in the United States, to a ruffian who knocks out or bludgeons his victim; as, to employ *thugs* to quell a riot. "This dismal place, in almost any other country, would swarm with *thugs*" (*Twain*). **Desperado** less often suggests city streets or crowded centers of population as the field of operations than the plains or the wild and waste regions of a country. It also implies

great recklessness in attack; often, but not necessarily, it is applied to an outlaw or hunted criminal who takes no chance of losing his freedom or security. "Jesse James was a two-gun man... He's gone with the buffler [buffalo] an' the *desperados*" (*W. R. Benét*). **Gangster**, in current American colloquial use, has acquired implications not originally found in the word; it now implies membership in a band of thieves, racketeers, or the like, controlled by a leader, and the execution of his orders by acts of terrorism and often, wanton murder. **Mohock**, a historical term, was applied to one of a band of ruffians (often aristocrats by birth) who infested the streets of London, especially at night, in the early eighteenth century and attacked and maltreated their victims. **Apache** is applied to a particularly brutal type of ruffian that roves the streets of Paris, especially in the slum districts. **Ana.** Robber, thief, larcener, burglar (see under THEFT): *assassin, cutthroat, gunman, bravo.

ruffle, v. Bristle, bridle, swagger, *strut.

Ana. Flaunt, parade, display, exhibit, *show.

rugged. *Rough, scabrous, harsh, uneven.

Ana. *Robust, healthy: burly, brawny, husky, *muscular: *rank, rampant: arduous, *hard, difficult.

Ant. Fragile.

ruin, v. **Ruin, wreck, wrack (or rack), dilapidate** come into comparison when they mean to subject a person or, more often, a thing to forces that are destructive of soundness, worth, or usefulness. **Ruin** usually suggests a bringing to an end the structural or mental integrity, the value, beauty, or the well-being of something or of someone, as through destructive agencies such as weather, age, neglect, or the like, through partial destruction by fire, flood, collision, or the like, or through loss of something vital to one's happiness or success (such as one's fortune, one's good name, one's chastity); as, the severe windstorm has *ruined* the garden; nearly every one of the old and beautiful churches in the region was *ruined* by bombs; the firm's reputation was *ruined* by rumors spread by envious competitors. "There was in all of them [persons] something *ruined*, lost or broken—some precious and irretrievable quality which had gone out of them and which they never could get back again" (*T. Wolfe*). **Wreck** implies a ruining by or as if by crashing or being shattered. Literally it is used in reference to a ship, a train, an automobile, an airplane, or the like; as, the vessel was *wrecked* on the rocky coast of Maine; only the locomotive of the second train was *wrecked* in the collision. In its extended sense, *wreck* is often used in place of *ruin* when there is an intent to imply that the thing (often an intangible thing such as one's career, one's credit, one's prospects, or the like) is injured past all hope of repair or of reconstruction; as, his health was *wrecked* by his many years of tropical exploration; the party has been *wrecked* by the misdeeds of a few of its leaders; their plans were *wrecked* by the unexpected change in weather. When the pulling down of a building is implied, *wreck* is often preferred to *demolish* or *destroy*, because it does not necessarily carry the suggestion implicit in the latter words of the uselessness of that which is left. **Wrack** (or in dialectal or erroneous use *rack*) is etymologically allied to *wreck*, but it has not followed the same course in the development of its senses and is now rare except in poetic or archaic use where there is the intent to evoke a picture of widespread ruin or to suggest the effect of an overwhelming catastrophe or disaster. "As if the world's wide continent Had fallen in universal ruin *wracked*" (*Shelley*). "The seas... With outstretch'd angry arms... *Wracking* whole fleets in pride like riven toys" (*F. T. Palgrave*). The verb is now seldom used but the noun *wrack* is not

uncommon. **Dilapidate** (etymologically, to scatter like stones) in precise use implies ruin, especially of a building, of developed property, or of one's fortune or financial resources, through neglect or through wastefulness: the term therefore carries, as the other terms do not, a strong implication of culpability. "Nothing... more certainly *dilapidates* their estates... than the surfeits of intemperance" (*Ken*). In British use, the intransitive verb and the noun *dilapidation* often specifically suggest ecclesiastical wastefulness through a failure to keep a church or church property in proper repair and their consequent depreciation in value; as, "The church of Elgin... was... shamefully suffered to *dilapidate* by deliberate robbery and frigid indifference" (*Johnson*); the *Dilapidations* Acts of 1871 and 1872 regulate the recovery of compensation for money spent in repairing churches and ecclesiastical buildings allowed to *dilapidate*. In more general use, *dilapidate* implies a run-down, often a tumble-down, condition and is used commonly in the past-participial form as an adjective; as, "Over the low *dilapidated* wall" (*Browning*); "the dazzling scarlet cloak in which she had first seen Madame Foucault, *dilapidated* now" (*Bennett*).

Ana. *Destroy, demolish, raze: *deface, disfigure: *maim, mutilate, mangle.

rule, n. *Law, regulation, precept, statute, ordinance, canon.

Ana. Order, mandate, dictate, *command: *principle, axiom, fundamental: etiquette, *decorum, propriety.

rule, v. 1 *Govern.

Ana. *Guide, lead: manage, direct, control, *conduct: *execute, administer.

2 *Decide, determine, settle, resolve.

Ana. Conclude, judge, gather, deduce, *infer.

3 In form **rule out**. Eliminate, debar, *exclude, shut out, suspend, disbar, blackball.

Ana. Bar, block (see **HINDER**): *prevent, preclude, obviate.

ruminate. Muse, meditate, *ponder.

Ana. *Consider, weigh, revolve, excogitate: reflect, deliberate, speculate, cogitate, *think.

rumpus. *Brawl, broil, fracas, melee, row, scrap.

run, v. Gallop, canter, trot, pace, single-foot, walk, lope, rack, amble. See under **TROT, n.**

run, n. Gallop, canter, *trot, pace, single-foot, walk, lope, rack, amble.

runt. *Dwarf, pygmy, midget, manikin, homunculus.

rupture, n. *Fracture.

rural. **Rural, rustic, pastoral, bucolic, georgic, Arcadian, agrestic, geoponic** agree in meaning of or characteristic of the country as distinguished from city life. **Rural** is the most comprehensive term; in its widest meaning it

implies open country whether uninhabited or sparsely settled; more narrowly it suggests agricultural pursuits or simple community life. In distinction from *rustic*, however, *rural* suggests the pleasant aspects of country life; *rustic* commonly implies a contrast with the refinements of the city or the town, and often connotes rudeness or lack of polish. "He... buried himself in the *rural*, or rather *rustic*, solitude of Buriton" (*Gibbon*). "He had no taste for *rural* loveliness, green fields and vineyards... but he would often have his tongue in his cheek at the simplicity of *rustic* dupes" (*Stevenson*). *Pastoral, bucolic*, and *georgic* all derive some or most of their connotations from the literary treatment of rural life. *Pastoral*, when it does not literally refer to the life of shepherds, suggests either green pastures and grazing sheep or a life primitive in its simplicity or idyllic in its peace and apartness from the world. "To *pastoral* dales, thin-set with modest farms" (*Wordsworth*). "When I thought that a war would arise in defence of the right, That... No more shall... Peace Pipe on her *pastoral* hillock a languid note" (*Tennyson*). *Bucolic*, especially in modern humorous writing, is referred chiefly to persons, their acts, and their words rather than to landscape and, far more strongly than *rustic*, implies loutishness. "The keenest of *bucolic* minds felt a whispering awe at the sight of the gentry" (*G. Eliot*). "A kind of *bucolic* Ben Franklin" (*W. H. Page*). However, *bucolic* is still sometimes used in place of *pastoral* when referring to the type of poetry. *Georgic* is rarer than the others; it usually suggests the life of the farmer rather than of the shepherd; unlike *pastoral* and *bucolic*, it seldom implies idealization or derogation, but rather exact realism. "Here I peruse the Mantuan's *Georgic* strains, And learn the labours of Italian swains" (*Gay*). *Arcadian* stresses simplicity, innocence, and peace. "Those golden times And those *Arcadian* scenes that Maro sings, And Sidney, warbler of poetic prose" (*Cowper*). *Agrestic* and *geoponic* are found only in occasional literary use, the former the equivalent of *rustic*, and the latter, in modern use, approaching *bucolic* or *georgic*; as, "agrestic behavior" (*W. Gregory*); "A brown, parchment-hided old man of the *geoponic* or *bucolic* species" (*J. R. Lowell*).

ruse, n. *Trick, stratagem, maneuver, artifice, wile, feint.

Ana. Subterfuge, chicane, trickery, *deception: expedient, shift, makeshift, *resource, resort.

rustic. *Rural, pastoral, bucolic, georgic, Arcadian, agrestic, geoponic.

ruth, n. Commiseration, compassion, *pity, condolence, sympathy, empathy, bowels.

Ana. *Mercy, grace, charity, clemency, lenity: forbearance, tolerance, indulgence (see under **FORBEARING**).

S

Sabbath. *Sunday, the Lord's Day.

sack, v.¹ Pillage, despoil, spoliage, *ravage, devastate, waste.

Ana. Plunder, *rob, loot, rifle: *destroy, demolish, raze: *strip, bare, denude.

sack, v.² *Dismiss, discharge, cashier, fire, bounce, drop.

sack, n. *Bag, pouch.

sacred. 1 *Holy, divine, blessed, spiritual, religious.

Ana. Dedicated, consecrated, hallowed (see **DEVOTE**): cherished, treasured, valued (see **APPRECIATE**).

Ant. Profane. — **Con.** Secular, lay, temporal (see **PROFANE**).

2 Sacred, sacrosanct, inviolate, inviolable are here compared as meaning having such a character that it is protected by law, custom, tradition, human respect, or the like, against breach, intrusion, defilement, or profanation. **Sacred** (as here compared: for religious use, see also **HOLY**) implies either a setting apart for a special and, often, exclusive use or end (as, among civilized peoples, property is regarded as *sacred* to its owner; a fund *sacred*

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

to charity; the study was *sacred* to the father of the family) or a special character or quality which makes the person or thing held sacred an object of almost religious veneration or reverence (as, "[Louis XIII] saw that the things which happened increasingly strengthened the Royal Office which was *sacred* to him"—*Belloc*; " 'Grief of two years' standing is only a bad habit.' Alice started, outraged. Her mother's grief was *sacred* to her"—*Shaw*). Although in earlier use *sacrosanct* (etymologically, sacred and holy) was often used seriously of persons or things regarded as not subject to profanation or violation and therefore revered with the same awe and respect as is implied by the religious sense of *sacred* (as, "What confederacy can be imagined more noble, more *sacrosanct*, than that between man and wife?"—*L'Estrange*; "Let them establish your fundamental rights by a *sacrosanct* declaration"—*Jefferson*), the term now is either ironical and occasionally slightly derisive or suggests an imputed rather than a genuinely deserved claim for freedom from attack or violation (as, "etymology is after all not *sacrosanct*"—*Karl K. Darrow*; "The one office which he [Augustus] tried to keep *sacrosanct*... was the consulship"—*Buchan*). *Inviolable* and *inviolable* apply to laws, principles, treaties, agreements, institutions, persons, places, objects, etc., that for one reason or another are secure from breach, infringement, attack, intrusion, injury, or the like: they differ from each other chiefly in that *inviolable* suggests the fact of not having been violated, while *inviolable* implies a character which does not permit or which distinctly forbids violation; thus, one holds a vow *inviolable*, but keeps his vow *inviolable*; so, "What seemed *inviolable* barriers are burst asunder in a trice" (*Meredith*); "The Navajos... believed that their old gods dwelt in the fastnesses of that canyon; like their Shiprock, it was an *inviolable* place" (*Cather*).

Ana. Protected, shielded, defended, guarded (see DEFEND): revered, revered, venerated (see REVERE).

sacrifice, *v.* Abnegate, forbear, *forgo, eschew.

Ana. Renounce, *abdicate: surrender, yield, resign, *relinquish.

sacrilege. Desecration, *profanation, blasphemy.

Ana. Defilement, pollution (see corresponding verbs at CONTAMINATE): violation, transgression, trespass, *breach: sin, crime, scandal, *offense.

sacrilegious. Blasphemous, *impious, profane.

Ana. Polluting, defiling (see CONTAMINATE): profaning, desecrating (see corresponding nouns at PROFANATION).

sacrosanct. Inviolable, inviolable, *sacred.

Ana. Respected, regarded, esteemed (see corresponding verbs under REGARD, *n.*): revered, venerated, revered (see REVERE).

sadness. **Sadness, depression, melancholy, melancholia, dejection, gloom, blues, dumps, vapors (or vapours)** are here compared as meaning a state of mind when one is low-spirited, or an attack of low spirits. **Sadness** is the general term: apart from the context it carries no explicit suggestions of the cause of the low spirits or of the extent to which one is deprived of cheerfulness; as, "A feeling of *sadness* and longing That is not akin to pain" (*Longfellow*); "We feel his [Vergil's] underlying *sadness*... But Rome may have felt more strongly than we do his hopefulness and pride" (*Buchan*); "She was conscious of a profound *sadness* which was not grief" (*Bennett*). **Depression** applies chiefly to a mood in which one feels let down, discouraged, and devoid of vigor (owing to physical, mental, or other causes), or to a state of mind, usually outwardly manifested by brooding, in which one is listless, despondent, sullen, or the like; as, "On some days he was happy, and then his happiness was followed

by an odd fit of *depression*" (*S. Anderson*); "Tina's love was a stormy affair, with continual ups and downs of rapture and *depression*" (*E. Wharton*); "Never before, in any mood of *depression*, had she given evidence of suicidal thoughts" (*H. Ellis*). **Melancholy** in earliest use applied, and still sometimes applies, to a settled depression that is temperamental or constitutional, and that at times shows evidences of insanity (as, "*Melancholy* is the nurse of frenzy"—*Shak.*); in current use, this condition is regarded as the result of a mental disease and is called specifically **melancholia** (as, alone and friendless, she fell into a *melancholia*). **Melancholy** now often applies to a not unpleasant or displeasing mood or a mental state characterized by sadness (but not grief or despair), pensiveness, and deep, but not depressing or heavy, seriousness; as, "To lend our hearts and spirits wholly To the influence of mild-minded *melancholy*" (*Tennyson*); "the lively, curious mind, the wit, the gaiety of spirit tinged with a tender *melancholy*" (*Hudson*). "She dwells with Beauty—Beauty that must die... Ay, in the very temple of delight Veil'd *Melancholy* has her sovran shrine, Though seen of none save him whose... soul shall taste the *sadness* of her might" (*Keats*). **Dejection** suggests especially the mood of one who is downcast, discouraged, or dispirited: the term differs from *depression* chiefly in its suggestion of an external cause and in its more frequent application to a mood than to a prolonged state of mind; as, "It was the last of the regiment's stay in Meryton, and all the young ladies in the neighborhood were drooping apace. The *dejection* was almost universal" (*Austen*); "As high as we have mounted in delight In our *dejection* do we sink as low" (*Wordsworth*). **Gloom** applies rather to the effect produced by melancholy or melancholia, depression, dejection, or extreme sadness on the person afflicted or to the atmosphere which a person of low spirits or a depressing event creates: in its literal sense, the term implies darkness and dullness, and it further connotes lack of all that enlivens or cheers; as, "the leaden *gloom* of one who has lost all that can make life interesting, or even tolerable" (*Hardy*); "constant repinings at the dullness of everything around them threw a real *gloom* over their domestic circle" (*Austen*); "the idea that I am being studied fills me, after the first outburst of laughter, with a deepening *gloom*" (*A. Huxley*). **Blues, dumps, vapors** are all more or less colloquial terms for an attack of low spirits. **Blues** (short for *blue devils*) commonly suggests an acutely depressed or melancholy mood which afflicts one almost as an illness; as, to have the *blues* frequently; she always finds hard work the best cure for the *blues*. **Dumps** suggests deep dejection of spirits (as, "doleful *dumps* the mind oppress"—*Shak.*). **Vapors** (an archaic or historical term) implies a highly nervous state where the sufferer (usually a woman) cannot control tears, has a painful headache, and is acutely depressed or dejected; as, "Sometimes, thro' pride, the sexes change their airs; My lord has *vapours*, and my lady swears" (*Young*). **Ana.** *Sorrow, grief, anguish, woe: despondency, despair, hopelessness, forlornness (see under DESPONDENT).

Ant. Gladness.

saecular. Variant of SECULAR.

safe, *adj.* **Safe, secure** come into comparison only when they mean free from danger or apprehension of danger. **Safe** (etymologically, whole, sound) in its earliest and still current sense implies that one has passed through dangers or has run the risk of injury, of being lost (often, in early use, spiritually lost), or the like, without incurring harm or damage; as, they arrived home *safe* and sound after their long journey; she always insists on

seeing her children *safe* in their schoolrooms. In its later and now more common senses, *safe* applies to persons or possessions whose situation or position involves neither risk nor exposure to destruction or loss (as, "Let the great world rage! We will stay here *safe* in the quiet dwellings"—*Shelley*; to build shelters where the people might go to be *safe* from falling bombs; he felt that his money was *safe* when it was in a bank), or to things, such as highways, bridges, or vehicles, or such as policies, actions, or courses, that are so constructed or designed that they expose one to few or no risks (as, a *safe* harbor; a *safe* fire escape; a *safe* investment; "'Tis never *safe* to despise an enemy"—*Defoe*), or to any cautious procedure which keeps one out of danger or free from the risk of making an error or blunder (as, this is as much as it is *safe* to say about the prospects of a cure for cancer; "What know I? . . . I take refuge . . . in the *safe* old question of Montaigne"—*C. E. Montague*). **Secure** (etymologically, without care) in its earliest sense, which is now archaic except in a few idiomatic phrases, implies freedom from anxiety or apprehension of danger; as, most people like to feel *secure*. In this sense, the term so often connoted overconfidence that it was frequently contrasted with *safe*; as, "From being anxious or *secure* deliver us" (*Donne*); "Man may *securely* sin, but *safely* never" (*B. Jonson*). The term is now often a synonym of *safe* rather than a counterterm, but it still often stresses freedom from anxiety not as merely a subjective state but as a frame of mind induced by grounds that are good and sufficient. Sometimes the grounds are intellectual and imply sufficient evidence to establish the certainty of something that has been doubted. "Jane should therefore make the most of every half-hour in which she can command his attention. When she is *secure* of him, there will be leisure for falling in love" (*Austen*). Sometimes the grounds are material, such as the existence of sufficient money, the possession or definite expectation of property, a definite means of livelihood, or the like, which enables one to live or make a venture without fear, or the provision of safeguards or protective devices which make a thing *safe* to use, follow, or the like; as, the offer of a partnership by making his future *secure* also made his marriage possible; now that the foundations were in good repair they regarded the bridge as *secure*. "A provident, rather thoughtful people, who made their livelihood *secure* by raising crops and fowl" (*Cather*). Often, the term suggests not only a freedom from fear of danger, but a position, condition, or situation free from all hazards; as, the poet has made a *secure* place for himself in the history of English poetry. "To the average man, doomed to some banal and sordid drudgery all his life long, they [women] offer the only grand hazard that he ever encounters. Take them away and his existence would be as flat and *secure* as that of a milch cow" (*Mencken*).

Ana. Protected, guarded, shielded (see **DEFEND**): *reliable, dependable, tried.

Ant. Dangerous. — **Con.** Precarious, hazardous, risky, perilous, jeopardous (see **DAINGEROUS**).

safeguard, *v.* Guard, shield, protect, *defend.

Ana. Conserve, preserve, *save: secure, insure, *ensure, assure.

saga, *Myth, legend.

sagacious. Perspicacious, astute, *shrewd.

Ana. *Sharp, keen, acute: penetrating, piercing, probing (see **ENTER**): *wise, judicious, sage, sapient.

sage, *adj.* *Wise, sapient, judicious, prudent, sensible, sane.

Ana. *Intelligent, knowing, brilliant: *learned, erudite: sagacious, perspicacious (see **SHREWD**).

sail, *v.* Float, skim, scud, shoot, dart, *fly.

sailor. *Mariner, seaman, tar, gob, matlow, bluejacket, rating.

salable. Marketable, *vendible, purchasable.

Ant. Unsalable.

salary. *Wage, stipend, pay, hire, emolument, fee, screw.

salient. Conspicuous, outstanding, signal, striking, arresting, prominent, remarkable, *noticeable.

Ana. Significant, important, weighty (see corresponding nouns at **IMPORTANCE**): impressive, *moving: obtrusive, intrusive (see **IMPERTINENT**).

salubrious. *Healthful, healthy, wholesome, salutary, hygienic, sanitary.

Ana. *Beneficial, advantageous: benign, *favorable.

salutary. Wholesome, *healthful, healthy, salubrious, hygienic, sanitary.

Ana. *Beneficial, advantageous, profitable: restorative, alterative, tonic (see corresponding nouns at **RESTORATIVE**).

Ant. Deleterious: evil.

salutation. *Greeting, salute.

salute, *v.* *Address, greet, hail, accost.

salute, *n.* *Greeting, salutation.

salve. *Balm, emollient, demulcent.

same, *adj.* **Same**, **selfsame**, **very**, **identical**, **identic**, **equivalent**, **equal**, **tantamount** come into comparison when they mean either not different from the other or others or not differing from each other. **Same** may imply, and **selfsame** invariably implies, that the things under consideration are one thing, and not two or three different things; as, this is the *same* (or *selfsame*) book that John once owned; their dresses were made from the *same* (or *selfsame*) bolt of cloth; they go to the *same* summer resort year after year. But *same* (not *selfsame*) may be used to imply numerical difference (that is, that the things considered are actually distinct), with otherwise no appreciable difference in quality, kind, appearance, amount, or the like. "[Marlborough] could see a hero perish or a sparrow fall, with the *same* amount of sympathy for either" (*Thackeray*); "Nothing can be as it has been before; Better, so call it, only not the *same*" (*Browning*). **Very**, like **selfsame**, implies no difference in number between the things under consideration; as, you are the *very* man I have been anxious to see; "That is the *very* thing that I was saying" (*Shelley*). **Identical**, in its strictest use (see also **SIMILAR**), implies either selfsameness (as, I found it at the *identical* spot where I left it; the authors of the anonymous "Waverley" and of the popular "Lady of the Lake" were found to be *identical*) or absolute agreement in all details as of quality, shape, appearance, and the like (as, since the sculptures are *identical* one must be a replica of the other; no two leaves from the same tree are *identical*; twins that are *identical* develop from a single fertilized egg). "All experience shows, that the *same* measures, or measures scarcely distinguishable from each other, may flow from distinct powers; but this does not prove that the powers themselves are *identical*" (*Ch. Just. Marshall*). **Identic** is used chiefly in diplomacy to describe the use of the same form or the following of the same course by two different governments or by one government when dealing with two or more governments; as, the Allies sent *identic* answers to the ultimatum. Things are **equivalent** when they amount to the same thing (particularly when set off against each other), especially in worth, force, significance, or import; as, some heirs received their legacies in cash, some in real estate of *equivalent* value. "Silence is, after all, *equivalent* to a negation" (*Thackeray*). Things

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

are **equal** when there is no difference in number, amount, magnitude, value, or the like; as, *equal* salaries; *equal* quantities; *equal* merit; to divide in *equal* shares. **Tantamount** is commonly applied to other than material things one of which is in effect equivalent to the other; as, the Democratic nomination in some of the southern states is *tantamount* to election; "Such a movement... would be *tantamount* to a confession of failure" (*Trollope*).
Ant. Alike, like, akin, parallel, uniform (see **SIMILAR**).
Ant. Different.

sample, *n.* Specimen, example, *instance, case, illustration.

Ana. Piece, *part, portion, segment, fragment.

sanctimonious. 1 Pictistic, religious, *devout, pious.

Ana. See those at **SANCTIMONIOUS**, 2.

2 Hypocritical, pharisaical, canting. See under **HYPOCRISY**.

Ana. Affected, feigned, simulated, counterfeited, assumed, pretended (see **ASSUME**): perfervid, fervid, ardent, fervent (see **IMPASSIONED**).

sanctimony, **sanctimoniousness**. *Hypocrisy, pharisaism, cant, canting.

Ana. Pretending or pretense, simulation, feigning, counterfeiting, affecting or affectation (see corresponding verbs at **ASSUME**): enthusiasm, zealotry, fanaticism (cf. nouns at **ENTHUSIAST**).

sanction, *v.* *Approve, endorse, accredit, certify.

Ana. *Authorize, license, commission: confirm, *ratify: *enforce, implement.

Ant. Interdict.

sanctity. *Holiness.

sanctuary. Refuge, asylum, *shelter, cover, retreat, ark.

Ana. Safety, security (see corresponding adjectives at **SAFE**): protection, shielding or shield, guarding or guard (see corresponding verbs at **DEFEND**).

sand, *n.* *Fortitude, grit, backbone, pluck, guts.

Ana. *Courage, mettle, spirit, resolution, tenacity.

sane. *Wise, judicious, prudent, sensible, sage, sapient.

Ana. *Rational, reasonable: right, *good: sound, cogent, convincing (see **VALID**).

Ant. Insane.

sang-froid. Phlegm, composure, *equanimity.

Ana. Indifference, unconcernedness or unconcern, aloofness, detachment (see corresponding adjectives at **INDIFFERENT**): self-possession, aplomb, self-assurance, assurance, self-confidence, *confidence.

sanguinary. *Bloody, sanguine, sanguineous, gory.

sanguine. 1 Also **sanguineous**. *Bloody, sanguinary, gory.

Ant. Bloodless.

2 Assured, *confident, sure.

Ana. *Hopeful, optimistic: positive, certain, *sure.

Ant. Afraid (sense 2).

sanitary. *Healthful, hygienic, salutary, salubrious, healthy, wholesome.

Ana. Curing or curative, healing, remedying (see corresponding verbs at **CURE**): *effective, efficacious, effectual.

Ant. Noxious.

sanitize. Disinfect, *sterilize, fumigate.

sap, *v.* Undermine, enfeeble, *weaken, debilitate, cripple, disable.

Ana. Drain, *deplete, exhaust, impoverish: *ruin, wreck: *destroy.

sapid, **saporous**. *Palatable, appetizing, savory, tasty, toothsome, flavorsome, relishing.

Ant. Insipid. — **Con.** Vapid, flat, inane, jejune (see **INSIPID**): bland, *soft, mild.

sapidity. *Taste, flavor, savor, tang, relish, smack.

Ant. Insipidity.

sapient. Sage, *wise, judicious, prudent, sensible, sane.

Ana. *Learned, erudite, scholarly: sagacious, perspicacious (see **SHREWD**).

sarcasm. Satire, irony, *wit, humor, repartee.

Ana. Incisiveness, trenchancy, bitingness, cuttingness (see corresponding adjectives at **INCISIVE**): mockery, taunting, derision (see corresponding verbs at **RIDICULE**).

sarcastic or sarcastical. **Sarcastic (or sarcastical)**,

satirical (or satiric), **ironical (or ironic)**, **sardonic (or sardonical)** come into comparison when they mean hav-

ing or manifesting bitterness and power to cut or sting: A person, a mood, a remark, or an expression is **sarcastic**

(less often **sarcastical**) when he or it manifests an intent

to inflict pain on another by deriding him, taunting him,

or making him ridiculous, as by backhanded compli-

ments; as, *sarcastic* comments on an actor's performance;

"Mr. Bennet was [an] odd...mixture of quick parts,

sarcastic humour, reserve, and caprice" (*Austen*); "It is

not necessary that the right honourable gentleman

should *sarcastically* call that time to our recollection"

(*Burke*). A person, or his utterance, expression, or spirit

is **satirical** (less often **satiric**, this term being applied

chiefly to literature or a literary work involving satire)

when he or it manifests the intent to censure someone or

something by holding him or it up for ridicule and repro-

bation. "At a later date Erasmus's ecclesiastical and

princely friends laughed no less heartily over his *satirical*

comments on kings and clerics" (*A. Huxley*). "All this

comedy was filled with bitter *satiric* strokes against a

certain young lady" (*Thackeray*). Not only a person, or

an utterance, mood, or expression, but also a situation

or an event may be described as **ironical** or **ironic** when

he or it manifests the power to evoke amused, but often

startled or unpleasant, reflection on the difference be-

tween what is said and what is intended, or between

what happens and what was aimed at or what was ex-

pected. "Mr. Cruncher had no particular meaning in

these sulky corroborations, but made use of them...to

express general *ironical* dissatisfaction" (*Dickens*). "How

his [Fielding's] *ironic* lightning plays Around a rogue

and all his ways!" (*Dobson*). "How exquisitely *ironic* is

the entertainment we can derive from our disillusion!"

(*L. P. Smith*). "*Ironically* enough, it was Boston and

Cambridge that grew to seem provincial, while the local

and even parochial Concord mind...proved to be also

national" (*Van W. Brooks*). A person or, more often, a

person's smile, expression, or words may be described as

sardonic when he or it manifests scorn, mockery, and

derision or sneering malignancy. "A *sardonic* smile, such

as Alexander von Humboldt used to have when he

contemplated the late King of Prussia's missionary

deaconesses" (*Arnold*). "He would sometimes, with

ironic deference, send to borrow a rod of the Under

Master, and then, with *sardonic* grin, observe to one of

his upper boys 'how neat and fresh the twigs looked' "

(*Lamb*). "The immortal Charles Critchlow came to the

funeral, full of calm, *sardonic* glee, and without being

asked" (*Bennett*).

Ana. Biting, cutting, trenchant, *incisive: *caustic,

scathing, mordant, mordacious.

sardonic or sardonical. Ironical, satirical, *sarcastic.

Ana. *Bitter, acrid: deriding or derisive, mocking,

taunting, ridiculing (see corresponding verbs at **RIDI-**

CULE): *sinister, malign.

sate, *v.* *Satisfy, surfeit, cloy, pall, glut, gorge, surcharge.

Ana. *Satisfy, content: *indulge, pamper, humor:

gratify, regale, arride (see **PLEASE**).

satellite. *Follower, adherent, henchman, partisan, disciple, sectary.

Ana. Sycophant, *parasite, favorite, toady, lickspit, hanger-on: devotee, votary, *addict, fan.

satiate. *Satiate, sate, surfeit, cloy, pall, glut, gorge, surcharge* come into comparison chiefly as transitive, but often as intransitive, verbs meaning to fill or become filled to the point of repletion. Both *satiate* and *sate* have been, but are now less often, used in the sense of merely to satisfy completely (as, "I will *satiate* the soul of the priests with fatness"—*Jeremiah xxxi. 14*; "and my soul procure Wherewith to *sate* its malice"—*Shelley*): both terms, but especially *satiate*, now usually imply an overfilling or an overfeeding so that there is no longer any pleasure in that which had once pleased or seemed desirable. "Addison . . . had himself not above three or four notes in poetry, sweet enough, indeed, like those of a German flute, but such as soon tire and *satiate* the ear" (*Gray*). "The ordinary Roman . . . *satiated* alike with the fervours of the democrats and the rigidity of the conservatives" (*Buchan*). "I wondered even then if a few common words of explanation, a few sober words of promise, would not have satisfied the crowd, already *sated* with eloquence" (*A. Repplier*). *Surfeit* distinctly implies a feeding or supplying to excess, with consequent nausea or disgust; as, to *surfeit* oneself with sweets; to *surfeit* a person with flattery; "readers *surfeited* with the . . . wild overstatements and wild understatements of public dispute" (*C. E. Montague*). "If music be the food of love, play on; Give me excess of it, that, *surfeiting*, The appetite may sicken, and so die" (*Shak.*). *Cloy* stresses the resulting disgust or boredom more than the surfeit which induces them. "Is it [love] not . . . all oil, all sugar? Zounds! it is enough to *cloy* the sharp-set appetite of a parson" (*Fielding*). "More happy love! More happy, happy love! For ever warm and still to be enjoy'd, For ever panting, and for ever young; All breathing human passion far above, That leaves a heart high-sorrowful and *cloy'd*" (*Keats*). *Pall* differs from *cloy* only in its greater emphasis upon the loss of all power in that with which one is surfeited to challenge one's interest or attention or to whet one's appetite: the term therefore refers rather to things that tend to satiate than to the persons whose appetites or desires have been sated by such things; as, "And *pall* the sense with one continu'd show" (*Addison*); "There anguish does not sting; nor pleasure *pall*" (*Keats*); "Common-sense does *pall* on a husband sometimes" (*Deland*). *Glut*, like *surfeit*, implies excess in feeding or supplying, but it stresses the consequent overloading rather than the extinction of appetite or desire: often, also, it suggests the stimulation of a greed that knows no limits except those imposed upon it by physical necessity; as, "seeming rather *glutted* than *satiated*" (*Goldsmith*); "Some straggling Cossacks from the town . . . *glutted*, but not *sated*, with blood" (*Jane Porter*). *Glut* may be used also in reference to impersonal things, implying merely an overloading, and carrying no suggestion of greed or satiation; as, the market is *glutted* with industrial bonds; his works *glut* the counters of the book stores. *Gorge* usually implies the stimulation of greed, but it distinctively suggests a glutting to the point almost of choking or bursting: the term therefore often, but far from always, implies the frustration of that greed; as, to *gorge* oneself with chocolate; "Dick fell upon eggs and bacon and *gorged* till he could *gorge* no more" (*Kipling*); "Heaven can *gorge* us with our own desires" (*Defoe*). *Surcharge* often implies a gorging, a glutting, or a surfeiting, but it carries a stronger implication than any of these terms of a consequent weighing down or oppressing. The term, however, is used less often

with reference to persons than to things, though it is still frequently employed figuratively in reference to a person's heart or mind; as, a heart *surcharged* with grief; cares that *surcharge* his mind with worry; "till his spirit sank, *Surcharged*, within him" (*Wordsworth*). When the reference is to things, *surcharge* usually implies an excess of something that disturbs the balance, vitality, freshness, or the like, of the thing affected; as, warm air *surcharged* with moisture; his blood is *surcharged* with tetanus toxin.

Ana. *Satisfy, content: pamper, humor, *indulge: gratify, regale, arride (see PLEASE).

satiny, satin. Silky, silken, velvety, glabrous, glossy, *sleek, slick.

satire. Irony, *wit, humor, sarcasm, repartee.

Ana. Raillery, persiflage, *badinage: lampoon, pasquinade, *libel, skit: ridiculing or ridicule, deriding or derision, taunting (see corresponding verbs at RIDICULE).

satirical or satiric. Ironical, sardonic, *sarcastic.

Ana. *Pungent, piquant, poignant: ridiculing, deriding or derisive, taunting, mocking (see corresponding verbs at RIDICULE): mordant, mordacious, *caustic, scathing.

satisfied. Content (see under SATISFY).

Ana. Gratified, gladdened, pleased (see PLEASE): appeased, pacified (see PACIFY).

satisfy. 1 *Satisfy, content* come into comparison as meaning to appease one's desires or longings. The same distinctions in implications are also found in their corresponding adjectives *satisfied* and *content* (or *contented*). *Satisfy* implies full appeasement not only of one's desires or longings but also of one's needs, requirements, or the like; as, walks that *satisfy* one's wish for exercise; he was always ready to *satisfy* every one of her desires. "[Bishop Vaillant] was summoned to Rome to explain his complicated finance before the Papal Court,—and he had very hard work to *satisfy* the Cardinals" (*Cather*). *Content* implies appeasement to the point where one is not disquieted or disturbed by a desire for what one does not have, even though every wish is not fully gratified; as, "When I was at home, I was in a better place: but travellers must be *content*" (*Shak.*); "my own garden must *content* me this year" (*Quiller-Couch*). "I was sure . . . they would both be . . . *satisfied* with life, Jane because she would get what she wanted, Clare because she would be *content* with little" (*R. Macaulay*).

Ana. Gratify, gladden, *please: appease, *pacify: *satisfate, sate.

Ant. Tantalize.

2 Recompense, compensate, requite, remunerate, repay, *pay, reimburse, indemnify.

Ana. Balance, *compensate, offset.

3 *Satisfy, fulfill* (or *fulfil*), *meet, answer* come into comparison when they mean to measure up to a condition, a need, a claim, a hope, and the like. They are seldom interchangeable, however, without loss of precision or expressiveness or without violation of idiom. *Satisfy*, as here narrowly interpreted, is used chiefly in reference to things (or persons considered impersonally) which are submitted to a test, such as a condition, a requirement, or a hypothesis, and found to be such in constitution or makeup as not to fall short. "There is one condition that a lyric ought to *satisfy*; it ought to pass the test of being read aloud" (*Binyon*). "He will *satisfy* Newman's famous definition of a gentleman as one who never inflicts pain" (*C. E. Montague*). *Fulfill* usually connotes more than adequacy, or richness and fullness of measure; also, that which is *fulfilled* is not determined by something calculable but by something indefinite or immeasurable, as expectations, hopes, desires, needs, and the like; as, a son seldom *fulfills* his father's hopes; the trip *fulfilled* all

the claims made for it. **Meet** implies exact agreement with that which is the test or measure, and therefore usually connotes mathematical equivalence; thus, "the new machine *meets* expectations" is slightly more tempered praise than, "the new machine *fulfills* expectations"; the supply *meets* the demand; the estate is not large enough to *meet* the claims against it. **Answer** usually, but not necessarily, implies even more moderation in praise than *meet*; while it does not imply dissatisfaction, it seldom connotes complete content; as, this knife will *answer* the purpose; his rating *answered* his parents' expectations.

Ana. *Prove, test, try, demonstrate: verify, substantiate, corroborate, *confirm: *match, equal, rival, approach, touch.

saturate. 1 *Soak, steep, impregnate, drench, sog, sop, ret, waterlog.

Ana. *Dip, immerse, submerge: *absorb, imbibe, assimilate.

2 Impregnate, interpenetrate, impenetrate, penetrate, *permeate, pervade.

Ana. *Infuse, imbue, ingrain, inoculate: penetrate, pierce, probe (see ENTER).

saturnine. Dour, gloomy, *sullen, glum, morose, surly, sulky, crabbed.

Ana. Grave, *serious, solemn, staid: taciturn, reserved, uncommunicative, *silent.

Ant. Genial: mercurial.

saucy. **Saucy, pert, arch** come into comparison, in spite of widely different implications, when they agree in meaning flippant and bold rather than serious and respectful in one's manner or attitude. **Saucy** originally stressed insolence or impertinence to superiors, especially as shown in offensive speech: in modern use it is not always so strongly derogatory, though it still implies lack of proper respect; as, a *saucy* pupil; a *saucy* retort. Usually it also implies piquancy and levity, with a hint of smartness or of amusing effrontery. "A little *saucy* rose-bud minx can strike Death-damp into the breast of doughty king" (*Browning*). Sometimes it is applied also to birds and small animals on similar grounds; as, "some *saucy* puppies on their hind legs" (*Ruskin*); "a robin, playing among the moss tufts in the live oak, broke into a *saucy* little song" (*R. Bradford*). It is also applicable to troops (regiments, battalions, etc.), to ships, and the like, that present a brave, smart, and more or less pugnacious appearance; as, the *Saucy Sixth* (The Royal Warwickshire Regiment); "Tight and *saucy*—tight and *saucy*, Trim's the ship we hail from" (*W. C. Bennett*). **Pert** implies a saucy freedom that savors of presumption or affectation rather than of insolence. "A *pert* jack-anapes, full of college petulance and self-conceit" (*Smollett*). "A little upstart, vulgar being... with all her airs of *pert* pretension" (*Austen*). In some contexts the word carries additional implications found in its other senses, such as of cleverness, sprightliness, or the like. "A little, upright, *pert*, tart, tripping wight" (*Burns*). **Arch** usually implies roguish audacity or mischievous mockery, and often, when applied to women, carries a hint of coquettishness. "Elizabeth... at the first convenient pause, turned to him with an *arch* smile, and said—'You mean to frighten me, Mr. Darcy, by coming in all this state to hear me?' " (*Austen*). "'Conceive an Island peopled by Women, and but one Man in their Society.... Hem!' and the Aphorist looked *arch*. 'What course of treatment might that one Man anticipate at their hands?' " (*Meredith*).

Ana. Flippant, frivolous, volatile, light-minded (see corresponding nouns at LIGHTNESS): intrusive, obtrusive, meddlesome, *impertinent: brash, impudent

(see SHAMELESS): piquant, snappy (see PUNGENT). **saunter.** **Saunter, stroll, amble** agree in meaning to walk slowly and more or less aimlessly, especially in the open air. **Saunter** suggests a leisurely pace and an idle and carefree mind; as, "*sauntering* about the streets, loitering in a coffeehouse" (*Fielding*). **Stroll** differs from *saunter* chiefly in its implications of an objective, such as sight-seeing, exercise, or the like, pursued without haste and with wandering from one place to another. "Then we *strolled* For half the day thro' stately theatres" (*Tennyson*). "The notables of the town... *stroll* past with the dignity of Roman senators" (*A. Huxley*). **Amble** occasionally conveys the same implications as *saunter* or, sometimes, *stroll*, but it far more often suggests merely an easy, effortless gait comparable to that of an ambling horse. In older use, it usually was applied to dancing, especially to formal step dancing; as, "you jig, you *amble*, and you lisp" (*Shak.*); in modern English, it sometimes connotes slow mincing steps and at other times, a casual, jaunty gait.

savage, adj. 1 *Fierce, ferocious, barbarous, inhuman, cruel, fell, truculent.

Ana. Implacable, relentless, unrelenting, merciless, *grim: rapacious, *voracious, ravenous.

Con. Gentle, mild, lenient (see SOFT): humane, benevolent, *charitable.

2 Barbarous, *barbarian, barbaric.

Ana. Primitive, primeval (see PRIMARY): *rough, harsh: untaught, untutored, *ignorant.

Con. *Tame, submissive, subdued: civilized, cultured (see corresponding nouns at CIVILIZATION).

save, v. 1 Deliver, redeem, *rescue, ransom, reclaim.

Ana. *Free, release, liberate, emancipate: *defend, protect, shield, guard, safeguard: *recover, retrieve, recoup, recruit.

Ant. Lose: waste: damn (*in theology*).

2 **Save, preserve, conserve** come into comparison as meaning to keep free or secure from injury, decay, destruction, or loss. **Save** may imply measures taken to protect something from danger of loss, injury, or destruction (as, to *save* one's papers by keeping them in a vault; "All I pray is that this young child may be *saved* from him"—*Meredith*) but, more often, it suggests rescue or delivery from a dangerous situation, especially one which means death or destruction; as, to *save* a child from drowning; the house was *saved* from the fire; "The souls I could not *save*" (*Housman*). **Preserve** stresses the idea of resistance to destructive agencies and hence implies the use of means to keep something in existence or intact; as, old records are *preserved* by protecting them from light and moisture; fruits are *preserved* by heating which destroys bacteria and by the addition of sugar; meats are *preserved* by curing or refrigeration; wood is impregnated with creosote to *preserve* it. "Constitutions are intended to *preserve* practical and substantial rights, not to maintain theories" (*Justice Holmes*). **Conserve**, on the other hand, suggests keeping sound and unimpaired, and implies the use of means to prevent change, loss, or depletion; as, a convalescent must *conserve* his energy if he is to make rapid progress; our constitutional rights can be *conserved* only by an intelligent electorate. Consequently, *conserved* fruits (*conserves*) are sometimes (not invariably) distinguished from all other kinds of preserved fruits (*preserves*), as those which are prepared by a process intended to retain the original color, shape, and flavor of the fruits.

Ana. *Have, hold, own, possess, enjoy: *keep, retain, reserve.

Ant. Spend: consume.

savoir-faire. Poise, *tact, address.

Ana. Grace, dignity, *elegance: ease, *readiness, dexterity, facility: self-possession, self-assurance, aplomb, *confidence.

Con. Awkwardness, clumsiness, ineptness, maladroitness, gaucherie (see corresponding adjectives at **AWKWARD**).

savor or savour, n. 1 *Taste, sapidity, flavor, tang, relish, smack.

2 *Atmosphere, feeling, feel, tone, aura.

Ana. *Quality, property, character, attribute: peculiarity, individuality, characteristic, distinctiveness (see corresponding adjectives at **CHARACTERISTIC**): *impression, impress, print, stamp.

savory or savoury. *Palatable, appetizing, sapid, saporous, tasty, toothsome, flavorsome, relishing.

Ant. Bland (*to taste*): acrid (*in taste and smell*).

saw, n. *Saying, maxim, adage, proverb, motto, epigram, aphorism, apothegm.

saying. **Saying, saw, maxim, adage, proverb, motto, epigram, aphorism, apothegm,** agree in denoting a sententious expression of a general truth. A **saying** is a brief current or habitual expression of whatever form. "The saying is true, 'The empty vessel makes the greatest sound'" (*Shak.*). A **saw** is an oft-repeated, and now usually ancient, saying. "Full of wise *saws* and modern instances" (*Shak.*). A **maxim** is a rule or precept sanctioned by experience, and relating especially to the practical concerns of life; as, Benjamin Franklin was the author of many *maxims* such as "early to bed and early to rise, Makes a man healthy, wealthy, and wise." "The difference between principles as universal laws, and *maxims* of conduct as prudential rules" (*Crabb Robinson*). An **adage** is a saying given credit by long use and general acceptance. "If there is verity in wine, according to the old *adage*" (*Thackeray*). A **proverb** is an adage couched, usually, in homely and vividly concrete or figurative phrase. "Accused (in the phrase of a homely proverb) of being 'penny-wise and pound-foolish'" (*Speculator*). A **motto** is usually a maxim or moral aphorism adopted by a person, a society, or an institution as a guiding principle or as a statement of an aim or ideal. "William of Wykeham's old motto that 'Manners makyth Man'" (*Quiller-Couch*). The last three terms, **epigram, aphorism,** and **apothegm** commonly imply known authorship and a conscious literary quality. An **epigram** gets its effectiveness from its terseness and a witty turn of phrase; it characteristically presents a paradox or a cleverly pointed antithesis, as in Pope's "The right divine of kings to govern wrong." "What is an *Epigram*? A dwarfish whole. Its body brevity, and wit its soul" (*Coleridge*). An **aphorism** is a pithy epigram that gives food for thought. "When Mark Twain utters such characteristic *aphorisms* as 'Heaven for climate, hell for society'" (*Van W. Brooks*). An **apothegm** is a sharply pointed and often startling aphorism such as Johnson's remark, "Patriotism is the last refuge of a scoundrel."

scabrous. *Rough, harsh, uneven, rugged.

Ant. Glabrous: smooth.

scald or skald, n. *Poet, versifier, rhymer, rhymester, poetaster, bard, minstrel, scop, gleeman, jongleur, troubadour, troubère, minnesinger.

scale, n. More often in plural form, **scales.** *Balance.

scale, v. Climb, mount, *ascend.

scan. *Scrutinize, examine, inspect, audit.

Ana. *Consider, study, contemplate: observe, survey, remark, notice (see **SEE**).

scandal, n. 1 *Offense, sin, vice, crime.

Ana. Indignity, insult, *affront: offending or offense.

outraging or outrage (see corresponding verbs at **OFFEND**): wrong, grievance, injury, *injustice.

2 *Disgrace, dishonor, disrepute, shame, infamy, ignominy, opprobrium, obloquy, odium.

Ana. Reproaching or reproach, rebuking or rebuke (see corresponding verbs at **REPROVE**): reflection, stricture (see **ANIMADVERSION**).

3 *Detraction, calumny, slander, backbiting.

Ana. Gossiping or gossip, tattling (see corresponding verbs at **GOSSIP**): maligning, defaming or defamation, traducing (see corresponding verbs at **MALIGN**).

scanning. Scrutiny, examination, inspection, audit. See under **SCRUTINIZE**.

Ana. Study, application, *attention, concentration: *oversight, supervision, surveillance: analysis, dissection (see under **ANALYZE**).

scant. Scanty, skimpy, scrimpy, *meager, exiguous, spare, sparse.

Ana. *Deficient, defective: scarce, rare, *infrequent: insufficient, inadequate (see affirmative adjectives at **SUFFICIENT**).

Ant. Plentiful: profuse.

scanty. Scant, skimpy, scrimpy, *meager, exiguous, spare, sparse.

Ana. Insufficient, inadequate (see affirmative adjectives at **SUFFICIENT**): *deficient.

Ant. Ample, plentiful: profuse.

scarce. Rare, uncommon, *infrequent, occasional, sporadic.

Ana. *Deficient: insufficient, inadequate (see affirmative adjectives at **SUFFICIENT**): curtailed, abridged, shortened (see **SHORTEN**).

Ant. Abundant.

scarcely. *Hardly, barely.

scare, v. Alarm, *frighten, fright, terrify, terrorize, startle, affray, affright.

Ana. Daunt, appall, *dismay: *intimidate, cow, browbeat: astound, amaze, flabbergast, astonish, *surprise.

Ant. Entice.

scathing. *Caustic, mordant, mordacious, acrid.

Ana. Scorching, searing, burning (see **BURN**): *fierce, ferocious, truculent, savage: *incisive, biting, cutting, trenchant.

scatter. Scatter, disperse, dissipate, dispel come into comparison when they mean to cause a group, mass, assemblage, or the like to separate or break up. Scatter may imply the use or operation of force which drives the persons or things in different directions; as, the hurricane scattered the ships of the fleet; the heavy assault scattered the troops; the wind scattered the leaves. On the other hand, scatter may imply little more than throwing or casting so that the things thrown will fall where (or as if where) they will; as, to scatter pennies; to scatter seeds; to scatter rugs. Disperse usually implies a wider separation of the units than scatter and a complete breaking up of the mass or assemblage; as, the rain quickly dispersed the crowd; "In a few years, the Bureau was dismembered, its staff dispersed" (*V. Heiser*); "A sea where all the ships in the world might be so dispersed as that none should see another" (*Cowper*). Dissipate suggests definitely the idea of complete disintegration or dissolution, as by evaporation, crumbling, squandering, or the like, and consequent vanishing; thus, the sun dissipates (that is, causes to evaporate) the mist; to dissipate one's energy in futile efforts; "[the aesthetic instinct] which . . . may restrain the excesses of the possessive instinct and dissipate the perils which threaten civilisation" (*H. Ellis*); "Denzil had a small patrimony . . . that he

dissipated before he left college" (*Meredith*). *Dispel* carries less suggestion of separation of units or particles than any of these words but it stresses a driving away as if by scattering, of that which clouds, confuses, bothers, or the like; as, the rising sun *dispelled* the darkness; to *dispel* doubts. "A blind man whose darkness no street lamp can *dispel*" (*Shaw*). "Truth and frankness *dispel* difficulties" (*B. Russell*).

Ana. *Throw, cast, fling, toss: *distribute, dispense, divide: *discard, shed, cast.

Con. *Accumulate, amass, hoard: collect, *gather, assemble: *compact, concentrate.

scent, n. 1 *Smell, odor, aroma.

Ana. Emanation, issuing or issue (see corresponding verbs at **SPRING**).

2 *Fragrance, perfume, incense, redolence, bouquet.

sceptic. Variant of **SKEPTIC**.

scepticism. Variant of **SKEPTICISM**.

schedule, n. 1 *List, table, catalogue, register, roll, roster, rota, canon, inventory.

2 *Program, timetable, agenda.

scheme, n. 1 *Plan, design, plot, project.

Ana. *Proposal, proposition: arrangement, ordering (see corresponding verbs at **ORDER**): *device, contrivance: expedient, shift, makeshift (see **RESOURCE**).

2 *System, organism, economy, network, complex.

Ana. Organization, arrangement, ordering (see corresponding verbs at **ORDER**): whole, total, *sum.

scheme, v. Plan, design, plot, project. See under **PLAN, n.**

Ana. Propose, purpose, *intend: *aim, aspire: manipulate, *handle, swing, wield.

schemer. See under **PLAN, n.**

schismatic, n. *Heretic, sectarian, dissenter, non-conformist.

scholar. **Scholar, pupil, student, disciple** come into comparison when they denote one who studies under a teacher. **Scholar** stresses enrollment in a school (now especially, except in its specific senses, in an elementary school, a Sunday school, or the like) and therefore tuition and instruction; as, the school has five hundred *scholars*; an opportunity open to all of our *scholars*. But *scholar* is specifically applied to one who is enrolled in a college or university and holds a scholarship, or an allowance that is granted to enable him to prosecute his studies; as, *Rhodes scholars* at Oxford. **Pupil** suggests more strongly than *scholar* the teacher's personal care or oversight; it therefore may be used not only of those in school but of learners studying privately under a teacher; as, he takes *pupils* in subjects required for college entrance; she has ten *pupils* to whom she gives instruction in music; the teacher found her *pupils* exceedingly restless that day. **Student**, though generally applicable to anyone who studies or who loves to study, is, as here considered, the general term for anyone who attends a higher institution of learning such as a technical school, a college, or a university; as, the number of *students* in the college; a college *student*; *student* life. **Disciple**, largely if not entirely through the influence of the Biblical sense (as, a *disciple* of Jesus [see **FOLLOWER**]) has never been much used in English in its etymological sense of *pupil*. It occurs occasionally chiefly in reference to ancient times or in humorous use, but even then with some connotation of devoted adherence to the teachings of the master. "The true teacher defends his *pupils* against his own personal influence.... He will have no *disciple*" (*Bronson Alcott*).

scholarly. *Learned, erudite, polymathic.

Ana. Academic, scholastic, *pedantic: abstruse, *recondite: accurate, exact, precise (see **CORRECT**).

scholarship. Learning, erudition, *knowledge, science, information, lore.

scholastic. Academic, *pedantic, bookish.

Ana. *Conversant, versed: *dry, arid: formal, conventional (see **CEREMONIAL**).

school, n. *Flock, herd, drove, pack, bevy, covey, gaggle, flight, swarm, shoal.

school, v. Discipline, train, *teach, instruct, educate.

Ana. *Practice, exercise, drill: *guide, lead: *conduct, control, direct, manage.

science. 1 *Knowledge, learning, erudition, scholarship, information, lore.

2 *Art.

scintillate. *Flash, gleam, glance, glint, sparkle, glitter, glisten, coruscate, glimmer, shimmer, twinkle, glister, spark.

scoff, v. **Scoff, jeer, gibe, jibe, flier, gird, sneer, flout** are here compared as meaning to manifest one's scorn or contempt in derision or mockery. **Scoff** stresses insolence, irreverence, lack of respect, or incredulity as the motives for one's derision or mockery; as, "It is an easy thing to *scoff* at any art or recreation; a little wit mixed with ill nature, confidence, and malice, will do it" (*Walton*); "Fools, who came to *scoff*, remained to pray" (*Goldsmith*); "In jesting mood his comrades heard his tale, And *scoffed* at it" (*Amy Lowell*). **Jeer** carries a stronger implication of derisive laughter and of loud railery than *scoff*: it usually connotes a coarser and more vulgar or, at least, a less keenly critical attitude than *scoff*; as, "Tindal and Toland, prompt at priests to *jeer*" (*Pope*); "inclined to *jeer* at those slightly older than himself who show any tendency to abandon the—to him—rational preoccupations of childhood" (*J. W. Krutch*). **Gibe** (or less often, in this sense, *jibe*) stresses taunting, often in derisive sarcasm, sometimes in good-natured railery; as, "you ... with taunts Did *gibe* my missive out of audience" (*Shak.*); "Richardson... is always *gibing* at Fielding" (*L. Stephen*). "After one of her visitations you *gibed* each other good-naturedly over the extent to which you found yourself shifted from the firm ground of reasoned conclusion" (*M. Austin*). **Flier** throws the emphasis upon derisive grins, grimaces, and laughs rather than on utterances; as, "[They] look like two old maids of honor got into a circle of *fleering* girls and boys" (*Gray*); "the *fleering* rabble" (*Stevenson*); "He listened with a *fleering* mouth to his father's long dogmatic grace before meat" (*J. Hergesheimer*). **Gird** implies an attack marked by scoffing, gibing, or jeering; as, "The subprior was bidden to sing... the 'Elegy of the Rose'; the author *girding* cheerily at the clerkly man's assumed ignorance of such compositions" (*Pater*); "[Matthew Arnold] *girds* at... Herbert Spencer for substituting *Unknowable* for *God*; quite unaware that his own *Eternal*... comes to exactly the same thing as the *Unknowable*" (*T. S. Eliot*). **Sneer** carries the strongest implication of cynicism and ill-natured contempt of any of these terms: it often suggests the use of irony or satire the real purport of which is indicated by an insultingly contemptuous facial expression, tone of voice, or manner of phrasing; as, "[the critic] is always *sneering* at the simple joys of the mentally humble" (*C. E. Montague*); "People are nowadays so cynical—they *sneer* at everything that makes life worth living" (*L. P. Smith*). **Flout**, which is more often used transitively than intransitively, may imply any of the actions suggested by the preceding terms, but it carries a heightened implication not only of disdain and contempt but of refusal to heed or of a denial of a thing's truth or power; as, "That bids him *flout* the Law he makes, That bids

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

him make the Law he *flouts*" (*Kipling*); "no form of Christianity which *flouts* science is in the true line of progress" (*Inge*); "The women pointed and *flouted* at her" (*Besant & Rice*). "It seems incredible that any nation in the world should have *flouted* another nation so contemptuously as Prussia *flouted* us when we tried the unaccustomed rôle of conciliation" (*A. Repplier*).

Ana. *Ridicule, deride, mock, taunt: scorn, disdain, scout, contemn, *despise.

scold, n. Shrew, vixen, termagant, *virago, amazon, barge.

scold, v. Scold, upbraid, rate, berate, tongue-lash, jaw, bawl out, wig, rail, revile, vituperate agree in meaning to reproach, reproach, or censure angrily, harshly, and more or less abusively. **Scold**, the term most common in ordinary use, usually implies a rebuking in a mood of irritation or ill temper, with or without sufficient justification; as, his father *scolded* him for staying out late; "[she] began *scolding* one of her daughters. 'Don't keep coughing so, Kitty, for Heaven's sake! Have a little compassion on my nerves'" (*Austen*); "he was harshly and openly anxious about him [his orphaned nephew]. He *scolded* Miss Hannah because he was pale" (*Deland*). **Upbraid**, which is decreasingly found in colloquial speech, in precise use stresses reproaching or censuring on more definite grounds than *scold* does: it, therefore, usually suggests justification or justifiable anger; as, the judge *upbraided* the parents for the petty thieving of their children; "Afterward he [the risen Christ] appeared . . . and *upbraided* them with their unbelief and hardness of heart" (*Mark* xvi. 14). "I think he'd meant to *upbraid* me for sneaking off, but he didn't" (*Cather*). **Rate** and the more common **berate** usually imply more or less prolonged, angry, and sometimes abusive, scolding either in censuring or in reprimanding; as, "the voice continued violently *rating* me" (*Hudson*); "Hearing Ed Hall *berate* a farmer who doubted the practicability of the machine" (*S. Anderson*). Fairly close synonyms of *rate* and *berate* are the expressive **tongue-lash** (commonly found as a verbal noun in *-ing*) which stresses the punitive effect on the person berated (as, to suffer from a fifteen-minute *tongue-lashing*) and the slang terms **jaw**, **bawl out** (chiefly American), and **wig** (chiefly British), which emphasize the noisy ranting which usually attends a berating (as, "I have been *jawed* for letting you go"—*Marryat*, "You'll get *bawled out* when you pull a boner"—*C. Mathewson*; "a subordinate . . . who presumably had been severely '*wigged*' by his chief"—*The Times*). **Rail**, normally an intransitive verb, but followed by *at*, *against*, or rarely, *on* or *upon* when the person or thing berated is named, carries a more definite implication of either abusive or scoffing language than *rate* or *berate*; as, "David sent messengers . . . to salute our master; and he *railed* on them" (*1 Samuel* xxv. 14); "Enemies . . . *rail* at him for crimes he is not guilty of" (*Junius*); "Too often *rails* to gratify his spleen" (*Couper*); "And the couples *railed* at the chant and the frown of the witchmen lean, and laughed them down" (*V. Lindsay*). **Revile** carries a much stronger implication of abusive, scurrilous language than *rail* does, but little, if any, suggestion of scoffing: often, also, it implies deliberate vilification; as, "they that passed by *reviled* him, wagging their heads" (*Matthew* xxvii. 39); "she roundly abused the tobacco which she was then smoking, *reviled* all Brahmins" (*Kipling*); "Her tenants, who have to earn the money she spends abroad . . . *revile* her as a fugitive and an absentee" (*Shaw*). **Vituperate** implies more violence in the censure and in the method of attack than does *revile*, but otherwise they are close synonyms; as, "he *vituperated* from the pulpit the vices of the court"

(*Froude*); "The last image that crossed his mind was Sir James with his angry face and his trembling hands *vituperating* him" (*Arch. Marshall*).

Ana. Reprehend, reprobate, censure, blame, *criticize: reproach, reprimand, *reprove, rebuke, admonish, chide: *execrate, objugate.

sconce. *Penalize, fine, amerce, mulct.

scoop, v. *Dip, lade, bail, ladle, spoon, dish.

scop, n. Bard, minstrel, *poet, versifier, rhymer, rhymester, poetaster, gleeman, jongleur, troubadour, trouvère, minnesinger, scald.

scope. *Range, reach, compass, sweep, gamut, radius, ken, purview, horizon, orbit.

Ana. *Expanse, amplitude, spread, stretch: *field, domain, sphere, territory, province: extent, area, *size.

scorch, v. *Burn, char, scar, singe.

Ana. *Wither, shrivel, rivel.

scorn, n. Disdain, contempt, despite. See under **DESPISE**. **Ana.** Superciliousness, insolence, disdainfulness (see corresponding adjectives at **PROUD**): scoffing, flouting, jeering, gibing (see **SCOFF**): deriding or derision, ridiculing or ridicule, taunting, mocking or mockery (see corresponding verbs at **RIDICULE**).

scorn, v. Disdain, scout, *despise, contemn.

Ana. Repudiate, spurn, reject (see **DECLINE, v.**): flout, *scoff, jeer, gibe: deride, mock, taunt, *ridicule.

Scotch, adj. **Scotch, Scottish, Scots** as adjectives meaning of, belonging to, derived from, or characteristic of Scotland or of its people are not always used with fixed differences in implications or applications, but within the past century or less there has been a perceptible movement toward establishing certain differences in good usage. Similar tendencies also show themselves in the employment of these terms as nouns. The oldest form of the adjective in English is *Scottish*; the oldest in Scottish is *Scots* (*Scottis*); *Scotch* dates from about 1570. **Scotch**, though the most recent of these terms, is the one most widely used outside of Scotland, especially in colloquial language. On the whole, the term is now avoided in literary use in England and America except in such phrases or collocations as are generally accepted as idioms indicating origin or use in Scotland (as, *Scotch whisky*; *Scotch tweeds*; a *Scotch verdict*; a *Scotch mile*; a *Scotch acre*) or as proper nouns or as names of species, types, dishes, or the like, having a real or a fancied connection with Scotland (as, *Scotch Baptist*; *Scotch crocus*; *Scotch whist*; *Scotch dumpling*). **Scottish** is now used in Scotland almost to the exclusion of *Scotch* except in the phrases noted or when *Scots* is preferred. In general, the same holds true with reference to precise literary use in England and America, but there is still evident in these countries a tendency to prefer *Scotch* where *Scottish* might seem an affectation or would not be euphonious; as, *Scotch* (rather than *Scottish*) lassies; the children have a *Scotch* (rather than a *Scottish*) nurse. When there is implied a clear opposition to or distinction from *English, Welsh, Irish*, or the like, *Scottish* is the customary term in these countries; as, the *Scottish Church*; the *Scottish Episcopal Church*; the *Scottish* poets; the *Scottish School* (of philosophers); *Scottish* literature; the *Scottish* character. Within a century, more or less, persons of Scottish birth or extraction have increasingly manifested a preference for *Scots* and now incline to use it in place of *Scottish* as well as of *Scotch*; as, "He thought *Scots* games inferior to southern sports" (*Buchan*); a *Scots mile*; *Scotsmen* (rather than *Scottmen* or *Scottish men*). Elsewhere, especially in England, this preference for *Scots* has been accepted only in certain phrases where the distinction from that which is English is highly important;

thus, a pound *Scots* is distinguished from a pound Sterling; *Scots* law is distinguished from English and Roman law.

The differences in the use of these terms as nouns do not proceed from their use as adjectives. *Scot* is the preferred term for an individual. *Scotch* usually names the people known as *Scotchmen* and *Scotsmen*, but *Scotch* is sometimes applied to the dialect or dialects of English spoken by this people; as, the *Scotch*, according to Professor Ripley, comprise three ethnic types; "which is to say, in plain *Scotch*, the gallows" (*Scott*). *Scottish* may apply to both the language and to the people, but the latter use is now comparatively rare, *Scotch* being the most widely accepted designation of the people. In Scotland *Scots* is preferred to *Scottish* as the name of the language.

Scotch, *n.* Scottish, Scots. See under SCOTCH, *adj.*

Scots, *adj.* *Scotch, Scottish.

Scots, *n.* Scotch, Scottish. See under SCOTCH, *adj.*

Scottish, *adj.* *Scotch, Scots.

Scottish, *n.* Scotch, Scots. See under SCOTCH, *adj.*

scout, *n.* *Emissary, spy, intelligencer, secret-service agent, secret agent.

scout, *v.* Scorn, *despise, contemn, disdain.

Ana. Flout, *scoff, sneer, jeer: deride, taunt, mock, *ridicule.

scowl, *v.* *Frown, glower, lower, gloom.

Ana. Glare, stare, *gaze.

scram. Retire, withdraw, clear out, *go, leave, depart, quit.

scranny. Variant of SCRAWNY.

scrap, *v.* *Discard, junk, cast, shed, molt, exuviate, slough.

scrap, *n.* *Brawl, broil, fracas, melee, row, rumpus.

Ana. *Quarrel, altercation, squabble, wrangle: fight, affray, fray, combat (see CONTEST).

scrape, *n.* *Predicament, dilemma, quandary, plight, fix, jam, pickle.

Ana. *Difficulty, vicissitude: perplexity, bewilderment, distraction (see corresponding verbs at PUZZLE): embarrassment, discomfiture (see correspondings verbs at EMBARRASS).

scrawny or **scranny**. Skinny, lank, lanky, *lean, spare, gaunt, rawboned, angular.

Ana. *Thin, slim, slender: *meager, exiguous.

Ant. Brawny: fleshy: obese.

screen, *v.* 1 *Hide, conceal, secrete, cache, bury, ensconce.

Ana. *Defend, protect, shield, guard, safeguard: *disguise, dissemble, cloak, mask.

2 *Sift, sieve, riddle, bolt, winnow.

screw. *Wage, salary, pay, hire, stipend, fee, emolument.

scribe. *Secretary, amanuensis, scrivener, stenographer, typist.

scrimpy. *Meager, scanty, scant, skimpy, exiguous, spare, sparse.

Ana. *Thin, slight, slender, slim: niggardly, *stingy, penurious, parsimonious.

scrivener. Scribe, amanuensis, *secretary, stenographer, typist.

scruple, *n.* Demur, *qualm, compunction.

Ana. *Hesitation, hesitancy: doubt, *uncertainty, suspicion, mistrust: misgiving, *apprehension.

scruple, *v.* *Demur, balk, jib, shy, boggle, stickle, stick, strain.

Ana. *Hesitate, waver, falter, vacillate: *object, protest.

scrupulous. 1 Meticulous, punctilious, punctual, *careful.

Ana. Fastidious, particular, finical, fussy (see NICE): exact, accurate, precise (see CORRECT).

Ant. Remiss.

2 Conscientious, *upright, honest, just, honorable.

Ana. *Moral, ethical, righteous, virtuous, noble: *rigid, rigorous, strict.

Ant. Unscrupulous.

scrutinize. *Scrutinize*, *scan*, *inspect*, *examine*, *audit* agree in meaning to look at or over critically and searchingly. The same distinctions in implications and connotations are observable in their corresponding nouns **scrutiny**, **scanning**, **inspection**, **examination**, and **audit**. **Scrutinize** and **scrutiny** imply close observation and attention to minute detail. "Utamaro takes a figure from the most ordinary human life—a woman in a draper's shop *scrutinising* a piece of gauze" (*Binyon*). "We have *scrutinised* the case, but cannot say that it shows an infraction of rights under the Constitution of the United States" (*Justice Holmes*). **Scan** and **scanning** are words which have in current use almost lost their historical emphasis on close analytic observation, except with reference to poetic verse and the detection of its metrical structure. In older English it always implied close survey or close study of a thing in order to reveal its design or inward character, or to pass judgment upon it. "The great Architect Did wisely to conceal, and not divulge His secrets, to be *scanned* by them who ought Rather admire" (*Milton*). "Know then thyself, presume not God to *scan*; The proper study of mankind is man" (*Pope*). In current English, *scan* is usually employed in reference to something that is surveyed from point to point; in discriminating use it still implies careful observation or study, but in loose use it sometimes implies the opposite and suggests a cursory glancing from one point to another; thus, to *scan* the newspaper each morning may admit of either interpretation. Only a context can make the implication clear. "The more one *scans* the later pages of Mark Twain's history the more one is forced to the conclusion that there was something gravely amiss with his inner life" (*Van W. Brooks*). **Inspect** and **inspection** in general use often imply little more than a careful observation, but in legal, military, governmental, and industrial use they imply a searching scrutiny for possible errors, defects, flaws, shortcomings, or the like; as, every length of cloth is *inspected* before it leaves the factory; the health department has ruled that cattle on dairy farms be regularly *inspected*; the troops prepared for the daily *inspection*; these guns will not pass *inspection*. Hence, *inspector* now frequently implies an official status or official duties; as, an *inspector* of sanitation; factory *inspectors*. **Examine**, as here compared (see also ASK, 1), and **examination** imply a close scrutiny or investigation to determine the facts about a thing, or the real nature, character, or condition of a thing, or to test a thing's quality, validity, truth, functioning, or the like; as, the critic refused to give an opinion before he had *examined* the painting closely; the doctor sent him to the hospital for a thorough *examination*; they *examined* the house from cellar to attic before deciding to purchase it. "Could it be the intention of those who gave this power, to say that . . . a case arising under the constitution should be decided without *examining* the instrument under which it arises?" (*Ch. Just. Marshall*). **Audit**, as verb or noun, implies a searching examination of accounts in order to determine their correctness; originally, as the word etymologically implies, such accounts were presented orally, as by a steward to his master, who *examined*, or *audited* them. The word was retained when examination of books and ledgers was implied; as, an annual *audit* of the tax books; federal

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

and state examiners regularly *audit* the financial records of each bank. In its extended sense, *audit* often carries a suggestion of a final accounting, as at the Last Judgment. "The general day of account and *audit* to be made at the throne of God" (*Udall*). "When it comes to the *audit* before high heaven" (*Loues*).

Ana. *Consider, study, contemplate, weigh, revolve: *analyze, resolve, dissect, anatomize: penetrate, pierce, probe (see ENTER).

scrutiny. Examination, scanning, inspection, audit. See under SCRUTINIZE.

Ana. Investigation, research, probe, *inquiry, inquisition: surveying or survey, observing or observation, viewing or view (see corresponding verbs at SEE).

scud. Skim, shoot, sail, *fly, dart, float.

sculk. Variant of SKULK.

scum. *Foam, froth, spume, lather, suds, yeast.

scurrilous, scurrile or scurril. *Abusive, opprobrious, vituperative, contumelious.

Ana. Ribald, obscene, gross, *coarse, vulgar: insulting, outraging, offending or offensive (see corresponding verbs at OFFEND): foul, filthy, *dirty.

scurrility. *Abuse, billingsgate, invective, vituperation, obloquy.

Ana. Vilifying or vilification, maligning, traducing, calumny (see corresponding verbs at MALIGN): reviling, berating, upbraiding, rating, scolding (see SCOLD).

scurvy, adj. *Contemptible, despicable, pitiable, sorry, cheap, beggarly.

Ana. *Base, low, vile: *mean, abject.

seaman. *Mariner, sailor, tar, goby, matlow, bluejacket, rating.

sear, v. *Burn, scorch, char, singe.

season, v. *Harden, inure, acclimatize, acclimate.

Ana. *Habituate, accustom, familiarize: train, school, discipline (see TEACH): *practice, exercise, drill: *temper, anneal.

seasonable. Seasonable, timely, well-timed, opportune, *pat* come into comparison when they mean occurring or coming with peculiar appropriateness as to moment, condition, or the like. That is *seasonable* which is perfectly suited to the season or time of year (thus, *seasonable* fruits are those grown out of doors in their natural season; *seasonable* weather is the weather rightly to be expected at that time of year) or, by extension, which fits in perfectly with the needs of the moment, the character of the occasion, or the like (as, "his caution was . . . *seasonable*, and his advice . . . *good*"—*Defoe*; "[her] civility in listening to him [a suitor who had previously annoyed others by his attentions] was a *seasonable* relief to them all" (*Austen*). That is *timely* which is not only seasonable but comes or occurs at such a moment as to be of genuine value or service; as, a *timely* book; "To me alone there came a thought of grief: A *timely* utterance gave that thought relief" (*Wordsworth*); "The château is on fire; valuable objects may be saved from the flames by *timely* aid!" (*Dickens*). That is *well-timed* which is so timely as to suggest the appearance (often the actual exercise) of care, forethought, or design; as, "Their *well-timed* and rapid charge decided the conflict" (*Gibbon*); "The question was *well-timed*" (*Buchan*). That is *opportune* which fits directly into a given concurrence of circumstances or which comes, as if by accident, in the nick of time and works to the advantage of those concerned; as, they decided that the moment was not *opportune* for an uprising; the *opportune* death of the dictator prevented the collapse of peace negotiations; Blank's resignation was *opportune* for it gave Doe, who was at the point of desperation, his first chance for ad-

vancement. That is *pat* which is not only perfectly adapted to the situation or the moment but which, usually but far from invariably, comes or occurs at the very moment it is needed; as, a *pat* quotation; "Now might I [Hamlet] do it [kill Claudius] *pat*, now he is praying" (*Shak.*); "a story so *pat*, you may think it is coined" (*Cowper*); "[His presence there] had . . . the air of a miracle . . . of something pathetically and impossibly appropriate—" *pat*," as they say in the Five Towns" (*Bennett*).

Ana. Appropos, apposite, pertinent, *relevant: appropriate, happy, felicitous, apt (see FIT): welcome, grateful, gratifying (see PLEASANT).

Ant. Unseasonable.

seclusion. *Solitude, isolation.

Ana. Retirement, withdrawal (see corresponding verbs at GO): separation, parting, severing or severance (see corresponding verbs at SEPARATE).

Con. *Intercourse, communication, commerce, dealings, communion.

second, n. *Instant, moment, minute, flash, trice, jiffy, twinkling, twinkle, split second.

secondary, adj. *Subordinate, dependent, subject, tributary, succursal, collateral.

Ana. *Auxiliary, accessory, subservient, subsidiary, contributory: incidental, *accidental, adventitious.

Ant. Primary.

second-rate. Mediocre, middling, *medium, moderate, average, fair, indifferent.

secret, adj. Secret, covert, stealthy, furtive, clandestine, surreptitious, underhand, underhanded, privy, backstairs (or backstair) come into comparison when they mean done, carried on, operated, or the like, so as not to attract attention or observation. Secret, the most general of these terms and the widest in its range of application, implies a hiding or concealing or a being hidden or concealed on any grounds or for any motive, good or bad; as, "These . . . virtues are the hidden beauties of a soul, the *secret* graces which cannot be discovered by a mortal eye" (*Spectator*); "She seized a lamp . . . and hurried towards the *secret* passage" (*Walpole*); "for eighteen years a *secret* and an unaccused prisoner in the Bastille" (*Dickens*); "from being public and respectable, its [fetishism's] manifestations become *secret*, personal and slightly shameful" (*A. Huxley*). Covert applies to something that is done, as it were, under cover, and is not open or avowed; as, "a *covert* glance at her face, as he walked beside her" (*Dickens*); "a mischievous child, with an eye on the face of a *covertly* watching elder" (*H. James*); "How was she, who was as innocent as a child, to know what was the meaning of the *covert* addresses of a villain?" (*Thackeray*); "his *covert* alliance against the House of Austria" (*Belloc*). Stealthy usually suggests an intent to elude, to spy upon, or to gain one's ends without attracting attention: it is, therefore, frequently a term either of derogation or of censure, connoting deliberateness and quietness in decoying, entrapping, or otherwise deceiving; as, "murder . . . with his *stealthy* pace . . . towards his design Moves like a ghost" (*Shak.*); "the *stealthy*, prying manner common to the race [of cats]" (*N. Hawthorne*); "a series of gradual and *stealthy* encroachments on the rights of the people" (*Freeman*); the *stealthy* stalking of game or quarry. Furtive (etymologically, having the qualities of a thief) agrees with *stealthy* in suggesting an intent to escape observation, but it carries clearer suggestions of cautiousness, watchfulness, or slyness: consequently, the term not only describes movements and acts, but also faces, features, expressions, etc., which reveal these or similar characteristics; as, "The man in black, after a *furtive*

glance, did not look me in the face" (*Borrow*); "small furtive eyes" (*G. Eliot*); "They brought in the prosecutrix to give evidence. Pale, self-possessed, dressed in black, and rather comely, neither brazen nor furtive...her broad, matter-of-fact face...made on me...an impression of rather stupid honesty" (*Galsworthy*); "It would be possible for them, by breaking the law discreetly, to get all they want without discomfort; but...they...refuse to be the furtive evaders of a rule" (*A. Huxley*). **Clandestine** implies concealment, as in working out a plan, and, usually, an evil or illicit end: it commonly suggests stealthy or furtive methods or a fear lest others may know what is occurring; as, *clandestine* meetings; a *clandestine* marriage; "the *clandestine*, insidious, treacherous admirer of Maria Bertram" (*Austen*); "He had kept it to himself as if there were something *clandestine* in the plan, and discovery might prevent its execution" (*E. Wharton*); to carry on a *clandestine* trade in narcotic drugs. **Surreptitious** applies chiefly to stealthy and furtive actions, but also to emotions or desires and to concrete things which are concealed either for fear of their discovery or because one is violating a right, a law, a custom, or the like; as, "There he kept his *surreptitious* quids of tobacco, his pipe, and his small hoards" (*M. Wilkins*); "Over the paling of the garden we might obtain an oblique and *surreptitious* view" (*H. James*); to cherish a *surreptitious* liking for romantic love stories; the *surreptitious* removal of his stock by a merchant about to be forced into bankruptcy. **Underhand** and **underhanded** always carry an implication of fraud, deceit, or unfairness, in addition to that of secrecy in one's dealings or surreptitiousness in one's methods; as, "He had suspected his agent of some *underhand* dealings" (*Austen*); "I say all this to them as to you...I will have nothing *underhand*" (*Byron*); "He did not look quite like a professional gambler, but something smooth and twinkling in his countenance suggested an *underhanded* mode of life" (*Cather*). **Privy** is now archaic or poetic in the sense of *secret*, *stealthy* or *surreptitious* as in operation or methods (as, "Besides what [sheep] the grim wolf with *privy* paw Daily devours apace"—*Milton*; "That in an alley had a *privy* place"—*Wordsworth*), but the term is still often applied to the person or persons "in the secret," who are therefore, sometimes but far from always, clandestine participators (as, "She was *privy* to these manoeuvres"—*Thackeray*; "The Governments of Savoy, Spain and England were *privy* to what was toward... Richelieu was to be killed"—*Belloc*). Historically also, the term survives in such designations as "*privy* council," originally a secret council whose members were appointed by the crown as confidential advisers, and as "the king's *privy* purse," the sum of money allotted to the king of England for his private use. **Backstairs** as an adjective carries an allusion to a stairway other than the main stairway, often an inconspicuous flight of stairs by which private, as distinguished from state, visitors ascended to the apartments of the sovereign or lord, or, in smaller residences, one used by servants. The term often suggests the workings of secret or privy influences and sometimes distinctly connotes intrigue (as, "a *backstairs* influence and clandestine government"—*Burke*; "*backstairs* plots"—*L. Stephen*), but it may suggest little more than surreptitious acts, such as clandestine meetings, eavesdropping, and the like (as, *backstairs* gossip). **Ana.** *Mysterious, inscrutable, arcane: puzzling, perplexing, mystifying (see PUZZLE, v.): hidden, concealed, secreted, screened (see HIDE).

secretary. *Secretary*, *amanuensis*, *scribe*, *scrivener*, *stenographer*, *typist* come into comparison when they designate a person employed by another to do writing

or transcribing for him. The distinctions between the words are often in regard to the services actually performed, rather than the skills possessed, by the person. **Secretary** carries many more implications than those expressed in the common denotation. It implies, in addition, a relation of trust between employer and employee, as shown chiefly in handling correspondence of a confidential nature and in being given discretionary power in certain matters such as in making appointments or in permitting interviews. **Amanuensis**, *scribe* (obsolete in this sense), and *scrivener* were applied to a person who performed the duties of a secretary or of a copyist when handwriting was the means of transcription. The first and the last are now found chiefly in historical writing. **Stenographer** and *typist* primarily suggest the possession of skills; *stenographer* implies the ability to take notes in shorthand from dictation, of speeches, or of what is uttered in court proceedings, conferences, and the like; *typist*, the ability to operate a typewriter. As applied to employees, especially in an office, a stenographer is one who takes dictation in shorthand and transcribes these notes, usually in typewriting; a typist is one who copies written or printed material by means of a typewriter; thus, a *secretary* in a modern office is usually a *stenographer*, but a *typist* does not serve as a *secretary*.

secrete. *Hide, conceal, screen, cache, bury, ensconce. **Ana.** Dissemble, cloak, mask, *disguise: *remove, withdraw.

secretive. Close, close-lipped, close-mouthed, tight-lipped, *silent, uncommunicative, taciturn, reticent, reserved.

Ana. *Cautious, circumspect, wary: restrained, inhibited (see RESTRAIN).

Con. *Talkative, loquacious, garrulous, voluble: candid, open, plain, *frank.

secret-service agent, secret agent. *Emissary, spy, scout, intelligencer.

sect. *Religion, denomination, cult, communion, faith, creed, persuasion, church.

sectary. 1 Adherent, *follower, disciple, partisan, henchman, satellite.

Ana. Devotee, votary, *addict, fan.

2 Also **sectarian.** *Heretic, schismatic, dissenter, nonconformist.

Ana. *Enthusiast, zealot, fanatic, bigot.

section, n. Sector, segment, division, *part, portion, piece, detail, member, fraction, fragment, parcel.

Ana. District, *locality, vicinity: region, tract, *area, zone, belt: *field, sphere, territory.

sector. Segment, section, division, *part, portion, piece, detail, member, fraction, fragment, parcel.

secular or saecular. 1 Temporal, lay, *profane.

Ana. Worldly, mundane, *earthly, earthly, terrestrial.

Ant. Religious (as *schools, journals, authorities, etc.*): profane (as *music, drama, etc.*): regular (as *priests*).

2 **Secular (or saecular), centuried, agelong, aeonian (or eonian), diuturnal** agree in meaning enduring for or extending over ages or centuries. **Secular**, when applied to Roman games, plays, etc., means occurring once a century; in its far more common extended sense, partly scientific and partly literary, it implies a duration of several centuries; as, the *secular* contraction of the earth's crust; *secular* variations in the orbits of planets. "*Secular* oaks attired—in golden leafage" (*Symonds*). "Mankind outlives *saecular* animosities" (*Stevenson*). **Centuried**, which is not so frequent as *secular*, is not distinguishable from the latter in literary use. "This *centuried* eclipse of woe" (*Byron*). **Agelong** is the familiar word, but its implications of extent of time are vague and fluctuating.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

"The age-long processes of Nature" (J. A. Thomson). **Aeonian** is rare and poetic; like *aeon*, it connotes immeasurable duration. "The sound of streams that swift or slow Draw down *aeonian* hills" (Tennyson). **Diuturnal**, also rare but found chiefly in prose, and its derivative *diuturnity*, are sometimes used in distinction from *eternal* and *eternity* to imply a beginning or an end, or both, that coincide with time's beginning or end. "Those things, by which the Peace between us may be preserv'd entire and *diuturnal*" (Milton). "I promise myself, if not immortality, yet *diuturnity* of being read" (Lamb).

Ana. Enduring, abiding, persisting (see CONTINUE): *lasting, permanent, perpetual, perdurable, stable.

secure, *adj.* *Safe.

Ana. Firm, solid: protected, shielded, guarded, safeguarded, defended (see DEFEND): certain, positive, *sure: impregnable, unassailable, invulnerable, *invincible.

Ant. Precarious, dangerous.

secure, *v.* 1 **Secure**, anchor, moor, rivet in their extended senses are comparable because they mean to fasten or fix firmly or immovably. They are, however, not often interchangeable because of implications derived from their primary senses. One **secures** that which may get lost, or which may escape, or which may permit invasion or intrusion if allowed to remain loose or to work loose; the word usually implies care or protection as the end of the action; as, to *secure* sails (which are being tugged at by winds); to *secure* doors and windows before retiring (to keep out burglars or other intruders). "And if the fly, like my hero, shews a strength that promises to extricate him, how swiftly does she [a spider] . . . fling coil after coil about him until he is *secured* for ever!" (Shaw). One **anchors** or **moors** something (which in its very nature is unstable or which is subject to tugging or pulling by external forces or influences) to another thing strong enough to hold it down or in place or powerful enough to counterbalance or counteract the opposing forces; as, to *anchor* the cables of a suspension bridge to towers at either end; "moored to the rock on two sides, the cabin stood firm" (J. Tyndall). **Moor**, in contrast to *anchor*, usually suggests greater steadiness or an even balancing of forces that make for stability; as, a child is *moored* to his home by his need of food, care, security, and affection, but when adolescence comes, he often longs to break his *moorings*. "Why not believe then? Why not yet *anchor* thy frailty there, where man Hath *moor'd* and rested?" (Tennyson). One **rivets** one thing to another when one joins things normally or actually separate from each other as closely together as though a rivet or rivets had been driven through them; as, fear *riveted* him to his chair; "Why should I write this down, that's *riveted*, Screw'd to my memory?" (Shak.). "The head of the state, in whose name he [Agrippa] insisted that all his victories were won, to *rivet* the loyalty of the army to the civil administration" (Buchan).

Ana. Establish, *set, settle, fix: *fasten, attach, affix. 2 *Ensure, insure, assure.

Ana. Protect, *defend, safeguard, guard, shield: preserve, conserve, *save: guarantee, guaranty (see corresponding nouns at GUARANTEE): warrant, *justify. 3 Procure, obtain, *get, acquire, gain, win, earn.

Ana. Seize, *take, grasp: *reach, attain, achieve, gain: *have, hold, own, possess.

security. Surety, guaranty, *guarantee, bond, bail.

Ana. *Pledge, earnest, token, gage.

sedate. Grave, staid, earnest, sober, *serious, solemn. **Ana.** Placid, *calm, serene, tranquil: collected, composed, imperturbable (see COOL): *decorous, seemly, proper.

Ant. Flighty.

sedition. **Sedition**, **treason** come into comparison only when they mean an offense against the state to which or the sovereign to whom one owes allegiance. **Sedition** applies to any conduct that is not manifested in an overt act and that incites commotion and resistance to lawful authority without amounting to an insurrection. **Treason** applies to conduct marked by an overt act or acts that has for its aim the overthrow of the government, the death of the sovereign, betrayal to the enemy, or the like. **Ana.** *Rebellion, revolt, revolution, uprising, insurrection, mutiny, Putsch: disaffection, alienation, estrangement (see corresponding verbs at ESTRANGE). **Con.** *Fidelity, allegiance, loyalty, fealty.

seditious. Mutinous, rebellious, factious, *insubordinate, contumacious.

Ana. Traitorous, treacherous, perfidious, disloyal, *faithless: disaffected, alienated (see ESTRANGE).

seduce. Tempt, entice, inveigle, *lure, decoy.

Ana. Mislead, beguile, delude, *deceive: corrupt, debauch, deprave, pervert, *debase: bewitch, captivate, allure (see ATTRACT).

sedulous. Assiduous, diligent, industrious, *busy.

Ana. Persevering, persistent (see corresponding verbs at PERSEVERE): untiring, unwearied, *indefatigable, tireless.

see, *v.* 1 **See**, behold, descry, espy, view, survey, contemplate, observe, notice, remark, note, perceive, discern come into comparison as meaning to take cognizance of something by physical (sometimes mental) vision. **See**, the most general of these terms, may be used to imply little more than the use of the organs of vision (as, he cannot *see* the crowd, for he is blind) but more commonly it implies a recognition or appreciation of that which is before one's eyes (as, "Having eyes, see ye not? and having ears, hear ye not?"—Mark viii. 18; "They can *see* a great deal in Paris, but nothing in an English meadow"—*Jefferies*). The term may imply the exercise of other powers than the sense of sight, such as a vivid imagination (as, I can *see* her plainly now, as she looked forty years ago; "methinks I *see* my father." "Where, my lord?" "In my mind's eye, Horatio!"—*Shak.*), or mental insight (as, he was the only one who *saw* the truth), or powers of inference (as, though he appeared calm, I could *see* he was inwardly agitated). **Behold** carries a stronger implication of a definite ocular impression and of distinct recognition than *see*: it also suggests looking at that which is seen; as, "When he *beheld* the serpent of brass, he lived" (Numbers xxi. 9); "my Country's cliffs I can *behold*" (Wordsworth). **Descry** and **espy** imply a seeing in spite of difficulties such as distance, darkness, partial concealment, or the like. **Descry**, however, more often suggests an effort to discover, or a looking out for someone or something; as, "the grass was high in the meadow, and there was no *describing* her" (G. Eliot); "Sir Austin ascended to the roof. . . and *descried* him hastening to the boathouse by the river-side" (Meredith). **Espy** usually implies skill in detection as of that which is small, or not clearly within the range of vision, or is trying to escape detection; as, "the seamen *espied* a rock within half a cable's length of the ship" (Swift); "Sir Bors . . . there, half-hidden by him [Lancelot] stood, Until the King *espied* him" (Tennyson). **View** and **survey**, on the contrary, imply the seeing of that which is spread before one or which one can examine steadily or in detail. Both terms as often imply mental consideration as a literal seeing or looking over. **View** usually implies (or requires a statement of) a particular way of looking at a thing, or a particular purpose in considering it; as, to *view* the panorama with delight; to *view* a piece of property that one thinks of buying; to *view* a painting from various

angles; "View the industry of the country, and *see* how it is affected by inequality of income" (*Shaw*); to *view* a problem in all of its aspects. *Survey*, on the other hand, usually implies a detailed scrutiny or inspection by the eyes or the mind so that one has a picture or idea of it as a whole; as, "The captain *surveyed* him from cap to waistcoat and from waistcoat to leggings for a few moments" (*Hardy*); "Tony...*surveyed* the room at large, examining the various articles of use or beauty... scattered about it" (*Arch. Marshall*); "A man *surveying* Europe to-day discovers this strange anomaly: it is one great culture, yet it is at deadly issue with itself" (*Belloc*). *Contemplate*, in the looser sense in which it is here compared (see CONSIDER, 1, for stricter sense) implies little more than a fixing of the eyes upon something, sometimes in abstraction, but more often in enjoyment or in reference to some end in view; as, "He had a way of looking her over from beneath lowered lids, while he affected to be examining a glove-button or *contemplating* the tip of his shining boot" (*E. Wharton*); "She took great pleasure in *contemplating* the splendour of the gift" (*Bennett*). *Observe* and *notice* both imply a heeding and not passing over: they commonly imply seeing, but may suggest the use of another sense; as, he *observed* (or *noticed*) every detail in the arrangement; did you *notice* (or *observe* the actions of) the man who just passed us?; he *noticed* a peculiar odor. *Observe* differs from *notice*, especially in scientific use, in carrying a stronger implication of directed attention; as, "In order to get fresh light on this subject, I have *observed* my own children carefully" (*B. Russell*); "Lady Slane, keeping an ear pricked to *observe* the movements of the Viceroy and his group" (*V. Woolf*); "things which are always about us... are the easiest to *observe* with accuracy" (*Grandgent*). *Notice*, by contrast, often implies some definite reaction to that which is seen (sometimes heard, felt, or the like), such as making a mental note of it or a remark about it or, if that which is noticed is a person, recognizing him by a salute, a greeting, or the like; as, "By Mrs. Hurst and Miss Bingley they were *noticed* only by a curtsy" (*Austen*); "Who... in his rapt admiration [of a moonlight effect] omitted to *notice*... a whole quarter of the city on fire" (*Binyon*). *Remark* (see also REMARK) and *note* carry an even stronger implication than *notice* of registering mentally one's impression: though either word may or may not suggest a comment upon that which is noticed, *remark* more often than *note* carries that implication (as, "he thought the circumstance of... removing from one carriage into another might be *remarked*"—*Austen*; "I could not help *remarking* the position of her left arm"—*Quiller-Couch*). *Note*, on the other hand, suggests a recording, sometimes by a mental note, but often in writing or in speech (as, "a certain ungraciousness, *noted* in later years by his nearest colleagues"—*H. Ellis*; he carried a map and *noted* every stream and every hill that we passed). *Perceive* carries a stronger implication of the use of the mind in observation than any of the preceding terms. The word basically implies apprehension or obtaining knowledge of a thing, not only through the sense of sight but through any of the senses. It is often used in place of *see* in the literal sense of the latter word, but since it always implies distinct recognition of that which is seen, the words are sometimes used in contrast, especially by psychologists; as, an infant *sees* objects long before it is able to *perceive* them as definite persons or things; "When he drew nearer he *perceived* it to be a spring van, ordinary in shape, but singular in colour" (*Hardy*). In its richer meaning, it not only suggests dependence on other senses than that of sight, but also, usually, keen mental vision or special

insight and penetration; as, "disgusted with every person who could not *perceive*... these obvious truths" (*Bennett*); "only an old New Yorker could *perceive* the shade of difference... between being merely a Duke and being the Van der Luydens' Duke" (*E. Wharton*). *Discern*, like *descrie*, often implies little more than a making out of something by means of the eyes; as, "At length he *discerned*, a long distance in front of him, a moving spot, which appeared to be a vehicle" (*Hardy*); "sometimes we *discern* the city afar off" (*A. C. Benson*). In its more precise etymological sense, however, the term usually implies the powers of deeply perceiving and of distinguishing or discriminating that which the senses perceive; as, "Ye can *discern* the face of the sky; but can ye not *discern* the signs of the times?" (*Matthew* xvi. 3); "What is false taste but a want of perception to *discern* propriety and distinguish beauty?" (*Goldsmith*); "His grave eyes steadily *discerned* The good in men and what was wise" (*Masefield*).

Ana. *Scrutinize, scan, examine, inspect: pierce, penetrate, probe (see ENTER): *consider, study, contemplate. **2 See, look, watch** are here compared chiefly but not exclusively as intransitive verbs and only in their most general senses, as they mean to perceive something by means of the eyes. **See** (see also SEE, 1) stresses the reception of a visual impression or of visual impressions; as, he is now able to *see* clearly; to have the power of *seeing*. **Look** stresses the directing of the eyes to something or the fixing of the eyes on something in order to see it; as, if you will only *look*, you will be able to see what I am doing; he refused to *look* in the mirror the nurse gave him. **Watch** (see also TEND) implies a following of something with one's eyes, so as to observe every movement, every change, any sign of danger, any favorable opportunity, or the like; as, *watch* for a while and tell us what you *see*; to spend the night *watching* a sick friend; to *watch* something as closely as a cat *watches* a mouse.

Ana. *Gaze, gape, stare, glare.

seem. **Seem, look, appear** come into comparison when they mean to be (as stated) in one's view or judgment, but not necessarily in fact. Oftentimes they are used interchangeably with apparently no difference in meaning; as, he *seems* (or *looks*, or *appears*) tired; the students *appear* (or *look*, or *seem*) eager. But even in these phrases, *seem* suggests a personal opinion based on evidence that satisfies the judgment, such as signs easily recognized through one's familiarity with them; *look* implies that the opinion is based on a visual impression; *appear* may convey the same implication as *look*, but it sometimes suggests a distorted impression produced by an optical illusion, a restricted point of view, another's dissembling, or the like; as, nothing *seems* right when one is out of sorts; the city *looks* its worst in March; the setting sun made the spires *appear* ablaze. "His tongue... could make the worse *appear* The better reason" (*Millon*).

Ana. *Infer, gather, judge, deduce, conclude.

seeming. *Apparent, illusory, ostensible.

Ana. *Plausible, specious, credible: dissembling, disguising, masking, cloaking (see DISGUISE).

seemly. Proper, nice, comme il faut, *decorous, decent, demure.

Ana. Fitting, suitable, appropriate, meet (see FIT): congruous, compatible, congenial, consistent, *consonant.

Ant. Unseemly.

segment. Section, sector, division, *part, portion, piece, detail, member, fraction, fragment, parcel.

seize. *Take, grasp, clutch, snatch, grab.

Ana. *Catch, capture, nab, cop, snare, ensnare, trap, entrap: appropriate, confiscate, usurp, *arrogate.

select, adj. **Select, elect, picked, exclusive** come into com-

parison when they mean marked by a character or quality which distinguishes the person, the thing, or the group of persons or things so qualified from others, as in value, excellence, favor, or the like. **Select** implies that the person (or thing) has been chosen with discrimination in preference to others of the same class or kind; as, the hotel caters to a *select* clientele; "The Milton of poetry is, in his own words again, the man of 'industrious and *select* reading'" (*Arnold*). "Christ died for a *select* company that was known to Him, by name, from eternity," wrote the Reverend Samuel Willard" (*A. Replier*). **Select** is also often used, with little or no implication of choice or selection, in the sense of *superior* or *exceptional*; as, a *select* audience; "Persecution of that sort which bows down and crushes all but a very few *select* spirits" (*Macaulay*). **Elect** commonly implies careful or discriminating selection, and it carries a stronger implication than *select* of admission to some carefully restricted or inner circle: sometimes, also, it suggests the award of special privileges; as, "*Elect* according to the foreknowledge of God the Father . . . : Grace unto you, and peace" (*1 Peter* i. 2); "that delicious phantom of being an *elect* spirit . . . unlike the crowd" (*Kingsley*); "Darwin was one of those *elect* persons in whose subconscious, if not in their conscious, nature is implanted the realisation that 'science is poetry'" (*H. Ellis*). **Picked**, a somewhat more colloquial term than the others here considered, like *select* may or may not imply actual choice: the term commonly, but not invariably, applies to that which is conspicuously superior or above the average though it may suggest little more than the best available; as, a *picked* team; the candidates are all *picked* men; "the *picked* moments of exaltation and vision which great tragedy brings" (*C. E. Montague*). **Exclusive**, in its most general sense, implies a character in a thing that forces or inclines it to rule out that which is not congruous or compatible with it or that which is its opposite or antithesis in constitution or character; thus, mutually *exclusive* colors when mixed in the right proportions form a neutral gray; so, "*exclusive* concepts—animal and vegetable, for instance" (*F. Bowen*); "didacticism and a sense of humor are mutually *exclusive* qualities" (*Lowes*). As here compared and as applied especially to persons, groups, institutions, and the like, *exclusive* implies tendencies or rules which prevent free acceptance or admission or ready sharing of those (or of that) not conforming to imposed standards or not satisfying the requirements of those who are fastidious, snobbish, or otherwise highly critical; as, "a weak, critical, fastidious creature, vain of a little *exclusive* information or of an uncommon knack in Latin verse" (*C. W. Eliot*); "the *exclusive* caste-system of a rigid feudalism" (*Binyon*); "the [British] public school (meaning a very *exclusive* private school malversating public endowments) and the university" (*Shaw*). **Ana.** *Choice, exquisite, rare, delicate, dainty, recherché, superlative, surpassing, peerless, *supreme. **Ant.** Indiscriminate.

select, v. *Choose, elect, handpick, prefer, opt, pick, cull, single out.

Ana. *Assort, sort, classify: discriminate, discern (see corresponding nouns at **DISCERNMENT**).

Ant. Reject. — **Con.** Refuse, repudiate, spurn (see **DECLINE, v.**).

selection. *Choice, preference, election, option, alternative.

Ana. Choosing, culling, picking, handpicking (see **CHOOSE**): discrimination, *discernment, insight, acumen.

Ant. Rejection.

self-abnegation. *Renunciation, abnegation, self-denial.

Ana. Sacrificing or sacrifice, forbearance, forgoing, eschewal (see corresponding verbs at **FORGO**): surrendering or surrender, resignation, abandonment, relinquishment (see corresponding verbs at **RELINQUISH**).

self-assertive. Assertive, *aggressive, pushing, militant.

Ana. Obtrusive, intrusive, officious, meddlesome, *impertinent: bold, audacious (see **BRAVE**): positive, certain, *sure, cocksure.

self-assurance. Assurance, *confidence, self-confidence, aplomb, self-possession.

Ana. Coolness, collectedness, imperturbability (see corresponding adjectives at **COOL**): composure, sangfroid, *equanimity.

Con. Diffidence, shyness, bashfulness, modesty (see corresponding adjectives at **SHY**).

self-complacent. *Complacent, self-satisfied, smug, priggish.

Ana. & Con. See those at **COMPLACENT**.

self-confidence. *Confidence, assurance, self-assurance, self-possession, aplomb.

Ana. Self-reliance, reliance (see corresponding adjectives at **RELIANT**): composure, *equanimity: sureness, sanguineness (see corresponding adjectives at **CONFIDENT**).

self-denial. Self-abnegation, abnegation, *renunciation.

Ana. Sacrificing or sacrifice, forbearance (see corresponding verbs at **FORGO**): abstaining, refraining (see **REFRAIN**): restraining or restraint, curbing or curb, checking or check (see corresponding verbs at **RESTRAIN**).

self-esteem. Self-love, *conceit, egotism, egoism, amour-propre.

Ana. *Pride, vanity: self-respect, self-regard, self-admiration (see primitive nouns at **REGARD**).

Ant. Self-distrust.

self-love. Self-esteem, *conceit, egotism, egoism, amour-propre.

Ana. *Pride, vanity, vainglory: complacency, self-complacency, smugness, priggishness (see corresponding adjectives at **COMPLACENT**).

Ant. Self-forgetfulness.

self-opinionated. *Opinionated, opinionative.

Ana. Dogmatic, *dictatorial, doctrinaire, oracular: certain, positive, *sure, cocksure.

self-possession. *Confidence, self-confidence, assurance, self-assurance, aplomb.

Ana. *Equanimity, composure: coolness, collectedness, imperturbability, nonchalance (see corresponding adjectives at **COOL**): poise, savoir-faire, *tact.

self-reliant. *Reliant.

selfsame. *Same, very, identical, identic, equivalent, equal, tantamount.

Ana. Alike, like, identical, uniform (see **SIMILAR**).

Ant. Diverse.

self-satisfied. *Complacent, self-complacent, smug, priggish.

Ana. Satisfied, content (see under **SATISFY**): conceited, egoistic, egotistic (see corresponding nouns at **CONCEIT**).

sell, v. **Sell, vend, auction, barter, trade** agree in denoting to take part in a transaction in which property is transferred to another for permanent possession, in exchange for something else. To **sell** is to transfer to another for a price, usually to be paid in money. **Vend** applies chiefly to the selling (sometimes the hawking) of small articles. The derivative nouns *vender* and *vendor* are in much more common use than the verb; as, the din was increased by the cries of *venders* in the noisy streets. The term *vending machine* is applied to a slot machine for dispensing small articles (as candy, chewing gum, and cigarettes). The verb *vend* is not used of lands or tenements, but the legal terms *vendor* and *vendee* may be. To **auction** (frequently

followed by the adverb *off*) is to sell, usually in the capacity of a licensed and authorized auctioneer, to that person of an assemblage who makes the highest and last of a series of successively increased bids; as, a public sale at which one's household furnishings are *auctioned off*. **Barter** implies an exchange of commodities. "Every possible device for doing without money altogether by *bartering*" (*Shaw*). By extension, *barter* frequently implies to exchange for an unworthy consideration. "Writers...who will not *barter* human rights for the patronage of the great" (*J. Bright*). **Trade** is often synonymous with *barter*, and suggests the exchange of a particular object or objects for another or others; in this use it appears to be chiefly an Americanism; as, to *trade* a city lot for a farm; to *trade* hats; let's *trade* knives. **Ana.** *Transfer, convey, deed: consign, *commit, relegate.

semblance. *Appearance, look, aspect.

Ana. *Likeness, similitude, resemblance, analogy, affinity: *pose, affectation, air (or airs): *form, figure, shape.

seminary. *Academy, institute, college, lycée, gymnasium.

sempiternal. Eternal, *infinite, boundless, illimitable, uncircumscribed.

Ana. *Everlasting, endless, interminable, unceasing, never-ending: *immortal, deathless, undying: *lasting, perdurable.

senescence. *Age, senility, senilism, dotage.

Ant. Adolescence.

seneschal. *Steward, reeve, bailiff, agent, factor, major-domo.

senile. **Senile, anile, doting, doted, doddering, doddered** agree in meaning having or showing the weaknesses of old age. **Senile** is the all-round word referable to both sexes and implying physical as well as mental decay; as, *senile* imbecility; *senile* diseases. "He either chatters *senilely*, or falls into the long trances of age" (*Kipling*). **Anile** in technical medical use applies to the senility of women; in its somewhat rare literary use, it implies old-womanishness or decadent femininity, but it is seldom employed with reference to persons. "Romanticism...grew *anile* in its premature decrepitude" (*R. A. Vaughan*). **Dotting** (see also **LOVING**) and **doted** (the latter in common use in Scotland) always imply imbecility or weak-mindedness through age: very frequently, *dotting* additionally suggests amorous tendencies. "The third mad passion of thy *dotting* age" (*Pope*). Both **doddering** and **doddered** (though etymologically of different origin) stress extreme weakness and infirmity of mind and body. "A little old grey-headed man who...had an ancient *doddering* manner" (*M. E. Braddon*). "Auld feckless *doddered* men" (*Stevenson*).

Ana. Old, *aged, elderly, superannuated: *weak, feeble, infirm, decrepit.

Ant. Juvenile: virgin.

senilism. Senescence, senility, *age, dotage.

senility. Dotage, *age, senescence, senilism.

Ana. Infirmity, feebleness, weakness, decrepitude (see corresponding adjectives at **WEAK**): childishness, childlikeness (see corresponding adjectives at **CHILDLIKE**): decay, disintegration (see **DECAY**, *v.*).

sensation. 1 **Sensation, percept, image** are here compared as denoting the experience or process which is the result of the activity of an organ of sense and its closely connected nerve structures. **Sensation**, the most general of these terms, is applicable to any sensory response to a stimulus from without or within the body, whether it enters fully into one's consciousness or not: specifically it means any impression received by any of the organs

of sense, such as the eyes, ears, nostrils, taste buds of the tongue, or tactile nerves; as, to feel a *sensation* of chill; to give oneself up to the enjoyment of the *sensations* provided by a perfect spring day; "such a seeming waste of longevity, on a reptile that appears to relish it so little as to squander more than two-thirds of its existence in a joyless stupor, and be lost to all *sensation* for months together" (*Gilbert White*). **Sensation** is also applicable to any feeling that, apparently, neither results from a stimulus nor has immediate connection with an organ of sense, yet is felt acutely and physically; as, "I have owed to them [recollections of a beautiful landscape]... "*sensations* sweet. Felt in the blood, and felt along the heart" (*Wordsworth*). **Percept**, a psychologist's term, differs from *sensation* in being applicable only to a sensation received through an organ of sense and accompanied by the recognition of the object; thus, an infant feels *sensations* before he has *percepts*, that is, sensations that are referable to definite, recognizable things. **Image** (as here compared: see also **IMAGE**, 1) applies to any sensation that results in a mental representation of the thing seen, the sound heard, the odor smelled, etc., and in the retention of that mental representation in the memory for an appreciable, even a very long, time; as, "After I had looked long at it, and passed on, the *image* of that perfect flower remained...persistently in my mind" (*Hudson*); "I had never spoken to her, except for a few casual words, and yet her... *image* accompanied me even in places the most hostile to romance" (*Joyce*). **Image** also refers to a mental representation that can be evoked in the mind in the absence of the thing represented: in this case, it may apply to a mental representation that is in the memory as a result of previous sense experience or that is a construction of the imagination or fancy out of various bits of sense experience, or as a result of a verbal description; as, "When I recall London, Paris, Rome... the *image* that first presents itself is the earliest one" (*Grandgent*); "[a poet] thinks in *images*" (*Binyon*); "the other [element of the murder scene in Othello] a succession of efforts to call up before us veracious *images* of a bedroom, a bed, pillows, a lighted candle, a woman asleep, a man speaking to himself" (*C. E. Montague*).

Ana. *Impression, impress, print, stamp: feeling, feel, savor, tone (see **ATMOSPHERE**): consciousness, awareness (see corresponding adjectives at **AWARE**).

2 **Sensation, sense, feeling, sensibility** are not close synonyms but they come into comparison when they agree in meaning the power to respond or the capacity for or the act of responding to stimuli, especially physical stimuli. **Sensation**, the most definite of these terms, is referable chiefly to the higher animals provided with organs such as the eyes, ears, nose, tongue, and tactile nerves which receive impressions and transmit them to the central nervous system. In highly technical use, *sensation* often denotes nothing more than the mere seeing, hearing, smelling, etc., and does not imply recognition or comprehension. "The first step, which most children take at the age of about five months, is to pass beyond mere pleasures of *sensation*, such as food and warmth, to the pleasure of social approbation" (*B. Russell*). In nontechnical use, however, the term usually suggests more than mere seeing, hearing, etc., and implies not only recognition but more or less clearly defined intellectual and emotional reactions, such as those of pleasure or pain. It therefore may apply to responses to other than purely physical stimuli. "The *sensation* of finding a command of no avail is to the mind what sitting down upon a suddenly withdrawn chair is to the body" (*Deland*). "There are *sensations* you cannot describe. You may know what causes them but you cannot tell what por-

tions of your mind they affect nor yet, possibly, what parts of your physical entity" (*F. M. Ford*). Although **sense** is applied specifically to any one of the various powers associated with the organs that receive sensations (as, the *sense* of taste; the *sense* of smell) or in the plural (occasionally in the singular), to the combined powers which enable a sentient being to establish relations between itself and that which is external to itself (as, "the sudden, violent shock almost took away my *senses*"—*Hudson*; "my brain immoderately stirred, my *senses* unusually quickened"—*Galsworthy*), it differs from *sensation*, when applied to the power or act of responding to stimuli, in suggesting a less corporeal and a more intellectual reaction, and often a less objective stimulus. In fact, its most emphatic implication in this **sense** is often that of intense awareness or of full consciousness. "His first consciousness was a *sense* of the light dry wind blowing in through the windows" (*Cather*); "She had no *sense* at all Of any word I said" (*W. H. Davies*); "He had, however, not only knowledge, but something which is much rarer, a *sense* of quality, a taste for perfection" (*L. P. Smith*); "[Augustus] had in his bones the Roman *sense* of the past" (*Buchan*). **Feeling** (as here compared: see also **FEELING**, 2; **ATMOSPHERE**, 2) in its most specific meaning denotes the **sense** that has its end organs in the skin: usually it signifies the **sense** of touch (as, to have no *feeling* in one's finger tips) but often it is more inclusive and suggests the **sense** that is aware of changes in temperature, pressure, and the like (as, he knew by *feeling* that it was getting much colder). But *feeling* is also used more broadly to denote a response to a stimulus or a set of stimuli that is a combination of sensation, emotion, and a degree of thought; as, to judge a situation by one's *feelings* rather than by the facts; you know her *feelings* about the vulgarity of these people. Often also, the term denotes not the response, but the power to respond in general or as a characteristic; as, he says that she has no *feeling*; "The delicacy of his *feeling* makes him sensibly touched" (*Hume*). In this latter **sense** of *feeling*, **sensibility** is often preferred, especially when a keenly impressionable nature and unusually delicate powers of appreciation or its opposite are implied; as, "the extreme *sensibility* to physical suffering which characterises modern civilisation" (*Inge*); "She was a creature of palpitating *sensibility*, with feelings so delicate that they responded to every breath" (*S. M. Crothers*). In the late eighteenth century, especially as a result of the romantic movement in literature and art, **sensibility** was thought of as an essential of the poet and artist and of the reader, and the observer, not only of works of art, but of nature. Consequently, the term acquired connotations of sentimentalism and of forced or affected emotionalism which still sometimes color the word. Jane Austen humorously satirized this quality in her novel *Sense* [that is, "good **sense**"] and *Sensibility*. "The nerveless sentimentalist and dreamer, who spends his life in a weltering sea of *sensibility*" (*W. James*).

Ana. Perceptibility or perceptibility, tangibility or tangibility, palpability or palpability, ponderableness or ponderability (see corresponding adjectives at **PERCEPTIBLE**): reaction, action, behavior (see corresponding verbs at **ACT**): response, answer (see under **ANSWER**, *v.*).

sense, n. 1 *Sensation, feeling, sensibility.

Ana. Awareness, consciousness, cognizance (see corresponding adjectives at **AWARE**): perception, *discernment, discrimination, penetration.

2 **Sense, common sense, good sense, horse sense, gumption, judgment, wisdom** are here compared as meaning the quality of mind or character which enables one to make intelligent choices or decisions, or to reach

intelligent conclusions. **Sense**, because of its numerous significations, is often, when this meaning is intended, called **common sense, good sense**, or, in American slang, **horse sense**. All four terms imply a capacity—usually a native capacity—for seeing things as they are and without illusion or emotional bias, for making practical choices or decisions that are sane, prudent, fair, and reasonable, and that commend themselves to the normal, or average good mind. "Jane is a goose," said the doctor, irritably. "Maggy is the only one that has any *sense* in that family" (*Deland*). "Rich in saving *common-sense*" (*Tennyson*). "Good *sense*, which only is the gift of Heaven" (*Pope*). "He was a plain man... he had what is roughly known as *horse-sense*" (*C. D. Warner*). **Gumption**, a colloquial term, implies **sense**, but in addition it suggests a capacity to estimate shrewdly or cleverly the possibilities of success or failure, of change for the better or worse, or the like; as, an investor without *gumption* is bound to lose money; he is a dreamer and, what is worse, he hasn't the slightest bit of *gumption*; if the voters have *gumption* they will re-elect the mayor. **Judgment**, as here considered, seldom applies to a native quality, though it usually suggests a foundation in native good **sense**. But it also suggests intellectual qualities which are usually the result of training or discipline, such as discernment of facts or conditions that are not obvious as well as knowledge of those that are ascertainable, an ability to comprehend the significance of those facts and conditions and to draw correct unbiased conclusions from them. "'Tis true that strength and bustle build up a firm. But *judgment* and knowledge are what keep it established" (*Hardy*). "The ultimate test of true worth in pleasure, as in everything else, is the trained *judgment* of the good and sensible man" (*G. L. Dickinson*). "Buckingham... was not a man of *judgment* and he allowed personal feeling to influence his action" (*Belloc*). **Wisdom** is of all these terms the one of highest praise. Although it often suggests great soundness of judgment in practical affairs and unusual sagacity (as, "Common *sense* in an uncommon degree is what the world calls *wisdom*"—*Coleridge*), it is also capable of suggesting an ideal quality of mind or character that is the result of a trained judgment exercised not only in practical affairs but in philosophical speculation, of wide experience in life and thought, of great learning, and of deep understanding. "For *wisdom* is better than rubies; and all the things that may be desired are not to be compared to it" (*Proverbs* viii. 11). "*Wisdom* is said to be the funded experience which man has gathered by living; but for so many harvests the crop is still a light one. Knowledge he has gained and power, but not goodness and understanding" (*A. Repplier*).

Ana. *Prudence, foresight, discretion: understanding, comprehension, appreciation (see corresponding verbs at **UNDERSTAND**): intelligence, brain, brains, wit, wits (see **MIND**).

3 *Meaning, acceptance, signification, significance, import.

Ana. Denotation, connotation (see under **DENOTE**).

sensibility. Feeling, sense, *sensation.

Ana. Perception, *discernment, penetration, discrimination, insight, clairvoyance: sensitiveness, susceptibility (see corresponding adjectives at **LIABLE**): emotion. *feeling, affection: sentimentalism, *sentiment, sentimentality.

sensible. 1 *Material, physical, corporeal, phenomenal, objective.

Ant. Intelligible.

2 *Perceptible, palpable, tangible, appreciable, ponderable.

Ana. Sensational, perceptual, imaginal (see corresponding nouns at SENSATION): obvious, patent, manifest, *evident: *carnal, fleshly, sensual.

Ant. Insensible.

3 *Aware, conscious, cognizant, alive, awake.

Ana. Perceiving, noting, remarking, observing, seeing (see SEE): knowing, *intelligent: understanding, comprehending, appreciating (see UNDERSTAND): sensitive, susceptible (see LIABLE).

Ant. Insensible (of or to). — **Con.** Impassible, insensitive, anesthetic (see INSENSIBLE).

4 Prudent, sane, judicious, *wise, sage, sapient.

Ana. Sagacious, perspicacious, astute, *shrewd: foresighted, discreet, provident (see under PRUDENCE): reasonable, *rational.

Ant. Absurd, foolish: fatuous, asinine.

sensitive. Susceptible, subject, exposed, open, *liable, prone, incident.

Ana. Impressed, influenced, affected (see AFFECT): predisposed, disposed, inclined (see INCLINE, v.).

Ant. Insensitive.

sensual. 1 *Carnal, fleshly, animal, animalistic.

Ana. *Bodily, physical, corporeal, somatic: *coarse, gross, vulgar: lewd, lascivious, lustful, wanton (see LICENTIOUS).

2 *Sensuous, luxurious, voluptuous, sybaritic, epicurean.

Ana. See those at SENSUAL, 1.

⚠ Do not confuse sensual with sensory.

sensuous. **Sensuous, sensual, luxurious, voluptuous, sybaritic, epicurean** come into comparison when they mean having to do with the gratification of the senses or providing pleasure by gratifying the senses. **Sensuous** was first used by Milton as a term descriptive of one thing which deals with sensations or has the power of evoking sensations as opposed to another thing which deals with ideas, and is intellectual in its character (as, "[Poetry is] more simple, *sensuous*, and passionate [than rhetoric]" — *Milton*); however, the word did not gain currency until around 1800 when Coleridge adopted it in preference to *sensual* because, unlike the latter term, it carried no derogatory connotations. **Sensual** (for fuller treatment see CARNAL) now usually implies the gratification of the senses or the indulgence of the appetites through the impulsion of gluttony, lust, or other base motive; *sensuous*, on the contrary, implies the gratification of the senses (less often the indulgence of the appetites) for the sake of the aesthetic pleasure or the delight in beauty of color, sound, form, or the like, that is induced. "Nobody can resist the Bay of Naples, or if he can, then all the simple and *sensuous* delights of this world must turn to bitterness and ashes in his mouth" (*C. Mackenzie*); "Arise and fly The reeling faun, the *sensual* feast" (*Tennyson*); "Chinese painters are not, like the Persians, absorbed in expressing their *sensuous* delight in the wonder and glory of the world" (*Binyon*). As applied to persons or their natures, *sensuous* often carries an implication of indifference to things of the spirit, but it practically never suggests the bestiality so often connoted by *sensual*. "The *sensuous*, self-indulgent nature she [Elizabeth] derived from Anne Boleyn" (*J. R. Green*). "His nature was purely *sensuous*, and she strove to make him moral, religious" (*D. H. Lawrence*). "The young boy's love is a spiritual passion... without any sensory, still less any *sensual*, elements" (*H. Ellis*). **Luxurious** (as here compared in its primary and still current strict sense: for looser sense, see LUXURIOUS, 2) implies indulgence, often self-indulgence in *sensual* or, now more often, *sensuous* pleasures. Originally meaning given to luxury (etymologically, lasciviousness or lust), the term has now practically lost its implications of vice

and applies rather to pleasures that induce a pleasant languor, delightful ease, or particularly a grateful peace of mind; as, "the emotionalist steepes himself or herself in *luxurious* feeling and pathetic imagination, which make no severe call upon either the will or the intellect" (*Inge*); "sat down to a long, *luxurious* smoke" (*Kipling*); "the music [in a restaurant gives] . . . a *luxurious* pleasure not to be had from eating a silent meal" (*Justice Holmes*). **Voluptuous** also implies giving oneself up to the pleasures of sense, but it carries a stronger implication of abandonment to such pleasure for its own sake than does *luxurious*; also, it more frequently carries a suggestion of sensual rather than of sensuous enjoyment; as, "fair fallacious looks. . . Softened with pleasure and *voluptuous* life" (*Milton*); "a temper too indolent to enquire, too bigoted to doubt, a *voluptuous* devotionality allied perhaps to refined aestheticism, but totally alien to the austerity and penetrating sincerity of the Gospel" (*Inge*). **Sybaritic** implies voluptuousness of an overrefined and effeminate sort; usually, it suggests indulgence in the rarest and choicest foods and drinks, amid surroundings calculated to charm and soothe the senses; as, "It was a *Sybaritic* repast, in a magnificent apartment" (*Thackeray*). **Epicurean** (cf. EPICURE) in earliest use of the term commonly implied sensuality and voluptuousness, but now, largely as a result of a truer understanding of the philosophy of the ancient Greek Epicurus (*Epicurean* philosophy), it suggests sensuous rather than sensual delight in the pleasures of eating, drinking, and the like, and a delicate and fastidious rather than a gross taste; as, "Warming their palace kitchens, and from thence their unctuous, and *epicurean* paunches" (*Milton*); "Nothing to mar the sober majesties Of settled, sweet, *Epicurean* life" (*Tennyson*).

Ana. Sensational, imaginal (see corresponding nouns at SENSATION): delicious, delectable, luscious, *delightful: aesthetic, *artistic.

⚠ Do not confuse sensuous with sensory.

sentence, v. **Sentence, condemn, damn, doom, attain, proscribe** are here compared in the sense of to decree the fate or punishment of a person (sometimes, by extension, a thing) that has been adjudged guilty, unworthy, unfit, or the like. **Sentence** originally implied the act of judging, but it is now used only in reference to the determination and pronouncement of punishment (or the like) following an adverse verdict; thus, when a jury renders a verdict of "guilty," it becomes the duty of the judge who has presided at the trial to *sentence* the convicted person; when a person hears the verdict of his physicians that he is afflicted with an incurable disease, he is aware that in their minds he has been *sentence*d to death. **Condemn**, as here compared (see also CRITICIZE), implies both an adverse judgment and a sentence which carries with it a penalty such as forfeiture of one's freedom, one's rights, or one's life (as, Napoleon was *condemned* to exile; cells for *condemned* prisoners), or, in the case of things, a forfeiture of its existence or of some status which has legally protected it from invasion; thus, to *condemn* an old building is legally to decree its destruction; to *condemn* a piece of property is to take it over for the uses of the state, on payment of its appraised value. **Damn**, which is both etymologically and in its historical meanings akin to *condemn*, is now not employed in law. In theological use, it implies the condemnation of the soul to hell or to eternal punishment. "He that believeth and is baptized shall be saved; but he that believeth not shall be *damned*" (*Mark* xvi. 16). In general use, when it carries this implication, it is often employed in curses, imprecations, or expressions of strong disapproval. "I give thee sixpence! I will see thee *damned*

first" (*G. Canning*). Otherwise it usually implies a verdict that is destructive or annihilating in its effects. "The reputation of Jonson has been of the most deadly kind. . . . To be universally accepted; to be *damed* by the praise that quenches all desire to read the book. . . . to be read only by historians and antiquaries—this is the most perfect conspiracy of approval" (*T. S. Eliot*). *Doom* adds to *condemn* the implication of a punishment or penalty that cannot be evaded or escaped, because imposed by an inexorable power. "I am thy father's spirit, *Doom'd* for a certain term to walk the night" (*Shak.*). "She [history] execrates indeed The tyranny that *doomed* them to the fire" (*Cowper*). This idea of fate or destiny is so strongly stressed in *doom* that in some cases the implication of an adverse judgment is lost or obscured; as, it was not long before the Poles realized that Warsaw was *doomed* to destruction. "The substance of a scientific paper is incorporated into the general stock of knowledge; but the paper itself is *doomed* to oblivion" (*A. Huxley*). *Attain*, which is now chiefly in historical use, implies the pronouncement or decree, as in a *bill of attainder*, of the severe punishments formerly imposed for treason or for a felony, usually including death or banishment, forfeiture of estate, corruption of blood (that is, loss of power to receive or to transmit property by inheritance), and the loss of all rights and privileges as a citizen. "In the United States the Constitution provides. . . that no bill of attainder shall be passed, and. . . that no attainder of treason (in consequence of a judicial sentence) shall work corruption of blood or forfeiture, except during the life of the person *attainted*" (*Webster's New Int. Dict., 2d Ed.*). *Proscribe*, originally and still in historical use, implies the publication or posting of a decree condemning a person to banishment or death, or announcing his status as an outlaw and the forfeiture of his property or of his civil rights. "A declaration was. . . signed by all the Powers, which. . . *proscribed* Napoleon as a public enemy, with whom neither peace nor truce could be concluded" (*Sir A. Alison*). The word now suggests ostracism or interdiction as the result of a judgment by some authoritative or influential body or group; as, dancing was once, but is now rarely, *proscribed* by certain churches. "You. . . , your rites, your garb *proscribed*. Must yet receive one degradation more" (*Browning*).

Ana. *Judge, adjudge, adjudicate: condemn, denounce, blame (see *CRITICIZE*): determine, settle, rule, *decide.

Con. Acquit, absolve, vindicate, exonerate, *exculpate.

sententious. Pregnant, meaningful, significant, *expressive, eloquent.

Ana. Formal, conventional, ceremonious (see *CEREMONIAL*): Pompous, *showy, ostentatious: terse, pithy, compendious (see *CONCISE*).

sentiment. 1 Emotion, affection, *feeling, passion.

Ana. Thought, impression, notion, *idea: ideal, standard, exemplar (see *MODEL*).

2 *Opinion, view, belief, conviction, persuasion.

Ana. *Truth, verity: conclusion, judgment (see under *INFER*).

3 **Sentiment, sentimentality, sentimentalism** come into comparison when they denote a quality, or a characteristic, that is the product of sensibility (see at *SENSATION*, 2) and that is manifested chiefly in written or spoken utterances or in works of art. **Sentiment** (as here considered: see also *FEELING*, 2; *OPINION*) usually, but not invariably, is employed in a good sense implying qualities such as the power to express or evoke delicacy or tenderness of feeling, idealism, high and ennobling thought, or the like; as, "the charm Of pious *sentiment* diffused afar [by ancient churches]" (*Wordsworth*); "The

unbought grace of life. . . the nurse of manly *sentiment* and heroic enterprise is gone" (*Burke*). Sometimes, but now rarely, the term has been used to suggest artificiality, insincerity, or a striving for effect. "To be with joy perused, By all whom *sentiment* has not abused; New-fangled *sentiment*, the boasted grace Of those who never feel in the right place" (*Cowper*). **Sentimentality** is definitely a derogatory, and often a contemptuous, term for it always implies mawkishness, affectation, or excess of emotion, and sometimes suggests manufactured or falsified emotion or lack of judgment or good sense; as, "His very pity will be cowardly, egotistic,—*sentimentality*, or little better" (*Carlyle*); "[in] the literature of the past century. . . nearly all its expressions having reference to the country show. . . a foolish *sentimentality*. . . . Brooks are always 'purling'; birds always 'warbling'" (*Ruskin*); "that filigree-work of sentiment which we call *sentimentality*" (*J. R. Lowell*). "Modesty we like even before we approve it morally; and kindness and enthusiasm in like manner; but when they become prudishness and *sentimentality*, we withhold our liking" (*S. Alexander*). **Sentimentalism** is often used in place of *sentimentality*, but precise writers prefer the former as a designation for the habit of mind or disposition of the sentimental man, and the latter for the quality as manifested externally, as in one's utterances; as, "the degradation of reasonable sympathy into *sentimentalism*" (*Inge*); "Call it [inability to bear the thought of a wounded animal's suffering] . . . squeamishness, namby-pamby *sentimentalism*, what you will—it is stronger than oneself!" (*Galsworthy*).

sentimental. Sentimental, romantic, mawkish, maudlin, soppy, mushy, slushy come into comparison when they mean unduly or affectedly emotional. **Sentimental**, although properly the adjective for both *sentiment* and *sentimentality* (see *SENTIMENT*), usually suggests emotion that does not arise from genuine or natural feeling but is evoked by an external cause, by a particular mood, or by an excess of sensibility, or for the sake of the thrill, or is merely an affectation that is temperamental, the moment's fashion, or designed to achieve a given end (such as in the so-called "*sentimental drama*," to reveal the natural goodness of human nature, or to arouse pity for criminals and scorn for the society that produces them); as, *sentimental* songs; *sentimental* women; "Mr. Sterne [in '*A Sentimental Journey*'] becomes *sentimental* over a cab, and weeps generous tears over a donkey" (*Thackeray*); "a *sentimental* person, interested in pathetic novels and all unhappy attachments" (*Thackeray*); "We are all for tooting on the *sentimental* flute in literature" (*Stevenson*); "Whisky made him somewhat *sentimental*" (*S. Anderson*). "I hate the whole tribe of *sentimental* men and women who, impelled by the unimaginative fool nature, exalt sexual love above its proper place in the scheme of things" (*R. Macaulay*). **Romantic** implies emotion that has little relation to things as they actually are, but is derived more from one's imagination of what they should be ideally or from one's conceptions of them as formed by literature, art, one's dreams, or the like; as, "I am not *romantic*, you know; I never was. I ask only a comfortable home" (*Austen*); "a pretty little *romantic* girl. . . who possessed a laudable zeal to know a live poet" (*Scott*); "her first *romantic* admiration of his lofty bearing has worn off" (*Meredith*); "The process of growing from *romantic* boyhood into cynical maturity" (*Shaw*). **Mawkish**, when it implies sentimentality, suggests a kind that creates loathing or disgust because of its insincerity, emotional excess, or other signs of weakness or futility; as, "[Verses] So sweetly *mawkish*, and so smoothly dull" (*Pope*); "I hate a *mawkish* popularity" (*Keats*); "Stale

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

epithets, which, when I only seem to smell their *mawkish* proximity, produce in me a slight feeling of nausea" (L. P. Smith). *Maudlin* stresses a lack of balance or self-restraint that shows itself in tears, laments, or other emotional excess: usually also it suggests extreme or contemptible silliness; as, "A *maudlin* Poetess, a rhyming Peer" (Pope); "The mob became not only enthusiastic but *maudlin*" (Disraeli). The condition is often a result of great indulgence in alcohol; as, "Schreiderling, when he grew *maudlin* at mess, used to talk about 'my poor dear wife'" (Kipling). *Soppy* and *mushy* are terms of slangy or colloquial flavor that come close to *mawkish* in their suggestion of distasteful and disgusting sentimentality, but *soppy* (chiefly in British use) often carries a strong suggestion of silliness in showing affection (as, "Don't be *soppy*, Bryn"—Galsworthy) and *mushy*, of softness or wishy-washiness (as, "You may... be a sharp, cynical sort of person; or you may be a nice, *mushy*, amiable, goodnatured one"—Shaw). *Slushy*, which is colloquial in flavor, applies chiefly to spoken or written utterances that are so sentimental or emotionally confused as to seem mere drivel; as, *slushy* stories; a *slushy* speech.

Ana. Emotional, affectionate, feeling, passionate (see corresponding nouns at FEELING): affecting, *moving, pathetic, touching: affected, pretended, counterfeited, feigned, simulated (see AFFECT).

sentimentalism. Sentimentality, *sentiment.

Ana. Sensibility, feeling (see SENSATION).

sentimentality. Sentimentalism, *sentiment.

Ana. Sensibility, feeling (see SENSATION).

separate, v. *Separate, part, divide, sever, sunder, divorce* come into comparison when they mean to cause two or more things or parts of a thing that are united or assembled to become disunited, disjointed, or the like, or, when the subject is the thing or things affected, to become so disunited or disjointed. *Separate* implies a putting or keeping apart; it may suggest a scattering or dispersion of units (as, forces that *separate* families; to *separate* the parts of a watch), or a removal of one from the other or others (as, to *separate* a husband from his wife or a mother from her children; to *separate* the wheat from the chaff; to *separate* one's mind from one's work), or the presence of an intervening thing or things (as, the Atlantic *separates* Europe from America; a thousand miles *separate* the two branches of the family). *Part* usually, but not invariably, suggests the separation of two persons or things in close union or association; often also it suggests a complete separation as by death or violence; as, "The Lord do so to me... if ought but death *part* thee and me" (Ruth i. 17); "To love and to cherish, till death us do *part*" (Anglican Marriage Service); to *part* two combatants; "Soon a faint diverging path was reached, where they *parted* company" (Hardy). *Divide* commonly stresses the idea of parts, groups, or sections resulting, literally or figuratively, from cutting, breaking, branching, or the like; as, to *divide* a pie into six pieces; to *divide* a stick of candy into two parts; to *divide* the government into the executive, legislative, and judicial branches; "He that will *divide* a minute into a thousand parts" (Shak.). *Divide* often, in addition, carries an implication of apportioning or of distributing; as, to *divide* a pie among the family; to *divide* booty or profits; to *divide* one's estate equitably among one's heirs. Often *divide* is used in place of *separate*, especially when mutual antagonism or wide separation is connoted; as, United we stand, *divided* we fall; "the broad and deep gulf which... *divides* the living from the dead, the organic from the inorganic" (Inge). *Sever* adds the implication of violence (especially by or as if by cutting), and fre-

quently applies to the separation of a part from the whole or of persons or things that are joined in affection, close affinity, natural association, or the like; as, to *sever* a branch from the trunk by one blow of the ax; to *sever* the head from the body; "Sever'd from thee, can I survive?" (Burns); "The hour is ill Which *severs* those it should unite" (Shelley). *Sunder* often implies a violent rending or wrenching apart; as, "Even as a splitted bark, so *sunder* we" (Shak.); "We that are *sundered* [*sundered*] in sorrow may meet again in joy" (Scott). *Divorce*, etymologically to turn different ways, implies the legal dissolution of a marriage, and thereby the undoing of a union. The term is widely used in an extended sense, implying the separation of two or more things so closely associated that they interact upon each other or work only in union with each other; as, "Its academic tendency to *divorce* form from matter [in poetry]" (Day Lewis); "You cannot *divorce* accurate thought from accurate speech" (Quiller-Couch). "Our knowledge of the external world cannot be *divorced* from the nature of the appliances with which we have obtained the knowledge" (Eddington).

Ana. Cleave, rend, split, rive (see TEAR): *estrangle, alienate: disperse, dispel, *scatter: *detach, disengage. **Ant.** Combine.

separate, adj. 1 *Distinct, several, discrete.

Ana. Diverse, disparate, *different, divergent, various: *free, independent.

2 *Single, solitary, particular, unique, sole, lone.

Ana. *Special, especial, specific, individual: peculiar, distinctive (see CHARACTERISTIC): detached, disengaged (see DETACH).

sept. *Tribe, sib, clan, horde.

sequel. Upshot, outcome, issue, *effect, consequence, result, aftereffect, event, aftermath.

Ana. Termination, *end, ending: conclusion, closing, finishing or finish (see corresponding verbs at CLOSE).

sequence. Series, *succession, progression, set, suit, suite, chain, train, string.

Ana. Ordering or order, arrangement (see corresponding verbs at ORDER).

sequent, sequential. *Consecutive, successive, serial, discrete.

seraph. Cherub, archangel, *angel.

serene. Tranquil, *calm, peaceful, placid, halcyon.

Ana. *Still, stilly, silent, noiseless, quiet: *cool, collected, composed: smooth, effortless, *easy.

Con. Disturbed, disquieted, agitated, upset (see DIS-COMPOSE).

serf. *Serf, slave, bondsman, thrall, villein, vassal, bondman, bondsman, peon, Helot* are often distinguished in their historical senses, but in their extended or looser senses they agree in designating a person who lives in servitude or in bondage to a master or owner. *Serf*, in its strictest sense, applies to a person who is attached to the soil or land and whose ownership passes to the heir when the lord or master dies or to the purchaser when the land is sold. Historically, the term has been applied to all persons coming under this general description whether their ownership implied control over all their movements and interests or only over their services. In extended use, *serf* usually implies merely the inability to free oneself from something that is imposed upon one; as, "the teacher... that *serf* of custom, that subjugated rebel, that feeble, persistent antagonist of the triumphant things that rule him" (H. G. Wells). *Slave*, and its poetic and emphatic equivalent *bondsman*, apply to a person who is the absolute property of his (or her) master and disposable in the same manner as any chattel: both terms imply ownership that gives control

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

not only over the services but also over the person and his (or her) actions; they therefore suggest, both in their historical and in their extended senses, privation of freedom and deprivation of all the rights and privileges associated with independence. "Had you rather Caesar were living and die all slaves, than that Caesar were dead, to live all free men?" (*Shak.*). "But foul effeminacy held me [Samson] yoked Her [Dailila's] bond-slave" (*Milton*). "An adult with whom a child is in constant contact may easily become so dominant in the child's life as to make the child, even in later life, a mental slave" (*B. Russell*). **Thrall**, now an archaic or literary term, implies slavery, but not always a condition of servitude. Rather it suggests a being held in bondage, as in chains (more often figurative than literal) or in captivity, and therefore usually connotes the loss of one's liberty or the forfeit of it to a greater power. Unlike *serf* and *slave* the term carries no clear, specific application, though it is often poetically used in place of them; as, "Slaves of drink and thralls of sleep" (*Shak.*); "Gurth... is the born thrall of Cedric" (*Scott*); "La belle Dame sans merci Hath thee in thrall" (*Keats*). **Villein**, largely as a result of shifting applications in its earliest use in feudal times, being applied both to freemen of the lowest social rank, such as are now often called peasants, and to serfs, has not acquired an extended meaning and carries slight connotations of servitude or of bondage. The term, therefore, is chiefly if not exclusively in historical use. **Vassal**, in its strict historical sense, is not a synonym of the preceding words because it applies only to a person who, under the feudal system (or a system comparable to it), holds lands or receives protection on conditions of homage and allegiance to the overlord who grants the land or promises protection in return for the vassal's pledged support and services, especially in war. Consequently, *vassal* is closer to *subject* than to *serf* and implies only such loss of freedom as is voluntarily surrendered. "I dreamt that I dwelt in marble halls With vassals and serfs by my side" (*Alfred Bunn*). In a looser extended sense, *vassal* is applied to any person or personified thing that is perforce or voluntarily subordinate to another and dependent upon his will: usually it connotes abjectness or complete subjection to another's influence; as, "thy thoughts, low vassals to thy state" (*Shak.*); "The man who by sin makes himself Satan's vassal may soon be his victim" (*James Hamilton*); "My dear dumb friend [a dog], low lying there, A willing vassal at my feet" (*J. G. Holland*). **Bondman** and **bondsmen** (also *bondwoman* and *bondswoman* and *bondmaid* [as in *Galatians* iv. 22; *Leviticus* xxv. 44]; also *bondservant* [as in *Leviticus* xxv. 39]) have shown fluctuations in meaning owing largely to differences in interpreting *bond*, that word in earliest use implying the status of a serf and in later use, through confusion with *bond* (a shackle or fetter) and *bound*, that of one who has been forced into thralldom or who has surrendered his freedom. Because of this lack of fixity in meaning the terms are used largely in poetic or rhetorical language where explicitness is not essential; as, "From chieftain's tower to bondsmen's cot" (*Scott*); "Fields where the bondman's toil No more shall trench the soil" (*Bryant*). **Peon**, a term used chiefly in reference to Spanish-American countries, applies strictly to one of a class, such as of Indians or half-breeds in Mexico, who are agricultural and mining laborers, and whose condition, though not legally that of slaves, actually is that of bondage. By extension, the term now often applies to any agricultural laborer who is virtually in servitude for payment of a debt, as a convict laborer, or as a heavily burdened tenant farmer working on shares. **Helot**, historically applicable only to a Spartan whose status was

comparable to that of a serf, is often used in an extended sense to mean *slave* or *serf*, but with added connotations of an oppressed condition or of being driven beyond human bounds.

serial, *adj.* *Consecutive, successive, sequent, sequential, discrete.

Ana. Following, ensuing, succeeding (see **FOLLOW**): continuous, *continual.

series. *Succession, progression, sequence, set, suit, suite, chain, train, string.

serious. **Serious**, **grave**, **solemn**, **sedate**, **staid**, **sober**, **earnest** come into comparison when applied to persons, their looks, their acts, and the like, and mean not light or frivolous but actually or seemingly weighed down by deep thought, heavy cares, important work, or the like. **Serious** implies absorption in work rather than in play, or concern for that which really matters rather than for that which merely amuses. "The features [of the imaged Virgin Mary]... were serious and almost sad under the austere responsibilities of infinite pity and power" (*H. Adams*). "Molière himself has said that if it had not been for this comedy [*Le Menteur*] he himself might have written his lighter comedies but would not have risen to the height of the serious comedy of *Le Tartuffe*" (*S. Alexander*). **Grave** implies both seriousness and dignity, but it commonly also implies a somber expression or attitude and the pressure of weighty interests or responsibilities. "A stately speech; Such as grave Livers do in Scotland use" (*Wordsworth*). "She had no flights of eloquence, but the slow, grave... tones with which she uttered the things that seemed to her the most worth while in life were more impressive than any arts of the orator" (*H. Ellis*). **Solemn** usually heightens the suggestion of impressiveness or awesomeness often implicit in *grave*; as, "the solemn splendour of that most wonderful poem, the story of Job" (*Quiller-Couch*); "It was a solemn moment, for these were the last words of Augustus to his people" (*Buchan*); the term often lends itself to humorous use when referred directly to persons; as, *solemn* as a judge; "If the word may be used of so solemn a personage, he wriggled" (*Conrad*). **Sedate** implies composure and decorous seriousness, as in character or speech; as, "Good sense alone is a sedate and quiescent quality" (*Johnson*); "He was... of a sedate look, something approaching to gravity" (*Sterne*). **Staid** implies a settled sedateness, often a prim self-restraint, and an even stronger negation of volatility or frivolity than *sedate*. "The side streets here are excessively maiden-lady-like... The knockers have a very staid, serious, nay almost awful, quietness about them" (*Keats*). "The staid Roman citizen was repelled by the wild dances and the frenzied paeans" (*Buchan*). **Sober** sometimes stresses seriousness of purpose (as, "if our pupils are to devote sober attention to our instruction"—*Grandgent*), but it more often suggests gravity that proceeds from control over or subdual of one's emotions or passions. "Come, pensive Nun, devout and pure, Sober, steadfast, and demure" (*Milton*). **Earnest** implies seriousness of purpose as well as sincerity and, often, zealousness and enthusiasm; as, an earnest student. "And men are merry at their chores, And children earnest at their play" (*Millay*).

Ana. Austere, stern, *severe, ascetic: *thoughtful, reflective, contemplative, meditative: *deep, profound.

sermon. Homily, *speech, address, oration, harangue, talk, allocution, lecture, prelection.

serpentine. *Winding, sinuous, tortuous, flexuous, anfractuoso.

Ana. Circuitous, roundabout, *indirect: *crooked, devious.

service, *n.* *Use, advantage, profit, account, avail.

Ana. Usefulness, utility (see **USE**, *n.*, 2): *worth, value: helping or help, aiding or aid, assistance (see corresponding verbs at **HELP**).

servile. *Subservient, menial, slavish, obsequious.

Ana. *Mean, abject, ignoble: fawning, cringing, truckling, cowering (see **FAWN**).

Ant. Authoritative.

servitude. **Servitude, slavery, bondage** agree in meaning the state of subjection to a master. **Servitude** may refer to the state of a person, or of a class of persons, or of a race, that is bound to obey the will of a master, a lord, or a sovereign, and lacks the freedom to determine his (or their) own acts, laws, conditions of living, and the like. The term is often vague or rhetorical, sometimes implying lack of political freedom, sometimes lack of liberty to do as one pleases. "I am as free as Nature first made man, Ere the base laws of *servitude* began. When wild in woods the noble savage ran" (*Dryden*). In very precise use, however, *servitude* denotes the condition of one who must give service to a master and perform labor for him, either because he has bound himself (see **BOND**, *adj.*) voluntarily, or because he is a convict (especially one transported to a colony or one sentenced to *penal servitude*, that is, imprisonment with hard labor), a slave, or the like. **Slavery**, in precise use, implies subjection to a master who is the owner of one's person or who may treat one as his property. **Slavery**, historically, does not invariably imply *servitude*, but that implication is common when the reference is to modern as distinct from ancient times. "Taken by the insolent foe And sold to *slavery*" (*Shak.*). In rhetorical use, *slavery* implies entire loss of personal freedom and subjugation to another. "Is life so dear, or peace so sweet, as to be purchased at the price of chains and *slavery*?" (*P. Henry*). **Bondage**, which is now chiefly a literary or rhetorical term, originally applied to the state of one who was bound as a serf to the soil and who was sold with the land when the latter was conveyed to a new owner. By confusion with bonds, or the chains of a captive prisoner, the word came to apply to any state of subjection from which there is no hope of escape except by breaking one's chains. "What more oft, in nations grown corrupt, And by their vices brought to *servitude*, Than to love *bondage* more than liberty" (*Milton*).

set, v. **Set, settle, fix, establish, firm** come into comparison when they mean to cause someone or something to be put securely in position, as in a place, an office, a category, or the like. **Set** (etymologically, to cause to sit) is the most inclusive of these terms, sometimes implying placing in a definite location, especially to do a certain piece of work or to serve a certain purpose (as, to *set* a hen on eggs—but, idiomatically, a *setting* hen, rather than a *sitting* hen; to *set* a light at each window; to *set* out trees; to *set* food on the table; to *set* a child on a horse), sometimes implying a placing under orders in an occupation, a situation, an office, or a sphere of life, or under conditions where something or someone must perform an allotted or prescribed function (as, to *set* a boy to work; to *set* the maids to cleaning house; to *set* proctors to watch the students; to *set* oneself to a disagreeable task), occasionally suggesting a prescribing or ordaining of the object or objects on which the mind, heart, eyes, or the like, concentrates itself (as, to *set* the subject for a debate; to *set* a goal for one's efforts; to *set* one's heart on winning a prize; to *set* duty before pleasure). **Settle** comes close to *set* in its etymological sense but in actual use it carries a much stronger implication of putting a person or thing in a place or condition of stability, rest, or repose, and often a weaker implication of regulative or dictatorial power; as, to *settle* an invalid

in an easy chair; to *settle* themselves in their new home; to *settle* one's eyes on a distant view. Often, the word carries an implication of decisive quieting, calming, or ordering of that which is disturbed, upset, unstable, fluctuating, or the like; as, to *settle* a person's nerves; to *settle* one's doubts; the white of an egg will *settle* the coffee; to *settle* one's bedroom each morning after breakfast; "There's nothing will *settle* me but a bullet" (*Swift*). **Fix**, as here compared (see also **ADJUST**, 1; **FASTEN**), usually implies more stability and permanence in position, condition, character, and the like, than *set* or even *settle*; as, "his resolution was already *fixed*" (*Buchan*); "truth which the scientist strives to catch and *fix*" (*Lowes*); "his place in the McCoy household had become *fixed*" (*S. Anderson*). "What I have most at heart is, that some method should be thought of for ascertaining and *fixing* our language forever" (*Swift*). "The undifferentiated, inchoate religious sense is thus intensified and *fixed*, to the great and lasting injury of the spiritual life" (*Inge*). **Establish** (see also **FOUND**), in its earlier and etymological sense, stresses not the putting in place or the bringing into existence so much as the becoming fixed, stable, or immovable, although in some use both ideas are connoted; as, do not transplant a tree once it is *established* (that is, deeply rooted in the soil and growing normally); "When love is *established*, it never occurs to me either to give or to ask any declarations of love" (*H. Ellis*); "American sculptors... whose reputation was already *established*" (*E. Wharton*). "The child initiates new processes of thought and *establishes* new mental habits much more easily than the adult" (*C. W. Eliot*). **Firm**, in the sense under consideration, is now obsolete except in horticultural uses: it implies a setting so securely in place that the thing set quickly establishes itself or cannot easily be uprooted or broken down by the elements or other disturbing forces; as, to *firm* young shoots in the ground. "The stones... were again by the mason's art so levelled and *firm'd*, as they had been formerly" (*Walton*).

Ana. *Implant, infix: *fasten, attach, fix, affix: *prescribe, assign, define.

Con. Eradicate, deracinate, uproot (see **EXTERMINATE**): *abolish, annihilate, extinguish: displace, supplant, *replace.

set, n. 1 Series, sequence, suit, suite, *succession, progression, chain, train, string.

Ana. Collection, gathering, assemblage (see under **GATHER**).

2 **Set, circle, coterie, clique** agree in denoting a more or less carefully selected or exclusive group of persons having a common interest. **Set** applies to a comparatively large group, especially of society men and women bound together by common tastes; as, the smart *set*; the fast *set*. "It gives me great pleasure that you and Sellar like *Thyrsis*.... The voices I do turn to are the voices of our old *set*" (*Arnold*). **Circle** implies a common center of the group, such as a person or a cause that draws persons to him or it, or a common interest, activity, or occupation; as, "The *circle* of his acquaintance widened" (*Macaulay*); a sewing *circle*; "The work of the younger writers... has even penetrated into academic *circles*" (*Day Lewis*); "[dismissed professors] posturing in radical *circles* as martyrs" (*Mencken*). **Coterie** stresses the notion of selectness or of congeniality within the small circle; **clique** heightens the implication of an often selfish or arrogant exclusiveness; as, "the Tunbridge *coterie*" (*Burney*); "We three formed a little *coterie* within the household" (*Symonds*); "the poetry of revolt is apt to become the poetry of a *coterie*" (*Lowes*); "The best English society—mind, I don't call the London exclusive

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

clique the best English society" (*Coleridge*); "To humanize [knowledge], to make it efficient outside the *clique* of the cultivated and learned" (*Arnold*).

setting. *Background, environment, milieu, mise-en-scène, backdrop.

settle. 1 *Set, fix, establish, firm.

Ana. *Secure, anchor, moor, rivet: *pacify, appease, conciliate, propitiate: *order, arrange.

Ant. Unsettle.

2 Determine, *decide, rule, resolve.

Ana. *Judge, adjudge, adjudicate: *close, end, conclude, terminate.

sever. *Separate, sunder, part, divide, divorce.

Ana. Rive, cleave, rend, split (see *TEAR*): *cut, hew, chop: *detach, disengage.

several. 1 *Distinct, separate, discrete.

Ana. Respective, individual, particular, *special, especial.

2 *Many, sundry, various, divers, numerous, manifold, multifold, multifarious.

Ana. *Single, separate, particular: detached, disengaged (see *DETACH*).

severally. Individually, respectively, *each, apiece.

severe, adj. *Severe, stern, austere, ascetic* are synonyms when they mean given to or manifesting discipline and restraint. *Severe* is applicable not only to persons, their looks, acts, thoughts, and utterances, but also to things for which persons are responsible, such as laws, penalties, judgments, and styles. In all these applications it implies rigorous standards of what is just, right, ethical, beautiful, and the like, and unsparing or exacting adherence to them; it not only excludes even a hint of laxity or indulgence, but it often suggests a preference for that which is hard, plain, or meager; as, to be as *severe* with oneself as with others; a *severe* teacher; a *severe* thinker; *severe* impartiality; *severe* in dress. "So *severe* is French taste and so acute is the French sense for harmony, that in its full flower any fashion is sure to be distinguished more by unity and measure than by caprice" (*Brownell*). Very often, however, the word suggests harshness or even cruelty; as, a *severe* penalty; *severe* discipline; *severe* criticism; a *severe* test of one's endurance. It is then, by extension, referable also to things for which persons are not responsible but which similarly impose pain or acute discomfort; as, a *severe* attack of lumbago; a *severe* winter; a *severe* climate; a *severe* headache. *Stern*, though it often implies severity when applied to persons, their acts, words, etc., stresses inflexibility or inexorability of temper; thus, a *severe* judge may appear kindly though dispassionately just, but a *stern* judge reveals no disposition to be mild or lenient; to be made of *stern* stuff is to have an unyielding will or an extraordinarily resolute character. Consequently, in extended use, *stern* is applied to that which cannot be escaped or evaded (as, *stern* necessity; "the *stern* compulsion of facts"—*Buchan*) or to that which is harsh and forbidding in its appearance or in its external aspects. "The breaking waves dashed high On a *stern* and rock-bound coast" (*Hemans*). "A marble bath that made cleanliness a luxury instead of one of the *sternest* of the virtues, as it seemed at home" (*Shaw*). *Austere* etymologically implies the absence of juiciness and sweetness characteristic of certain fruits, such as the crab apple and sloe plums. It is still occasionally used to describe the taste of some acrid fruits and wines, but it is chiefly applied to persons, their habits, their modes of life, the environments they create, the works of art they produce, and the like. In these latter applications, *austere* has continuously implied the absence of certain qualities comparable (but not similar)

to juiciness and sweetness in a fruit, such as feeling, warmth, color, animation, and ornament, and has therefore positively implied dispassionateness, coldness, reserve, barrenness, and the like. "My common conversation I do acknowledge *austere*, my behavior full of rigor" (*Brown*). In more recent use, although these implications are still retained, the word tends also to connote restraint, self-denial, economy of means, and stark simplicity, and to become a term of praise rather than of depreciation. "The *austere* dignity and simplicity of their existence" (*Pater*). "Mathematics, rightly viewed, possesses not only truth, but supreme beauty—a beauty cold and *austere*, like that of sculpture" (*B. Russell*). "He thought of the *austere* shining cleanness of the Arvold place, of the worn domesticity of his mother's house" (*M. Austin*). *Ascetic* etymologically implies laborious and exacting training or discipline. Through its reference to the spiritual exercises and acts of discipline (such as fasting and mortification) characteristic of monastic life in the Middle Ages, it acquired implications of self-denial, abstention from that which is pleasurable, and the courting of that which is painful or disagreeable. In modern use, these latter implications are often stressed to the exclusion of the earlier and fundamental one. "High nature amorous of the good, But touch'd with no *ascetic* gloom" (*Tennyson*). "A people possessed of the epicurean rather than the *ascetic* ideal in morals" (*Brownell*). In other use, the idea of discipline, especially by abstention from that which is pleasurable, or easy, or self-indulgent, for the sake of spiritual or intellectual ends, is emphasized. "For science is *ascetic*. It is a discipline and a control of personal impulse that could arise only in a relatively mature civilization" (*Baker Brownell*). "When *asceticism* is rational, it is a discipline of the mind and body to fit men for the service of an ideal" (*Lippmann*).

Ana. Exacting, oppressive, *onerous, burdensome: *rigid, rigorous, strict, stringent: *hard, difficult, arduous: harsh, rugged, uneven, *rough.

Ant. Tolerant: tender. — **Con.** Lenient, clement, *forbearing, merciful, indulgent: gentle, mild, *soft.

sex, n. *Sex, gender* come into comparison because both denote a character by which a thing is describable as masculine or feminine or as neither. *Sex*, however, applies strictly only to living things, especially to animals, but also to plants, which are identified by anatomical and physiological characteristics as male or female, or neither strictly nor clearly one or the other. *Gender*, except in vulgarly colloquial and humorous use or where anatomical or physiological differences are not implied (as, "black divinities of the feminine *gender*"—*Dickens*), is used only with reference to distinctions in words (primarily nouns and pronouns, but also adjectives and participles in inflected languages requiring correspondence between nouns and pronouns and their modifiers) which mark them as masculine, feminine, or neuter. As a rule, in English (the situation is quite different in many other languages) masculine *gender* is a characteristic of a noun or pronoun that refers to a male, feminine *gender*, of one that refers to a female, and neuter *gender*, of one that refers to a sexless thing. Convention, however, prescribes masculine or feminine *gender* for some sexless things, such as "ship" (feminine *gender* esp. in poetry).

shackle, v. Fetter, clog, trammel, *hamper, manacle, hog-tie.

Ana. *Restrain, curb, check, inhibit: *hinder, impede, obstruct, block, bar: restrict, circumscribe, confine, *limit.

Con. Disencumber, disembarass, *extricate: release, liberate, *free.

shade, n. 1 **Shade, shadow, umbrage, umbra, penumbra, adumbration** are here compared as meaning the comparative darkness caused by something which intercepts rays of light. **Shade** carries no implication of a darkness that has a particular form or definite limit, but the term often implies protection from the glare, heat, or other effect of the light that is cut off; as, "the forest, one vast mass Of mingling *shade*" (*Shelley*); "*chiaroscuro*, by which light reveals [in paintings] the richness of *shade* and *shade* heightens the brightness of light" (*H. Ellis*); "the trees afforded *shade* and shelter" (*Cather*). **Shadow**, on the other hand, usually applies to *shade* which preserves something of the form of the object which intercepts the light; as, "It [the garden]... has neither arbor, nor alcove, nor other *shade*, except the *shadow* of the house" (*Cowper*); "[he] saw... The *shadow* of some piece of pointed lace, In the Queen's *shadow*, vibrate on the walls" (*Tennyson*); "the shadowless winter, when it is all *shade*, and therefore no *shadow*" (*Jefferies*). Figuratively, *shade* implies darkness or obscurity; *shadow* (so also *shadowy*), insubstantiality or unreality; as, "there no *shade* can last In that deep dawn behind the tomb" (*Tennyson*); "'Is't real that I see?' 'No, my good lord; 'Tis but the *shadow* of a wife you see, The name and not the thing'" (*Shak.*). **Umbrage**, as here considered, applies chiefly to the shade cast by heavy foliage or trees, though sometimes it refers to the mass of trees or foliage which make for heavy shade; as, "branches... spreading their *umbrage* to the circumference of two hundred and seven feet" (*J. G. Strutt*); "The thrush sings in that *umbrage*" (*L. P. Smith*). **Umbra** now almost entirely, and **penumbra** fundamentally, are astronomical terms. *Umbra* applies to the perfect or complete shadow cast on the sun by the moon or the earth in an eclipse, and *penumbra* to the imperfect or partly illuminated shadow which often outlines or surrounds the umbra. *Umbra* rarely, and *penumbra* often, are used in extended senses, the former implying a complete overshadowing or eclipse, the latter denoting the marginal region or border between that which is clearly one thing or the other or in which the exact differences between one thing or another are so obscure as not to be clearly discernible. "His memory was eclipsed in the *umbra* of a more compelling personality" (*Irvine S. Cobb*). "Physiology having rudely investigated its phenomena upon the same level as other biological processes, it [love] has been stripped of the mystical *penumbra* in whose shadow its transcendental value seemed real, though hid" (*J. W. Krutch*). "The great ordinances of the Constitution do not establish and divide fields of black and white. Even the more specific of them are found to terminate in a *penumbra* shading gradually from one extreme to the other" (*Justice Holmes*). **Adumbration** (literally, a shadowing or a shadow) applies to something that is so faint or obscure a figure, sketch, or outline of something which actually exists or is to come that it serves as the shadow or hint of the latter. "The lugubrious harmony of the spot with his domestic situation was too perfect for him, impatient of effects, scenes, and *adumbrations*" (*Hardy*). "If the Parthenon has value, it is only as an *adumbration* of something higher than itself" (*Babbitt*).

Ana. Darkness, dimness, obscurity (see corresponding adjectives at **DARK**): *shelter, cover, retreat.

Con. Brightness, brilliancy, radiance, effulgence (see corresponding adjectives at **BRIGHT**): glare, glow, blaze (see under **BLAZE, v.**).

2 Tint. *color, chroma, hue, tinge.

3 Ghost, spirit, specter, *apparition, phantasm, phantom, wraith, fetch, revenant, spook, haunt.

4 *Touch, suggestion, suspicion, soupçon, tinge.

smack, spice, dash, vein, strain, tincture, streak. **Ana.** *Trace, vestige: tint, tinge (see **COLOR**).

shadow, n. *Shade, umbrage, umbra, penumbra, adumbration.

Ana. *Form, figure, shape, conformation, configuration: darkness, obscurity, dimness (see corresponding adjectives at **DARK**): silhouette, contour, *outline.

shadow, v. *Suggest, adumbrate.

Ana. *Foretell, forecast, predict, prognosticate: *foresee, foreknow, divine.

Con. *Reveal, disclose, discover, divulge, tell.

shake, v. 1 **Shake, tremble, quake, totter, quiver, shiver, shudder, quaver, wobble (or wabble), teeter, shimmy, didder, dither** come into comparison as meaning to reveal instability by vibrating, wavering, fluctuating, or the like. **Shake**, the ordinary and the comprehensive term, may imply any kind of instability, especially physical or emotional instability, that reveals itself in any of the particular ways suggested by the succeeding terms; as, to feel the ground *shake* beneath one's feet; he *shook* with fear; his body *shook* with laughter. **Tremble** applies specifically to uncontrollable shaking of the human body, especially when one is agitated or unmanned by fear, dread, ungovernable passion, or the like. "In this awful tempest of sound I *trembled* like a leaf" (*Hudson*). "She stood with her hand on the door-knob, her whole body *trembling*" (*S. Anderson*). "She is so radiant in her pure beauty that the limbs of the young man *tremble*" (*Meredith*). The term may, however, apply to animals and even to things that shake in a manner suggestive of trembling; as, "as though animated by a life of their own, the tails [of fighting cats] twitch and *tremble*" (*A. Huxley*); the bridge *shook*, as if *trembling*, for several hours before it collapsed. **Quake** is now often used in place of *tremble*, but it commonly carries a stronger implication of violent shaking or of extreme agitation; as, "His name was a terror that made the dead *quake* in their graves" (*Ouida*). In very precise speech or writing, the term usually suggests either an internal convulsion such as an earthquake (now more often, something suggestive of one) or something which rocks a person or thing to its foundations; as, "The sounding of the clock in *Venice Preserved*, makes the hearts of the whole audience *quake*" (*Addison*); "And from his [Milton's] touch sweet thunder flowed... And sanguine thrones and impious altars *quaked*, Prisons and citadels" (*Shelley*). **Totter** usually suggests great physical weakness such as that associated with infancy, extreme old age, or disease: it therefore often connotes a shaking that makes movement extremely difficult and uncertain or that forebodes a fall or collapse; as, the mast *tottered* before it fell. "The little calf That's standing by the mother. It's so young, It *totters* when she licks it with her tongue" (*Frost*). "This is the time to fear, When he [the bear] stands up like a tired man, *tottering* near and near" (*Kipling*). **Quiver** suggests a shaking comparable to the vibration of the strings of a musical instrument that is being played: it differs from *tremble* chiefly in being more often applied to things (as, aspen leaves *quiver* in the slightest breeze; the horse's skin *quivers* when he is annoyed by flies) or, when it is used in reference to persons or animals, in carrying a less necessary suggestion of fear or passion and a stronger implication of vibrating nerves (as, the little boy's lips *quivered* as he tried not to cry; his fingers *quivered* in his excitement; "I was *quivering* and tingling from head to foot"—*Kipling*; "eagerness that made their [the dogs'] flanks *quiver*"—*E. M. Roberts*). **Shiver** and **shudder** usually imply a momentary or short-lived quivering, especially of the flesh. **Shiver** typically suggests the effect of extreme cold (as, he came

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

into the house snow-covered and *shivering*), but it may apply to a similar quivering that results from a premonition, a foreboding, or the like (as, "Such thoughts... may make you *shiver* at first"—C. E. Montague), or to a sudden, often seeming, quivering of a thing (as, "His heart *shivered*, as a ship *shivers* at the mountainous crash of the waters"—Bennett; "When the first star *shivers* and the last wave pales"—J. E. Flecker). **Shudder**, on the other hand, usually suggests the effect of that which is horrible or revolting: physically it implies a sudden sharp quivering that for the moment affects the entire body (or mass); as, "When she saw The haggard father's face and reverend beard... all dabbled with the blood Of his own son [she] *shudder'd*" (Tennyson); " 'I am afraid of it,' she answered, *shuddering*" (Dickens); "it was one of those illnesses from which we turn away our eyes, *shuddering*" (Deland). **Quaver** sometimes implies continuous vibration or fluctuation, especially as an effect of something that disturbs (as, "The breeze... set the flames of the street lamps *quavering*"—Stevenson), but this, its earliest implication, is not as often apparent in current use as that of tremulousness (an implication partly derived from the denotation of the noun in music as a shake or trill). Consequently, *quaver* is now used chiefly in regard to voices, utterances, and the like, as affected by weakness or emotion; as, "A reedy, *quavering* voice" (Conan Doyle); " 'You will not leave me, dear?' But dread returned, and the words *quavered* as she spoke them" (Meredith). The remaining terms are less literary and likely to occur in informal speech or writing. **Wobble** implies an unsteadiness that shows itself in tottering, or in a quivering characteristic of a mass of soft flesh or of a soft jelly, or in a shakiness characteristic of rickety furniture; as, this table *wobbles*; "bumping when she trots, and *wobbling* when she canters" (Whyte-Melville); "her chin *wobbled* pathetically" (Howells). Often, in extended use, it implies vacillation; as, to *wobble* in one's opinions. **Teeter** implies an unsteadiness that reveals itself in seesawing motions (as, an inebriated man *teetering* as he stands; a spinning top losing its momentum *teeters* before falling; the plank *teetered* beneath his feet). **Shimmy** suggests the shaking of the body from the shoulders down, so as to simulate trembling, which is characteristic of the dance of that name and, therefore, usually suggests vibratory motions of an abnormal nature; as, " 'I often see the walls of my house *shimmying* a bit' " (Lucas); the *shimmying* (that is, abnormal vibration) of the front wheels of an automobile. **Didder** and **dither** are now chiefly dialectal terms implying a shaking through fear or excitement. They are often used in place of *tremble*, *quake*, *quiver*, or *shiver*, and sometimes imply merely mental confusion or uncertainty rather than a physical shaking.

Ana. Oscillate, fluctuate, vibrate, waver, *swing, sway.
2 Shake, agitate, rock, convulse are comparable when they mean to cause to move to and fro or up and down with more or less violence. **Shake**, the most general of these words, seldom, if ever, in any of its specific senses loses this basic meaning; however, it seldom conveys merely this idea. Very often, its meaning is narrowed but enriched by an implication of the particular intent or purpose of the movement; thus, to *shake* a rug implies an intent to dislodge dust; to *shake* a tree, to bring down its fruit; to *shake* a cocktail, to mix ingredients; to *shake* hands, to greet or to acknowledge an introduction; to *shake* one's fist, to threaten. Even in its extended or figurative use, *shake* commonly implies movement, usually physical movement; as, he was visibly *shaken*; they were unable to *shake* his belief in himself. **Agitate** usually, but not invariably, carries a much stronger implication of

tossing or of violent stirring than *shake*; it often also suggests a prolongation of the movement; as, a churn has a dasher or other device for *agitating* cream or milk; the aurora powerfully *agitates* a magnet. "The leaves on the trees were *agitated* as if by a high wind" (Hudson). In modern use *agitate*, when the agent is a person, usually carries connotations of excitement or disturbance. "Mr. Thompson *agitated* his eyebrows dreadfully. He was utterly lost" (Meredith). **Rock** suggests a swinging or swaying motion; it tends now to lose the implication of lulling derived from its earliest associations with the movement of a cradle and to emphasize those, such as of upheaving, derived from the violent swaying, as of a ship in a storm or of the earth in an earthquake; as, the wind *rocked* the house; the entire city was *rocked* by the explosion. Often, especially in figurative use, *rock* suggests, as *shaking* does not, tottering and peril of falling; as, the stock market was *rocked* by the rumor of war; constant insinuations finally *rocked* his faith in his friend. **Convulse** often implies more violence in, and more frequent repetition of, the motion than any of the others; it also commonly suggests a pulling to and fro or a wrenching, as of the body in a paroxysm or of the earth in seismic disturbances; as, "Lucetta... *convulsed* on the carpet in the paroxysms of an epileptic seizure" (Hardy); "Rome was *convulsed* by the disgrace of Julia, his [the Emperor's] daughter and only child" (Buchan); they were *convulsed* with laughter.

Ana. *Move, drive, impel: flourish, brandish, *swing, wave: disturb, derange, unsettle, *disorder.

shallow, adj. *Superficial, cursory, uncritical.

Ana. Slim, slight, slender, *thin: trivial, trifling, *petty, paltry: empty, hollow, idle, *vain.

sham, n. *Imposture, cheat, fake, humbug, fraud, deceit, deception, counterfeit, simulacrum.

Ana. *Pretense, pretension, make-believe, make-belief: *simulation, dissimulation: *trick, ruse, feint, wile.

sham, v. Feign, simulate, counterfeit, pretend, *assume, affect.

Ana. *Invent, create: ape, mock, mimic, imitate, *copy.

shame, n. *Disgrace, dishonor, disrepute infamy, ignominy, opprobrium, obloquy, odium, scandal

Ana. Humiliation, degradation, abasement (see corresponding verbs at ABASE): mortification, chagrin (see corresponding adjectives at ASHAMED).

Ant. Glory: pride.

shameless. **Shameless, brazen, barefaced, brash, impudent**, when applied to persons and their acts in defiance of the moral code or of social decorum, agree in meaning characterized by boldness and a lack of a sense of shame. **Shameless** implies a lack of effective restraints such as modesty, a sense of decency, an active conscience, concern for the respect of others, and the like; as, a *shameless* neglect of her children; *shameless* gossips; *shameless* graft; "a *shameless* sale of peerages" (J. R. Green). **Brazen** suggests a heart or conscience as hard as brass; it implies not only complete shamelessness but defiant insolence; as, a *brazen* hussy; at first a furtive, now a *brazen*, thief. "I knew a *brazen* minister of state, Who bore for twice ten years the public hate" (Swift). **Barefaced** implies absence of all effort to disguise or to mask one's transgressions: it connotes extreme effrontery; as, a *barefaced* lie; *barefaced* tyranny; *barefaced* inquisitiveness. **Brash** so strongly implies impetuosity that it does not stress shamelessness as clearly as the preceding words; however, it is often used in place of *shameless* when heedlessness and temerity make one indifferent to the calls of conscience, one's sense of decency, and the like; as, a *brash* intrusion on another's privacy; *brash* reporters. "And deeply I repented Of

brash and boyish crime" (V. Lindsay). **Impudent**, as here compared, not only carries all the implications of *shameless* but in addition it implies bold or pert defiance of principles of modesty or decency; as, *impudent* husies; "Conduct so sordidly unladylike that even the most *impudent* woman would not dare do it openly" (Shaw).

Ana. *Abandoned, profligate, dissolute: *hardened, indurated, callous: *vicious, villainous, iniquitous.

Con. Modest, pure, *chaste, decent: *shy, diffident, bashful.

shape, n. *Form, figure, conformation, configuration, Gestalt.

Ana. *Outline, contour, profile, silhouette: *appearance, look, aspect, semblance.

shape, v. *Make, form, fashion, fabricate, manufacture, forge.

shapeless. *Formless, unformed, chaotic, inchoate, amorphous.

Ana. *Rude, rough, crude.

Ant. Shapely. — **Con.** Proportionate, *proportional, commensurate.

share, v. **Share, participate, partake** come into comparison only when they mean to have, get, use, exercise, experience, or engage in something in common with another or others. All were once used transitively in this sense, but with the exception of *share*, they are now more often used intransitively than transitively. One *shares*, or, less often, *shares in*, something with another when one as the original owner or holder grants the part use, enjoyment, possession, or the like, to the other (as, I shall *share* my room with you if you cannot find another in the hotel; I shall bring a salad to the picnic which I hope to *share* with all) or when one as the receiver accepts the part use, enjoyment, possession, or the like, of something that belongs to or comes from another (as, she asked all to *share* in the salad; I *shared* my sister's room last night when we had a guest; the employees *shared* in the profits; "I deny, in short, that the reader must *share* the beliefs of the poet in order to enjoy the poetry fully"—T. S. Eliot). But *share* may also take for its subject a group, and imply a community of possession, enjoyment, or the like; as, "You do not *share* the great earth among you fairly" (Jefferies). One *participates*, or in current use *participates in* something, when one has or takes a part or a share in that thing, such as a work, an experience, an enterprise, or the like; as, to *participate* in a discussion; "May I ask you whether your wife *participates* in this undertaking?" (Meredith). "The commerce of the United States with foreign nations, is that of the whole United States. Every district has a right to *participate* in it" (Ch. Just. Marshall). A person or thing *partakes*, or *partakes of* (sometimes *in*) something, when he or it accepts, takes, or acquires a share of that thing, such as food, drink, a pleasure, a burden, or, often, its essential nature or quality; as, "Your papa invited Mr. R. to *partake* of our lowly fare" (Dickens); "We do not only meet to *share* each others' burdens, but to *partake* in each other's joys" (C. H. Spurgeon); "Adventurers who were willing to *partake* his fortunes" (Kinglake); "As the chief character is internally melodramatic, the story itself ceases to be merely melodramatic, and *partakes* of true drama" (T. S. Eliot).

Ana. *Communicate, impart: divide, dispense, *distribute.

sharp. **Sharp, keen, acute** come into comparison both in their general and extended senses. As used of things, *sharp* (the common word) applies to either an edge or a point; *keen*, esp. to an edge, rarely to a point; *acute* (commonly more or less technical) applies to an angle, tip, or end, formed by lines or edges converging in a

sharp point; as, *sharp* (or *keen*) as a razor; *sharp* (not *keen*) as a needle; as *acute* as the vertex of an isosceles triangle. As applied to that which affects the senses, *sharp* often suggests a disagreeably cutting quality; as, *sharp* as vinegar; a *sharp* voice; a *sharp* flash; a *sharp* wind. Frequently, however, it emphasizes distinctness or clearness of definition; as, a *sharp* contrast. "While one notes each of the unnaturally *sharp* and lustrous images it [a searchlight] picks out" (E. Wharion). **Keen**, in contrast, suggests a bracing, zestful, or piquant quality. "The wind came *keen* with a tang of frost" (Masefield). "Very *keen* is the savour of the roast beef that floats up" (A. C. Benson). **Acute** is rare in this application, being applied chiefly to high-pitched tones; as, an *acute* accent. As applied to the senses themselves, *sharp* is used esp. of sight and hearing, *keen*, of sight and smell, *acute*, of hearing; as, *sharp*-sighted; *keen*-sighted; *sharp* ears; his hearing was still *acute*; dogs *keen* of scent. As characterizing pleasures and pains, *sharp* suggests most definitely that which cuts or pierces, *keen* implies intensity, *acute* implies poignancy; as, a *sharp* pain; *keen* zest; *acute* anguish. With reference to persons or personal qualities, *sharp* often implies overcleverness or trickiness; *keen* suggests clearheadedness, quickness, and sometimes shrewdness; *acute* suggests penetration or nicety of discrimination; as, *sharp* practice; a *sharp* customer; a *keen* intellect. "His *keen*, worldly face" (Dr. J. Brown). "Rather...an *acute* thinker than a subtle one" (De Quincey). "His criticisms are always sensible, never *acute*" (Landor).

Ana. *Incisive, trenchant, cutting, biting: mordant, mordacious, *caustic, scathing: piercing, penetrating, probing (see ENTER): tricky, cunning, artful, wily, *sly. **Ant.** Dull: blunt.

shear, n. *Stress, strain, pressure, tension, thrust, torsion.

shed, v. *Discard, cast, molt, exuviate, slough, scrap, junk.

Ana. Remove, shift, transfer (see MOVE): reject, repudiate, spurn (see DECLINE, v.).

shee. *Fairy, faery, fay, elf, sprite, pixy, gnome, dwarf, goblin, brownie, puck, nix, leprechaun, banshee.

sheen. *Luster, gloss, glaze, glare.

Ana. Polishing or polish, shining or shine, burnishing or burnish (see corresponding verbs at POLISH): gleaming or gleam, glittering or glitter, flashing or flash (see corresponding verbs at FLASH).

sheer, adj. 1 *Pure, simple, absolute.

Ana. *Outright, out-and-out, arrant, unmitigated.

2 Precipitous, abrupt, *steep.

Ana. Perpendicular, *vertical.

sheer, v. *Turn, divert, deflect, avert.

shell, v. *Husk, hull, shuck.

shelter, n. **Shelter, cover, retreat, refuge, asylum, sanctuary, ark** come into comparison when they mean the state or a place in which one is safe or secure from that which threatens or disturbs. **Shelter** usually implies the protection of something that temporarily covers, as a shield, a roof, or any structure that prevents the entrance of that which would harm or annoy; as, to seek *shelter* from an approaching storm; *shelters* must be provided for sheep in winter; "the trees afforded shade and *shelter*" (Cather); "Given only a little *shelter*, in the corner of the hedges or under trees and copes they [brambles] retain green leaves till the buds burst again" (Jefferies). **Cover** usually implies complete concealment; it is, as here compared, often applied to a shelter of underbrush (or, by extension, to something similarly thick or protective); as, "they returned as wolves return

to cover" (Kipling); "The [pheasant's] eye betrayed it . . . the bird . . . looking up from its cover, was immediately observed" (Jefferies); when the storm broke, they rushed to cover. **Retreat** stresses retirement, usually voluntary retirement, from danger or annoyance, and escape to a condition or place promising safety, or security or peace. It therefore often suggests remoteness, solitude, quiet, or, in religious use, conditions affording opportunities for prayer and meditation; as, a hermit's retreat. "Ah, for some retreat Deep in yonder shining Orient, where my life began to beat" (Tennyson). **Refuge** also suggests an attempt to escape that which threatens one's peace, safety, happiness, or the like, but it usually implies fleeing, and sometimes also a pursuer, or something, such as a thought or emotion, that harasses; as, to refuse refuge to political exiles; the escaped convict found refuge in a deserted house. "Our clubs are . . . not refuges for bored husbands and homeless bachelors" (Brownell). "Stoicism is the refuge for the individual in an indifferent or hostile world too big for him" (T. S. Eliot). **Asylum**, in precise use, adds to refuge the implications of exemption from seizure or spoliation, and the finding of a protector, of a place outside the jurisdiction of the law, or the like; as, the embezzler sought asylum in a foreign land; France has time after time provided asylum for deposed or abdicated monarchs of other countries; "[the United States] Asylum of the oppressed of every nation" (*Democratic Platform*, 1856). **Asylum**, which in its Greek original referred specifically to a temple, altar, or statue of a god in or by which a criminal might take refuge, was later applied to Christian churches where, by medieval law, fugitives from an enemy or from the law might find immunity from seizure. **Sanctuary**, however, is the precise term for the Christian asylum; even in modern use and in its extended applications, it stresses the sacredness of the place and its claim to reverence or inviolability; thus, a sanctuary for wild life is an area which is exempt from intrusion by hunters, trappers, and the like, or in some cases (then often called refuge by distinction), where predatory animals are controlled so that the more desirable forms of life which are their prey may be allowed to flourish. "If thou breathest aught that can attain the honour of my house, by Saint George! not the altar itself shall be a sanctuary" (Scott). "It came over Mark to offer him sanctuary in the clergy-house, but he realized almost simultaneously . . . that it would cause a scandal and not benefit the murderer" (C. Mackenzie). **Ark** (now usually ark of refuge) implies reference to the boat in which Noah and his family were preserved in the Deluge, and usually, therefore, applies to a place, state, an institution, or the like, to which one has recourse when dangers or difficulties overwhelm one. "The United States has been . . . an ark of refuge to the people of Europe" (J. Bright). "How simple and charming is her picture of the life of religion which she chose as her ark of refuge" (Arnold).

Ana. Protection, safeguarding or safeguard (see corresponding verbs at DEFEND): *harbor, haven, port.

shelter, *v.* *Harbor, lodge, house, entertain, board.

Ana. *Defend, protect, shield, guard, safeguard: *receive, accept, admit.

shield, *v.* Protect, guard, safeguard, *defend.

Ana. Preserve, conserve, *save: *harbor, shelter, lodge, house.

shift, *v.* *Move, remove, transfer.

Ana. Displace, *replace: *change, alter, vary: veer, *swerve, deviate.

shift, *n.* Makeshift, expedient, *resource, resort, stopgap, substitute, surrogate.

Ana. *Device, contrivance, contraption: ruse,

*trick, stratagem, maneuver, wile, feint, artifice. **shimmer**, *v.* *Flash, gleam, glance, glint, sparkle, glitter, glisten, scintillate, coruscate, glimmer, twinkle, glister, spark.

shimmy, *v.* *Shake, tremble, quake, totter, quiver, shiver, shudder, quaver, wobble, teeter, didder, dither.

shine, *v.* *Polish, burnish, furbish, buff.

ship, *n.* *Boat, vessel, craft, argosy.

shipshape. *Neat, tidy, trim, trig, snug, spick-and-span.

shiver, *v.* Quiver, shudder, quaver, *shake, tremble, quake, totter, wobble, teeter, shimmy, didder, dither.

shoal, *n.*¹ *Flock, herd, drove, pack, bevy, covey, gaggle, flight, swarm, school.

shoal, *n.*² **Shoal, bank, reef, bar** are here compared only as meaning a shallow place caused by an elevation in a sea or large body of water. All of these terms have their ordinary nontechnical senses; the first three, however, are, in recent geographical usage, employed with great precision as technical terms. In ordinary use, **shoal** is applied to any shallow place, especially one that is difficult to navigate (as, "Shoals ahead!"; dangerous shoals in uncharted waters), **bank** (or often in the plural **banks**) is applied to one that is formed by a sandy, gravelly, or other elevation but is deep enough to make navigation safe for lighter craft such as fishing vessels (the Grand Bank, also called the Banks of Newfoundland, is a noted fishing ground), **reef**, to one where the rocks protrude from the water (especially at low tide) or lie dangerously close to its surface (as, the reef-bound shores of Bermuda; coral reefs). Technically, **shoal** is applied to elevations which are not rocky and on which the water is not more than 6 fathoms (or 11 meters) deep, **bank** to a similar elevation on which the water is between 11 and 200 meters deep, and **reef** to a rocky elevation on which the water (at low tide) is 6 fathoms or less in depth. **Bar** carries implications found in many senses of that word, those of length, narrowness, and hindrance. It is applied to a ridge of sand (a sand bar), gravel, or the like, piled up at (often across or nearly across) a river's mouth or an entrance to a harbor and obstructing navigation.

shock, *n.*¹ Cock, stack, heap, pile, mass, bank. See under HEAP, *v.*

shock, *n.*² 1 Collision, clash, concussion, *impact, impingement, percussion, jar, jolt, brunt.

Ana. *Encounter, skirmish: *attack, assault, onslaught, onset: shaking, rocking, agitation, convulsion (see corresponding verbs at SHAKE).

2 *Paralysis, palsy, apoplexy, stroke.

shock, *v.*¹ Cock, stack, *heap, pile, mass, bank.

shock, *v.*² Dialectal variant of SHUCK.

shocking. Appalling, *fearful, awful, dreadful, frightful, terrible, terrific, horrible, horrific.

Ana. *Ghastly, gruesome, lurid, macabre, grisly, grim: odious, abhorrent, abominable, *hateful: *repugnant, repellent, distasteful, obnoxious.

shoot, *v.* *Fly, dart, float, skim, scud, sail.

Ana. *Speed, hasten, hurry, quicken.

shoot, *n.* **Shoot, branch, bough, limb** come into comparison only when they mean one of the members of a shrub or a tree that are outgrowths from the trunk or stem or from its ramifications. The words are not technical botanical terms, but in general use they carry specific and distinctive implications. **Shoot** and **branch** are referable to most plants as well as to shrubs and trees, and both imply development from a bud. **Shoot**, however, stresses actual growing and therefore applies chiefly to any young, undeveloped member. **Branch** suggests a spreading out by dividing and subdividing and applies to any more or less fully developed member, whether it

emanates directly from the trunk or stem, or from that outgrowth or one of its subdivisions. **Bough** is now a more literary term than either of the preceding terms. It is not interchangeable with *shoot* for it usually suggests foliage and fruit or flowers. Although it is often used interchangeably with *branch* and is sometimes thought of as a large or main branch, it now carries a comparatively weak implication of ramification and a strong connotation of full seasonal development; thus, good usage seems to indicate that *bough* is preferred when the shrub or tree is in leaf or bloom, and *branch* when the shrub or tree is stripped of foliage or its members are thought of as barren or dead; as, loaded *boughs*; pine *boughs* for Christmas decorations; bare *branches*. "Superfluous *branches*. We lop away, that bearing *boughs* may live" (*Shak.*). "In a drear-nighted December, Too happy, happy tree, Thy *branches* ne'er remember Their green felicity" (*Keats*). "I am sick of endless sunshine, sick of blossom-burdened *bough*. Give me back the leafless woodlands where the winds of Springtime range" (*Kipling*). **Limb**, as here compared, is seldom used of shrubs, but only of large trees; it applies commonly only to a large branch that grows directly out of the trunk of a tree or to a member produced by the forking of the trunk; as, "with *limbs* of British oak" (*Cowper*); "The knotty *limbs* of an enormous oak" (*Shelley*).

shopworn. *Trite, hackneyed, stereotyped, threadbare. **Ana.** Wasted (see HAGGARD): attenuated, diluted, thinned (see THIN, v.): antiquated, obsolete, archaic (see OLD).

shore, n. **Shore, coast, beach, strand, bank, littoral, ripa, foreshore** agree in denoting land bordering a body or stream of water. **Shore** is the general word for the land immediately bordering on the sea, a lake, or a large stream. **Coast** denotes the land along the sea only, regarded especially as a boundary. **Beach** applies to the pebbly or sandy shore washed by the sea or a lake; as, a rocky *shore* with here and there a cove with a *beach*. Both *shore* and *beach* denote a place of resort for pleasure or vacation. *Shore*, however, usually indicates proximity to the sea; as, to spend the summer at the *shore*. *Beach*, on the other hand, suggests a place of resort for swimmers or sun bathers; as, to spend a part of each day at the *beach*. **Strand** is elevated or poetical for *shore* or *beach*. "To this lakeside, as to the holiest *strand* in Europe, pilgrims full of soul were drawn in thousands" (*L. P. Smith*). **Bank** denotes the steep or sloping margin of a stream. **Littoral** is a somewhat formal or pretentious term, occurring especially in geographic, political, and scientific writings, for the whole or an extended, clearly specified portion of the coast of a particular sea or country; it may imply extension farther inland than *coast* implies. "The whole Mediterranean *littoral* is... subject to earthquakes" (*Scribner's*). **Ripa** is still more uncommon, but it is the technical term for the bank of a river, or at least so much of it and of the water which washes it as belongs legally to owners of land bordering on the stream. Its derivative adjective *riparian* is found chiefly in the legal term *riparian rights*. **Foreshore** is applied sometimes to the part of the shore between high and low watermarks, but it is also at other times extended to include the beach.

short. 1 *Brief.

Ana. Decreased, lessened, reduced, diminished (see DECREASE): shortened, abridged, abbreviated, curtailed (see SHORTEN): *concise, terse, laconic.

Ant. Long.

2 Crisp, brittle, friable, *fragile, frangible.

shorten. **Shorten, curtail, abbreviate, abridge, retrench** agree in denoting to reduce in extent, especially by

cutting, but they vary so greatly in their idiomatic associations and in some of their implications that they are not always interchangeable. **Shorten** commonly implies reduction in length, either in dimension or duration; as, to *shorten* a road by eliminating curves; to *shorten* one's stay. Also, it is often used more or less figuratively of apparent rather than actual length; as, they *shortened* the journey by telling stories. **Curtail** adds to *shorten* the implication of docking, or of making cuts that impair completeness or cause deprivation; as, the interruption *curtailed* his speech; the outdoor ceremony was *curtailed* because of the storm; *curtailed* rights. **Abbreviate**, except in humorous use, is now said chiefly of words or phrases. It suggests shortening by contraction, omission, or substitution of a symbol, yet in such a way that the brief form comes to stand for the original word or phrase and to convey the same meaning. **Abridge** expresses reduction in compass or scope rather more than in length, but it usually implies the retention of all that is essential, and the relative completeness of that which results; as, to *abridge* a dictionary; all laws *abridge* liberty. "Thus ended her relation, which I have *abridged*" (*Goldsmith*). **Retrench** stresses reduction in extent or costs of something felt to be in excess; as, to *retrench* expenses. "Any *retrenchment* of their generous way of living would be a hardship for her" (*Cather*).

Ana. Reduce, *decrease, lessen, diminish: *contract, shrink, condense.

Ant. Lengthen, elongate; extend.

short-lived. *Transient, transitory, passing, ephemeral, momentary, fugitive, fleeting, evanescent.

Ant. Agelong.

should. *Ought, must, have, have got.

shove, v. *Push, thrust, propel.

Ana. *Force, constrain, oblige, compel, coerce: impel, drive, *move.

show, v. 1 **Show, manifest, evidence, evince, demonstrate** are synonymous terms when they mean to reveal something outwardly as by a sign or signs or, when the subject of the verb is the sign or signs, to serve to make something outwardly apparent or visible. **Show**, in this sense, as in its other major sense, implies enabling others to see, but in this case that which is revealed can only be inferred from one's acts, words, looks, or the like; as, he never *shows* what he thinks; a lift of the eyebrow and a shrug of the shoulder *show* their displeasure. "Tony... asked a question or two designed to *show* his intelligence" (*Arch. Marshall*). "In this decision he *showed* his capacity for extreme boldness" (*Buchan*). **Manifest** implies a fuller, plainer, and more indubitable revelation than *show*. "In this was *manifested* the love of God toward us, because that God sent his only begotten Son into the world, that we might live through him" (1 John iv. 9). "In handwriting the Chinese believe that the inner personality of the writer is directly *manifested*" (*Binyon*). "As technically *manifested* in Literature it [style] is the power to touch with ease, grace, precision, any note in the gamut of human thought or emotion" (*Quiller-Couch*). **Evidence** is often used in place of *show* (as, to *evidence* one's appreciation), but in highly discriminating use it specifically implies that the outward act, utterance, or the like, serves as proof of the existence or the actuality of something not fully proved or in question; as, he argued that their hostility was *evidenced* by certain acts which could be construed as trespasses. "It follows... that if an appointment was to be *evidenced* by any public act, other than the commission, the performance of such public act would create the officer" (*Ch. Just. Marshall*). **Evince**, in earlier use as strong in its implication of proof as *evidence*, is now considerably the weakest of the terms

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

here discriminated. It merely implies some outward marks or tokens, usually of an interest, an emotion, a power, or the like; as, so far as is known, he has *evinced* no interest in the project. "Cashel, bitterly humiliated by his own tears, and exasperated by a certain cold triumph which his captor *evinced* on witnessing them" (*Shaw*). "[In English slang] you see the old temperament of the race still *evinced* itself; still shying away from the long abstract word" (*C. E. Montague*). **Demonstrate** (see also **PROVE**, 1) is used chiefly in reference to feelings; it ordinarily implies external signs such as effusiveness, enthusiasm, emotional excitement, and the like: the verb is still used in this sense, but these implications come out more strongly in the noun *demonstration* and in the adjective *demonstrative*; as, to *demonstrate* one's approval by loud applause; a popular *demonstration* of loyalty. "Paul was a person who *demonstrated* all his sentiments" (*Thackeray*).

Ana. *Reveal, disclose, discover: present, *offer, proffer, tender.

Con. *Hide, conceal, secrete.

2 Show, exhibit, display, expose, parade, flaunt, as here compared, agree in meaning to present in such a way as to invite notice or attention. One *shows* anything which one enables another or others to see or to look at, as by putting it forward into view intentionally or inadvertently or by taking another where he may see it; as, to *show* one's tongue to the doctor; to *show* one's new home to one's friends; to *show* the city to an out-of-town guest. One *exhibits* anything which one puts forward prominently or openly, either with the express intention or with the result of attracting others' attention or inspection; as, to *exhibit* the museum's collection of Whistler engravings; to *exhibit* articles made by children in a mission school; in many fashionable gown shops, garments are not *exhibited* but are *shown* only to prospective purchasers; to *exhibit* unreasonable fear. "If any crave redress of injustice, they should *exhibit* their petitions in the street" (*Shak.*). One *displays* anything that one spreads out before the view of others or puts in a position where it can be seen to advantage or with great clearness; as, the exhibition of pictures was criticized because the best paintings were not properly *displayed*. "Before a contest begins, the owner brings in his cock and, holding it firmly by the tail, allows it to struggle and strain in order to *display* its fierceness and strength" (*V. Heiser*). "The host took Father Vaillant through his corrals and stables to *show* him his stock. He *exhibited* with peculiar pride two cream-coloured mules, stalled side by side. With his own hand he led them out of the stable, in order to *display* to advantage their handsome coats" (*Cather*). One *exposes* something when one brings it out of hiding or concealment, or from under cover, and shows, exhibits, or displays it consciously or unconsciously. The term sometimes means little more than to exhibit or display. "He...looked me over as if I had been *exposed* for sale" (*Conrad*). "We were reluctant to *expose* those silent and beautiful places [a newly discovered Indian village] to vulgar curiosity" (*Cather*). Oftentimes it means to reveal publicly something (especially something disagreeable) that has been or should be concealed; as, to *expose* one's ignorance. "It was my duty to leave no stone unturned to discover and *expose* the awful truth" (*R. Macaulay*). Very frequently it carries the additional implication of unmasking. "It was...his friends...that he attacks in this terrible story of the passing stranger who took such a vitriolic joy in *exposing* their pretensions and their hypocrisy" (*Van W. Brooks*). One *parades* anything which one displays ostentatiously or arrogantly; as, the pianist was accused of *parading* his

technical dexterity; to *parade* one's honesty; "Henry drove so well, so quietly...without *parading* [his skill] to her" (*Austen*). One *flaunts* something when one parades it shamelessly, often boastfully, and offensively. "They *flaunt* their conjugal felicity in one's face" (*Wilde*). "And ye vaunted your fathomless power, and ye *flaunted* your iron pride" (*Kipling*).

Ana. *Indicate, betoken, attest, bespeak, argue, prove: intimate, hint, *suggest.

Ant. Disguise.

show, n. *Exhibition, exhibit, exposition, fair.

showy. **Showy, pretentious, ostentatious, pompous** come into comparison as meaning given to making or presenting, as a thing, an outward display that is, by implication, greater than that which is justifiable. **Showy**, the ordinary term, carries less definite implications than the other words. It always implies an imposing, striking, or impressive appearance: it often also suggests cheapness, inferiority, or poor taste (as, "*showy* brass ware"—*Shaw*; *showy* furniture; *showy* decorations), or conspicuousness because of largeness, gorgeousness of coloring, or the like (as, a *showy* wallpaper design; *showy* peonies), or overattention to superficial qualities (as, "The *showy* talents, in which the present age prides itself"—*Newman*). **Pretentious** (see also **AMBITIOUS**, 2) suggests even less warrant for display for it usually implies an appearance that is not justified by the thing's actual value or actual cost or by the person's actual worth, rank, performance, or the like: the term therefore always implies a criticism of the person or thing that is so described. "I'd rather you didn't call me 'sir'...it might give rise to the idea that I had asked you to... It might appear rather *pretentious*" (*C. Mackenzie*). "He did not, like some more *pretentious*...critics, occupy himself with reviewing and bluepencilling literary reputations already well established" (*T. S. Eliot*). "A brilliant sham, which, like a badly built and *pretentious* house, looks poor and shabby after a few years" (*Cather*). **Ostentatious** stresses vainglorious display or parade, but it does not necessarily imply either showiness or pretentiousness; as, "*ostentatious* public charities" (*Wilde*); "the *ostentatious* simplicity of their dress" (*Macaulay*); "*ostentatious* funerals" (*L. P. Smith*). "Whoever wishes to attain an English style, familiar, but not coarse, and elegant, but not *ostentatious*, must give his days and nights to the volumes of Addison" (*Johnson*). **Pompous** implies showiness or ostentatiousness dictated usually by a love of ceremony or, more often, by a solemn and exaggerated self-importance; as, "this most *pompous* marriage-feast" (*Shak.*); "this *pompous* show Of art" (*Wordsworth*); "I have to laugh when people are *pompous* and absurd" (*R. Macaulay*). "A well-meaning, civil, prosing, *pompous* woman, who thought nothing of consequence but as it related to her own...concerns" (*Austen*).

Ana. *Gaudy, tawdry, garish, flashy, meretricious: resplendent, gorgeous (see **SPLENDID**): opulent, sumptuous, *luxurious.

shrew. Scold, vixen, mertrgant, barge, *virago, amazon. **shrewd.** **Shrewd, sagacious, perspicacious, astute** agree in meaning acute in perception and sound judgment, especially in reference to practical affairs. **Shrewd** implies native cleverness, acumen, and an almost uncanny ability to see below the surface; it often also connotes hard-headedness; as, a *shrewd* bargain; a *shrewd* observer; a *shrewd* remark; "[He] is...sensible and *shrewd*, with a considerable fund of humor" (*Smollett*); "the *shrewd* wisdom of an unlettered old woman" (*Paler*). **Sagacious**, originally applied to a dog keen in the scent of his quarry, is now usually referred to men, their decisions, their

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

judgments, their methods of pursuing their ends, and the like: it stresses penetration, discernment, judiciousness, and often, farsightedness. "[Lincoln] the kindly, earnest, brave, foreseeing man, *sagacious*, patient, dreading praise, not blame" (J. R. Lowell). "If they have not the same fund of acquired knowledge, [they] are obliged to rely more on individual *sagacity*" (Hazlitt). *Perspicacious* originally was applied to physical sight and meant extraordinarily sharp-sighted; it is now applied chiefly to mental sight, or insight, and suggests unusual power to see through and to understand that which is dark, hidden, mysterious, and the like; as, a *perspicacious* reader of character; a *perspicacious* critic. "We must make allowance also for those blind-spots which are found in the most *perspicacious* mortals" (L. P. Smith). *Astute* implies a combination of shrewdness and perspicacity and often, in addition, connotes an ability to keep one's counsel or an incapacity for being fooled, especially where one's own interests are concerned; as, "Savages . . . are often as . . . *astute* socially as trained diplomats" (W. James); "The victim of *astute* sharpers" (Thackeray); "The man who can make millions by an *astute* business deal" (J. A. Hobson). *Astute*, opprobriously used, heightens the suggestion, sometimes present in *perspicacious*, of artfulness, diplomacy, or craft. It may connote merely shrewd discernment and sagacity.

Ana. Knowing, *intelligent, smart, clever, quick-witted: politic, diplomatic, smooth (see SUAVE): *wise, prudent, sensible, judicious: penetrating, piercing, probing (see ENTER).

shrine. *Altar, tabernacle, chantry.

shrink. 1 *Contract, constrict, compress, condense, deflate.

Ana. *Decrease, reduce, diminish, lessen: *shorten, abridge, retrench, curtail.

Ant. Swell. — **Con.** *Expand, amplify, distend, dilate, inflate.

2 *Recoil, flinch, quail, blench, wince.

Ana. Cringe, cower (see FAWN): retreat, *recede: balk, shy, boggle, scruple, *demur.

shrive. *Confess, absolve, remit.

shrivel. *Wither, rivel, wizen.

Ana. Parch, desiccate, *dry: sear, scorch, *burn.

shuck or shock, v. *Husk, hull, shell.

shudder, v. Shiver, quiver, quaver, *shake, tremble, quake, totter, wobble, teeter, shimmy, didder, dither.

shun. Avoid, evade, elude, *escape, eschew.

Ana. *Decline, refuse, reject: balk, shy, scruple, *demur, stick, stickle: scorn, disdain, *despise.

Ant. Habituate.

shut, v. *Close.

shut out. Eliminate, *exclude, debar, rule out, black-ball, disbar.

Ana. *Prevent, preclude, obviate: *hinder, obstruct, block, bar.

shy, adj. *Shy, bashful, diffident, modest, coy* agree in meaning showing disinclination to obtrude oneself in the presence or company of others. *Shy* implies a shrinking, sometimes constitutional, sometimes the result of inexperience, from familiarity or contact with others; shyness usually manifests itself in a certain reserve of manner or in timidity in approaching others. "The savage . . . is a *shy* person, imbued with the notion that certain things are not to be talked of to strangers" (Inge). "They shook hands and opened a conversation instantly; for Constance . . . had lost all her *shyness* in the shop, and could chatter with anybody" (Bennett). *Bashful* implies an instinctive or constitutional shrinking from public notice that usually expresses itself in awkwardness of demeanor, and is especially characteristic of childhood and adolescence; as applied to mature persons, it connotes abnormal or excessive shyness. "My sudden appearance frightened [the children] into *bashfulness*. They remained for a moment playing on their lips with their fingers, and now and then stealing a *shy* glance from under their eyebrows" (Irving). "Like Summer rose, The *bashful* maiden's cheek appeared" (Scott). *Diffident* implies a distrust, which may or may not be warranted, of one's own ability, opinion, or powers: it gives rise to hesitation in their exercise. "Far better that the task should be entrusted to one who had no *diffidence*, no hesitation, but a sincere confidence in his power of dealing with the difficulties of the situation" (A. C. Benson). "The schoolboy's *diffidence*—his unwillingness to hear his own voice attempting the strange tongue—will vanish; a *sense* of mastery will replace his distrust" (Grandgent). *Modest*, without implying (like *diffident*) self-distrust, denotes an absence of all undue confidence in oneself or one's powers. "Bingley has great natural *modesty*, with a stronger dependence on my judgment than on his own" (Austen). "My native *modesty* is such, that I have always been shy of assuming the honorable style of Professor, because this is a title I share with so many distinguished men . . . who adorn it, I feel, much more than I do" (Arnold). *Coy* suggests assumed or affected shyness, often with the further implication of coquetry. "I was vexed, and resolved to be even with her by not visiting the wood for some time. A display of indifference on my part would, I hoped, result in making her less *coy* in the future" (Hudson).

Ana. *Timid, timorous: wary, chary, *cautious, circumspect.

Ant. Obtrusive.

shy, v. Balk, boggle, scruple, *demur, jib, stickle, stick, strain.

Ana. *Recoil, shrink, quail, blench: *hesitate, waver, falter, vacillate.

sib. *Tribe, clan, horde, sept.

sick. *Sick, ill*, in the sense of not in sound health or afflicted with a bodily disorder, vary in meaning more in England and some other British countries than they do in the United States, where in general there is little difference in their significance. In both literary and colloquial use in the United States and in literary use in other English-speaking countries, *sick* is the ordinary term to describe a person who is ailing, indisposed, suffering from a disease or the like, or the condition of one who is so afflicted; as, he is a very *sick* man; President Wilson's friends were not aware of how *sick* he was; their children are *sick* half of the time. In Great Britain and many parts of the British Empire, *sick*, especially in colloquial use, now usually means nauseated, especially violently nauseated; thus, in the United States, "to feel *sick*" may carry that meaning but it may also mean to have feelings that indicate one is coming down or is down with a disease; in Great Britain it usually means to have sensations that warn one of an approaching vomiting spell. It is this sense which prevails in compounds where *sick* is the second element and the conveyance in which, or medium through which, one travels is the first element; as, *trainsick, carsick, airsick, seasick*. However, in all use, *sick* often implies actual suffering from other causes than disease, and may suggest great unease, desperate boredom, unsatisfied longing, or the like; as, she was *sick* at heart through anxiety; "[To] medicine the *sick* soul to happy sleep" (Shelley); "We [became] . . . heartily *sick* in the ensuing years of its incessant repetition" (V. Heiser); "I am a woman, *sick* for passion" (Amy Lowell). **III** is also used in the United States in place

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

of *sick* in the ordinary sense, but it is more often employed colloquially in phrases such as "ill health," where its relation to its earlier sense of bad or evil is clear, than in phrases such as "an ill person," "he is ill with pneumonia," because of a more or less common feeling that the term is slightly affected. In British use, on the other hand, *ill* is now generally accepted in preference to *sick* in the sense of not being in good health, or of being afflicted with a disease.

Ant. Healthy.

side. *Phase, aspect, facet, angle.

sidereal. *Starry, stellar, astral.

siege, n. *Blockade.

sieve, v. *Sift, riddle, screen, bolt, winnow.

sift, v. Sift, sieve, riddle, screen, bolt, winnow agree in meaning to subject to a process whereby the coarser, larger, or heavier parts are separated from those that are finer, smaller, or lighter. Sift, and the much rarer sieve, in literal use imply a passing of a pulverized or granulated substance, such as flour, sugar, meal, or ashes, through a sieve (typically, a boxlike or basinlike utensil with meshes or holes on the bottom) for the sake of freeing the substance from extraneous matter or from coarser particles or, sometimes, to separate the particles of a compact mass: the terms may suggest that the process is performed either for the sake of what passes through the meshes or for the sake of what does not pass through them; as, *sift* the flour three times before adding it to the other ingredients; he always *sieves* his ashes to extract unburnt coals. But *sift* is also very often employed in an extended sense. Figuratively, it implies a careful testing in a manner suggestive of a passing through a sieve, as by careful scrutiny, examination, analysis, so that the true is distinguished from the false, the important from the unimportant, the relevant from the irrelevant, the valuable from the worthless, and the like; as, to *sift* the mass of evidence; "documents, carefully *sifted* from other papers of less moment" (J. A. Symonds); "he [Socrates] attacked and *sifted* the ethical conceptions of his time: 'What is justice?' 'What is piety?' 'What is temperance?'" (G. L. Dickinson). Riddle and the now more common screen also imply passing through a sieve or a screen (a similar apparatus mounted on a frame), but they suggest the use of an apparatus with a coarse enough mesh to separate relatively smaller particles from those that are larger, for any one of several ends; as, to *riddle* sand so as to extract all gravel, shells, and the like; to *riddle* gravel so as to extract all pebbles, cobbles, and the like; to *screen* coal so as to separate it into the sizes known as pea coal, egg coal, stove coal, and the like; to *screen* loam to remove stones, or the like. Both *riddle* and *screen* are also used in place of *sift*, though the tendency is to employ them in reference to coarser substances than flour, sugar, etc. Bolt is chiefly a miller's term, used specifically in reference to the process of sifting or screening through a loose-meshed cloth for the sake of eliminating the bran from the flour; as, "to *bolt* the bran From the pure flour" (Pope); *unbolted* flour is flour which contains particles of bran. Winnow differs from the other words of this group in its literal sense in implying the use of a fan and the separation thereby of the chaff from the valuable or nutritive part of grain; as, "He *winnoweth* barley to night in the threshingfloor" (Ruth iii. 2). Like *sift*, *winnow* is now often used in a figurative sense, implying the elimination by a process such as analysis, selection, or assorting, the results of which suggest a fanning away of the false, the bad, the worthless, or the useless and the leaving of only that which is true, good, or otherwise valuable; as, "Winnow from the coming step of time All chaff of

custom" (Keats). "There is a simplicity of diction which reflects a meagre and barren stock; there is also a simplicity which results from the *winnowing* of a rich abundance" (Lowes).

Ana. *Analyze, resolve, dissect: *scrutinize, examine, inspect: *separate, part, divide.

sigh, v. Sigh, sob, moan, groan are not synonyms, but they come into comparison both as verbs, when they mean literally or figuratively to emit a sound (commonly an inarticulate sound) indicative of mental or physical pain or distress, and as nouns, when they denote such a sound. Sigh implies a deep audible respiration that is usually an involuntary expression of grief, intense longing, regret, discouragement, weariness, boredom, or the like; as, "Sigh no more, ladies, *sigh* no more, Men were deceivers ever" (Shak.); "The young knight *sighed* . . . and held his peace" (Scott); "a *sigh* uttered from the fulness of the heart" (Hazlitt); "The old town was better to look at in those days, Father Latour used to tell Bernard with a *sigh*" (Cather). Sob strictly implies a sound made by a convulsive catching of the breath when one is weeping, or when one is both speaking and crying, or when one is desperately trying to restrain one's tears; the noun, however, more often refers solely to this sound than does the verb, which usually implies accompanying tears and speech; as, "'Ah!' It was a long, grieving sound, like a *sigh*—almost like a *sob*" (Dickens); "The mother . . . knelt by his side, and they prayed, and their joint *sobs* shook their bodies, but neither of them shed many tears" (Meredith); she *sobbed* out her story; like a child *sobbing* itself to sleep. Moan implies a low, prolonged, usually inarticulate sound, especially one that is indicative of intense suffering of mind or body; as, the patient is *moaning* in his sleep; her self-control was so great that she uttered not even a *moan*; "To hear the piteous *moan* that Rutland made" (Shak.). The term, however, is often used figuratively in reference to sounds suggestive of pain, complaint, murmuring, or the like; as, the *moan* of the wind; "The *moan* of doves in immemorial elms" (Tennyson); "The rain and the wind splashed and gurgled and *moaned* round the house" (Kipling). Groan implies a heavier sound than *moan* and more often suggests an unbearable weight of suffering or a strong spirit of rebelliousness to pain or discomfort; as, the *groans* of those caught in the wreckage were heard at a distance; the laborers *groaned* when they tried to lift the boulder; "Thy *groans* Did make wolves howl" (Shak.); "The whole creation *groaneth* and travaileth in pain together until now" (Romans viii. 22). Often, however, in extended use, the term carries no hint of suffering but implies noises similar to groans made by disapproving persons (as, to greet a speaker with *groans*) or by something that moves or swings heavily (as, trees *groaning* in the wind; "the door upon its hinges *groans*" —Keats).

Ana. Lament, *deplore, bemoan, bewail: *long, yearn, pine, hunger, thirst.

sigh, n. Groan, moan, sob. See under SIGH, v.

Ana. Regret, *sorrow, grief.

sight, n. *Look, view, glance, glimpse, peep, peek, coup d'oeil.

Ana. *Prospect, outlook: vision, *revelation.

sightless. *Blind, purblind.

sign, n. 1 Sign, mark, token, badge, note, symptom come into comparison when they denote a sensible, usually visible, indication by means of which something not outwardly apparent or obvious is made known or revealed. Sign is the most comprehensive of these terms, being referable to a symbol (see also CHARACTER, 1) or a symbolic device or act (as, the mace is the *sign* of au-

thority; to make the *sign* of the cross), to any visible or sensible manifestation of a mood, a mental or physical state, or a quality of character (as, good manners are the *signs* of good breeding; "Suicide is the *sign* of failure, misery, and despair"—*H. Ellis*), to any trace or vestige of someone or something (as, "the *signs* of her fate in a footprint here, a broken twig there, a trinket dropped by the way"—*Conrad*), to any objective evidence that serves as a presage or foretoken (as, *signs* of an early spring; "there are *signs* that poetry is beginning to occupy itself again with the possibilities of sound"—*Day Lewis*), and, concretely, to any placard, board, tablet, or the like, such as one giving the name of a street, one giving route directions, or especially, one placed over or near an entrance and indicating the nature of the business transacted in that place, or giving the proprietor's name (as, *signs* carrying names in electric lights; they were to meet at the *sign* [that is, the inn carrying the *sign*] of the White Horse). **Mark** (see also CHARACTER, 1) is preferred to *sign* in discriminating use when the distinguishing or revealing indication is thought of as something impressed upon a thing or inherently characteristic of it, especially in contrast to something outwardly manifested or displayed; thus, the bitter experience left its *mark* (not *sign*) on his countenance; courtesy is the *mark* (better than *sign*) of a gentleman; the distinguishing *marks* (not *signs*) of Victorian poetry. "What, then, are the *marks* of culture and efficiency?" (*H. Suzallo*). "It is a great mistake to suppose that assertiveness is the only mannish trait taken on by successful women, nor is pliability the only feminine *mark* they lose" (*M. Austin*). Concretely also, *mark* is applied either (1) to some visible trace left upon a thing, such as a scar or a brand (as, a birthmark, the *marks* of smallpox) or a stain, a print, or a track (as, the high-water *mark* is observable on the pier's supports; the *marks* of an army's passage), or (2) to something that is affixed in order to distinguish, identify, or label a particular thing or to indicate its ownership (as, a trade-mark; a laundry *mark*). **Token** (see also PLEDGE) is preferred to *sign* and also to *mark* (except in their specific concrete applications) when the sensible indication serves as a proof of, or is given as evidence of the actual existence of, something that has no physical existence; as, how could he doubt her love when he had had so many *tokens* of her affection?; the savages bore gifts as *tokens* of their desire for peace and friendship. "It is a *token* of healthy and gentle characteristics, when women of high thoughts and accomplishments love to sew" (*N. Hawthorne*). **Badge** designates a piece of metal, a ribbon, or the like, carrying an inscription or emblem and worn upon the person as a token of one's membership in a society or as a sign of one's office, employment, or function; as, a policeman's *badge*; each delegate wore a *badge*; a gold watch key is the *badge* of membership in Phi Beta Kappa. In figurative use, *badge* often is employed in place of *sign*, *mark*, or *token*, when it is thought of in reference to a class, a group, a category of persons, or as a distinctive feature of their dress, their appearance, their character, or the like; "for sufferance is the *badge* of all our tribe" (*Shak.*); "sweet mercy is nobility's true *badge*" (*Shak.*); "to accept the...petticoat...as the *badge* of disenfranchisement" (*R. Macaulay*). **Note** usually means a distinguishing or dominant mark or characteristic; both when it is so close to its earliest sense, a distinctive musical tone, that its use seems almost figurative, and when it is so far removed that only a historical connection with the earlier meaning can be traced, *note* differs from *mark*, its closest synonym, in suggesting something emitted or given out by a thing, rather than something

impressed upon that thing. "A fertile oasis possesses a characteristic color scheme of its own.... The fundamental *note* is struck by the palms" (*A. Huxley*). "The *note* of sadness... which... poets were to find so much more to their taste than the *note* of gladness" (*H. Adams*). "Genteel poverty... was the *note* of his grandfather's house" (*Arch. Marshall*). *Note* is much used in theology and also in literary and art criticism in place of *mark* for a characteristic that seems to emanate from a thing that strikes one as true, or authentic, and therefore is the test of a similar thing's truth, genuineness, authoritativeness, and the like; as, to claim that the *notes* of the true church are universality and holiness; the grand manner that is the *note* of great poetry. **Symptom** was originally and is still applied to any of the physical or mental changes from the normal which can be interpreted as signs of disease, and which, taken together in a particular case, provide the ground for a diagnosis; as, his *symptoms* indicate typhoid fever; he has all the *symptoms* of incipient tuberculosis. In extended use, it is applicable to any outward indications of an inner change, as in an institution, a state, or the body politic, or to any external phenomenon that may be interpreted as the result of some internal condition, especially a weakness, defect, disturbance, or the like. "Even that... is treated lightly as a foible of the age, and not as a *symptom* of social decay and change" (*T. S. Eliot*). "The belief that a young man's athletic record is a test of his worth is a *symptom* of our general failure to grasp the need of knowledge and thought in mastering the complex modern world" (*B. Russell*).

Ana. Indication, betokening, attesting or attestation (see corresponding verbs at INDICATE); manifestation, evidencing or evidence, demonstration, showing or show (see corresponding verbs at SHOW); intimation, suggestion (see corresponding verbs at SUGGEST).

2 Sign, signal come into comparison when they mean a motion, an action, a gesture, or a word by which a command or wish is expressed or a thought is made known. **Sign** (as here compared: see also SIGN, 1; CHARACTER, 1) is the general term that in itself carries no explicit connotations: it is now used both in reference to the gestures used in conversation with deaf mutes who do not know how to read lips (as, the only communication with the deaf-and-dumb man was by *signs*) and in reference to significant or conventional gestures the object of which is usually given in the context; as, to make a *sign* for silence; to give the accepted *sign* of warning. **Signal** usually applies to a conventional and recognizable sign, given under circumstances which make it clear to the person or persons concerned: often specifically it implies a command, a direction, or a warning; as, "She was startled by a ring at the door, the certain *signal* of a visitor" (*Austen*); "The flying of the first champagne-cork gave the *signal*, and a hum began to spread" (*Meredith*); "At a *signal* given by the train conductor, the engineer climbed into his engine" (*S. Anderson*). **Signal** is also applied to mechanical devices which operate lights, the movement of arms, and the like, at points where a guard, a watchman, a policeman, or the like, might otherwise be necessary; as, traffic *signals*; railroad *signals*.

Ana. *Gesture, gesticulation: *symbol, emblem.

3 Symbol, *character, mark, note.

Ana. *Device, contrivance.

signal, n. *Sign.

Ana. *Alarm, alarum, tocsin, alert: *gesture, gesticulation: *motion, movement: *device, contrivance, contraption.

signal, adj. Salient, striking, arresting, outstanding.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

prominent, remarkable, *noticeable, conspicuous.
Ana. Distinctive, individual, peculiar, *characteristic: distinguished, eminent, illustrious, *famous, renowned.
significance. 1 Signification, import, *meaning, sense, acceptance.

Ana. Denotation, connotation (see under DENOTE): suggestion, implication, intimation (see corresponding verbs at SUGGEST).

2 *Importance, import, consequence, moment, weight.
Ana. *Worth, value: *influence, authority, credit, prestige: merit, *excellence, virtue, perfection.

significant. *Expressive, meaningful, pregnant, eloquent, sententious.

Ana. Cogent, telling, convincing, *valld, sound: forcible, forceful, *powerful: important, momentous, weighty (see corresponding nouns at IMPORTANCE).

signification. Significance, import, *meaning, sense, acceptance.

Ana. Signifying, meaning, denoting (see MEAN, v.): denotation, connotation (see under DENOTE, 2).

signify. Import, *mean, denote.

Ana. Convey, *carry, bear: *denote, connote: imply, *suggest.

silent. 1 Silent, uncommunicative, taciturn, reticent, reserved, secretive, close, close-lipped, closemouthed, tight-lipped come into comparison when they mean showing restraint or restraints in speaking to or with others. Silent and uncommunicative often imply a tendency to say no more than is absolutely necessary as a matter of habit (as, "he had had a rather unhappy boyhood; and it made him a silent man"—*Conrad*; "a stern, silent man, long a widower"—*Cather*; "whose uncommunicative heart Will scarce one precious word impart"—*Swift*) or an abstinence from speech on some particular occasion because of caution, the stress of emotion, or the like (as, "We paused... And...hand-in-hand Sat silent"—*Tennyson*; the reporters found the president uncommunicative when they asked him his opinion of the proposal). Taciturn implies a temperamental disinclination to speech: it usually also connotes extreme unsociableness or the nature of one who grudgingly converses when necessary; as, "Benson was...a taciturn hater of woman" (*Meredith*); "Always taciturn, he now hardly spoke at all" (*S. Cloete*). Reticent implies the disposition to keep one's own counsel or the habit or fact of withholding much that might be said, especially under particular circumstances: the term does not usually connote silence but, rather, sparing speech or an indisposition to discuss one's private affairs; as, "All subsequent autobiographies and confessions seem in comparison reticent, wanting in detail" (*L. P. Smith*); "He was reticent at first, but he presently warmed up" (*Cather*); "Whatever subject the stranger...exhibits an interest in, that they [the aborigines] will be reticent about" (*Hudson*). Reserved implies reticence, but it also suggests formality, standoffishness, or a temperamental indisposition to the give and take of friendly conversation or familiar intercourse; as, a reserved and distant demeanor; "Grave, though with no formal solemnity, reserved if not exactly repressed...she was yet a woman of unmistakable force of character" (*H. Ellis*). "There are no people [in France] whom it is 'difficult to know,' who are very 'reserved' in the presence of strangers, who are particularly 'reticent' about their own affairs" (*Brownell*). Secretive also implies reticence, but it carries a much stronger hint of disparagement than reticent, for it suggests an opposition to frank or open and often connotes an attempt to hide or conceal something that might properly be told; as, a secretive public official is the despair of reporters; "These things, contrary to her

custom, and even nature—for she was not secretive—were most sedulously kept out of sight for a time" (*C. Bronie*). Close, as here compared (see also CLOSE, 1 & 2), comes near to reticent and secretive in its meaning, but it usually denotes a disposition rather than an attitude or manner and, therefore, often suggests taciturnity; as, "He was too close to name his circumstances to me" (*Dickens*). Close-lipped and closemouthed are often used in place of close, not only as more picturesque terms but also as carrying a stronger connotation of criticism or censure, or as more clearly implying a refusal to disclose something that another desires to know; as, he is always closemouthed about his plans; she proved a good secretary because she was close-lipped about all matters of a confidential nature. Tight-lipped carries a stronger implication of resolute, but not necessarily temperamental, reticence; as, "Infinite caution, tight-lipped, unshakable patience, these must be his rule" (*Buchan*).

Ana. Restrained, curbed, checked, inhibited (see RESTRAIN): discreet, prudent (see under PRUDENCE).

Ant. Talkative. — **Con.** *Vocal, articulate, fluent, voluble, glib: loquacious, garrulous (see TALKATIVE).

2 *Still, stilly, quiet, noiseless.

Ana. *Calm, serene, tranquil, placid, peaceful.

silhouette. *Outline, contour, profile, sky line.

Ana. Shadow, *shade, adumbration.

silken, silky. *Sleek, slick, glossy, velvety, glabrous, satiny.

Ana. Lustrous, luminous, beamy, lambent (see BRIGHT): ingratiating, insinuating (see DISARMING).

silly. 1 *Simple, foolish, fatuous, asinine.

Ana. *Irrational, unreasonable: *stupid, dull, dense, crass, dumb: vacuous, *empty.

2 *Foolish, absurd, preposterous.

Ana. Inane, wishy-washy, *insipid: puerile, juvenile (see YOUTHFUL): ridiculous, ludicrous, *laughable.

silt. *Wash, drift, diluvium, alluvium, alluvion.

similar. Similar, like, alike, identical, akin, analogous, comparable, parallel, homogeneous, uniform, as here compared, agree in meaning closely resembling each other. Things are similar when in appearance or on the surface they are not readily distinguishable or may be mistaken for each other; they are like or alike when, though distinct, they seem the same either to close or to superficial views; thus, measles and chickenpox are similar diseases but they are not alike in certain respects; gripe and influenza are so very like each other that diagnosticians cannot always distinguish them. Things are identical (see also SAME) when there is exact correspondence between them; as, the typed original and carbon copies are identical. "Just as among all the myriad faces in the world, there are no two really alike, so are there no two identical sets of limbs" (*Lucas*). Things are akin to each other when in spite of marked differences they reveal essential rather than superficial likenesses. "A...playing off of one image against another, a technical device akin to the interlacing of themes in music" (*Day Lewis*). "The movement, which went on in France under the old régime from 1700 to 1789, was...akin...to the movement of the Renaissance" (*Arnold*). Things are analogous to each other when, in spite of their belonging to different categories or logical groupings, they are susceptible of comparison and exhibit common likenesses; thus, analogous words have many implications in common, but they are not true synonyms because they do not carry a common denotation, or are not applicable to the same things or ideas, or diverge in one or more important implications. "Fear and rage are closely analogous emotions: the man who feels rage is not possessed of the highest kind of courage"

(*B. Russell*). "You keep talking about maladies of the mind and soul. I don't accept the idea of psychic diseases analogous to mental diseases" (*C. Mackenzie*). Things are **comparable** when they bear sufficient likeness to each other in one or more important respects to admit of a useful or fitting comparison, such as one that explains or evaluates them (or one of them in terms of the other) or that helps to make or illustrate a point in an argument; as, the Lincoln Memorial and Grant's Tomb are not **comparable** either in size or in beauty; modern totalitarianism is **comparable** to ancient political absolutism. "Hot corn-bread baked with squash seeds,—an Indian delicacy **comparable** to raisin bread among the whites" (*Cather*). Things are **parallel** that throughout their course, their development, their history, and the like, show marked likenesses; thus, two literary passages are said to be **parallel** when, placed side by side, they reveal likenesses in thought, in structure, in phrasing; two careers may be said to be **parallel** when they can be shown to have followed a similar course. Things are **homogeneous** when they are alike in kind and in character. But **homogeneous** is rarely used in this sense except in reference to the things which form a collection, an aggregate, or the like. "The family is... a unit composed of people of different ages and sexes, with different functions to perform; it is organic, in a way which a collection of **homogeneous** individuals is not" (*B. Russell*). Things are **uniform** that do not vary wherever they occur or are found; as, **uniform** rites; **uniform** naturalization laws; a **uniform** penalty for murder. **Uniform** frequently connotes monotony, or regularity, or slavish adherence. "One could not have believed that... there could be so many **uniform** red hills" (*Cather*). "Patient endurance of sufferings, bold resistance of power, forgiveness of injuries... are seen in beautiful relief over the flat **uniformity** of life" (*R. H. Dana, sr.*).

Ana. *Same, equivalent, equal, identical: correspondent, correlative, complementary, *reciprocal.

Ant. Dissimilar. — **Con.** *Different, disparate, diverse: *opposite, contradictory, contrary, antithetical, antonymous.

similarity. *Likeness, resemblance, similitude, analogy, affinity.

Ana. *Comparison, contrast, collation, parallel: agreement, accordance, harmonizing or harmony, correspondence (see corresponding verbs at **AGREE**).

Ant. Dissimilarity.

simile. *Analogy, metaphor.

similitude. *Likeness, similarity, resemblance, analogy, affinity.

Ant. Dissimilitude, dissimilarity.

simper, v. *Smile, smirk, grin.

simper, n. Smile, smirk, grin. See under **SMILE, v.**

simple, adj. 1 *Pure, absolute, sheer.

Ana. Elemental, *elementary: *single, sole.

Ant. Compound: complex.

2 *Easy, facile, light, effortless, smooth.

Ana. Clear, plain, distinct, obvious, *evident, manifest: *clear, lucid, perspicuous.

Ant. Complicated: difficult.

3 *Natural, ingenuous, naïve, unsophisticated, artless.

Ana. *Sincere, unfeigned: *childlike, childish: open, plain, *frank, candid.

Con. Affected, pretended, assumed (see **ASSUME**): pretentious, ostentatious, *showy, pompous.

4 **Simple, foolish, silly, fatuous, asinine** come into comparison when they mean actually or apparently deficient in intelligence. **Simple**, when it implies actual deficiency in intelligence, is applied chiefly to persons whose intelligence is that of a little child (**simpletons**) and who are

incapable of dealing with any ideas or situations that involve mental effort. It may imply either illiteracy coupled with a lack of native shrewdness, or feeble-mindedness that does not amount to imbecility; as, they have a **simple** son; "Smooth words he had to wheedle **simple** souls" (*Wordsworth*). When used as a term of criticism of normal persons or their acts, it suggests little more than failure to use one's intelligence. "You are fretting about General Tilney, and that is very **simple** of you; for ten to one whether you ever see him again" (*Austen*). **Foolish** (see also **FOOLISH, 2**), when it implies actual mental deficiency, is usually applied to persons who are technically imbeciles or idiots and who are unable to earn their living or, in some cases, to take care of themselves in any way; as, the social workers found that three of the nine children were **foolish**, and all but two of the others could be described as **simple**. As a term of criticism of normal persons and their acts, it is far stronger than **simple** because it imputes either the appearance of idiocy or imbecility or a want of intelligence or of good judgment that makes one blind to dangers, consequences, etc.; as, he looks and acts **foolish**; "Oh, **foolish** youth! Thou seek'st the greatness that will overwhelm thee!" (*Shak.*). **Silly** is applied to persons who, though not mentally deficient in the psychiatric sense, fail to act as rationally guided beings, either by showing a lack of common sense or ordinary good judgment or by behaving in a manner that makes them ridiculous in the eyes of others. "She was highly rouged, and looked rather quietly and contentedly **silly**" (*Austen*). "There is nothing so **silly** as young girls at just that age" (*Millay*). **Fatuous** does not necessarily or even often imply a pathological lack of intelligence, but it always implies the appearance of it and suggests a combination of foolishness, stupidity, and inanity. It is a term of contempt rather than of impersonal description, and is capable of additional connotations such as fat-headedness, vacuousness, obtuseness, or loss of a sense of proportion. "Do you doubt that the most **fatuous** of the Georges, whichever it was, thought himself Newton's superior?" (*Landon*). "We... looked at each other in a sort of **fatuous** consternation" (*Conrad*). "Prescott... was no **fatuous** optimist" (*Van W. Brooks*). "It would no longer be possible... for a narrow-minded pedagogue like Brunetière... to be greeted as a prophet when he **fatuously** proclaimed what he termed 'the bankruptcy of science'" (*H. Ellis*). "Fond to the point of **fatuity**" (*A. D. Sedgwick*). **Asinine** is also a term of contempt; etymologically it suggests an intelligence comparable to that of an ass, considered the lowest and most stupid of the beasts of burden. As applied to persons, their acts, choices, opinions, and the like, it connotes a despicable failure to exercise intelligence or thinking unworthy of a rational being; as, an **asinine** choice of profession; an **asinine** use of one's leisure time. "What is one to think of a man so **asinine** that he looks for gratitude in this world?" (*Mencken*).

Ana. Childish, *childlike: dull, dense, dumb, *stupid, crass: *ignorant, illiterate, untaught.

Ant. Wise.

simple, n. *Drug, medicinal, pharmaceutical, biological.

simpleton. *Fool, moron, imbecile, idiot, natural.

simulacrum. 1 *Image, effigy, statue, icon, portrait, photograph, mask.

2 *Imposture, cheat, fraud, sham, fake, humbug, deceit, deception, counterfeit.

simulate. Feign, counterfeit, sham, pretend, *assume, affect.

Ana. Dissemble, *disguise, cloak, mask: ape, mock, mimic, imitate, *copy.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

simulation. *Simulation, dissimulation*, when they denote the pretense of being what one (usually a person, sometimes a thing) is not, are not always clearly distinguished. *Simulation* (cf. *simulate* under ASSUME) is positive, and implies the assumption of a false appearance: it therefore often suggests an attempt to seem other than what one really is; thus, hypocrisy and protective coloration are both forms of *simulation*. *Dissimulation* is negative, and suggests a dissembling, or a concealment of one's true (usually evil) nature or purpose in order to prevent recognition of it. "*Dissimulation*, in the negative; when a man lets fall signs and arguments, that he is not what he is. . . *Simulation*, in the affirmative; when a man industriously and expressly feigns and pretends to be that he is not" (*Bacon*). "*Simulation* is a pretence of what is not, and *dissimulation* a concealment of what is" (*Taller*).

Ana. *Pretense, pretension, make-believe, make-belief; *hypocrisy, sanctimony, Pharisaism, cant, canting.

simultaneous. Synchronous, coincident, *contemporary, contemporaneous, coeval, concomitant, concurrent.

Ana. Concurring, coinciding, agreeing (see AGREE).

Con. *Preceding, foregoing, antecedent, previous; following, succeeding, ensuing (see FOLLOW).

sin, n. *Offense, vice, crime.

Ana. Transgression, trespass, *breach, violation: *error, lapse, slip: *fault, failing, frailty.

since, adv. *Since, ago.* *Ago* refers to a point in past time; *since*, in strict usage, to the period intervening between such a point and the present; in *ago* the mind is carried back from the present; in *since*, forward from a starting point in the past; as, I met him ten years *ago*, but have seen him only once *since*.

since, conj. *Because, for, as, inasmuch as.

sincere. *Sincere, wholehearted, whole-souled, heartfelt, hearty, unfeigned* agree in meaning genuine in feeling or expression or manifesting such genuineness. *Sincere* stresses the absence of hypocrisy, dissimulation, or falsification in any degree: it therefore usually connotes a strict adherence to truth, a revelation of just what one feels, thinks, sees (especially as an artist or poet) and no more, and an unwillingness to embellish, exaggerate, or make pretenses of any sort; as, "in a few cases where a man professes to be destroying with a view to rebuilding. . . we are not sure whether he is *sincere*" (*B. Russell*); "The loathing with which he [Hitler] describes the sodden Vienna working classes is. . . so *sincere* that one thinks for a moment that out of it must come a people's rebel" (*D. Thompson*). *Wholehearted* and the American coinage *whole-souled* imply the absence of all reservations and therefore stress not only sincerity, but also earnestness, or devotion, or zealousness, or other quality which suggests that one's whole being is stirred or moved; as, *wholehearted* support; "The most perfect and *wholehearted* repentance" (*Pusey*); *whole-souled* dislike of totalitarianism; "A bust of Burns. . . looking . . . not so warm and *whole-souled* as his pictures usually do" (*N. Hawthorne*). "Who could help liking her? her generous nature, her gift for appreciation, her *wholehearted*, fervid enthusiasm?" (*L. P. Smith*). *Heartfelt* places the emphasis upon the depth and genuineness of the feeling which finds expression in words, in signs of emotion such as tears, or in acts: it suggests that one's innermost being is stirred or moved and is applied usually to that which might, by contrast, be formally expressed, outwardly indicated, or the like; as, *heartfelt* sympathy; *heartfelt* piety; *heartfelt* interest in the poor and suffering. *Hearty* comes closer to *wholehearted* than to *heartfelt*, but it carries a stronger implication than *wholehearted* of vigor or energy in expression or manifes-

tation, and may connote either simple honesty, great warmth, or exuberance in the display of feeling; as, to receive a *hearty* welcome; a *hearty* laugh; "in the *hearty* tones natural when the words demanded by politeness coincide with those of deepest feeling" (*Hardy*); "He [the social climber] must have a *hearty* taste for exactly the right sports" (*Mencken*). *Unfeigned* is often used in place of *sincere*, especially when the absence of simulation is to be stressed: the term usually emphasizes spontaneousness as well as genuineness (as, "I confess to *unfeigned* delight in the insurgent propaganda"—*Lowes*).

Ana. Candid, open, *frank, plain: honest, honorable, conscientious, scrupulous, *upright: *straightforward, aboveboard, forthright.

Ant. Insincere.

sinewy. *Muscular, athletic, husky, brawny, burly.

Ana. Robust, *healthy, sound: *strong, tough, tenacious, sturdy: nervous, *vigorous, energetic.

single. Sear, *burn, scorch, char.

single, adj. *Single, sole, unique, lone, solitary, separate, particular* are here compared only as meaning one as distinguished from two or more or all others. That is *single* which is not accompanied or supported by, or combined or united with, another; as, a *single* instance may be cited; a *single* woman; a *single* house; "the strength of the lyric lies in the complete statement of a *single* selected facet of experience" (*Day Lewis*). "A painter discards many trivial points of exactness, in order to heighten the truthfulness of a few fundamentals; he makes the sitter. . . more like himself. . . than he actually is at any such *single* moment as a photograph might capture" (*C. E. Montague*). That is *sole* which is the only one that exists, that acts, that has power, that is to be considered, or the like; as, he is the *sole* heir; this is his *sole* invention; he is the *sole* deviser of this scheme; your conscience must be the *sole* judge in this case; to acquire the *sole* rights of publication; "his *sole* object was to study the form of his sitter's head in every detail" (*S. Alexander*). That is *unique* (as here compared: see also STRANGE) which is the only one of its kind or character in existence; as, the medal is *unique*, for no duplicates were made; the stamp is held to be *unique* since, so far as is known, no other specimen exists. That is *lone* (as here considered: see also ALONE) which is not only single but also separated or isolated from others of its kind: the use of this word in place of *single* is sometimes humorous, sometimes technical, sometimes poetic; as, a *lone* (humorous for *single*) woman; to play a *lone* hand in euchre (i.e., to play without one's partner); "To sit beneath a fair *lone* beechen tree" (*Keats*). That is *solitary* (as here considered: see also ALONE) which stands by itself, either as the sole instance or as a unique thing; as, the *solitary* sin of an otherwise blameless character; the *solitary* example of absolutism in the world at that moment. That is *separate* (as here compared: see also DISTINCT, 1) which is not only single, but disconnected from or unconnected with any of the others in question; as, "turning over in his thoughts every *separate* second of their hours together" (*E. Wharton*); the growth of the whole proceeds at the same pace as the growth of the *separate* parts. That is *particular* (as here compared: see also SPECIAL; CIRCUMSTANTIAL; NICE, 1) which is the single or numerically distinct instance, member, example, or the like, of the whole or of the class considered or under consideration; as, "a special provision for a known and *particular* territory" (*Ch. Just. Taney*); "Richard. . . replied that he had an engagement at a *particular* hour, up to which he was her servant" (*Meredith*); "Reality is a succession of concrete and *particular* situations" (*A. Huxley*).

Ana. Individual, particular, *special, especial, specific.

Ant. Accompanied: supported: conjugal.

single, v. In form **single out**. Prefer, handpick, *choose, select, elect, opt, pick, cull.

Ana. *Take, seize, grasp, grab: accept, *receive, admit: *decide, determine, settle.

single-foot, n. *Trot, pace, walk, gallop, run, canter, lope, rack, amble.

single-foot, v. Trot, pace, walk, gallop, run, canter, lope, rack, amble. See under **TROT, n.**

singular. *Strange, unique, peculiar, eccentric, erratic, odd, queer, quaint, outlandish, curious.

Ana. *Different, diverse, divergent, disparate: *exceptional: *abnormal, atypic, aberrant.

Con. Ordinary, *common, familiar: *usual, customary, habitual.

sinister. **Sinister, baleful, malign, malefic** come into comparison when they mean seriously threatening, portending, or promising evil or disaster, usually imminent or already initiated evil or disaster. **Sinister** (etymologically on or of the left hand or side, and therefore inauspicious or covert) is the most commonly employed of these words and the widest in its range of reference. It may be applied not only to that which is perceptible (as, a *sinister* cloud; a *sinister* look) but to that which is imperceptible (as, a *sinister* influence; a *sinister* intention). In either case, however, *sinister* often expresses a judgment based on experience or on an interpretation of outward signs, and implies on the part of the observer a resulting fear or apprehension of approaching evil or of lurking dangers; thus, a cloud is describable as *sinister* when it has the color, shape, or general character of one that the observer knows by experience precedes a tornado; a person's influence may be interpreted as *sinister* when it is judged in the light of some of its visible effects. "She was about half a mile from her residence when she beheld a *sinister* redness arising from a ravine a little way in advance" (*Hardy*). "That queer, cosmopolitan, rather *sinister* crowd that is to be found around the Marseilles docks" (*R. Macaulay*). "I did not wish him to know that I had suspected him of harbouring any *sinister* designs" (*Hudson*). *Sinister* is also applied to something that works or operates so covertly, insidiously, or obliquely, that it is likely to find those whose well-being it threatens off guard; as, a *sinister* disease; a *sinister* policy. "The *sinister* power exercised . . . by the combination in keeping rivals out of the business and ruining those who already were in" (*Justice Holmes*). **Baleful** carries an even stronger suggestion of menace than *sinister* for it implies inevitable suffering, misery, or destruction; often, it imputes perniciousness, noxiousness, hellishness, or the like, to the thing so described. It is applicable to that which works openly and without indirection as well as to that which works occultly or obliquely; as, "Deceit Contriv'd by art and *baleful* sorcery" (*Shak.*); "Culling their potent herbs and *baleful* drugs" (*Milton*); "The *baleful* simoon sweeps across the entire tract" (*G. Rawlinson*). "The *baleful* horoscope of Abdallah had predicted the downfall of Granada" (*Prescott*). "Watch a pair of cats, crouching on the brink of a fight. *Balefully* the eyes glare" (*A. Huxley*). **Malign**, as here compared (see also **MALICIOUS**), carries over from its earliest sense a suggestion of an inherently evil or harmful tendency or disposition, even though the term in this sense is characteristically applied to appearances, aspects, forces, influences, and the like, rather than to persons. It still also carries connotations derived from its reference in astrology to the aspects or the influences of the stars, such as that of boding evil or disaster. "A struggle between two forces, the one beneficent, the

other *malign*" (*Bryce*). "The spirit of competition, which, according to Rousseau, was one of the earliest of the *malign* fruits of awakening intelligence" (*Grandgent*). "The prickly topic of symbolism, with its *malign* power to set the wise by the ears" (*C. E. Montague*). **Malefic** carries a stronger suggestion of balefulness than does *malign* for it implies both a tendency and an effect; thus, a *malign* influence bodes disaster; a *malefic* influence is putting the threat of disaster into effect; the *malefic* arts of sorcery, witchcraft, and diabolism.

Ana. *Ominous, portentous, fateful, unpropitious, inauspicious: *secret, covert, furtive, underhand, underhanded: *malicious, malignant, malevolent, spiteful.

sinuous. *Winding, flexuous, serpentine, tortuous, anfractuous.

Ana. Labyrinthine, mazy (see corresponding nouns at **LABYRINTH**): circuitous, roundabout, *indirect: *crooked, devious.

sire, v. Beget, get, procreate, *generate, engender, breed, propagate, reproduce.

situation. 1 *State, condition, mode, posture, status, estate.

Ana. *Juncture, pass, crisis, exigency, emergency: *predicament, plight, quandary, dilemma: case, *instance.

2 *Position, place, office, post, job, berth, billet, capacity.

Ana. Employment, occupation, *work, calling, business, pursuit, métier.

size, n. **Size, dimensions, area, extent, magnitude, volume** are here compared primarily as terms meaning the amount of space (sometimes time, energy, and the like) used by a thing and determinable by measuring. **Size** is usually referred to things having length, width, and depth (or height); it does not necessarily imply accurate mathematical measurements, but may suggest a mere estimate of these; as, the *size* of this box is 10 inches long, 8 inches wide, and 5 inches deep; these trees are not the right *size*; what is the *size* of the living room? *Size* is also referable to things which cannot be measured in themselves, but can be computed in terms of the number of individuals which comprise them or the amount of space occupied by those individuals; as, in *size*, New York City outranks all other cities. "The mere complexity and *size* of a modern state is against the identification of the man with the citizen" (*G. L. Dickinson*). Since *dimension* means measurement in a single direction, as the line of length, or breadth, or depth, the plural *dimensions*, when used collectively, is a close synonym of *size*; in contrast, however, it usually implies accurate measurements that are known or specified; as, the window frames must be exactly alike in *dimensions*; the *dimensions* of the universe are not calculable; the *dimensions* of the lot are 33 by 100 feet. **Area** is now referable only to things measurable in two dimensions, or length and breadth. It is used chiefly of plane figures or of plane surfaces, such as the ground, a floor, an arena, or the like, and is computed usually in square measure; as, the estate is 200 acres in *area*; the forest fire covered an *area* of ten square miles; the *area* of a rectangle is computed by multiplying its length by its breadth. **Extent** is referable chiefly to things that are measured in one dimension; it may be the length or the breadth, but it is usually thought of as the length; as, the driveway's *extent* is 100 feet; the wings of the airplane are 75 feet in *extent*. However, it is often used as though it were the equivalent of *area*. "The basement of St. Katherine's Dock House is vast in *extent* and confusing in its plan" (*Conrad*). The word is also referable to measured time or

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

to space measured in terms of time; thus, the duration of a thing is the *extent* of its existence; few lives reach the *extent* of one hundred years. "[In the time of Augustus] Germany was... a nine days' march from north to south, and of incalculable *extent* from west to east" (*Buchan*). **Magnitude**, which is largely a mathematical and scientific term, may be used in reference to size or two-dimensional extent. "A queer little isolated point in time, with no *magnitude*, but only position" (*R. Macaulay*). It may be used also in reference to anything measurable whose exact quantity, extent, or degree may be expressed mathematically in figures; thus, the *magnitude* of a star is indicated by a number that expresses its relative brightness. "An alpha particle bearing a positive charge equal in *magnitude* to twice the electron charge" (*Karl K. Darrow*). **Volume** (see also **BULK**) is also, as here considered, a scientific term; it is used in reference to anything which can be measured in terms of the cubic inches, feet, yards, etc., it occupies; thus, the *volume* of a solid cylinder is equal to the cubic measure of air it displaces, and that of a hollow one, to the cubic measure of its capacity; two objects that are equal in *volume* may differ greatly in weight; when a thing expands, it increases in *volume*. **Ana.** Amplitude, *expanse, spread, stretch: *bulk, mass, volume.

skald, n. Variant of **SCALD**.

skeleton. *Structure, anatomy, framework.

skeptic or sceptic. **Skeptic (or sceptic), agnostic**, and their derivative nouns **skepticism, agnosticism**, are very close synonyms when they denote a person (or a philosophy) that regards all human knowledge as uncertain or all absolute knowledge as unattainable by the human mind. They are, however, distinguishable in precise, and especially in philosophical, use. **Skeptic** and **skepticism** imply the attitude of the doubter who suspends judgment because he knows the limitations of the human reason. Historically, therefore, these terms have been applied to every type of thinker or philosophy having for his (or its) fundamental assumption the impotency or the inadequacy of the reason; even, by extension, to those teaching that through revelation, inspiration, intuition, or the like, men come to a measure of truth; thus, philosophical idealism is, in the last analysis, a form of *scepticism*. **Agnostic** and **agnosticism**, on the other hand, stress the impossibility of attaining certainty; in general use, they commonly imply the unknowability of that which transcends the human reason, such as the existence of God, the origin of things, and the like; in philosophical use, they imply the impossibility of attaining truth by any means since all knowledge is relative and conditioned by the nature of the human mind.

skepticism or scepticism. 1 Agnosticism (see under **SKEPTIC**).

Ant. Faith.

2 *Uncertainty, doubt, dubiety, dubiousity, suspicion, mistrust.

Ana. Disbelief, *unbelief, incredulity: demur, scruple, compunction, *qualm.

Ant. Credulity.

sketch, n. 1 Outline, diagram, delineation, draft, tracing, plot, blueprint. See under **SKETCH, v.**

Ana. Design, plot, *plan, scheme, project: *chart, map, graph.

2 Précis, aperçu, *compendium, syllabus, digest, pandect, survey.

sketch, v. **Sketch, outline, diagram, delineate, draft (or draught), trace, plot, blueprint** come into comparison when they mean to present or to represent something by

or as if by drawing its lines or its features. The same distinctions in implications and connotations are observable in the corresponding nouns **sketch, outline, diagram, delineation, draft (or draught), tracing, plot, blueprint**. **Sketch** (etymologically akin to *scheme*) may imply a drawing, a painting, a model, or a verbal presentation (as in a description or exposition) of the main lines, features, or points, with the result that a clear, often a vivid, but not a detailed impression or conception of the whole is given; as, "then, in a calm historian's tone, he proceeded to *sketch*... some pictures of the corruption which was rife abroad" (*Joyce*); "This lecture is a humble attempt to *sketch* out a metaphysics of natural science" (*Inge*); a sculptor's *sketch* of his design for a memorial; an artist usually *sketches* his picture before he paints it; "In some of Miss Jewett's earlier books... one can find first *sketches*, first impressions, which later crystallized into almost flawless examples of literary art" (*Cather*). **Outline** differs from *sketch* in suggesting emphasis upon the contours of a thing that is represented or the main points of a thing expounded, and in implying more or less inattention to the details which fill up, amplify, or particularize: the term therefore usually implies a more rigid selection and greater economy in treatment and less consideration for qualities which give pleasure than *sketch* implies and, often, suggests a presentation of a thing as a simplified whole. "When the period came for the reappearance of Mr. Scales [a traveling salesman], Mrs. Baines *outlined* a plan, and when the circular announcing the exact time of his arrival was dropped into the letter-box, she formulated the plan in detail" (*Bennett*). "The detailed study of history should be supplemented by brilliant *outlines*, even if they contained questionable generalizations" (*B. Russell*). **Diagram** implies presentation of something which requires explanation rather than representation or portrayal by means of a graphic design such as a mechanical drawing, a pattern showing arrangement and distribution of parts, a chart, map, graph, or the like; as, to *diagram* (or to make a *diagram* of) the nervous system; to make a *diagram* of a sentence to show its grammatical structure; "He *diagrammed* his route on the table-cloth" (*Cather*). **Delineate** and **delineation** etymologically and in their early and no longer widely current senses came closer to *sketch* and to *outline* than, as they now come, to *describe* and *description* and *depict* and *depiction*. For that reason, though they still retain a strong implication of drawing a thing so as to show its lines or features with great distinctness, they also suggest more attention to the amplifying details and therefore often imply greater fullness or richness in treatment than the preceding words. "His brush did its work with a steady and sure stroke that indicated command of his materials. He could *delineate* whatever he selected with technical skill" (*Jefferies*). "He [a Chinese painter of the fourth century] seems to have preferred the *delineation* of strongly featured heads, men of character and experience" (*Bin-yon*). "Chaucer's *delineation* of the Prioress" (*Lowes*). **Draft**, especially in its verbal rather than its substantive use, implies the accurate drawing to scale of something, especially of an architect's plan for a building to be constructed or of a design for a vessel, a machine, an engine, or the like; as, young architects usually spend their first years in *drafting* plans rather than in designing buildings. The term, either as verb or noun, may imply the drawing up of a preliminary statement which when corrected, polished, and copied will serve as a final statement (in either case often specifically called *rough draft*); as, "draft me a proper letter to send him" (*Shaw*); to make a *draft* of a petition; there is a *rough draft* of the book among

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

his father's papers. **Trace** and **tracing** more often stress the act or the method of outlining or drawing and in themselves carry little implication of a carefully wrought design, pattern, or the like. The words, therefore, are used chiefly in reference to marking out the course of a road, of boundaries, and the like, on paper or on the ground itself, or to the copying of a design (often a drafted design) on a piece of transparent paper placed over it; as, to *trace* the new route to be followed in rebuilding a road; to get a *tracing* of the pattern of a rose window. Sometimes, however, the terms do suggest a pattern or design which involves the use of tracery, or decorative interlacing of lines; as, "deep-set windows, stain'd and traced" (*Tennyson*). **Plot** is often used in place of *diagram* or *draft* or, less often, *sketch* when a map, chart, graph, or the like, rather than a design is implied: distinctively it suggests emphasis upon the indicating of points, locations, areas, sections, or the like, so that their relation to each other or the whole is clear; thus, one who diagrammatically represents the condition of business during a given year by means of a graph is said to *plot* a graph or to make a *plot* of the curve of rise (or fall) in business activity; so, to *plot* the course (sometimes the actual, sometimes the probable, course) of a hurricane; to *plot* a new garden (i.e., to draft a plan showing where shrubs and plants will be placed). **Blueprint**, from its common application to a photograph in white lines on blue paper of a draftsman's mechanical drawing or of an architect's plan, in extended use implies precise and detailed sketching or delineation: it suggests not the act of drawing or drawing up but the effect produced by that which is drawn or drawn up; as, the purpose of this report is to give a *blueprint* of this country's defenses; the book is a *blueprint* of Communist ambitions; "people engaged in the amusing and innocuous pastime of *blueprinting* a new social order" (*The Commonweal*).

Ana. Design, plot, plan, scheme, project (see under *PLAN*, *n.*): *chart, map, graph.

skid, *v.* *Slide, slip, glide, glissade, slither, coast, toboggan.

skill. *Art, cunning, craft, artifice.

Ana. Proficiency, adeptness, expertness (see corresponding adjectives at *PROFICIENT*): efficiency, effectiveness (see corresponding adjectives at *EFFECTIVE*): *readiness, facility, dexterity, ease.

skilled. Skillful, *proficient, adept, expert.

Ana. Apt, ready, *quick, prompt: practiced, exercised, drilled (see *PRACTICE*, *v.*): competent, qualified, *able, capable.

Ant. Unskilled.

skillful. *Proficient, adept, expert, skilled.

Ana. *Dexterous, adroit, deft, feat: efficient, *effective: *versant, versed.

Ant. Unskillful. — **Con.** *Awkward, clumsy, inept, maladroit, gauche.

skim. Float, *fly, dart, scud, shoot, sail.

skimpy. Scrimpy, exiguous, *meager, scanty, scant, spare, sparse.

skin, *n.* **Skin**, **hide**, **pelt**, **fell**, **rind**, **bark**, **peel** come into comparison when they denote the outer removable membranous coat which adheres to and protects the softer inner tissues of a body or organism. **Skin**, the most general term, applies especially to the integument, or outer covering, of animals, whether it is as delicate as that which covers the human body or as tough as that which covers a rhinoceros; it is, however, used also of the outer coverings of certain fruits, plants, seeds, and the like, especially when they are very thin and tight; as, the *skin* of an apple; the *skin* of an almond. **Skin** applies to this integument whether it covers the living organism

or has been stripped from it when dead. **Hide** applies especially to the tough skin of large wild and domestic animals, such as the rhinoceros or the horse; it is, however, chiefly in commercial use, where it is applied to the raw or undressed skins of heavy cattle, horses, and other large animals, in distinction from those of calves, sheep, goats, and the like, which are commonly described merely as *skins*; thus, tanned and dressed *hides* are made into shoes, traveling bags, and the like; tanned and dressed *skins* are made into gloves, purses, and the like. **Pelt** is applied chiefly to the skin of an animal that is covered with hair, fur, or wool; in commerce, it usually denotes an undressed skin of any of these animals, especially of a furred animal; as, fox *pelts*; sheep *pelts*. It is also applied to the skin of a sheep or goat stripped of wood or hair, and ready for tanning. **Fell** is now chiefly a literary term for *skin*, *hide*, or *pelt*, but, in some specific use, it denotes an underskin, or thin tough membrane, lying beneath a pelt. **Rind** applies chiefly to the thick, tough, and often inelastic integument which covers certain fruits such as oranges and grapefruit, or the stems and roots of some woody perennial plants (then usually called *bark*). The hardened skin on smoked meats such as bacon, and the hardened crust of molded cheeses, are also called *rinds*. Any skin, rind, or bark, or a portion of it, that is or may be stripped from a fruit is called *peel*; as, to slip on a banana *peel*; candied orange *peel*.

skin, *v.* **Skin**, **decorticate**, **peel**, **pare**, **flay** come into comparison when they mean to divest something of its skin or thin outer covering. **Skin** is the most general of these terms, being applicable to any animal as well as to any vegetable or fruit that is covered by or as if by a skin; as, to *skin* calves slaughtered for the market; to *skin* the bark off a birch tree. **Decorticate** is applicable when the bark of a tree, the husk of a seed or grain, or the rind of a fruit is removed by stripping; as, "an oak-trunk...felled and decorticated" (*M. J. Berkeley*); to *decorticate* wheat. **Peel** and **pare** are frequently confused in use: *peel* is applicable only when the skin or outer covering can be removed by stripping, especially by pulling off; *pare*, when it is cut off, usually with some of the adjoining substance; thus, freshly boiled potatoes can be easily *peeled*, but uncooked ones must be either scraped or *pared*; one speaks usually of *peeling* an orange, because its rind may be stripped by the hand; one speaks usually of *paring* an apple, since in most varieties the skin is not easily detached from the flesh; one *peels* (not *pares*) a hard-boiled egg. But *pare* may also be used of anything that is cut close, and so is applicable to many things which do not have a skin, rind, or the like; as, to *pare* one's toe nails; to *pare* expenses to a minimum. **Flay**, a very old word meaning to strip the skin off, has been used variously in place of *skin*, *peel*, and *decorticate*, but in modern as well as in ancient use, it has been applied largely to persons or animals, in the former case often in threats or in descriptions of torture. Consequently, the word in current use is more literary than technical and more figurative than literal, for it usually carries a connotation of torture or of cruel punishment such as scourging; as, he said he would *flay* the man alive if he again caught him prowling around; "The prospect of dying in Newgate, with a back *flayed* and an eye knocked out" (*Macaulay*).

skinny. Scrawny, rawboned, angular, gaunt, lank, lanky, *lean, spare.

Ant. Fleeshy.

skip, *v.* **Skip**, **bound**, **hop**, **curvet**, **lope**, **lollop**, **ricochet** agree in meaning to move or advance with successive springs or leaps. The first three words are commonly referable to persons or animals but they may be used in

reference to inanimate things. **Skip** suggests quick, light, graceful movement and a continuous alternation of touching a surface and springing clear of it; often also, when referred to living creatures, connoting sportiveness or excess of animal spirits; as, "He maketh them also to *skip* like a calf" (*Psalms* xxix. 6); "Wanton as a child, *skipping*" (*Shak.*). **Bound** implies longer and more vigorous springs than *skip* and carries a stronger suggestion of elasticity and buoyancy of spirit; as, "Like a roe I *bounded* o'er the mountains" (*Wordsworth*); "I saw her *bounding* down the rocky slope like some wild, agile creature" (*Hudson*); the ball struck the earth and *bounded* across the field. **Hop** suggests a less flowing or springy movement than the two preceding words; at times it connotes jerkiness and lack of dignity in movement. It implies a succession of small quick leaps, such as those characteristic of the movement of birds, toads, grasshoppers, and the like; as, "[birds] *hopping* from spray to spray" (*Dryden*); he does not waltz, he *hops*; "The withered leaves all *skip* and *hop*" (*Wordsworth*); often, especially in reference to children, it suggests a jumping on one foot only. **Curvet** may suggest either a leap or, more often, a succession of leaps such as a horse makes when he raises both forelegs at once and as they are falling lifts both hind legs so that for an instant all his legs clear the surface. When not referred to a horse, it usually implies frisking and gamboling or flightiness. "Would you sell or slay your horse. For bounding and *curvetting* in his course. . . ." (*Cowper*). "A gang of merry roistering devils, frisking and *curveting* on a flat rock" (*Irving*). **Lope** evokes a picture of the long easy bounds of a lithe and agile animal such as a wolf or fox on the run; as, "White rabbits went *loping* about the place" (*Twain*); the long, *loping* stride of a mountaineer; every evening at dusk the athletes in training *loped* round and round the track. **Lollop**, on the other hand, implies a clumsy, irregular bounding that suggests heaviness of movement or spiritlessness; as, a *lolloping* mongrel; "they [the verses called 'fourteeners'] had an almost irresistible tendency to degenerate into a kind of *lolloping* amble" (*Saintsbury*). **Ricochet** is referable almost exclusively to things which are thrown, shot, cast, or the like. It suggests a skipping caused by a series of glancing rebounds after the object first strikes a surface; as, to watch the flat stones they threw *ricocheting* (or *skipping*) over the surface of the water (but, to *skip* stones; not, to *ricochet* stones). "The smaller the angle, under which a shot is made to *ricochet*, the longer it will preserve its force and have effect" (*J. M. Spearman*).

skirmish, n. *Encounter, brush.

Ana. *Contest, conflict, combat, fight, affray, fray: engagement, action, *battle.

skit. *Libel, squib, lampoon, pasquinade.

skittish. Restless, restive, uneasy, fidgety, *impatient, nervous, unquiet, feverish, hectic, jumpy, jittery.

skulk or sculk. *Lurk, couch, slink, sneak.

Ana. Secrete, *hide, conceal.

Con. Emerge, *appear, loom.

sky line. Profile, contour, *outline, silhouette.

slack, adj. 1 Lax, remiss, *negligent, neglectful.

Ana. *Lazy, indolent, slothful, fainéant: *indifferent, unconcerned, detached, aloof: sluggish, *lethargic.

Con. Diligent, sedulous, industrious, *busy, assiduous: expeditious, quick, *fast.

2 Relaxed, *loose, lax.

Ana. *Weak, feeble, infirm: inert, supine, passive, *inactive: *slow, leisurely, laggard.

Con. *Tight, taut, tense: *steady, constant, uniform, even, equable: *firm, hard.

slacken. *Delay, retard, slow, detain.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

Ana. Abate, reduce, lessen, *decrease: *restrain, curb, check, inhibit: *moderate, temper, qualify.

Ant. Quicken.

slander, n. Calumny, *detraction, backbiting, scandal.

Ana. Defamation, vilification, aspersion, traducing (see corresponding verbs at **MALIGN**): *abuse, vituperation, invective, obloquy, scurrility.

slander, v. Defame, libel, calumniate, *malign, traduce, asperse, vilify.

Ana. *Decry, depreciate, detract from, derogate from, disparage, belittle: *injure, damage, hurt: *attack, assail.

slang. *Dialect, vernacular, patois, lingo, jargon, cant, argot, patter.

slant, n. 1 **Slant, inclination, slope, acclivity, declivity, incline, grade, gradient** agree in denoting obliquity or something oblique. *Slant, inclination, slope* are sometimes interchangeable, but are not exact synonyms. **Slant** is divergence (commonly sharp divergence) from the vertical or horizontal. "The *slant* of a ladder that leans against a house" (*Twain*). **Inclination** is any divergence, slight or sharp, from a straight position or a direction taken as normal; as, to correct an *inclination* of the teeth. Commonly, when there is no contrary indication, a bending sidewise (or forward) and downward is implied; as, the *inclination* of a tree; the *inclination* of a magnetic needle. "She answered only by a slight *inclination* of the head" (*Austen*). **Slope** is used especially of surfaces, and commonly implies a gradual slant; as, the *slope* of a meadow, a windshield, a brow. *Slant* sometimes, and *slope* frequently, are used concretely. So used, *slant* requires qualification to complete its meaning; as, *slants* of rain, of sunshine: *slope* denotes ground whose surface forms an angle with the plane of the horizon; as, a green *slope*. A *slope* of ground considered as ascending is an *acclivity*; the same slope considered as descending, a *declivity*. An *incline* is a natural slope or an artificial structure that leads from one level to another, often forming a passageway; as, a town built on an *incline*; an *incline* between two floors in a garage. **Grade** and **gradient** are equivalent terms, the former chiefly in American, the latter in British use. They are used commonly (*grade* almost exclusively) of railroads and highways, and denote, usually, degree of inclination from the horizontal; as, there is a ten per cent *grade* (that is, an ascent or descent of ten feet to every hundred feet of horizontal distance) between the two villages. "The roads of the period [were] steep in *gradient*" (*Hardy*). *Grade* is often used to denote a stretch of a road or railroad that rises or falls from a level; as, there is a heavy *grade* between Albany and Schenectady.

Ana. Tipping, tilting, canting, careening (see **TIP**): *deviation, deflection, divergence.

2 *Point of view, standpoint, viewpoint, angle.

Ana. Attitude, *position, stand: bias, prejudice, *predilection.

slant, v. **Slant, slope, incline, lean** come into comparison when they mean to diverge or cause to diverge from a vertical or horizontal line. **Slant** carries the sharpest and clearest implication of such divergence of any of these terms, but it carries no explicit implication of how great or how little is the divergence: consequently, it is accepted generally as the comprehensive term implying any noticeable physical divergence; as, the tree *slants* to the right; eyes that *slant* inward; rain *slanted* by the wind; "One side of his body seemed to *slant* towards the other, he settled so much more heavily upon one foot" (*M. Wilkins*). **Slope** is often used in place of *slant*, but it is the preferred term when the reference is to a surface, or a side of an elevation, such as a hill, a roof, or the like,

and often, but not invariably, where there is an intent to suggest a gradual divergence from a right (i.e., straight and not oblique) line; thus, "the ground *slopes* to the left" usually suggests a lack of steepness; "a *sloping* roof," unless qualified by *sharply*, *sleepily*, or the like, usually implies a gradual slant; so, the road *slopes* downward from this point; "the path that *sloped* from the door" (*M. Wilkins*). *Incline* (as here compared: see also INCLINE, 2) carries a stronger implication of bending or tipping or of being bent or tipped: it is therefore the preferred word not only when human or similar agency is implied, but when that which is bent or tipped is an immaterial thing such as one's will, one's thoughts, one's intentions, or the like; as, "Just as the twig is bent, the tree's *inclined*" (*Pope*); to *incline* one's head to the right; the garden terraces *incline* to the south. "There is another theory to which the late Professor Freeman *inclined* (if so sturdy a figure could be said to *incline*)" (*Quiller-Couch*). *Lean* differs from *incline* in carrying either a stronger implication of a definite directing of the inclination by a human agent or by some shaping or molding force (as, to *lean* back in one's chair; since the hurricane most of the trees of the grove *lean* toward the northwest) or of a resting or an intent to rest against a (literal or figurative) support (as, to *lean* against a pillar; she always *leaned* upon her husband when they walked the mountain trails; a child should not be allowed to *lean* too heavily on parents or teachers).

Ana. *Tip, tilt, cant, careen: veer, *swerve, deviate, diverge.

slap, *v.* *Strike, hit, smite, swat, slug, clout, punch, box, cuff.

slash, *v.* Slit, *cut, hew, chop, carve.

Ana. Rive, rend, cleave, split (see TEAR): penetrate, pierce, *enter.

slatternly, *adj.* *Slatternly*, *dowdy*, *frowzy*, *blowzy* are adjectives usually applied to women (rarely, except *frowzy*, to men; often, except *blowzy*, to children regardless of sex) and their appearance, and meaning negligent of neatness, freshness, or smartness in dress and looks. *Slatternly* implies slovenliness and general unkemptness. "It often grieved her to the heart to think... that her mother... should have an appearance... so comfortless, so *slatternly*, so shabby" (*Austen*). *Dowdy* suggests lack of taste, style, or smartness in dress, in the arrangement of one's hair, and the like, and a drabness of color. "A perfect saint amongst women, but so dreadfully *dowdy* that she reminded one of a badly bound hymn-book" (*Wilde*). *Frowzy* implies an offensive lack of neatness suggestive of mustiness, uncleanliness, and the like. "If a fully fed, presentably clothed, decently housed, fairly literate and cultivated and gently mannered family is not better than a half-starved, ragged, *frowzy*, overcrowded one, there is no meaning in words" (*Shaw*). *Blowzy* suggests coarseness, rude healthiness, floridity, and a general appearance of being wind-blown or living much in the open; as, "that blazing, *blowzy* penitent [of Rubens], in yellow satin and glittering hair" (*Thackeray*). "That cheerful-looking lady herself, with a face made *blowzy* by cold and damp" (*G. Eliot*).

Ana. Slovenly, unkempt, sloppy, *slipshod: *dirty, squalid, foul, filthy.

Con. *Neat, tidy, trim, spick-and-span.

slaughter, *n.* *Massacre, butchery, carnage, pogrom.

slave, *n.* *Serf, bondslave, thrall, villein, vassal, bondsman, bondman, peon, Helot.

slavery. *Servitude, bondage.

slavish. Servile, menial, *subservient, obsequious.

Ana. *Mean, abject, ignoble, sordid: *tame, subdued, submissive: *miserable, wretched.

slay. *Kill, murder, assassinate, dispatch, execute.

slazy or sleezy. *Limp, flimsy, lippy, flaccid, flabby.

Ana. *Thin, tenuous, slight: *loose, slack.

sleek. 1 *Sleek*, *slick*, *glossy*, *velvety*, *velvet*, *silken*, *silky*, *satin*, *glabrous* are here compared as meaning having a smooth, bright surface or appearance. That is *sleek*, literally, which is smoothed and brightened by wetting, oiling, brushing, rubbing, polishing, burnishing, or the like: the term usually connotes a smoothness or brightness that is the result of close attention or is an indication, especially when the reference is to a person or animal, of being in excellent physical condition; as, his hair is always *sleek*; "Let me have men about me that are fat: *Sleek*-headed men and such as sleep o' nights" (*Shak.*); "a beautiful panther... so bright of eye, so *sleek* of coat" (*Thackeray*); "the metal felt *sleek* and warm to his touch" (*S. Cloete*); "a child's mind thrills at the touch of fur because it is *sleek*" (*C. E. Montague*). But *sleek* is also applied to the general appearance of a person who is well groomed and well dressed to an extreme, often a vulgar extreme; as, "the *sleek* lords with their plumes and spurs" (*V. Lindsay*); "he was not carelessly dressed. There was something *sleek* about him, something that suggested a well-bred dog" (*S. Anderson*). That is *slick* (now dialectal or colloquial, but much older than *sleek*, which was probably at first a variant form of it) which is sleek or, more often in current use, which is so perfectly finished that the eye can detect no flaw or roughness in the workmanship. Often, in the latter sense, merely a fair outside is suggested. "Everything was to be *slick*, which was Marvin's [the architect's] term of approbation; but not too *slick*, which was his abomination" (*M. Austin*). "In a word, it [the typical novel produced by popular American writers] is marked by a competent *slickness*. This surface gloss, this sophisticated polish, is worrying to an English reader, who is sometimes led astray... under the mistaken impression that the writer really has something to say, since he takes so much trouble to say it neatly" (*Times Lit. Sup.*). In recent somewhat slangy use, *slick* often connotes a slippery or calendered surface; thus, the "*slick* magazines," or "*slicks*," are those that are printed on calendered paper. That is *glossy* which has by nature or art a surface that is exceedingly smooth and shining; as, the *glossy* leaves of the beech tree; "downy peaches and the *glossy* plum" (*Dryden*); "*glossy* as black rocks on a sunny day cased in ice" (*D. Wordsworth*); the table has a waxed, not a *glossy* finish. That is *velvety* (or, less often, *velvet*) which has the extreme softness associated with the surface or appearance of velvet: though the word is often used of things as they appeal to the sense of touch or of sight, or of both (as, a *velvety*, or *velvet*, skin; a *velvety*, or *velvet*, flower), it is also applicable to sounds that caress the ear or to tastes or odors that are delightfully bland (as, even her high notes are *velvety*; the *velvet* touch of a pianist; "the boy reading in his queer, *velvety* bass voice"—*Galsworthy*; a *velvety* sauce). That is *silken* which has the smoothness and luster as well as the softness of silk; as, *silken* hair; "To what green altar... Lead'st thou that heifer lowing at the skies, And all her *silken* flanks with garlands drest" (*Keats*). The term is increasingly used in reference both to things that appeal to other senses than those of touch or sight and to immaterial things that are peculiarly grateful to the spirit or mind; as, a *silken* voice; *silken* slumbers; a *silken* style; *silken* words. *Silky* is sometimes used in place of *silken* (as, "fingers, *silky* and soft"—*Watts-Dunton*; a *silky* wine) but when the reference is to persons, their voices, manners, etc., the word, more often than *silken*, suggests an ingratiating or a specious

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

quality (as, "Mrs. Gibson... petted him in her sweetest, *silkier* manner"—*Gaskell*). That is *satiny* (or, less often, *satia*) which is not only soft, but smooth and sleek, especially of surface; as, the *satiny* petals of a flower; a *satiny* skin. That is *glabrous* (chiefly a biological term) which has a skin or surface devoid of all hairs, down, or the like, so that its smoothness and, sometimes but not always, its gloss is apparent; as, the *glabrous* leaves of some elms; "the *escholtzia*, which... I avoided, for its virulent-orange flowers and its strange *glabrous* stalks" (*H. Ellis*).

Ana. *Bright, lustrous, brilliant: smooth, even (see LEVEL): polished, burnished (see POLISH, v.).

2 *Fulsome, oily, unctuous, oleaginous, soapy.

Ana. Bland, smooth, diplomatic, politic, *suave, urbane: ingratiating, insinuating, *disarming: specious, *plausible.

sleepy. *Sleepy, drowsy, somnolent, slumberous* (or *slumbrous*) come into comparison when they mean affected by a desire to sleep or affecting one by inducing such a desire. *Sleepy*, the ordinary term of this group, applies not only to persons but to things that suggest a resemblance to persons who show a readiness to fall asleep (as, "Away, you rogue, away! I am *sleepy*"—*Shak.*; a *sleepy* town; "the quiet, *sleepy* railroad station at Pickleville"—*S. Anderson*). The term also applies to conditions or to things which incline one to sleep or to dozing or dreaming (as, "the yellow-hammer trills his *sleepy* song in the noonday heat; the drone of the Greenfinch lulls me into dreamy meditations"—*L. P. Smith*). *Drowsy* differs from *sleepy* in carrying a stronger implication of the heaviness or loginess associated with sleepiness than of the actual need of rest; as, to become *drowsy* after a heavy dinner; "A little later, when the sun should burn through the leaves... Mrs. Barkley would grow *drowsy*... and go off to take a nap" (*Deland*). When applied to things rather than to persons, *drowsy* connotes far more obviously than *sleepy* a soporific power; as, "Not poppy, nor mandragora, Nor all the *drowsy* sirups of the world, Shall ever medicine thee to that sweet sleep Which thou owedst yesterday" (*Shak.*); "And *drowsy* tinklings lull the distant folds [i.e., sheepfolds]" (*Gray*); "The leisurely swishing of the water to leeward was like a *drowsy* comment on her progress" (*Conrad*). *Somnolent* is often used in place of *drowsy*, especially in formal writing; usually, however, it connotes the sluggishness or inertness (as felt or as induced) characteristic of one who is *sleepy* or *drowsy* rather than the actual impulse to sleep or doze; as, "a *somnolent* want of interest" (*De Quincey*); "Eustacia waited, her *somnolent* manner covering her inner heat and agitation" (*Hardy*); the *somnolent* pages of a three-volume novel. *Slumberous* is often used, especially in poetry, in the sense of *sleepy*, or *drowsy*, or *somnolent*: when, as occasionally happens, it carries a distinctive connotation, it usually suggests quiescence or the repose of latent powers; as, "I... heard The mountain's *slumberous* voice" (*Shelley*); "*Slumbrous* azure pools clear as the air" (*Ingelow*); "Eustacia's manner was as a rule of a *slumberous* sort, her passions being of the massive rather than the vivacious kind" (*Hardy*).

Ana. *Lethargic, sluggish, comatose, stuporous.

sleepy. Variant of SLEAZY.

slender. *Thin, slim, slight, tenuous, rare.

Ana. *Lean, spare, lanky, skinny: flimsy, flaccid, flabby.

*limp: trivial, trifling, *petty, paltry, puny.

slick, adj. *Sleek, glossy, velvety, silken, satiny, silky, glabrous.

Ana. Finished, *consummate: flawless, *impeccable, faultless: shallow, *superficial.

slide, v. *Slide, slip, glide, skid, glissade, slither, coast,*

toboggan come into comparison when they mean to move along easily and smoothly over or as over a surface. *Slide* usually, but not invariably, implies accelerated motion and unintermittent contact with a surface, especially a waxed, icy, or otherwise slippery surface: it is used not only in reference to persons and to moving things such as vehicles, some instruments, and the like (as, boys like to *slide* down banisters; "The fool *slides* o'er the ice that you should break"—*Shak.*; his pen *slid* across the paper), but also, especially in figurative use, with reference to the things (sometimes persons) which pass rapidly before one because of one's own swift and easy motion (as, house after house *slid* by as we neared the city) or which move easily, unobtrusively, gradually, or the like, from one place or condition to another (as, prose that *slides* into poetry; democracies that *slide* into dictatorships; to *slide* one's hand into another's pocket). *Slip* carries a stronger implication than *slide* of a frictionless and unobstructed surface but a weaker suggestion of continued contact: it therefore often suggests involuntary rather than voluntary sliding, sometimes even definitely implying a loss of footing and a fall, often with resulting injury; as, to *slip* on the ice; "he had hurt his elbow through dropping his stick and *slipping* downstairs" (*Bennett*). When only swift, easy motion is implied, *slip* heightens the emphasis upon quietness, stealth, skillfulness, or the like; as, while we were talking, he *slipped* from the house; "I paddled up the river...; I *slipped* past the barges" (*Jefferies*). Things are said to *slip* that pass quickly or without notice, as from one's grasp, one's control, one's memory, or one's observation (as, the book *slipped* from her feeble hands; "[Augustus] saw that Roman morals were *slipping* into a perilous state"—*Buchan*; the details have *slipped* from his mind) or as a result of one's negligence or inattention (as, the bus *slipped* by while they were engrossed in conversation; the tool *slipped* and cut his hand). *Glide* comes closer to *slide* than to *slip* in its stress upon continued smooth, easy, usually silent motion such as is characteristic of some dances, but it may or may not imply unintermittent contact with a surface and, apart from its context, it seldom carries even a slight hint of an element of danger; as, "They *glide*, like phantoms, into the wide hall" (*Keats*); "even the swallows, the restless swallows, *glided* in an effortless way through the busy air" (*Jefferies*). Often, like *slide* and, to a lesser extent, *slip*, *glide* is used in reference to things that apparently move because the observer is in a moving vehicle, boat, or the like; as, "The landward marks have failed, The fog-bank *glides* unguessed" (*Kipling*); "Soft fell the splash of the oars... softly the banks *glided* by" (*Meredith*). *Skid*, in the sense in which it is here considered, goes back to an earlier sense when it was used in reference to a wheel or wheels that moved as if sliding but without rotation, especially as a result of the use of a skid, or kind of brake which retarded the motion of a vehicle descending a steep hill (as, "The horses stopped to breathe again, and the guard got down to *skid* the wheel for the descent"—*Dickens*): in current use, the term is employed especially in regard to bicycles and automobiles, the tires of which on an icy, wet, or dusty road fail to grip the roadway, thereby causing the vehicle to slip obliquely or to the side; as, the car *skidded* on the icy patch and ran into a telegraph pole. In extended use *skid*, like *slip*, usually implies an element of danger or recklessness or a lack of control (often complete control) or grasp; as, he ran fast, occasionally *skidding* on an icy patch, but always quickly recovering his balance. *Glissade*, originally and still a mountaineering term implying a long slide down a slope, especially a snow-covered or ice-covered slope, and now

also a dancing term implying a sliding step to one side, carries the major implications of both *slide* and *glide*, but stresses close contact with a surface in a continuous and well-balanced or graceful motion; as, "Kennedy and Cyril... *glissaded* gallantly over the slopes of snow" (F. W. Farrar). *Slither*, an old word now used chiefly for its picturesqueness, often implies a sliding down a rocky, pebbly, or other rough slope with noise and clatter (as, "The rest [of the tile] bounced on the roof and then *slithered* down it and off it"—Masefield); but in current use it more often suggests a gliding, sliding, sometimes undulating, motion suggestive of a snake's movement (as, "crawling through walls and *slithering* along the ground"—de Kruif; "When he and his papers have *slithered* away. In the bodies of innumerable worms"—Amy Lowell). *Coast* and *toboggan* always connote a sliding downward on or as if on a sled or toboggan, but *coast* in current use often specifically implies the movement downhill of a freewheel bicycle without aid of the pedals, or of an automobile with the motor disengaged (as, the boys walked up the hill with their bicycles, then mounted and *coasted* down the other side; no *coasting* on hills), and *toboggan* suggests a rapid sliding downward or decline which cannot be impeded until the bottom is reached or some obstruction is provided; as, from 1929 to 1933 the prices of securities *tobogganed*.

slight, *adj.* Tenuous, rare, *thin, slender, slim.

Ana. *Imperceptible, imponderable, impalpable, intangible, insensible, inappreciable: trifling, trivial, puny. *petty, paltry: minute, diminutive, wee, little, *small.

slight, *v.* *Neglect, ignore, overlook, disregard, omit, forget.

Ana. Scorn, disdain, contempt, *despise: flout, *scoff.

slim. *Thin, slender, slight, tenuous, rare.

Ana. *Lean, spare, skinny, scrawny: *meager, exiguous, scant, scanty: lithe, lathesome, lissome (see SUPPLE).

Ant. Chubby (of persons).

sling, *v.*¹ Hurl, fling, pitch, toss, *throw, cast.

Ana. Heave, hoist, *lift, raise: impel, drive (see MOVE): propel, shove, thrust, *push.

sling, *v.*² *Hang, suspend, dangle.

slink. *Lurk, skulk, sneak, couch.

slip, *v.* *Slide, glide, skid, glissade, slither, coast, toboggan.

slip, *n.* Lapse, *error, mistake, blunder, faux pas, bull, howler, boner, bloomer, floater.

Ana. Accident, *chance: inadvertence, carelessness, heedlessness (see corresponding adjectives at CARELESS): *fault, failing, foible, frailty, vice.

slipshod, *adj.* *Slipshod*, *slovenly*, *unkempt*, *sloppy* come into comparison not only when applied to persons and their appearance, but also to their mental and manual processes, performances, or products, and mean conspicuously manifesting negligence or carelessness. *Slipshod* (etymologically, shod in looge, flapping, or down-at-heel shoes) implies an easygoing tolerance of details that are inaccurate, incongruous, lacking in precision, and the like, or indifference to the niceties of technique or to qualities that make for perfection, such as thoroughness, soundness, and fastidiousness; as, a *slipshod* style; a *slipshod* piece of work; a *slipshod* performance of a symphony. "We need not linger over the details of the *slipshod* campaign which followed" (Buchan). *Slovenly*, a much stronger term than *slipshod*, implies laziness and disorderliness which is evident throughout and is not merely a matter of detail. The term was formerly used primarily in regard to a person or his appearance, and implied diametrical opposition to *neat* or *tidy*; as, a *slovenly* housekeeper; "his person showed marks of habitual neg-

lect; his dress was *slovenly*" (G. Eliot). In somewhat later use, it was applied to processes, technique, workmanship, and the like; as, *slovenly* thinking; "the *slovenly* manner in which the dinner was served" (Conrad); "a tendency to think that a fine idea excuses *slovenly* workmanship" (Amy Lowell). *Unkempt* (etymologically, uncombed) is applied usually to that which requires to be kept in order, if a favorable impression is to be produced. It implies extreme negligence amounting to neglect; as, *unkempt* hair; an *unkempt* garden; "most of the shops... had become pettifogging little holes, *unkempt*, shabby, poor" (Bennett). *Sloppy* (chiefly in colloquial use) implies a general effect of looseness and of spilling over. When applied to a person or his appearance, it usually suggests loose, ill-fitting, unpressed garments, but it often also carries connotations of slovenliness; as, her *sloppy* appearance at breakfast gave offense to her husband. When applied to ideas or their expression, style, manners, or to a work or its workmanship, the word usually suggests a lack of decorous restraint or confinement within proper limits, manifested in incoherency, in emotional abandon (effusiveness or sentimentality), in formlessness, or the like. "The rather *sloppy* Socialism which pervades this document" (Inge). "Archer's coherent thinking, his sense of the worth of order and workmanship, his impatience of humbug, *sloppiness*, and gush" (C. E. Montague).

Ana. *Negligent, neglectful, slack, lax, remiss: *careless, heedless, inadvertent: *indifferent, unconcerned: *slatternly, dowdy, frowzy, blowzy.

Con. Precise, accurate, exact, *correct: fastidious, finical, *nice.

slit, *v.* Slash, *cut, hew, chop, carve.

slither. *Slide, slip, glide, skid, glissade, coast, toboggan.

slog, *v.* Variant of SLUG.

slope, *v.* *Slant, incline, lean.

Ana. *Tip, tilt, cant, careen: deviate, diverge, veer, *swerve.

slope, *n.* *Slant, inclination, acclivity, declivity, incline, grade, gradient.

Ana. Tipping, turning, canting, careening (see TIP): *mountain, mount, peak, alp: steepness, abruptness, precipitousness (see corresponding adjectives at STEEP).

sloppy. *Slovenly*, *unkempt*, *slipshod.

Ana. *Negligent, neglectful, slack, lax, remiss: mawkish, maudlin, soppy, slushy (see SENTIMENTAL): *slatternly, dowdy, frowzy, blowzy.

Con. *Careful, meticulous, scrupulous, punctilious: fastidious, finical, *nice.

sllothful. Indolent, fainéant, *lazy.

Ana. *Inactive, inert, supine, passive, idle: slack, remiss, lax, *negligent, neglectful: *slow, leisurely, deliberate, dilatory, laggard.

Ant. Industrious. — **Con.** *Busy, diligent, sedulous, assiduous.

slough, *v.* Exuviate, *discard, cast, shed, molt, scrap, junk.

slovenly. *Slipshod, *unkempt*, *sloppy*.

Ana. *Slatternly, dowdy, frowzy, blowzy: *indifferent, unconcerned: *negligent, neglectful, slack, lax, remiss.

Con. *Orderly, methodical: *neat, tidy, trim, spick-and-span.

slow, *adj.* *Slow*, *dilatory*, *laggard*, *deliberate*, *leisurely* come into comparison as applied chiefly to persons, their movements, their actions, and the like, and agree in meaning taking a longer time than is necessary and, sometimes, desirable. *Slow*, the term that is the widest in its range of application, may also be used in reference to anything (such as a mechanism, a process, or a drug) that is the opposite of quick or fast in its motion, its

performance, its operation, or the like. In its varying applications, *slow* often, but far from invariably, suggests a reprehensible or discreditable cause such as stupidity, lethargy, indolence, inaction (as, a *slow* student; his *slow* progress in school; *slow* wits; *slow* movements; he is as *slow* as a snail; to be *slow* in getting results), but it may suggest either extreme care or caution (as, a *slow* but capable worker; to be *slow* to take offense; he is *slow* in making changes), or a tempo that is required by nature, art, or a plan or schedule (as, a *slow* convalescence; a *slow* growth; a *slow* stream; a *slow* movement in music; a *slow* train), or a falling behind because of structural or mechanical defects or other untoward difficulties (as, a *slow* watch; the train is *slow* tonight because of the snowstorm). **Dilatory** is relatively a term of restricted application referable only to persons or to things for which persons are responsible as their actors, performers, creators, or the like, and always implying slowness that is the result of inertness, procrastination, or indifference; as, a *dilatory* correspondent; a *dilatory* servant; "though *dilatory* in undertaking business, he was quick in its execution" (*Austen*); to pursue a *dilatory* policy in providing adequate defense for the country. **Laggard** is even more censorious a term than *dilatory*, for it implies a failure to observe a schedule for arriving, performing, and the like, or to obey a call or demand promptly: it frequently suggests loitering or waste of time; as, *laggard* pupils keep a whole class back; "For Love was *laggard*, O, Love was *slow* to come" (*Millay*). **Deliberate** (as here compared: see also **DELIBERATE**, 2) applies only to persons, usually directly, but sometimes indirectly, and then applied to things for which a person is responsible: the term suggests absence of hurry or agitation and a slowness that is the result of care, forethought, calculation, self-restraint, or the like; as, *deliberate* enunciation; *deliberate* movements; a *deliberate* performance of a great symphony; "He returned with the same easy, *deliberate* tread" (*Cather*); "She ate her food in the *deliberate*, constrained way, almost as if she recoiled a little from doing anything so publicly" (*D. H. Lawrence*). **Leisurely** also implies a lack of hurry or a slowness that suggests that there is no pressure for time: the term applies not only to persons and their acts but to things that have no relation to persons; as, "breakfast was a *leisurely* meal" (*Arch. Marshall*); to take a *leisurely* journey through Central America; "the *leisurely* swishing of the water to leeward" (*Conrad*).

Ant. Fast.

slow, *v.* Slacken, *delay, retard, detain.

Ana. *Moderate, temper, qualify: reduce, abate, *decrease, lessen.

Ant. Speed. — **Con.** Accelerate, quicken, hasten, hurry (see **SPEED**, *v.*).

slug or **slog**, *v.* *Strike, hit, smite, slap, swat, clout, punch, box, cuff.

sluggish. *Lethargic, torpid, stuporous, comatose.

Ana. Inert, *inactive: indolent, slothful, *lazy: listless, languishing, *languid.

Ant. Brisk: expeditious: quick (*of mind*).

slumberous or **slumbrous**. *Sleepy, drowsy, somnolent.

slushy. *Sentimental, mushy, romantic, mawkish, maudlin, soppy.

sly, *adj.* **Sly**, **cunning**, **crafty**, **tricky**, **foxy**, **wily**, **artful** are synonymous when they mean having or showing a disposition to attain one's ends by devious or indirect means. **Sly** implies a lack of candor, which shows itself in secretiveness, in suggestiveness rather than in frankness, in underhandedness, or, often, in a vulgar turn for furtiveness or duplicity in one's dealings with others.

"Why, Jane—you never dropt a word of this; you *sly* thing" (*Austen*). "Wrinkled *slyness* and craft pitted against native truth and sagacity" (*N. Hawthorne*). "With knowing leer and words of *sly* import" (*Irving*). **Cunning**, in the sense in which it is here considered (see also **CLEVER**, 2), stresses the use of intelligence in overreaching or circumventing; nevertheless, it often suggests a low-grade mentality or a perverted sense of morality. "Every man wishes to be wise, and they who cannot be wise are almost always *cunning*" (*Johnson*). "Infants are far more *cunning* than grown-up people are apt to suppose; if they find that crying produces agreeable results, they will cry" (*B. Russell*). "All gods are cruel, bitter, and to be bribed, But women-gods are mean and *cunning* as well" (*G. Bottomley*). **Crafty** also implies a use of intelligence, but it suggests a higher order of mentality than *cunning*: that of one capable of devising stratagems and adroit in deception. "He disappointeth the devices of the *crafty*, so that their hands cannot perform their enterprise" (*Job* v. 12). "As a *crafty* envoy does his country's business by dint of flirting and conviviality" (*C. E. Montague*). **Tricky** usually suggests unscrupulousness and chicanery in dealings with others; in general, it connotes shiftiness and unreliability rather than skill in deception or in maneuvering; as, to fear a *tricky* opponent more than a *crafty* one. "Able men of high character, and not smart, *tricky* men" (*The Nation*). **Foxy** implies shrewdness in dodging discovery or in practicing deceptions so that one may follow one's own devices or achieve one's own ends; it usually connotes experience and is rarely applied to the young or to novices; as, a *foxy* old man; a *foxy* detective. **Wily** stresses an attempt to ensnare or entrap; it commonly implies astuteness or sagacity and, usually, a lack of scruples regarding the means to one's end. "Shun the insidious arts That Rome provides, less dreading from her frown Than from her wily praise" (*Wordsworth*). "The head-master, *wily*, had not confiscated these [forbidden] articles; he had merely informed the parents concerned" (*Bennett*). **Artful** implies insinuating or alluring indirectness of dealing; it usually also connotes sophistication, or coquetry, or designs. "—is a good-natured old easy fool, and has been deceived by the most *artful* of her sex" (*Sterne*). "The Lucases are very *artful* people indeed, sister. They are all for what they can get" (*Austen*).

Ana. Furtive, clandestine, stealthy, covert (see **SECRET**): devious, oblique, *crooked: astute, *shrewd.

smack, *n.* 1 *Taste, sapidity, flavor, savor, tang, relish. 2 *Touch, suggestion, suspicion, soupçon, tincture, tinge, shade, spice, dash, vein, strain, streak.

small. **Small**, **little**, **diminutive**, **petite**, **wee**, **tiny**, **teeny**, **weeny**, **minute**, **microscopic**, **miniature** come into comparison as meaning conspicuously below the average in magnitude, especially physical magnitude. **Small** (opposed to *large*) and **little** (opposed to *big*, *great*) are often used without distinction. But **small**, more frequently than **little**, applies to things whose magnitude is determined by number, size, capacity, value, significance, and the like; as, a *small* attendance; a *small* boy; a *small* box; a *small* house; *small* coins; a *small* income; a *small* matter. **Small** is also preferred when words like *quantity*, *amount*, *size*, *capacity*, etc., are qualified; as, give me a *small* quantity of flour; they have only a *small* amount of necessary supplies left; the *small* size of the rooms was disappointing. **Small** also applies to intangible and immeasurable things which, however, may be said to be limited in some pertinent or significant way; as, he has a *small* mind; "the *small* arts called womanish" (*Hardy*); "her sadness at the *small* prospect of seeing him again" (*Arch. Marshall*). **Little** is usually more absolute in its

implications than *small*, which often connotes less magnitude than that which is ordinary or which is to be expected or is desirable: it is preferred to *small*, therefore, when there is the intent to convey a hint of pettiness, of pettiness, or of insignificance in size, amount, or quantity, extent, or the like; as, to take *little* interest in politics; "A foolish consistency is the hobgoblin of *little* minds" (*Emerson*); "A *little* advocate in snuff-coloured clothes rose on *little* legs, and commenced to read" (*Galsworthy*); "How unsubstantial then appear our hopes and dreams, our *little* ambitions, our paltry joys!" (*A. C. Benson*). *Little* is also preferred in the sense of "a small amount," "a small quantity," "a small extent," and the like; thus, one asks for "a *little* sugar" or "a *small* quantity of sugar"; one says "the garden is *little*" or "of *small* extent." *Little* is also preferred when the context carries a note of tenderness, pathos, or the like; as, a *little* (cf. *small*) child; our *little* (cf. *small*) house; her pathetic *little* smile; "Sleep, my *little* one" (*Tennyson*). *Diminutive* not only carries a stronger implication of divergence from the normal or usual size or scale than *small* or *little*, but it often carries the meaning of extremely (often abnormally) small or little; as, the bedrooms are *small*, but the parlor is *diminutive*; in so hot a climate peach trees will produce only *diminutive* fruits in very *small* quantities; "The horses are so *diminutive* that they might be, with propriety, said to be Lilliputian" (*Cowper*). *Petite*, originally a French word, has been taken over into English in only one of its applications. It is the usual term to describe a trim, well-shaped woman or girl of diminutive size; as, she is *petite* and unusually pretty. *Wee*, a somewhat more homely term than *diminutive*, and found in dialectal use in place of *small* or *little* (as, a *wee* lad; a *wee* drop of whisky), is also often found in standard English; as, "a *little wee* face, with a *little yellow beard*" (*Shak.*); "Wee, modest, crimson-tipped flow'r" (*Burns*). *Tiny* goes even further than *diminutive* or *wee* in suggesting extreme littleness or a smallness out of proportion to most things of its kind or in comparison with all other things; as, "if such *tiny* entities as the cells of the body are to be regarded as having their own life" (*Inge*); "the behavior of the invisible, intangible, inconceivably *tiny* electrons and atoms" (*Karl K. Darrow*). From *tiny* and *wee* come the colloquial variants *teeny* and *weeny*, now found chiefly in childish, playful, or jocular use: these terms occur also in paired or reduplicated forms, as *teeny-weeny*, *teeny-teeny*, as in, "One day this *teeny-teeny* woman put on her *teeny-teeny* bonnet and went out of her *teeny-teeny* house to take a *teeny-teeny* walk" (in the nursery story "The *Teeny-teeny* Woman"); "he gave a *weeny, weeny* yawn" (*Kate D. Wiggin*). *Minute* is often preferred by scientific and other writers who wish to give a more definite implication of extreme smallness or littleness; as, a *minute* animalcule; *minute* grains of sand; "the tremendous forces imprisoned in *minute* particles of matter" (*Inge*). *Microscopic* applies only to that which is so minute that (at least in its literal sense) it is observable only under a microscope; as, *microscopic* organisms. *Miniature* applies to that which is complete in itself but is built, drawn, made, or the like, on a very small scale; as, "It was one of the *miniature* Italian cities . . . all compact and complete, on the top of a mountain" (*L. P. Smith*); "We may thus picture an atom as a *miniature* solar system" (*Eddington*). In the fine arts, *miniature* applies to a type of painting (a *miniature* painting), which is typically a portrait painted on a small piece of ivory or metal, often brilliantly colored, and executed with nicety and delicacy so as to bring out each detail.

Ana. *Petty, puny, paltry, trifling, trivial.

Ant. Large. — **Con.** Big, great (see **LARGE**): vast, huge, immense, *enormous.

small arms. See under **WEAPON**.

smaller. *Less, lesser, fewer.

smart. 1 Bright, knowing, quick-witted, *intelligent, clever, alert.

Ana. *Sharp, keen, acute: *quick, ready, prompt, apt: *shrewd, astute, perspicacious.

Ant. Dull (of mind).

2 Modish, fashionable, *stylish, chic, dapper, dashing, spruce, natty, nifty, nobby, posh, toffish, brave, braw.

Ana. Elegant, exquisite (see **CHOICE**, *adj.*): *finished, consummate.

Ant. Dowdy, frowzy, blowzy.

smell, n. **Smell, scent, odor (or odour), aroma** come into comparison when they denote that property of a thing which makes it perceptible to the olfactory sense. **Smell** is not only the most general of these terms, but it is also the most colorless. It is the appropriate word when merely the sensation is indicated, and no hint of its source, quality, or character is necessary. "Our horses . . . often reared up and snorted violently at *smells* which we could not perceive" (*Landor*). "For tastes and *smells* and sounds and sights" (*Browning*). It is also the preferred term when accompanied by explicitly qualifying words or phrases; as, "the rank *smell* of weeds" (*Shak.*); "the damp earthy *smell*" (*Stevenson*); "a *smell* of marigold and jasmine stronger even than the reek of the dust" (*Kipling*). **Scent** (see also **FRAGRANCE**), in precise use, always carries the implication of a physical emanation from that which is smelled; thus, all substances that emit effluvia have a *scent*; things that give off effluvia often leave a *scent* after they have disappeared; the path followed by a person or an animal can be detected, especially by hounds that have a superior sense of smell, by tracing his (or its) *scent* or by following a *scent*. **Scent**, therefore, is the precise term to use when the emphasis is on the emanations or exhalations from an external object which reach the olfactory nerves rather than on the impression produced on the olfactory nerves. "The *scent* of the first wood fire upon the keen October air" (*Pater*). "If the air was void of sound, it was full of *scent*" (*Galsworthy*). "The heavy *scent* of damp, funereal flowers" (*Millay*). **Odor** is oftentimes indistinguishable from *scent*, for it too is thought of as something diffused and as something by means of which external objects are identified by the sense of smell. But the words are not always interchangeable, for *odor* usually implies abundance of effluvia (cf. *odorous* and *odoriferous*) and therefore does not suggest, as *scent* often does, the need of a delicate or highly sensitive sense of smell; as, Trixie knows her master by his *scent* (not *odor*); the *odors* (better than *scents*) of the kitchen clung to her clothes. For these reasons, *odor* usually implies general perceptibility and is the preferred word in scientific use, especially when the classification or description of types is attempted. "Science, while recognizing the potency of our sense of smell, has not yet satisfactorily classified and catalogued the many varieties of *odors* that we recognize" (*A. C. Morrison*). "Henning recognizes six outstanding *odors*: spicy, as cloves; flowery, as heliotrope; fruity, as apple; resinous, as turpentine; foul, as rotten egg; scorched, as tar" (*Webster's New Int. Dict., 2d Ed.*). **Aroma** usually adds to *odor* the implication of a penetrating, pervasive, or sometimes, a pungent quality; it may or may not imply delicacy or fragrance, but it seldom connotes unpleasantness; in very discriminating use, it often suggests something to be savored, and therefore may be used of things that appeal both to the sense of smell and taste, or by extension to one's aesthetic sense; as, the *aroma*

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

of fresh coffee; the *aroma* of pines, spruces, and balsams; "the *aroma* of a wood fire is the significant part of a camper's delight" (A. C. Morrison); "what a rich *aroma* hangs about this judgment!" (A. C. Benson).

Ana. *Fragrance, redolence, perfume, bouquet, incense: savor, flavor (see TASTE).

smidgen or smidge. *Particle, bit, mite, smitch, whit, atom, iota, jot, tittle.

smile, v. *Smile, grin, simper, smirk* come into comparison as verbs meaning to express amusement, pleasure, or the like, by a brightening of the eyes and an upward curving of the corners of the mouth, and as nouns denoting such an expression of amusement, pleasure, or the like. *Smile* is the general term, capable of being qualified so as to suggest malign as well as benign pleasure or amusement; as, to *smile* tenderly or derisively; a sad or a bright *smile*; to *smile* at one's maiden efforts; to wear a set *smile*. *Grin* implies a broad smile that shows the teeth. It still often carries a suggestion of its earlier meaning—to show one's teeth, as a dog or wolf in anger or pain, in its still not infrequent implication of unnaturalness, of bewilderment, senselessness, or the like. "With rash and awkward force the chords [of a lyre] he [an idiot] shakes. And *grins* with wonder at the jar he makes" (Cowper). "They could not see the bitter smile Behind the painted *grin* he wore" (E. R. Sill). In current use, however, *grin* tends to imply naive cheerfulness, mirth, or impishness; as, a boyish *grin*. "How cheerfully he seems to *grin*. How neatly spreads his claws, And welcomes little fishes in With gently *smiling* jaws!" (Carroll). *Simper* implies a silly, affected, or languishing smile; as, "*simpering* angels, palms, and harps divine" (Pope); "Forming his features into a set smile, and affectedly softening his voice, he added with a *simpering* air..." (Austen). *Smirk* suggests extreme self-consciousness and evident complacency or conceit; as, "Amilcare talked profusely, *smirked*, grimaced... writhed his hands" (Hewlett); "The faintest *smirk* of self-satisfaction alienates the hearer" (T. E. Brown).

Ant. Frown.

smile, n. *Smile, smirk, grin.* See under SMILE, v.

Ant. Frown.

smirk, v. *Simper, grin, *smile.*

smirk, n. *Simper, grin, smile.* See under SMILE, v.

smitch. *Particle, bit, mite, smidgen, whit, atom, iota, jot, tittle.

smite. *Strike, hit, slug, slap, swat, clout, punch, box, cuff.

Ana. *Beat, pummel, buffet: *punish, discipline, correct.

smog. Fog, mist, *haze, brume.

smooth, adj. 1 Even, plane, plain, flat, *level, flush.

Ana. *Sleek, slick, glossy, glabrous: polished, burnished (see POLISH).

Ant. Rough. — **Con.** Harsh, uneven, rugged, scabrous (see ROUGH).

2 Effortless, *easy, light, simple, facile.

Ana. Agreeable, *pleasant, pleasing, gratifying, grateful: serene, tranquil, *calm, placid, peaceful.

Ant. Labored. — **Con.** *Hard, difficult, arduous.

3 Bland, diplomatic, politic, *suave, urbane.

Ana. *Disarming, ingratiating, insinuating: polite, courteous, courtly (see CIVIL): oily, unctuous, sleek, *falsome.

Ant. Bluff. — **Con.** Blunt, brusque, curt, gruff, crusty (see BLUFF).

smörgåsbord. *Appetizer, hors d'oeuvre, antipasto, apéritif.

smug. Self-complacent, self-satisfied, priggish, *complacent.

Ana. Self-respecting, self-esteeming, self-admiring (see primitive verbs under REGARD, n.): pharisaical, sanctimonious, hypocritical (see under HYPOCRISY).

snaffle, v. Curb, check, bridle, *restrain, inhibit.

Ana. *Guide, lead: control, manage, direct (see CONDUCT, v.).

snag, n. *Obstacle, obstruction, impediment, bar.

Ana. *Projection, protuberance: *difficulty, hardship, vicissitude: barring or bar, blocking or block, hindering or hindrance (see corresponding verbs at HINDER).

snappish. *Irritable, fractious, peevish, waspish, petulant, pettish, huffy, huffish, fretful, querulous.

Ana. Testy, techy, touchy, cranky, *irascible: surly, crabbed, morose (see SULLEN).

snappy. *Pungent, piquant, poignant, racy, spicy.

Ana. *Sharp, keen, acute: vivacious, *lively, animated:

*quick, prompt, ready: smart, dashing, chic, modish (see STYLISH).

snare, n. Trap, *lure, bait, decoy.

Ana. *Trick, ruse, stratagem, maneuver, artifice, feint, wile: trickery, *deception, chicanery, chicane, subterfuge.

snare, v. Ensnare, trap, entrap, bag, *catch, capture, nab, cop.

Ana. *Lure, entice, inveigle, tempt, seduce, decoy.

snarl, n. *Confusion, disorder, chaos, disarray, jumble, clutter, pie, muddle.

Ana. Complexity, complication, intricateness or intricacy (see corresponding adjectives at COMPLEX): *difficulty, hardship.

snatch, v. Grasp, grab, clutch, seize, *take.

Ana. *Catch, capture, nab, cop: *pull, drag, draw.

sneak, v. Slink, skulk, *lurk, couch.

sneer, v. *Scoff, jeer, gird, flout, gibe, flier.

Ana. Deride, taunt, mock, *ridicule: scout, *despise, scorn, disdain.

snitch. *Steal, pilfer, filch, purloin, lift, pinch, swipe, cop.

snoopy. *Curious, inquisitive, prying, nosy.

Ana. Meddlesome, officious, intrusive, *impertinent, obtrusive: interfering, interposing (see INTERPOSE).

snug. 1 Trim, trig, shipshape, *neat, tidy, spick-and-span.

Ana. Compact, *close: *orderly, methodical, systematic. 2 Comfortable, cozy, easy, restful, reposeful.

Ana. *Safe, secure: *familiar, intimate, close: sheltered, harbored (see HARBOR, v.).

so. *Therefore, hence, consequently, then, accordingly.

soak, v. *Soak, saturate, drench, steep, impregnate, sog, sop, ret, waterlog* come into comparison when they mean to subject or to be subjected to the influence of water or, especially in figurative use, of something like water, so as to become permeated with it. *Soak* literally suggests immersion in a liquid so that the substance absorbs the moisture and becomes thoroughly wetted, softened, dissolved, or otherwise affected by it; as, to *soak* a sponge in water; the blotter has *soaked* up nearly all the spilled ink; to *soak* out the dirt from soiled clothes; *soak* the tapioca before cooking it. Figuratively, the term implies a comparable immersion of one thing in another so that the latter is taken up by or enters into the very fibers or tissues of the former and becomes a part of it; as, he *soaked* himself in the poetry of the great romanticists; "The shadowy copse was *soaked* in piney sweetness, golden and dim" (R. Macaulay); "Soaked in the best prejudices and manners of his class" (Galsworthy). *Saturate* may or may not imply a soaking: distinctively it stresses absorption as of a liquid or other substance up to a point where no more can be absorbed; thus, the air is said to be *saturated* when it can retain no more moisture in

the form of vapor; one's clothes may be described as *saturated* when they are so damp that the addition of further moisture would make them dripping wet; a solution, as of salt or boric acid in water, is said to be *saturated* when the liquid has dissolved as much of the substance as it can retain under the circumstances as of heat, pressure, or the like. Consequently, in its figurative use, *saturate* usually implies a becoming imbued or infused with something in exactly the right measure or in the most useful degree; as, "To a mind not thoroughly *saturated* with the tolerating maxims of the Gospel" (*Burke*); the entire poem is *saturated* with imagination. "*Saturated* with experience of a particular class of materials, an expert intuitively feels whether a newly reported fact is probable or not" (*W. James*). *Drench* literally implies a thorough wetting by pouring water (such as rain) or other liquid; as, "They were in an open buggy and were *drenched* to the skin" (*Cather*). In its extended sense the term, in very precise use, always carries an implication of being soaked or saturated by something that pours or is poured down upon one; as, "The solid mountains shone... *drenched* in empyrean light" (*Wordsworth*); "the new life with which it *drenches* the spirits" (*Shelley*). *Steep* implies a soaking of one thing in another (literally, a liquid); in current use, it commonly suggests the extraction of the essence of one thing so that it becomes part and parcel of the other; thus, one *steeps* tea leaves in boiling water in order to make the beverage tea. In extended use, the acquirement of the qualities of one thing by a process suggestive of such steeping is often implied (as, "epistles... *steeped* in the phraseology of the Greek mysteries"—*Inge*; "language simple and sensuous and *steeped* in the picturesque imagery of what they saw and felt"—*Lowes*), but often the term means little more than to envelop as with the color, light, or the like, shed from or emanated by something else (as, "her tall spars and rigging *steeped* in a bath of red-gold"—*Conrad*; "The world was all *steeped* in sunshine"—*D. H. Lawrence*). *Impregnate*, less than any of these terms, carries a suggestion of soaking in water; otherwise it implies the interpenetration of one thing by another until the former is everywhere imbued with the latter; as, to *impregnate* rubber with sulphur; "When my mind was, as it were, strongly *impregnated* with the Johnsonian aether" (*Boswell*); "this poem, everywhere *impregnated* with original excellence" (*Wordsworth*). *Sog*, a dialectal term, implies a soaked and sodden condition; as, "*sogged* leaves" (*P. Gosse*); *sogged* shoes. *Sop* usually applies to food soaked as in meat juices, wine, or the like (as, to *sop* one's bread in gravy; to serve cake *sopped* in sherry and covered with a soft custard), but it may apply also to anything, such as soil, that is heavily soaked with liquid; as, *sopping* wet clothes; to *sop* one's plants with too much water. *Ret*, now chiefly a technical term, often applies to a soaking or exposure to moisture that is part of a processing of materials or of seasoning or conditioning them; as, to *ret* hemp or flax; to *ret* timber. *Waterlog* suggests a thorough soaking or drenching that renders a thing either useless or too heavy and sodden for floating, cultivating, or the like; as, a *waterlogged* rowboat; to *waterlog* soil by lack of proper drainage.

Ana. *Dip, immerse, submerge: *permeate, pervade, penetrate.

soak, n. *Drunkard, inebriate, alcoholic, dipsomaniac, sot, toper, tosspot, tippler.

soapy. Sleek, *falsome, oily, unctuous, oleaginous.

soar. *Rise, arise, ascend, mount, tower, rocket, levitate, surge.

Ana. *Fly, dart, shoot: aspire, *aim.

sob, v. Moan, groan, *sigh.

Ana. Weep, wail, *cry, blubber.

sob, n. Moan, groan, sigh. See under SIGH, *v.*

Ana. Weeping, wailing, crying, blubbering (see CRY, *v.*).

sober. 1 *Sober, temperate, continent, unimpassioned* come into comparison when they mean having or manifesting self-control or the mastery of one's emotions, passions, or appetites. *Sober* etymologically implies freedom from intoxication: this implication is still often found with another, such as that of habitual abstinence from intoxicating liquors or merely of not being drunk at the time in question; as, he is, by reputation, a *sober* man; he was *sober* when he delivered the blow. As here especially considered (see also SERIOUS), *sober* implies a cool head, great composure, especially under strain or excitement, and freedom from passion, prejudice, fear, or the like; as, he was the only one who could keep a *sober* head during the panic; sound, *sober* advice; a man of *sober* judgment. *Temperate* (as here compared: see also MODERATE, 1) implies control over the expression of one's feelings, passions, appetites, or desires, or the restrained exercise of one's rights, powers, or privileges, with the result that one never exceeds the bounds of what is right or proper or decorous; as, "That *sober* freedom out of which there springs Our loyal passion for our *temperate* kings!" (*Tennyson*); "in what *temperate* language Horace clothes his maxims... Not a flourish! Not a gesture!" (*A. Repplier*); "he *temperately* used the privileges of his office" (*Quiller-Couch*). *Continent* carries a stronger implication of deliberate restraint placed upon oneself and upon one's feelings seeking expression, or upon one's desires (especially sexual desires) seeking satisfaction; as, "I pray you, have a *continent* forbearance till the speed of his rage goes slower" (*Shak.*); "My past life Hath been as *continent*, as chaste, as true, As I am now unhappy" (*Shak.*); "Not... a subject of irregular and interrupted impulses of virtue, but a *continent*, persisting, immovable person" (*Emerson*). *Unimpassioned* so stresses the absence of heat, ardor, or fervor, that it often connotes lack of feeling and, therefore, coldness, stiffness, hardness of heart, or the like (as, "[Selfishness] frozen, *unimpassioned*, spiritless, Shunning the light"—*Shelley*), but in very discriminating use, it often implies a subduing of feeling or passion by allowing reason to gain the mastery (as, the *unimpassioned* administration of disciplinary measures; "one who comes... to ask In weighed and measured *unimpassioned* words, A gift, which, if... denied, He must withdraw, content upon his cheek, Despair within his soul"—*Browning*).

Ana. Abstaining, refraining, forbearing (see REFRAIN): forgoing, eschewing, abnegating (see FORGO): *cool, collected, composed: reasonable, *rational.

Ant. Drunk: excited.

2 Grave, *serious, sedate, staid, solemn, earnest.

Ana. *Decorous, decent, demure, proper: *calm, placid, tranquil, serene: dispassionate, impartial, *fair, equitable.

Ant. Gay. — *Con.* Light, frivolous, flippant, light-minded (see corresponding nouns at LIGHTNESS).

sobriety. *Temperance, abstinence, abstemiousness, continence.

Ana. Moderateness, temperateness (see corresponding adjectives at MODERATE): quietness, stillness (see corresponding adjectives at STILL): seriousness, gravity, sedateness (see corresponding adjectives at SERIOUS).

Ant. Drunkenness: excitement.

sociable. *Gracious, cordial, affable, genial.

Ana. *Social, companionable, convivial, gregarious: intimate, *familiar, close: *amiable, obliging, com-
plaisant, good-natured.

Ant. Unsociable.

social, *adj.* **Social**, gregarious, co-operative, convivial, companionable, hospitable are not actually synonymous terms but they invite comparison because they involve, and often stress, the idea of having or manifesting a liking for the company of others. **Social** is now often used in the general sense of having to do with society, that is, society as an organic or organized unit composed of all men or of all in a community in which the individual is but a part of a whole; as, the *social* order; *social* work; *social* service. Consequently, its more specific sense of characterized by or resulting from a mingling with others as one's fellows, companions, or friends, is not always clearly distinguished; as, there are not many opportunities for *social* activities in this town; they have pleasant *social* relations with all the members of their church; "if . . . every one is talking at once it is evidently because of the *social* desire to contribute to the conversation" (*Brownell*). *Social* is now practically obsolete in the older sense of *sociable* (see *sociable* under GRACIOUS); as, "Preserve him *social*, cheerful, and serene" (*Pope*). **Gregarious** implies a desire or an instinct (often called the *herd instinct*) which drives not only persons but animals to associate with others of their kind, and to form communities, colonies, flocks, sets, or other groups: the term connotes a tendency to solidarity and, often, an aversion to solitariness, but it seldom suggests interest in others for any reason such as a friendly attitude, a sense that they are one's fellows, or a belief that union will be to their advantage as well as one's own. "They are not . . . kind, only sentimental; not *social*, only *gregarious*; not considerate, only polite" (*Shaw*). "It might be inferred . . . that I am an inveterately unsocial person; but such is not the case. I am extremely *gregarious* at the right time and place" (*A. C. Benson*). "Impelled by *gregarious* instincts, Peter followed the crowd" (*H. G. Wells*). **Co-operative**, especially as applied to persons, implies the recognition of common ends which serve as the objectives of the group, the community, or society at large and of the need of mutual assistance in the attainment of those ends: the term, therefore, usually suggests helpfulness and a willingness to work for the welfare or well-being of the entire group; as, the new president of the society found that few of the members were *co-operative*; the citizens of Middleburgh were unusually *co-operative*; "With regard to a young English statesman, we want to know two things mainly—his intrinsic value, and his *co-operative* capacity" (*Pall Mall Gazette*). **Convivial**, which etymologically means festive (as, *convivial* occasions), is now more and more often applied to persons and groups that manifest enjoyment of the company of others, especially in festivities where joviality and eating and drinking form the chief, though not necessarily the only, entertainment; as, "the plump *convivial* parson" (*Cowper*); "dinners *convivial* and political" (*Shelley*); "she was a somewhat sombre figure in that *convivial* household" (*Cather*). **Companionable** implies a special fitness by nature or disposition for friendly and intimate association with others. "Thus we lived on unsocially together. More *companionable* . . . were the large crawling, running insects—crickets, beetles, and others" (*Hudson*). **Hospitable** usually implies a disposition to receive and to entertain not only one's friends, but especially strangers: it therefore stresses receptiveness (sometimes mental receptiveness) and generosity more than any of the preceding terms; as, a *hospitable* race; a *hospitable* family; "visits to . . . great *hospitable* houses" (*H. Ellis*); a mind *hospitable* to ideas.

Ana. *Gracious, cordial, sociable, genial, affable: *amicable, neighborly, friendly.

Ant. Unsocial, antisocial, asocial.

socialist. *Collectivist, communist, Bolshevik, nihilist, anarchist.

society. 1 Elite, gentlefolk, *aristocracy, nobility, gentry, county.

2 *Association, order, club.

soft, *adj.* **Soft**, bland, mild, gentle, lenient, balmy come into comparison when they are applied to things with respect to the sensations they evoke, or the impressions they produce, and agree in meaning pleasantly agreeable because devoid of all harshness or roughness. **Soft**, as here compared, is applied chiefly to that which soothes, tranquilizes, or induces a sensation of delicious quiet; as, "As sweet as balm, as *soft* as air, as gentle" (*Shak.*); "A *soft* answer turneth away wrath" (*Proverbs* xv. 1); "And ever, against eating cares, Lap me in *soft* Lydian airs" (*Milton*); "To feel for ever its *soft* fall and swell" (*Keats*). This positive connotation is apparent in the discriminating use of *soft* even when its major implication is the absence or the subduing of some quality such as pungency, vividness, intensity, force, or the like; thus, a *soft* fragrance is lacking in richness but is quietly agreeable and not overpowering; a *soft* color is lacking in vividness, but it is mellow rather than dull; a *soft* voice is lacking in resonance but it is not faint or feeble, but is pleasantly low and without a trace of harshness or stridency. "The far shore of the river's mouth was just *soft* dusk" (*Galsworthy*). "Or the *soft* shock Of wizened apples falling From an old tree" (*Millay*). **Bland**, which was once applied almost exclusively to persons and their manners (see *SUAVE*), is now increasingly applied to things which in earlier times might be described as *soft*. It has, however, carried over its original connotations of smoothness and suavity into this use, so that it suggests not so much a tranquilizing effect as the absence of anything that might disturb, excite, stimulate, or the like; thus, foods and beverages which are not unpleasant to the taste yet are lacking in pungency, tang, fruitiness, strong savor, and the like, may be described as *bland* (as, a *bland* wine; *bland* fruits such as pears and peaches; a *bland* dessert such as a custard or junket); a *bland* climate is not only free from extremes, but is neither stimulating nor depressing. "That *bland* and composed country-side [was chosen] for the site of the grave [of Matthew Arnold] in preference to the stern Cumberland hills, which the dead had loved too" (*C. E. Montague*). "Full, clear, with something *bland* and suave, each note [of the bell] floated through the air like a globe of silver" (*Cather*). Both *mild* and *gentle* stress moderation; they are applied chiefly to things that are not, as they might be or often are, harsh, rough, strong, violent, unduly stimulating, or irritating, and are therefore pleasant or agreeable by contrast; as, a *mild* cigar; *mild* weather; a *gentle* breeze; a *gentle* heat. However, both words are capable of connoting positively pleasurable sensations, *mild* often being applied to that which induces a feeling of quiet measured beauty or of serenity, *gentle* to that which evokes a mood of placidity or tranquility, or even more often, a sense of restrained power or force. "Some did shed A clear *mild* beam like Hesperus, while the sea Yet glows with fading sunlight" (*Shelley*). "A thick brake, Nested and quiet in a valley *mild*" (*Keats*). "O sleep, O *gentle* sleep, Nature's *soft* nurse" (*Shak.*). "They are as *gentle* As zephyrs blowing below the violet" (*Shak.*). **Lenient**, as here considered (see also *FORBEARING*), is applicable chiefly to things that are grateful to the senses or to the mind because they exert an emollient, relaxing, softening, or assuasive influence; as, a *lenient* balm. "And earthly sounds, though sweet and well combined, And *lenient* as *soft* opiates to the mind" (*Cowper*). "Pangs of grief for *lenient*

time too keen" (*Wordsworth*). The word has, in the course of time, however, taken over from its later but more frequent sense a connotation of merciful indulgence or of mitigation of severity, which tends to weaken or destroy its original sense; thus, the common expression "the *lenient* hand of time" originally meant the softening and assuaging influence of time (as, "Time, that on all things lays his *lenient* hand. Yet tames not this [the passion for praise]"—*Pope*), but in current use, it often implies indulgence or kindness on the part of time (as, the *lenient* hand of time had left no marks upon her brow, for it was as smooth as ivory). **Balmy** also implies a soothing influence on the senses or mind, but above and beyond this it suggests refreshment and sometimes exhilaration. Coupled with one or another of these implications, there is also frequently a suggestion of fragrance, especially the aromatic fragrance of balm-producing trees. "Tired Nature's sweet restorer, *balmy* sleep!" (*Young*). "O *balmy* gales of soul-reviving air!" (*Cowper*). "Sweet sleep, whose dews Are sweeter than the *balmy* tears of even" (*Shelley*).

Ana. Moderated, tempered, attempered (see *MODERATE*, *v.*): smooth, effortless, *easy: velvety, silken, *sleek, slick: serene, tranquil, *calm, placid, peaceful.

Ant. Hard: stern. — **Con.** *Rough, harsh, uneven, rugged: *intense, vehement.

sog. *Soak, saturate, drench, steep, impregnate, sop, ret, waterlog.

sojourn, v. *Reside, lodge, stay, put up, stop, live, dwell.

solace, v. *Comfort, console.

Ana. *Relieve, assuage, mitigate, allay, alleviate, lighten: gladden, rejoice, delight, *please, gratify.

sole, adj. *Single, unique, solitary, lone, separate, particular.

Ana. Alone, *only: exclusive, picked, *select.

solecism. 1 **Solecism, barbarism, impropriety** designate in rhetoric a violation of the standard of good use in language. A **solecism** is a construction which violates the rules of syntax, or less precisely the approved idiom; a **barbarism** is an expression not permissible in reputable use because it is etymologically corrupt, or an importation not yet anglicized, or borrowed from cant or jargon, or a smart coinage; an **impropriety** is a word or phrase employed in a sense contrary to good usage; thus, "between you and I" and "he don't" are *solecisms*; "Humans" for "persons," "burgle," and "irregardless" are *barbarisms*; the use of "transpire" in the sense of "happen" is an *impropriety*.

2 *Anachronism.

solemn. 1 *Ceremonial, ceremonious, formal, conventional.

Ana. Liturgical, ritualistic (see corresponding nouns at *FORM*): *full, complete, plenary: imposing, august, majestic, magnificent (see *GRAND*).

2 *Serious, grave, sedate, earnest, staid, sober.

Ana. Impressive, *moving: sublime, superb (see *SPLENDID*): pompous, ostentatious (see *SHOWY*).

solemnize. Celebrate, observe, *keep, commemorate.

solicit. 1 *Ask, request.

Ana. *Resort, refer, apply, go, turn: *beg, entreat, beseech, implore, supplicate.

2 *Invite, bid, court, woo.

Ana. Importune, adjure, conjure (see *BEG*): *demand, claim, exact: evoke, elicit, extract, extort, *educate.

solicitor. *Lawyer, attorney, counselor, barrister, counsel, advocate, proctor, procurator.

solicitous. Careful, concerned, anxious, worried. See under *CARE*, *n.*

Ana. Apprehensive, *fearful, afraid: agitated, disturbed, disquieted, upset (see *DISCOMPOSE*): uneasy, fidgety, jittery (see *IMPATIENT*).

Ant. Unmindful: negligent.

solicitude. *Care, concern, anxiety, worry.

Ana. Misgiving, *apprehension, foreboding, presentiment: compunction, *qualm, scruple: *fear, alarm, consternation, dismay.

Ant. Negligence: unmindfulness.

solid. *Firm, hard.

Ana. Compact, *close, dense: consolidated, concentrated, compacted (see *COMPACT*, *v.*).

Ant. Fluid, liquid.

solidarity. *Unity, union, integrity.

Ana. Consolidation, concentration, unification (see corresponding verbs at *COMPACT*): co-operation, concurrence, combination (see corresponding verbs at *UNITE*).

solitary. 1 *Alone, lonely, lonesome, lone, forlorn, lorn, desolate.

Ana. Isolated, secluded (see corresponding nouns at *SOLITUDE*): retired, withdrawn (see *GO*): forsaken, deserted, abandoned (see *ABANDON*).

2 *Single, sole, unique, lone, separate, particular.

Ana. Alone, *only.

solitude. **Solitude, isolation, seclusion** come into comparison as meaning the state of one that is alone. **Solitude** applies not only to a physical condition where there are no others of one's kind with whom one can associate in any way (as, "O *Solitude!* where are the charms That sages have seen in thy face? ... I am out of humanity's reach ... Never hear the sweet music of speech, I start at the sound of my own"—*Cowper*) but more often to the state, physical or mental, of one who by wish or by compulsion is cut off from neighbors, friends, housemates, or the like (as, "my spirits will not bear *solitude*. I must have employment and society"—*Austen*; "that inward eye [imagination] Which is the bliss of *solitude*"—*Wordsworth*; "to have the choice of society and *solitude* alike"—*A. C. Benson*). Sometimes, the term refers entirely to a mental state and comes very close in meaning to *loneliness*, implying a lack of intimate association with, rather than a separation from, others. "Sophia ... had not been able to escape from the *solitude* imposed by existence in hotels. Since her marriage she had never spoken to a woman in the way of intimacy" (*Bennett*). **Isolation** stresses detachment from others, either because of causes beyond one's control or because of one's own wish. Since the term may refer to communities and to things as well as to individuals, it often suggests a cutting off physically rather than a frame of mind such as loneliness or depression; as, the *isolation* of a country surrounded on all sides by enemies; "the solemn *isolation* of a man against the sea and sky" (*Stevenson*); "the axiom ... that the artist and man of letters ought not to work in cloistral *isolation*, removed from public affairs" (*Quiller-Couch*); "the one place in the house where he could get *isolation*" (*Cather*). "Whether splendidly isolated or dangerously isolated, I will not now debate; but for my part, I think splendidly isolated, because this *isolation* of England comes from her superiority" (*Laurier*). **Seclusion** implies a shutting away, or a keeping apart of oneself or another, so that one is either inaccessible to others or is accessible only under very difficult conditions. Usually the term connotes a condition such as confinement in an asylum, a prison, or the like, or withdrawal from the world, as to a monastery, or from human companionship, as to a place of retirement or retreat. "The *seclusion* of their life was such that she would hardly be likely to learn the news

except through a special messenger" (*Hardy*). "Shaftsbury... a man of fragile physical constitution... was not a childish hypochondriac in seclusion, but a man in the world" (*H. Ellis*). "In his youth, Joseph had wished to lead a life of seclusion and solitary devotion; but the truth was, he could not be happy for long without human intercourse" (*Cather*).

Ana. Retreat, refuge, asylum (see **SHELTER**, *n.*): retirement, withdrawal (see corresponding verbs at **GO**).

solvent. **Solvent, dissolvent, resolvent, menstruum, alkalest** agree in denoting a substance that dissolves, or mixes homogeneously with, another substance. **Solvent**, the most general of these terms, usually denotes a liquid or a solid in a fluid state (as molten metal) that dissolves another liquid, a gas, or, most commonly, a solid; as, water is a *solvent* for salt; ether is a *solvent* for fats; molten iron is a *solvent* for carbon, with which it forms the alloy steel. **Dissolvent** is now practically displaced by *solvent*, except in chemistry and medicine when there is the intent to imply disintegration; as, a *dissolvent* for gallstones; there are few *dissolvents* for gold. **Resolvent**, a nonscientific and comparatively uncommon term, is practically synonymous in meaning with *dissolvent*. **Menstruum** is applied to solvents for solids and today is restricted mostly to use in pharmacy; as, alcohol is the *menstruum* used for many drugs. **Alkalest** is a term originally used by alchemists to denote a hypothetical solvent for all substances.

somatic. *Bodily, physical, corporeal, corporal.

some, adj. **Some, any** are comparable when they mean one, not designated, out of a number. In general, **some** emphasizes lack of specification, **any** stresses indifference of choice or lack of limitation; as, "some unsuspected isle in far-off seas" (*Browning*); come and see us *some* day; come *any* day that is convenient for you; "and *any* step which in our dance we tread" (*Shelley*).

somnolent. *Sleepy, drowsy, slumberous.

Ana. Sluggish, stuporous, comatose, *lethargic: inert, *inactive, passive, supine.

sonance. *Sound, noise.

soon, adv. *Early, beforehand, betimes.

sop. *Soak, saturate, drench, steep, impregnate, sog, ret, waterlog.

sophism. Sophistry, casuistry, *fallacy, paralogism.

sophistical. Fallacious, casuistical, paralogistic. See under **FALLACY**.

Ant. Valid. — **Con.** Cogent, sound, convincing, telling (see **VALID**).

sophisticate. *Adulterate, load, weight, doctor, deacon.

sophistry. *Fallacy, sophism, casuistry, paralogism.

Ana. Plausibility, speciousness (see corresponding adjectives at **PLAUSIBLE**): equivocation, *ambiguity, tergiversation: evading or evasion, avoiding or avoidance (see corresponding verbs at **ESCAPE**).

soppy. *Sentimental, romantic, mawkish, maudlin, mushy, slushy.

sorcery. *Magic, witchcraft, witchery, wizardry, alchemy, thaumaturgy.

sordid. *Mean, ignoble, abject.

Ana. *Mercenary, venal: squalid, foul, filthy, nasty, *dirty: *contemptible, despicable, sorry, scurvy, cheap, beggarly.

sorrow, n. Sorrow, grief, heartache, anguish, woe, dole, regret agree in the idea of distress of mind. Sorrow is the most general term, implying a sense of one's own or another's loss, or a sense of guilt. "When you depart from me, sorrow abides and happiness takes his leave" (*Shak.*). Grief is poignant sorrow, especially for some definite cause. "Grief... of so flood-gate and o'bearing nature

That it engulfs and swallows other sorrows" (*Shak.*). **Heartache** is used especially of sorrow that springs from disappointment, as of hope or love, and which gives little or no outward indication; as, the *heartaches* of a would-be author. "The heart-aching that is concealed within the glare and tinsel exposed to the audience" (*W. Ballantine*). **Anguish** is excruciating or torturing grief or dread. "Anguish so great that human nature is driven by it from cover to cover, seeking refuge and finding none" (*R. Macaulay*). "I had that terrible pain before playing—that anguish which is not to be described" (*Paderewski*). **Woe** is deep or inconsolable grief or misery. "Out-cast from God... condemned To waste eternal days in woe" (*Milton*). **Dole** (archaic or dialectal) is woe vented in weeping, moaning, or wailing. "Let stremes of tears supply the place of sleepe; Let... all that may augment My doole, drawe nearer!" (*Spenser*). **Regret** seldom implies a sorrow that shows itself in tears, or sobs, or moans; usually it connotes pain of mind such as deep disappointment, fruitless longing, heartache, or spiritual anguish; consequently, the term is applicable within a wide range that begins with the disappointment one feels (sometimes sincerely but sometimes merely as suggested by the language required by convention) in declining an invitation and ends with the pangs of remorse for something done or left undone or of hopeless repining for that which (or for one who) can never be restored; as, to decline an invitation to dinner with regret; "Mrs. Manson, with a sigh that might have been either of regret or relief" (*E. Wharton*); "Dante's... nostalgia, his bitter regrets for past happiness" (*T. S. Eliot*). "But time hath power to soften all regrets" (*Wordsworth*).

Ana. Mourning, grieving (see **GRIEVE**): *distress, suffering, misery, agony: melancholy, dejection, *sadness, depression.

Ant. Joy.

sorrow, v. Mourn, *grieve.

Ana. *Cry, weep, wail, keen: sob, moan, groan (see **SIGH**, *v.*).

sorry. Pityable, *contemptible, despicable, scurvy, cheap, beggarly.

Ana. *Mean, ignoble, sordid, abject: *miserable, wretched: paltry, *petty, trifling, trivial.

sort, n. *Type, kind, nature, description, character, stripe, kidney, ilk.

sort, v. *Assort, classify, alphabetize, pigeonhole

Ana. Arrange, methodize, systematize, *order: cull, pick, *choose, select.

sot. *Drunkard, inebriate, alcoholic, dipsomaniac, soak, toper, tosspot, tippler.

soul. 1 *Mind, intellect, psyche, brain, brains, intelligence, wit, wits.

Ana. Powers, faculties, functions (see singular nouns at **POWER**).

2 Soul, spirit are often convertible terms, especially when they denote an immaterial entity that is distinguishable from and superior to the body with which it is associated during the life of the individual and that, in most religious beliefs, is regarded as immortal, surviving after the death of the body. **Soul** (as here compared: see also **MIND**, **2**) is usually preferred when the emphasis is upon the thing considered as an entity having certain functions, responsibilities, aspects, or a given destiny: **spirit** (as here compared: see also **COURAGE**, **APPARITION**) is preferred when the stress is upon the quality, the constitution, the movement, or the activity of that entity; thus, in idiomatic language, one saves one's *soul* (seldom, if ever, *spirit*); one sells one's *soul* (not *spirit*) for money; one prays for the *souls* (not *spirits*) of the

dead; one does the right thing for one's *soul's* (not *spirit's*) sake; one lifts up one's *spirit* (rather than *soul*) in prayer; to come close to God in *spirit* (rather than *soul*); a man fervent in *spirit*; "The *spirit* indeed is willing, but the flesh is weak" (*Matthew* xxvi. 41). *Soul*, both in the sense here emphasized and in the extended meanings derived from that sense, usually suggests a relation to or a connection with a body or with a physical or material entity to which it gives life or power; *spirit* in both its restricted and extended senses suggests an opposition (often an antithesis) to that which is physical, corporeal, material, or the like, and, often but not always, a repugnance to the latter; as, it often takes a war to lay bare the *soul* of a people; to obey the *spirit* rather than the letter of a law. "Gibbon's magnificent saying, that the Greek language gave a *soul* to the objects of sense and a body to the abstractions of metaphysics" (*Quiller-Couch*). "Those who believe in the reality of a world of the *spirit*—the poet, the artist, the mystic—are at one in believing that there are other domains than that of physics" (*Jeans*). *Spirit* only, and not *soul*, is used of incorporeal beings such as angels, devils, and the like; as, "I can call *spirits* from the vasty deep" (*Shak.*).

Ant. Body.

sound, adj. 1 *Healthy, wholesome, robust, hale, well.

Ana. *Vigorous, lusty, nervous, energetic, strenuous: *strong, sturdy, stalwart, stout: intact, whole, entire, *perfect.

2 *Valid, cogent, convincing, telling.

Ana. *Impeccable, flawless, faultless, errorless: *correct, exact, precise, accurate: *rational, reasonable.

Ant. Fallacious.

sound, n. 1 *Strait, straits, channel, passage, narrows.

sound, n. 2 **Sound, noise, sonance** are here compared as meaning a sensation or effect produced by the stimulation of the auditory nerves and auditory centers of the brain. **Sound** is the general term, applicable to anything that is heard, regardless of its loudness or softness, its pleasantness or unpleasantness, its meaningfulness, or its meaninglessness. "Lord Valleys...heard a *sound*, rather shrill and tentative, swell into hoarse, high clamour, and suddenly die out" (*Galsworthy*). **Noise** in its earliest English use applied to sounds emanating from many persons and usually suggested a clamor made by mingled outcries or shouts: gradually, however, it came to imply a disagreeably loud or harsh sound of any kind whether made by a single person or thing or an aggregate of persons or things; as, the terrific *noise* of an explosion; he could not endure the *noise* (or *noises*) of the machine shop; "the hell of distracting *noises* made by the carts, the cabs, the carriages" (*W. H. Mallock*). Although the connotations of unpleasantness and discordance still usually distinguish *noise* from *sound*, the former term does not invariably carry that connotation in recent use, for it is often applied to a sound that merely engages the attention. "Yet still the sails made on A pleasant *noise* till noon, A *noise* like of a hidden brook In the leafy month of June" (*Coleridge*). "There was no sound, not one tiny *noise* of water, wind in trees, or man" (*Galsworthy*). **Sonance** is occasionally found in general use in place of *sound* when the stress is on the quality of the sound as heard by the discriminating ear; as, poets who pay little attention to the *sonance* of their verses; "the far-off mellow *sonance* of a cowbell" (*E. Ferber*). In technical phonetic use, the term applies chiefly to the quality of being voiced (i.e., uttered with vibration of the vocal cords); as, vowels, and certain consonants such as b, d, g, z, have *sonance*.

Ant. Silence.

soupçon. Suspicion, suggestion, *touch, tincture, tinge,

shade, smack, spice, dash, vein, strain, streak.

sour. **Sour, acid, acidulous, tart, dry** mean having a taste devoid of sweetness. All but *dry* suggest the taste of lemons, vinegar, or of most unripe fruits. **Sour** is more often applied to that which through fermentation has lost its sweet or neutral taste or, sometimes, smell; it may or may not suggest rancidness; as, *sour* milk, *sour* wine, *sour* bread, *sour* garbage: **acid**, to that which has such a taste in its natural or normal state; as, *acid* fruits, *acid* drinks. **Acidulous** and **tart** are applied, as a rule, to things which may be described as *acid*; *acidulous* implying a less-than-average degree of acidity; *tart*, a sharp, but often an agreeable, acidulousness or, sometimes, acidity; as, some mineral waters are pleasantly *acidulous*, most cooks prefer *tart* apples for pies and puddings. **Dry** is usually applied to wines which, although without a suspicion of sweetness, are bland and therefore neither definitely acid nor definitely sour.

In their figurative senses, **sour** applies especially to that which is crabbed or morose; **acidulous** and **tart**, to that which is characterized by asperity, pungency, or sharpness; **acid**, partly by allusion to the corrosive powers of some acids, to that which is biting or caustic. "He [Swift] had a countenance *sour* and severe" (*Johnson*). "A *sour*, malignant, envious disposition" (*Burke*). "A *tart* temper never mellow with age" (*Irving*). "I thought I might venture to say that her mother must be very old; she interrupted me *tartly*, and said, no, her mother had been married extremely young" (*Walpole*). "'Well, if you don't care about it,' he said, with a slightly *acid* inflection, 'I won't ask you every time'" (*Arch. Marshall*). "An intelligent but *acid* weekly paper" (*R. Macaulay*). **Ana.** *Bitter, acrid: *sharp, keen: *astringent, constringent: morose, *sullen, glum, crabbed, saturnine, dour.

source. *Origin, root, inception, provenance, provenience, prime mover.

Ana. Beginning, commencement, starting or start (see corresponding verbs at BEGIN): *cause, determinant, antecedent.

Ant. Termination: outcome.

souse. *Dip, immerse, submerge, duck, dunk.

Ana. *Soak, steep, saturate, impregnate.

souvenir. Remembrance, recollection, *memory, reminiscence, mind.

sovereign, adj. 1 *Dominant, predominant, paramount, preponderant, preponderating.

Ana. *Supreme, transcendent, surpassing: absolute, *ultimate.

2 Independent, *free, autonomous, autonomic, autarchic, autarkic.

Ana. Highest, loftiest (see positive adjectives at HIGH): *chief, principal, foremost: governing, ruling (see GOVERN): commanding, directing (see COMMAND, v.).

sovereignty. Independence, freedom, autonomy, autarky, autarchy. See under FREE, adj.

Ana. *Supremacy, ascendancy: command, sway, control, dominion, *power, authority.

spacious. **Spacious, commodious, capacious, ample** come into comparison when they mean much larger in extent than the average. **Spacious** implies great length and breadth, and, sometimes, height: literally, it is applied chiefly to things that have bounds or walls; as, *spacious* rooms; *spacious* gardens. "The whole interior...a dim, *spacious*, fragrant place, afloat with golden lights" (*Palmer*). Figuratively, though it usually implies limits, it suggests largeness, sweep, freedom, or the like, within those limits; as, "the *spacious* times of great Elizabeth" (*Tennyson*). "Fielding lived when days were longer...when summer afternoons were *spacious*."

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

(*G. Eliot*). **Commodious** carries as its distinctive implications usefulness, serviceableness, and now, particularly, convenience and comfortableness. "My mother's room is very *commodious*, is it not? Large and cheerful looking, and the dressing-closets so well disposed. It always strikes me as the most comfortable apartment in the house" (*Austen*). In older use, the word meant comfortable, convenient, or accommodating, and carried no implication of spaciousness. "We [Adam and Eve after the Fall] need not fear To pass *commodiously* this life, sustained By him [God] with many comforts" (*Milton*). "What nature wants, *commodious* Gold bestows" (*Pope*). **Capacious** stresses the ability to hold, contain, and, sometimes, receive or retain, more than the ordinary thing of its kind; as, *capacious* pockets; a *capacious* cupboard; "the *capacious* soul of Shakspeare" (*Hazlitt*). The word is often used humorously with reference to the size or nature of its contents; as, "a pair of *capacious* shoes" (*Dickens*); "a *capacious* crimson damask armchair" (*Shaw*). "Justice Malam was . . . regarded . . . as a man of *capacious* mind, seeing that he could draw much wider conclusions without evidence than could be expected of his neighbours" (*G. Eliot*). **Ample** emphasizes largeness of size or, particularly, expanse. Literally, it suggests fullness, bulk, and the like; as, she held the child beneath the folds of her *ample* cloak; "a lady . . . of those *ample* architectural proportions that in women are not Duchesses are described . . . as stoutness" (*Wilde*). In figurative use, it often suggests freedom to expand, or absence of trammels or limitations. "More pellucid streams, An *ampler* ether, a diviner air" (*Wordsworth*). "The yearning [of romantic composers] for an *ampler* expression" (*Babbitt*).

Ana. Vast, immense, *enormous: *broad, wide, deep: extended or extensive (see **EXTEND**).

spade, v. *Dig, delve, grub, excavate, exhume, disinter.

spare, adj. 1 Extra, *superfluous, surplus, supernumerary.

Ana. *Excessive, immoderate, exorbitant, inordinate.

2 *Lean, lank, lanky, skinny, scrawny, gaunt, raw-boned, angular.

Ana. *Thin, slender, slim, slight: sinewy, athletic (see **MUSCULAR**).

Ant. Corpulent. — **Con.** Fat, *fleshy, obese, portly, plump.

3 *Meager, exiguous, sparse, scanty, scant, skimpy, scrumpy.

Ana. Economical, *sparing, frugal, thrifty.

Ant. Profuse.

sparing, adj. **Sparing, frugal, thrifty, economical** agree in meaning exercising or manifesting careful and un-wasteful use of one's money, goods, resources, and the like. **Sparing** connotes abstention or restraint; as, *sparing* in the expenditure of money (or use of words, or in giving praise). "Nor will this *sparing* touch of noble books be any irreverence to their writers" (*Keats*). **Frugal** suggests the absence of all luxury and lavishness, especially in food, ways of living, dress, and the like; positively it implies simplicity, temperance, and often, content. "O'erjoyed was he to find . . . She [his wife] had a *frugal* mind" (*Cowper*). "Roman life was a *frugal* thing, *sparing* in food, temperate in drink, modest in clothing, cleanly in habit" (*Buchan*). **Thrifty** implies industry, good management, and prosperity, as well as frugality. "Far into the night the housewife plied her own peculiar work . . . [Their] light was famous in its neighborhood, and was a public symbol of the life that *thrifty* pair had lived" (*Wordsworth*). "Mrs. Manson Mingott had . . . lived in affluence for half a century; but memories of her early straits had made her excessively

thrifty" (*E. Wharton*). **Economical** often is used interchangeably with *thrifty* when the sparing use of money and goods is emphasized; as, an *economical* housekeeper. However, in precise English the word implies more than saving, for its chief implication is prudent management or use to the best advantage, without waste, and it is therefore far more widely applicable than *thrifty*, which refers only to persons or their expenditures; thus, an artist who is *economical* in detail avoids every dispensable detail and makes each one that he selects count to the utmost. "The verse, which nowhere bursts into a flame of poetry, is yet *economical* and tidy, and formed to extract all the dramatic value possible from the situation" (*T. S. Eliot*).

Ana. *Meager, exiguous, spare: *stingy, niggardly, parsimonious, penurious: *moderate, temperate.

Ant. Lavish. — **Con.** *Profuse, prodigal, exuberant.

spark, v. *Flash, gleam, glance, glint, sparkle, glitter, glisten, scintillate, coruscate, glimmer, shimmer, twinkle, glister.

spark, n. *Fop, dandy, beau, coxcomb, exquisite, élegant, dude, macaroni, buck, swell, nob, toff.

sparkle, v. *Flash, gleam, glance, glint, glitter, glisten, scintillate, coruscate, glimmer, shimmer, twinkle, glister, spark.

sparse. *Meager, spare, exiguous, scanty, scant, skimpy, scrumpy.

Ana. Scattered, dispersed (see **SCATTER**): sporadic, occasional, *infrequent, uncommon: *thin, slim, slender.

Ant. Dense. — **Con.** *Close, thick, compact.

spasm. Paroxysm, convulsion, *fit, attack, access, accession.

spasmodic. *Fitful, convulsive.

Ana. *Intermittent, alternate, recurrent, periodic: *irregular, unnatural: *abnormal, aberrant, atypic.

Con. *Steady, even, constant, equable, uniform: regular, methodical, *orderly.

spat, v. Bicker, squabble, quarrel, wrangle, altercate, tiff. See under **QUARREL, n**

Ana. Dispute, argue, agitate, debate (see **DISCUSS**): *differ with, differ from.

Con. *Agree, concur, coincide.

spat, n. Bickering, squabble, *quarrel, wrangle, altercation, tiff.

Ana. Dispute, controversy, *argument: contention, variance, *discord.

Con. Agreement, concurrence, coincidence (see corresponding verbs at **AGREE**).

spatter. *Sprinkle, besprinkle, asperse, bespatter, splash.

spay. Castrate, *sterilize, asexualize, emasculate, mutilate, geld, castrate.

speak. Speak, talk, converse agree in meaning to articulate words so as to express one's thoughts. **Speak** is, in general, the broader term and may refer to utterances of any kind, however coherent or however broken or disconnected, and with or without reference to a hearer or hearers; as, to learn to *speak*; not to be able to *speak* above a whisper; I shall *speak* to him about it; let him *speak* for the organization. **Talk**, on the other hand, usually implies an auditor or auditors and connected colloquy or discourse; as, he left the room because he did not care to *talk*; "We *talk* in the bosom of our family in a way different from that in which we discourse on state occasions" (*Lowes*). But *speak* is also used of relatively weighty or formal speech (often public speech), *talk*, of that which is more or less empty or frivolous; as, "a fool may *talk*, but a wise man *speaks*" (*B. Jonson*); "a good old man, sir; he will be *talking*" (*Shak.*); "Yet there

happened in my time one noble speaker who was full of gravity in his *speaking*... No man ever *spake* more neatly, more pressly, more weightily, or suffered less emptiness, less idleness, in what he uttered" (*B. Jonson*). *Converse* implies an interchange in talk of thoughts and opinions; as, "Words learned by rote a parrot may rehearse, But *talking* is not always to *converse*" (*Cowper*); "If we may not then be said to be able to *converse* before we are able to *talk*... so we may be said not to be able to *'talk'* before we are able to *speak*" (*H. James*). "I believe that to write well it is necessary to *converse* a great deal" (*T. S. Eliot*).

Ana. *Pronounce, articulate, enunciate: *stammer, stutter: *discourse, expatiate, dilate, descant.

special, adj. *Special, especial, specific, particular, individual, respective, concrete* are not all synonyms of one another, but they are closely related terms because, in spite of wide variations in the denotations of some, they all, in the senses here considered, carry the meaning relating to or belonging to one thing or one class, especially as distinguished from all the others. Both *special* and *especial* imply differences which distinguish the thing so described from others of its kind. At one time or another, these two words have borne the same senses. In current use, however, *special* is the preferred term when the differences give the thing concerned a quality, character, identity, use, or the like, of its own; as, the mistress of the boardinghouse refused to serve *special* food to any of her guests; the baby requires a *special* soap and a *special* powder; to make Sunday a *special* day, devoted to rest and worship; "If the whole of nature is purposive, it is not likely that we can discern *special* purposes operating" (*Inge*); "a *special* aspect of a more general malady" (*Babbitt*). Often, in addition, *special* implies being out of the ordinary or being conspicuously unusual and therefore comes close to *uncommon* or *exceptional*; as, "It's not like ordinary photographs. There's something *special* about it" (*Bennett*); "Wee Willie Winkie betrayed a *special*... interest in Miss Allardye... He was trying to discover why Coppy should have kissed her" (*Kipling*). *Special* is also applicable to something added to a schedule, a series, a sequence, or the like, for an exceptional or extraordinary purpose, reason, or occasion; as, *special* trains will be run to Washington for the inauguration; a *special* dividend. *Especial* is the preferred term when there is the intent to convey the idea of pre-eminence or of being such as is described over and above all the others; as, his *especial* friend; a matter of *especial* importance; this has no *especial* reference to any one person. In general, the adverbs observe the same differences in meaning in current good use; as, a *specially* prescribed medicine; a train run *especially* for commuters; the criticism is *especially* deserved in such cases. **Specific**, especially in philosophical, scientific, and critical use suggests an opposition to *generic* and implies a relation to the species as distinguished from the genus or from any more comprehensive category than the one referred to; as, both the common violet and the pansy are violas, but their *specific* differences are more obvious than their *specific* likenesses; the *specific* virtue of a drug; the *specific* remedy for malaria; intellect is the *specific* possession of man as distinguished from the highest animals. In more general but equally good use, *specific* (see also **EXPLICIT**) implies a relation to one thing as distinguished from all other things that are of the same species or of the same type or that are covered by a general statement; as, he was asked to give a *specific* example to illustrate the failure of the law; a *specific* instance may be described. "Its [a new guide-book's] *specific* charm was simply that it left out all the

gush" (*C. E. Montague*). "Where it [vitality] exists, there is pleasure in feeling alive, quite apart from any *specific* pleasant circumstance" (*B. Russell*). In this latter sense of *specific*, *particular* is preferred by some writers and speakers on the ground that the term is clearly opposed to *general*, and that it is a close synonym of *single* (for fuller treatment see **SINGLE**). The differences between the two words in this sense are not easily discoverable, but *specific* seems to be chosen more often by careful writers and speakers when the ideas of specification or of illustration are involved, and *particular* when the distinctness of the thing as an individual is to be suggested; thus, one is asked to give a *specific* (better than a *particular*) illustration to indicate a word's correct use, but one describes the *particular* (much better than *specific*) varieties of peaches. "We get a sense for *particular* beauties of nature, rather than a sense for Nature herself" (*Binyon*). *Particular* is also often used in the sense of *special* and *especial* (as, "some half-dozen *particular* friends"—*Dickens*; "Would you... say that it is Christian... to force that *particular* kind [of suffering] on others?"—*Galsworthy*). In logic, *particular* is opposed to *universal*, and applies to propositions, judgments, conceptions, and the like, which have reference to a single member or to some members of a class rather than to all; thus, "some men are highly intelligent" is a *particular* proposition, but "all men make mistakes" is a *universal* proposition. Often, in less technical use, *particular* implies an opposition to *general* as well as to *universal*; as, "[Swinburne] uses the most general word, because his emotion is never *particular*" (*T. S. Eliot*); "one is apt to amplify a *particular* judgment into a general opinion" (*C. Mackenzie*). **Individual** unequivocally implies reference to one of the class or group as clearly distinguished from all the others; as, "the aspect of every *individual* stone or brick" (*Conrad*); "a conflict... between *individual* education and mass economic conditionment" (*Day Lewis*); "[immigrants] arriving in such numbers that *individual* physical examination with our meagre staff was out of the question" (*V. Heiser*). **Respective** is here considered not as a close synonym of the preceding words but because it implies reference to each member of a class or to each subdivision of a group as apart from or as distinguished from each of the others; otherwise, it often comes close to *specific* and *particular* in meaning; as, the *respective* powers of the departments of the government; the *respective* users of this medicine will find widely varying reactions. **Concrete** comes very close to *specific* and *particular* in meaning, but it carries a definite implication not found in the other words—that the thing so described either has actual physical existence, or is something that is within one's own experience: it is therefore usually opposed to *abstract* or *general*; thus, a *concrete* noun is one that designates something that has objective existence or that evokes an image of a particular thing (such as *brick, tulip, snow*) and is especially opposed to an *abstract* noun, which names a concept, idea, or other thing which has no tangible existence (as *matter, beauty, progress*), and sometimes, to a *general* noun, which names a class or category and not a particular instance (as *tree, animal, flower*); a *specific* example supports or illustrates a general statement such as a principle, a law, or the like, but a *concrete* example brings that which is abstract or abstruse within the range of one's experience, especially sense experience; a *concrete* illustration illuminates or vivifies or renders tangible the general statement, whereas a *specific* illustration merely exemplifies it; hence, one speaks of a *concrete* (not *specific*) presentation of a philosophy; a *concrete* (not *specific*) exposition; "[Shakespeare] chooses the *concrete*

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

word, in phrase after phrase forcing you to touch and see" (*Quiller-Couch*). "It is a folly and a waste of time to give abstract moral instruction to a child; everything must be *concrete*, and actually demanded by the existing situation" (*B. Russell*).

Ana. Distinctive, peculiar, individual, *characteristic: *exceptional: uncommon, occasional, rare (see INFREQUENT).

Con. *Common, ordinary, familiar: *usual, customary, habitual.

specie. Cash, currency, *money, legal tender, coin, coinage.

specific, adj. 1 *Special, especial, particular, individual, respective, concrete.

Ant. Generic.

2 Definite, *explicit, express, categorical.

Ana. Designating, naming (see DESIGNATE): *clear, lucid, perspicuous: precise, exact (see CORRECT, *adj.*).

Ant. Vague.

specific, n. *Remedy, cure, medicine, medicament, physic.

specimen. Example, sample, illustration, *instance, case.

specious. *Plausible, believable, colorable, credible.

Ana. *Vain, nugatory, empty, hollow, idle: delusory, delusive, *misleading, deceptive: deceitful, *dishonest, untruthful, mendacious, lying.

spectator. Spectator, observer, beholder, looker-on, onlooker, witness, eyewitness, bystander, kibitzer agree in meaning one who sees or looks upon something. **Spectator** is, in precise use, used in place of *auditor* (or in the plural, of *audience*) for one (or the group) that attends an exhibition, performance, or entertainment that does not involve an appeal to the sense of hearing; thus, one says the *spectators* at a football game, at a prize fight, at a pageant, at a pantomime, at a circus; but the *auditors* or the *audience* at a concert, a lecture, a play. Very often, however, the term is used more broadly to denote one who regards that which is presented to him (whether to his sight, hearing, understanding, or the like) as though he is not a part of it or identified with it in any way or degree. "A speech in a play should never appear to be intended to move us [the audience] as it might conceivably move other characters in the play, for it is essential that we should preserve our position of *spectators*, and observe always from the outside though with complete understanding" (*T. S. Eliot*); "The artist's work in life is full of struggle and toil; it is only the *spectator* of morals who can assume the calm aesthetic attitude" (*H. Ellis*). **Observer** may or may not imply an intent to see, but it usually does suggest, whether one sees by intention or by accident, that one attends closely to details and often keeps a record of them; the term applies therefore chiefly to scientists who gather evidence by carefully noting natural phenomena or the results of experiments, or to military or diplomatic officials who are sent by countries not participating in a war, or in a meeting of representatives from other nations, to watch proceedings closely and to make a report of them; it is also applicable to anyone who has formed similar habits and can be more or less relied upon for accuracy; as, "It is the man of science who speaks, the unprejudiced *observer*, the acceptor of facts" (*A. Huxley*); an *observer* for the United States at all assemblies of the League of Nations. "You go about a lot amongst all sorts of people. You are a tolerably honest *observer*" (*Conrad*). **Beholder** now sometimes carries a stronger implication of watching or regarding intently than either of the preceding terms, but in earlier use it meant little more than one who sees; as, "All the *beholders* take his part with weeping"

(*Shak.*). In current use, it is often applicable to one who has been privileged to look intently upon a person or thing with the result that one obtains a clear and accurate impression of him or it and is moved by the beauty, power, tenderness, pathos, or the like, of that which is seen; as, "The love deep-seated in the Saviour's face [in da Vinci's *Last Supper*]... [does] melt and thaw The heart of the *beholder*" (*Wordsworth*). **Looker-on** and **onlooker** differ from *beholder* chiefly in their suggestions of casualness or detachment and in their definite implication of lack of participation; as, there was a great crowd of *lookers-on* at the fire; the surgeon refused to operate in the presence of *onlookers*. **Onlooker** is sometimes used in place of *spectator* when the distinction between the one who sees and that which he sees is stressed; as, the *onlookers*, not the participants, see most of the game. **Witness** (etymologically, knowledge) is more comprehensive than the preceding terms in the sense here considered, although it denotes one who knows firsthand and therefore is competent to give testimony: the term sometimes, but very far from always, applies to a person who knows because he has seen; as, "No person shall be convicted of treason, unless on the testimony of two *witnesses* to the same overt act" (*Constitution of the United States*); "Standing there, I was *witness* of a little incident that seemed to escape the rest" (*Quiller-Couch*). Since *witness* does not necessarily imply seeing, **eyewitness** is often preferred as more explicitly implying actual sight; as, there were no *eyewitnesses* of the collision. **Bystander** primarily denotes one who stands by when something is happening, sometimes it carries the implications of *onlooker* (as, the policeman took the names of all the *bystanders*), but at other times it suggests little more than presence at a place (as, a *bystander* was injured by the explosion). **Kibitzer** (a colloquial term) specifically applies to one who watches a card game by looking over the shoulders of the players and who annoys them by offering advice: in extended use, it applies to any onlooker who meddles or makes unwelcome suggestions.

specter. Spirit, ghost, *apparition, phantasm, phantom, wraith, fetch, shade, revenant, spook, haunt.

speculate. Reason, reflect, *think, cogitate, deliberate.

Ana. *Ponder, meditate, muse, ruminate: *consider, weigh, revolve, study, contemplate, excogitate.

speculative. 1 Contemplative, meditative, *thoughtful, reflective, pensive.

Ana. Conjecturing or conjectural, surmising, guessing (see corresponding verbs at CONJECTURE): pondering, musing, ruminating (see PONDER).

2 *Theoretical, academic.

speech. 1 *Language, tongue, dialect, idiom.

2 **Speech, address, oration, harangue, allocution, lecture, predication, talk, sermon, homily** designate a discourse delivered to an audience. A **speech** is any public discourse, prepared or unprepared, which is intended to influence, instruct, or entertain a group of listeners; as, the senator was called upon to make a *speech*; after-dinner *speeches*. **Address** implies formality and, usually, careful preparation; it often connotes distinction in the speaker or gives emphasis to the importance of the speech; as, the commencement *address*; the president is scheduled to deliver three *addresses* on his trip. **Oration** suggests eloquence, rhetorical style, and, usually, a dignified, but sometimes a high-flown or long-winded, appeal to the emotions of a large audience or assembly; as, the *Gettysburg Oration*; a Fourth of July *oration*. **Harangue**, once nearly equivalent to *oration* except for its added implications of vehemence and passion, now commonly retains only these distinctive

implications and connotes either length and tediousness of speech or an impassioned appeal to the populace. "If you do not believe that emotion... is the basic social force, listen to the *harangue* of any successful politician" (C. C. Furnas). **Allocution** is applied chiefly to a solemn address of exhortation delivered by a leader, as a general to his army, or as now, almost exclusively, by the Pope to a consistory of cardinals. **Lecture**, as its derivation suggests, usually implies reading; it commonly designates a carefully prepared speech on a special topic, intended to give information and instruction to a group of students or studious persons. **Prelection**, a British term with rare American use, designates a lecture, often in the nature of a running commentary on a text, delivered by a university professor to his students. **Talk** implies informality; it may be used to designate either a lecture or an address when the speaker wishes to emphasize his desire to speak directly and simply to his auditors as individuals. **Sermon** and **homily** both commonly imply religious instruction by an ordained preacher and a church congregation as the listeners. **Sermon** usually connotes a theme drawn from a Scriptural text; **homily** suggests practical moral counsel rather than doctrinal discussion. These distinctions are, however, not always observed.

speechless. *Dumb, mute, inarticulate.

speed, n. 1 *Haste, hurry, expedition, dispatch.

Ana. *Celerity, legerity, alacrity: fleetness, rapidity, swiftness, quickness (see corresponding adjectives at FAST): velocity, pace, headway (see SPEED).

2 **Speed, velocity, momentum, impetus, pace, headway** are not all synonyms of one another but they are often confused through misunderstanding or ignorance of their specific distinctions, especially in physics. The first three are terms of Newtonian physics and are in the course of being subjected to changes in their definitions. In general, they mean rate of motion. **Speed** (as here considered: see also HASTE, *n.*) denotes rate of motion that is computed simply by dividing the distance covered by the number of hours, minutes, seconds, or the like, taken; thus, a car that covers 300 miles in 6 hours has an average *speed* of 50 miles an hour. **Velocity** denotes the speed of something that is directed along a given path. Ordinarily, *velocity* suggests rate of motion in a straight line (*linear velocity*) or in an arc or circle (*angular velocity*); as, the *velocity* of a bullet; the *velocity* of a skier; the *velocity* of a wind; the *velocity* of light. **Momentum** is often used loosely in place of *speed* or *velocity*, but in strict technical use it denotes not rate of motion but, rather, quantity of motion as determined by multiplying the mass of a moving body by its velocity; thus, a falling stone gathers *momentum*; the *momentum* of a football kicked by a small boy is far less than that of the same ball kicked by a powerful man; the *momentum* of an iron ball rolling down an inclined plane is greater than that of a cork ball of the same diameter rolling with the same velocity; "As photons are always in motion, we may also speak of the *momentum* of a photon, much as we speak of the *momentum* of a motor car" (Jeans). **Impetus** is a popular rather than scientific synonym of *momentum*. Actually, it is a closer synonym of *impulse*, in the sense of the effect of an impelling force, for it retains its etymological implication of a rushing upon or an onset, with the result that it usually suggests great momentum or implies a powerful driving force as the cause of such momentum; as, "Whether the steam... retains sufficient *impetus* to carry it to our shores" (T. H. Huxley); the circulating blood receives a new *impetus* when forced into the arteries by the contraction of the ventricles of the heart. **Pace** belongs here not as a scientific term but as a

synonym of *speed*, as rate of motion. The term is often used in reference to things that have the speed or suggest the speed of walkers, runners, trotters (often horses), and the like; as, he set the *pace* for his companions on the hike; the *pace* was too slow (or too fast) for the rest of the party. **Pace** is often used figuratively in describing activities, progress, rate of production, and the like; as, to keep *pace* with the times; the factories were asked to increase their *pace*. **Headway** in its earliest sense meant motion forward and was used chiefly in reference to ships. Although this is still the chief implication of the term (as here considered) it usually now denotes the rate of movement ahead, and is used in reference not only to ships but to anything capable of advancing or making progress; as, the sailboat made no *headway* against the wind; to increase the *headway* of a car by using the accelerator.

speed, v. **Speed, accelerate, quicken, hasten, hurry, precipitate** agree in denoting to go or make go fast or faster. Though many of these words are used interchangeably without seeming loss, each one carries distinctive implications which can be brought out to advantage in precise use. **Speed** emphasizes rapidity of motion or progress: as a transitive verb it suggests an increase to rapid tempo; as an intransitive verb, a high degree of swiftness; as, to *speed* up an engine; to *speed* up the work in a factory; the bullet *sped* through the air; I *speeded* homewards; arrested for *speeding*. **Accelerate**, in careful use, stresses increase in rate of motion or progress: it does not necessarily imply speed; as, to *accelerate* one's pace; a rich soil *accelerates* the growth of most plants; to *accelerate* the speed of a car. **Quicken** stresses shortening of the time consumed: there is often a suggestion of its original implication of animation or stimulation; as, to *quicken* one's departure or one's steps; exercise *quickens* the pulse; by training, the eye is *quicken*ed. **Hasten** implies urgent quickness or a quick or premature outcome; as, to *hasten* to a friend's deathbed; worry *hastened* his death. **Hurry**, when employed as an equivalent of *hasten*, is usually colloquial, or at least less literary. However, in standard English it has its own values, then often implying haste that causes confusion or prevents concentrated attention; as, his aim was *hurried* and his shot went wide of the mark. "A second fear... Which madly *hurries* her she knows not whither" (Shak.). **Precipitate** (cf. PRECIPITATE, *adj.*) implies impetuosity, suddenness, or abruptness. "Men will not bide their time, but will insist on *precipitating* the march of affairs" (Buckle). "Its ruin was *precipitated* by religious persecution" (J. R. Green).

Ana. *Advance, forward, further, promote: *adjust, regulate, fix.

speedy. Expeditious, quick, swift, fleet, rapid, *fast, hasty.

Ana. Brisk, nimble, *agile: prompt, *quick, ready.

Ant. Dilatory.

speer or spier. Inquire, query, interrogate, question, *ask, examine, catechize, quiz.

sphere, n. 1 **Sphere, globe, orb, ball** agree in denoting a body or mass which actually or apparently has a continuous outer surface all points of which are equidistant from its center. **Sphere** was originally an astronomical term applied in ancient and medieval times to: (1) the apparent outward shell enclosing all space, of which only the half that forms the dome of the heavens and is surrounded at its base by the horizon is visible from any one place; (2) one of several transparent concentric shells (specifically the *celestial spheres* or the *heavenly spheres*) which revolve around the earth, each in its own orbit and each carrying its own celestial body or bodies such

as the sun, the moon, or a planet or the fixed stars. The first conception is an inference drawn from ocular observation, the second is the result of a hypothesis framed to account for the observed motion of celestial bodies. Neither conception is held by modern astronomers, but *sphere* is still sometimes applied as in earlier times to a representation, as in a chart, of the apparent boundaries of space on which are indicated the positions and relations of heavenly bodies at a given time, or their movements, as observable from the earth. Both conceptions of *sphere*, but especially the second, have been, and to a degree still are, influential in the poetic use of the word. "Stand still, you ever moving *spheres* of heaven, That time may cease, and midnight never come" (*Marlowe*). "The face of Nature shines, from where earth seems, Far-stretch'd around, to meet the bending *sphere*" (*Thomson*). The belief (promulgated by the Pythagoreans) that the motions of the celestial spheres are so attuned to each other that they produce ethereal music (the "music of the spheres") and exquisite harmonies no longer prevails, but the idea still occurs in poetic imagery. "She with one breath attunes the *spheres*, And also my poor human heart" (*Thoreau*). *Sphere* is also the technical geometrical term for the figure, body, mass, portion of space, or the like, in three dimensions which has, or is conceived of as having, a surface all points of which are equally distant from its center. *Globe* is far more physical in its implications than *sphere*, being commonly applied to something having or believed to have material existence and the shape (often the approximate shape) of a sphere; thus, the earth because of its form is called a *globe* or the *globe*; a celestial body, such as a planet, is sometimes called a *globe* because of its apparent shape and by analogy with the earth; a spherical construction on the outer surface of which is a map of the earth is called a terrestrial *globe*, in distinction from one depicting the configuration of the heavens and called a celestial *globe*; so, at the peak of each spire is a golden *globe*; a hollow glass *globe* for goldfish. *Orb* was once a close, but not a technical, synonym of *sphere* in the sense of one of the celestial spheres; it also was applied to any celestial body; hence, in poetry, where it now chiefly occurs, it is sometimes difficult to determine whether it denotes a celestial sphere or a celestial body; in fact, there is often confusion in these conceptions. "There's not the smallest *orb* which thou behold'st But in his motion like an angel sings" (*Shak.*). "The moon, whose *orb* Through optic glass the Tuscan artist [Galileo] views At evening" (*Milton*). "Vast beams like spokes of some invisible wheel Which whirl as the *orb* whirls, swifter than thought" (*Shelley*). In extended use, *orb* is usually applied to something which is spherical, transparent (or clear), and, sometimes, radiant. "What a hell of witchcraft lies In the small *orb* of one particular tear!" (*Shak.*). "Nothing at all, Sir," the young man replied, meeting him with the full *orbs* of his eyes" (*Meredith*). Specifically *orb* is applied to the sphere surmounted by a cross which forms part of the English king's regalia. In contrast with the vagueness of *orb*, *ball* is usually conspicuously definite in its applications and in its connotations of perfect sphericity. Its chief use is in names of manufactured things that are usually perfect spheres, such as missiles (especially formerly, as cannon *balls*, musket *balls*), objects that are used in games and play, and hit, thrown, kicked, or bounced (as, tennis *ball*, golf *ball*, baseball, soccer *ball*, rubber *ball*), and various things to eat, articles of merchandise, and the like, which are shaped to resemble such balls (as, candy *balls*, meat *balls*, *balls* of yarn, soap *balls*). *Ball* is used of natural things chiefly because of their likeness to arti-

ficial things called *balls*; as, *puffballs*; the *ball* of the foot; a *ball-and-socket* joint; the *eyeball*.

2 *Field, domain, province, territory, bailiwick.

Ana. Dominion, sway, jurisdiction, control. *power: *range, reach, scope, compass: *function, office, duty, province.

spherical. Globular, orbicular, *round, circular, annular, discoid.

spice. *Touch, suggestion, suspicion, soupçon, tincture, tinge, shade, smack, dash, vein, strain, streak.

spick-and-span. *Neat, tidy, trim, trig, snug, shipshape. **Ana.** *Clean, cleanly: fresh, *new.

Ant. Filthy.

spicy. *Pungent, piquant, poignant, racy, snappy.

Ana. *Spirited, high-spirited, gingery, fiery, peppery: aromatic, redolent, balmy, *odorous.

spier. Variant of *SPEER*.

spin, v. *Turn, revolve, rotate, gyrate, circle, whirl, twirl, wheel, eddy, swirl, pirouette.

Ana. *Swing, sway, oscillate, vibrate.

spine. *Spine, backbone, vertebrae, chine* designate the articulated column of bones (often called the *spinal*, or *vertebral, column*) which is the central and axial feature of the skeleton of human beings and of all vertebrate animals except a few primitive forms in which it remains undeveloped. *Spine* and *backbone* are interchangeable, but *spine* is usually preferred when anatomical structure and functions are under consideration. *Backbone* is not only a more homely term, but it may convey a wrong impression, since the word suggests one long continuous bone rather than a series of small bones. However, it is preferred both in literary and spoken English for something which resembles the spine in being the main support or the mainstay of a structure or organization. "Men from the uplands were soon to be the *backbone* of the legions and to furnish the best auxiliary corps" (*Buchan*). When the emphasis is on resemblance in appearance or position, *spine* is sometimes preferred. "The shock Of cataract seas that snap The three-decker's oaken *spine*" (*Tennyson*). *Vertebrae*, the plural of *vertebra* (the term denoting one of the segments of the spinal column), when preceded by *the*, is found even more often in technical use than *spine*, and is usually preferred to *spine* when the reference is to one of the lower animals. *Chine* is now rarely employed in the sense of *spine*, except in reference to animals whose flesh is used as meat. It, therefore, has come to be referred less often to the spine than to the part of the back which is supported by the spine. In current use, it is applied chiefly to this part of a carcass of beef or other meat, or to a portion of it served as a roast or joint; as, a *chine* of beef.

spirit, n. 1 *Soul.

Ana. *Mind, intellect, soul, psyche.

2 Ghost, *apparition, phantasm, phantom, wraith, fetch, specter, shade, revenant, spook, haunt.

3 *Courage, mettle, resolution, tenacity.

Ana. *Fortitude, pluck, grit, backbone, sand, guts: zeal, fervor, ardor, *passion, enthusiasm: energy, strength, might, *power, force.

spirited. *Spirited, high-spirited, mettlesome, spunky, fiery, peppery, gingery* come into comparison when they mean having or manifesting a high degree of vitality, spirit, and daring. *Spirited* implies not only fullness of life, but ardor, animation, energy, enthusiasm, or other signs of excellent physical, or sometimes mental, health: the term seldom conveys exactly the same implications in any two contexts, but it always carries a suggestion of exaltation, stimulation, or the like; as, "The third [speech] was...very *spirited* and eloquent" (*Gray*); "a

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

fine, lively, *spirited* young man" (Scott); "Shaking his head backward, somewhat after the manner of a *spirited* horse" (G. Elliot). **High-spirited** is applied as often to horses as to men. It adds to *spirited* a strong suggestion of gallantry, or of difficulty in bringing under control; as, "Too *high-spirited* to be passive instruments in his hand" (W. Robertson); "They were *high-spirited*, perhaps a little insolent as well as reckless. . . . 'You look [said Cornwallis to one of them asking for a commission] as if you had come to confer a favour rather than ask for it'" (H. Ellis). **Mettlesome** differs little from *high-spirited* except in its tendency to stress fearlessness and vigor more than restiveness; as, "Their force differs from true spirit, as much as a vicious from a *mettlesome* horse" (Taller); "a powerful *mettlesome* young Achilles" (Thackeray). **Spunky**, a more colloquial term than those which precede, often implies qualities similar to those suggested by *high-spirited* and *mettlesome*, but it carries a stronger implication of quickness in taking fire and of an incapacity for being downed or daunted; also, the term is far less often applied to persons or animals that are, by implication, thoroughbred; as, a *spunky* upholding of one's ideas; "They are grown again as young and *spunky* as undergraduates" (Landon); "He is a *spunky* fellow, and I'll be his second [in a duel]" (Marryat). Only in dialectal use and in colloquial use in the United States does *spunky* imply a degree of irascibility. *Fiery*, *peppery*, and *gingery* are used as synonyms of the preceding terms only when one prefers a more concrete term. *Fiery*, suggesting the heat of flame or fire, implies impetuosity, passionateness, or sometimes, irascibility, in addition to spiritedness (as, "A *fiery* soul, which, working out its way, Fretted the pygmy body to decay"—Dryden; "the *fiery*, swift, Italian nature of the man"—Carlyle; "the nervous and *fiery* animation of the horses"—Shelley); *peppery* adds to *spirited* suggestions of a hotness or pungency characteristic of pepper and often distinctively connotes asperity or excitability (as, a *peppery* response; "Master Rickey is a *peppery* young man. Love and war come as natural to him as bread and butter"—Meredith); *gingery* carries a heightened suggestion of a zest, spiciness, or snap associated with ginger (as, *gingery* comments on the life of social leaders; a *gingery* young woman; "He learned the high quick *gingery* ways Of thoroughbreds"—Masefield). **Ana.** Courageous, intrepid, bold, audacious, valiant, *brave: impetuous, *precipitate: *eager, avid, keen: passionate, enthusiastic, zealous, fervent, ardent (see corresponding nouns at PASSION).

Ant. Spiritless.

spiritless. *Languid, languishing, languorous, listless, enervated, lackadaisical.

Ana. *Lethargic, sluggish, comatose, stuporous: dull, *stupid, dense, crass: *tame, subdued, submissive.

Ant. Spirited.

spiritual. *Holy, sacred, divine, religious, blessed.

Ana. *Supernatural, supranatural: *celestial, heavenly.

Ant. Physical: carnal: material: temporal.

spirituous. *Alcoholic, ardent, hard, strong.

spit, v. Spit, expectorate agree in meaning to eject matter from the mouth. Spit is not only the ordinary word for this act, but it is less suggestive than *expectorate* of the source or nature of the matter ejected; as an intransitive verb it usually implies the emission of saliva (as, "When he had thus spoken, he *spat* on the ground, and made clay of the spittle"—John ix. 6) but as a transitive verb it may take as its object anything which is expelled from the mouth; as, to *spit* blood; the baby *spat* out his first taste of oatmeal. **Expectorate** (properly a medical term) implies ejection from the lungs or windpipe, especially by coughing; as, to *expectorate* mucus; to *expectorate*

blood. The employment of *expectorate* for *spit*, as an intransitive verb, is common as a euphemism.

spite, n. Despite, malignity, spleen, grudge, *malice, malevolence, ill will.

Ana. Rancor, animus, antipathy (see ENMITY): vindictiveness, revengefulness or revenge, vengefulness or vengeance (see corresponding adjectives at VINDICTIVE).

spiteful. Despiteful, despicable, malignant, *malicious, malevolent, malign.

Ana. Rancorous, antipathetic, antagonistic, hostile (see corresponding nouns at ENMITY): *vindictive, revengeful, vengeful.

splash, v. *Sprinkle, besprinkle, asperse, spatter, bespatter.

spleen. Malignity, grudge, spite, despite, *malice, malevolence, ill will.

Ana. Animosity, antipathy, animus, rancor, antagonism (see ENMITY): venom, *poison: *vindictive, revengeful.

splendid. Splendid, resplendent, gorgeous, glorious, sublime, superb come into comparison when they mean having or displaying outstanding or transcendently impressive qualities. Although, like nearly all English adjectives implying transcendence, they are often used hyperbolically, only their stricter senses are here considered. That is **splendid** (etymologically, shining) which literally or figuratively far outshines the usual or customary as in brilliancy, luster, grandeur, magnificence, or the like, or which impresses the observer by its surpassing brilliancy, luster, grandeur, etc.; as, "a fine—yea even a *splendid* room, of great height, and carved grandeur" (Galsworthy); "The outburst of the first crusade was *splendid* even in a military sense, but it was great beyond comparison in its reflection in architecture, ornament, poetry, colour, religion, and philosophy" (H. Adams); "the *splendid* efflorescence of genius in Russia during . . . the last century" (H. Ellis). That is **resplendent** which is glowingly or blazingly splendid; as, diplomats *resplendent* in court costume; "On the blue sunny deep, *resplendent* far away" (Shelley); "a *resplendent* butterfly" (Meredith); "Juliet [of Shakespeare's *Romeo and Juliet*] died, but not before she had shown how great and *resplendent* a thing love could be" (J. W. Krutch). That is **gorgeous** which is sumptuously splendid in color or display or colors; as, "The July sun shone over Egdon and fired its crimson heather to scarlet. It was the one season of the year, and the one weather of the season, in which the heath was *gorgeous*" (Hardy); "this *gorgeous* combination of all the hues of Paradise" (H. Adams). In somewhat less precise use, the term stresses showiness or elaborateness rather than splendor of coloring; as, a *gorgeous* feast; *gorgeous* attire. That is **glorious** which literally or figuratively is radiant with light or beauty or which stands out as eminently worthy of admiration, renown, or distinction; as, "Now is the winter of our discontent Made *glorious* summer by this sun of York" (Shak.); "he soon Saw within ken a *glorious* Angel stand . . . His back was turned, but not his brightness hid" (Milton); "As often happens after a grey daybreak the sun had risen in a warm and *glorious* splendour" (Conrad); "this *glorious* vision of manly strength and beauty" (Shaw). "The *glorious* company of the Apostles" (Te Deum). That is **sublime** which is so elevated or exalted that the mind in contemplating or picturing it cannot reach full comprehension of it and must, in part at least, feel or imagine the vastness of its extent, power, beauty, nobility, or the like. "And I have felt A presence that disturbs me with the joy Of elevated thoughts; a sense *sublime* Of something far more deeply interfused Whose dwelling is the light of setting suns, And the round ocean and the living air" (Wordsworth). "The main

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

force of Buddhist art was spent in the creation of *sublime* figures, the images of those enlightened ones who in the clear beam of their purified vision beheld and understood the sorrows, the struggles, the vain angers and hatreds of imperfect mortality" (*Binyon*). "The thunderstorm when it is felt to be *sublime* has lost in part at least the terrors it possesses as a natural event" (*S. Alexander*). That is *superb* which exceeds that which is merely grand, magnificent, sumptuous, splendid, or the like, and reaches the highest conceivable point of grandeur, magnificence, splendor, etc.; as, a *superb* physique; a *superb* wine; a *superb* performance of a symphony; "[Homer] actually does convey Odysseus from Troy to Ithaca, by a ten years' voyage too; he actually has narrated that voyage to us in plain, straightforward words; and, what is more, he actually has made a *superb* epic of it" (*Quiller-Couch*); "*superb* figures, breathing health and strength" (*Binyon*); "he had the *superb* vitality of early youth" (*Cather*).

Ana. Radiant, effulgent, luminous, brilliant, *bright: illustrious, eminent, distinguished (see FAMOUS): excelling or excellent, surpassing, transcending or transcendent (see corresponding verbs at EXCEED).

splenetic. *Irrascible, choleric, testy, techy, touchy, cranky, cross.

Ana. Morose, *sullen, glum, gloomy: *irritable, querulous, peevish, snappish: captious, carping, caviling (see CRITICAL).

split, v. Rend, cleave, rive, rip, *tear.

Ana. *Separate, part, divide, sever: *cut, chop, hew.

split second. *Instant, moment, second, minute, flash, trice, jiffy, twinkling, twinkle.

spoil, v. 1 *Injure, harm, hurt, damage, impair, mar.

Ana. *Ruin, wreck: *destroy, demolish.

Con. Preserve, conserve, *save: amend, redress, remedy (see CORRECT, v.).

2 *Indulge, pamper, humor, baby, mollycoddle.

Ana. *Injure, harm, hurt, damage: favor, accommodate, *oblige: *debase, deprave, vitiate, debauch.

3 *Decay, decompose, rot, putrefy, disintegrate, crumble.

Ana. Corrupt, vitiate (see DEBASE): *ruin, wreck: impair, harm, *injure.

spoil or spoils, n. Spoil (or spoils), *pillage*, *plunder*, *booty*, *prize*, *loot*, *swag* come into comparison as nouns meaning that which is taken from another by superior force or craft. *Spoil* in its earliest and fundamental sense applied to the movable property of a defeated enemy, which by the custom of warfare belonged to the victor, and of which he stripped the captured city or place. "Fire the palace, the fort, and the keep—Leave to the foeman no *spoil* at all" (*Kipling*). With changes in methods of warfare *spoil*, and the currently more common *spoils*, came to be applied to any property, territory, or the like, taken over by the conquering forces in actual warfare or demanded by them from the conquered as a condition of making peace. In extended use, *spoils* applies to anything which by custom (often, by suggestion, unethical custom) belongs to the victor; in political use, this is applied chiefly to the appointive public offices and their emoluments which the successful party in an election regards as its peculiar property to be bestowed as its leaders wish. "In America, where in some cases the civil services are still regarded as the *spoils* of office, a new set of officials oust the old ones whenever the Opposition ousts the Government" (*Shaw*). *Pillage* implies more open violence and greater lawlessness and destructiveness in warfare than *spoil*. It suggests invasion and sacking by more or less disorderly troops or by marauding bands. "That robbed all the countrie there

about, And brought the *pillage* home" (*Spenser*). *Plunder* also implies open violence, but even in its earliest use it was a more inclusive term than *spoil* or *pillage* because not restricted to warfare. It has consistently implied robbery, whether as incidental to war or as dissociated from it, and has been applied to that which has been seized not only by spoilers, pillagers, sackers, and the like, but by bandits, brigands, highwaymen, and others of the same kind. "He blamed and protested, but joined in the plan [to rob a poor man's orchard]; He shared in the *plunder*, but pitied the man" (*Cowper*). *Booty*, like *plunder*, is applicable to war as well as to that which is seized by robbery or theft. In ordinary nontechnical use, however, *booty* distinctively suggests something to be shared or divided and therefore presupposes the operations of a band. "The German women plundered; the German cooks and intendants plundered; even Mustapha and Mahomet... had a share of the *booty*" (*Thackeray*). In international law, *booty* is technically used in distinction from *prize* (which is now usually a singular noun only), the former referring to spoil taken on land, the latter to spoil (such as a vessel of war) captured on the high seas or in the territorial waters of the enemy. *Loot* may be used in place of *plunder*, *booty*, or *spoils* when a highly derogatory or a highly offensive term is desired. "Drawn into the conflict by a hope of sharing in the *loot* of the Church" (*Belloc*). In current use, the term is also applied specifically to the plunder of those who rob the dead or helpless victims of a catastrophe, or who steal anything left of value in the ruins of buildings wholly or partly destroyed, as by fire, flood, or violent storm; as, prowlers among the ruins in search of *loot*: in general, it is applicable to ill-gotten gains of any sort; as, corrupt officials enriched by the *loot* of years. *Swag* (a slang term) is also often used in place of *plunder*, especially when the latter is thought of as a collection or as a sackful of miscellaneous things gathered by thieves.

Ana. *Theft, robbery, larceny, burglary: acquisitions, acquirements (see singular nouns at ACQUIREMENT).

spoliare. Despoil, *ravage, devastate, waste, sack, pillage.

Ana. *Rob, plunder, rifle, loot: defraud, swindle, *cheat.

sponge, sponger. *Parasite, sycophant, favorite, toady, lickspit, hanger-on, leech.

sponsalia. Espousal, betrothal, affiancement, *engagement.

sponsor, n. Sponsor, patron, surety, guarantor, backer, angel are comparable only when they denote a person who in a greater or less degree accepts responsibility for another, especially for another's venture or undertaking. *Sponsor* usually implies public acceptance of a responsibility and a definite engagement to perform what is promised. In its earlier and still accepted sense, the word implies making a pledge in behalf of another and thereby accepting responsibility for its fulfillment; thus, the *sponsor* of an infant in baptism makes the promises in the child's name and pledges himself to be responsible for the child's religious training if the latter is deprived of his natural guardians. In its later sense, *sponsor* suggests assumption of the role of promoter or supporter; as, the candidate for mayor had no *sponsors*; Senator Blank appeared as *sponsor* for the bill; the utility company was frequently a *sponsor* for a radio program. *Patron* stresses the acceptance of the relation as a protector or benefactor, especially in return for service, honors, or devotion; it often implies, therefore, the obligation to assist, support, or defend; thus, a *patron* of an artist or of a poet was a wealthy or influential person who made the latter his protégé in return for honors paid him; the *patron* of an institution, a cause, a charity, or the like,

is one whose generous and regular contributions to its support are publicly recognized. **Surety** and **guarantor** imply answerability for another's debt or performance of duty in case of default, because of prior acceptance of responsibility. The words are often used interchangeably, but in British use, *surety* is the preferred term, and in some states of the United States a distinction is made in law. In such states a surety is answerable immediately on default and without notice; a guarantor is answerable only after ineffectual legal proceedings have been taken against the principal. **Backer**, a somewhat colloquial term, is used chiefly in sports, politics, and theatrical and similar enterprises. It often implies the giving of financial support (but sometimes merely moral support or encouragement), but it carries no implication that responsibility for debts is assumed. "The success of a publication is the success of its editors, and not of its business managers and its 'backers'" (*B. Hendrick*). **Angel** is a slang and often derogatory term for a financial backer, especially of a theatrical enterprise.

Ana. Supporter or support, upholder, champion, advocate or advocate (see corresponding verbs at **SUPPORT**): promoter, furtherer (see corresponding verbs at **ADVANCE**).

spontaneity. Abandon, *unconstraint.

Ana. Spontaneousness, instinctiveness, impulsiveness (see corresponding adjectives at **SPONTANEOUS**): extemporaneousness, offhandedness, unpremeditatedness (see corresponding adjectives at **EXTEMPORANEOUS**): naturalness, simplicity, unsophistication, naïveté, ingenuousness (see corresponding adjectives at **NATURAL**).

spontaneous. 1 **Spontaneous, impulsive, instinctive, automatic, mechanical** are here compared only as applied to persons, their movements, acts, utterances, and the like. All agree in meaning acting or activated without apparent thought or deliberation. That is **spontaneous** which is affected or effected by no compulsion (external or internal) of the will and comes about so naturally that it seems unpremeditated as well as unprompted; as, a *spontaneous* burst of applause; a *spontaneous* expression of feeling. "The *spontaneous* wish to learn, which every normal child possesses... should be the driving-force in education" (*B. Russell*). "His choice of [dancing] partners, which seemed so *spontaneous*, was often managed" (*V. Heiser*). That is **impulsive** which is actuated suddenly and impetuously under the stress of the feeling or spirit of the moment and which, in contrast with *spontaneous* seems involuntary and forced by emotion rather than voluntary and natural; as, an *impulsive* act of generosity; "my heart, *impulsive* and wayward" (*Longfellow*). "He made an *impulsive* gesture, and opened his lips; but he dared not speak" (*Deland*). That is **instinctive**, in precise use, which is guided by or is the result of instinct, or a native and unreasoning prompting to actions characteristic of the species (such as nest building by birds) and contributing to its life and well-being. In less precise but not incorrect use, *instinctive*, when referred to human beings, is applied to actions, movements, feelings, thoughts, and the like, which are instantaneous, unwilling, and often, but not always, unconscious, such as reflex movements, habitual actions, temperamental spontaneous responses to stimuli, and the like. "At the teething period, when the point of the tongue *instinctively* seeks the sore gums" (*Grandgent*). "The most prolonged and difficult operations of our minds may yet become instantaneous, or, as we call it, *instinctive*" (*Shaw*). "Puzzled by the effort to reconcile his *instinctive* disgust at human villainess with his equally *instinctive* pity for human frailty" (*E. Wharton*). That is **automatic** or **mechanical** which, at least to outward appearances, seems to engage neither the mind nor the

emotions and to suggest the operation of a machine. But *automatic*, like *instinctive*, stresses promptness in the response. It differs from *instinctive*, however, in implying adaptability to changing circumstances and readiness to react or to respond immediately and unvaryingly each time a given situation or stimulus recurs; as, the responses of a well-trained soldier to commands are *automatic*; the school demanded *automatic* obedience of its pupils. "Delia divined in her tone... that obscure opposition which, at the crucial moments of Tina's life, seemed *automatically* to declare itself" (*E. Wharton*). *Mechanical*, on the other hand, stresses the lifeless and, often, the perfunctory character of the response. It does not, as *automatic* often does, suggest perfect discipline which necessitates perfect attention; rather, it suggests a mind dulled by repetition of the act, motion, or the like, and capable only of routine performance. "He would deal you out facts in a dry *mechanical* way as if reading them in a book" (*Hudson*). "Not only is every transaction impersonal, it is *mechanical*" (*Brownell*).

Ana. *Extemporaneous, extempore, impromptu, improvised, offhand, unpremeditated: *natural, simple, ingenuous, unsophisticated.

2 *Automatic, autogenous, endogenous.

spook. *Apparition, phantasm, phantom, wraith, fetch, ghost, spirit, specter, shade, revenant, haunt.

spoon, v. Ladle, dish, *dip, lade, bail, scoop.

sporadic. Occasional, rare, scarce, *infrequent, uncommon.

Ana. Scattered, dispersed (see **SCATTER**): sparse, exiguous, *meager: *adventitious, adventive.

sport, n. 1 Play, disport, frolic, rollick, romp, gambol. See under **PLAY, v.**

Ana. Amusement, diversion, recreation, entertainment (see under **AMUSE**): merriment, jollity (see corresponding adjectives at **MERRY**).

2 *Fun, jest, game, play.

Ana. *Mirth, glee, hilarity, jollity.

3 In plural form **sports.** *Athletics, games.

sport, v. *Play, disport, frolic, rollick, romp, gambol.

Ana. Divert, *amuse, recreate, entertain: *skip, bound, hop.

sportive. *Playful, frolicsome, roguish, waggish, impish, mischievous, wanton.

Ana. Blithe, *merry, jocund, jovial, jolly: mirthful, gleeful, hilarious (see corresponding nouns at **MIRTH**).

spousal or spousals. Espousals, *marriage, matrimony, wedlock, wedding, nuptials.

sprain, n. *Strain.

sprain, v. Strain. See under **STRAIN, n.**

spread, n. *Expanse, amplitude, stretch.

Ana. Extent, area, magnitude, *size: *range, reach, scope, compass.

sprightly. *Lively, animated, vivacious, gay.

Ana. Active, live, dynamic: *agile, nimble, brisk, spry: *merry, blithe, jocund.

spring, v. **Spring, arise, rise, originate, derive, flow, issue, emanate, proceed, stem** are synonymous verbs when they mean to come up or out of something into existence. **Spring** stresses emergence, but because it usually retains its etymological implication of leaping or bounding it often suggests sudden emergence, and is especially referred to things which come into outward existence only after a period of concealment, as in the ground, a womb, the subconscious, or the like; as, plants *spring* from seed; out of their union *sprung* ten children; thoughts that *spring* up in one's mind. "We take it for granted that our dreams *spring* from below: possibly the quality of our dreams suffers in consequence" (*T. S.*

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Eliot). **Arise** emphasizes the fact of coming into existence or into notice more than the conditions attending the event; often it conveys no clear suggestion of a prior state; as, a rumor *arose* and was widely circulated. "And I would that my tongue could utter The thoughts that *arise* in me" (*Tennyson*). When used with *from*, however, it usually implies a causal connection between that which is the object of the preposition and that which is the subject of the verb; in such cases it is synonymous with *result*, though it neither loses nor obscures its primary implication of coming into existence; as, mistakes often *arise* from ignorance; comfort *arose* from the reflection; the mischief *arose* from careless gossip. Sometimes, when the context suggests a cause, the *from* phrase is omitted; as, where there is continued discontent, trouble is certain to *arise*. "The right never existed, and the question whether it has been surrendered, cannot *arise*" (*Ch. Just. Marshall*). **Rise** and *arise*, as here compared (see also under **rise**, 2), are often used interchangeably, but current good usage favors *arise* except where, in addition to the implication of beginning, there is, either in the word or the context, a strong suggestion of ascent; thus, new nations *rise* (better than *arise*) only to fall; the rumor *rose* (better than *arose*) and spread like wildfire; mighty forces *rise* from small beginnings. A river is said to *rise* at a certain point (rather than *arise*) because it usually has its source in a spring or fountain. **Originate** suggests a definite source or starting point which may be specified or located; as, the theory of evolution did not *originate* with Darwin; the fire *originated* in the basement; mental complexes often *originate* from repressed or unsatisfied desires. **Derive** also suggests a source, but usually it does not imply, as *originate* always implies, actual inception; rather, it presupposes a prior existence in another form or in another person or thing, and connotes descent, as by inheritance, endowment, transference, deduction, or the like; as, the power of the executive *derives* from the people; our thoughts often *derive* from our wishes. "The principle of symmetry *derives*, I suppose, from contemplation of the human form" (*Binyon*). **Flow**, **issue**, **emanate** in common imply a passing from one thing to another, the former being the source from which the latter is derived. All of these words are colored by their literal meanings. **Flow** suggests passage like water, easily as if from a spring, or abundantly as if from a reservoir; as, "Praise God, from whom all blessings *flow*" (*Ken*). "Is it not clear that from such a welter [of confused interests and powers], any one of many diverse consequences might have *flowed*?" (*Belloc*). **Issue** most frequently suggests emergence into existence, as if from a womb. "Proud deliverance [of a nation] *issuing* out of pain and direful throes" (*Wordsworth*). "How far Arnold is responsible for the birth of Humanism would be difficult to say; we can at least say that it *issues* very naturally from his doctrine" (*T. S. Eliot*). **Emanate** is used largely in reference to immaterial constructions, such as a law, a principle, a power, a system of thought, or the like; it connotes the passage of something impalpable or invisible, and suggests a less obvious causal connection between the source and the thing derived than *flow* or *issue*. "We may certainly say... that they [the arts and sciences] all *emanate* from the same focus" (*H. Ellis*). "The government of the Union... is, emphatically, and truly, a government of the people. In form and in substance it *emanates* from them" (*Ch. Just. Marshall*). **Proceed** stresses place of origin or, sometimes, parentage, derivation, or cause. "By every word that *proceedeth* out of the mouth of God" (*Matthew* iv. 4). "No public benefit which you receive But it *proceeds* or comes from them to you And no way from yourselves" (*Shak.*). **Stem**

suggests growth out of, as of a stem from a root or a branch; it is therefore used in reference to things that come into existence through the influence of a predecessor, as a natural outgrowth, or as a subordinate development. "The good portrait painters... *stem* from Rubens" (*F. J. Mather*).

Ana. Emerge, loom, *appear: *come, arrive: *begin, commence, start.

spring, *n.* Also **springs**. *Motive, impulse, incentive, inducement, spur, goad.

Ana. *Origin, source, root, inception: *cause, determinant, antecedent: *stimulus, stimulant, incitement, impetus.

spry. *Elastic, resilient, flexible, supple.

Ana. Yielding, submitting (see **YIELD**): recoiling, rebounding (see **REBOUND**).

sprinkle, *v.* **Sprinkle**, **besprinkle**, **asperse**, **spatter**, **bespatter**, **splash** agree in meaning to scatter a fluid in drops or blobs, or (in the case of *sprinkle* and *besprinkle*) a powdered substance in fine particles, over the surface of something. **Sprinkle** commonly implies the use of the fingers or of some utensil that permits dispersion in fine drops or particles; as, to water plants by *sprinkling* them; to *sprinkle* food with salt; to *sprinkle* sand over an icy walk; cf. a water *sprinkler*, a sugar *sprinkler*, a *sprinkling* can. In extended use, it may be used in reference to anything that is thinly dispersed or lightly strewn; as, his letters are *sprinkled* with hints of dissatisfaction; a broad plain *sprinkled* with a few houses. **Besprinkle** differs from *sprinkle* only in being a somewhat affected literary word and in occurring more often in the extended than in the primary sense. "Sloping banks *besprinkled* with pleasant villas" (*Dickens*). **Asperse** is now rare in its literal sense of *sprinkle*; it and its derivative noun *aspersion* (especially the latter) are found, however, as technical terms referring to the method of baptizing by sprinkling the head in contrast with that by pouring water on the head or by immersion. "Coleridge, his locks *asperged* with fairy foam" (*W. Watson*). **Spatter**, and its intensive **bespatter**, more often imply accident than intention; they also carry, in contrast to *sprinkle*, suggestions of more force and sound in the scattering, of greater size in the drops, of one's own or another's carelessness, or of a disagreeable effect such as spotting or soiling; as, a passing automobile *spattered* his coat with mud; the rain *spattered* her silk stockings; ink *bespattered* the walls of the schoolroom; they were *bespattered* with paint from head to foot. In extended use, both words may be used in reference to anything that is more or less thickly strewn or scattered; as, "the bare floor *Spattered* with moonlight" (*Amy Lowell*); a speech *bespattered* with tributes. **Splash** always suggests a violent or careless, profuse, and often noisy, spattering; when it implies soiling or staining it usually suggests a daubing or streaking (or the appearance of these) rather than a spotting; as, to *splash* water while bathing; to *splash* coffee into one's saucer; to *splash* a bib with milk; to *splash* a mirror with lather.

Ana. Drench, impregnate (see **SOAK**): moisten, dampen (see corresponding adjectives at **WET**): *scatter, disperse, dissipate.

sprite. *Fairy, faery, fay, elf, pixy, gnome, dwarf, goblin, brownie, puck, nix, shee, leprechaun, banshee.

spruce, *adj.* Dashing, dapper, *stylish, fashionable, modish, smart, chic, natty, nifty, nobby, posh, toffish, brave, brow.

Ana. Fussy, finical, fastidious, pernicky (see **NICE**).

Ant. Blowzy.

spry. *Agile, brisk, nimble.

Ana. *Quick, ready, prompt: *vigorous, energetic, strenuous: hale, *healthy, sound, robust.

Ant. Doddering.

spume. *Foam, froth, scum, lather, suds, yeast.

spunky. *Spirited, high-spirited, mettlesome, fiery, peppery, gingery.

Ana. Dauntless, undaunted, bold (see BRAVE): daring, venturesome, venturesome (see ADVENTUROUS): restive, restless, skittish, *impatient.

spur, n. Goad, spring, *motive, impulse, incentive, inducement.

Ana. *Stimulus, stimulant, incitement, impetus: activation, actuation, motivation (see corresponding verbs at ACTIVATE): *cause, determinant: provoking or provocation, exciting or excitement (see corresponding verbs at PROVOKE).

spurn. Reject, repudiate, refuse, *decline.

Ana. Disdain, scorn, scout, *despise, contemn: flout, *scoff, sneer.

Ant. Crave: embrace.

spy, n. *Emissary, scout, intelligencer, secret-service agent, secret agent.

squabble, v. Quarrel, wrangle, altercation, bicker, spat, tiff. See under QUARREL, *n.*

Ana. *Contend, fight, battle, war: struggle, strive (see ATTEMPT, *v.*): dispute, agitate, argue (see DISCUSS).

squabble, n. *Quarrel, wrangle, altercation, bickering, spat, tiff.

Ana. Dispute, controversy, *argument: row, rumpus, scrap, *brawl, broil.

squadron. *Fleet, flotilla, armada.

squalid. *Dirty, nasty, filthy, foul.

Ana. Slovenly, unkempt, sloppy, *slipshod: sordid, abject (see MEAN, *adj.*): *slatternly, frowzy.

square, v. *Agree, conform, accord, comport, harmonize, correspond, tally, jibe.

Ana. Equal, *match, approach, touch, rival: balance, offset (see COMPENSATE): concur, coincide (see AGREE).

squat, adj. Thickset, *thick, stocky, chunky, stubby, dumpy.

Ant. Lanky.

squeamish. Finical, fussy, pernickety, fastidious, *nice, dainty.

Ana. Exacting, demanding, requiring (see DEMAND): hypercritical, *critical, faultfinding, cavilling, captious, carping.

squib. *Libel, skit, lampoon, pasquinade.

squirm. *Writhe, agonize.

Ana. Twist, bend, turn (see CURVE, *v.*): wince, flinch, blench, shrink, *recoil.

stabilize. Stabilize, steady, poise, balance, ballast, trim come into comparison when they mean to maintain or cause to maintain position or equilibrium. Despite their agreement in basic meaning, they vary widely in their implications and in their range of application and are seldom interchangeable. **Stabilize** is used chiefly in reference to that which is fluctuating or is subject to fluctuation and which requires either external aids or regulation; as, to stabilize the price of wheat by creating a reserve not to be marketed until the demand exceeds the supply; a gyroscope and other devices for stabilizing an airplane. "The practical advantage of organised cult and sanctified custom is to stabilize valuable results already won" (*Inge*). **Steady** is used chiefly in reference to that which is losing its customary or necessary stability or equilibrium and is rocking, shaking, fluttering, tipping, or the like; as, to steady a table by putting a piece of wood under one of its legs; to take medicine to steady one's nerves or one's pulse; a child learning to walk

steadies himself by grasping at any support within his reach. **Poise** is used chiefly in reference to that which maintains its equilibrium perfectly under adverse conditions or in opposition to external forces such as the law of gravitation; it implies a proper distribution of weight (as the result either of advance action or of conditions inherent in the structure or constitution of the person or thing maintaining equilibrium) with reference to the supporting medium (air, water, etc.) or that which supports (the hand, a column, etc.); as, the ballet dancer poised on tiptoe for an instant. "As the fowl can keep Absolute stillness, poised aloft in air" (*Wordsworth*). In extended use, when employed in reference to the mind or spirit, **poise** implies either acquired control over the faculties or an inner serenity that enables one to remain steady or impervious to disquieting or disturbing influences; as, "Sobriety of thought which poises the heart" (*Steele*); "Self-collected, poised, and steady" (*Wordsworth*). **Balance** also implies an equilibrium that is the result of the proper distribution of weight, but it carries none of the suggestions of sustained position or equilibrium so strong in **poise**; thus, one balances a boat by adjusting its cargo so that there is no excess weight at any one point, and one balances a flywheel by removing portions where the weight is excessive or by adding weight in its lighter sections, but in either case the equilibrium may be lost if the cargo shifts or a section of the flywheel alters in weight. Though both **balance** and **poise** imply that the thing affected is steadied, **balance** often carries so strong an implication of uncertain equilibrium that it suggests wavering or rocking. "In a moment of inattention, the child crept to the edge, and was balanced on the very verge. To call to it, to touch it, would have insured its destruction" (*Jefferies*). **Ballast** is used in reference to that which needs to be held down because too light, too buoyant, or the like; it implies the addition of something heavy or solid enough to ensure stability; as, to ballast a ship with a cargo of metal; to ballast a free balloon with bags of sand which may be thrown overboard if further height is desired. **Ballast** is often found in extended use with reference especially to the mind and the moral character that might otherwise suffer from volatility, frivolousness, or unwieldiness. "'Tis charity must ballast the heart" (*H. Hammond*). "Like many other men of high intellectual gifts, Arnold was ballasted with a just proportion of . . . practical wisdom" (*C. E. Montague*). **Trim**, in the sense here considered, is chiefly nautical; it implies proper balancing of a boat or ship so that it sits well on the water or fulfills any of the conditions that make for steadiness in sailing. "They [the small boats] could only be balanced by man and woman, that was the only way they could be trimmed on even keel" (*Jefferies*).

Ana. Regulate. *adjust, fix: *set, settle, firm, establish.

stable, adj. *Lasting, durable, perdurable, permanent, perpetual.

Ana. Enduring, persisting, abiding (see CONTINUE): secure, *safe: *steady, constant: stanch, steadfast, resolute (see FAITHFUL).

Ant. Unstable: changeable.

stack, n. Heap, pile, mass, bank, shock, cock. See under HEAP, *v.*

stack, v. *Heap, pile, mass, bank, shock, cock.

Ana. Collect, *gather, assemble: amass, *accumulate, hoard.

staid. Sedate, grave, *serious, sober, earnest.

Ana. *Decorous, decent, demure, seemly: *cool, collected, composed: smug, priggish, self-complacent, *complacent.

Ant. Jaunty.

stain, *n.* *Stigma, blot, brand.

Ana. *Blemish, defect, flaw: mark, *sign, token: *disgrace, dishonor.

stake. *Bet, wager, pot, blind, ante.

stalwart. *Strong, stout, sturdy, tough, tenacious.

Ana. Husky, brawny, *muscular, sinewy, athletic: lusty, nervous, *vigorous: robust, sound, *healthy.

stammer, *v.* **Stammer**, **stutter** agree in meaning to speak in a faltering, hesitating, or stumbling manner. Although in their earliest senses there was little, if any, recognized difference in their meaning, they tend to be distinguished in current use. **Stammer** now usually implies a cause such as fear, embarrassment, a sudden shock, or the like, which makes one for the time being lose control over his vocal organs and inhibits his power to speak straightforwardly; also, the word suggests interruptions in which one either cannot form sounds or else articulates with great difficulty. "The eloquent tongue forgot its office. Cicero *stammered*, blundered, and sat down" (*Froude*). "She shrank a little at his vehemence, but neither blushed nor *stammered*; answering: 'I see nothing wrong in doing what Mama thinks right, Richard'" (*Meredith*). **Stutter** often, especially in current use, carries a clearer implication of the involuntary repetition of sounds, especially of consonantal or syllabic sounds, than **stammer** does. In some use, it is distinguished on this ground only; as, "No two persons *stutter* alike. . . A stutterer who stumbles over the initial of 'Peter' may have no trouble with any other *p* in. . . 'Peter Piper's peppers'" (*E. W. Scripture*). More often, however, **stutter**, in distinction from **stammer**, implies a constitutional defect, such as a nervous affliction or a speech defect. Whichever idea is involved, the term usually suggests a habit and not merely, as **stammer** usually suggests, a temporary reaction. "This gentleman has. . . a small natural infirmity; he *stutters* a little" (*S. Foote*). In nontechnical use the terms are often employed as though they were interchangeable.

stamp, *n.* *Impression, impress, imprint, print.

stanch or **staunch**. Steadfast, resolute, constant, leal, true, *faithful.

Ana. Trusty, trustworthy, *reliable, dependable, tried: stout, *strong, tough, tenacious, sturdy, stalwart.

Con. *Inconstant, fickle, mercurial, unstable, capricious.

stand, *v.* Tolerate, brook, *bear, suffer, endure, abide.

stand, *n.* *Position, attitude.

Ana. *Point of view, standpoint, viewpoint, slant, angle.

standard, *n.* 1 *Flag, ensign, banner, color, streamer, pennant, pennon, jack.

2 **Standard**, **criterion**, **gauge** (or **gage**), **yardstick**, **touchstone** come into comparison when they denote the means by which one determines what a thing should be or whether it is correct or approaches perfection. **Standard** (as here compared: see also **MODEL**, **FLAG**) applies to any definite rule, principle, or measure set up and established especially by authority as the means of determining quantity, weight, extent, value, or quality (as the, **standard** for the bushel as established by the United States government is a quantity equaling the contents of a measure that holds 77.6274 pounds of distilled water at 39.2° Fahrenheit; during the seventeenth and eighteenth centuries dramatic and epic poetry were governed by **standards** derived from the practice of the ancient Greeks and Romans), or as a means of ascertaining the level reached by a thing, its degree in a scale, or the like (as, "All sorts of dogmatic **standards** have been set up by which to measure the degree of a people's civilisation"—*H. Ellis*; "they say we have no taste; we cannot make art jugs for the mantelpiece, crockery for the bracket,

screens for the fire; we cannot even decorate the wall of a room as it should be done. If these are the **standards** by which a sense of art is to be tried, their scorn is to a certain degree just"—*Jefferies*). In a somewhat looser, but correct, sense, **standard** often applies to a model or pattern accepted as the means of determining what is good or admirable (for this sense see **MODEL**). The two senses are not always carefully distinguished. **Criterion** differs from **standard** in stressing employment as a test. The term applies only to a rule, principle, model, pattern, or the like, which is used in determining how far a person or thing is good or bad, how closely he or it approaches the standard of perfection, or what is his or its true and exact character. In general, a **criterion** is the measure used by a judge or critic of something that is accomplished, a **standard** is the rule or pattern given to one who is to do something or make something for his guidance in attaining some quality or qualities, such as exactness, morality, soundness, or beauty. A **criterion**, strictly speaking, is an aid by means of which a correct judgment is reached; as, to accept the principles of Aristotle's "Poetics" as **criteria** for the drama; "The **criterion** of constitutionality is not whether we believe the law to be for the public good" (*Justice Holmes*); "Darwinism gives us no **criterion** at all whereby we may pronounce one order of beings higher than another" (*Inge*). All of the other terms here discriminated are synonyms only in their extended or figurative senses. **Gauge**, literally either a standard measure or scale of measurement (thus, in many countries, the standard **gauge** in railways, i.e., the standard for distance between rails is 4 feet, 8½ inches) or an instrument or device by means of which is measured the force, quantity, or the like, of something that fluctuates (as, a rain **gauge**; a pressure **gauge**), is now in its extended use more often applied to a definite criterion than to a standard; as, the usual **gauge** of a veteran's disability is his incapacity for manual labor; "There is not in our hands any fixed **gauge** of minds" (*I. Taylor*). **Yardstick**, literally a measuring stick a yard long marked in feet, inches, and subdivisions of an inch, in figurative use denotes a criterion or gauge especially of that which is intangible, immaterial, or incapable of measurement except in terms of something else; as, there is no **yardstick** by which we can determine a man's spiritual greatness; success is not to be measured by the **yardstick** of the dollar; the Tennessee Valley Authority (TVA) proposed the "utilization of Muscle Shoals as a **yardstick** in determining the relative costs of public and private power operation." **Touchstone**, literally a black siliceous stone allied to flint, which was used in testing the purity of gold or silver by the streak left by the latter when rubbed across it, in its far more common figurative sense designates one thing, especially a superior thing, which when applied as a criterion to another thing of the same kind shows up the extent to which the latter approaches it. "There can be no more useful help for discovering what poetry belongs to the class of the truly excellent. . . than to have always in one's mind lines and expressions of the great masters, and to apply them as a **touchstone** to other poetry" (*Arnold*). "Till experience had given him some **touchstone** by which he could judge the values of that old tragedy" (*Galsworthy*).

Ana. Norm, median, par, mean, *average: rule, *law: *principle, fundamental, axiom: *model, pattern, exemplar, paradigm.

3 Ideal, beau ideal, paradigm, *model, pattern, exemplar, example, mirror.

Ana. See those at **STANDARD**, 2.

stand-in. *Substitute, supply, understudy, double, locum tenens, alternate, pinch hitter.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

standpoint. *Point of view, viewpoint, angle, slant.

Ana. Stand, *position, attitude.

stanza. *Verse.

stare, v. *Gaze, gape, glare, peer, gloat.

Ana. Look, watch, *see: glower, lower, scowl, *frown.

stark. *Stiff, rigid, inflexible, tense, wooden.

Ana. Settled, established, fixed, set, firmed (see SET, v.).

Con. *Elastic, resilient, springy, flexible, supple: fluid, *liquid.

starry. **Starry, stellar, astral, sidereal** agree in meaning of, referring to, or suggestive of a star or group of stars. **Starry** is the ordinary nontechnical term, capable of being used in reference to a star or stars in any sense, such as the celestial bodies known as stars, the geometrical figure having five, six, or more points, the conventionalized star, or, less often, the principal actor or actress in a play or motion picture; as, a *starry* night; a *starry* banner; *starry* eyes; "a... revival of 'The Two Orphans' with a *starry* cast" (B. Manille). **Stellar** has the same range of reference as *starry* but, since the connotations of the words are not the same, they are rarely interchangeable: *starry* gathers its connotations of brilliancy, remoteness, beauty, and the like, chiefly from the appearance of the celestial stars to the ordinary observer; *stellar* derives its suggestions chiefly from astrological lore of the stars as influencing all living things and as shaping human destinies, or from astronomical knowledge of the constitution, arrangement, and classification of stars; thus, one may speak of a *stellar*, rather than a *starry*, influence or aspect; of a *stellar*, rather than *starry*, eclipse or nebula. "These soft fires . . . shed down Their *stellar* virtue on all kinds that grow On Earth" (Milton). "Kapteyn worked nearly alone in the field of *stellar* astronomy" (G. W. Gray). *Stellar* is also used more often than *starry* of theatrical or cinematic stars; as, a *stellar* (usually preferred to *starry*) cast. **Astral** is neither a colloquial word nor a technical term of astronomy. It is, however, a technical term in theosophy and similar cults and is not infrequent in literary use, deriving its connotations of spirituality and remoteness from the fleshly largely from mythological and other conceptions of the stars as the abode of celestial spirits or of supersensible beings whose nature and constitution are rarer and finer than those of human beings, or as the abiding places of souls between successive incarnations; as, *astral* spirits. "It was generally felt that the Reverend Archibald Jones and Miss Chetwynd the elder would lift marriage to what would now be termed an *astral* plane" (Bennett). **Sidereal**, though often interchangeable with *stellar*, is now used especially in distinction from *solar* as applied to periods of time measured by the rotation of the earth with reference to a given star; thus, the *sidereal* day (determined by reference to Aries) is 3 minutes and 55.91 seconds shorter (as measured in solar time) than the mean solar day.

start, v. *Begin, commence, initiate, inaugurate.

Ana. Institute, *found, establish, organize: *enter, penetrate: originate, proceed, *spring.

startle. Scare, alarm, terrify, terrorize, *frighten, fright, affray, affright.

Ana. *Surprise, astonish, astound: rouse, arouse, *stir: electrify, *thrill.

state, n. **State, condition, mode, situation, posture, status, estate** are here compared as abstract terms meaning the way in which a person or thing manifests his or its existence or the circumstances under which he or it exists or by which he or it is given a definite character. **State** may be used so generally that it applies merely to a form of existence which has little or no relation to

space, time, body, or the like, but which is purely mental, spiritual, or otherwise immaterial; as, "[Dante's *Inferno*] reminds us that Hell is not a place but a *state*" (T. S. Eliot). "These two propensities [a moving forward with eagerness, a looking backward with regret] . . . can easily be resolved into the same principle. Both spring from our impatience of the *state* in which we actually are" (Macaulay). The term may also be used specifically to name the combination of circumstances affecting a person or thing at a given time, or the sum of the relations, qualities, or characteristics involved in his or its existence at the time under consideration; as, the city was then in a *state* of siege; to live fifty years happily in the *state* of matrimony; the present *state* of industry; "She did not have time to understand . . . the *state* of her feelings" (Conrad); his mental *state* is a cause of great concern. "What is called a *state* of society is the simultaneous *state* of all the greater social facts or phenomena" (J. S. Mill). **Condition** is interchangeable with *state* only when actual or concrete use, as in circumstances, is implied (as, his mental *condition* is a cause of concern; the present *condition* of the country; "It is a *condition* which confronts us, not a theory"—G. Cleveland), but even then it carries a stronger implication than *state* of a relation to the causes or circumstances which produced or are producing the effect, and a weaker suggestion of the duration of that effect; also, *condition* may be used in the plural in the sense of combination of circumstances and of qualities or characteristics, as *state* may not; as, his physical *condition* improved with rest and sufficient exercise; "Under the best *conditions*, a voyage is one of the severest tests to try a man" (Emerson); "the incapacity to achieve anything distinctly good or evil is inherent in our earthly *condition*" (Conrad). "There is no possible method of compelling a child to feel sympathy or affection; the only possible method is to observe the *conditions* under which these feelings arise spontaneously, and then endeavour to produce the *conditions*" (B. Russell). This suggestion of a relation to an external cause or causes is often so strong that the word frequently denotes a circumstance that serves as a causative influence, rather than a combination of circumstances that form a state of being. "Ancient man sought the shelter of trees and banks, of caves and hollows. . . so the labourers under somewhat the same *conditions* came to the corner where the bushes grew" (Jefferies). "Science has to deal . . . with scores of chemical energies which it knows little about except that they always seem to be constant to the same *conditions*" (H. Adams). **Mode** (as here compared: see also METHOD; FASHION, 2), is purely a philosophical term: as such, it is variously defined. In general, however, despite many differences in definition, the term implies an opposition to substance, defined as the underlying reality which can be known only from its external manifestations such as color, form, texture, etc. Hence, *mode* usually applies to this combination of characters by which a substance is manifested in a particular individual; thus, Spinoza calls particular mental states *modes* of mind or thought and particular physical phenomena *modes* of matter or extension. "I used to live entirely for pleasure. I shunned suffering and sorrow of every kind. . . I resolved to ignore them as far as possible: to treat them . . . as *modes* of imperfection" (Wilde). **Situation** (as here compared: see also POSITION, 3) applies only to a state or condition that represents a combination of definite concrete circumstances or such a conjunction of particular circumstances that the whole has a peculiarly exciting or interesting character; consequently, more than *state* or *condition*, *situation* implies an arrangement of these circumstances not only with reference to each other but also with respect to

the character or circumstances of the person or persons involved, so as to make for difficulty or advantage, embarrassment or elation, uncertainty or security, or the like; as, "Such views of life were to some extent the natural begettings of her *situation* upon her nature" (*Hardy*); "What he expected of me was to extricate him from a difficult *situation*" (*Conrad*); "That slender, unrigid erectness, and the fine carriage of head, which always made him seem master of the *situation*" (*Cather*). The term is also applied to any comparably striking and interesting combination of events in a novel, drama, or other narrative, especially one whose outcome involves uncertainty or suspense. "One knows the *situation* in fiction—the desperate girl appealing out of her misery to the Christian priest for help. So many women have this touch of melodrama, this sense of a *situation*" (*R. Macaulay*). "[Wilkie] Collins... was a master of plot and *situation*, of those elements of drama which are most essential to melodrama" (*T. S. Eliot*). *Posture* (as here compared: see *POSTURE*, 1) was once used in the sense of *condition* when that represented a state into which one was forced by need of preparation for something to come; as, to put a warship in a *posture* of defense; to put a house on the coast in a *posture* to receive a storm; "[Christ] insisted upon a certain... *posture* of the soul as proper to man's reception of this revelation" (*H. P. Liddon*). In current use, the term is often a closer synonym of *situation* than of *condition* and is chiefly found in the phrase "posture of affairs"; as, "Eustacia... had become considerably depressed by the *posture* of affairs" (*Hardy*). *Status* is strictly a legal term implying reference to one's state or condition as determined by one's legal capacity or one's legal relations to another or others, as in marriage, in making contracts, in inheriting property, in citizenship, or the like. In this sense, one's status is often determined by one's age, one's sex, one's degree of mental capacity, one's possession of the right to vote, and the like; as, the *status* of imbeciles and of insane persons; her *status* as a widow entitles her to a third of her husband's estate. In more general use, *status* applies to the standing of a person or thing with reference to all other persons or all other things of the same kind, and as determined by rank, social, official, industrial, or other position, popular estimation, or any other similarly determining factor; as, "In some hazy way, he fancied that it was fine and impressive, that it gave him a *status* among men" (*Kipling*); "As adopted by Augustus, it ['princeps'] was a popular appellation... defining a *status* rather than an office" (*Buchan*); "The necessity of readjusting our way of life to Tommy's new *status* of proprietor" (*M. Austin*); "In the opinion of the theologians of the Middle Age the conduct of life had been reduced to the *status* of an exact science" (*J. W. Krutch*). *Estate*, in its older sense of state or condition, now appears in a very few idiomatic phrases; as, he has come recently to man's *estate*.

Ana. *Phase, aspect: plight, *predicament, quandary, dilemma: pass, *juncture, exigency, emergency, crisis.

state, *v.* Report, *relate, rehearse, recite, recount, narrate, describe.

Ana. Expound, *explain, elucidate, interpret: *assert, affirm, declare.

stately. Magnificent, imposing, majestic, august, *grand, noble, grandiose.

Ana. Princely, regal, royal, *kingly, imperial: *splendid, glorious, superb, sublime: sumptuous, opulent, *luxurious.

statement. *Account, bill.

statesman. *Politician, politico.

station, *n.* 1 **Station, depot** are here considered only as

denoting a regular railway stop for the discharge and taking on of passengers, baggage (Brit., luggage), and freight (Brit., goods), or the building or buildings at such a stop. **Station** has always been the approved term in British use (especially in the phrase "railway station") for the stop and for the building or buildings connected with the transportation of passengers and their luggage. It is now often used also of the building or buildings connected with the transportation of goods (a "goods station"). **Station** (especially "railroad station") is now also the approved term, in the sense given in the binding sentence, in most parts of the United States. Until the end of the nineteenth century **depot** was the more common term and it still prevails in certain sections, though its use is generally discountenanced. **Depot** still occurs in British use as a designation of what is commonly called a "freight station" in the United States.

2 *Habitat, range.

statue. *Image, simulacrum, effigy, icon, portrait, photograph, mask.

stature. *Height, altitude, elevation.

status. Situation, posture, condition, *state, mode, estate.

statute. 1 Ordinance, regulation, *law, rule, precept, canon.

2 *Bill, act, law.

staunch. Variant of **STANCH**.

stay, *v.* 1 **Stay, remain, wait, abide, tarry, linger. Stay**, the most general of these terms, stresses continuance in a place (sometimes, in a specified condition); it often specifically connotes the status of visitor or guest; as, they could not decide whether to *stay* or to go; they went for tea and *stayed* for dinner; she was asked to *stay* a week. **Remain** is often used interchangeably with *stay*, but in precise usage it means to stay behind or to be left after others have gone; as, few *remained* in the building after the alarm was given. "A little Verse my All that shall *remain*" (*Gray*). To *wait* is to stay in expectation or in readiness; as, at his request, no one *waited* for him at the pier; the taxi *waited* one hour while they were shopping. To *abide* is to stay at length and usually connotes either stable residence or patient waiting for an outcome. "She hated the change; she felt like one banished; but here she was forced to *abide*" (*Hardy*). To *tarry* is to stay or rest when it is time to depart or to proceed; as, do not *tarry* if you wish to catch the noon train; some children like to *tarry* on the way to school. **Linger**, like *tarry*, usually implies outstaying one's appointed or allotted time; frequently, however, it also implies either deliberate delay or disinclination to depart. "Strange, that now she was released she should *linger* by him" (*Meredith*).

Ana. *Delay, procrastinate, lag, loiter: *arrest, check, interrupt: *continue, persist.

2 Sojourn, lodge, put up, stop, *reside, live, dwell.

3 *Defer, postpone, suspend, intermit.

Ana. *Delay, retard, slow, slacken, detain: *restrain, check, curb: *hinder, obstruct, impede.

steadfast or steadfast. Stanch, resolute, constant, leal, true, *faithful, loyal.

Ana. Settled, established, set, fixed (see **SET**, *v.*): *steady, constant: stable, durable, perdurable, *lasting: enduring, persisting, abiding (see **CONTINUE**).

Ant. Capricious.

steady, *adj.* Steady, uniform, even, equable, constant come into comparison as meaning neither markedly varying nor variable, but much the same throughout its course, its extent, or the like. **Steady** is by far the most widely applicable of these terms; in general, it suggests

regularity and lack of deviation, especially in movement, but it may imply such fixity in position or character as to be immovable or unshakable (as, *steady* as a rock; a *steady* pole; a *steady* person). When, however, movement, motion, or direction is implied, the term may connote lack of fluctuation (as, a *steady* market; *steady* prices; a *steady* flame), or lack of nervousness (as, *steady* hands; a *steady* voice), or a constant uninterrupted flow, pursuit, or the like (as, a *steady* stream; a *steady* rain; *steady* work). **Uniform** stresses the sameness or likeness of all the elements, parts, units, instances, or the like, that comprise a whole, whether that be an aggregate, a series, a combination of all instances, a course, or the like; as, the cells of the human organism are not *uniform* in structure and function; "an *uniform* course of legislation [respecting citizenship] . . . by the colonies, by the States, and by Congress, running through a period of more than a century" (*Ch. Just. Taney*); the temperature of this region is nearly *uniform*; the symptoms in all cases of the disease are *uniform*. **Even** stresses steadiness more than uniformity; it often connotes a dead level in quality or in character, or the like, which is unvaryingly maintained, or which is incapable of alteration or disturbance; as, her monotonous *even* voice; the *even* flow of his verse. "I mean to . . . support with an *even* temper, and without any violent transports of mind, a sudden gust of prosperity" (*Fielding*). **Equable** usually implies an inherent quality which makes for invariability, such as uniformity (as, an *equable* movement; an *equable* pulse) or freedom from extremes or sudden marked changes (as, an *equable* climate; an *equable* temper), or by a temperamental calmness (as, "low *equable* tones, curiously in contrast to the strident babble"—*Kipling*; "she won and lost, with the same *equable* sangfroid"—*R. Macaulay*). **Constant** (see also FAITHFUL, CONTINUAL) implies fixity in character, quality, or condition, or persistence in kind or type under the same conditions; as, "The sand is frequently yellow . . . but this colour is by no means *constant*" (*Lyell*); "throughout nature there runs a *constant* association of cause and effect" (*Inge*); "Science has to deal . . . with scores of chemical energies which it knows little about except that they always seem to be *constant* to the same conditions" (*H. Adams*).

Ana. Stable, durable, perdurable, perpetual, *lasting: enduring, persisting, continuing (see CONTINUE): stanch, steadfast, resolute, constant (see FAITHFUL): persevering, persisting (see PERSEVERE).

Ant. Unsteady: nervous, jumpy.

steady, v. *Stabilize, poise, balance, ballast, trim.

Con. *Shake, rock, agitate, convulse: *tip, tilt, cant, career.

steal, v. **Steal, pilfer, filch, purloin, lift, pinch, snitch, swipe, cop** agree in meaning to take something that belongs to another such as money, valuables, or goods, either without his knowledge or in a manner that eludes his observation. **Steal**, the ordinary and general term of this group, may be used in reference to any act involving taking what belongs to another or what only he has a right to give or grant; as, to *steal* a person's watch; to *steal* a kiss; to *steal* jewels from their hiding place. The term, however, often carries so strong a suggestion of furtiveness or secrecy that it may be used in reference to getting something without the other's leave, or wish, or knowledge, whether that action is culpable or pardonable or works to the other's injury or not; as, he did not know that his money had been *stolen* until he reached the bank; to *steal* a few moments from work; ill health has *stolen* the bloom from her cheeks; "Powell *stole* several glances at him with a curiosity very natural under the circumstances" (*Conrad*). **Pilfer**, once as strong as *plunder* or

rob (see these words under *rob*), now often specifically implies stealing in small amounts or is chosen as a euphemism when *steal* seems too harsh or plainspoken; as, a *pilfering* servant; he refused to employ any small boys because he suspected all of a tendency to *pilfer*; "ladies of unexceptionable position who are caught *pilfering* furs in shops" (*L. P. Smith*). **Filch**, though close to *pilfer* in its implications of petty thievery, carries a more obvious suggestion of the use of surreptitious means or of snatching; as, "Who steals my purse steals trash . . . But he that *filches* from me my good name Robs me of that which not enriches him And makes me poor indeed" (*Shak.*); "Fain would they *filch* that little food away" (*Dryden*); "fire which Prometheus *filched* for us from Heaven" (*Byron*); the boys were in the habit of *filching* fruit from the peddlers' carts. **Purloin**, though often differing little in meaning from the preceding terms, is preferred by careful writers and speakers when there is an intent to heighten the implication of removal, carrying off, or making away with, for one's own use or purposes. It may also suggest not only theft or robbery, but even despoliation, plagiarism, defalcation, or the like; as, "I hope to quote him is not to *purloin*" (*Dryden*); "The Edict of Restitution . . . left the original loot, prior to 1552, in the hands of the spoilers. But it proposed that all since *purloined* should be given back" (*Belloc*). **Lift** is often used colloquially in place of *purloin* or, sometimes, of *steal*; as, "Thieves that came to *lift* their cattle" (*A. Ramsay*); "He took to his old courses, and *lifted* a purse here, and a watch there" (*Thackeray*). The word is found also in the intransitive verb *shoplift* (most commonly in the form of the verbal noun *shoplifting*). The other words of the group are all regarded as slang, *pinch*, and *snitch* in their implications coming closest to *filch*, *swipe* (an Americanism) being used in place of any of the others, and *cop* stressing a stealing on the spur of the moment.

Ana. *Rob, plunder, rifle, loot, thief, burglarize: embezzle, peculate, *defalcate.

stealthy. *Secret, covert, furtive, clandestine, surreptitious, underhand, underhanded, privy, backstairs.

Ana. *Sly, cunning, crafty, artful, tricky, wily: sneaking, slinking, skulking (see LURK).

stedfast. Variant of STEADFAST.

steep, adj. **Steep, abrupt, precipitous, sheer** come into comparison when they mean having an incline approaching the perpendicular. The words are here arranged in ascending order of degree of perpendicularity. That is *steep* which has so sharp a slope or pitch that ascent, or, less frequently, descent, is difficult. "A military road, which rises . . . by an acclivity not dangerously *steep*, but sufficiently laborious" (*Johnson*). "The descent is . . . infinitely more *steep* than the going up" (*Gray*). That is *abrupt* which adds to *steep* not only the suggestion of a sharper pitch or angle of ascent or descent, but also that of a sudden break in a level. "It is the high land nearest to the shore which falls most *abruptly*" (*Kingslake*). That is *precipitous* (in ordinary usage) which suggests a headlong descent and an abruptness like that of a precipice; as, a *precipitous* height; a *precipitous* descent. "A big black, *precipitous* roof" (*H. James*). That is *sheer* which is perpendicular (or very nearly so) and shows no break in its line. "Sheer cliffs that fell from the summit to the plain, more than a thousand feet" (*Cather*).

Ana. Elevated, lifted, raised (see LIFT): lofty, *high.

steep, v. *Soak, saturate, impregnate, drench, sog, sop, ret, waterlog.

Ana. *Infuse, imbue, ingrain: penetrate, pierce, probe (see ENTER).

steer, v. *Guide, lead, pilot, engineer.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. *Conduct, direct, manage, control: *govern, rule.

stellar. *Starry, sidereal, astral.

stem, v. Proceed, issue, emanate, derive, flow, originate, *spring, arise, rise.

stenographer. Typist, *secretary, amanuensis, scribe, scrivener.

stereotyped. *Trite, hackneyed, threadbare, shopworn.

Ana. Conventional, formal (see CEREMONIAL): obsolete, archaic, antiquated (see OLD): used, employed, utilized, applied (see USE).

Ant. Changeful.

sterile. 1 Sterile, barren, impotent, unfruitful, infertile are here compared as meaning not having or manifesting the power to produce offspring or, literally or figuratively, to bear fruit. Sterile, as here compared, literally implies an inability to reproduce its kind usually because of a defect in either the male or female organism: the term is applicable to a human being or animal (chiefly to a female), to a plant, flower, and the like; as, a sterile woman; the "workers" among ants and bees are sterile; a sterile plant, flower, or fungus. In figurative use, sterile is applicable to many things, such as land in which seeds will not take root and grow (as, the sterile wastes of a desert), to minds that do not give birth to ideas, and by extension to persons with such minds (as, for a year his imagination had been sterile; a sterile author), to money which earns no interest (as, sterile gold in a safe-deposit box), or to anything which offers persons in particular or in general nothing of value, profit, or use (as, "beneath his fun lurked the sterile bitterness of the still young man who has tried and given up"—E. Wharton). Barren (as here compared: see also BARE, 1) applies especially to a woman who has borne no offspring or who is, or is believed to be, incapable of bearing children; as, "thy cousin Elisabeth, she hath also conceived a son in her old age: and this is the sixth month with her, who was called barren" (Luke i. 36). Figuratively (except as considered at BARE), the term usually implies a lack of return or issue; as, "a barren conquest which brought him no special repute" (Buchan); "to prove... that it [Quakerism] leads to no barren and self-centred detachment from social life and its problems" (Inge). Impotent (as here compared: see also POWERLESS) usually applies to the male of the species (especially of the human species) lacking power of procreation: the term is, however, applicable to persons or animals (sometimes plants) of both sexes, especially when considered as mates or as groups of mates; as, "Whole groups of animals and plants are rendered impotent by the same unnatural conditions" (Darwin). Unfruitful is often used in place of barren, not only as applied to women or to the female of any species, but as applied to land, vegetation, or efforts of any kind which bear no fruit, in any sense of that word; as, unfruitful women; an unfruitful tree; unfruitful soil; unfruitful attempts, suggestions, zeal. Infertile is often used in place of sterile especially in its literal sense; as, "animals and plants, when removed from their natural conditions, are often rendered in some degree infertile" (Darwin).

Ana. *Bare, barren, bald, naked: arid, *dry: *meager, exiguous: empty, hollow, nugatory, *vain.

Ant. Fertile: exuberant. — **Con.** Bearing, yielding, producing, turning out (see BEAR): fecund, fruitful, prolific (see FERTILE).

2 Sterile, aseptic, antiseptic agree in meaning free from danger of infection or infecting. That is sterile which is free from all living microorganisms, including bacteria and their viable spores, and certain fungi; as, distilled water is a sterile fluid; instruments rendered sterile by

heat. That is aseptic which involves asepsis, or the methods or processes of making or keeping free from microorganisms causing disease. Aseptic implies the use of precautions to prevent infection with pathogenic microorganisms. Aseptic technique is used in aseptic surgery, that is, surgery in which the attempt is made to prevent pathogenic microorganisms from getting to the incision by such measures as having the mouth and nose of the operators covered with masks and the room, instruments, and site of operation thoroughly cleansed and disinfected. That is antiseptic (as here compared applied only to surgery) which involves antisepsis, or the process of killing or inhibiting the growth and activity of microorganisms by the use of certain substances (antiseptics). In antiseptic surgery, emphasis is placed on the destruction of bacteria at the site of the operation rather than on their exclusion by suitable precautionary measures.

sterilize. 1 Sterilize, asexualize, castrate, spay, emasculate, mutilate, geld, caponize agree in meaning to render incapable of producing offspring. Sterilize, the most general of these terms, is applicable to both human beings and animals, and is used in referring to any incapacitation of the reproductive power. This incapacitation may be accomplished in various ways, as by undue exposure to X rays which kill germ cells, by a surgical operation, such as vasectomy or salpingotomy, which prevents the germ cells from reaching the site where fertilization can occur, or by removal of the gonads. Today sterilize often suggests a legalized procedure undertaken to prevent the reproduction of undesirables such as imbeciles and habitual criminals. The term does not imply physical disfigurement. Asexualize, a comparatively uncommon term, is sometimes used instead of sterilize when the effect, rather than the process, is emphasized. Castrate, a narrower term than sterilize, strictly means to deprive of the testicles (the male reproductive glands). It is used of both human beings and animals, and usually implies a surgical procedure. By extension, castrate has come to mean also to deprive of the ovaries (the female reproductive glands) and therefore is often used in place of spay, the specific term for this operation. Emasculate is often preferred to castrate in the strict sense when the reference is to human beings, and especially when there is the intent to suggest enervation and the loss of virile or masculine qualities. Mutilate, usually a term of much wider significance (see MAIM), is often substituted for castrate, especially when the intent is to convey strongly the idea of physical disfigurement or violence, or when a euphemism is desired. Geld, the oldest term meaning to castrate, is now applied chiefly to domestic animals, especially the horse, and caponize, also meaning to castrate, is most commonly applied to the male domestic fowl, or cock, but both are sometimes used humorously of human beings.

Ant. Fertilize.

2 Sterilize, disinfect, sanitize, fumigate are not close synonyms, but they come into comparison when they mean to subject to a process or treatment which has for its end the destruction of living organisms, especially microorganisms. Sterilize suggests special drastic methods such as the application of intense heat, boiling, the use of strong chemicals, and the like, which have for their end or effect the destruction of all microorganisms whether they are disease-producing or not. The term usually suggests means taken to avoid infection; as, in preparation for an operation, the nurses and physicians sterilize not only every instrument, every bandage, or every sponge to be used, but put on garments that have been sterilized; to sterilize sewage by chlorination. Dis-

infect also suggests special methods such as exposure to strong sunlight and fresh air, thorough washing, and the like, which have for their end the destruction of all disease germs: the term usually suggests an intent to free from such germs something that is known or feared to be infected; as, to *disinfect* a room occupied by a patient with scarlet fever; to *disinfect* blankets by washing and by exposure to sunlight; after the epidemic the board of education gave orders that all books should be *disinfected*. **Sanitize**, literally to make sanitary, is often preferred by bacteriologists and public health officials when the reference is to preventive measures affecting the health of a community, such as the treatment of drinking water, air, and the like, and when neither *sterilize* (because it suggests complete destruction of microorganisms and often implies the taking of measures so drastic as to be impossible where human beings are concerned) nor *disinfect* (because it suggests the actual presence of disease germs) exactly fits their needs or makes clear their intention. **Fumigate** is associated with these terms only because fumigation was once the usual method of disinfection. Literally, it implies the use of fumes (smoke, vapor, or gas) that are destructive not only of microorganisms but of pests, such as cockroaches, beetles, and bedbugs.

stern, *adj.* *Severe, austere, ascetic.

Ana. Strict, *rigid, rigorous, stringent: *grim, implacable, unrelenting: *inflexible, inexorable: disciplined, trained, schooled (see **TEACH**).

Ant. Soft: lenient.

steward, *n.* **Steward**, **reeve**, **bailiff**, **agent**, **factor**, **seneschal**, **major-domo**, **oeconomus** come into comparison only when they denote a person who serves a lord or master as his deputy in charge of the latter's temporal affairs, especially of those pertaining to the management of his household and of his estate. With the exception of *steward* and *bailiff*, the words are now chiefly historical. **Steward** was originally applied to an official in a great household, such as that of a royal person or a noble, who was responsible for the management of the servants, the provision and dispensation of supplies, and the proper expenditure of the money or funds entrusted to him for that purpose. In the royal household the steward was always a nobleman. In current use, the term in this sense is applied to an official of a club, institution, or hospital, who has equivalent duties. Later, the term was applied to the head manager of a manor or large estate, who transacted all legal and financial business for his lord, who audited accounts, and who was responsible for all arrangements that had to do with maintaining or increasing the income derived from the estate. In present use, *steward* generally implies management of the concerns of a large landholder, such as the supervision of employees, the collection of rents, and the keeping of accounts, but it seldom suggests so complete a delegation of power from lord to deputy as was implied in the earlier senses. However, in all these senses *steward* carries an implication of custodianship or guardianship of goods or moneys which are entrusted to him by his lord or master and for the use of which he must render an accounting in due time. This implication has been so heightened by use of the word in the New Testament, especially in the parable of "the unjust steward" (*Luke* xvi. 1-8), in the figurative reference to a bishop as the "steward of God" (*Titus* i. 7), and in the designation of all Christians as by obligation "good stewards of the manifold grace of God" (*1 Peter* iv. 10), that the word now is frequently applied to anyone who carries a trust such as a great natural gift, the responsibility for public funds, or power over others by reason of his office or

personality. "We are Goddes *stewardes* all, noughte of our owne we bare" (*Chatterton*). "A man of business and a vigilant *steward* of the public money" (*Macaulay*). **Reeve**, which is now purely historical in this sense, and **bailiff** were used from the fourteenth to the seventeenth century as nearly identical terms. Both then implied power to enforce law and order in the domain or on the estate of the lord or master, to collect dues and rents from his tenantry, and to see that his dependents performed their allotted services. Both also suggested duties similar to those of a steward of a landowner and landlord. **Reeve**, in this sense, has given way to *bailiff*; the latter has also lost some of its earlier implications, for it now designates an employee whose duties correspond to those of an overseer or superintendent of an estate, and whose chief concern is the land and its profitable use or the husbandry of its resources, and not the management of a household or of its financial affairs as in the case of a steward. This distinction between *steward* and *bailiff* is not always kept perfectly clear, however. **Agent**, or *estate agent*, is now often used for *bailiff*, especially in England; **factor** is the usual Scottish designation. **Seneschal** and **major-domo** carry with them stronger implications of the grandeur and the power, both of the lord and of the official, than do *steward* or *bailiff*. Both imply a position of authority in a great household, royal or noble, the management and direction of the lord's household affairs, his entertainments, and his estate, and recognition as his representative in legal transactions. The difference between the two words is not always clear except that *major-domo* was originally used in reference to other than English (chiefly Italian and Spanish) officials. When the term later became applicable to an English steward (of a household) or a butler, it acquired a humorous connotation, but it still carries its earlier suggestion of a magnificent establishment. **Oeconomus**, which is a Latinized form of *oikonomos*, a Greek word used in the New Testament and commonly translated *steward* in the English versions of the Bible, occurs (now rarely) in ecclesiastical or scholastic use, being applied to the person whose office it is to manage the temporal affairs of a diocese, a college, or a religious order or community.

stick. 1 **Stick**, **adhere**, **cohere**, **cling**, **cleave** agree in meaning to be or become closely, firmly, or indissolubly attached. **Stick**, in early use, suggested attachment by infixing or embedding; it now usually implies attachment by affixing; it is when it carries the latter implication that it comes into comparison with the synonyms here discriminated. One thing (often a person) *sticks* to another, or things (often persons) *stick* together when they are literally or figuratively glued together and can be separated only by tearing or forcing apart; as, the stamp *sticks* to the envelope; he *stuck* to (sometimes *at*) his work; his friends *stuck* to (sometimes *by*) him in all his troubles; by *sticking* together they gained their objective. "His sermons . . . *stick* too closely to the point to be entertaining" (*T. S. Eliot*). When referred to things, **adhere** is usually more formal than *stick*; as, the mud *adhered* to their shoes. It is the idiomatic term, however, when the attachment results from growth of parts normally distinct or separate; as, abdominal tissues sometimes *adhere* after an operation. When referred to persons, *adhere* usually implies deliberate or voluntary acceptance, as of the creed of a church, the platform of a political party, or the doctrines of a philosopher; as, he *adhered* to the traditional scientific views. "The then current fashion, which royal ladies have *adhered* to ever since" (*R. Macaulay*). **Cohere**, in precise use, takes for its subject a collective singular or a plural noun that names things

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

that stick together to produce a mass, a body, or a unified whole; as, the dry ingredients of a cake *cohere* only when liquid is added. "A complete dissolution of the moral principles by which society *coheres*" (*Lecky*). **Cling** now usually implies attachment by hanging on, as by the arms, the roots, the tendrils, or the like; as, to *cling* to a capsized boat; the vine *clings* to the wall; wet clothes *cling* to the body. In figurative use, *cling* often implies dependence or the need of support; as, she *clung* to her father and mother even after her marriage; *clinging* women. At other times, it suggests tenacity in holding on to something possessed, believed, used, or the like; as, to *cling* to the superstitions of one's childhood; to *cling* to a hope. "Cyril *clung* to his old room on his visits" (*Bennett*). **Cleave** is now literary and elevated. It implies closeness and strength of attachment; when applied to persons, it commonly suggests depth of devotion and fidelity in affection. "Therefore shall a man leave his father and his mother, and shall *cleave* unto his wife" (*Genesis* ii. 24). "My tongue *cleave* to my roof within my mouth, Unless a pardon ere I rise or speak" (*Shak.*).

Ana. *Tie, bind: attach, *fasten, affix, fix: infix, *implant.

Con. Sever, sunder, part, divide, *separate: *detach, disengage.

2 Stickle, balk, shy, boggle, *demur, scruple, jib, strain.

stickle, v. Balk, shy, boggle, jib, *demur, scruple, stick, strain.

Ana. *Hesitate, vacillate, falter, waver: *object, kick, protest.

sticky. *Adhesive, gluey, glutinous, mucilaginous, gummy.

stiff, adj. Stiff, rigid, inflexible, tense, stark, wooden come into comparison when they mean so firm, hard, or tough in texture, consistency, or quality as to be impossible or highly difficult to bend or enliven. **Stiff**, the most common word of this group, is applicable where this condition exists in any noticeable degree; literally, it may describe either a desirable or an undesirable quality, because, except in its extended senses, it merely implies a condition and carries neither deprecative nor commendatory connotations; as, an edition of a book with *stiff* covers; he wants a cane that is very *stiff*; to dislike a *stiff* custard; "every gust made a noise like the rattling of dry bones in the *stiff* toddy-palms outside" (*Kipling*). In its extended senses, *stiff*, when applied to persons, their manners, their expression, and the like, usually suggests either extreme formality and coldness (as, he replied with *stiff* condescension; she preferred the easy-going parties of this day to the *stiff* entertainments she had known in her youth) or a lack of ease, grace, or graciousness in dealing with others (as, "Mrs. Hawthorne... seemed to be struggling with her *stiff* reserve to give him comfort"—*Arch. Marshall*; "Brutus had... a hard face, a pedantic style in speech and writing, and a *stiff* ungracious character"—*Buchan*). When applied to something that must be overcome or must be accomplished, the term implies unusual difficulty or the need of great exertion (as, a *stiff* ascent; a *stiff* opposition; a *stiff* examination; a *stiff* task): when applied to something that under particular circumstances or in a particular case has lost its usual or typical pliancy or pliability, *stiff* implies difficulty in using, moving, handling, or the like (as, branches *stiff* with ice; limbs *stiff* with cold; he grew *stiff* with fear). In a variety of other senses, *stiff* implies harshness or extreme severity (as, a *stiff* sentence; a *stiff* penalty) or great strength or violence (as, a *stiff* breeze; a *stiff* dose). **Rigid** (for extended senses see **RIGID**, 2) implies so high a degree of

stiffness that the thing so described cannot be bent or flexed without breaking it; as, an airship with a *rigid* hull; a bridge supported by a series of *rigid* masonry arches; a *rigid* crosspiece; trees too large and *rigid* to withstand the force of a hurricane. **Inflexible** (for extended sense see **INFLEXIBLE**, 2) in its literal sense differs from *rigid* only in suggesting a lack of limberness or an incapacity for being bent rather than a texture or consistency that resists bending or deforming. Consequently, it is often used when a less precise term is needed and merely an approach to rigidity is suggested; as, an *inflexible* metal; all *inflexible* twigs are rejected by the basket maker; an *inflexible* blade is not desirable in a carving knife. **Tense** (as here compared: see also **TIGHT**, 1) now infrequently occurs in its literal sense and then usually in reference to muscles, fibers, membranes, and the like, that are stretched so tight or so strained by effort, nervous excitement, or the like, that they have lost their elasticity or flexibility either for the time being or permanently; as, *tense* arteries; *tense* nerves; with muscles as *tense* as those of a tiger about to spring on its prey. **Stark** in the literal sense of *stiff* or, sometimes, of *rigid*, and in many of the extended senses of *stiff*, is now chiefly a dialectal term. However, one still comes across it in the literature of past centuries and occasionally in the work of modern authors who have a feeling for its special values. For the word usually suggests a stiffness that is associated with loss of life, warmth, power, vitality, or fluidity, and therefore often also connotes desolation, barrenness, death, or present valuelessness. Very frequently, both in past and present use, it is accompanied by *stiff* or *rigid*; as, "many a nobleman lies *stark* and *stiff*" (*Shak.*); "We seem to require an elasticity of system... which is in entire contrast with our rather *stark* and *rigid* methods" (*Gladstone*); "The neo-classic theorists... evidently had a faith in law that was too *stark* and literal; in a world of flux... they tried to set up changeless formulae" (*Babbitt*); "now style, the *stark*, bare structure of language, was to her a fetish" (*R. Macaulay*). More often in current use, *stark* is merely an intensive (often an adverb) meaning little more than such as is stated or described without qualification; as, he was *stark* naked; he stood in *stark* terror; "they... wrote *stark* nonsense" (*Quiller-Couch*). **Wooden** comes into comparison with the preceding terms only in its extended sense where it suggests not only the hardness and inflexibility of wood, but its dryness, its lack of suppleness, plasticity, and the like: consequently, the term not only suggests stiffness and lack of life and grace, but often clumsiness, deadness or heaviness of spirit, or the like; as, despite the gaiety of the conversation, no smile lighted his *wooden* countenance; "Kim took a few paces in a *stiff wooden* style" (*Kipling*).

Ana. Tough, tenacious, *strong, stout: *firm, hard, solid: formal, conventional, ceremonious (see **CEREMONIAL**): frigid, *cold, cool: difficult, *hard, arduous.

Ant. Relaxed: supple.

stiff, n. 1 *Body, corpse, carcass, cadaver.

2 *Vagabond, vagrant, tramp, hobo, bum, truant, swagman, sundowner.

stiff-necked. *Obstinate, stubborn, mulish, dogged, pertinacious, pigheaded, bullheaded.

stigma. **Stigma**, **brand**, **blot**, **stain** are synonyms when they denote a mark of shame left on a name, reputation, or character. **Stigma** and **brand** both derive the senses in which they are here considered from their earlier denotation of a scar made on a person to mark him as a criminal, a slave, or the like; in this sense, *stigma* usually, and *brand* always, implied the use of a hot searing iron in

inflicting the wound. In its extended sense, *stigma*, though originally and still often implying dishonor or public shame, now usually applies to a mark that is fastened upon a person or thing or is attached to it so as to discredit it and cause it to be frowned upon; as, the son's devotion to public service made the people forget the *stigma* that the father's corruption had fastened on the family name; the label "Slang" is applied as a *stigma* to certain words. "Public feeling was so strongly with Beaumarchais that he paraded his *stigma* as though it had been a mark of honour" (*Macaulay*). "They can attach a social *stigma* to the relief by taking away the pauper's vote" (*Shaw*). *Brand* carries far stronger implications of disgrace and infamy than *stigma*; in very precise use, it often suggests impossibility of removal, social ostracism, and public condemnation; as, he bore the *brand* of Cain (that is, he was a murderer and fugitive). "But for the sorrow and the shame, The *brand* on me and mine, I'll pay you back in leaping flame" (*Kipling*). *Blot* and *stain* in their figurative use imply a blemish that diminishes the honor of a name or a reputation, or that sullies one's reputation for purity or virtue but does not bring either name or reputation into utter disrepute; as, "Thou noteless *blot* on a remembered name!" (*Shelley*); "A *Blot* in the Scutcheon" (the title of one of Browning's poetic tragedies); "To have loved One peerless, without *stain*" (*Tennyson*).
Ana. *Disgrace, dishonor, opprobrium, odium, shame: contamination, tainting or taint, defilement, pollution (see corresponding verbs at CONTAMINATE).

still, adj. *Still, stilly, quiet, silent, noiseless* come into comparison when they mean making no stir or noise. *Still* applies to that which is motionless or at rest, often with the further implication of hush or absence of sound; sometimes one implication is stressed, sometimes the other, and sometimes both; as, "Hal no more moving? *Still* as the grave" (*Shak*); "the wheels of the mail [coach] were no longer within hearing and the night was quite *still* again" (*Dickens*); "that chair, when you arose and passed Out of the room, rocked silently a while Ere it again was *still*" (*Millay*). *Stilly*, which is poetic for *still*, emphasizes the absence of sounds, but it usually implies also the absence of stir or motion; as, "Oft, in the *stilly* night, Ere Slumber's chain has bound me" (*T. Moore*); "In the *stilly* fields, in the *stilly* ways" (*Henley*). *Quiet*, like *still*, may imply absence of perceptible motion or sound, or of both, but it carries stronger suggestions of lack of excitement, agitation, or turbulence, and of deep tranquillity, serenity, restfulness, or repose; as, "Through the green evening *quiet* in the sun" (*Keats*); "the happy *stillness* of dawn... the *quiet* morning air!" (*Meredith*); "A *quiet* town filled with people who lived *quiet* lives and thought *quiet* thoughts" (*S. Anderson*). *Silent* and *noiseless* differ from the other words of this group in being frequently applied to motion, movement, stir, or the like, that is unaccompanied by sound. *Silent* usually carries more positive suggestions of stillness or quietness (as, "the Earth... from West her *silent* course advance[s]"—*Milton*; "A green and *silent* spot, amid the hills, A small and *silent* dell"—*Coleridge*; "Three mountain-tops, Three *silent* pinnacles of aged snow"—*Tennyson*), whereas *noiseless* usually connotes absence of commotion or of sounds of activity or movement (as, "Along the cool sequester'd vale of life They kept the *noiseless* tenor of their way"—*Gray*; "This quiet sail is as a *noiseless* wing To waft me from distraction"—*Byron*).

Ana. *Calm, tranquil, serene, placid, peaceful: restful, reposeful, *comfortable.

Ant. Stirring: noisy.

still, conj. *But, however, nevertheless, yet.

stilly. *Still, quiet, silent, noiseless.

Ana. *Soft, gentle, mild, bland: placid, peaceful, *calm, tranquil, serene.

Con. Agitated, disturbed (see DISCOMPOSE).

stimulant. *Stimulus, incitement, impetus.

Ana. Provocation, excitement, stimulation, quickening, galvanizing (see corresponding verbs at PROVOKE): incentive, spur, goad, *motive.

Ant. Anesthetic: anodyne.

stimulate. Excite, *provoke, quicken, pique, galvanize.

Ana. *Quicken, animate, enliven, vivify: activate, energize, *vitalize: rouse, arouse, *stir, rally, waken, awaken.

Ant. Unnerve: deaden.

stimulus. *Stimulus, stimulant, incitement, impetus* come into comparison when they mean a force that arouses a person, a group of persons, an animal, an organism, or the like, to activity. *Stimulus* in its earliest and physiological sense applies to anything (substance or agency) that quickens organic action by pricking it into activity; as, a drug that serves as a sedative rather than as a *stimulus* is usually required in the treatment of lung conditions. In later and now more frequent use, the term applies especially to anything that evokes or induces a reaction or response in any living thing, such as a human being, an animal, or a plant, or in any living organ or tissue, such as the heart, the brain, the nervous system, or the muscles. In this sense the term is used chiefly but far from exclusively in psychology, psychophysics, and the biological sciences; as, some parts of the body are more sensitive to *stimuli* than other parts. "In psychology a *stimulus* is any force that arouses the organism or any of its parts to activity. Light is a *stimulus* to the eye, sound to the ear... some [*stimuli*] arise within the organism. Muscular soreness, hunger and thirst are sensations aroused by internal *stimuli*" (*R. S. Woodworth*). "A knowledge of responses, and their relations to *stimuli*, under the simplest conditions of pre-existing activity... is essential in any accurate survey of the whole field of activity; and thus it is that what we may call the '*stimulus-response* psychology'... is of genuine and fundamental importance" (*R. S. Woodworth*). In more general, nontechnical use, *stimulus* applies especially to anything that by pricking or irritating goads or stirs up not only a person or persons, but his (or their) powers into action, activity, endeavor, or the like; as, "No *stimulus* was omitted to excite and inspire the imagination and the sense" (*G. L. Dickinson*); "Many persons find stir, and movement, and the presence of a crowd an agreeable *stimulus*" (*A. C. Benson*); "For strong emotion... the shock of sudden external *stimulus* is necessary" (*H. Ellis*); "A great writer of the past is known by the delight and *stimulus* which he gives to mature spirits in the present" (*Van W. Brooks*). *Stimulant* is still occasionally used in place of *stimulus* in this last and most general sense, and it is the preferred term when it implies the production of effects of, or similar to, those produced by alcoholic liquors, coffee, tea, and certain drugs (often specifically called *stimulants*), such as a seeming increase of vitality and a temporary excitation to activity, often mental activity; as, "Virtuous indignation is a powerful *stimulant*, but a dangerous diet" (*Shaw*); "If they [generalizations about the character and mentality of persons in the past] have value, it is as *stimulants* to make us think about the present" (*A. Huxley*); "Fresh beginnings are excellent *stimulants* to a jaded world, but a defective method of progression" (*Lowes*). *Incitement* differs from *stimulus* in emphasizing a goading, a spurring, or a whipping in-

tended to drive one into moving or acting quickly, rather than the result attained; as, border incidents serving as *incitements* to war; "these things...which God sends us as an *incitement* to proceed with more honour and alacrity" (*Milton*); "Nor could all the *incitements* of its master induce the beast again to move forward" (*Galsworthy*). *Impetus* (as here compared: see also *SPEED*, 2) usually stresses the stimulation of an increase in the momentum of activity already initiated. "What also gave an unusual *impetus* to the mind of men at this period was the discovery of the New World" (*Haslitt*); "In estimating the social importance of this movement, we must be careful to discount the temporary...*impetus* it received from the economic slump of this period" (*Day Lewis*). But the term sometimes applies also to a stimulus that initiates action; as, "It is the *impetus* that I ask of you: the will to try" (*Quiller-Couch*).

Ana. Spur, goad, incentive, *motive, inducement: excitement, piquing, provocation (see corresponding verbs at *PROVOKE*): irritation, nettling (see corresponding verbs at *IRRITATE*).

stingy. *Stingy*, *close*, *closefisted*, *tight*, *tightfisted*, *niggardly*, *parsimonious*, *penurious*, *miserly*, *curmudgeonly*, *cheeseparing*, *penny-pinching* come into comparison as meaning unwilling (or manifesting unwillingness) to share one's goods with others or to give to another any of one's possessions. *Stingy*, the ordinary colloquial term, implies mainly a lack of generosity: the term is applicable, therefore, whenever there is a suggestion of a mean or illiberal spirit; as, she is sparing in her gifts because she has very little money, but not because she is *stingy*. "If I want anything, he says that it cannot be afforded. I never thought before that he was *stingy*, but I am sure now that he must be a miser at heart" (*Trollope*). *Close* and *closefisted* and the more colloquial *tight* and *tightfisted* usually imply stinginess of nature, but they also ordinarily suggest the power to keep a tight grip upon whatever one has acquired; as, to be *closefisted* in the expenditure of one's money; he is the most *tightfisted* person we have ever met; though very rich, he is so *close* (or *tight*) that we cannot count upon him for a generous contribution. *Niggardly* implies the character of a niggard, or of one who is so stingy and so closefisted that he grudgingly gives the smallest portion or amount possible: the term may refer not only to the giving or spending of money or the giving of material goods but to the provision of anything that would add to the comfort, happiness, well-being, or the like, of oneself or of others; as, "As poor and *niggardly* as it would be to set down no more meat than your company will be sure to eat up" (*Swift*); his *niggardly* allowance for rent and food; "Kant...was unsympathetic and *niggardly* of appreciation" (*H. Ellis*); "literature is so lavish with wealth and titles...the real world is so *niggardly* of these things" (*A. Huxley*). *Parsimonious* stresses frugality, but it also suggests niggardliness: because of this double connotation, the term suggests not a virtue, but a fault or, often, a vice; as, "Having been a spendthrift all his life, he had now become strictly *parsimonious*...and...devoted every energy of his mind to save shillings and pence" (*Trollope*). *Penurious* (etymologically, poverty-stricken: cf. *penury* under *POVERTY*) in its current use adds to *parsimonious* the suggestion of a niggardliness so great as to give the appearance of extreme poverty or of excessive closefistedness; as, "a grudging master...a *penurious* niggard of his wealth" (*Milton*); "I had a rich uncle...a *penurious* accumulating curmudgeon" (*Irving*). *Miserly* implies penuriousness but it stresses sordid avaricious-

ness as the motive; as, "her [Elizabeth's] expenditure was *parsimonious* and even *miserly*" (*J. R. Green*); a *miserly* contribution to the community chest. *Curmudgeonly* is a highly contemptuous term implying in its strictest uses both penuriousness and churlishness (as, *curmudgeonly* gifts to a relative in need); often, in current use, it stresses surliness at the expense of the older implication of stinginess (as, a *curmudgeonly* old fellow). *Cheeseparing* and *penny-pinching* suggest frugality and parsimoniousness carried to the extreme (as, the *cheeseparing* guardians of the city's finances; a *penny-pinching* appropriation for relief).

Ana. *Mean, sordid, ignoble: scrimpy, skimpy, *meager: greedy, acquisitive, avaricious, *covetous, grasping: *sparing, economical, frugal, thrifty.

Ant. Generous. — **Con.** *Liberal, bountiful, munificent: *profuse, lavish, prodigal.

stinking. *Malodorous, fetid, noisome, putrid, rank, rancid, fusty, musty.

Ana. Foul, filthy, nasty, *dirty: *offensive, repulsive, revolting.

stint, n. *Task, duty, job, chore, chore, assignment.

Ana. Quantity, amount (see *SUM*): allotment, apportionment (see corresponding verbs at *ALLOT*): prescribing or prescription, assigning (see corresponding verbs at *PRESCRIBE*): sharing or share, participation (see corresponding verbs at *SHARE*).

stipend. *Wage, salary, fee, emolument, pay, hire, screw.

Ana. Remuneration, compensation, recompensing or recompense (see corresponding verbs at *PAY*).

stir, v. *Stir*, *rouse*, *arouse*, *awaken*, *waken*, *rally*, as here compared, agree in meaning to drive from quiescence or torpor into activity. *Stir* (often, in this sense, *stir up*) usually presupposes excitement to activity by that which disturbs or agitates and so brings to the surface or into outward expression something which is latent or dormant. "If the...teacher longs to *stir* the sluggish mind of one of her scholars, she must first find out what the sluggishness is due to" (*C. W. Eliot*). "She wants *stirring up*. She's got into a rut" (*Bennett*). Sometimes the word suggests the evoking of rebellion or revolt; as, "There was a flickering of unrest all along the border...partly the *stirring* of powerful tribes" (*Buchan*). More often it implies the evocation of profound, agitating, but usually agreeable, emotion; as, "Imogen, *stirred* to tears by the swinging by of red-coated troops to a band" (*R. Macaulay*); "the recollection of it...*stirred* him past the point of being able to sleep" (*M. Austin*). *Rouse*, *arouse*, *awaken*, *waken* all presuppose a state of rest or repose, often that of sleep. *Rouse* derives its implications from its earliest application to the starting of game from coverts or lairs by the cries of hunters or by beating of bushes and, in precise use, always suggests incitement to activity by startling, frightening, or upsetting. In addition it commonly implies intense or vigorous activity, and often ensuing commotion or turbulence; as, "every tent *roused* by that clamour dread" (*Shelley*); "At the bridge of the lower saltings the cattle gather and blare, *Roused* by the feet of running men, dazed by the lantern glare" (*Kipling*); "Antony...had spoken words which *roused* the mob to fury" (*Buchan*). *Arouse*, though frequently used interchangeably with *rouse*, is so much weaker in its implications that it often means little more than to start into activity (or, sometimes, existence), and conveys no hint of what follows; thus, a noise in the night *arouses* a sleeping soldier if he merely wakes up into consciousness of it, but it *rouses* him when he also makes determined efforts to trace its source, or hastily arms himself, or the like; a fear may be *aroused*

(not *roused*) and immediately dispelled; passions are *roused* (not *aroused*) when they are so stirred up that they exert a harmful influence. "The effect of the 'madness' [Hamlet's] is not to lull but to *arouse* the king's suspicion" (T. S. Eliot). **Awaken** and **waken**, in literal use, like *arouse*, frequently imply an ending of sleep; in figurative use, they are employed chiefly in reference to mental or spiritual powers or faculties which need only the proper stimulation to be called forth into activity, or to be elicited; as, to *awaken* attention; to *waken* love; the conscience of the nation was *awakened*; "that tree always *awakened* pleasant memories, recalling a garden in the south of France" (Cather). **Rally** (see also **RIDICULE**, **BANTER**) presupposes a diffusion of forces or a lack of concentration that promotes lethargy or inaction; it therefore implies a gathering together that stirs up or rouses; as, "young Laon's name *Rallied* their secret hopes" (Shelley); "he *rallied* his strength for a final blow" (Prescott). "As if his memory were impaired... [he] made an effort to *rally* his attention" (Dickens).

Ana. Excite, *provoke, stimulate, quicken, galvanize: *incite, foment, instigate: activate, energize, *vitalize: *move, drive, impel, actuate.

stir, *n.* 1 *Motion, movement, move, locomotion.

Ana. Acting or activity, working or work, behaving or behavior, reaction (see corresponding verbs at **ACT**): change, alteration, variation, modification (see under **CHANGE**, *v.*).

2 **Stir**, **bustle**, **flurry**, **pother**, **fuss**, **ado** are comparable when they refer to the signs of excitement or hurry that accompany an act, action, or an event. **Stir** suggests brisk or restless movement, and ordinarily implies a crowd. "I hear A busy *stir* of men about the streets" (Shelley). "Many persons find *stir*, and movement, and the presence of a crowd an agreeable stimulus" (A. C. Benson). **Bustle** adds the implication of a noisy, obtrusive, or self-important display of energy, especially when used in reference to an individual. "She needs the *bustle* of life in a good hotel" (Bennett). "'Tis true that strength and *bustle* build up a firm. But judgment and knowledge are what keep it established" (Hardy). **Flurry** stresses nervous agitation and undue haste; as, the time for departure found them all in a *flurry*. **Pother** and **fuss** both imply flurry and fidgety activity; *pother* often distinctively stresses commotion or confusion and *fuss* needless worry or effort; as, he is always in a *pother* about something or other; there is no *fuss* when she entertains. "She could distinctly catch the tramping, martial syllables, 'Vote, vote, vote...' The *pother*, once begun, continued" (Bennett). "God never takes needless trouble. It is only foolish little men... that are fond of *fusses*" (J. R. Lowell). **Ado** also suggests fussiness or waste of energy; as, go to work without any more *ado*. It also often implies trouble or difficulty; as, there was much *ado* before their affairs were straightened out.

Ana. Agitation, disturbance, disquieting or disquiet (see corresponding verbs at **DISCOMPOSE**): excitement, stimulation (see corresponding verbs at **PROVOKE**): *din, uproar, hubbub, pandemonium.

Ant. Tranquillity.

stitch, *n.* *Pain, twinge, ache, pang, throe.

stocky. *Thick, thickset, squat, chunky, stubby, dumpy.

stolid. *Impassive, phlegmatic, apathetic, stolid.

Ana. Detached, aloof, *indifferent, unconcerned: imperturbable, composed, collected, *cool: unassailable, indomitable (see **INVINCIBLE**): patient, long-suffering, resigned (see corresponding nouns at **PATIENCE**).

stolidism. Impassivity, phlegm, apathy, stolidity. See under **IMPASSIVE**.

Ana. *Fortitude, grit, backbone, pluck, guts, sand: detachment, aloofness, indifference, unconcernedness or unconcern (see corresponding adjectives at **INDIFFERENT**).

stolid. *Impassive, phlegmatic, apathetic.

Ana. *Dull, blunt, obtuse: *stupid, dull, dense, crass, dumb: *heavy, ponderous: passive, supine, inert, *inactive.

Ant. Adroit (sense 2).

stolidity. Impassivity, phlegm, apathy, stoicism. See under **IMPASSIVE**.

Cor. Quickness, promptness, readiness, aptness (see corresponding adjectives at **QUICK**): animation, enlivening, quickening (see corresponding verbs at **QUICKEN**): *passion, fervor, ardor, zeal, enthusiasm.

stomach. *Abdomen, belly, paunch.

stone, *n.* **Stone**, **gem**, **jewel** agree in denoting a particle of hard mineral or similar substance having the beauty of color, radiance, cutting, or the like, that fits it for use as an ornament. **Stone**, as here compared, is the comprehensive term including all particles of mineral origin of this description whether they are classified as *precious stones*, a class including stones of highest value commercially for rarity, beauty, and hardness, such as diamonds, rubies, sapphires, and emeralds, or as *semi-precious stones*, a class including stones of somewhat lower value because less rare or less hard, such as the garnet, amethyst, jade, and tourmaline. **Gem**, in technical as well as in correct ordinary use, applies especially to a precious stone that is cut and polished, and has beauty apart from its setting, or to a pearl that has beauty of form and quality. The term, however, is also applied to any semiprecious stone that is similarly cut and polished or to any exquisitely carved or engraved stone (cameo or intaglio), fit for setting in a ring, brooch, or the like; as, the chalice was adorned with *gems* of great beauty; "the last finish of the *gem* engraver blowing away the last particle of invisible dust" (W. Pater). **Jewel** was originally applied to a costly ornament of gold or silver, often richly enameled or set with gems and used as an adornment of the person; in current precise use, the term is more commonly applied to a gem, especially a precious stone or pearl, that is worn on the person and is set in a ring, brooch, earring, necklace, tiara, crown, or the like; as, the crown *jewels* are on display; "the *jewel* That trembles in her ear" (Tennyson); *jewels* flashed from her throat, her ears, her breast, and hands.

Figuratively, both *gem* and *jewel* mean a great treasure, but *gem* usually carries a strong implication of intrinsic value because of the thing's perfection in detail, concentrated beauty or worth, or the like (as, the lyric is a *gem*; a *gem* of a drawing by Rembrandt), and *jewel* stresses rather the value of the thing as an asset to its owner or possessor or as a contribution to his worth, strength, effectiveness, or the like (as, "Good name in man and woman, dear my lord, Is the immediate *jewel* of their souls"—Shak.; "she is... a *jewel* of a servant"—Jane W. Carlyle).

stooge. *Fool, jester, clown, comedian, comic, antic, buffoon, zany, merry-andrew, pantaloons, harlequin.

stoop, *v.* **Stoop**, **condescend**, **deign** agree in meaning to descend below the level, as in rank or dignity, where one belongs or thinks he belongs, to do something. **Stoop**, which literally means to bend one's head or back, as in going through a low-ceilinged passageway or a low door, implies a descent not only in rank or dignity but also, and more often, from a relatively high moral plane to a lower one: the term, therefore, often suggests disgraceful or shameful action; as, to *stoop* to fraud; to think that

you should *stoop* to lying! Often, the term implies a lowering of one's standards, as of conduct, or a debasement of one's principles or motives for some lower end, such as pecuniary gain; as, "Aspiring to be the leader of a nation of third-rate men, he had to *stoop* to the common level" (*Mencken*); "His ambition was still to paint huge historical pictures; but meanwhile, to keep the pot boiling, he was prepared to *stoop* to a pettier kind of art" (*A. Huxley*); "But on the material side, Mr. Archer, if one may *stoop* to consider such things..." (*E. Wharton*). *Condescend* may imply the stooping of one who is actually exalted in power, rank, or dignity so as to accommodate himself to intercourse with those who are his inferiors: in this sense, the term usually suggests graciousness and courtesy and a waiving of formalities. "Spain's mighty monarch, In gracious clemency, does *condescend*. On these conditions, to become your friend" (*Dryden*). Often, however, the term implies an assumption of superiority and a patronizing manner that tends to offend or affront the person who is regarded as an inferior; as, "No beggar ever felt him *condescend*. No prince presume" (*J. R. Lowell*); "Those who thought they were honoring me by *condescending* to address a few words to me" (*F. W. Robinson*). *Deign* now implies a temperament or frame of mind that makes one haughty, arrogant, contemptuous, or the like, more often than it implies high rank or dignity or high standards of conduct: with this limitation, especially in current English (in older English *deign* was very close to *condescend*; as, "O *deign* to visit our forsaken seats"—*Pope*), it usually means to stoop to that which one believes is scarcely in keeping with one's dignity, or which one vouchsafes with reluctance; therefore the term is most common with *scarcely*, *hardly*, etc., or in negative constructions; as, "[The] very dog will hardly *deign* to bark at you" (*Arnold*); "Richard marched hastily out of the room and through the garden, never so much as *deigning* a glance at his wistful little guide... wondering a world of fancies about the handsome proud boy" (*Meredith*); "Mr. Crichtlow *deigned* no remark" (*Bennett*).

Ana. *Abase, demean, humble: vouchsafe, accord, *grant, concede: favor, accommodate, *oblige.

stoop, n. Porch, piazza, veranda, portico, *balcony, gallery, loggia.

stop, v. 1 *Stop, cease, quit, discontinue, desist* agree in meaning to suspend or cause to suspend activity. *Stop* applies primarily to action or progress, or to that which is thought of as moving or progressing; *cease* applies primarily to states and conditions, or to that which is thought of as being or as having existence; as, a train *stops*, but does not *cease*; the noise it makes both *stops* and *ceases*; one *stops* a car, but *ceases* driving a car; one *stops* work on a book, but *ceases* one's efforts to perfect its style; one's love may *cease*, but scarcely *stop*; "When I have fears that I may *cease* to be" (*Keats*). *Stop* frequently connotes a sudden or definite; *cease*, a gradual, suspension of activity; as, to *stop* a quarrel; to *cease* quarreling; "I gave commands; Then all smiles *stopped* together" (*Browning*); "You hear the grating roar... begin, and *cease*, and then again begin" (*Arnold*). *Quit*, as a synonym for *stop* and *cease* (see also *LEAVE*, 2), is an Americanism; as, he *quit* coming; to *quit* smoking; the man who does the work of two men before fifty is usually the one who can afford to *quit* (that is, stop working, or retire) at that age. *Discontinue* implies the suspension of some activity, especially one that has become a form of occupation or employment or is a practice or habit; as, to *discontinue* a business (or a friendship, or a correspondence, or a subscription to a journal, or drinking intoxicating liquors); "How do we

discontinue to be friends?" (*Browning*). *Desist* (which is rarely transitive in current use) usually stresses forbearance or self-restraint as the motive for stopping or ceasing but it may imply the futility of one's efforts; as, to *desist* from further questioning; "An order... requiring such person... to cease and *desist* from the violation of the law so charged" (*U. S. Code, title 15, §45*); "Never... *desisting* in my efforts to induce the Indians to join me in that... adventure" (*Hudson*). "He had made two attempts to shave but his hand had been so unsteady that he had been obliged to *desist*" (*Joyce*).

Ana. *Arrest, check, interrupt: intermit, suspend, stay, *defer, postpone: *frustrate, thwart, foil, balk, circumvent.

Con. Start, *begin, commence, initiate: *go, depart, leave.

2 Stay, put up, lodge, sojourn, *reside, live, dwell.

stopgap. Makeshift, shift, expedient, *resource, resort, substitute, surrogate.

storm, v. Bombard, assault, assail, *attack.

story. 1 *Account, report, chronicle, version.

Ana. *History, chronicle, annals: relation, rehearsing, recital, recounting (see corresponding verbs at *RELATE*).

2 *Story, narrative, tale, anecdote, yarn* are alike in denoting a recital of happenings less elaborate than a novel. *Story* is the most general and the familiar word and may in loose use be interchanged with any of the others of the group, except in its generalized sense of legendary lore, as in "And snowy summits old in *story*" (*Tennyson*). A story may be oral or written, actual or fictitious, in prose or in verse, designed to inform or to entertain, but characteristically treats of a connected series of events or incidents, rather than a single incident; as, a fairy *story*; one's life *story*; the *story* of an opera; the *story* of the Crusades; a *story* full of incident. The short *story* and a newspaper *story* may treat of but one incident. *Narrative* in its common use is more often factual than imaginative; as, a historical *narrative*; a *narrative* of discovery or adventure: *narrative* is a more formal word than *story*. As a literary composition, *narrative* usually suggests a plot, or causally connected series of motivated incidents; thus a chronicle or a diary is not called a *narrative*. *Tale* suggests, in consequence of its historical connection with oral telling, a more leisurely and more loosely organized recital, characteristically treating legendary or imaginary happenings, especially those of ancient times, and may be in verse; as, *Oriental tales*; folk *tales*; *tales* of the court of King Arthur. *Tale* is a more elevated or poetical word than *story*. *Anecdote*, retaining something of its original sense of an unpublished item, is a brief story of a single detachable incident of curious or humorous interest, often illustrative of a truth or principle or of the character or foibles of a notable person, and generally designed to entertain; as, a pithy *anecdote*; an *anecdote* of Lincoln's boyhood. "During the meal he entertained them with *anecdotes* of his travels" (*Meredith*). *Yarn*, once sailors' slang, now used only in colloquial language, suggests a rambling and rather dubious tale of exciting adventure, marvelous or incredible, ingenious or fanciful, and not always reaching a clear-cut outcome. "Without motive a story is not a novel, but only a *yarn*" (*Caine*).

Ana. Narration, description (see corresponding verbs at *RELATE*): *fiction, fable, fabrication: *novel, romance.

3 *Lie, falsehood, untruth, fib, misrepresentation.

stout, adj. 1 *Strong, sturdy, stalwart, tough, tenacious.

Ana. *Brave, bold, intrepid, valiant, valorous: indomitable, *invincible: resolute, stanch, steadfast (see *FAITHFUL*): *vigorous, energetic, lusty.

2 *Fleshy, fat, portly, corpulent, obese, plump, rotund, chubby.

Ana. *Thick, thickset, stocky: burly, brawny, husky, *muscular.

Ant. Cadaverous. — **Con.** *Lean, lank, lanky, spare, angular, rawboned, skinny, scrawny.

stout, n. *Beer, lager, bock, ale, porter.

straightforward. **Straightforward, forthright, aboveboard** when applied to persons, their actions, or their methods agree in meaning honest and open. That is **straightforward** which is consistently direct and free from deviations or evasiveness; as, a *straightforward* course; a *straightforward* answer. "He is a man; with clear, *straightforward* ideas, a frank, noble presence" (*Disraeli*). That is **forthright** which has directness like that of a thrust, or goes straight to the point without swerving or hesitating; as, a *forthright* appeal for votes. "His method in dealing with congressmen was direct, generally courteous, and always *forthright*" (*W. A. White*). That is **aboveboard** (in its figurative sense) which is free from all traces of deception or duplicity. *Aboveboard* is commonly used predicatively, and applies more often (though not invariably) to actions or methods than to persons. "One whose life had been so well-ordered, balanced, and *above-board*" (*Galsworthy*). "She's *aboveboard* and a good Christian" (*E. Phillips*). *Straightforward, forthright, and aboveboard* are also used adverbially with the same implications and connotations as their adjectival forms.

Ana. Honest, *upright, honorable, just: *fair, equitable, impartial: candid, *frank, open, plain.

Ant. Devious: indirect.

straightway. *Directly, immediately, instantly, instantaneously, forthwith, at once, anon, right away.

strain, v. 1 Sprain. See under STRAIN, n.

2 *Demur, scruple, balk, jib, shy, boggle, stickle, stick.

strain, n. 1 Streak, vein, *touch, suggestion, suspicion, soupçon, tincture, tinge, shade, smack, spice, dash.

strain, n. 2 1 *Stress, pressure, tension, shear, thrust, torsion.

2 **Strain, sprain** are here compared as nouns meaning an injury to a part of the body through overstretching and as verbs meaning to cause or to suffer such an injury to a part of the body. **Strain**, the more general and less technical term, usually implies an injury to a muscle or to the muscles as a result of overuse, overexercise, overexertion, or of overeffort, as in an attempt to regain one's balance or position; thus, high jumpers' *strain* is an injury to the rotator muscles of the thigh such as occurs frequently in high jumpers; *eyestrain* is a condition of the eye (especially of the muscles of the eye) involving pain and fatigue such as occurs in those who do close work with their eyes or in those who suffer from uncorrected defects of vision; so, "Charley horse" is a colloquial term for a stiffness resulting from muscular *strain* in the arm or leg, as of an athlete; to *strain* one's back while trying to avoid a fall on a slippery sidewalk. **Sprain**, though sometimes used in place of *strain* in the sense here considered, is commonly a technical term with very definite implications: in its strictest sense it implies an injury to a joint, usually as a result of a wrenching, with stretching or tearing of its ligaments, damage to the synovial membrane, swelling and pain, and disablement of the joint. Sometimes, also, *sprain* implies a rupture of tendons or muscles attached to the joint; as, to *sprain* one's ankle; a severe shoulder *sprain*.

strait, adj. *Narrow.

Ana. Limited, restricted, confined (see LIMIT, v.): strict, stringent, *rigid, rigorous.

Ant. Wide.

strait, n. 1 Strait, straits, sound, channel, passage, narrows are comparable when they denote a long and

comparatively narrow stretch of water connecting two larger bodies. Their meanings in geography are here especially considered, but it should be noted that their use in proper names does not invariably conform to their technical senses. A **strait** (or sometimes, in proper names, **straits**) is relatively short and very narrow; as, the *Strait* of Dover (connecting the English Channel and the North Sea); the *Strait*, or *Straits*, of Gibraltar (connecting the Atlantic Ocean and the Mediterranean Sea). A **sound** is longer and more extensive than a strait; the term is often applied to a long narrow body of water between the mainland and an island or group of islands and therefore at each end opening into the same ocean or sea, or arms of the same ocean or sea; as, Long Island *Sound* (lying between the Connecticut shore and the north shore of Long Island and connecting the East River and the Atlantic Ocean); the *Chandeleur Sound* (lying between the southeast coast of Louisiana and the Chandeleur Islands and opening at both ends into the Gulf of Mexico). Puget Sound in Washington and Pamlico and Albemarle Sound in North Carolina are not true sounds in this technical sense. **Channel** is less frequent than *strait* or *sound* as a technical term in the sense here considered, but when it is so used it denotes a relatively large sound; as, the English *Channel* (between southeastern England and the north coast of France); the *Mozambique Channel* (between the coast of southeastern Africa and Mozambique Island). **Passage** is practically synonymous with *channel*, denoting a connecting body of water wider than a strait; as, *Mona Passage* (between the islands of Hispaniola and Puerto Rico). **Narrows** designates a strait or a contracted part of a body of water; it is especially used of the necklike part of a bottle-shaped harbor; as, the *Narrows* of New York harbor.

2 Pass, exigency, pinch, emergency, *juncture, contingency, crisis.

Ana. *Difficulty, hardship, vicissitude, rigor: perplexity, bewilderment, mystification (see corresponding verbs at PUZZLE): plight, *predicament, fix, quandary.

strand. *Shore, coast, beach, bank, littoral, ripa, foreshore.

strange. **Strange, singular, unique, peculiar, eccentric, erratic, odd, queer, quaint, outlandish, curious** come into comparison when they mean varying from that which is ordinary, usual, and to be expected. **Strange**, the most comprehensive of these terms, always suggests unfamiliarity; it may apply to that which is foreign, unnatural, inexplicable, new, or the like; as, "Rovers... among *strange* men and *strange* moralities" (*Hardy*); "a *strange* sort of love, to be entirely free from... selfishness" (*Hardy*); "To most of us the art of China and Japan, however much it may attract and impress, is *strange*" (*Binyon*); "He was in one of those *strange* and novel portents, a 'motor-car'" (*H. G. Wells*). **Singular**, in precise use, always implies difference from every other instance of its kind and therefore always implies individuality; as, "lines... of *singular* beauty" (*T. S. Eliot*); "a distinguished and *singular* excellence" (*Mencken*); "a *singular* dog" (*Bennett*). Often, however, the word suggests strangeness that puzzles one or piques one's curiosity; as, "'Do you prefer reading to cards?' said he; 'that is rather *singular*'" (*Austen*). "'Tis *singular* that even within the sight Of the high towers of Antioch you could lose Your way" (*Shelley*). **Unique**, in careful usage, implies not only singularity, in its precise sense, but the fact of being unparalleled. Hence, the description of something as "more or most *unique*" is disapproved by all authorities, since only that which is the one thing of its kind can correctly be called *unique*; as, "Personality always contains something *unique*" (*Justice Holmes*).

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

"He [John Bright] has the almost *unique* distinction of having made speeches which were both effective when delivered and also models of literary eloquence" (*Inge*). **Peculiar**, as here compared (see also **CHARACTERISTIC**), implies marked or conspicuous distinctiveness in character, quality, or the like; as, "This difference arises... from the *peculiar* character of the Government of the United States" (*Ch. Just. Taney*). "Only subtle and delicate minds... catch the characteristic aroma, the *peculiar* perfume" (*Brownell*); "The nineteenth century had, like every other, limited tastes and *peculiar* fashions" (*T. S. Eliot*). Often, in looser use, *peculiar* is employed where one of the succeeding terms in this article (such as *eccentric* or *queer*) might better be used; as, he is growing very *peculiar*; recent events have provoked the frequent comment: "We live in a very *peculiar* world." **Eccentric** implies divergence from the beaten track; **erratic** adds to *eccentric* a stronger implication of caprice; as, "his [Carlyle's] taste for the *eccentric*, amorphous, and violent in men" (*J. R. Lowell*); "an *eccentric* preference for beginning his dinner... in the late afternoon" (*Cather*); "geniuses are such *erratic* people, and mediocrities so respectable" (*Shaw*); the workings of his mind were *erratic*. **Odd** stresses a departure from the usual, the normal, the regular; it sometimes suggests an element of the fantastic; **queer** even more strongly implies eccentricity and often suggests that the thing so qualified is dubious or questionable; as, "great men whose *odd* habits it would have been glorious piety to endure" (*G. Eliot*); "His tail cocks up in a very *odd* way" (*Barham*); "our sense of the *odd*, the humorous, the grotesque" (*J. R. Lowell*); "Now Elkanah Settle sounds so *queer*; who can expect much from that name?" (*Boswell*); "Alice was not much surprised at this, she was getting so well used to *queer* things happening" (*Carroll*); there is something *queer* about this transaction. **Quaint** implies pleasant, or especially, old-fashioned, oddness; **outlandish**, uncouth or bizarre oddness; as, a *quaint* village, full of half-timbered houses; "the language... *quaint* and old-fashioned" (*Cowper*); an *outlandish* custom. "A *quaint* procession! Old Solomon, in his seedy clothes and long white locks, seemed to be luring that decent company by the magic scream of his fiddle" (*G. Eliot*). "He wore the prophet's robe with a difference. He never let it look *outlandish*" (*C. E. Montague*). **Curious** usually implies extraordinary oddness or a singularity that invites close attention, study, or inquiry. The word is often employed as an equivalent of one or another of the words here considered; as, *curious* things are happening; a *curious* exhibition of feeling. Discriminating writers and speakers, however, give full value to one or both of the connotations of extraordinariness and singularity, and always imply that the thing so described merits notice or investigation; as, *curious* bits of folklore; *curious* customs and habits of speech surviving from an earlier age. "That she had chosen for her afternoon walk the road along which she had returned to Casterbridge three hours earlier... was *curious*—if anything should be called *curious* in concatenations of phenomena wherein each is known to have its accounting cause" (*Hardy*). "My only guiding principle has been that the examples should be *curious*, striking and even, in certain cases, extravagant" (*A. Huxley*).

Ana. *Abnormal, atypic, aberrant: *fantastic, bizarre, grotesque: surprising, astonishing, amazing, flabbergasting (see **SURPRISE**).
Ant. Familiar.

stranger. Stranger, foreigner, alien, outlander (or *utlander*), outsider, immigrant, *émigré* are not synonymous except when they are used narrowly to designate a

person who comes into a community from the outside and is not recognized as a member of that community. This is the primary denotation of some of the words, but the secondary sense of the others, especially the last three. **Stranger** and **foreigner** were originally equivalent and applied to one who came from another country (sometimes, especially in dialectal use, from another section) as a resident or visitor. Their differences in implications, however, have led to present distinctions in meaning, *stranger* stressing the person's unfamiliarity with the language and customs and *foreigner* the fact that he speaks a different language, follows different customs, or bears allegiance to another government. "The time came when I was the observant *foreigner*, examining education in France. To tell the truth, I was not a *stranger* to it, having lived in France as a child and again as a youth" (*Grandgent*). **Alien** emphasizes allegiance to another sovereign or government and is opposed to *citizen*; one may be called a *foreigner* after naturalization, but not an *alien*. Figuratively, therefore, *alien* implies exclusion from full privileges or inability to identify oneself with a group. "The older I grow, the more of an *alien* I find myself in the world; I cannot get used to it, cannot believe that it is real" (*L. P. Smith*). "He is anaesthetic to their theological and political enthusiasms. He finds himself an *alien* at their feasts of soul" (*Mencken*). **Outlander** is the term of Anglo-Saxon origin, *utlander* of Dutch origin, for *foreigner*; they were specifically applied to English residents in the former South African republics of the Transvaal and Orange Free State. In its general sense, *outlander* is preferred to *foreigner* only for a literary or rhetorical reason or because it carries the implications of *outlandish*. "His neighbors were... *outlanders* of that particular type to which... his own fastidiousness found the greatest objection" (*Tarkington*). **Outsider** usually implies non-membership in a group, clique, caste, or the like, largely because of essential differences in origin, interests, backgrounds, customs, and manners. "An *outsider* like myself feels a strong suspicion that the new instrument with which Einstein has presented the mathematicians is being put to uses for which it was never intended" (*Inge*). **Immigrant** and *émigré* are often used of foreigners who are residents and no longer aliens. The former usually is applied to a foreigner who came searching for subsistence or for a means of earning a living; the latter implies that the foreigner was a fugitive or refugee from his native land. *Émigré* is often specifically applied to a French refugee in England at the time of the French Revolution.

stratagem. *Trick, ruse, maneuver, artifice, wile, feint.
Ana. *Device, contrivance, contraption: expedient, shift, *resource, resort: machination, intrigue, conspiracy, *plot.

stray, v. *Wander, roam, ramble, rove, range, prowl, gad, gallivant, traipse, meander.

streak, n. Strain, vein, *touch, suggestion, suspicion, soupçon, tincture, tinge, shade, smack, spice, dash.

stream, n. *Flow, current, flood, tide, flux.

streamer. Pennant, pennon, banner, *flag, ensign, standard, color.

street. *Road, roadway, highway, highroad, avenue, boulevard, terrace, drive, parkway, thoroughfare, byway, lane, alley, alleyway.

strength. *Power, force, might, energy, puissance, arm.
Ana. Stoutness, sturdiness, toughness, tenaciousness (see corresponding adjectives at **STRONG**): soundness, healthiness (see corresponding adjectives at **HEALTHY**): *possessions, means, resources, assets.

strenuous. Energetic, *vigorous, lusty, nervous.

Ana. Virile, manful, manly (see **MALE**): dynamic, live, *active, operative: *spirited, high-spirited, mettlesome: vehement, *intense.

stress, *n.* 1 **Stress**, **strain**, **pressure**, **tension**, **shear**, **thrust**, **torsion** come into comparison in their mechanical senses when they mean the action or effect of force exerted within or upon a body or structure. **Stress** and **strain** are the comprehensive terms of this group: loosely, they are employed as close synonyms in the sense given in the preceding sentence, but in strict technical use, **stress** is applied to the force exerted when one body or part of a body presses upon, pushes against, pulls upon, or tends to stretch, compress, or twist another body or part of a body. Since in natural bodies and in artificial structures such force meets the opposing force of the thing pressed, pushed, pulled, etc., the term **stress** now usually denotes either (1) the reciprocal action of two opposing forces, which are, or should be, balanced so that either one of the bodies or parts supports the other (as, in a balanced structure **stresses** equal each other; the point of **stress** in a Gothic arch) or (2) the cohesive force or molecular resistance set up in one body or part against the force exerted by the opposing body or part (as, "If the external forces acting on the body increase to the extent that the maximum **stress** that can be developed is unable to balance the external forces, the change in form will increase rapidly and the body will break or rupture"—*Kent's Mechanical Engineers' Handbook*). **Strain**, on the other hand, in its strict technical sense, denotes the alteration in size or shape resulting from stress, either as the force exerted by one body or part upon another or as the resistance developed in opposition to an external force. "In boiler construction... the design of the structure itself has been modified to reduce **strains** to a reasonably safe margin below the danger point in day-to-day operation" (*A. C. Morrison*). "Forgings and castings of irregular shape are subject to internal **strains**, which may cause them to fail in service" (*Kent's Mechanical Engineers' Handbook*). All the other terms designate a particular type of stress, and, in some cases, also of strain. **Pressure** commonly applies to a stress which is characterized by a weighing down upon or a pushing against a surface and which, in fluids, is distributed uniformly in all directions: it is usually measurable per unit area of surface affected; as, "the normal atmospheric **pressure** is about 14.7 pounds per square inch" (*Van Nostrand's Scientific Encyclopedia*); blood **pressure** (i.e., the pressure of the blood against the walls of blood vessels); steam **pressure**. **Tension** applies both to the stress exerted and the strain effected by two forces, usually balanced forces, pulling in opposite directions and causing or tending to cause extension. Such stress is measured per unit area of cross section; as, "Such is the **tension** and friction in the warp on the loom that were the threads themselves not properly lubricated and protected from ravelling by sizes the breakage... would offset... the advantage of the machine's more rapid action" (*A. C. Morrison*). **Shear** is applicable either to a stress or to a strain that occurs when a force lying in the plane of one area or section tends to cause it to slide upon a parallel plane or a contiguous section; as, a **shear** in a layer of rock; the **shear** in the center of a column. **Thrust** applies to the pressure exerted by one part of a structure against another, especially when one member exerts a diagonal or horizontal outward pressure against another; as, the **thrust** of a rafter against a supporting wall; the **thrust** of an arch against an abutment. **Torsion** applies to either the strain (or deformation) produced by twisting, or to the stress (or resistance) displayed by a nonrigid body to deformation by twisting, or

to both the strain and the stress; as, to measure magnetic attraction and repulsion by the **torsion** of a wire filament. 2 *Emphasis, accent, accentuation.

stretch, *n.* *Expanse, amplitude, spread.

Ana. *Area, tract, region: extent, magnitude, *size.

strict. Stringent, *rigid, rigorous.

Ana. Stern, *severe, austere, ascetic: *inflexible, inexorable: exacting, oppressive, *onerous, burdensome.

Ant. Lax: loose: lenient, indulgent.

stricture. *Animadversion, aspersion, reflection.

Ana. Criticism, censuring or censure, condemnation, denouncing or denunciation (see corresponding verbs at **CRITICIZE**).

Ant. Commendation.

strident. Blatant, clamorous, *vociferous, boisterous, obstreperous.

Ana. Harsh, uneven, *rough: discordant, *dissonant.

strife. *Discord, conflict, contention, dissension, variance.

Ana. Combat, conflict, fight, affray, fray (see **CONTEST**): dispute, controversy, *argument: *brawl, broil, fracas: altercation, wrangle, *quarrel, squabble.

Ant. Peace: accord.

strike, *v.* 1 **Strike**, **hit**, **smite**, **slug**, **slog**, **slap**, **swat**, **clout**, **punch**, **box**, **cuff** come into comparison when they mean to deal or deliver a blow to someone or upon something. **Strike** (as here compared: see also **AFFECT**, 1), the most general of these terms, usually suggests both the motions of aiming and dealing a blow and the production of the desired effect: in some cases, however, especially when followed by **at** or used intransitively, the term does not necessarily imply the production of the effect intended; as, he **struck** the boy hard several times; he **struck** at his opponent with his fists but the latter neatly eluded him. **Strike** also typically implies the use of one's hand or of a whip, stick, bat, cane, or similar implement; as, she **struck** him in the face before he could finish his sentence; to **strike** a horse with a whip; to **strike** an anvil. Often, also, the term suggests the making of an imprint, an impression, a sound or combination of sounds, or the like, by movements which involve a careful aiming at a definite spot and a touching it with just the force necessary to achieve one's end; as, to **strike** the keys of a piano; to **strike** a chord on a piano; "A line [in a Chinese painting] once **struck** upon the silk was there for ever" (*Binyon*); to **strike** a bell; to **strike** a medal. Otherwise **strike** may be used not only in place of all the other words of this group but in place of a number of others which carry important additional implications such as a repetition of movements and effects (e.g., *pell*, *buffet*), a kind of noise produced (e.g., *rap*, *whack*, *bang*, etc.), or the like. **Hit** is often used interchangeably with **strike**, but careful writers and speakers prefer it when the stress is upon the impact of the blow or the reaching of the mark aimed at; thus, in precise usage, the archer **hit** (not **struck**) the target; he **hit** (not **struck**) the boy full in the face; so, to **hit** (not **strike**) a nail upon the head; the mark he **hits** (not **strikes**) is seldom the mark he aims at. Also, **hit** may or may not imply the dealing of a blow in the narrower sense of that word (as **strike** typically though not consistently does), for it may suggest the impact of a missile (as, no one was **hit** by the bullets from his revolver) or of a vehicle such as an automobile (as, a driver who **hits** and runs) or, in extended use, the impact of something which affects the mind or the feelings (as, "The disaster to Teddy and Mrs. Teddy **hit** him hard"—*H. G. Wells*). **Smite**, except in some extended use, is largely archaic and rhetorical: even though it seldom suggests a definite spot or mark to be reached, it may be used in place of **strike** or **hit** in either literal or extended senses

because it implies both the dealing of a blow and the production of the intended effect. It is often preferred in literary or poetic English when there is the intent to suggest the forcibleness of the effort involved (as, "with the hammer she *smote* Sisera, she *smote* off his head"—*Judges* v. 26), the injuriousness or destructiveness of the effect produced (as, "thou, all-shaking thunder, *Smile* flat the thick rotundity of the world!"—*Shak.*; "Liberty, *smitten* to death"—*Shelley*), or the prompting of an emotion such as wrath, anguish, or vengeance (as, "I *smile* this bosom with these two hands as I *smile* it now"—*Dickens*). *Smile* is often preferred to *affect* or *impress* (see *AFFECT*, 1) when there is the intent to suggest an impression or emotional reaction that cuts deep into the heart or soul; as, *smitten* with love, or grief, or remorse. "The madness of the thing he had done *smote* the young man: now first he tasted hard earthy misery" (*Meredith*). *Slug* in colloquial use chiefly in the United States, or *alog* in more restricted British use, implies a hitting heavily or hard, as with a blunt instrument; as, to be waylaid and *slugged* by robbers. *Slap* literally implies a striking with the open hand (as, to *slap* one in the face); *swat* implies a hitting and, usually, a crushing (as, to *swat* flies); *clout*, a colloquial or dialectal term, stresses the delivery of a blow or blows as on the body or head (as, "nurses and mothers and schoolmistresses... *clout* our heads the moment our conclusions differ from theirs"—*Shaw*); *punch* (as here compared: see also *PERFORATE*) suggests a hitting with or as if with a closed fist (as, he promised to *punch* the boy's nose if he again interfered); *box* implies a hitting with an open hand, especially on the side of one's head (as, to *box* one's ears). *Cuff* differs little from *box* except in connoting more force or violence in the impact; as, "I swear I'll *cuff* you, if you strike again" (*Shak.*).

Ana. *Beat, pummel, buffet, pound, baste, belabor, thrash, thresh.

2 Impress, touch, influence, *affect, sway.

striking. Arresting, signal, salient, conspicuous, outstanding, *noticeable, remarkable, prominent

Ana. *Effective, effectual, efficacious: telling, convincing, cogent (see *VALID*): forcible, forceful, *powerful, impressive, *moving.

string, n. *Succession, progression, series, sequence, set, suit, suite, chain, train.

stringent. Strict, *rigid, rigorous.

Ana. *Severe, austere, stern: limiting, restricting, circumscribing, confining (see *LIMIT*, v.): restraining, curbing (see *RESTRAIN*): exacting, oppressive, *onerous: strait, *narrow.

strip, v. *Strip, divest, denude, bare, dismantle* agree in meaning to deprive a person or thing of that with which he or it is clothed, furnished, or invested. *Strip* stresses a pulling or tearing off rather than a laying bare, though the latter implication is frequent; it often connotes more or less violent action or complete deprivation; as, to *strip* the bark from a tree (or to *strip* a tree of its bark); he was quickly *stripped* of his clothes; where pasturing cattle *stripped* the ground; to *strip* tobacco (that is, to separate the leaves from the stalk); "dialogue... *stripped* of all removable literary ornament" (C. E. *Montague*); "*Stripped* of its secret, open, stark and bleak" (*Millay*). "Once start *stripping* poetry of what you imagine are essentials and you will find... the anatomy is made visible but the life will have gone" (Day *Lewis*). *Divest*, in contrast to *strip*, does not suggest violence; it usually implies a taking away of that with which a person or thing has been clothed or equipped, especially as a sign of power, rank, influence, prestige, or the like. In discriminating use, therefore, it often connotes an undoing

or a dispossession, or a degrading, or the like; as, to *divest* an officer of all authority; to *divest* a policeman of his badge. "Electricity... is invested with magnetic qualities when it begins to move, *divested* when it stops again" (Karl K. *Darrow*). "Naturalism *divests* life, whether physical or spiritual, of all that separates it from the inanimate and inorganic" (*Inge*). *Denude* implies a stripping or divesting, but in contrast, it always implies a resulting bareness or nakedness; as, the mountainside was *denuded* of trees by the hurricane. "*Stripped* of its vines and *denuded* of its shrubbery, the house would probably have been ugly enough" (*Cather*). "Though the phrase 'love is best' meant to our grandfathers more things than a volume could describe, it is to us... completely *denuded*... [and] only words, words, words" (J. W. *Krutch*). *Bare*, although it suggests a removal of that which covers or clothes, seldom carries implications of violent or complete stripping; in fact, it is chiefly used in idiomatic phrases which imply more than the mere act; thus, to *bare* one's head is to take off one's hat as a sign of respect, reverence, or the like; to *bare* one's sword is to unsheathe it and to have it ready for action; to *bare* one's heart to another is to reveal feelings one has concealed; to *bare* the secrets of the grave is to disclose, often as a result of a discovery of documents, something which had been known only to persons now dead. *Dismantle*, although it etymologically means to divest one of one's cloak, is now used chiefly with reference to the act of stripping a house, a building, a ship, or the like, of its entire equipment and furnishings; as, to *dismantle* a factory or a yacht. "The cottage itself was built of old stones from the long *dismantled* Priory" (*Hardy*).

Ana. Despoil, spoliage, devastate, waste, *ravage: rifle, loot, plunder, *rob.

Ant. Furnish: invest.

strip, n. *Strip, stripe, band, ribbon, fillet* come into comparison only when they mean a relatively long and narrow piece or section or something which suggests such a piece or section. *Strip* and *stripe* have probably undergone etymological confusion, since the verb *strip*, which is much older than the noun, stresses pulling or tearing off not only of clothes but also of bark, skin, rind, and the like, and in reference to the last mentioned may carry no suggestion of the shape of the pieces stripped off. The noun *strip*, nevertheless, like *stripe*, implies shape; that is, length and comparative narrowness and approximate uniformity of width. These nouns differ, however, for *strip* commonly suggests separation from a larger piece (as, to tear old linen into *strips* for bandages; to cut a sheet of paper into *strips*) and *stripe* stresses a contrast, as in color, texture, or pattern, between the section of a surface referred to and the sections bordering upon it (as, each white petal had a *stripe* of red; the *stripes* on a tiger's back; gray cloth with alternate *stripes* of blue and red). Thus, when one or more strips of braid have been sewn on a soldier's sleeve to indicate his rank, his length of service, or the like, they are called *stripes*. If actual separation is not implied (that is, cutting, tearing, or breaking apart), *strip* may be employed when the difference between the portion of surface referred to and its neighboring portions is a matter of use, ownership, or the like; as, the *strips* between sidewalk and curb belong to the city; each man on relief was allotted a *strip* of land for raising vegetables. However, *stripe* is used in such cases in preference to *strip* when the division is made evident by a contrast in appearance; as, "Narrow *stripes* of ice separated from each other by parallel moraines" (J. *Tyndall*); *stripes* of cultivated land in various shades of green. *Band*, after it had acquired the denotation of a strip of material, was for four or more centuries used

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

narrowly of a strip employed in binding, confining, encircling, and the like (for synonyms in this sense see **BOND**, 1). Only in the early nineteenth century did it acquire the meaning in which it is here considered, in which the stress is on shape rather than on use. However, the difference is often a matter of emphasis, for the word when it means a strip or stripe often also connotes either an encircling without a suggestion (or with only a slight suggestion) of confining or uniting, or a horizontal position rather than the vertical position so often (though not necessarily) connoted by *stripe*; as, the lower parts of the sleeves and of the skirt were adorned with *bands* (encircling horizontal stripes) of blue silk; *bands* of colored light in the sky at dawn; at closer range, the mountain showed three *bands*, the lowest green, the middle gray, and the highest white. However, in such words as *waistband*, *collarband*, and the like, the term implies not only an encircling but a staying, supporting, or strengthening. **Ribbon** had for its earliest meaning the one that is still the most common, a narrow woven material with selvedge edges, typically one that is fine and firm in texture and is used for ornamental bands, ties, bows, and the like; concretely, a ribbon is a length or strip of such a material. In extended use, *ribbon* is often used in place of *strip* when the strips are very long, very narrow, and very thin, and the material is flexible enough to appear like ribbon or to be handled like ribbon; as, steel *ribbon* for use in springs; *ribbons* of red, green, silver, blue, and gold paper for tying Christmas packages; he handled the *ribbons* (the reins) with great skill; the sails were torn by the hurricane into *ribbons*. "The road was a *ribbon* of moonlight over the purple moor" (*A. Noyes*). **Fillet** had for its earliest meaning in English a ribbon or other band for confining the hair but in its sense development (somewhat influenced by that of the French word *fillet*, thread) it has come to be applied to many a thing which is otherwise describable as a strip, a ribbon, or a band, such as a metal strip or ribbon from which coins are punched, a very thin molding, one of certain bands of white matter in the brain, or, more commonly, a long narrow piece of meat or fish without bone, such as a tenderloin of beef or a piece of the flesh of a flatfish such as sole, halibut, flounder, or turbot. In cookery and on menus, a cooked fillet of beef, sole, etc., is often called a *fillet* (with the French pronunciation). When *fillet*, the correct English term, is used, there is no justification for the French pronunciation.

stripe, *n.* 1 *Strip, band, ribbon, fillet.

2 Character, description, nature, *type, kind, sort, kidney, ilk.

strive. Struggle, endeavor, *attempt, essay, assay, try. *Ana.* Work, labor, toil, travail (see corresponding nouns at **WORK**): cope, *contend, fight.

striving, *n.* Struggle, endeavor, essay, assay, attempt, try. See under **ATTEMPT**, *v.*

Ana. *Work, labor, toil, travail: coping, confending (see **CONTENT**): *contest, conflict, combat, fight.

stroke, *n.* *Paralysis, palsy, apoplexy, shock.

stroll, *v.* *Saunter, amble.

strong. 1 Strong, stout, sturdy, stalwart, tough, tenacious come into comparison in the sense of having or manifesting great power or force as in acting or resisting. They may be used in reference not only to living things, but also to concrete objects and to intangible things. **Strong**, the most inclusive of these terms, fundamentally implies the possession of great physical power, such as results in animals or plants from sound health or great size, or in things that are made or built from sound construction and substantial materials (as, a *strong* constitution; the hammock is not *strong* enough to bear the

weight of two persons; a *strong* foundation), but in extended use it may apply to groups whose force is dependent upon numbers, organization, discipline, or the like (as, a *strong* army; "a *strong* majority forced a wavering minority along the road of rectitude"—*A. Repplier*), or to a spiritual or mental power or faculty that acts with force and vigor (as, a *strong* mind; a *strong* will; a *strong* critical instinct), or to some very potent or powerful thing (as, *strong* liquor; a *strong* poison; a *strong* current; a *strong* battery [i.e., one with very high voltage]; "the young husband had spoken *strong* words"—*Meredith*), or to anything, such as color or shadow, emotion or sentiment, that is particularly intense or violent (as, a *strong* purple; the *strong* light of the setting sun; *strong* anger; a *strong* love; a *strong* attachment). **Stout** (as here compared: see also **FLESHY**) carries a stronger implication than does *strong* of an ability to resist aggression or destructive forces or of an ability to endure hard use, severe pain, alluring temptation, and the like, without giving way. When applied to persons, it often suggests resolution, doggedness, fearlessness, or the like (as, "a *stout* champion never handled sword"—*Shak.*; "To quell the valour of the *stoutest* heart"—*Cowper*); when applied to things, it usually also suggests solid, substantial construction (as, a *stout* cane; a *stout* ship) or a texture that resists stress or strain (as, a *stout* canvas; a *stout* paper). In fact, the term is generally applicable when the suggestion of power to resist or endure is more emphatic than that of a power to do or to effect. **Sturdy** implies qualities, in inanimate as well as in animate things, that suggest the possession of rugged health: the term carries no suggestion of powers derived from size, intensity, vehemence, or the like, but connotes rather an inner strength such as is derived from healthy vigorous growth, close, solid construction, a determined spirit, or the like, that gives it staying power and stoutness; as, the little fellow has *sturdy* legs; "a square and *sturdy* little urchin" (*N. Hawthorne*); "it is the *sturdiest* of creepers, facing the ferocious winds of the hills, the tremendous rains that blow up from the sea, and bitter frost" (*Jeffries*); "our people are... conspicuous for a *sturdy* independence" (*Inge*); "It seemed to her a fine expression of *sturdy* Boer patriotism, however misguided" (*R. Macaulay*). **Stalwart** etymologically implies firmness of foundation and, therefore, usually implies such strength as is derived from that which is so deeply established or firmly rooted that it is unassailable or impregnable or is completely dependable; as, "William Law... was a *stalwart* Churchman, and showed no sympathy with the sectaries" (*Inge*); "Dryden brings his *stalwart* common sense to bear upon the problem, and clarifies the issue" (*Loves*); "Octavius had become the sole hope of the republicans, a more *stalwart* hope, for he had got himself a considerable army" (*Buchan*). When applied to persons with reference to their physique or prowess, *stalwart* always suggests great strength, but it usually throws the emphasis upon heroic build or largeness of frame; as, "a *stalwart* man, limbed like the old heroic breeds" (*J. R. Lowell*). **Tough** suggests the strength that comes from a texture or a spirit that is firm and unyielding and effectively resists attempts to destroy, overcome, or the like: it therefore stresses hardness rather than vigor, resistant elasticity or wiriness rather than hardness or solidity, or a capacity for yielding that is just sufficient to increase rather than to destroy a person's or thing's strength or stoutness; as, a *tough* membrane; *tough* ore; a *tough* opponent; *tough* resistance. **Tenacious** comes very close to *tough* in its most general implications, but it places greater emphasis upon retentiveness of that which has been gained or of adherence to a support, position, idea, or the like. It therefore

carries a strong suggestion of holding on, or of maintaining strength in spite of all opposing forces that would dislodge, dispossess, thwart, or weaken in any particular; when applied to substances, materials, and the like, it suggests extraordinary resistance to forces that would break out, or the like (as, "he seemed to hold on to life by a single thread only, but that single thread was very *tenacious*"—*Arnold*; "bold and *tenacious* as the bamboo shooting up through the hard ground of winter"—*Binyon*); when applied to persons it suggests a stubborn hold upon something, such as a possession or an opinion, that defies the efforts of others to break (as, "Italians in possession are probably as *tenacious* of their rights as any one else"—*Lucas*; "if the child is starved of pleasures, he will of course cling *tenaciously* to those that are attainable"—*B. Russell*).

Ana. *Vigorous, energetic, lusty: *powerful, potent, forcible, forceful: robust, sound, *healthy: vehement, *intense.

Ant. Weak.

2 *Alcoholic, spirituous, ardent, hard.

stronghold. Citadel, *fort, fortress, acropolis, fastness.

structure. 1 *Building, edifice, fabric, pile.

2 **Structure, anatomy, framework, skeleton** are often used interchangeably. **Structure**, however, is by far the richest in implications and the widest, therefore, in its range of application. In general it denotes the formation, arrangement, and articulation of parts in anything built up by nature or art. Oftentimes the word implies reference to everything that enters into the make-up of a particular body, organism, edifice, substance, or the like; thus, a study of the *structure* of a brain involves attention to the two kinds of matter (gray and white) of which it is composed, to the three parts into which it is divided (forebrain, midbrain, hindbrain), to the subdivisions of each of these parts, to the connections and interrelations between all these divisions, and to any peculiarities as in form or arrangement of parts. Sometimes, however, *structure* implies a reference to certain features only, as for example: (1) the parts or elements which distinguish the type or species and not the individual (as, crocodiles and alligators exhibit certain differences in *structure*); (2) the parts or features which are essential or necessary to a thing's existence as distinguished from those that are removable, detachable, etc. (as, in Gothic architecture the pointed arch is part of the *structure* and is not a decorative addition); (3) the parts or features that reveal the underlying design as opposed to those that complete the work or bring it into fullness of being (as, to study the *structure* of Browning's "Ring and the Book"). In current use, some persons, especially some biologists, prefer **anatomy** when the typical structure of an organism or of an organ is indicated; as, the *anatomy* of an ape; the *anatomy* of the heart. **Framework** and **skeleton** are applied to the underlying or supporting structure. **Framework** is used chiefly in reference to an artificial construction which serves merely as a prop or a guide in building, but which is not visible in the completed thing; as, the *framework* of a sofa; the carpenters are now working on the *framework* for the house. **Skeleton** is frequently used in the building trades for a rigid framework, especially one made of steel; it is often used in place of *structure*, *design*, *outline*, in reference to literary constructions, sometimes to imply that the design is carefully developed and its parts definitely articulated (as, the *skeleton* of his argument is now finished), but more often, probably, to indicate a sketchy conception of the whole which serves as a starting point (as, he has the *skeleton* of his plot in mind). In either case, it is usually further implied that the writing out in literary form and the

elaboration of atmosphere, details, characters, etc., remain to be accomplished.

Ana. Integration, articulation, concatenation (see under **INTEGRATE**): organization, arrangement (see corresponding verbs at **ORDER**): *system, organism, scheme, complex.

struggle, v. Strive, endeavor, essay, assay, *attempt, try.

Ana. *Contend, cope, fight: compete (*with*), vie (*with*), *rival, emulate: toil, labor, work, travail (see corresponding nouns at **WORK**).

struggle, n. Striving, endeavor, essay, assay, attempt, try. See under **ATTEMPT, v.**

Ana. Toil, labor, *work, travail: *contest, conflict, fight, fray, fray: contending, coping (see **CONTENT**).

strut, v. **Strut, swagger, ruffle, bristle, bridle** come into comparison when they mean to assume an air of dignity or importance. **Strut** implies a pompous or theatrical affectation of dignity, especially as shown in one's gait or by one's bearing in movement. "A poor player That *struts* and frets his hour upon the stage" (*Shak.*). "Dr. Goldsmith... went... *strutting* away, and calling to me with an air of superiority" (*Boswell*). **Swagger** always implies ostentation, a conviction of one's superiority, and, often, an insolent or overbearing gait or manner. "He... scarcely deigned to set a foot to ground, But *swaggered* like a lord about his hall" (*Dryden*). "What a *swaggering* puppy must he take me for" (*Goldsmith*). **Ruffle**, a term that was common before 1700 but obsolete thereafter until the first quarter of the nineteenth century, is still occasionally found. It carries a strong implication of swaggering, but it suggests even more rowdiness, more defiance, and often more absurdly pretentious display. "[He] gets drunk, *ruffles*, and roysters" (*Kingsley*). "He must *ruffle* it in another sort that would walk to court in a nobleman's train" (*Scott*). **Bristle** implies an aggressive manifestation, originally of anger or of zeal, but now often of any emotion or desire that causes one to display conspicuously one's sense of dignity or importance. "All the time he stuck close to her, *bristling* with a small boy's pride of her" (*D. H. Lawrence*). "The bourgeoisie, *bristling* with prejudices and social snobberies" (*R. Macaulay*). **Bridle** usually suggests awareness of a threat to one's dignity or a suspicion of one's unimportance that leads one to toss up one's head, to draw in one's chin, and otherwise to assume a lofty manner. "By her *bridling* up I perceived she expected to be treated hereafter not as Jenny Distaff, but Mrs. Tranquillus" (*Taller*). "Everything that poses, prances, *bridles*, struts, bedizens, and plumes itself" (*Mrs. H. Ward*).

Ana. Expose, exhibit, flaunt, parade (see **SHOW, v.**).

Con. Cringe, cower, *fawn, truckle: grovel, flounder (see **WALLOW**).

stubborn. *Obstinate, dogged, pertinacious, mulish, stiff-necked, pigheaded, bullheaded.

Ana. Rebellious, contumacious, *insubordinate: intractable, recalcitrant, refractory (see **UNRULY**): obdurate, adamant, inexorable, *inflexible: self-opinionated, *opinionated.

Con. Pliable, pliant, adaptable (see **PLASTIC**): tractable, amenable (see **OBEDIENT**).

stubby. Chunky, dumpy, stocky, *thick, thickset, squat.

student. *Scholar, pupil, disciple.

studied. *Deliberate, considered, advised, premeditated, designed.

Ana. *Thoughtful, considerate, attentive: intentional, *voluntary, willing, willful.

Con. *Spontaneous, impulsive, instinctive.

study, n. Concentration, application, *attention.

Ana. Consideration, contemplation, weighing, revolving (see corresponding verbs at **CONSIDER**): reflection, thought, speculation (see corresponding verbs at **THINK**): pondering, musing, meditation, rumination (see corresponding verbs at **PONDER**).

study, v. *Consider, contemplate, weigh, revolve, excogitate.

Ana. *Scrutinize, examine, inspect: *ponder, muse, meditate: *think, reflect, reason, speculate.

stultify. *Stunt, atrophy.

Ana. *Arrest, check, interrupt: *restrain, inhibit, curb: *hinder, impede, obstruct, block, bar.

stunt, v. **Stunt, stultify, atrophy** are synonymous terms only in their extended senses in which they are used in reference to men's minds or souls or men's mental or spiritual activities. However, even in their literal senses they have for their basic meaning to arrest the growth and development of someone or something. **Stunt** implies, primarily, a dwarfing as the result of abnormal or unfavorable conditions and a failure to attain full height or size. "So they [trees] slowly come to full growth, until warped, *stunted*, or risen to fair and gracious height, they stand open to all the winds" (*Galsworthy*). When used with reference to mental or spiritual development, the word commonly suggests a blighting or blasting or a cramping and inhibiting. "When by a cold penury, I blast the abilities of a nation, and *stunt* the growth of it's active energies, the ill I may do is beyond all calculation" (*Burke*). "All are victims of circumstances; all have had characters warped in infancy and intelligence *stunted* at school" (*B. Russell*). **Stultify**, originally a legal term meaning to allege or prove to be of unsound mind (especially oneself, in an endeavor to evade responsibility), has gradually extended in significance so that it and its derivative *stultification* now rarely, except in law, imply imbecility or insanity. In its chief current sense, it implies one's subjection to such influences that one's mind deteriorates and loses its power of growth. "Wearing our lives away in dull *stultifying* routine" (*New Freeman*); "Seek to be as others are, *Stultify* the soul" (*V. Lindsay*); "If the real prophet is he who attacks the *stultifying* illusions of mankind. . ." (*Van W. Brooks*). In modern idiom, not only things may *stultify* persons or their minds, but persons or their acts may *stultify* things which as forms of human activity or expression (such as a movement, a school of thought, a form of art) are capable of indefinite progress or development. Sometimes, little more than a checking of this progress and a rendering nugatory or useless all that has been or is being done are implied. "The blind folly of his servants had *stultified* his efforts" (*M. E. Braddon*). In very discriminating use, however, the word also connotes a destruction of usefulness or effectiveness by making a thing ridiculous or despicable. "We do *stultify* criticism if . . . we prostrate ourselves indiscriminately before what is good and what is bad" (*Quiller-Couch*). "Common sense demands that we shall begin with non-violence and not run the risk of *stultifying* the whole process of reform by using violence" (*A. Huxley*). **Atrophy** literally implies a wasting away or a shriveling up because of lack of nourishment or disuse. In medicine, *atrophy* (both as verb and noun) usually also implies degeneration, but the latter is often the result of a prior condition that cuts off or greatly diminishes the blood supply to the affected part; as, the muscles of a paralyzed arm gradually become *atrophied*. In extended use, *atrophy* is used chiefly with reference to instincts, natural appetites, powers of the mind or soul, or the like, which disappear or shrink into nothingness because of one's failure to make use of them or to develop them. "It is the trouble we take over our children that

elicits the stronger forms of parental affection; in those who avoid this trouble the parental instinct becomes more or less *atrophied*" (*B. Russell*). "The scientific person will become *atrophied* on the mystical side, the mystical person will become *atrophied* on the scientific side" (*H. Ellis*).

Ana. Disable, cripple, sap, undermine, enfeeble, debilitate, *weaken: *arrest, check, interrupt.

stupendous. Tremendous, prodigious, monumental, *monstrous.

Ana. *Enormous, immense, huge, vast, colossal, gigantic: astounding, amazing, astonishing (see **SURPRISE**).

stupid, adj. **Stupid, dull, dense, crass, dumb** agree in meaning conspicuously lacking in intelligence or power to absorb ideas or impressions, or exhibiting such a lack. **Stupid** implies a benumbed or dazed state of mind that is either congenital or the result of intoxication, a shock, illness, or the like: although it seldom is applied to the insane or the imbecile, it often also suggests senselessness; as, "*stupid* with age" (*Shak.*); *stupid* with drink; "he could not stand *stupid* people, especially those who are made *stupid* by education" (*Wilde*). "What force, what fury drove us into saying the *stupid*, intolerant, denunciatory things we said. . .?" (*L. P. Smith*). **Dull** (see also **DULL**, 2) suggests slowness or sluggishness of mind that may be constitutional, or the result of lack of mental exercise, or of overwork, or of a physical condition. A person or thing that is *stupid* reveals a deadness or a deadening of the mental powers; a person or thing that is *dull* manifests a lack of mental quickness or alertness or heavy, labored mental processes; thus, constitutionally *dull* pupils progress slowly until they are awakened by good teaching; constitutionally *stupid* pupils are usually subnormal physically or mentally; a *dull* book is so lacking in brightness, liveliness, or other signs of a stimulated mind, that it bores the reader; a *stupid* book exasperates the reader by its fatuousness, inanity, or other signs of mental ineptness; so, all work and no play makes Jack a *dull* boy; "Compared with her, other women were heavy and *dull*" (*Cather*). **Dense** implies a quality of mind suggestive of thickness or solidity (thickheadedness, thickwittedness, stockishness, blockheadedness, etc.) that makes it (the mind) impervious to ideas. It may imply obtuseness or stolidity, or any of various other qualities that reveal lack of perception, sensitiveness, or subtlety; as, the teacher of mathematics thought he had a particularly *dense* group of students; "More virtuous than myself, or more *dense*" (*Lamb*). **Crass** suggests fatness or grossness of substance (fatheadedness, lumpishness, etc.) that makes the mind incapable of delicate mental processes such as analysis, discrimination, evaluation, and the like, or impervious to refined or spiritual ideas; as, *crass* ignorance. "There were many *crass* minds in Middlemarch, whose reflective scales could only weigh things in the lump" (*G. Eliot*). "The *crass* Toryism of Mr. Chauncey" (*Bennett*). **Dumb**, as here compared (see also **DUMB**, 1), is American slang, partly affected by the German *dumm* and partly by the ordinary sense of the English word. As it is a term of contempt, it may be used in place of any of the preceding terms, especially when obtuseness and inarticulateness are also implied.

Ana. Foolish, silly, *simple, fatuous, asinine: sluggish, comatose, stuporous, *lethargic: inert, idle, supine, *inactive: phlegmatic, stolid, *impassive.

Ant. Intelligent.

stupor. Torpor, torpidity, lassitude, *lethargy, languor. **Ana.** Phlegm, impassivity, stolidity (see under **IMPASSIVE**): inertness or inertia, passivity, supineness, inactivity, idleness (see corresponding adjectives at

INACTIVE): insensibility, anesthesia (see corresponding adjectives at INSENSIBLE).

stuporous. *Lethargic, torpid, comatose, sluggish.

Ana. *Dull, obtuse: inert, supine, passive, *inactive: enervated, spiritless, listless, lackadaisical, languorous (see LAGUID).

sturdy. Stout, *strong, stalwart, tough, tenacious.

Ana. Sound, robust, *healthy: *vigorous, energetic, lusty: dogged, pertinacious (see OBSTINATE).

Ant. Decrepit.

stutter. *Stammer.

Stygian. *Infernal, chthonian, Hadean, Tartarean, hellish.

style, n. 1 Diction, phraseology, phrasing. *language, vocabulary.

Ana. *Taste, zest, gusto, relish: *form, convention, usage, convenience.

2 *Fashion, mode, vogue, fad, rage, craze, dernier cri, cry.

Ana. Modishness, smartness, chicness, spruceness, nativeness, stylishness, fashionableness (see corresponding adjectives at STYLISH).

3 *Name, designation, title, denomination, appellation.

stylish. Stylish, fashionable, modish, smart, chic, dapper, dashing, spruce, natty, nobby, posh, toffish, brave, braw are here compared as meaning presenting a fine, fresh, and more or less splendid or elegant appearance. Most of these terms, as here considered, apply chiefly to persons and stress the effect produced by clothes or by clothes and grooming. *Stylish*, *fashionable*, and *modish* are applicable not only to persons, but to clothes, as apart from persons, and to several other things. These three terms usually imply a conformity to the currently accepted style or fashion. *Stylish* applies to any person regardless of class or social station: for this reason, the term sometimes suggests pretentiousness or showiness as well as up-to-dateness (as, the Frenchman remarked the *stylish* clothes of American girls; although without much money to spend on clothes, she nevertheless looks *stylish*; "Her air, though it had not all the decided pretension, the resolute *stilishness*, of Miss Thorpe's, had more real elegance" (Austen); "But '*stylish*' is of the shop...and belongs to the dialect of milliners' apprentices and waiting-maids alone...in England" (Lady F. P. Verney). On the other hand, *fashionable* usually connotes some connection with those who move in society or belong to a world apart from and above that of the ordinary man, and whose approval of that which is new not only in clothes, in furniture, in decorations, and the like, but also in ideas, in books, in writers, in artists, etc., determines the choice of those who would follow them; hence, to say that a costume, a hat, or a type of interior decoration is *fashionable* is not only to say that it is the latest style but that it meets with the approval of those who are regarded as dictators of fashion; as, in those days it was *fashionable* to stroll along the waterfront on Saturday afternoons; "Taste is now the *fashionable* word of the *fashionable* world" (Chesterfield); "The *fashionable* disparagement of reason, and exaltation of will, feeling, or instinct" (Inge); "My sister...recommended me to read the *fashionable* prophets of the day, Carlyle and Emerson and Ruskin" (L. P. Smith). *Modish* differs from *stylish* chiefly in its greater stress on up-to-dateness, or conformity with the very latest style, rather than on the effect produced: it sometimes suggests a step ahead of what is describable as *stylish* or *fashionable* and a daring or startling quality; as, this shop offers only *modish* dresses and suits; "Mr. Pen, Sir William's son, is come back from France...A

most *modish* person grown...a fine gentleman" (Pepys); "Thomas Moore's...high-flown and *modish* 'Evenings in Greece'" (T. Walsh); "Wit of that genuine kind which is free from *modishness*" (Birrell). *Smart* often implies extreme modishness in dress and appearance, but, even more often, it retains implications of trimness and neatness derived from an earlier and now comparatively rare sense of the word and connotes a finish or perfection suggestive not only of modishness but of perfect grooming and an awareness of the importance of cut, line, color, accent, or the like; as, she always wears *smart* clothes; she makes a *smart* appearance, whatever the time of day or night. *Chic*, a term taken from the French, but currently carrying implications that are found only in English, is sometimes loosely used as meaning *modish* or *smart*: in discriminating use, however, it does not imply conformity to the latest fashion, but an effectiveness in style not only of dress or millinery, but of any product of art or craftsmanship which suggests the exercise of a knack or skill and the achievement of distinction; thus, a *chic* hat has not only a style of its own but distinction and charm; a *chic* appearance is produced not by slavish attention to the latest fashion nor by an ignoring of it but by original touches or clever adaptations that distinguish one from those who are merely stylish or fashionable. *Dapper* typically applies to men, now usually only to men of small or slight build: it always implies stylishness, but it also commonly connotes trimness, briskness, and fastidious grooming; as, "Guido's *dapper* Archangel" (N. Hawthorne); "Cibber, the *smart*, *dapper* little Frenchified coxcomb" (L. Stephen). *Dashing* applies to men and to women or to things which they wear or use: it implies not only stylishness or, more often, modishness, but a bright, shining appearance that enables one to cut a figure in any group or assemblage; as, "She had two *dashing* daughters, who dressed as fine as dragons" (Irving); a pair of *dashing* young brokers; a *dashing* carriage and pair. *Spruce* applies most often to men: it suggests an almost affected attention to the details of one's appearance in order that one will look not only stylish but smart and fresh in appearance: it sometimes connotes a finical, almost vulgar, concern for the perfection of every detail; as, "Fastidious Brisk: a neat, *spruce*, affecting courtier, one that wears clothes well, and is in fashion" (B. Jonson); "The *spruce* apprentice sets up for a critic" (Goldsmith); "Making themselves as *spruce* as bridegrooms...according to the rules of their newly-acquired town experience" (Hardy). *Natty* differs from *spruce* in stressing neatness and orderliness slightly more than stylishness; as, "As *natty* a beau, As Bond Street ever saw" (Shelley). *Nifty*, which is chiefly American slang, implies approval of that which is stylish or smart; as, that is a *nifty* suit; a *nifty* hat. *Nobby* (originally British slang), *posh* and *toffish* (more recent British slang) come close to *fashionable* in their application to the clothes, manners, possessions, and the like, characteristic of the upper classes or of the world of fashion. *Nobby* suggests reference to the "nobs," or persons of great wealth or distinction (as, it's a *nobby* place; "An outfit...described as 'rather *nobby*'"—Queller-Couch); *posh* implies a character or appearance that is eminently high-class or wins the favor of the exceedingly rich or aristocratic (as, "I'd like to have...a very cozy car, small but frightfully *posh*"—J. B. Priestley; "Unfortunately, Prufrock...became *posh*"—Day Lewis); *toffish* suggests reference to that which is characteristic of "toffs," "swells," or of dandies (as, you certainly look *toffish* in that new suit). *Brave*, or its Scottish equivalent *braw*, suggests showiness or splendor, as of dress; as, to make a *brave* appearance in his first evening clothes;

"to shew a *braw new gown*" (*Burns*); "'Ye think yourself a *braw fellow*... and troth... there's na fault to find wi' the outside'" (*Scott*).

Ana. *New, novel, new-fashioned, newfangled, modernistic: *showy, ostentatious, pretentious, pompous.

styptic. *Astringent, constringent.

suave. **Suave, urbane, diplomatic, bland, smooth,** polite are here compared as applied to persons, their demeanor, and their utterances and as meaning conspicuously and ingratiatingly tactful and well-mannered. Many of these words at times convey so strong a suggestion of insincerity or of a surface manner that their distinctive implications are obscured. It is chiefly in the underogatory use of these words that their essential differences in meaning are apparent. **Suave** suggests qualities that are (or have the appearance of being) acquired through discipline and training and that encourage or are intended to encourage easy and frictionless intercourse with others. Negatively, it suggests the absence of everything that may offend or repel; positively, it suggests qualities such as affability without fulsome-ness, politeness without stiffness, persuasiveness without a hint of a desire to force one's opinion on others; as, the *suave* manner of the well-bred Chinese; "what gentle, *suave*, courteous tones!" (*H. H. Jackson*); "a slight disturbance of his ordinary *suave* and well-bred equanimity" (*Lytton*). **Urbane** (etymologically, characteristic of the city as opposed to the country) implies a high degree of cultivation, poise, and wide social experience; it also commonly suggests an ingrained or inbred courtesy which makes for pleasant and agreeable intercourse among all kinds of men, regardless of their social or intellectual standing. "No one lost anything by granting precedence to a man so flawlessly *urbane*" (*A. Repplier*). "That peculiarly Roman *urbanity*—the spirit at once of the grown man as distinguished from children, of the man of the world, and of the gentleman" (*J. W. Mackail*). Since urbanity and an ability to deal with difficult or ticklish situations with great tact are theoretically the qualities of the typical diplomat, the adjective **diplomatic**, when used in reference to nondiplomats, carries these implications, often adding in addition a hint of artfulness in gaining one's own ends; as, a *diplomatic* reply to an aggrieved client; "Gabrielle's busy, active, *diplomatic* managing of the party" (*E. E. Hale*). "I have grown to believe that the one thing worth aiming at is simplicity of heart and life; that one's relations with others should be direct and not *diplomatic*" (*A. C. Benson*). **Bland** is negative as well as positive in its implications, for it usually implies the absence of irritating qualities as strongly as it suggests serenity, mildness, and gentility. Nevertheless, in spite of this vagueness, the term often carries a hint of benignity, or the appearance of it, and usually directly implies an ingratiating pleasantness. "His manners were gentle, complying, and *bland*" (*Goldsmith*); "Mr. Pickwick was... producing a constant succession of the *blandest* and most benevolent smiles" (*Dickens*). "He's simply a distinguished-looking old cleric with a sweet smile and a white tie: he's just honorable and *bland* and as cold as ice" (*Santayana*). **Smooth** differs from *bland* chiefly in being more positive in its implications and in being more consistently derogatory. Sometimes it stresses suavity, often an assumed suavity; as, "The words of his mouth were *smoother* than butter, but war was in his heart" (*Psalms* lv. 21). At other times it carries even a stronger implication of tactfulness and craft than *diplomatic*. "Octavian had replied *smoothly* to Cleopatra's entreaties, for he wished to preserve her alive to grace his triumph" (*Buchan*). **Politic** (as here compared: see also **EXPEDIENT**) when

applied to persons implies both shrewdness and tact: the term usually suggests the ability to gain one's ends or to avoid friction through ingratiating means or diplomatic methods. It varies considerably, however, in its implication of artfulness, sometimes connoting cunning or craft and sometimes little more than just the right degree of suavity; as, "Am I *politic*? am I subtle? am I a Machiavel?" (*Shak.*); "I... Am an attendant lord, one that will do To swell a progress... advise the prince... Deferential, glad to be of use, *Politic*, cautious, and meticulous" (*T. S. Eliot*).

Ana. *Gracious, cordial, affable, genial, sociable: *disarming, ingratiating: courteous, courtly, polite (see **CIVIL**): *fulsome, unctuous, sleek.

Ant. Bluff.

subdue. Subjugate, reduce, overcome, surmount, overthrow, rout, *conquer, vanquish, defeat, beat, lick. **Ana.** Control, manage, direct (see **CONDUCT**, v.): discipline, *punish, correct: foil, thwart, circumvent, *frustrate: *suppress, repress.

Ant. Awaken (sense 2), waken.

subdued. *Tame, submissive.

Ana. Meek, *humble, modest, lowly: *timid, timorous: docile, tractable, amenable (see **OBEDIENT**).

Ant. Intense: barbaric (*of taste*): bizarre (*of effects*): effervescent (*of character and temperament*).

subject, adj. 1 Dependent, *subordinate, secondary, tributary, succursal, collateral.

Ana. *Subservient, servile, slavish: conditional, contingent, *dependent, relative.

Ant. Sovereign, dominant.

2 *Liable, open, exposed, prone, susceptible, sensitive, incident.

Ana. *Apt, likely, liable.

Ant. Exempt.

subject, n. 1 *Citizen, national.

Ant. Sovereign.

2 **Subject, matter, subject matter, argument, topic, text, theme, motive (or motif), leitmotiv (or leitmotif),** as here compared, mean the basic idea or the principal object of thought or attention in a discourse or artistic composition. **Subject** is the most widely applicable as well as the least definite in denotation of these words. It may be used in reference to any type of discourse or to a work of art of any kind for it implies merely some restriction in one's field of choice and a governing principle determining the selection of one's material and demanding some concentration in the treatment of it; as, she is the chief *subject* of conversation at present; what is the *subject* of his painting?; a writer should stick to his *subject*; your *subject* is too comprehensive to be treated adequately in so short an article. "That *subject* for an angel's song. The hero and the saint!" (*Cowper*). **Matter** and **subject matter** (which is now more frequent) are often used as close synonyms of *subject*. "Hail, Son of God, Saviour of men! Thy name Shall be the copious *matter* of my song" (*Millon*). "Mr. Lytton Strachey... chose, as *subject-matter* of a book four people of whom the world had heard little but good" (*A. Repplier*). As often, however, these terms refer not to the idea, object, situation, or the like, selected for treatment, but to a restricted field or range of material from which one selects the specific subject he intends to treat; thus, the medieval writers of romance or heroic poetry had three *subjects* from which to draw situations, characters, and incidents for their narratives: the *matter* of France (the legends of Charlemagne and his companions), the *matter* of Britain (the Arthurian legends), and the *matter* of Rome (the myths and legends of classical antiquity). "Alexander's Bridge" was my first novel, and does not

deal with the kind of *subject-matter* in which I now find myself most at home" (*Cather*). An *argument* is the subject, especially the carefully delimited subject, for a particular discourse, such as a poem or a part of a poem, that is planned in advance of execution. "O Spirit... Instruct me, for Thou know'st... That, to the highth of this great *argument* [the idea to be developed in *Paradise Lost*], I may assert Eternal Providence, And justify the ways of God to men" (*Milton*). The word sometimes, but far from always, implies explicit statement of the leading idea or a summarizing of its development; thus, Pope prefaced each epistle of his *Essay on Man* with an *argument* of it. A *topic* is a subject (usually one of general interest) chosen because of its possibilities for individual or original treatment, or for discussion by different persons holding diverse views; as, the students were asked to write an essay on one of the assigned *topics*; "he had exhausted every *topic* of conversation" (*Mrs. Radcliffe*). A *text*, strictly, is a verse or passage, usually from Scripture, chosen as providing or suggesting a subject for a sermon or similar discourse. "The excellency of this *text* is that it will suit any sermon; and of this sermon, that it will suit any *text*" (*Sterne*). In extended use, it is often applied to anything (not necessarily a phrase) that suggests itself as a good starting point for a discourse the subject of which is yet to be defined or which lacks a definite subject. "The maiden Aunt Took this fair day for *text*, and from it preach'd" (*Tennyson*). A *theme* is a subject which one selects for treatment (especially literary or artistic treatment) because of its appeal to oneself or its possible appeal to others. *Theme* is applicable to any idea, proposition, text (or in music, melodic phrase), mood, or the like, which a writer, composer, or artist proposes to develop (as in a poem), to elaborate upon (as in a movement of a symphony), or to illustrate (as in a mural or series of murals), or which can be detected in a completed work as the dominant object of his concern. "Fools are my *theme*, let satire be my song" (*Byron*). "Waterfalls are from very early times a favourite *theme* for the painter" (*Binyon*). "I somehow played the piece [Schumann's *Carnival*]: remarked on each old *theme* I the new dress" (*Browning*). *Theme* does not necessarily suggest any clearer definition than *subject* or *topic* (thus, a poet chooses love for his *subject* or *theme*; an essayist has a wide range of *themes* or of *topics* from which to make a choice), but in distinction from them, it invites comparison with the treatment and calls attention to the quality, the form, the design, or the execution of the completed work; thus, an overworked *theme* implies a lack of freshness in the thought, design, or the like; a compelling *theme* suggests force and enthusiasm in its treatment. "To produce a mighty book you must choose a mighty *theme*" (*Melville*). *Motive* is restricted in its reference to works of art in which design or pattern is the important element. In music, it is interchangeable in this sense with *theme*, the leading phrase which is repeated with variations during the course of a composition or movement; in the decorative arts it is the figure which stands out as the salient and dominant feature of the design, and is repeated at appropriate intervals; as, the chief *motif* of the design is the peacock one, much favored by decorative artists. *Leitmotiv* was originally employed in reference to the music dramas of the German composer Wagner. In music, it designates a specific melodic phrase that is associated with a particular person, mood, or situation, and that is repeated each time this person, mood, or situation reappears. The word has considerable extended use, and is often applied to an insistent or recurrent idea that appeals to a reader as the dominant theme of an

author or of a work. " 'Fate went its way uncompromisingly to the terrible end.' This is the *leitmotiv* of this interesting, dignified apologia of one of Austria's Elder Statesmen" (*Sat. Review of Lit.*).

subject matter. *Subject, matter, argument, topic, text, theme, motive, leitmotiv.

subjoin. *Add, append, annex, superadd.

Ana. Attach, affix, *fasten: *unite, conjoin, combine.

Con. *Detach, disengage: *separate, part, sever.

subjugate. Subdue, reduce, overcome, surmount, overthrow, rout, *conquer, vanquish, defeat, beat, lick. **Ana.** Circumvent, outwit, foil, thwart, *frustrate: compel, coerce, *force.

sublimation. *Paragon, apotheosis, phoenix, nonpareil, nonesuch.

Ana. Ideal, beau ideal, paradigm, exemplar, pattern, *model.

sublime. Glorious, *splendid, superb, resplendent, gorgeous.

Ana. Transcendent, transcendental, ideal, *abstract: divine, spiritual, sacred, *holy: majestic, august, noble, stately (see **GRAND**).

sublunary. *Earthly, terrestrial, terrene, earthy, mundane, worldly, mortal.

submerge. Immerse, duck, *dip, submerge, dunk.

Ana. *Soak, saturate, drench, impregnate.

submission. *Surrender, capitulation.

Ana. Yielding, submitting, succumbing, bowing, caving in (see **YIELD**): compliance, acquiescence, resignation (see under **COMPLIANT**).

Ant. Resistance.

submissive. *Tame, subdued.

Ana. Docile, tractable, amenable, biddable, *obedient: meek, lowly, *humble: *subservient, servile, slavish, menial.

Ant. Rebellious.

submit. *Yield, capitulate, succumb, relent, defer, bow, cave in.

Ana. Surrender, abandon, resign, *relinquish: abide, endure, suffer, *bear.

Ant. Resist, withstand.

subordinate, adj. Subordinate, secondary, dependent, subject, tributary, succursal, collateral come into comparison as meaning placed in or belonging to a class, rank, or status lower than the highest or the first in importance or power. *Subordinate* applies to any person or thing that is beneath another in any way, such as by being under his (or its) authority (as, all officers of an independent army below the rank of general are *subordinate* officers; the house servants are *subordinate* to the butler), or by having a less important or less conspicuous place, position, or status in the scheme of a whole than some other member, part, element, or the like (as, "the relation of dominating to *subordinate* features [of a landscape]"—*Binyon*; "ceremony is *subordinate* in the scheme of life, as colour is in a painting"—*H. Ellis*), or by loss of independence and reduction to a lower or inferior position (as, "at that time considered as a *subordinate* and inferior class of beings... subjugated by the dominant race"—*Ch. Just. Taney*; "Such a step... would tend to make poetry merely a *subordinate* branch of music"—*Day Lewis*). *Secondary* differs from *subordinate* mainly in suggesting a much narrower range of difference, for it implies a position, an importance, or the like, that is just below that which may be described as *primary, main, chief, leading*, or the like; it is therefore never, in precise and discriminating use, applied to a thing which is distant from the highest by two or more steps or degrees; as, "What they actually believe is of

secondary consequence; the main thing is what they say" (*Mencken*); "The valuation of an object is thus *secondary* to the apprehension of it" (*S. Alexander*). Often, *secondary* is opposed to *original* or *first* (in order of development or derivation) and carries no necessary implication of inferiority in importance; as, the *secondary* meaning of a word. **Dependent** (as here considered: see also **DEPENDENT**, 1) implies subordination to someone or something, but it also connotes the position or the status of one (person or thing) that hangs on, or leans on, or relies on, the other for support or for the provision of that which is lacking in itself; thus, a *dependent* clause in a sentence is not intelligible apart from the main clause; a *dependent* child is not old enough to support himself and, therefore, must rely upon his parents or guardians. In its commonest use *dependent* implies a loss, through subjugation or through weakness, of one's independence: it therefore frequently stresses powerlessness or debasement more than subordination; as, "England, long *dependent* and degraded, was again a power of the first rank" (*Macaulay*); "countries that let themselves become *dependent* on the labor of other countries and settle down into a comfortable and ladylike parasitism" (*Shaw*). **Subject** definitely implies subordination to a dominant power, but never carries, as *subordinate* sometimes carries, an implication of relative importance within a scheme of the whole: it often tends to suggest the loss of powers which imply a degree of freedom, responsibility, self-discipline, and the like; as, a *subject* race; "aristocracy is out of date, and *subject* populations will no longer obey even the most wise and virtuous rulers" (*B. Russell*). **Tributary** strictly applies to peoples, races, nations, etc., that have been conquered and made subject to another people, race, or nation, and that are forced to pay tribute to their conquerors; in somewhat looser, but correct, use it is often interchangeable with *subject*; as, "no conquering race ever lived or could live . . . among a *tributary* one without begetting children on it" (*Quiller-Couch*). In a secondary sense, it is also applicable to anything that has an outlet into another and larger thing of the same kind and thereby yields supplies, accretions, and the like, which increase the size or importance of the latter; as, the *tributary* streams of the Mississippi River; "the lane, receiving two *tributary* lanes from who should say what remote hamlets, widened out with this accession" (*C. Mackenzie*). **Succursal** was originally applied to churches, chapels, and monastic houses dependent on a larger or more important church or monastery: it is now comparatively rare, but applicable to any branch of an institution or a system that serves as a subsidiary or auxiliary of the main institution or system; as, a *succursal* railway; a *succursal* bank; a *succursal* nest (of ants). **Collateral** etymologically implies a being side by side: it still sometimes suggests parallelism or concomitancy, but it no longer implies co-ordination. In the sense here considered, it retains its etymological implication (that of lying beside) but it suggests not equivalence in value, but subordination as through an indirect relation to, or a loose connection with, the other; thus, a *collateral* cause of a war, though by implication operative at the same time as the most important or primary cause, is subordinate to the latter; a *collateral* issue is not the main issue; a *collateral* descendant is not a direct, or lineal, descendant, but one in a different line, as of a brother or sister. "This . . . being but *collateral* to my work of examining the preface" (*Marvell*). "The limiting of inquiry to the immediate, with total disregard of the *collateral* or circumstantial events" (*Poe*). **Ana.** *Auxiliary, subsidiary, subservient, contributory, adjunct: *accidental, incidental, fortuitous.

Ant. Chief, leading: dominant.
subscribe. Agree, acquiesce, *assent, consent, accede.
Ana. Concur, coincide, *agree: *approve, endorse, sanction: *promise, pledge, covenant.
Ant. Boggle.
subservient. 1 *Auxiliary, subsidiary, contributory, ancillary, adjunct, accessory.
Ana. *Subordinate, secondary, dependent, subject.
 2 **Subservient, servile, slavish, menial, obsequious** are synonyms only in so far as they agree in meaning manifesting, as a person or his acts, or requiring, as a position or status, extreme compliance or abject obedience. **Subservient**, as here compared (see also **AUXILIARY**), applies directly or indirectly to those who occupy a subordinate or dependent condition or who manifest the state of mind of one in such a position: the term may imply nothing more or it may connote cringing or truckling; as, "Editors and journalists who express opinions in print that are opposed to the interests of the rich are dismissed and replaced by *subservient* ones" (*Shaw*); "The writers of the North American group . . . dry, mechanical, timid, *subservient* to the abstract laws that had governed the eighteenth century" (*Van W. Brooks*). **Servile** implies the work or character typical of slaves or servants of low degree or of those whose attitude is that of mean or cringing submission; as, to occupy a *servile* position; *servile* labors; "mean, *servile* compliance" (*Burns*); "to compose a letter which might . . . convey gratitude without *servile* regret, be guarded without coldness, and honest without resentment" (*Austen*). **Slavish**, which implies the status, work, or attitude of a slave, carries much stronger implications of utter abjectness or debasement and excessively laborious toil than *servile*; as, the *slavish* condition of the migrant workers; "*slavish* harnessed toil" (*Carlyle*); "Fear took hold on me from head to foot—*slavish* superstitious fear" (*Stevenson*). Both *servile* and *slavish* are used of unduly close dependence upon an original or model; as, "It is the business of art, to imitate nature, but not with a *servile* pencil" (*Goldsmith*); "Close [translation], but not so close as to be *servile*" (*Cowper*); a *slavish* devotion to tradition; a *slavish* adherence to rules is usually a sign of pedantry. **Menial** originally came close to *domestic* or *household* in meaning: in later and still current use, it applies to persons who are servants (chiefly household servants) or to their typical employments, offices, and attitude; in current use, it sometimes, but not invariably, connotes sordidness or degradation; as, "Her ladyship was of humble, I have heard even *menial*, station originally" (*Thackeray*); "The nurse . . . had a sort of unbroken look in her eye that was unbecoming in a *menial* position" (*H. G. Wells*); "Mark Twain . . . longed to be a cabin boy, to do any *menial* work about the decks in order to serve the majestic boats and their worthy sovereigns" (*Van W. Brooks*). **Obsequious** now less often than in the past applies to persons who are inferiors or to the words, actions, manners, or the like, by which they reveal their sense of inferiority in the presence of their superiors; as, "a duteous and knee-crooking knave . . . doting on his own *obsequious* bondage" (*Shak.*); "be civil, but not *obsequious*" (*Meredith*). In current use, it may imply a servile, often a sycophantic, attitude (as, "citizens of all classes who have to be *obsequious* to the rich and insolent to the poor"—*Shaw*; "On the second Saturday evening after he got his new position, the tobacconist, a rather *obsequious* man, called him Mr. Hall"—*S. Anderson*), or extreme attentiveness in service or to the niceties of service (as, an *obsequious* butler; "Following him out, with *obsequious* politeness"—*Dickens*).
Ana. Fawning, cringing, truckling, cowering (see **FAWN**):

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

*compliant, acquiescent, resigned: *mean, ignoble, abject.

Ant. Domineering; overbearing.

subside. *Abate, wane, ebb.

Ana. Dwindle, diminish, *decrease.

subsidiary. *Auxiliary, contributory, subservient, ancillary, adjutant, accessory.

subsidy. Grant, subvention, *appropriation.

subsist. Exist, live, *be.

subsistence. *Living, livelihood, sustenance, maintenance, support, keep, bread, bread and butter.

substantial. *Massive, massy, bulky, monumental.

Ant. Airy, ethereal.

substantialize. Substantiate, hypostatize, reify, *realize, actualize, embody, incarnate, materialize, externalize, objectify.

substantiate. 1 Substantialize, hypostatize, reify, *realize, actualize, embody, incarnate, materialize, externalize, objectify.

2 Verify, corroborate, *confirm, authenticate, validate.

Ana. *Prove, demonstrate, try, test.

substitute, n. 1 Surrogate, *resource, resort, expedient, shift, makeshift, stopgap.

Ana. *Device, contrivance, contraption: duplicate, copy, *reproduction.

2 Substitute, supply, locum tenens, alternate, understudy, double, stand-in, pinch hitter designate a person who performs or is prepared to perform the duties of another during the latter's absence or incapacitation. **Substitute** is the general term interchangeable with any of the others; specifically, in the United States, it is often applied to a teacher not appointed to a full-time position but held in reserve for service when needed. A **supply** is a person who actually substitutes for the regular teacher, preacher, or the like. A **locum tenens** is often a substitute for a professional man with a practice or clientele which needs to be cared for while he is away for a length of time: the term is used especially among physicians; it is also applied to clergymen. An **alternate** is one appointed or elected to take the place of another, as a delegate to a convention, a holder of a fellowship, or the like, if the latter should be incapacitated or disqualified when the appointment or election goes into effect. An **understudy** is a reserve actor or actress prepared to take the part of a regular actor or actress (especially of the legitimate theater) on short notice. A **double** is an anonymous actor or actress in motion pictures who substitutes in shots or scenes where the required action is too risky or difficult for the regular player, or whose voice or instrumentation is recorded on the sound track while the photographed player goes through the appropriate motions. A **stand-in** is not, as often thought, an understudy in motion pictures, for his (or her) chief duty is to substitute for a star during times of waiting for lights and camera to come into play. A **pinch hitter** (an American colloquialism derived from the baseball term for one sent in to bat to replace a weak hitter when a hit is particularly needed) is one who substitutes for another in a "pinch," or emergency; it usually connotes competence or ability to rise to the demands of the situation.

substratal, substrative. Underlying, basic, basal, *fundamental, radical.

subsume. *Include, comprehend, embrace, involve, imply, implicate.

subterfuge. Double-dealing, fraud, *deception, trickery, chicanery, chicanes.

Ana. Ruse, stratagem, maneuver, artifice, *trick: expedient, shift, makeshift (see RESOURCE): *ambiguity, equivocation, tergiversation.

subtile. *Subtle.

subtle. Also **subtile.** 1 *Logical, analytical.

Ana. Penetrating, piercing, probing (see ENTER): *deep, profound: abstruse, *recondite.

Ant. Dense (*in mind*): blunt (*in speech*).

2 **Subtle, subtile** are surviving variant spellings of a Middle English word derived from Old French and later corrected by its Modern French equivalent as influenced by the Latin form. Both still basically mean so fine or tenuous in quality or consistency as to be hard to perceive, detect, or recognize. The choice of spelling is often merely a matter of personal preference, but in current use **subtle** is by far the commoner form. When, as now rarely happens, **subtile** is thought of as distinguishable from **subtle**, it is often preferred in the larger sense of being hard to fix, or seize, or describe, or the like; as, "The falsehood is a little more **subtile**, the injury a little more indirect, than in ordinary cases of unfair trade" (*Justice Holmes*); "Indeed, the difference between what is right and what is harmful is very **subtle**" (*B. Russell*); "Generalizations like these elude proof because they are usually based on very **subtle** factors" (*Frankfurter*). It is commonly the preferred term when applied to the mind or a mental power or mental effort, then implying refinement of thought, insight, perception, or the like: often, it means highly analytic; as, a **subtle** mind; a **subtle** analysis; a **subtle** questioner; a **subtle** question; "How **subtile**, how delicate was the vision of the great painters" (*G. Bradford*). When the emphasis is upon craftiness or ingenuity or the like, both words are usable, but **subtle** is preferred occasionally when there is a suggestion of slyness or indirection; as, a **subtle** thief; a **subtle** form of blackmail; "It will be said that it is a very **subtle** and indirect action which I am thus prescribing for criticism" (*Arnold*); "a **subtle** diplomacy and wary tactics would be necessary" (*Bennett*). **Subtile**, on the other hand, in such discriminating use, often carries a connotation of artfulness or of a beguiling quality; as, "Subtile Litigation's pliant tongue" (*Burns*); "Hogarth, in one of his pieces of coarse yet **subtile** engraving, has presented a group of occupants of the pit of a theatre, sketched during the performance of some broad comedy or farce" (*E. Dowden*); "spontaneous variety which people who love English know to be one of its most **subtile** charms" (*B. Wendell*). **Subtle** is perhaps more often the preferred term when the implied opposition is to gross: then usually it is applied to something physical; as, a **subtle** odor; "he shows us that a 'matter' so infinitely **subtile**, and performing motions as inconceivably quick and fine as those which modern science postulates in her explanations, has no trace of grossness left" (*IV. James*).

subvention. Grant, *appropriation, subsidy.

subvert. *Overturn, overthrow, capsize, overset, upset.

Ana. *Ruin, wreck: *destroy, demolish: corrupt, pervert, deprave, *debase.

Ant. Uphold, sustain.

succeed. *Follow, ensue, supervene.

Ana. Displace, supplant, *replace, supersede.

Ant. Precede.

succession. Succession, progression, series, sequence, set, suit, suite, chain, train, string are here compared as meaning a number of things that come together, often to form a larger whole, in some order or in accordance with some plan. **Succession** always implies that the units (often things, sometimes persons) follow each other, especially but not invariably in order of time, or less often of place, and usually without break or interruption; as, a **succession** of disasters; a **succession** of mild winters; "the long and honourable **succession** of Christian Platon-

ists" (*Inge*). "The peculiar method of composition required by the long scrolls which form the masterpieces of this school was especially favourable to animated narrative and a varied *succession* of warlike scenes" (*Binyon*). "Winter...went out suddenly in a blinding storm of snow and a *succession* of quick, hot suns" (*M. Austin*). "Reality is a *succession* of concrete and particular situations" (*A. Huxley*). **Progression** (as here compared: see also **PROGRESS**, 2) applies to a *succession* in which there is movement and flow, and often change, so that a pattern is formed or an advance is indicated. The word is not as frequent in general as in technical use; as, history, especially as written, shows a *progression* rather than a *succession* of events. Its chief use is in mathematics and in music; in the former, it denotes a *succession* of quantities between every two of which there is a particular but an unvarying relation (as, an arithmetical *progression*; a geometrical *progression*); in the latter it denotes a *succession* of notes or of chords which constitute a melody or a harmony. **Series** applies to a number of things of similar or uniform character that stand in the same relation to each other or achieve the same end: often the term is indistinguishable from *succession*, but the separateness of the units is rather more stressed than the fact that they follow each other; as, a *series* of notes; a *series* of visits; "The long *series* of my woes" (*Pope*); a *series* of payments; a *series* of monographs on the origins of Romanticism; "It all came together in my understanding, as a *series* of experiments do when you begin to see where they are leading" (*Cather*). **Sequence** is more restricted in meaning than *series* for it implies either a closer connection between the things involved, such as a causal or logical connection, a numerical or chronological order, or a settled recurrence in the same order; as, the *sequence* of the seasons; rules governing the *sequence* of tenses; he was dealt a *sequence* of the ten highest hearts; his thoughts flow in logical *sequence*. "Ford, though intermittently, was able to manipulate *sequences* of words in blank verse in a manner which is quite his own" (*T. S. Eliot*). "Plotinus, for example, found the scale of spiritual values reflected in the world of events, not as a *sequence* of ascending values in time, but as degrees of truth and reality" (*Inge*). "The windows of Chartres have no *sequence*, and their charm is in variety, in individuality, and sometimes even in downright hostility to each other" (*H. Adams*). **Set** applies to a number of things similar in character and use that form a group that are used together or serve all the purposes necessary for a given end; consequently, the things that comprise a set usually either complement each other or are parts of a complete whole; as, a *set* of chairs; a *set* of china; a *set* of teeth. **Set** may also apply to a number of persons who form a closely related or unified group because of the same interests, the same social status, or the like (for this sense, see **SET**, 2). Less often, the term is used in reference to a group of intangible things which must be met or encountered as a whole or as a group; as, "Its author has to cope, not only with technical difficulties that attend every kind of imaginative writing, but also with the special *set* of difficulties that beset writers for the theatre" (*C. E. Montague*). **Suit** and **suite** apply to a set more often than to a *succession* but they are now used only in special collocations. Both terms originally applied, but only *suite* still applies, to a retinue, as of a ruler, or to a staff, as of a diplomat; now more generally *suit* applies to a group of things which are used together or form a set (as, a *suit* of clothes; a *suit* of armor; a deck of playing cards is composed of four *suits*, spades, clubs, hearts, and diamonds), and *suite* to a group of things which come

together in space (as, a *suite* of rooms [i.e., a group which provide necessary living quarters]; a *suite* of biological specimens [i.e., a graded series of specimens exhibiting variation in size, color, etc., within a species]). But one sometimes uses *suite* in preference to *set* in reference to furniture, or jewels, or minerals, or the like. The last three words of the group here compared are all used figuratively. **Chain** applies to a *succession* or series which forms a logical or causal sequence; as, a *chain* of arguments; a *chain* of effects; "It would be possible to trace a *succession*, though hardly an unbroken *chain*, from Tertullian and the Montanists to George Fox" (*Inge*); "the long *chain* of development which makes the very language of the English Bible what it is" (*Loues*); "The conclusion to which we have come, depends on a *chain* of principles which it was necessary to preserve unbroken" (*Ch. Just. Marshall*). **Train** applies to a number of persons, animals, or concrete things, or of effects, ideas, etc., that follow as attendants or as consequences (or, sometimes, as in the case of causes, that precede); as, she always has a *train* of admirers; "I invite your highness and your *train* To my poor cell" (*Shak.*); "a *train* of listeners followed him" (*Jowell*); a long *train* of causes; a *train* of ideas; "It was like the aimless talk of a man pursuing a secret *train* of thought far removed from the idle words we so often utter only to keep in touch with our fellow beings" (*Conrad*); "The August afternoon that the little *train* of silent people carried her out of her own door up to the family burying-ground" (*Deland*). **String** applies to a series or *succession* so uniform in character, size, quality, or the like, that its units are or seem to be strung on a thread: usually there is little implication of chronological, logical, or causal connection; as, a *string* of fish; a *string* of sausages; a *string* of victories; a *string* of boys filing through the trail. Oftentimes in sports the term is used of a group of players rated according to skill or proficiency; as, the first *string* of the football squad; a third-*string* player.

Ana. Consecutiveness, *successiveness* (see corresponding adjectives at **CONSECUTIVE**): articulation, concatenation, integration (see under **INTEGRATE**).

successive. *Consecutive, sequent, sequential, serial, discrete.

Ana. Continuous, *continual, constant, incessant: rotating, alternating (see **ROTATE**).

succinct. Terse, *concise, laconic, summary, pithy, compendious.

Ana. *Brief, short: compressed, condensed, contracted (see **CONTRACT**, v.): compact, *close: curt, brusque, blunt (see **BLUFF**).

Ant. Discursive.

succumb. *Yield, submit, capitulate, relent, defer, bow, cave in.

Ana. Surrender, abandon, resign, *relinquish.

succursal. *Subordinate, secondary, dependent, subject, tributary, collateral.

sudden. Hasty, *precipitate, headlong, abrupt, impetuous.

Ana. Quickened, hurried, speeded, accelerated (see **SPEED**, v.): *fast, rapid, swift, fleet, expeditious.

suds. *Foam, froth, spume, lather, scum, yeast.

sue. Pray, plead, petition. See under **PRAYER**.

Ana. Entreat, beseech, *beg, importune, implore, supplicate: solicit, request, *ask: *demand, claim, exact, require.

suet. *Adipose, marrow, tallow, lard.

suffer. 1 *Bear, endure, abide, tolerate, stand, brook.

Ana. Accept, *receive, admit: *yield, submit, bow.

2 Permit, allow, *let, leave.

A colon (:): groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

suffrance. *Permission, leave.

Ana. Toleration, endurance (see corresponding verbs at BEAR); acquiescence, resignation, compliance (see under COMPLIANT).

suffering. *Distress, misery, agony, dolor, passion.

Ana. Affliction, tribulation, *trial, visitation: adversity, *misfortune: *sorrow, grief, anguish, woe, heartache.

sufficient. Sufficient, enough, adequate, competent come into comparison when they mean exactly commensurate to a requirement or the requirements. That is **sufficient** or **enough** which perfectly satisfies a need or desire with nothing wanting or nothing in excess; as, **sufficient** money for a week's vacation; **enough** food for an army; **sufficient** leisure for travel; they never have **enough** work to keep them busy. That is **adequate** which measures up to a just, fair, or, sometimes, inexacting standard of what is requisite; as, **adequate** medical treatment; **adequate** acting; an **adequate** stimulus. "A man can force himself to acquire it [uninteresting knowledge] if he has an **adequate** motive for doing so" (*B. Russell*). That is **competent** which answers all the requirements or is adequately adapted to the end in view; as, **competent** evidence is evidence that meets the legal requirements for proof; a traveler should have at least a **competent** knowledge of French.

Ana. Ample, *plentiful, plenteous, abundant: satisfying, contenting (see SATISFY); fitting, suitable, meet, proper (see FIT).

Ant. Insufficient: deficient.

suffrage, n. **Suffrage, franchise, vote, ballot** come into comparison when they mean the right, privilege, or power of expressing one's choice or wish, as in an election or in the determination of policy. They are here considered only in their current uses and with reference exclusively to public or state affairs. **Suffrage** is the preferred term when the emphasis is upon the extent to which this privilege or power is enjoyed in a state or community or upon the kinds of citizens in a representative government who legally exercise this power; the word is frequently modified by a term indicating such extent or restriction; as, universal **suffrage**; the long-fought battle that brought about woman **suffrage** in England, the United States, and other countries; household **suffrage**, or the restriction of the right to vote to male householders, existed in Great Britain from 1867 to 1918. **Franchise** is preferred when the privilege or power is thought of as conferred by the government or as a statutory or legal right; thus, the **franchise** (not **suffrage**) was long withheld from British citizens who were not householders. "Yet some people hesitate to give women the **franchise** actually, a miserable privilege which any poor fool of a man may exercise" (*Jeffries*). **Vote** is the preferred term when the stress is on the power of each of the individuals on whom the franchise has been conferred to express his choice or opinion in the approved way, thereby aiding in the task of determining the will of the people; as, to have the **vote** (or a **vote**) and not to exercise it is to show oneself unworthy of one's citizenship; a class that has not the **vote** lacks the power to assert its rights; every American citizen has a like **vote** in choosing those who will make the laws. **Ballot**, which specifically implies some secret method of voting (originally by a ball dropped in a box or urn, later by a written or printed slip, now often by a machine which records choices) is the preferred word when the emphasis is on the power to vote freely, effectively, and without coercion, on the expressed will of the majority, or on the ethical use of the vote; as, to keep the **ballot** pure; the **ballot** is the citizens' means of getting the kind of government they want. "Among free men there can be no

successful appeal from the **ballot** to the bullet, and... they who take such appeal are sure to lose their case and pay the cost" (*Lincoln*).

suffuse. *Infuse, imbue, ingrain, inoculate, leaven.

Ana. *Introduce, interpose, interject: impregnate, penetrate, pervade (see PERMEATE).

suggest. 1 **Suggest, imply, hint, intimate, insinuate** agree in meaning to convey an idea or the thought of something by indirect means. **Suggest** emphasizes a putting into the mind as the result of an association of ideas, an awakening of a desire, an initiating of a train of thought, or the like; as, "in some curious way... his personality has **suggested** to me an entirely new manner in art, an entirely new mode of style" (*Wilde*); the success of "*Waverley*" **suggested** to Scott that he should devote himself to the writing of novels; the smell of smoke often **suggests** the possibility that the house is on fire. **Imply** (see also INCLUDE; INFER, 2) is in general opposed to **express**; the term stresses a suggesting, or putting into the mind, of an idea, a thought, or a meaning that is involved in a statement, a situation, a word, or the like, and forms a part, but not necessarily an obvious part, of its full signification or significance; as, "the philosophy of Nature which is **implied** in Chinese art" (*Byron*). "In the Greek view, to be a citizen of a state did not merely **imply** the payment of taxes, and the possession of a vote; it **implied** a direct and active co-operation in all the functions of civil and military life" (*G. L. Dickinson*). "Catullus... was wont to say that if his friends... wished to **imply** that he was a gentleman, they called him a Tiburtine" (*A. Reppier*). Very often the difference between **suggest** and **imply** is not clear, even in good usage, though **suggest** often connotes the necessity of delicate perception and **imply** the need of inference; as, "a competent portraitist knows how to **imply** the profile in the full face" (*A. Huxley*). "The 'sayings' of a community, its proverbs, are its characteristic comment upon life; they **imply** its history, **suggest** its attitude toward the world and its way of accepting life" (*Cather*). **Hint** implies the use of a remote or covert suggestion, often also connoting lack of candor, frankness, or straightforwardness; as, "Willing to wound, and yet afraid to strike, Just **hint** a fault, and hesitate dislike" (*Pope*); "Your father **hinted** that the school wasn't good enough for you with just Howard Merton and us girls" (*M. Austin*). **Intimate**, in modern usage, frequently implies a lighter or more elusive suggestion than **hint**, but it connotes delicacy of approach without lack of candor or frankness. "He said that he had to be prudent or might not be able to say all that he thought, thus **intimating** to his hearers that they might infer that he meant more" (*Justice Holmes*). **Insinuate**, as here compared (see INTRODUCE, 2), is to hint artfully or to convey an unpleasant suggestion in an underhanded manner; as, by his tone and expression, rather than by his words, he **insinuated** that the boy was not to be trusted; "Mrs. Jamieson came now to **insinuate** pretty plainly that she did not wish that the Cranford ladies should call upon her sister-in-law" (*Gaskell*).

Ana. Present, *offer: *infuse, imbue, inoculate, leaven: *advance, further: allude, *refer, advert: connote, *denote.

Ant. Express.

2 **Suggest, adumbrate, shadow** are synonymous when they are predicated of things that serve indirectly to represent another thing because they evoke a thought, an image, or a conception of it. One thing **suggests** another when it brings to mind something that is not objectively present, immediately apparent, or directly represented. That which **suggests** may be an outward sign which prompts an inference. "A certain well-to-do air

about the man *suggested* that he was not poor for his degree" (*Hardy*). It may be a symbol, which calls to mind that which it conventionally represents; as, the fleur-de-lis *suggests* the royal power of France. It may be a fragment which evokes an image of a whole or a concrete detail that gives an inkling of something abstract or incapable of representation. "The curve of the greyhound is not only the line of beauty, but a line which *suggests* motion" (*Jefferies*). It may be a word, a phrase, or the like, that calls up a train of associations and reveals more than it actually denotes. "Phrases flat and precise on the surface yet *suggesting* mystery below" (*Day Lewis*). "The business of words in prose is primarily to state; in poetry, not only to state, but also (and sometimes primarily) to *suggest*" (*Lowes*). One thing *adumbrates* another when the former very faintly or darkly suggests the latter. *Adumbrate*, in precise use, takes as its object only that which is intangible or beyond the reach of human comprehension or imagination. "Both in the vastness and the richness of the visible universe the invisible God is *adumbrated*" (*I. Taylor*). "If the Parthenon has value, it is only as an *adumbration* of something higher than itself... of the law of unity, measure, purpose" (*Babbitt*). One thing *shadows* (or *shadows forth*) another when the former represents the latter obscurely as by a symbol or other indirect means. Sometimes, the word comes close to *prefigure* or *foreshadow*, but as a rule, precedence is not implied. "To the Chinese painters this world of nature seemed a more effective way of *shadowing forth* the manifold moods of man than by representing human figures animated by these moods" (*Binyon*).

Suggest and *adumbrate* also come into comparison when they mean something less than to propose or propound. *Suggest* commonly implies tentativeness, but it is sometimes used to convey the impression of courteous deference to the wishes of others. "Father Duchene *suggested*... that the tribe had been exterminated... in their summer camp... across the river" (*Cather*). "I *suggest* that in the interest of clearness this should be called genesis, not evolution" (*Inge*). *Adumbrate* usually implies partial disclosure. "The less than second-rate colleagues... will shamble behind him in whatever proposals he *adumbrates* to his huge majority" (*Contemp. Review*).

Ant. Manifest.

suggestion. *Touch, suspicion, soupçon, tincture, tinge, shade, smack, spice, dash, vein, strain, streak.

suit. 1 Also **suite**. Set, sequence, *succession, progression, series, chain, train, string.

2 *Prayer, plea, petition, appeal.

Ana. Entreaty, importuning or importunity, imploring, supplication (see corresponding verbs at BEG): asking, requesting or request, soliciting or solicitation (see corresponding verbs at ASK).

3 **Suit, lawsuit, action, cause, case** are all terms used in law to designate proceedings instituted for the sake of demanding justice or enforcing a right. Though often used interchangeably in the sense of *lawsuit*, their differences in etymology and in earlier meanings to a certain extent affect their connotations and their applications. **Suit** stresses the attempt of a complainant through litigation to gain an end such as redress for a wrong, recognition of a claim, or the enforcement of law; it therefore may be used of the proceedings from the time of formal application through the prosecution; as, to win or lose a *suit*; to withdraw a *suit*; a *suit* in equity. **Lawsuit**, in strict use, adds to *suit* the implication of actual trial in court and oftentimes that of judicial decision; it may therefore refer to the entire proceedings; as, the *lawsuit* of Brown

versus Jones ended in victory for the defendant. **Action** comes very close to *suit*, but it is relatively colorless and throws the emphasis on actual proceedings rather than on petition; as, to bring an *action* in Circuit Court. In strict legal use, however, it is a proceeding in a court of law which is distinguished from a suit in equity and which has for its end the ascertainment of facts. If the complainant's diagnosis is found correct, then the legal remedy may be applied. **Cause**, more a literary than a legal term, emphasizes the grounds on which one institutes a suit; consequently, like *suit*, it implies the plaintiff's point of view, but it suggests even more strongly his sense of the justice of his demand. "The customary arts of the pleader, the appeal to the sympathies of the public... he rejected as unworthy of himself and of his *cause*" (*G. L. Dickinson*). **Case**, sometimes, has a looser reference to actual proceedings than any of the other terms in this group; then, like *cause*, it implies the grounds of action, but unlike it, from either or both points of view; as, the plaintiff has a good *case*; the defendant's attorney stated his *case*. However, *case* often is applied to the entire proceedings in a lawsuit including the judicial decision; as, one of the famous *cases* in legal history; a study of *cases*.

suitable. *Fit, meet, proper, appropriate, fitting, apt, happy, felicitous.

Ana. *Decorous, decent, seemly, proper, nice, comme il faut: advisable, *expedient, politic: *due, rightful, condign.

Ant. Unsuitable: unbecoming.

sulky. Surly, morose, glum, *sullen, crabbed, saturnine, dour, gloomy.

Ana. Cranky, cross, testy, touchy, techy (see IRASCIBLE): peevish, petulant, fretful, querulous, *irritable.

sullen. **Sullen, glum, morose, surly, sulky, crabbed, saturnine, dour, gloomy** agree in meaning governed by or manifesting, especially in one's aspect, a forbidding or disagreeable mood or disposition. One is *sullen* who is (often by disposition) gloomy, silent, and ill-humored and who refuses to be sociable, co-operative, or responsive; as, "Sullenness does not imply silence, but an ill-natured silence" (*Taller*); "In a morning I am always *sullen*" (*Byron*); "Sheridan was generally very dull in society, and sat *sullen* and silent" (*Scott*); "he made them go back to the fields immediately after supper and work until midnight. They went in *sullen* silence" (*S. Anderson*). One is *glum* who is dimly silent either because of low spirits or depressing circumstances; as, "as *glum* as an undertaker" (*Thackeray*); "He looked *glum* under scolding" (*G. Eliot*); "When everything smiles, should a beauty look *glum*?" (*Lover*). One is *morose* who is austere, sour or bitter and inclined to glumness; as, "a *morose* ill-conditioned, ill-natured person" (*South*); "should there be any cold-blooded and *morose* mortals who really dislike this book" (*Boswell*); "The *moroseness* of age and infirmity never touched him" (*Arnold*); "she has tempted him to drink again because he is so *morose* when he is sober that she cannot endure living with him" (*Shaw*). One is *surly* who adds churlishness or gruffness of speech and manner to sullenness or moroseness; as, "Mason replied instantly, in a *surly*, nasal tone" (*N. Nicholls*); "*surly* eyes brow-hidden" (*Keats*); "the somewhat *surly* goodness, the hard and unattractive pieties into which she cannot really enter" (*Pater*). One is *sulky* who manifests displeasure, discontent, or resentment by giving way childishly to a fit of peevish sullenness; as, "In his pleasantest and most gracious moods he looked like a *sulky* cockatoo" (*Gaskell*); "We were a precious pair: I *sulky* and obstinate, she changeable and hot-tempered" (*Shaw*). One is *crabbed* who is

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

actually or seemingly ill-natured, harsh, and especially, forbidding. The term often refers to one's aspect and manner of speaking and usually implies a sour or morose disposition or a settled crossness. "She is Ten times more gentle than her father's *crabbed*, And he's composed of harshness" (*Shak.*). "Divine Philosophy! Not harsh and *crabbed*, as dull fools suppose" (*Milton*). "It had never occurred to him that a captain's wife could be anything but a woman to be described as stout or thin, as jolly or *crabbed*, but always mature, and even, in comparison with his own years, frankly old" (*Conrad*). One is *saturnine* or *dour* who presents a heavy or forbidding aspect. *Saturnine*, however, often also implies gloomy taciturnity or bitterness of disposition; as, "a tall, dark, *saturnine* youth, sparing of speech" (*Lamb*); "Sheridan's humor, or rather wit, was always *saturnine*, and sometimes savage; he never laughed" (*Byron*); "*saturnine*, sour-blooded persons" (*G. Eliot*). *Dour* (a word taken from Scottish and North of England use), on the other hand, stresses severity, obstinacy, and grimness and does not always suggest real sourness or bitterness of disposition. "Though the Filipino seldom smiled, he was by no means *dour*. Kindliness was one of his most charming traits" (*V. Heiser*); "in this *dourest*, sorest Age man's eye has looked upon" (*Millay*). One is *gloomy* who is so depressed by events or conditions or so oppressed by melancholy that all signs of cheerfulness or optimism are obscured and one appears sullen, glum, or saturnine as well as low-spirited; as, to take a *gloomy* view of world conditions; when she is *gloomy* she makes everyone unhappy.

Ana. Lowering, glowering, frowning, scowling (see FROWN); spiteful, spiteful, malevolent, *malicious, malign: *cynical, pessimistic.

sum, n. *Sum*, *amount*, *aggregate*, *total*, *whole*, *number*, *quantity* come into comparison when they denote a result obtained by putting or taking together all in a given group or mass. *Sum* denotes the result of simple addition, usually of figures, sometimes of particulars; as, the *sum* of two and two: *amount* denotes the result reached by combining all the sums, or weights, or measures that form a whole; as, the *amount* of one's purchases; the *amount* of cotton raised in one year: *aggregate* denotes the result reached by counting distinct individuals or particulars in a group or collection; as, though his errors are individually insignificant, their *aggregate* is so large as to destroy confidence in his accuracy. "It is not true that a social force or effort is the mere *aggregate* of individual forces and efforts" (*J. A. Hobson*). *Total* and *whole* suggest the completeness or inclusiveness of the result; *total* often further implies magnitude in the result, and *whole*, unity in that which is summed up; as, a grand *total* of ten millions; the *whole* is the *sum* of its parts. *Number*, rather than *sum*, is now used for an aggregate of persons or things, to which (except in the case of things in bulk or mass) *amount* should not be applied; as, the *number* present; a fixed *amount* of cotton; but not, a small *amount* of potatoes. *Quantity* in general use is employed chiefly of things which are measured in bulk, even though they can be counted; as, a *quantity* of apples; but not (except colloquially), a *quantity* of soldiers. In technical and scientific use, *quantity* is not limited to an aggregate or bulk, but may be used of anything that is measurable in extent, duration, volume, magnitude, intensity, or value; as, spatial *quantity*; the *quantity* of a vowel; electrical *quantities*; the *quantity* of heat; *quantity* of work performed by a machine.

sum, v. *Add, total, figure, cast, foot.

Ana. Compute, *calculate, estimate, reckon: *count, enumerate, number.

summary, adj. Pithy, compendious, *concise, terse, succinct, laconic.

Ana. *Brief, short: *quick, prompt, ready, apt: compacted or compact, concentrated (see COMPACT, v.).

Ant. Circumstantial.

summative. *Cumulative, accumulative, additive.

summit. *Summit*, *peak*, *pinnacle*, *climax*, *apex*, *acme*, *culmination*, *meridian*, *zenith*, *apogee* in their figurative senses agree in meaning the highest point attained or attainable. To a great extent their distinguishing implications and their idiomatic applications are dependent on their primary meaning or, at least, on an earlier literal meaning. *Summit* and *peak* both denote the top of a hill or mountain, but only the latter suggests a range and implies reference to other levels. *Summit* is applied to that which represents the topmost level attainable by effort or to that which is the highest in its type or kind of attainable things; as, the plays of Shakespeare represent the *summit* of achievement in dramatic writing. "If love be the *summit* of all virtue, humility is the foundation" (*Pusey*). *Peak* usually implies a point rather than a level; as, the *peak* of enthusiasm. It is now frequently applied to something that is or can be represented in a graph; used absolutely, it designates the highest point reached in a course or during a stated or implied length of time; as, the *peak* of security prices was in 1929; the *peak* of production in automobiles is usually reached in the spring. *Pinnacle*, with its literal signification of a slender spire tapering to a point, is applied chiefly to that which has reached a dizzy, and, often, insecure height; as, he had reached the *pinnacle* of earthly fame. "A *pinnacle* of happiness" (*Van W. Brooks*). *Climax* has almost completely lost its literal significance of a ladder but it still implies a scale of ascending values. In its pertinent sense it is applied to that which is the highest point in force, in intensity, in interest, or in impressiveness in an ascending movement or series; as, the events of the day had for their *climax* the visit of the governor; writers of fiction generally aim to make the last scene an effective *climax*. The word often, but not necessarily, suggests an end, or close; as, reserve your strongest argument for the *climax* of your speech. *Apex* is the name given to the tip or top of a thing where all ascending lines converge in a sharp point; as, the *apex* of a cone. Figuratively, it is applied to that to which everything in a career, a system of thought, or the like, ascends and in which everything is concentrated. "The Vision of the One forms the *apex* of those systems of philosophical mysticism of which the scheme of Plotinus is the type" (*Inge*). "Commencing with the rudiments of grammar and terminating in the *apex* of the Doctorate" (*Pallison*). *Acme* (literally, a point) is almost invariably applied to that which exhibits the perfection or pure essence of a thing; as, Sir Philip Sidney was the *acme* of courtesy. "To say 'mither' instead of 'mother' seems to many the *acme* of romance" (*Wilde*). *Culmination*, *meridian*, *zenith*, and *apogee* derive their figurative senses from their astronomical meanings. *Culmination* denotes both the movement of a celestial body to its highest point in the heavens and the point so reached; *meridian*, in nontechnical use, designates the position of the sun at midday (in the old astronomy, its *culmination*); *zenith* denotes the point in the heavens directly overhead where the sun will be at its meridian; *apogee* names the point in the orbit of a celestial body when it is farthest from the earth. Hence, in figurative use, *culmination* is applied to that which is the outcome of a movement, a growth, a development, a progress, or the like, and which represents its natural end or attained objective. "This joint effort of church and crown... found its *culmination* under Louis

XIV, when the nobles were definitively conquered by the crown and the Reformation by the church" (*Brownell*). Oftentimes, especially in modern usage, *culmination* suggests a coming to a head, or issue, rather than to a high point. "The Reformation... was... the *culmination* of a long agitation for national independence in religious matters" (*Inge*). *Meridian* is applied to the prime, or period of fullest development or vigor, in the life of a person, a race, an institution, or the like; it not only connotes prior ascent but ensuing decline. "I have touch'd the highest point of all my greatness: And, from that full *meridian* of my glory, I haste now to my setting" (*Shak.*). *Zenith* adds to *meridian* the implications of luster and distinction; as, he had reached the *zenith* of his powers. "The very magnitude of the offence lends to it [regicide] a... terrible distinction. It is the *zenith*... of the headman's history" (*A. Repplier*). *Apogee*, like *meridian*, is applied to the highest point in a course, a career, a movement; but, unlike *meridian*, it seldom connotes being at the prime or height of glory; as, the French Revolution reached its *apogee* in the Reign of Terror.

summon or summons, v. *Summon* (or *summons*), **call, cite, convoke, convene, muster** come into comparison when they mean to demand the presence of a person or persons or, by extension, of things. *Summon* (or its highly colloquial equivalent *summons*) implies the exercise of authority or of power; it therefore usually suggests a mandate, an imperative order or bidding, urgency, or the like; as, the king *summoned* his privy councilors to the palace; to *summon* one's secretary; to *summon* a person to appear in court. "I *summon* your grace to his majesty's parliament" (*Shak.*). "She could *summon* tears and delights as one *summons* servants" (*H. G. Wells*). **Call** (often followed by *up, forth*, and the like) is often used in place of *summon*, especially when less formality is implied or the imperativeness of the bidding is not stressed, or when actual shouting is suggested, or the like. It is, however, in general, a more ordinary or more colloquial term than *summon*; as, to *call* men to arms; to *call* witnesses to court; to *call* a servant; the president *called* congress together for an extra session. Often, however, there is a suggestion of an impulsion of God, of Nature, of necessity, or the like; as, the young man felt that he was *called* to the ministry; he felt *called* upon to speak. **Cite** (see also *ADDUCE*) in earliest use implied a summons to court, either as a principal or as a witness; this sense still prevails (as, he was *cited* for contempt of court), but in England *cite* usually suggests a summoning to an ecclesiastical court. "He hath *cited* me to Rome, for heresy" (*Tennyson*). The word, however, is also found in the sense of *summon*, especially to action. "I think it *cites* us, brother, to the field" (*Shak.*). **Convoke** implies a summons to assemble, especially for legislative or deliberative purposes; as, the king *convoked* parliament. "The Italian government *convoked* great congresses of physicists and engineers" (*Karl K. Darrow*). **Convene** is related to *convoke* as *call* is to *summon*; it is weaker in its suggestions of the exercise of authority and of imperativeness, but otherwise it is often not distinguishable; as, to *convene* the students in the school auditorium; "The Senate was *convened* by the tribunes" (*Froude*). **Muster** implies the summoning of an army or other body of troops or a ship's company for military action, inspection, parade, exercise, or the like. In extended use, it implies the assembling of a number of things that form a collection, a group, or the like, in order that they may be exhibited, displayed, or utilized as a whole. "A daw that had a mind to be sparkish, trick'd himself up with all the gay-feathers he could *muster* together" (*L'Estrange*). "A procession of twenty

coaches belonging to public functionaries was *mustered*" (*Macaulay*). *Muster* is used in place of *summon* with *courage, strength*, and the like, as the object, especially when the context implies the previous dissipation of this courage, strength, etc.; as, "*mustering* courage to come to her side" (*G. Eliot*); "At length you have *mustered* heart to visit the old place" (*Dickens*).

Ana. *Command, order, bid, enjoin: evoke, elicit, *educe.

sumptuous. *Luxurious, opulent.

Ana. Magnificent, stately, majestic, *grand: *splendid, resplendent, gorgeous, superb: *showy, ostentatious, pretentious: lavish, prodigal (see *PROFUSE*).

Sunday. *Sunday, Sabbath, the Lord's Day* are synonymous terms only in general Christian use. Strictly, *Sunday* is the name of the first day of the week, *Sabbath* is the name of the seventh day of the week in the Jewish calendar, or of a period extending from Friday evening to Saturday evening. This is the time in Jewish and some Christian use that is regarded as the seventh day sanctified by the Creator (*Genesis* ii. 1-3) and enjoined as a day of rest and worship in the fourth (or, in Roman Catholic versions, the third) Commandment. The change of this day to Sunday after Christianity was established was respected by the new churches after the Reformation but *Sabbath* was more and more often employed in reference to Sunday. This use continues especially among evangelical sects of Protestants. **The Lord's Day**, which is a Christian term in use long before the Reformation, always applies to Sunday regarded as the day on which the resurrection of Christ occurred (*Luke* xxiv. 1-6, and *Revelation* i. 10) and as the accepted day of rest and worship. Its use in this sense continued after the Reformation and was adopted by all denominations of Christians that keep Sunday as the Sabbath.

sunder, v. Sever, divide, part, *separate, divorce.

Ana. Rend, rive, cleave, split (see *TEAR*).

Ant. Link.

sunderer. *Vagabond, vagrant, tramp, hobo, truant, bum, stiff, swagman.

sundry. *Many, several, various, divers, numerous, manifold, multifold, multifarious.

Ana. *Different, disparate, diverse, divergent: *distinct, separate: individual, distinctive, peculiar (see *CHARACTERISTIC*).

superabound. *Team, abound, swarm, overflow.

superadd. Annex, append, subjoin, *add.

Ana. *Fasten, attach, affix.

superannuated. *Aged, old, elderly.

superb. *Splendid, resplendent, glorious, gorgeous, sublime.

Ana. Superlative, transcendent, surpassing, *supreme: sumptuous, *luxurious, opulent: imposing, stately, majestic, magnificent, *grand.

supercilious. Disdainful, overbearing, arrogant, haughty, *proud, lordly, insolent.

Ana. Vain, vainglorious (see under *PRIDE*): contemptuous, scornful (see corresponding nouns under *DESPISE*, v.).

supererogatory. *Supererogatory, gratuitous, uncalled-for, wanton* are not close synonyms, but they come into comparison when they mean given or done freely and without compulsion or provocation or, in derogatory use, without warrant or justification. *Supererogatory* in its strict sense implies a giving above or beyond that which is required or is laid down in the laws or rules; originally, the term referred to acts (such as works of mercy, sacrifices, prayers, etc.) of a member of the Christian church, but later to acts (such as services, attentions, etc.) of a subject, a citizen, an employee, or the like: the word

usually suggests a devotion or loyalty that is not satisfied merely with the doing of that which is required, and that finds expression in the performance of additional labors, works, or the like, beyond those expected or demanded; as, *supererogatory* fasts; the *supererogatory* services of representatives in Congress. Sometimes, especially in current use, the term is definitely depreciative in that it does not imply a giving freely over and above that which is required but a giving or adding of something that is not needed and is therefore more or less an embarrassment or encumbrance; as, *supererogatory* apologies; *supererogatory* attentions. *Gratuitous* (etymologically, pleasing) in the somewhat earlier of its leading senses implies a giving voluntarily without expectation of recompense, reward, or compensation; as, many a physician gives his services *gratuitously* to the poor; the *gratuitous* education provided by the public schools of the United States; the college gives some *gratuitous* concerts for the enjoyment of the townspeople. In its other and slightly later sense, the term stresses a giving of something disagreeable, offensive, troublesome, or painful, without provocation; as, a *gratuitous* insult; "a *gratuitous* . . . imposition of labor" (*Horace Mann*). In slightly looser use, *gratuitous* means little more than *uncalled-for*, which suggests not only a lack of provocation but a lack of need and, therefore, often implies impertinence or absurdity, often logical absurdity; as, "the *gratuitous* assumption that the new must surpass the old" (*Grandgent*); *uncalled-for* interference; *uncalled-for* advice. *Wanton* (as here considered: see also *PLAYFUL*, *LICENTIOUS*) also implies want of provocation, but it stresses the absence of any motive except reckless sportiveness or arbitrariness or pure malice; as, a *wanton* attack; *wanton* destruction; "The *wanton* horrors of her bloody play" (*Shelley*); "believing the deed (the burning of a haystack) to have been unprovoked and *wanton*" (*Meredith*); "Tyranny consists in the *wanton* and improper use of strength by the stronger" (*Bryce*).

Ana. *Free, independent, autonomous: *excessive, extreme, exorbitant: *superfluous, supernumerary, extra, spare.

superficial. *Superficial*, *shallow*, *cursory*, *uncritical* are not all close synonyms but they come into comparison when they mean lacking in depth, solidity, and comprehensiveness. *Superficial*, in the extended senses in which it is here considered, applies chiefly to persons, their minds, their emotions, their attainments, their utterances or writings, and the like, but it is also applicable to things such as circumstances, factors, conditions, qualities, or the like. Despite great variations in the specific meanings in some of these applications, the term usually implies a taking in of or a concern with surface aspects or obvious features, or an avoidance of all but these aspects or features; as, he had time for no more than a *superficial* consideration of the situation; there are only *superficial* likenesses between these books; a *superficial* treatment of a disease; the war effected merely a *superficial* change in human ideals. "The tendency . . . of prose drama is to emphasize the ephemeral and *superficial*; if we want to get at the permanent and universal we tend to express ourselves in verse" (*T. S. Eliot*). Often, however, the term is definitely depreciative and further implies some quality such as pretense, ostentation, slightness, lack of thoroughness, insignificance, insincerity, and the like; as, *superficial* people; the lecture was very *superficial*; "Our political theory is hopelessly sophomoric and *superficial*" (*Mencken*); "these judgments, how *superficial*, how fragmentary they are!" (*V. Woolf*). *Shallow*, both in its literal and extended senses, implies a lack of depth (as,

a *shallow* stream; *shallow* breathing); when applied to persons, their knowledge, their reasoning, or their emotions, it is almost invariably derogatory and differs little from *superficial* used derogatorily except in its freedom from implication of outward show or of apparent, but not genuine, significance; as, he said that the graduates of a given school were *shallow* and frivolous; "Do you suppose this eternal *shallow* cynicism of yours has any real bearing on a nature like hers?" (*Shaw*); "When the ideas become more automatic . . . we begin to suspect . . . that they spring from a *shallow* source" (*T. S. Eliot*). *Cursory*, which literally means hasty or hurried, in the extended sense here considered stresses a lack of thoroughness or of care for details rather than a concentration on the obvious: it often also suggests haste, casualness, skipping, or the like; as, even from a *cursory* reading of the book, I judge that it is a very fine piece of work; "[Mrs. Thrale] stands the test of the closest examination, as well as and as much to her honor as she does a mere *cursory* view" (*Burney*); "The coffeehouse must not be dismissed with a *cursory* mention" (*Macaulay*). *Uncritical* implies a superficiality or shallowness unbefitting to a critic or sound judge, not only of literature or the arts but of any data, statements, matters, events, and the like, which must be evaluated, related, estimated, or otherwise judged; as, an *uncritical* judgment of a book; her pretentious singing satisfied only the *uncritical* persons in her audience; "Statements . . . readily accepted by the *uncritical* who believe all they see in print" (*H. Spencer*); "I would not have you so *uncritical* as to blame the Church or its clergy for what happened" (*Quiller-Couch*).

Ant. Radical (sense 1).

superfluity. *Excess, surplus, surplussage, overplus.

Ana. Superabounding or superabundant, overflowing or overflow, teeming, swarming (see *TEEM*): exuberance, profusion, lavishness, prodigality (see corresponding adjectives at *PROFUSE*).

superfluous. *Superfluous*, *surplus*, *supernumerary*, *extra*, *spare* come into comparison when they mean above or beyond what is needed or is indispensable. *Superfluous* strictly implies a superabundance or excess that requires elimination or pruning; as, to cut off all the *superfluous* shoots of a shrub; if you prefer a few large flowers, pinch off all *superfluous* buds; "artists . . . not tempted, as are those who work direct from nature, to transcribe *superfluous* detail because it happens to be before their eyes" (*Binyon*). Sometimes, however, the term either loses its implication of richness of supply or places no emphasis on that idea, and comes to mean little more than *nonessential* or *dispensable*, if circumstances require its sacrifice (as, "art, music, literature, and the like—in short . . . *superfluous* things"—*S. P. Sherman*), or *unnecessary*, *useless*, or *needless* (as, "[Hamlet] is possibly the one [play] on which Shakespeare spent most pains; and yet he has left in it *superfluous* and inconsistent scenes"—*T. S. Eliot*; "Authority, like a good educator, ought to aim at making itself *superfluous*"—*Inge*). *Surplus* applies to what remains over when that which is needed or required for all present purposes has been used; as, there will be no *surplus* wheat this year; each year the *surplus* funds of the institution were invested in government bonds; he still had *surplus* time for which he must find a use, and *surplus* energy which demanded an outlet. *Supernumerary* literally implies an addition to the number that is usual, prescribed, typical, or the like: the term does not necessarily suggest that there is no need or no use for that which exceeds the regular or expected number, though in reference to a physical condition it often implies a

departure from the normal; as, a *supernumerary* tooth; a *supernumerary* member of a cast (i.e., one used for mob scenes, etc., and called a *supernumerary*, often shortened in slang use to *super* or *supe*); *supernumerary* ribs; *supernumerary* officers are usually needed by regiments engaged in active warfare. *Extra* is often used colloquially in place of *supernumerary* (as, she always kept an *extra* servant; to buy a few *extra* Christmas presents in case someone has been forgotten), but it may imply not merely an addition in number but in amount (as, to ask *extra* work of each employee during the vacation period), or in quality (as, *extra* beef; *extra* wheat), or in price (as, there is an *extra* charge for coffee). *Spare* is often used in place of *surplus*, but it carries a stronger suggestion of being held in reserve for use, often a special use (as, a *spare* suit of clothes; the *spare* room is the guest room; to carry a *spare* tire for an automobile) or of not having any demands on it for a particular use (as, he never has any *spare* cash; she said she would write the letter when she had *spare* time), or of being easily spared (as, have you a *spare* cigarette on you?).

Ana. *Supererogatory, gratuitous, uncalled-for, wanton: *profuse, lavish, prodigal, exuberant: *excessive, inordinate, extravagant, extreme.

superhuman. Preternatural, miraculous, supranatural, *supernatural.

Ana. Potent, puissant, *powerful, forcible, forceful: herculean, Antaeus, Cyclopean, titanic, gigantic (see ENORMOUS).

superimpose. *Overlay, superpose, appliqué.

superlative, adj. *Supreme, transcendent, surpassing, peerless, incomparable, pre-eminent, banner.

Ana. *Consummate, finished, accomplished: *splendid, glorious, sublime, superb.

supernatural. Supernatural, supranatural, preternatural, miraculous, superhuman are not, strictly speaking, synonymous terms, but many persons are confused as to the limits of their meanings. *Supernatural* (literally, above the natural) applies to that which belongs to an order of existence transcending that of nature or of the visible and observable universe. The term usually connotes spiritual as opposed to material being and often suggests a divine existence or origin or influence or a participation in some of the attributes of divinity; as, *supernatural* beings; the *supernatural* character of the soul; *supernatural* forces; to attribute one's recovery from a usually mortal illness to a *supernatural* power. *Supranatural* (etymologically, higher than the natural) is a somewhat equivocal term used in place of *supernatural* by some writers and speakers when they wish to describe that which is not apparent to the senses yet seems to be supported by observable effects or to proceed from observable causes. In such use, the word commonly implies a realm of knowledge not yet penetrated by the human mind, rather than another and higher order of existence; as, *supranatural* phenomena such as telepathy and thought transference; parapsychology deals with the *supranatural*. *Preternatural* (etymologically, beyond the range or compass of nature) applies chiefly to that which is not regarded as natural or as in the regular course of nature. Usually, the term means abnormal or strange and inexplicable to an extreme or startling degree; as, "A degree of acumen which appears to the ordinary apprehension *preternatural*" (Poe); "the *preternatural* prowess of the hero" (Emerson); "the nimble and versatile Athenian wits trained to *preternatural* acuteness by the debates of the law courts and the Assembly" (G. L. Dickinson). "I could not see a green parrot sitting silent and motionless amidst the green foliage as they could; I had not their *preternatural* keenness of sight" (Hudson).

Miraculous (etymologically, marvelous or exceedingly wondrous) applies particularly to events or effects in the physical world that are out of the ordinary course of things or that deviate from the known laws of nature. This sense still prevails in ordinary use; as, "The plant, his hope, which he had deemed dead, blossomed with *miraculous* suddenness" (Bennett); "For the last two years he was like a flame burning on in *miraculous* disregard of the fact that there was no more fuel to justify its existence" (A. Huxley). In its also common religious use, *miraculous* applies to that which is regarded or accepted as performed by divine power or happening as a result of divine intervention; as, the *miraculous* power of Jesus; the *miraculous* transformation of water into wine at the wedding in Cana (John ii. 1-11); the *miraculous* cures attributed to a saint. "The *miraculous* interpositions by which it [Christianity] was attested and carried on" (Bp. Butler). *Superhuman* (literally, above or beyond human existence or power) is sometimes loosely used in the sense of *supernatural*. However, even in this use it does not carry as clear an implication of divinity as *supernatural* does and may therefore imply angelic, demonic, or similar existence or power; as, "superstitious belief in *superhuman* agency" (J. B. Mozley). But *superhuman* is commonly used in a hyperbolic sense meaning exceeding that which is human or usual to human beings. It therefore often means little more than *herculean*, *extraordinary*, or the like; as, *superhuman* efforts; *superhuman* energy; a *superhuman* feat. "A child of three years old is a better model for a child one year old, both because the things it does are more what the younger child would wish to do, and because its powers do not seem so *superhuman*" (B. Russell). **Ana.** Divine, spiritual, sacred, *holy, blessed: *infinite, eternal, boundless, illimitable.

supernumerary. Surplus, extra, spare, *superfluous.

superpose. Superimpose, *overlay, appliqué.

supersede. *Replace, displace, supplant.

Ana. Repudiate, spurn, reject (see DECLINE, v.): *abandon, desert, forsake: stay, suspend, intermit (see DEFER).

supervene. *Follow, succeed, ensue.

Ana. *Add, append, annex, subjoin, superadd: combine, *unite, conjoin, co-operate.

supervient. *Adventitious, adventive, advenient.

supervision. *Oversight, surveillance.

Ana. Controlling or control, management, direction, conducting or conduct (see corresponding verbs at CONDUCT): leading, guiding (see GUIDE).

supine. 1 *Prone, prostrate, recumbent, reclining, couchant, dormant.

2 *Inactive, inert, passive, idle.

Ana. Slothful, *lazy, indolent, fainéant: *lethargic, sluggish, torpid, stuporous: apathetic, *impassive, phlegmatic.

Ant. Alert.

supplant. Displace, *replace, supersede.

Ana. *Eject, oust, dismiss, expel: uproot, eradicate, extirpate, *exterminate.

supple. 1 Flexible, resilient, *elastic, springy.

Ana. Pliable, pliant, *plastic: *soft, gentle, mild.

Ant. Stiff.

2 **Supple, limber, lithe, lithesome, lissome (or liassom)** come into comparison especially when applied to bodily movements and mean showing freedom and ease in bending and twisting. **Supple** implies great flexibility of muscles and joints, perfect muscular co-ordination, and rapidity yet smoothness in change of posture or movement; as, the light *supple* spring of a cat from its hiding place. "The Bishop stood watching the flowing, *supple*

movements of their arms and shoulders, the sure rhythm of their tiny moccasined feet" (*Cather*). **Limber** also implies great flexibility of muscles and joints, and the power to move quickly or easily, but it carries no clear suggestion of grace or of muscular co-ordination; as, *limber* country boys jumping from rock to rock; showing his *limberness* in a series of somersaults; the *limber* fingers of a pianist. "I could skip Out of my skin, now, like a subtile snake, I am so *limber*" (*B. Jonson*). **Lithe**, once more often used of things that may be gently or softly curved or twisted (as, a *lithe* rope; a *lithe* twig), is now applied chiefly to persons or animals that are slender, supple, nimble, and usually graceful in movements; as, a *lithe* dancer; "They climbed the wall—your lady must be *lithe*" (*Browning*). "We could not use the term [*buxom*] as Milton did, in its original sense of 'bow-some'—that is, '*lithe*, graceful, bending'" (*J. R. Lowell*). **Lithesome** and **lissome** are now chiefly literary or poetical for *lithe*; the former, however, often suggests agility and vigor; the latter, sinuous grace. "The warlike carriage of the men, and their strong, *lithesome*, resolute step" (*Kinglake*). "A robe Of samite without price... clung about her *lissome* limbs" (*Tennyson*).

Ana. Graceful, elegant (see corresponding nouns at ELEGANCE); *easy, smooth, effortless, facile.

supplement, *n.* 1 *Complement.

2 *Appendix, addendum, addenda.

supplement, *v.* Complement. See under COMPLEMENT, *n.*

Ana. *Improve, better: heighten, enhance, aggravate, *intensify.

supplicate. Implore, beseech, entreat, importune, *beg, adjure, conjure.

Ana. Pray, sue, plead, appeal, petition (see under PRAYER); *ask, request, solicit.

supply, *n.* *Substitute, locum tenens, alternate, understudy, pinch hitter, double, stand-in.

supply, *adj.* *Temporary, provisional, ad interim, acting.

support, *v.* **Support, uphold, advocate, back, champion**, and their corresponding agent nouns, **supporter, upholder, advocate, backer, champion**, are comparable when they mean to favor (or one who favors) actively and in some concrete manner a person or thing that meets opposition. **Support** is comparatively colorless. One *supports* a candidate for election whether one merely votes for him or takes a leading part in his campaign; one *supports* a cause whether one merely announces one's stand in favor of it or contributes money and time to furthering its interests. **Uphold** in this extended sense retains its etymological implication of keeping erect, or from falling or breaking down; it is, therefore, commonly but not invariably used in reference to that which exists but is attacked or challenged. "We're fighting... partly to *uphold* decent international principles" (*R. Macaulay*). "Those who *uphold* the ideal of pure poetry" (*Day Lewis*). "A stout *upholder* of tradition and continuity" (*T. S. Eliot*). **Advocate** always implies vocal support, either in speeches or in writings; often, but not necessarily, it connotes urging or pleading. "So now you know... what Socialism is, and why it is *advocated* so widely" (*Shaw*). "The *advocates* of the old classical education have been gallantly fighting a losing battle" (*Inge*). "A courageous and devoted *advocacy* of causes in which the spirit of our religion calls for strenuous opposition to the current principles and practice of the world" (*Inge*). **Back** often implies strong support from the rear to be used whenever assistance is needed to prevent the failure of a person or of his ventures or efforts. Sometimes, it connotes reserve forces or the use of force: sometimes, it implies money reserves or the promise of financial assistance; as, his father said he would *back* him in business. "States, large

and small, with... their very practical traders pushing for foreign markets, and their navies and armies to *back* the traders and annex these markets" (*Shaw*). Often, however, *back* derives its implications from its use in betting (esp. in "to *back* a horse") and suggests a willingness to put money on a person's or thing's chance for success. "I *back* you to hold your own against them all" (*E. Wharton*). **Champion** always in discriminating use implies public defense of a person or thing believed to be unjustly attacked or too weak to advocate its own cause. It, therefore, often connotes distinction or gallantry in the one who champions. "Who... *championed* every cause I called my heart's cause, loving as I loved, Hating my hates, spurned falsehood, *championed* truth" (*Browning*).

Ana. *Approve, endorse, sanction: espouse, embrace, *adopt: *defend, protect, shield.

support, *n.* Maintenance, sustenance, *living, livelihood, subsistence, keep, bread.

supporter. Upholder, advocate, backer, champion. See under SUPPORT, *v.*

Ant. Adversary: antagonist.

supposed. **Supposed, supposititious, suppositious, reputed, putative, conjectural, hypothetical** come into comparison as meaning believed or assumed to be true, real, or in accordance with the facts. Both **supposed** and **supposititious** imply that the person or thing so described is assumed to be actual, real, or genuine in the relation indicated. **Supposed**, however, usually implies more grounds for that belief than **supposititious** and it always suggests uncertainty, lack of assurance, or possibility of error; as, Napoleon's *supposed* aversion to cats; "various real and *supposed* meanings" (*Babbitt*); "nobody would have dared to take a seat in that block who had not attained to some eminence, real or *supposed*, among his fellows" (*Arch. Marshall*). **Supposititious**, on the other hand, properly implies spuriousness that is the result of fraud or invention; as, the *supposititious* heir to an estate; "Catherine had read too much not to be perfectly aware of the ease with which a waxen figure might be introduced, and a *supposititious* funeral carried on" (*Austen*). **Suppositious** is less often used in place of **supposititious** than formerly, but it still occurs when a writer or speaker wishes to imply that the belief has the support only of a theory, a postulate, or a hypothesis, and otherwise has no ground in fact. "That on such a hypothetical and *suppositious* basis, the supreme sacrifice of abdication and potential exile of the sovereign should be demanded, finds no support whatsoever in the British constitution" (*Winston S. Churchill*). **Reputed** and **putative** both imply a basis in tradition or in popular belief. The former is now the usual word, the latter being reserved for a few legal expressions; as, a *reputed* millionaire; the *putative* father of a child; the *reputed* owner of an estate; a *putative* marriage (i.e., a marriage which was performed in good faith but is not valid because of canonical or legal impediments). "I have even been in the Musée at Agen, where there are pictures *reputed* to be by Goya" (*Lucas*). "Congleton butterscotch, *reputed* a harmless sweetmeat" (*Bennett*). **Conjectural** implies inference from incomplete or defective evidence. That which is so described is offered as a possibility or likelihood but not as a fact; as, the *conjectural* etymology of a word; *conjectural* emendations in a faulty text; the *conjectural* causes of a depression. **Hypothetical** describes someone or something (a principle, a situation, a question, etc.) that is invented or put forward as possibly true or as likely to be true in the main if not in detail, or as the tentative basis for continuing an argument, an investigation, or the like; as, a *hypothetical* explanation

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

of nebulae; the cross-examining lawyer posed a *hypothetical* question to the expert witness in order to get his opinion concerning the inference to be drawn from facts not yet fully established. "I tried to expound such sentiments to my French visitor—who was a real, flesh-and-blood visitor, and not, like most of his kind, a *hypothetical* foreigner invented to point a moral" (*Grand-gent*). "When Nature produces a thunderstorm she is doing on a very great scale what any of us may do on a very small one by rubbing our feet on the carpet in winter weather, and what my *hypothetical* Greek child was doing on an even smaller one when he rubbed the amber with the cloth" (*Karl K. Darrow*).

Ana. Assumed, presumed, presupposed, postulated (see PRESUPPOSE): tentative, *provisional: *doubtful, dubious, questionable: *theoretical, speculative, academic. **Ant.** Certain.

supposititious, suppositious. *Supposed, reputed, putative, conjectural, hypothetical.

Ana. Pretended, simulated, feigned, shammed, counterfeited or counterfeit (see ASSUME): questionable, dubious, *doubtful: factitious, *artificial.

suppress. **Suppress, repress** are general terms which mean to hold back, by the use of more or less force, someone or something that seeks expression, activity, or other outlet. **Suppress** carries a strong implication of putting down or keeping back completely. It usually implies the exercise of great or oppressive power or even of violence. It often is a synonym of *overpower, crush, abolish, destroy, eliminate, stifle*, and like words, but in each case it often suggests the prompt use of effective methods; as, to *suppress* an insurrection; "before gaming was *suppressed*" (*Goldsmith*); "ungovernable passions. . . *suppressed* by the very same means which keep the rest of us in order" (*Conrad*); "I . . . assume that one purpose of the purchase was to *suppress* competition between the two roads" (*Justice Holmes*); "the bishop was purple with *suppressed* wrath" (*S. P. Sherman*). **Repress**, on the other hand, implies little more than a checking, or restraining, sometimes by an external force, sometimes by the power of the will or mind. It often suggests that the thing so held back may break out again or in a different way and so comes close to *inhibit, bridle, curb*, and the like; as, to *repress* one's curiosity; to *repress* one's desire to weep; the parents have *repressed* his interest in birds and butterflies by not allowing him to give vent to his enthusiasm. "His breathing was a little quickened; but he *repressed* all other signs of agitation" (*Dickens*). "The tendencies which Lycurgus had endeavoured to *repress* by external regulation reasserted themselves in his despite" (*G. L. Dickinson*). "When an affection as intense as that is balked in its direct path and *repressed* it usually, as we know, finds an indirect outlet" (*Van W. Brooks*). In psychology, *suppress* is commonly used with reference to desires, instincts, emotions, and the like, which are consciously and forcibly inhibited by the mind from seeking expression or overt activity: *repress* usually suggests an unconscious or subconscious process by which a desire or an impulse that is regarded as unacceptable because of one's religious, moral, or social training is inhibited by a refusal to recognize it or to permit consideration of it, and so is left to operate in the unconscious.

Ana. *Arrest, check, interrupt: *extinguish, *abolish, annihilate: *forbid, prohibit, ban: subdue, overcome, surmount, *conquer.*

supernatural. *Supernatural, miraculous, preternatural, superhuman.

supremacy. **Supremacy, ascendancy (or ascendancy)** are sometimes confused when they denote the position

of being first, as in rank, power, influence. **Supremacy** implies superiority over all others, as in numbers, in quality, in efficiency, or in prestige; thus, a country that seeks naval *supremacy* directs its efforts to the enlarging and strengthening of its navy until no other country can compete with it; that dramatist holds *supremacy* over all other dramatists who is universally regarded as the best and the greatest. "In the Sahara, the automobile has begun to challenge the *supremacy* of the camel" (*A. Huxley*). "Perhaps each great race has just strength enough for one period of literary *supremacy*" (*T. S. Eliot*). **Ascendancy** may or may not imply supremacy, but it always involves the idea of domination or of autocratic power; thus, a country may lose its *ascendancy* over its colonies after it has been deprived of its military and naval *supremacy*; an idea has *ascendancy* over one's imagination when it has the latter completely under its sway. "The whole system of oppression and cruelty by which dominant castes seek to retain their *ascendancy*" (*B. Russell*). "The *ascendancy* which Spain then had in Europe . . . had been gained by unquestioned superiority in all the arts of policy and of war" (*Macaulay*).

Ana. Pre-eminence, transcendence, superlativeness, peerlessness, incomparability (see corresponding adjectives at SUPREME): *power, authority, dominion, control, sway.

supreme, adj. **Supreme, superlative, transcendent, surpassing, pre-eminent, peerless, incomparable, banner** come into comparison when they mean highest in any scale of values. All of these words are capable of being employed with precision, but all of them are frequently used rhetorically or bombastically with resulting loss in definiteness. It is the precise signification of each that is emphasized in this discrimination. **Supreme** is applicable to that which is not only the highest in rank, power, quality, or the like, but has no equals in that status, all others of the same class or kind being inferior in varying degrees; as, the *Supreme* Being; the *Supreme* Court of the United States; Shakespeare is generally regarded as the *supreme* dramatic poet; the *supreme* power in a nation. **Superlative** is applicable to anything which, by comparison with all other things of the same kind or with all other manifestations of the same quality, may be rated as the highest, best, greatest, finest, noblest, or by any adjective (especially, but not necessarily, commendatory adjective) in the superlative degree; *superlative* may admit equals, but it excludes superiors; as, the *superlative* wit of Alexander Pope; the *superlative* genius of Goethe; his *superlative* rudeness. "What makes him a great artist is a high fervour of spirit, which produces a *superlative*, instead of a comparative, clarity of vision" (*Galsworthy*). **Transcendent** and **surpassing** are applicable to anything that goes beyond everything else of its kind or in its quality: both often connote an exceeding even of the superlative, but *transcendent* suggests realization of the ideal, and *surpassing* suggests almost inconceivable attainment; as, the *transcendent* acting of Duse; Cleopatra's reputation for *transcendent* beauty; his *surpassing* skill in surgery; the *surpassing* success of a new book. **Pre-eminent** is applicable to that which goes beyond all others in achieving distinction or eminence; it implies both superlativeness and uniqueness within the limits indicated, but it seldom in precise use carries a suggestion of supremacy or transcendence; as, the *pre-eminent* general in that war; the *pre-eminent* film of the year; the *pre-eminent* example of magnanimity. **Peerless** and **incomparable** both imply the absence of equals but, commonly, *peerless* connotes the absence of superiors, and *incomparable* connotes the impossibility of being equaled; as, a *peerless* performance of "Hamlet";

"Philip Sidney, called the *peerless* one of his age" (*Quiller-Couch*); "the *incomparable* refinement with which he [Harunobu the Japanese artist] has drawn this interior with its two youthful figures" (*Binyon*); "he proceeds to tell the world in a loud voice how *incomparable* the German Empire is" (*Van W. Brooks*). **Banner**, an Americanism, implies such pre-eminence or incomparability that the thing so qualified is worthy of being distinguished by some outward mark, such as a banner; it is more often a term of strong and enthusiastic approbation, rather than of discreet appraisal; as, the *banner* state; a *banner* occasion; the *banner* regiment; a *banner* year for the company or corporation.

Ana. *Chief, foremost, leading, capital: predominant, *dominant, paramount, sovereign.

surcharge. Gorge, surfeit, *satiated, sate, cloy, pall, glut. **Ana.** Oppress, *depress, weigh (down).

sure. 1 Assured, *confident, sanguine.

Ana. Relying, trusting, depending, counting, banking (see RELY): inerrant, unerring, *infallible: *safe, secure. 2 **Sure, certain, positive, cocksure** come into comparison when applied to persons, and to their conclusions and opinions, and mean having or manifesting no doubt. *Sure* and *certain* are often interchangeable. But *sure* frequently emphasizes the mere subjective state of assurance; *certain* often suggests more strongly a conviction that is based on definite grounds or on indubitable evidence; as, "I know my hour is come." "Not so, my lord." "Nay, I am *sure* it is" (*Shak.*); "Be out of hope, of question, of doubt; Be *certain*" (*Shak.*); I felt for a time *sure* of his innocence; I am now *certain* of his guilt. "Moreover...are we so *sure* that the qualities that mark successful climbers—self-assertion, acquisition, emulation—are highly desirable?" (*H. Ellis*). **Positive** often suggests overconfidence or dogmatism, but it always implies conviction or full confidence in the rightness or correctness of one's statement or conclusion. "They felt very *positive*, but were not quite *certain*" (*Coleridge*). "As I can't be *certain*, I won't be *positive*" (*J. R. Lowell*). "An easy and elegant scepticism was the attitude expected of an educated adult: anything might be discussed, but it was a trifle vulgar to reach very *positive* conclusions" (*B. Russell*). **Cocksured** in earlier use came nearer to *certain* than to *sure*; as time goes on, however, it tends to carry an increasingly stronger implication of presumption or overconfidence in positiveness. "They [quoted passages] show how cautious and profound a thinker he [T. H. Huxley] was—how very far from being...[an] arrogant and *cocksured* materialist" (*A. Huxley*). "Certitude is not the test of certainty. We have been *cocksured* of many things that were not so" (*Justice Holmes*).

Ana. Decisive, *decided: self-assured, assured, self-confident (see corresponding nouns at CONFIDENCE): dogmatic, doctrinaire, oracular (see DICTATORIAL).

Ant. Unsure.

surety. 1 Security, bond, *guarantee, guaranty, bail.

Ana. *Pledge, earnest, token, hostage, pawn, gage.

2 Guarantor, *sponsor, backer, patron, angel.

surfeit. v. *Satiated, sate, cloy, pall, glut, gorge, surcharge.

Ant. Whet.

surge. n. *Wave, undulation, billow, roller, breaker, comber, beachcomber, ripple.

surge. v. *Rise, arise, ascend, mount, soar, tower, rocket, levitate.

surly. Morose, glum, *sullen, crabbed, sulky, saturnine, dour, gloomy.

Ana. *Rude, ungracious, ill-mannered, discourteous: boorish, churlish (see under BOOR): snappish, waspish, fractious, *irritable.

Ant. Amiable. — **Con.** *Gracious, cordial, affable, genial.

surmise. v. *Conjecture, guess.

Ana. *Infer, gather, judge, deduce, conclude: *think, conceive, fancy, imagine: *consider, regard, deem.

surmise. n. Conjecture, guess. See under CONJECTURE, v.

Ana. Inference, deduction, conclusion (see under INFER): *hypothesis, theory.

surmount. Overcome, overthrow, rout, *conquer, vanquish, defeat, subdue, subjugate, reduce, beat, lick.

Ana. Surpass, transcend, outdo, outstrip, excel, *exceed.

surpass. Transcend, excel, outdo, outstrip, *exceed.

Ana. Surmount, overcome, beat (see CONQUER).

surpassing. Transcendent, *supreme, superlative, pre-eminent, peerless, incomparable, banner.

Ana. Excelling, outdoing, outstripping (see EXCEED): *consummate, finished, accomplished.

surplus. n. *Excess, superfluity, surplusage, overplus.

Ana. *Remainder, residue, residuum.

Ant. Deficiency.

surplus. adj. *Superfluous, supernumerary, extra, spare. **Con.** *Needful, necessary, requisite, indispensable, essential.

surplusage. Surplus, superfluity, overplus, *excess.

Ana. & Ant. See those at SURPLUS, n.

surprise. v. 1 **Surprise, waylay, ambush** are synonymous terms when they mean to attack unawares. **Surprise** is in military as well as in general use. As a technical term it implies strategy in the disposition and movement of troops and equipment and secrecy in the operations; it may or may not suggest that the attack has been successful. "So we...may beat down Edward's guard And seize himself; I say not, slaughter him, For I intend but only to *surprise* him" (*Shak.*). "An army suddenly attacked within the lines which it had reckoned upon to ward off its enemy is in a military sense *surprised*" (*J. F. Maurice*). In literary use, one may *surprise* a person or something he is concealing by coming on him when he is off guard; as, "tremble like a guilty thing *surprised*" (*Wordsworth*). "I have sometimes *surprised* a tragic shadow in her eyes" (*Cather*). **Waylay** commonly suggests a lying in wait on a road or highway. Sometimes, it implies concealment by the roadside and an evil intent such as robbery or assault; as, he was *waylaid* on his return from the bank: sometimes, especially in current use, it carries no suggestion of hostility or evil intent but implies intercepting a person in his progress and detaining him. "Riding in the park...Carola beheld her intended galloping furiously down the Row, and left her sister Clementina's side to *waylay* him" (*Meredith*). "I am *waylaid* by Beauty...Oh, savage Beauty, suffer me to pass" (*Millay*). **Ambush** in literal use evokes the image of would-be attackers concealed in a thicket; it is often used in reference to guerrilla warfare; as, Colonial traders were in constant danger of being *ambushed* by Indians.

Ana. *Catch, capture, nab, cop: *take, seize, grasp, grab.

2 **Surprise, astonish, astound, amaze, flabbergast** agree in meaning to impress one forcibly because unexpectedly. **Surprise**, as here considered, derives from an older sense still in good use: to come upon another suddenly and with startling effect. The two senses are often confused because both imply a lack of preparation or a reversal of what is anticipated. The older sense commonly takes a personal subject in the active voice; as, her friends planned to *surprise* her on her birthday with a gift: the newer and more common sense commonly takes an impersonal subject; as, their gift greatly *surprised* and pleased her. The difference may also be illustrated by the old story of the lexicographer who, being discovered in an

embarrassing position by his wife, interrupted her re-proof beginning "I am *surprised*—" with the retort, "Not you, my dear—I am *surprised*; you are *astonished*." Modern authorities, however, countenance both uses of *surprise*. In older English, *astonish* always implied a dazing or silencing. "It is the part of men to fear and tremble. When the most mighty gods by tokens send Such dreadful heralds to *astonish* us" (*Shak.*). In modern use it more often means merely to surprise so greatly as to seem incredible. "While still an undergraduate. . . [he] had *astonished* the scientific world by his acceleration of the metamorphosis of the tadpole" (*C. Mackenzie*). "He. . . *astonished* his fellows by buying and smoking ten-cent cigars" (*S. Anderson*). *Astound* stresses shock more than *astonish*; in older use, it always implied a stunning or overwhelming emotional effect. "Threatening the world with high *astounding* terms" (*Marlowe*). In modern English, it usually implies so great a difference between what one believes possible and what one discovers to be true that one can find no precedent for it. Thus, a piece of news *surprises* one when it is unexpected; it *astonishes* when one finds it hard to believe; it *astounds* when one cannot account for it by any previous knowledge or experience; thus, the successful laying of the Atlantic cable *astounded* everybody; its later breaks *astonished* no one, but after it was finally in operation, many said that no future human invention could *surprise* them. *Amaze*, though it carries an implication of astonishment, stresses rather bewilderment, perplexity, or wonder. "That he should even speak to her was *amazing*!—but to speak with such civility" (*Austen*). "I have been *amazed* to discover that town-bred people seldom know the points of the compass. . . cannot find out which side of the house is out of the wind" (*B. Russell*). *Flabbergast* (a colloquial term) is a picturesque and often hyperbolic synonym of *astonish* or *amaze*; it suggests vividly the physical signs of a sudden dumfounding. "They were *flabbergasted* by this involuntary outbreak" (*L. P. Smith*).

Ana. Startle, alarm, scare (see *FRIGHTEN*): bewilder, nonplus, confound, dumfound (see *PUZZLE, v.*): *embarrass, disconcert, discomfit, rattle, faze.

surrender, v. Abandon, resign, *relinquish, yield, leave, cede, waive.

Ana. *Abdicate, renounce: *forgo, forbear, sacrifice, eschew: submit, capitulate, succumb (see *YIELD*): *commit, consign, confide, entrust.

surrender, n. *Surrender, submission, capitulation* come into comparison, especially in their military meanings, when they denote the act of yielding up one's person, one's forces, or one's possessions to another person or power. *Surrender* usually, but not necessarily, implies a state of war, and present domination by a victor or by an admittedly stronger power; in addition it often also implies the immediate cessation of fighting and succeeding overtures leading to a treaty of peace; as, the commander replied that no terms except an unconditional and immediate *surrender* could be accepted. *Submission* often implies *surrender*, as of an army, its supplies, its fortifications, and the like, but it stresses the acknowledgment of the power or authority of another, and often suggests loss of independence; it is used chiefly of those who rebel or of those whose weak condition leaves them at the mercy of the stronger power or subject to its threats. Consequently, *submission* may or may not imply a previous state of war; in the latter case, it may merely imply a threat of disastrous warfare. "*Submission*, Dauphin! 'tis a mere French word; We English warriors wot not what it means" (*Shak.*). "Declaring my *submission* to your arms" (*Browning*). *Capitulation* also implies *surrender*, but it suggests a con-

ditional one, on terms agreed upon between the parties or the commanders of the forces concerned. In current use, *surrender* usually implies a yielding to the force or demand of the stronger party; *capitulation* usually implies a request for terms on the part of those who acknowledge their defeat. "In Greece to offer earth and water was the sign of *capitulation*" (*Newman*).

surreptitious. Underhand, underhanded, *secret, covert, stealthy, furtive, clandestine, privy, backstairs.

Ana. Sneaking, slinking, skulking, lurking (see *LURK*): hidden, concealed, screened (see *HIDE*).

surrogate. Substitute, shift, makeshift, expedient, *resource, resort, stopgap.

surveillance. *Oversight, supervision.

Ana. Inspection, scrutiny, examination (see under *SCRUTINIZE*): observation, *observance.

survey, v. View, espy, descry, behold, *see, observe, notice, remark, note, perceive, discern.

Ana. *Scrutinize, scan, inspect, examine: *see, look, watch.

survey, n. *Compendium, syllabus, digest, pandect, sketch, précis, aperçu.

survive. *Outlive, outlast.

Ana. Endure, *continue, persist, last: withstand, resist, *oppose.

susceptibility. *Susceptibility, hypersensitivity (or hypersensitiveness), allergy, anaphylaxis* are related but not synonymous terms used in medicine. In strict technical language, *susceptibility* and *hypersensitivity* are distinguished. *Susceptibility* denotes a lack of resistance to a given infectious disease, or to the action of certain bacteria. One who has a *susceptibility* (or is *susceptible*) to a particular infectious disease will contract that disease when the germs causing it get into the body.

Hypersensitivity (or hypersensitiveness) denotes an excessive sensitiveness to some agent and is used in reference both to substances, such as strawberries or the pollen of ragweed, and to environmental factors, such as extremes in temperature. *Allergy*, in strict technical use, means altered susceptibility to the action of a particular germ, or altered degree of sensitiveness to a foreign substance, as indicated by the reaction to a second (or subsequent) inoculation with the same germ or by a second (or subsequent) introduction of the same substance into the body. The term was coined to cover cases where there was any difference in an organism's reaction after it had once been affected by a germ, a serum, a poison, or the like, whether that difference was in the direction of increased resistance or of increased susceptibility or sensitiveness, such a difference being regarded as a sign that a constitutional change has been brought about by the prior experience. In nontechnical or loose use, *allergy* usually means increased susceptibility or sensitiveness and is, therefore, often used interchangeably with *susceptibility* and, especially, *hypersensitivity*; thus, a person who has an *allergy* for (or is *allergic* to) feathers may develop asthma after sleeping on a feather pillow. *Anaphylaxis*, another technical term, unequivocally denotes increased sensitiveness, especially to a poisonous protein substance, following its second (or subsequent) introduction into the body; thus, eating eggs produces *anaphylaxis* in some persons inclined to eczema, and the inhalation of the pollen of ragweed, in some persons susceptible to hay fever. *Anaphylaxis* (and not *allergy*) is usually regarded as the opposite of *immunity*, in the sense of immunity as freedom from the bad effects of certain protein substances.

susceptible. Sensitive, subject, exposed, prone, *liable, open, incident.

Ana. Inclined, disposed, predisposed (see INCLINE, *v.*): alive, awake, sensible, conscious (see AWARE).

Antf. Immune.

suspend. 1 Disbar, shut out, *exclude, eliminate, debar, blackball, rule out.

Ana. *Eject, dismiss, oust: *banish, exile, ostracize.

2 Stay, intermit, postpone, *defer.

Ana. *Arrest, check, interrupt: *stop, cease, discontinue: *delay, detain, retard.

3 *Hang, sling, dangle.

Ana. Poise, balance, steady, *stabilize.

suspended. **Suspended, pendent (or pendant), pendulous** agree in meaning hanging or seeming to hang. **Suspended** may suggest a being poised or a being upheld as by buoyancy, or the like (as, "Pure air, free from *suspended* matter"—*Jefferies*; water clouded by *suspended* particles of an undissolved substance), or it may imply a thing's attachment to a point or to points above itself so that it swings freely (as, balls *suspended* from a chandelier; an acrobat *suspended* by one foot from a trapeze) or is held steady in its proper place or position (as, a *suspended* ceiling; a *suspended* [now commonly a *suspension*] bridge). **Pendent** now usually describes that which hangs downward from a support or from one point of attachment: it seldom carries any further implication and so is applicable both to that which is motionless and to that which swings or moves, or is in danger of falling; as, "he shakes From many a twig the *pendent* drops of ice" (*Cowper*); "a trailing creeper with curving leaf and twining tendrils, and *pendent* bud and blossom" (*Hudson*); *pendent* rocks on the side of a cliff. The term is also, but now rarely, applied to that which hangs seemingly without support or without sufficient support; as, "To be imprison'd in the viewless winds, And blown with restless violence round about The *pendent* world" (*Shak.*). **Pendulous** adds to *pendent* the specific implication of swaying or swinging, sometimes even carrying a suggestion of actual floating in space; as, a *pendulous* nest; the *pendulous* wattles of an old barnyard rooster; a *pendulous* double chin; "I see him yonder, with his pipe *pendulous* in his hand, and the ashes falling out of it" (*Sterne*); "So blend the turrets and shadows there That all seems *pendulous* in air" (*Poe*).

suspension. *Insolvency, bankruptcy, receivership, failure.

suspicion. 1 Mistrust, *uncertainty, doubt, dubiety, dubiousity, skepticism.

Ana. Misgiving, foreboding, presentiment, *apprehension: distrust, mistrust (see under DISTRUST, *v.*).

2 *Touch, suggestion, soupçon, tincture, tinge, shade, smack, spice, dash, vein, strain, streak.

sustenance. 1 Nourishment, nutriment, *food, aliment, pabulum.

2 Maintenance, support, *living, livelihood, subsistence, keep, bread.

suture, n. *Joint, articulation.

swag, n. *Spoil, pillage, plunder, loot, booty, prize.

swagger, v. *Strut, ruffle, bristle, bridle.

Ana. Flourish, brandish, *swing, wave: brag, *boast, vaunt, crow, gasconade.

Cor. Cower, cringe, truckle (see FAWN): shrink, quail, blench, wince (see RECOIL).

swagman or swagsman. *Vagabond, vagrant, tramp, hobo, truant, bum, stiff, sundowner.

swap, v. Interchange, bandy, *exchange.

Ana. Trade, barter (see SELL).

swarm, n. *Flock, herd, drove, pack, bevy, covey, gaggle, flight, shoal, school.

swarm, v. *Teem, abound, superabound, overflow.

swarthy. *Dusky, tawny.

Ana. *Dark, murky, gloomy, darkling.

swat, v. *Strike, hit, smite, slug, slap, clout, punch, box, cuff.

Ana. *Beat, pound, pummel, baste, belabor.

sway, v. 1 *Swing, oscillate, fluctuate, pendulate, vibrate, waver, undulate.

Ana. Brandish, flourish, wave, *swing: *shake, rock, agitate, convulse: *tip, tilt, cant, careen.

2 Influence, impress, strike, touch, *affect.

Ana. Control, direct, manage, *conduct: rule, *govern: bias, *incline, dispose, predispose.

sway, n. Dominion, control, command, *power, authority.

Ana. *Supremacy, ascendancy: *range, reach, scope, sweep: spread, stretch, amplitude, *expanse: *government, administration.

swear. **Swear, affirm, asseverate, depose, depone, testify** mean to declare solemnly under oath or on one's word of honor that what one says is true. One **swears** (especially before a magistrate or tribunal) when one gives a solemn pledge with an appeal to God or by laying one's hand on a sacred object, such as the Bible, that one speaks or will speak only the truth or that one will do what one promises. One **affirms** before a magistrate or tribunal when one makes a pledge like that of the one who swears and under the same penalties of perjury, but without reference to a sacred person or object, because one's conscience or creed forbids an oath. One **asseverates** when one insists earnestly and emphatically and (especially in current usage) on one's word of honor that what one says is true or what one promises will be carried out. **Asseverate** is often used when the writer wishes to avoid the legal connotations or implications of **swear**, but it is unusual in speech and rare in the first person. "I shall repay you, surely! Madame Foucault *asseverated*. 'I swear!'" (*Bennett*). One **deposes** or **depones** when one makes a statement, such as an affidavit or a deposition, in writing and under oath. One **testifies** when, on a witness stand or in an affidavit or deposition, one communicates information or gives evidence under oath and under penalties of perjury. **Testify** is also found in non-legal use, where it retains its implication of personal knowledge on the part of the one who testifies. "And we have seen and do *testify* that the Father sent the Son to be the Saviour of the world" (1 John iv. 14). "I can *testify* that he [Columbus] becomes interesting before the age of two, at least to children who know the sea" (*B. Russell*).

Ana. Pledge, plight, covenant, engage, *promise.

swearing. *Blasphemy, profanity, cursing.

sweep, n. Compass, scope, *range, reach, gamut, radius, ken, purview, horizon, orbit.

Ana. *Expanse, amplitude, spread.

sweeping. *Indiscriminate, wholesale.

Ana. Promiscuous, heterogeneous, motley, *miscellaneous.

swell, v. *Expand, amplify, distend, inflate, dilate.

Ana. *Extend, elongate, lengthen: *intensify, heighten, enhance: *increase, augment, enlarge.

Antf. Shrink. — **Cor.** *Contract, condense, compress, constrict.

swell, n. *Fop, dandy, beau, coxcomb, exquisite, élegant, dude, macaroni, buck, spark, nob, toff.

swerve, v. **Sswerve, veer, deviate, depart, digress, diverge** agree in meaning to turn aside from a straight line or a defined course. **Sswerve** may refer to a turning aside by a person or thing (as, she never *swerved* from the path till she caught sight of her friends on the right; at that

point the road *swerves* to the left; "The great roots of a tree *swerve* upward out of the design"—*Binyon*): It may suggest a physical, mental, moral, or spiritual turning aside (as, never to *swerve* from one's duty; "If I be false, or *swerve* a hair from truth"—*Shak.*; "Our affections and passions put frequently a bias . . . so strong on our judgments as to make them *swerve* from the direction of right reason"—*Bolingbroke*). *Veer* was originally used and still is frequently used in reference to a change in the course of a wind or of a ship; often, in such contexts, it suggests either a frequent turning this way or that or a series of turnings in the same direction, especially (as in modern meteorology) of the wind in a clockwise direction; as, the wind *veered* to the east; "It [the ship] plunged and tacked and *veered*" (*Coleridge*); "The wind had *veered* round, and the Aurora was now able to lay up clear of the island of Maritimo" (*Marryat*). In extended and discriminating use, the term commonly implies a change or series of changes of direction or course under an external influence comparable to the wind (as, "the world's opinion, as usual, *veered* completely round"—*Meredith*) or a turning aside for a tactical reason such as to avoid an undue influence (as, "Imagist poetry . . . is right in *veering* away from any tinge of archaism in its diction, because it is aiming at an effect with which such diction is inconsistent"—*Lowes*). *Deviate* (etymologically, to go from the way) implies a turning aside from a customary, allotted, or prescribed course: it is commonly used in reference to persons, their minds, their morals, their actions, and the like, with the suggestion of a swerving from that which is the norm, the law, the standard, or the right procedure or course; as, "[Shenstone] never *deviates* from the beaten paths for fear of being lost" (*Gray*); "Critics, who have blamed Mr. Pope for *deviating* . . . from the simplicity of Homer" (*Goldsmith*); "if he [a workman] diminishes his speed by a fraction of a second or *deviates* a hair's breadth from the prescribed and never-changing movements of his hands" (*Grandgent*); "From a fundamental sincerity he could not *deviate*" (*T. S. Eliot*). The last three words of this group usually imply a turning aside from a path, course, track, or the like, which still continues. *Depart* stresses the turning away from and leaving an old path, a customary course, an accepted type or standard, or the like: it may further imply a forsaking of the antiquated, conventional, traditional, or the like (as, "[books] which *depart* widely from the usual type"—*Grandgent*), or a deviation from that which is right, true, normal, or the like (as, the account frequently *departs* from the facts as established; "I have not *departed* from thy judgments: for thou hast taught me"—*Psalms* cxix. 102). *Digress*, in its earliest but now practically obsolete sense, was a close synonym of *depart*: in current use it commonly implies a departure from the subject of one's discourse that may be voluntary and, therefore, made with the intent to return (as, let me *digress* for a few minutes to indicate the possible results of this condition), or involuntary, and the outcome of an inability to think coherently or to stick to the point to be developed (as, he *digressed* so often in his speech that he finally lost the thread of his discourse). *Diverge* is often used in the sense of *depart* even by good writers (as, "Let them [professors] *diverge* in the slightest from what is the current official doctrine, and they are turned out of their chairs"—*Mencken*), but when employed with precision and understanding of its etymological implication of turning in different directions, it always suggests a separation of a main, old, or original course or path into two (or more) courses or paths that lead away from each other; as, "They proceeded along the road together till . . . their paths *diverged*" (*Hardy*);

"two roads *diverging* like the branches of a Y" (*Belloc*); rays of light *diverge* as they proceed from the sun.

Ana. *Turn, divert, deflect, sheer, avert: *curve, bend, turn.

swift. *Fast, rapid, fleet, quick, speedy, hasty, expeditious.

Ana. *Easy, effortless, smooth, facile: headlong, *precipitate, sudden.

swindle, v. *Cheat, overreach, cozen, defraud.

Ana. Embezzle, *defalcate, peculate: *dupe, gull, bamboozle, hoodwink, trick: *steal, pilfer, purloin, filch.

swing, v. 1 *Swing, wave, flourish, brandish, thrash* are comparable when they mean to wield or to shake something so that it moves alternately backward and forward or upward and downward or around and around. *Swing* often implies regular oscillations (as, he walked down the street *swinging* his arms; to *swing* a scythe in mowing); it may, however, imply continuous rotatory movements (as, to *swing* a pail over one's head). *Wave* distinctively implies undulating or fluttering motions; it also carries a weaker implication of rhythmical regularity than *swing*; as, to *wave* a flag; to *wave* a handkerchief. The word, moreover, commonly implies something more than the mere act or operation; according to the nature of the thing waved and the way in which it is waved, the term may suggest a signal, an emotion, a greeting, an order, a magical power, or the like. "Then grave Clarissa graceful *wav'd* her fan; Silence ensu'd" (*Pope*); "*waved* my arm to warn them off" (*Tennyson*). "You cannot *wave* a wand over the country and say 'Let there be Socialism': at least nothing will happen if you do" (*Shaw*). *Flourish* implies ostentation, triumph, or bravado in swinging or waving something which one holds in one's hand, such as a weapon, a stick, or a rod; as, a conductor who never *flourishes* his baton; "With their swords *flourished* as if to fight" (*Wordsworth*); "He walked with a gay spring . . . *flourishing* his cane" (*Bennett*). *Brandish* stresses menace or threat as *flourish* seldom does; otherwise it suggests somewhat similar motions; as, "I shall *brandish* my sword before them" (*Ezekiel* xxxii. 10); "He *brandishes* his pliant length of whip, Resounding oft" (*Cowper*). *Thrash* (see also *BEAT*, 1) implies a noisy vigorous swinging suggestive of the motions of a flail in threshing grain; as, to *thrash* one's legs in swimming; to *thrash* one's arms on a cold day.

Ana. Parade, flaunt, display, exhibit (see *SHOW*, v.): *shake, tremble, quiver, quaver, quake.

2 *Swing, sway, oscillate, vibrate, fluctuate, pendulate, waver, undulate* come into comparison when they mean to move or, in some cases less often, to cause to move from one direction to another, usually to and fro, back and forth, or up and down. *Swing* (as here compared: see also *SWING*, 1) implies movement of that which is attached only at one side or at one end, as by being suspended, hinged, pivoted, or the like: apart from the context the term conveys no definite implication of whether the movement is induced or is automatic, whether it is occasional or constant, or whether it is rhythmical and regular or intermittent and irregular; as, the tavern sign *swings* from a hook above the door; "the red amaryllises . . . *swung* in heavy clusters" (*Stark Young*); the door *swung* open; to *swing* (i.e., to hang) a thief from the branch of a tree; "*swinging* their dinner pails" (*S. Anderson*); a pendulum *swings* with great regularity. *Sway* implies a swinging motion, especially in a flexible or unsteady object that yields to lack of support or to pressure from one side or another; as, "to hear the *swaying* of the branches of the giant pine" (*Binyon*); "She stood up; she seemed to *sway* a little as she stood" (*M. Austin*); "caravans of camels, *swaying* with their

padded feet across the desert" (*L. P. Smith*); a light breeze *swaying* the branches. *Oscillate* also usually implies a swinging motion, but of something suspended so that it moves in the manner of a pendulum: the term usually implies a movement from one side or place, or, in figurative use, from one condition, attitude, or position to another, with more or less regularity. "Move any body, as a pendulum, in one way, and it will continue to *oscillate* in an arch [arc] of the same circle, until the known causes make it rest" (*Burke*). "His adventures were related by himself in a series of letters and diaries, showing how he *oscillated* between wealth and poverty" (*Lucas*). "So, this way and that, *oscillates* the current fashion among uninspired writers" (*C. E. Montague*). In electricity, *oscillate* specifically implies the flow of electric charges alternately in opposite directions; as, an *oscillating* current; an *oscillating* circuit. *Vibrate* carries a stronger implication of shaking than of swinging: although it is still sometimes used in the sense of *oscillate* (as, "The double complex pendulum, when it *vibrates* in one plane"—*Encyc. Brit.*, 9th ed.), it more often suggests the rapid pulsations of the string of a musical instrument such as the piano or violin when touched by a hammer or bow (as, "You know that if you strike a note of music, all the octave notes will *vibrate*"—*Manning*). In the physical sciences, *vibrate* implies a periodic motion of the particles of an elastic body or medium in alternately opposite directions from the point of equilibrium; as, the particles of an elastic medium, such as the air, *vibrate* when a wave of sound or light passes through it; a tuning fork *vibrates* when struck; "the electric oscillations in a circuit may cause the electromagnetic *vibration* of a filament" (*Van Nostrand's Scientific Encyclopedia*). In a more extended sense, *vibrate* usually implies a trembling, a quivering, a throbbing, or the like, suggestive of the movements of musical strings when an instrument is being played; as, "Had I waited on the stile, in a few minutes, becoming used to my presence, he [the nightingale] would have made the hawthorn *vibrate*, so powerful in his voice when heard close at hand" (*Jefferies*); "On summer evenings when the air *vibrated* with the song of insects" (*S. Anderson*); "Nerve and bone of that poor man's body *vibrated* to those words" (*H. B. Stowe*). *Fluctuate* etymologically implies a tossing up and down restlessly as the waves of the sea or of something floating on such waves: although this sense still occurs, it is now somewhat rare; as, "the traveller sees Thy [France's] three-striped banner *fluctuate* on the breeze" (*Wordsworth*); "The surface rolls and *fluctuates* to the eye" (*Bryant*). The term is now chiefly used in an extended sense implying constant irregular alternations suggestive of the movement of waves driven by a high wind; as, stock prices that *fluctuate* from day to day; "the old unquiet breast, Which neither deadens into rest, Nor ever feels the fiery glow That whirls the spirit from itself away, But *fluctuates* to and fro" (*Arnold*); "We have no absolute standard left, and are abandoned to subjective and *fluctuating* valuations" (*Inge*). *Pendulate*, a fairly rare word revived in the nineteenth century, is a near synonym of *oscillate* implying a swinging between two extremes, but it often comes closer to *fluctuate* in its strong suggestion of constant change; as, "The ill-starred scoundrel *pendulates* between Heaven and Earth" (*Carlyle*). *Waver*, in the literal sense in which it is here considered (see also *HESITATE*), carries a stronger implication of unsteadiness or of uncertainty in swinging than does *sway* or *oscillate*, and therefore often, but far from always, connotes movements suggestive of reeling or tottering; as, "Banners and pennons *wavering* with the

wind" (*Berners*); "Some stars *waver* irregularly back and forth between fairly well defined limits of brightness" (*P. W. Merrill*). *Undulate* is now more often used than *fluctuate* when a wavelike motion is implied: it is also often used figuratively, seldom suggesting violent changes, but rather the continuous rolling or rippling that is associated with the steady flow of waves; as, "The ripe corn under the *undulating* air *Undulates* like an ocean" (*Shelley*); "The... flame... made the jades *undulate* like green pools" (*Amy Lowell*).

Ana. *Hang, suspend, dangle: *turn, spin, whirl, wheel, revolve, rotate, gyrate.

3 Wield, manipulate, *handle, ply.

Ana. Control, manage, direct, *conduct: *execute, administer.

swink. Travail, labor, toll, *work, drudgery, grind.

swipe, v. *Steal, pilfer, filch, purloin, lift, pinch, snitch, cop.

swirl, v. Circle, spin, whirl, twirl, wheel, eddy, *turn, revolve, rotate, gyrate, pirouette.

sybaritic. *Sensuous, sensual, luxurious, voluptuous, epicurean.

sycofant. *Parasite, favorite, toady, lickspit, hanger-on, leech, sponge.

Ana. Blandisher, cajoler, wheedler (see corresponding verbs at COAX): fawner, truckler (see corresponding verbs at FAWN).

syllabus. *Compendium, digest, pandect, survey, sketch, précis, aperçu.

Ana. Conspectus, synopsis, epitome, *abridgment, brief, abstract.

symbol. 1 *Creed, confession, catechism.

2 Symbol, emblem, attribute, type are here compared only as meaning a visible thing that stands for or suggests something that is invisible or intangible. *Symbol* and *emblem* are now often used interchangeably, even by good writers; historically, however, they are clearly distinguishable. *Symbol* (L. *symbolus*, token, sign) derives its implications from its earliest application in English to one of the three Christian creeds (especially the Apostles' Creed) which was so called because its recital was the outward evidence of a person's Christianity. Hence, *symbol* came to be referred to anything that serves as an outward sign of something spiritual or immaterial; thus, the cross is to Christians the *symbol* of salvation because of its connection with the Crucifixion; the circle, in medieval thought, was the *symbol* of eternity because it, like eternity, has neither beginning nor end. This close and natural connection between the *symbol* and that which it makes visible or partly intelligible is not always so strongly implied in modern use; it may be a traditional, conventional, or even an arbitrary association of one thing with another that is suggested; as, a king's crown is the *symbol* of his sovereignty and his scepter the *symbol* of his authority; to many poets the skylark is the *symbol* of aspiration. *Emblem* (L. *emblema*, inlaid ornament) was, especially in the sixteenth and seventeenth centuries, applied to a pictorial representation of some abstraction to which was appended a motto or set of verses, the purpose of the picture and inscription being moral teaching. In its extended use *emblem*, as distinguished from *symbol*, still always implies representation of an abstraction or use in representation; it is applicable chiefly to any pictorial device, sometimes an object, sometimes a combination of objects, found on a shield, a banner, a flag, or the like, and intended to serve as an arbitrary or chosen *symbol* of the character or history of the family, the nation, the royal line, or the office that has adopted it; thus, the spread eagle, the

usual *emblem* of the United States, is found in its coat of arms and on some of its coins and postage stamps; the *emblem* of Turkey, a crescent and a star, appears on its flag. This historic difference between *symbol* and *emblem* is, however, being lost sight of in current use. *Emblem* is also correctly applied to what is technically known in painting and sculpture as an *attribute*, or some object that is conventionally associated with the representation either of a character, such as a Greek divinity or a Christian saint, or of a personified abstraction, and is the means by which the character or abstraction is identified; thus, in fine art the balance is the *emblem*, or *attribute*, of Justice; the turning wheel, of Fortune; the club, of Hercules; and the spiked wheel, of St. Catherine of Alexandria. *Type*, considered as the correlative to *antitype* (see under *PROTOTYPE*), is chiefly, but not exclusively, in theological use. It is applied to a person or thing that prefigures or preshadows someone or something to come, and that stands therefore as his or its symbol, or shadow, until the reality appears. In theology, Biblical interpretation, and religious poetry, it usually also implies a divine dispensation whereby the spiritual or immaterial reality is prefigured by a living person, event, experience, or the like; thus, in medieval religious poetry, Jerusalem is the *type* of heaven (the heavenly Jerusalem); in allegorical interpretation of Scriptures, the paschal lamb is the *type* of Christ, the victim on the Cross. "Spiritual wisdom... is unchanging and eternal; it is communicated to us in *types* and shadows dim—in *symbols*—till we grow up into the power of understanding it" (*Inge*). *Ana.* *Sign, mark, token, badge: device, motif, design, *figure, pattern.

3 *Character, sign, mark, note.

Ana. *Device, contrivance: diagram, delineation, outline, sketch (see *SKETCH*, *v.*).

symbolism. *Allegory.

symmetry. *Symmetry*, *proportion*, *balance*, *harmony* are here compared chiefly, but not exclusively, as used in the arts of design and decoration and as meaning a quality which gives aesthetic pleasure and which depends upon the proper relating of details and parts to each other, as in magnitude, arrangement, or the like, and to the consequent effect produced by the whole. *Symmetry*, in strict use, implies a median line or an axis on either side of which the details correspond in size, form, placing, and the like. Often, it implies the mathematical precision observable in the corresponding halves of a perfect crystal, in a geometrically regular star, in the conventionalized leaf or flower common in decorative design, in the placing of pictures on a wall so that on either side of the median line there are the same number of pictures, and the same pattern followed in their arrangement according to sizes and levels; thus, *symmetry* is the keynote of most formal gardens; the *symmetry* of a Greek temple; in spite of their apparent *symmetry* human bodies are rarely, if ever, perfectly symmetrical. *Proportion*, in strict use, presupposes a scale, a pattern, or a standard which determines the relative size, duration, intensity, or the like, of each of the component details or parts. The term implies a grace or beauty that has nothing to do with a thing's actual magnitude, duration, or intensity, but depends on the measured fitness of every one of its details and the consequent perfection of the whole. "How sour sweet music is, When time is broke and no *proportion* kept!" (*Shak.*). "In small *proportions* we just beauties see, And in short measures life may perfect be" (*B. Jonson*). "We care for size, but inartistically; we care nothing for *proportion*, which is what makes size count" (*Brownell*). *Balance* is sometimes employed as though it were the equivalent of *symmetry*; in discriminating use it implies

opposition rather than repetition of details or parts and a massing of different things such as light and shade, sharply contrasted colors, figures, and background, so that each one tends to offset the other or to reduce the other's emphasis without loss of significance on either side. *Balance* implies as its aesthetic effect an inducing of a pleasant satisfaction in the thing's quiet beauty or of a delight in the unified yet varied beauty of the whole. "It is a similar principle of unsymmetrical *balance* which the Taoist artists sought in design. Space therefore, empty space, becomes a positive factor, no longer something not filled and left over, but something exerting an attractive power to the eye, and balancing the attractive power of forms and masses" (*Binyon*). "Every good statue is marked by a certain air of repose; every fine picture exists in a state of stable equilibrium brought about by the *balance* of its masses" (*J. W. Krulch*). *Harmony*, when used specifically in reference to the arts of design and decoration, retains as its leading implication the same idea as is involved in its general sense (see *HARMONY*, 1), that of beauty resulting from a perfect interrelation of details and their fusion into an agreeable whole. However, in this connection, it often denotes specifically the aesthetic impression produced by something which manifests symmetry, proportion, or balance, or these qualities in combination. "A coloring *harmony* obtained by the aid of a long experience in the effects of light on translucent surfaces" (*Viollet-le-Duc*, *transl.* by *H. Adams*). "We hear harmonious tones; but... the pleasure they give us [is] distinct from the pleasures appropriate to the separate tones... it is the pleasure of their relational form which makes us attribute to them and their physical combination a quality which we call *harmony*" (*S. Alexander*).

sympathetic. 1 *Consonant, congenial, congruous, compatible, consistent.

Ana. Agreeing, harmonizing or harmonious, accordant, correspondent (see corresponding verbs at *AGREE*).

2 *Tender, compassionate, warm, warmhearted, responsive.

Ana. Kindly, *kind, benign, benignant: understanding, appreciating, comprehending (see *UNDERSTAND*).

Ant. Unsympathetic.

sympathy. 1 *Attraction, affinity.

Ana. Reciprocity, correspondence (see corresponding adjectives at *RECIPROCAL*): *harmony, consonance, accord, concord.

Ant. Antipathy.

2 *Pity, compassion, commiseration, ruth, condolence, empathy, bowels.

Ana. Tenderness, warmheartedness, warmth, responsiveness (see corresponding adjectives at *TENDER*): kindness, kindness, benignness, benignancy (see corresponding adjectives at *KIND*).

symptom. *Sign, mark, token, badge.

synchronous. Coeval, contemporaneous, *contemporary, simultaneous, coincident, concomitant, concurrent.

syndicate, *n.* *Monopoly, corner, pool, trust, cartel.

synecdoche. *Metonymy.

synod. *Convention, convocation, conference, congress, council.

synonymicon. *Dictionary, lexicon, wordbook, glossary, onomasticon, gazetteer.

synopsis. Brief, conspectus, epitome, *abridgment, abstract.

synthetic. *Artificial, ersatz, factitious.

system. 1 *System*, *organism*, *scheme*, *economy*, *network*, *complex* come into comparison when they mean an organized integrated whole made up of diverse but inter-

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

related and interdependent parts or elements. **System** applies both to a natural and to an artificial aggregation, all of whose units, when physical or material, function, operate, or move in unison or in obedience to some form of control or, when immaterial (such as laws, principles, theories, etc.), fit into each other so as to form a distinctive and coherent whole; as, a telegraph *system*; the solar *system*; a stellar *system*; one's bodily *system*; a *system* of railroads; a philosophical *system*; "Kant...sought to mix up aesthetics with his *system*" (*H. Ellis*); "the fault lay not so much in our characters as in the capitalist *system* which we had allowed to dominate our lives" (*Shaw*). **Organism** applies only to a system that has actual life, such as the human body, where the movement, functioning, or development of any part or parts is governed by its (or their) relation to all the other parts, or to one that seems to have life because it is capable of development and therefore of change and of growth; as, "until definite knowledge became available...of the effects of certain substances upon the human *organism*" (*V. Heiser*); "The Church grew, like any other *organism*, by responding to its environment" (*Inge*); "[Augustus] had created a huge and intricate polity, and it must have the articulate life of an *organism* and not the mere functional differentiation of a machine" (*Buchan*). **Scheme** is often used in place of *system* especially when it refers to a system that has been or seems to have been planned in detail and, therefore, to have the character of a great design or construction: often the term is used with a hint of irony or depreciation but equally often it is free from any derogatory suggestions; as, "In our complex *system* [that of the United States of America], presenting the rare and difficult *scheme* of one general government, whose action extends over the whole" (*Ch. Just. Marshall*); "The organization of eighteenth-century French society was hopelessly inefficient...so...that great numbers of individual Frenchmen, unable to fit into the *scheme* of things, suffered acute discomfort" (*A. Huxley*); "a wider Naturalism which will find room for life, mind, and spirit within the *scheme* of nature" (*Inge*). **Economy**, as here considered, applies to a distinctive system of government

or of organization, as of a people, a land, a church, or even of the world (the divine *economy*) or of immaterial things, and implies due consideration of the individual conditions and needs of the governed or of the significance of each part or detail in the organization; as, "The principle may operate successfully in the close *economy* of a good family, or even within a small religious community" (*J. A. Hobson*); "Octavius...looked beyond the political conundrum to the economic problems of the land...The Roman *economy* was unbalanced" (*Buchan*); "the field of music is time, that of painting, space. To multiply simultaneous sounds, or to make colors follow one another in single file, is to change their *economy*" (*Babbitt*). **Network** literally applies to any fabric or structure made of threads, cords, wires, etc., crossing each other at intervals: figuratively it applies to any system, especially any physical system, that has a corresponding structure with all its intercrossing threads coming under a central government or control; as, a vast *network* of railroads. **Complex** applies chiefly to any integrated whole that involves a great variety of parts, elements, or factors yet brings them all into relation and unity: though the term has specific senses, such as in psychology (for a complicated system of desires and memories that exerts an influence on one's temperament and behavior), it tends to be used when *system*, *organism*, *scheme*, etc., are too rich in implications or connotations for one's purposes; as, "We do know that a certain *complex* of energies can wag its tail and another make syllogisms" (*Justice Holmes*).

Ant. Chaos.

2 *Method, mode, manner, way, fashion.

Ana. *Plan, project, scheme, design: procedure, *process, proceeding.

systematic, systematical. *Orderly, methodical, regular.

Ana. Systematized, organized, ordered, arranged (see *ORDER*, *v.*): *logical, analytical.

systematize. Organize, methodize, *order, arrange, marshal.

Ana. *Adjust, regulate, fix.

T

tabernacle. *Altar, shrine, chantry.

table, n. *List, catalogue, schedule, register, roll, roster, rota, canon, inventory.

taciturn. *Silent, uncommunicative, reserved, reticent. *secretive*, close, close-lipped, closemouthed, tight-lipped.

Ana. *Dumb, mute, inarticulate: restrained, inhibited, curbed, checked (see *RESTRAIN*).

Ant. Garrulous: clamorous (*especially of crowds*): convivial (*of habits*).

tackle, n. *Equipment, apparatus, machinery, paraphernalia, outfit, gear, matériel.

tact. **Tact, address, poise, savoir-faire** are comparable when they name the skill and grace with which a well-bred person conducts himself in his relations with others. **Tact** stresses skill and grace in one's association with or handling of others, whether one's social equals or not. It implies delicate and sympathetic perception, especially of what is fit, graceful, or considerate under given circumstances. "Of political wisdom...Elizabeth had little or none; but her political *tact* was unerring" (*J. R. Green*). "His Vicar, who had so much *tact* with the na-

tives, so much sympathy with all their short-comings" (*Cather*). "Without the *tact* to perceive when remarks were untimely" (*Hardy*). **Address** stresses dexterity and grace in approach, as in meeting strangers or in coping with new or with difficult situations. It often connotes adroitness and suavity: it commonly implies success in winning favor or in attaining one's ends. "Her *address* in rendering them [her many guests] easy with one another" (*Burney*). "His acute and flexible logic could support, with equal *address*...the adverse sides of every possible question" (*Gibbon*). "He was as reluctant as other men to be found wanting in *address* by a pretty woman" (*Shaw*). **Poise**, in current use, often implies both tact and address; it stresses, however, self-possession or equanimity in meeting embarrassing or upsetting situations. "Charles Francis Adams was singular for mental *poise*...a balance of mind and temper that neither challenged nor avoided notice, nor admitted question of superiority or inferiority" (*H. Adams*). **Savoir-faire**, a French phrase much used in English, stresses worldly or social experience and a knowledge of what is the

proper thing to say or do or of how to act under all circumstances. "The inexperience and want of *savoir faire* in high matters of diplomacy of the Emperor and his ministers" (*Charles Greville*). In current use, it often suggests ease and tact even more than breadth of experience. "Girls don't seem to have to pass through it [the difficult age of adolescence] quite as boys do, or their *savoir faire* is instinctive" (*Tarkington*).

Ana. Diplomateness or diplomacy, politeness or policy, suavity, urbanity (see corresponding adjectives at *SUAVE*): *courtesy, amenity, gallantry.

Ant. Awkwardness.

tag, v. *Follow, pursue, chase, trail, tail.

tail, v. *Follow, pursue, chase, trail, tag.

taint, v. *Contaminate, pollute, defile.

Ana. *Debase, deprave, corrupt, vitiate: spoil, decompose, rot, putrefy, *decay: imbue, inoculate, *infuse.

take. 1 Take, seize, grasp, clutch, snatch, grab agree in meaning to get hold of by or as if by reaching out the arm, hand, or tentacles. **Take** is not only the most general but also the only colorless term in this group. In literal use, especially with reference to physical things, it may imply nothing more than a movement of the hand to get hold of something (as, to *take* the lamp from the table; to *take* meat from a platter) or it may imply, with reference not only to physical but to immaterial or intangible things, numerous and, often, difficult operations by means of which one gets possession of or control over something (as, to *take* a band of thieves; to *take* a city). Between these two extremes *take* may imply any of numerous methods of getting hold of something; thus, one *takes* a prize who wins it in a competition; one *takes* a cottage who hires the use of it; one *takes* the temperature of a room by observing the thermometer; so, to *take* a bath; to *take* the air; to *take* a rest; to *take* care. **Seize** usually suggests a sudden and forcible taking or getting hold of, and it therefore is interchangeable with *take* only when emphasis is placed upon these qualities; as, to *seize* a flaming lamp and throw it out of the window; the hungry children *seized* the food that was offered them; the policeman *seized* the thief in the act of escaping; the fort was *seized* before its defenders had time to repel the assault; "seizing between his teeth the cartilage of the trainer's ear" (*Shaw*). In extended use, especially when the thing seized or the thing seizing is something immaterial or intangible, the term usually suggests a catching of something fleeting or elusive (as, to *seize* an opportunity; to *seize* the attention of the crowd), or the capture of something by force and, usually, surprise (as, to *seize* the throne; "The Breton *seized* more than he could hold; the Norman *took* less than he would have liked"—*H. Adams*), or the understanding of something extremely difficult to apprehend or analyze (as, unless you *seize* this point of view, you will not understand the age which it governed; "The character of Louis XIII is difficult to *seize*, for it comprised qualities hardly ever combined in one man"—*Belloc*), or the overthrowing by force of a mightier power (as, pneumonia *seized* him in his thirty-fifth year; *seized* by a passion beyond his control). **Grasp** literally implies a laying hold of with the hands, teeth, or claws so as to hold firmly (as, the hawk *grasped* the fowl with its talons; "Thy hand is made to *grasp* a palmer's staff"—*Shak.*): figuratively it implies an ability to comprehend fully or adequately something beyond the mental reach of many (sometimes, most or all) men (as, "Chartres [the cathedral] expressed... an emotion, the deepest man ever felt,—the struggle of his own littleness to *grasp* the infinite"—*H. Adams*; "the evil of the corruption and falsification of law, religion, education, and public opinion is so enormous that the

minds of ordinary people are unable to *grasp* it"—*Shaw*; cf. "A man's reach should exceed his *grasp*"—*Browning*). **Clutch**, in its literal use, implies more rush, more avidity, and often, especially in intransitive use, less success in getting hold of (especially with the hands or fingers) the thing desired than *grasp*; only when success is implied is a tight hold or a clenching suggested; as, "I gave him all the money in my possession... Gunga Dass *clutched* the coins, and hid them at once in his ragged loin-cloth" (*Kipling*); "He *clutched* Father Joseph's hand with a grip surprisingly strong" (*Cather*); "I... *clutched* desperately at the twigs as I fell" (*Hudson*); "*clutching* at him as he reeled backwards" (*Shaw*). In extended use, the term is almost entirely figurative, usually suggesting a movement of the mind or spirit or emotions that is comparable to that of tentacles; as, "[Prudentius] *clutches* at, rather than *grasps*, the Roman verse tradition" (*Fitzmaurice-Kelly*); "A man was now terribly at the mercy of fate, and *clutched* at any possible safeguard" (*Buchan*); "Can you never like things without *clutching* them as if you wanted to pull the heart out of them?" (*D. H. Lawrence*). **Snatch** carries the strongest implication of a sudden, hurried movement of any of these terms, but it seldom carries as strong a suggestion of the use of force as does its closest synonym, *seize*: rather, it often implies stealth (as, to *snatch* a purse; to *snatch* a kiss), or promptness in rescuing (as, to *snatch* a child from the flames; he was *snatched* from the jaws of death), or rudeness or roughness (as, he *snatched* the book from her hand; "I *snatched* his hat off his head"—*Sterle*). Consequently, in figurative use, one *snatches* only what one can get by chance, surreptitiously, by prompt action, or the like; as, to *snatch* gladly any opportunity for rest; to *snatch* a joy in their discomfiture; to *snatch* a free moment for writing a letter. **Grab** commonly implies more rudeness or roughness than *snatch* does at times, and it also usually implies as much force or violence as *seize*: distinctively, it often suggests vulgarity and indifference to the rights of others or to the standards of the community, or a more or less open unscrupulousness in getting what one wants for oneself; as, to *grab* all the food from the table; to *grab* one's hat and run; to *grab* power; to *grab* a franchise.

Ana. *Have, hold, own, possess: *catch, capture, nab, cop: confiscate, appropriate, pre-empt (see *ARROGATE*).

2 Captivate, enchant, charm, fascinate, bewitch, allure, *attract.

3 Take, assume are very close synonyms when they mean to adopt or accept as one's own something not previously belonging to one (a person or thing) by nature or by virtue of one's constitution, character, office, condition, or the like. As here compared, that which is *taken* or *assumed* is rarely a tangible thing, and then usually one that is the sign or symbol of a function, an office, a duty, or a state in life; thus, to *take* the veil is to be invested with the habit of a nun (of which the veil is a conspicuous feature) in a ceremony which includes the pronouncing of vows; to *assume* the toga (*loga virilis*) was, to the Roman youth of fourteen, to invest himself with the plain white toga which was the recognized sign of his attainment of manhood; to *take* the crown; to *assume* the livery of a servant or the robes of office. When that which is taken or assumed is something intangible, the words are usually distinguishable by subtle differences in meaning which are, however, not the same in all collocations. **Take**, especially when the subject of the verb is a thing, often suggests passivity or lack of resistance to external influences in that which *takes*; **assume**, on the other hand, often implies activity or some compelling power in that which *assumes*; thus, a fiber that *takes* a dye absorbs it easily and readily; an insect

that *assumes* the color of the plant on which it feeds has by implication (not necessarily in fact) some means of imitating that color; a pudding *takes* its shape from the mold in which it is chilled; a person's face *assumes* an expression when it reveals what he feels or what he wishes others to think he feels. When a person, rather than a thing, is the subject of the verb, *take* is often more colorless than *assume*, the latter sometimes suggesting arrogation, sometimes deliberate acceptance of a burden, sometimes presumption, or the like; thus, to *assume* charge of another's affairs suggests more initiative than to *take* charge, which may be merely an answer to a request; one *takes* office, but one *assumes* power, sovereignty, jurisdiction; one may *take* the blame when one does not attempt to answer criticism, but one *assumes* the blame only when one removes it from others; an actor *takes* a role in a play, but a dictator *assumes* the role of lawgiver. In these and similar instances *take* may carry the full implications of *assume* by adding to it one of certain prepositions or prepositional phrases; thus, one says either to *assume*, or to *take on*, the pose of a martyr; to *assume*, or to *take upon oneself*, new obligations; to *assume*, or to *take up*, the burdens of office.

Ana. *Adopt, embrace: appropriate, pre-empt (see ARROGATE). *enter, penetrate.

4 *Receive, accept, admit.

Ana. Acquiesce, accede, *assent, consent, subscribe.

5 *Bring, fetch.

Ana. *Carry, convey, bear: deliver (cf. *delivery* at DELIVERANCE).

taking. Captivating, enchanting, charming, fascinating, bewitching, alluring, attractive. See under ATTRACT.

tale. *Story, narrative, anecdote, yarn.

Ana. *Fiction, fable: *myth, legend, saga: *novel, romance.

talent. Genius, *gift, faculty, aptitude, knack, bent, turn.

Ana. Capacity, *ability, capability: *art, skill, craft, cunning: endowment, enduement (see corresponding verbs at DOWER).

talisman. *Fetish, charm, amulet, periapt.

talk, v. *Speak, converse.

Ana. *Discuss, dispute, argue: *discourse, expatiate, dilate, descendant: *chat, chatter, prate.

talk, n. *Speech, address, oration, harangue, allocution, lecture, prelection, sermon, homily.

talkative. **Talkative, loquacious, garrulous, voluble** are here compared chiefly as applied to persons and their moods and as meaning given to talk or talking. The same distinctions in implications and connotations are also seen in their corresponding nouns **talkativeness, loquacity (or loquaciousness), garrulity (or garrulousness),** and **volubility (or volubleness).** **Talkative** and **talkativeness,** the least explicit of these terms, may imply nothing more than a readiness to engage in talk or they may suggest fluency and ease in talking or a disposition to enjoy conversation; as, "A *talkative* boy learns French sooner in France than a silent boy" (*Sydney Smith*); "Good-humoured and *talkative*, he preferred any company rather than none" (*Thackeray*); "among them they noticed a beautiful, slim, *talkative* old man, with bright black eyes and snow-white hair" (*L. P. Smith*). **Loquacious** and **loquacity** more commonly imply fluency and ease in speech: they may variously imply qualities as diverse as the power of expressing oneself articulately or eloquently or a disposition to indulge in chattiness or glibness; as, "Your French friend...stuns you with his *loquacity*" (*Smollett*); "to become *loquacious*, or, as it is familiarly called, *chatty*" (*Scott*); "every glib and *loquacious* hireling who shows strangers about their picture

galleries, palaces, and ruins" (*Trench*); "He was not *loquacious*: but, when he was forced to speak in public, his natural eloquence moved the envy of practised rhetoricians" (*Macaulay*). **Garrulous** and **garrulity** imply prosy, tedious, or rambling loquacity and usually suggest much idle talk about trivial things; as, "a fond *garrulous* old man, who loved to indulge his mind in reminiscences of the past" (*Trollope*); "*garrulous* Pepys" (*J. R. Lowell*). "We cannot, therefore, explain away this deliberate act as due to the *garrulity* of age, or accept the other excuses with which his admirers have sought to palliate it" (*L. P. Smith*). **Voluble** (for fuller consideration see VOCAL, 2) and **volubility** suggest a free, easy, and unending loquacity; as, *voluble* Latins gesturing continuously as they talked; "a brilliant, swift, *voluble*, affectionate, and pleasant creature" (*Carlyle*); "He sang of the lark, and it was the lark's *voluble* self" (*Pater*); "for it was not a fault in him to dislike Aunt Charlotte, whose *volubility* must have assorted ill with his customary reserve" (*Arch. Marshall*).

Ana. *Vocal, fluent, articulate, voluble, glib, eloquent: *vociferous, clamorous.

Ant. Silent. — **Con.** Reticent, reserved, uncommunicative, secretive (see SILENT).

talkativeness. Loquacity, garrulity, volubility. See under TALKATIVE.

Ana. Fluency, articulateness, eloquence, volubility, glibness (see corresponding adjectives at VOCAL).

Ant. Silence.

tall. *High, lofty.

Ant. Short.

tallow. *Adipose, marrow, suet, lard.

tally, v. *Agree, square, accord, harmonize, correspond, conform, comport, jibe.

Ana. *Match, equal: coincide, concur (see AGREE).

Con. Differ from, *differ with.

tame, adj. **Tame, subdued, submissive** come into comparison when they mean rendered docile and tractable or incapable of asserting one's will, either permanently or for the time being. **Tame** implies opposition to *wild* and in its literal sense applies chiefly to animals that have been domesticated and therefore accustomed to control by men (as, *tame* versus wild horses; the *tamest* of *tame* cats): in extended use it also applies to persons (or, less directly, to the acts, words, etc., of persons) whose wills have been broken or who have allowed themselves to be dominated by the will of another (as, the haughty Katharine became *tame* under Petruchio's treatment; "They should expose themselves...to public contempt, on account of their *tame* behaviour"—*Hume*; "The tribunal lately so insolent, became on a sudden strangely *tame*" (*Macaulay*). Often, the term implies little more than a temperamental lack of proper spirit or independence, or undue docility or timidity; as, a *tame* reply; "*tame* acquiescence in tradition and routine" (*Babbitt*). **Subdued**, in its most general sense, implies a toning down with a loss of all vehemence or intensity (as, *subdued* voices; *subdued* colors): as here considered, in reference to persons, their acts, words, characters, etc., it implies complete domination by or subjection to another (or a similar response to circumstances) and a resulting quietness or meekness that suggests a broken will, complete dependence, excessive timorousness, or the like; as, "Our polished manners are a mask we wear. And at the bottom, barbarous still and rude. We are restrained indeed, but not *subdued*" (*Cowper*); "She had a mild, *subdued*, expiring look" (*Crabbe*); "In such a man, so gentle and *subdued*... A race illustrious for heroic deeds. Humbled, but not degraded, may expire" (*Wordsworth*). **Submissive** implies the state of mind of one who has yielded his will to con-

trol by another and who, therefore, unquestioningly or humbly obeys or accepts what is given; as, "In the *submissive* way of one long accustomed to obey under coercion, he ate and drank what they gave him" (*Dickens*); "Meek, humble, timid persons...who are cautious, prudent, and *submissive*, leave things very much as they find them" (*A. C. Benson*); "Mother had no will of her own; all her life long...she had been wholly *submissive*" (*V. Sackville-West*).

Ana. Tractable, amenable, docile, biddable, *obedient: *timid, timorous: pliant, pliable (see PLASTIC).

Ant. Fierce.

tamper. *Meddle, interfere, intermeddle.

Ana. *Interpose, interfere, intervene: molest, trouble, discommode, *inconvenience.

tang. *Taste, sapidity, flavor, savor, relish, smack.

Ana. Pungency, piquancy, raciness (see corresponding adjectives at PUNGENT).

tangent, adj. Abutting, adjoining, *adjacent, contiguous, conterminous, juxtaposed.

tangible. Sensible, *perceptible, palpable, appreciable, ponderable.

Ana. *Material, physical, corporeal, objective: actual, *real, true: obvious, *evident, manifest.

Ant. Intangible.

tantalize. Tease, harass, harry, *worry, annoy, plague, pester.

Ana. Vex, *annoy, irk, bother: torment, torture, try, *afflict: *bait, badger.

Ant. Satisfy.

tantamount. *Same, selfsame, very, identical, identic, equivalent, equal.

Ana. Like, alike, uniform, *similar.

tar, n. *Mariner, sailor, seaman, gob, matlow, blue-jacket, rating.

tardy, adj. **Tardy, late, behindhand, overdue** come into comparison when they apply to persons or things that do not arrive or take place at the time set, the time due, or at the expected and usual time. **Tardy** implies a lack of promptness or punctuality or a coming or happening after the proper or appointed moment: it does not, however, necessarily imply slowness in movement but may suggest rather a being delayed by any of a number of other causes; as, the morning of the storm, the number of *tardy* pupils broke all records; the bridge game was delayed by the *tardy* arrival of several guests. **Late** implies an opposition to *early* and usually connotes a failure to come or take place at the time due because of procrastination, slowness of movement, growth, or the like, or the interference of obstacles: it is applied especially to persons or to things that are governed by a schedule; as, to be *late* for work day after day; you are too *late* to get your dinner; even a *late* repentance is better than no repentance at all; the train is very *late* today; spring is very *late* this year. **Behindhand** usually applies either directly or indirectly to persons who are in arrears, as in the payment of debts or in the fulfillment of obligations, or who are not up to the time or the moment as in mental progress, in the acceptance of fashions, or the like; as, to be *behindhand* in the payment of one's room rent; a physician so *behindhand* in his work that when night arrives he has still a large number of calls to make; "A whole class who were *behindhand* with their lessons" (*N. Hawthorne*). **Overdue** is applied to things (or sometimes to persons) that are affected by a person's being markedly late or behindhand: thus, a person is *behindhand* (not *overdue*) in the payment of his rent, but the rent is *overdue* (not *behindhand*) when such a situation occurs; a ship is *overdue* when it is seriously or conspicuously behind its scheduled time of arrival.

Ana. Dilatory, laggard, *slow: delayed, detained, retarded (see DELAY).

Ant. Prompt.

tariff. Customs, duty, toll, impost, excise, *tax, levy, assessment, rate, tribute, tithe, teind, cess.

tarry. *Stay, remain, wait, abide, linger.

Ana. *Delay, procrastinate, lag, loiter, dawdle, dally, dillydally.

tart, adj. *Sour, acid, acidulous, dry.

Ana. Piquant, *pungent: *sharp, keen: curt, brusque, blunt (see BLUFF): *irritable, snappish, waspish.

Tartarean. *Infernal, chthonian, Hadean, Stygian, hellish.

task, n. **Task, duty, job, chare (or char), chore, stint, assignment** come into comparison when they mean a piece of work which one is asked to do and is expected to accomplish. **Task** distinctively implies imposition by another such as an employer, a parent, or a teacher; as, he was given the *task* of cleaning the cellar; each day every child was asked to perform a special *task*. In extended use, *task* often suggests imposition not by a person, but by the nature or the necessities of one's occupation, one's station in life, one's beliefs, or the like. "But these miracles in the world of art...could be observed and noted and described and classified; and this, in Sainte-Beuve's opinion, was the most important *task* of the critic" (*L. P. Smith*). Sometimes the work to be accomplished is not that of a person but of a thing: then *task* comes very close to *function* in meaning. "Every inch of material, up and down, from crypt to vault...had its *task*, giving support where support was needed, or weight when concentration was felt" (*H. Adams*). Since the word usually connotes difficulty or strain, it is often qualified by *hard*, *difficult*, etc., but seldom in precise use by their opposites; it may even be used without qualification to imply arduousness; as, to make a *task* of writing a letter. **Duty**, as here considered (see also OBLIGATION, 1), may or may not imply a taskmaster but it invariably suggests an obligation to perform and a responsibility for performance; as, the *duties* of a parlormaid usually include waiting on table; the porter was given the *duty* of seeing that doors and windows were locked at night. "He thought that now all the worries were over, that there was nothing before him but *duties*... A most soothing certitude" (*Conrad*). **Job** (see also POSITION, 3), as here considered, carries in itself no implication of imposition nor of obligation; the term is applied to a piece of work (etymologically, a lump) which one is asked to do because of one's occupation, trade, or business but which one is expected to accomplish only if one accepts the opportunity; as, to engage a carpenter for the *job* of paneling a room; householders needing men for small *jobs* were asked to inquire of the welfare department. **Job** is the commonest term for any piece of work which one undertakes voluntarily when offered or enters into on one's own initiative, and which one judges by its appeal to one, or by its degree of difficulty, or by the way in which it is done; as, when you start a *job* stick to it; to make a good *job* of a piece of research; he found polishing the table a disagreeable *job*. "He doesn't believe in parsons standing outside things and only doing soft *jobs*" (*R. Macaulay*). **Chare** and **chore** (the former the usual, but now obsolescent, British form, the latter the usual American form) though they are both colloquial terms for small pieces of work, especially about the house or its environs, are not exact synonyms. **Chare** usually implies household work and denotes a job of cleaning, scrubbing, or the like, given a woman hired by the day or hour (a *charwoman*), or one of the duties of a domestic servant. **Chore**, on the

other hand, is applied to one of the routine activities that must be regularly performed by one responsible for a home, for the care of stock, and the like, or by some person given this as a task or duty; as, when Mrs. B finishes her evening *chores*, she usually goes visiting; each child in the family had his daily *chore*; "He made my health a pretext for taking all the heavy *chores*" (*Cather*). *Chore* is often used colloquially without qualification for a difficult or disagreeable, yet necessary, piece of work; as, picking up the pieces of a shattered glass bulb is a *chore*. *Stint* and *assignment* denote a specific and clearly defined task. But *stint* implies allotment or prescription and suggests that the task is either one's share of a work in which several persons are engaged or the amount of work set for accomplishment within a given period of time; as, each girl in the family had her daily *stint* which she was expected to finish before noon; to work by *stint*. *Stint*, when used of the amount of work one sets for oneself, often suggests a minimum which must be accomplished within a given time. "Here...I...took to doing 'German Romance' as my daily work, 'ten pages daily' my *stint*" (*Carlyle*). *Assignment* suggests that the task is prescribed in character and limited in amount; it is used chiefly of a specific task set by one in authority, such as a teacher or an editor, often for accomplishment elsewhere than in the classroom, office, or the like. "The photographers had been sent on an *assignment*, and were determined not to return to their papers without pictures" (*V. Heiser*).

Ana. *Function, office, duty, province: *work, labor, toil: employment, occupation, business, *métier* (see **WORK**).

taste, n. 1 **Taste, sapidity, flavor (or flavour), savor (or savour), tang, relish, smack** are here compared as meaning that property of a substance which makes it perceptible to the gustatory sense when it comes into contact with the taste buds of the tongue or, in popular but scientifically incorrect language, with the palate. **Taste** is not only the most inclusive of these terms but it also gives no suggestion of a specific character or quality; as, to be able to distinguish types of oranges by their *taste*; to dislike the *taste* of olives; "only four *tastes*, acid, bitter, salt, and sweet, are fundamental. All others are either combinations or, more commonly, sensations of *taste* modified by smell" (*Webster's New Int. Dict., 2d Ed.*). **Sapidity** implies, far more than *taste*, a decided or highly perceptible sensation; thus, to say that a given meat or food has no *sapidity* is not to say that it has no taste, but that the taste can be described as bland or neutral or not clearly definable; so, because of its *sapidity*, some persons prefer game that is "high" to that which is fresh; fruits lacking in *sapidity*. **Flavor** applies to the property of a thing which is recognized by the co-operation of the olfactory and gustatory senses. The term therefore usually denotes the combination of tastes and smells perceived when eating or drinking a thing. Usually, also, it suggests the blend of tastes and odors that give a substance a distinctive or peculiar character; as, this peach has a peculiarly fine *flavor*; the *flavor* of a fine tea has been described as "a bouquet which can be tasted"; "My stock of provisions had been so long consumed that I had forgotten the *flavour* of pulse and maize and pumpkins and purple and sweet potatoes" (*Hudson*). **Savor** stresses the quality, such as sweetness or bitterness, that is detected by the organs of taste and smell (sometimes of one more than the other). It often implies sensitiveness of palate (strictly, taste buds) or of nose and may refer to the odor of that which is cooking as well as to the flavor of that which is eaten. "Viands of various kinds allure the taste Of choicest sort and

savour" (*Pope*). "The *savour* of the stew had floated from the cottage into the porch with such appetizing distinctness, that the meat, the onions, the pepper, and the herbs could be severally recognized by his nose" (*Hardy*). "A traveler...described the *savor* of the durian [a tropical fruit] as a 'rich butter-like custard, highly flavored with almonds...but intermingled with it come wafts of *flavor* that call to mind cream cheese, onion sauce, brown sherry, and other incongruities'" (*V. Heiser*). **Tang** applies chiefly to a sharp penetrating savor, flavor, or odor; it usually implies a live, pungent quality; as, to prefer apples with a *tang*; the *tang* of dry champagne; the *tang* of a salt breeze; "Happiness to me is wine, Effervescent, superfine. Full of *tang* and fiery pleasure" (*Amy Lowell*). **Relish** and **smack** are now comparatively rare in this sense; *relish* (see also **TASTE**, 2) comes close to *savor* and usually suggests enjoyment of the taste (as, "A Laplander or Negro has no notion of the *relish* of wine"—*Hume*; "My first endeavour must be to distinguish the true *taste* of fruits, refine my palate, and establish a just *relish* in the kind"—*Shaflesbury*); *smack* comes close to *flavor* but applies usually to one that is added to or different from the typical flavor of the substance (as, ale with a burnt musty *smack*; there is a good *smack* of pepper in this stew).

Figuratively, these words usually call up one or more suggestions from their literal senses. **Taste** usually denotes a strong impression or a heightened sense of the quality of something; as, the book leaves a bad *taste* in the mouth; "How comfortable is the feeling and *taste* of grace" (*Lyly*). **Flavor** implies a predominant or distinctive quality suggestive of a flavor in its literal sense; as, "The higher heroisms and the old rare *flavors* are passing out of life" (*W. James*); "The passing hour's supporting joys have lost the keen-edged *flavor*" (*Meredith*); "Your words have no longer their old *flavour*" (*Hardy*); "*Flavour*, in fine, is the spirit of the dramatist projected into his work in a state of volatility, so that no one can exactly lay hands on it, here, there, or anywhere" (*Galsworthy*). **Savor** (see also **ATMOSPHERE**, 2) differs from *flavor* largely in suggesting a stimulating or enlivening character or quality that, like salt, spice, or other seasoning, gives life or pungency to a thing; as, "a Puritanism that still strove to keep in its creed the intense *savor* which had long gone out of its faith" (*J. R. Lowell*); "no one treats me like a child now, and the *savour* has gone out of my life" (*H. Ellis*). **Tang, relish, and smack** come still closer to their literal senses. "The language has a *tang* of Shakespeare" (*Gray*). "Yankeeisms...whose salt-sea *flavor* has its own peculiar *tang* in it" (*J. R. Lowell*). "The full *flavor*, the whole *relish* of delight" (*H. W. Beecher*). "Your lordship...hath yet some *smack* of age in you, some *relish* of the saltiness of time" (*Shak.*). "The Saxon names of places, with the pleasant, wholesome *smack* of the soil in them" (*Arnold*).

2 **Taste, palate, relish, gusto, zest** come into comparison when they mean a liking for or an enjoyment of something because of particular qualities that literally afford one's taste buds (or in idiomatic but scientifically inaccurate English, one's palate) a pleasurable sensation, or that figuratively produce comparably pleasant mental or aesthetic impressions. **Taste** (as here compared: see also **TASTE**, 1), implies a liking that is either natural or acquired: the term is often used to designate any deep-seated or ingrained longing for something that lies behind one's predilection for it, one's bent to it, one's aptitude for it, or any predisposition to enjoy one thing more than another; as, to cultivate a *taste* for olives; he had no *taste* for the law; "Had he discovered in himself a capacity and a *taste* for that sort of thing [arguing, preaching,

remonstrating?'" (*Conrad*). More often, *taste* refers to a liking that is based upon an understanding of peculiar excellences, especially aesthetic excellences, and that gives one a more or less discerning appreciation of a thing's (especially, a work of art's) beauty, or perfection of form, design, color, etc., or grace and dignity, and consequently greater enjoyment of it; as, "Their *taste* is exquisite" (*L. P. Smith*); "Without any technical knowledge she had acquired a good *taste* in music" (*H. Ellis*). In this sense *taste* is often so close to another sense of *taste*, namely, the power of correct or discriminating aesthetic judgment, that the two meanings tend to overlap and are sometimes confused. In the first case, however, *taste* is not an abstraction, but a concrete thing referable to an individual or a group of individuals and therefore subject to evaluation as good, bad, indifferent, etc. "We have our *tastes* in painting as in confectionery. Some of us prefer Tintoretto to Rembrandt, as we do chocolate to cocoanut" (*Brownell*). "If he found this room more to his *taste* than any other in the house, either the house or his *taste* must have been deficient" (*Arch. Marshall*). In the latter sense, *taste* is an abstraction used commonly without reference to individuals. Like all abstractions, it is tenuous, variously defined, and not clearly established in meaning. In general, however, it implies a capacity, characteristic of only the finest minds and spirits, for discerning true beauty and the setting up of standards whereby all may be taught to appreciate the beauty they discern: sometimes it denotes the body of standards so set up; as, an education in *taste*; there is no *taste* evident in the decoration of this house; "every author, as far as he is great and at the same time original, has had the task of creating the *taste* by which he is to be enjoyed" (*Wordsworth*). **Palate** (literally, the roof of the mouth, once popularly regarded and still spoken of as the organ of the sense of taste) may be used either literally or figuratively in the sense here considered: a liking dependent upon pleasurable physical sensation may be suggested (as, cooked according to the *palate* of an epicure; a wine taster must have a discriminating *palate*) but the term refers equally, if not more often, to pleasure afforded the mind (as, "Any subject that was not to their *palate*, they...condemn'd"—*Millon*; "I heard a little too much preaching...and lost my *palate* for it"—*G. Eliot*). **Relish** often suggests a more distinct or a more exciting flavor in the thing that evokes enjoyment or a liking: it usually, however, implies a keener or more personal gratification than *taste*; as, "a man of...a quick *relish* for pleasure" (*Macaulay*); "He walked up-hill...as the rest of the [stage coach] passengers did; not because they had the least *relish* for walking exercise" (*Dickens*); "It [the artist's brain] can go further and build up, always with a passionate *relish* for what it is producing" (*C. E. Montague*). **Gusto** usually implies either the hearty relish with which one sometimes may attack a meal, execute a piece of work (especially a work of art), or go about the performance of any task, duty, or the like, or a quality in the thing which is executed or in the work which is performed that indicates vital or enthusiastic interest, keen delight, and intense imaginative or emotional energy in the doing of it. "[He] argues that the chief contribution of [Theodore Roosevelt]...to American life was the example of his gigantic *gusto*, his delight in toil and struggle, his superb aliveness" (*Mencken*). "[Prescott's] swing and *gusto*, his abundant detail, and the swift excitement of his narrative" (*Times Lit. Sup.*). "This dramatic sense...gives Rostand's characters—Cyrano at least—a *gusto* which is uncommon on the modern stage" (*T. S. Eliot*). **Zest**, like *gusto*, applies

either to the spirit in which one approaches something one likes to do, make, encounter, or the like, or the quality imparted to the thing done, made, envisioned, etc., as a result of this spirit. In contrast with *gusto*, it suggests eagerness, avidity, or a perception of a thing's piquancy or peculiar flavor, rather than a hearty appetite indicative of abounding energy. "The Elizabethan theatre had its cause in an ardent *zest* for life and living" (*Arnold*); "No one has painted the riotous merriment of a country fair...with such *zest* as Rubens" (*Binyon*).

Ana. *Predilection, prepossession, partiality: appreciation, understanding, comprehension (see corresponding verbs at UNDERSTAND): inclination, disposition, predisposition (see corresponding verbs at INCLINE): *discernment, discrimination, penetration, insight, acumen.

Ant. Antipathy.

tasty. Savory, sapid, saporous, *palatable, appetizing, toothsome, flavorsome, relishing.

Ant. Bland.

tat, v. *Weave, knit, crochet, braid, plait.

tattle. *Gossip, blab.

Ana. Divulge, disclose, betray, *reveal.

taunt, v. Mock, deride, *ridicule, twit, rally.

Ana. *Scoff, jeer, gibe, flout: affront, insult, *offend, outrage: scorn, disdain, scout (see DESPISE): chaff, *banter, quiz.

tautology. *Verbiage, redundancy, pleonasm, circumlocution, periphrasis.

tawdry. *Gaudy, garish, flashy, meretricious.

Ana. *Showy, pretentious: vulgar, gross, *coarse: flamboyant, *ornate, florid.

tawney. Variant of TAWNY.

tawny. *Dusky, swarthy.

tax, n. **Tax, levy, assessment, rate, excise, impost, customs, duty, tariff, toll, tribute, tithe, teind, cess** come into comparison when they mean a compulsory contribution exacted by some recognized authority or by some superior power chiefly for the purpose of providing revenue. **Tax** is the ordinary comprehensive term for such a contribution when it is imposed on the citizens or inhabitants of a state by the government, is laid upon their property, income, valuables, transactions, and the like, is payable in money, and is usually determinable in amount by some method of proportioning or of distribution of the burden; as, a sales *tax*; an income *tax*; a poll *tax*. **Levy** stresses compulsory raising and collecting; as here compared, it is applied chiefly to special or emergency taxes but it may also be applied to any contribution that is collected by the exercise of legal or constituted authority, or by the exercise of force, as by an invader or conqueror, and that consists of money or of supplies or even of men to serve in the army or navy; as, to propose a capital *levy* upon the people to bear the cost of a war; "the other ancient *levies* were in the nature of a modern land-tax" (*Blackstone*); "domestic debt redemption *levies*...are highly injudicious" (*Shaw*). **Assessment** is applicable to any money *levy* made on an individual by constituted authority; etymologically it implies a prorating of the amount, but this implication is not invariably conveyed; as, a real-estate tax is an *assessment* upon property; the stockholders' *assessment* to cover bank losses was fifty percent of the par value of their shares; the society levied an *assessment* on its members of one dollar each to pay for the entertainment. **Rate**, which is in British use, is distinctively applied to a tax on property assessed at so much in the pound of valuation, and levied especially for local purposes; thus,

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

borough rates in England roughly correspond to *city taxes* in the United States; a *ratepayer* in England is the equivalent of the American *taxpayer* when the latter term, as is usual, implies reference to property owners. An *excise* is a tax levied on the manufacture, sale, use, and consumption of certain commodities, such as liquor, cigarettes, and automobiles, or on the pursuit of various occupations or sports, such as liquor-selling and hunting, that require a license to be legally engaged in. An *impost* in its specific and more common sense is a tax levied on imports; it is also called *customs* (now rarely, if ever, in the singular form, *custom*) or a *duty*; as, to pay the *impost*, or the *customs*, or a heavy *duty*, on diamonds bought in Amsterdam. In general usage, however, *impost* is often more inclusive and refers to any revenue-raising tax laid upon a person indirectly or directly. "In England.... popular language dubs all *imposts* by a non-sovereign body, *rates*, and all *imposts* by a sovereign, or like a colony, quasi-sovereign body, *taxes*, *customs* or *excise*" (F. Palgrave). *Customs* was once wider also in its range of application, for it designated any tax levied on goods or merchandise on its way to market, but especially on those being exported from or imported into a country. *Duty*, especially in British use, is a particularly comprehensive term; in general, it includes all taxes known as *customs* and *excises*, and a variety of other taxes on possessions and on certain transactions such as the transfer or succession of property, the legal acknowledgment of deeds and other instruments, or the probate and execution of a will; as, stamp *duties*; death *duties*. *Tariff*, when it designates a tax, specifically means the scheduled duty on an import; as, the *tariff* on raw wool was generally regarded as too high. *Toll*, which now commonly denotes a tax paid for a privilege, such as a right to use a public highway or a bridge, was once so general in its application that it covered any of the various taxes now known as *customs* and *excises*. "When the King raised his *tolls* on foreign merchandise the courts still decided in his favour" (Belloc). *Tribute*, as here compared, is now chiefly historical or figurative in its use. Originally it denoted a tax levied upon a people not for their own or their ruler's use but for payment to another government or ruler in acknowledgment of their subjection to or dependence upon it or him. "Millions for defence, but not one cent for *tribute*" (inscribed on memorial of Charles Colesworth Pinckney). *Tithe*, or in Scots use, *teind* (literally a tenth of something) historically designates either a voluntary or a compulsory contribution for religious or charitable uses paid in money or in kind, representing a tenth of the annual increase arising from the profits of one's stock, one's industry, or the like. In British or other ecclesiastical and legal use, it came to mean any tax levied for the support of the church or of its charities. *Cess*, which is chiefly in Irish, but also in Scottish and English dialectal use, is in Ireland the equivalent of *rate*, and in Scotland the equivalent of *land tax*. It always implies assessment (with which it is etymologically associated) and in some extended use connotes extortionate levying of money and supplies for specific purposes.

teach. *Teach, instruct, educate, train, discipline, school* are here compared as meaning to cause others (or sometimes oneself) to acquire knowledge or skill. *Teach* implies a direct showing to another, with the intent that he will learn; it usually suggests the imparting of information, but in addition, it often also connotes the giving of any help that will be of assistance to the learner in mastering such difficulties as are involved, in putting the new knowledge to use, or in making it a part of his mental or physical equipment; as, the older child is *teaching* the younger one how to read; to *teach* arithmetic;

to *teach* the Gospel; to *teach* dancing. "The common notion is that Darwin *teaches* that all history is development towards a goal" (Inge). *Instruct* stresses the furnishing, especially the methodical furnishing, of necessary knowledge or skill to a person or persons; as, a reserve officer was sent to *instruct* the boys in military tactics. "Schoolmasters will I keep within my house, Fit to *instruct* her youth" (Shak.). "He is wise who can *instruct* us and assist us in the business of daily virtuous living" (Carlyle). *Educate*, although it implies or presupposes teaching or instruction as the means, in discriminating use stresses the intention or the result, the bringing out or development of qualities or capacities latent in the individual or regarded as essential to his position in life; as, to determine that his children should be *educated* in the best schools available; schools that *educate* boys for the ministry or priesthood. "In my eyes the question is not what to teach, but how to *Educate*" (Kingsley). *Train*, on the other hand, even when it is used as a close synonym of *educate*, almost invariably suggests a distinct end or aim which guides teachers and instructors; it implies, therefore, such subjection of the pupil as will form him or fit him for the state in mind; as, "Train up a child in the way he should go" (Proverbs xxii. 6); "Universities exist... on the one hand, to *train* men and women for certain professions" (B. Russell). In current use, *train* is especially employed in reference to the instruction of persons (sometimes, animals) who must be physically in best condition, mentally proficient, quickly responsive to orders, or the like, for a given occupation or kind of work; as, to subject new recruits to three months' intensive *training*; to *train* dogs to catch hares; to keep members of a football squad in *training* from early September until the end of November. *Discipline*, even more than *train*, implies subordination to a master or subjection to control, often self-control. "Great natural genius's that were never *disciplined* and broken by rules of art" (Addison). "He consciously seeks to *discipline* himself in fine thinking and right living" (H. Ellis). "One must not let one's thoughts run on like this; one must *discipline* one's mind" (V. Sackville-West). *School*, though it is not infrequently found in the sense of *educate* (as, "some of them have been *schooled* at Eton and Harrow"—Shaw) and in the sense of *teach* or *instruct* (as, "*Schooled* by my guide, it was not difficult to realise the scene"—S. C. Hall), is now chiefly used in the sense of *train* or *discipline*, often, however, with the added implication of enduring that which is hard to bear. "That I can bear. I can *school* myself to worse than that" (Wilde). "He had to *school* himself into keeping quiet when Miss Youghal went out riding with some man who tried to flirt with her" (Kipling).

Ana. Impart. *communicate: *practice, drill, exercise; inculcate, instill, *implant.

tear, v. *Tear, rip, rend, split, cleave, rive* agree in meaning to separate forcibly one part of a continuous material or substance from another, or one object from another with which it is closely and firmly associated. *Tear* implies pulling apart as by main force; it often suggests jagged, rough edges or, literally or figuratively, laceration; as, to *tear* one's coat; to *tear* a piece of paper lengthwise; to *tear* one's skin on a nail; "he took hold of it [a bush] with his powerful hands and *tore* it out by the roots" (S. Anderson); so furious that he could *tear* the hair from his head; to *tear* oneself away from one's home; the grief *tears* her heart. *Rip* usually implies a forcible pulling or breaking or cutting apart, sometimes but not always along a line or juncture (such as a seam, a joint, a connection); as, "Macduff was from his mother's womb Untimely *ripped*" (Shak.); to *rip* one's

gloves (or a garment, or a sail); to *rip* the shingles from a roof; to *rip* a nearly healed incision. *Rend* is elevated or poetical; the term not only implies greater violence than *tear* but it either heightens the implication of a lacerating effect or adds that of severing or sundering; as, "Thou . . . didst *rend* thy clothes" (2 *Chronicles* xxxiv. 27); "*Rend* your heart, and not your garments" (*Joel* ii. 13); "The black volume of clouds . . . *rent* asunder by flashes of lightning" (*Irving*); "The unborn child from whom I had been *rent*" (*Dickens*); "his pride and vanity had been *rent* by her ultimate rejection" (*H. G. Wells*). *Split* implies a breaking apart or fracture through the entire length or, less commonly, width or depth, especially in the direction of grain or layers; as, the vessel was *split* in two by the collision; to *split* a log with a wedge; great rocks *split* by an earthquake. Figuratively, the term implies force or intensity sufficient to split, as one's heart with grief, one's sides (or body) with laughter, one's head with pain, or the air with noise; as, "Let sorrow *split* my heart, if ever I Did hate thee" (*Shak.*); a *splitting* headache; air-*splitting* outcries. *Cleave* (commonly somewhat rhetorical) emphasizes more strongly than *split* the idea of sundering, especially of hewing asunder. "William de Tracy . . . struck the final blow, *cleaving* the Archbishop's [Becket's] skull" (*Lucas*). "To *cleave* a creed in sects and cries [packs]" (*Tennyson*). *Rive* is elevated or poetical for *cleave* or *rend*; as, "Blunt wedges *rive* hard knots" (*Shak.*). "All thoughts to *rive* the heart are here, and all are vain" (*Housman*). "Rock of ages, *cleft* for me, Let me hide myself in Thee; Let the water and the blood, From thy *ripen* side which flowed, Be of sin the double cure" (*Toptady*).

Ana. Slit, slash, *cut: *pull, drag: damage, *injure, impair.

tease. Tantalize, pester, plague, harass, harry, *worry, annoy.

Ana. *Bait, badger, hector, chevy: importune, adjure, *beg: fret, chafe, gall (see *ABRADE*).

techy or tetchy. *Irrascible, choleric, splenetic, testy, touchy, cranky, cross.

Ana. & Ant. See those at *TOUCHY*.

tedious. *Irkesome, tiresome, wearisome, humdrum.

Ana. Burdensome, *onerous, oppressive: fatiguing, exhausting, fagging, jading (see *TIRE*, v.): *slow, dilatory, deliberate.

Ant. Exciting.

tedium. *Tedium*, *boredom*, *ennui*, *doldrums* come into comparison when they denote a state of dissatisfaction and weariness. *Tedium* suggests a repression of energy for lack of a proper or adequate outlet, and dullness or lowness of spirits resulting from irksome inactivity or from the irksome monotony of one's pursuits or surroundings; as, he could not endure the *tedium* of waiting for more than fifteen minutes; since reading and visitors were prohibited, there was nothing to relieve the *tedium* of her weeks in bed (cf. *tedium vitae* [Latin *taedium vitae*], that is, a feeling of the irksome monotony or of the futility of life). "Able boys and girls will go through endless *tedium* . . . to acquire some coveted knowledge or skill" (*B. Russell*). *Boredom* adds to *tedium* suggestions of listlessness, dreariness, and unrest, resulting either from a lack of interest in one's pursuits or surroundings or from the fact that they now pall or fail to excite interest. "I suppose I shall go on 'existing' till the *boredom* of it becomes too great" (*J. R. Green*). "Evidence . . . that the natives of that unfortunate archipelago [Melanesia] are dying out principally for the reason that the 'Civilization' forced upon them has deprived them of all interest in life. They are dying from pure *boredom*" (*T. S. Eliot*). *Ennui* stresses profound dissatisfaction, discon-

tent, or weariness of spirit; usually it suggests physical depression, languor, or lassitude, as well as boredom. "That *ennui*, that terrible *taedium vitae*, that comes on those to whom life denies nothing" (*Wilde*). "The inexhaustible power and activity of his mind leave him [Pascal] no leisure for *ennui*" (*Arnold*). *Doldrums* applies to a mood or fit of *ennui*, usually suggesting a flagging of energy, an access of dullness, and a depressing letdown physically and mentally; as, after he has finished writing a new book, he is always in the *doldrums*.

Ana. Irksomeness, tediousness, tiresomeness, wearisomeness (see corresponding adjectives at *IRKSOME*): melancholy, dumps, blues, gloom, vapors (see *SADNESS*).

teem. *Teem*, *abound*, *superabound*, *swarm*, *overflow* come into comparison when they denote to be plentifully supplied (*with*) or to be rich (*in*). Though they are often interchangeable, each of these words carries distinctive implications. *Teem* implies productiveness or fecundity; as, the rivers *teem* with fish; his mind *teems* with schemes. In looser use, it often suggests little more than crowding and activity. "Tozeur, which has a railway station and positively *teems* with French officials" (*A. Huxley*). *Abound* implies excess of sufficiency in numbers or amount; usually it stresses profusion. "Distant forests aglow with tropical colours and *abounding* with strange forms of life" (*Jefferies*). It is often used with reference to qualities; as, the young soldiers *abound* in vigor and courage. Unlike all the other words except its intensive *superabound*, it can be predicated of that which exists in abundance as well as of that which possesses in abundance. "Waste, unreason, moral conflict everywhere *abound*" (*J. A. Hobson*). This is especially true of its participial adjective *abounding*. "The life of ultimate simplicity, which brought its own *abounding* satisfaction" (*Arch. Marshall*). *Swarm* in its extended sense implies even more strongly than *teem* motion and thronging. "A market-place *swarming* with buyers and sellers" (*Macaulay*). It is also more capable of suggesting infestation; as, the house *swarmed* with flies. *Overflow* in its figurative sense adds to *abound* the implication of exceeding capacity; as, he *overflows* with good nature; sometimes it suggests glutting; as, the market *overflows* with goods.

Ana. *Bear, produce, yield, turn out: *generate, engender, breed, propagate: multiply, augment, *increase.

teeny. Tiny, little, diminutive, *small, petite, wee, weeny, minute, microscopic, miniature.

teeter, v. *Shake, tremble, quake, totter, quiver, shiver, shudder, quaver, wobble, shimmy, didder, dither.

teind, n. Tithe, *tax, levy, assessment, rate, excise, impost, customs, duty, toll, tariff, tribute, cess.

tell, v. 1 *Count, enumerate, number.

2 Divulge, discover, *reveal, disclose, betray, bewray.

Ana. Impart, *communicate: *relate, rehearse, recite, recount: *inform, acquaint, apprise.

telling. Convincing, cogent, sound, *valid.

Ana. Forceful, forcible, *powerful, potent: *effective, effectual, efficacious: *conclusive, decisive, determinative, definitive.

temerarious. Rash, reckless, foolhardy, daredevil, daring, venturesome, venturous, *adventurous.

Ana. Audacious, bold, intrepid (see *BRAVE*): *precipitate, headlong, abrupt, impetuous.

Ant. Cautious.

temerity. *Temerity*, *audacity*, *hardihood*, *effrontery*, *nerve*, *cheek*, *gall* are here compared only as meaning conspicuous or flagrant boldness in speech, behavior, action, or the like. *Temerity* usually implies contempt of danger and consequent rashness, but often it suggests, especially when a proposal or project is under discussion,

a failure to estimate one's chances of success; as, such *temerity* in attack could be expected only of young and inexperienced leaders; he had the *temerity* to propose to the richest and most popular girl in the town. "Tenth-rate critics and compilers, for whom any violent shock to the public taste would be a *temerity* not to be risked" (Arnold). **Audacity** implies either a bold and open disregard of the restraints imposed by prudence, convention, decorum, sound morals, or the like, or undue presumption in making advances; as, *audacity* in dress or in speech; "he had committed the supreme *audacity* of looking into her soul" (V. Sackville-West). "Lew... there's the colonel coming. . . . Let's go and talk to 'im." Lew nearly fell out of the tree at the *audacity* of the suggestion" (Kipling). **Hardihood** stresses firmness of purpose and often additionally implies considered defiance of conventions, decorum, and the like. It may be used without depreciative intent, but it is frequently employed as a term of contempt almost equivalent to impudence; as, it took *hardihood* in Copernicus to deny the current conception that the earth stood still and that the sun and planets revolved about it; he had the *hardihood* to question his mother's motives in her presence. "The reviewers [of *Leonora*, 1903] . . . were staggered by my *hardihood* in offering a woman of forty as a subject of serious interest to the public" (Bennett). **Effrontery** is invariably derogatory; it is used in place of any of the three preceding words when one wishes to impute to another shameless disregard of the laws of courtesy, propriety, fair dealing, or the like, or an arrogant assumption of a privilege. "You had the *effrontery* to pose as the avenger of outraged morality" (Shaw). "She had won her way to success by strength of will and hardness of heart, and a kind of haughty *effrontery*" (E. Wharton). "Oxford, unable to endure the cool *effrontery* of a Yankee schoolmaster's dabbling in affairs peculiarly English, did not reply [to Noah Webster's suggestion of a combined effort to standardize English spelling]" (H. R. Warfel). **Nerve, cheek, and gall** are slang terms for *effrontery*; *nerve*, however, often carrying a strong suggestion of hardihood, *cheek* of impudence, and *gall* of outrageous insolence; as, he had the *nerve* to criticize his superiors; his *cheek* makes him objectionable to his superiors; the summer people had the *gall* to treat the residents as their inferiors.

Ana. Rashness, recklessness, foolhardiness, daring, venturesomeness (see corresponding adjectives at ADVENTUROUS): precipitateness, impetuosity, abruptness (see corresponding adjectives at PRECIPITATE): impertinence, intrusiveness, officiousness (see corresponding adjectives at IMPERTINENT).

Ant. Caution.

temper, v. 1 *Moderate, qualify, attempt.

Ana. *Adjust, regulate, fix: mitigate, alleviate, lighten, assuage, allay, *relieve: mollify, *pacify, appease.

Ant. Intensity.

2 Temper, anneal, in technical use, agree in meaning to bring glass, steel, copper, or other metal, to the required degree of hardness or toughness by heating and cooling. **Temper** is often used generally in reference to this process, regardless of the specific consistency sought or of the speed of the heating or cooling. In glassmaking, however, it specifically implies a gradual heating and a gradual cooling so that the glass may be rendered less brittle. In steel manufacture, *temper*, strictly, implies merely a gentle reheating of hardened steel to the desired consistency; it is therefore distinguished on the one hand from the prior process of *hardening* by heating and sudden cooling, and on the other from the complete process including hardening and its subsequent tempering; thus,

one *tempers* hardened steel intended for razors by reheating it to 450°, and that intended for swords or springs to 570°. **Anneal** stresses the intent to toughen or make less brittle; it implies a subjection to high heat and either a gradual cooling as in the case of glass or steel or a sudden quenching as in the case of copper or brass. **Anneal** in reference to glass usually implies a reduction of brittleness that has resulted from a prior treatment.

temper, n. 1 *Mood, humor, vein.

Ana. Mettle, spirit (see COURAGE): emotion, *feeling, affection, passion: attitude, *position, stand.

2 *Disposition, temperament, complexion, character, personality, individuality.

Ana. Constitution, composition (see corresponding verbs at COMPOSE): *state, condition, posture, situation: *quality, property, attribute.

temperament. 1 *Disposition, temper, complexion, character, personality, individuality.

Ana. Composition, constitution (see corresponding verbs at COMPOSE): *mind, soul: nature, kind, *type.

temperance. Temperance, sobriety, abstinence, abstemiousness, continence agree in expressing self-restraint in the gratification of appetites or passions. In its more exact sense, **temperance** implies simply habitual moderation and the exercise of judgment; as, *temperance* in eating and drinking or in any pleasure. "Exaggeration, exaltation, the fanatic spirit, are extremely rare. *Temperance* is the almost universal rule in speech, demeanor, taste, and habits" (Brounell). *Temperance* sometimes, but now less frequently, implies teetotalism; as, a *temperance* movement; a *temperance* hotel is one where no intoxicating liquors are sold or served. **Sobriety**, like *temperance*, suggests avoidance of excess, not only, as originally, in drinking but also in thought or action. Often it connotes the idea of seriousness or of avoidance of ostentation; as, *sobriety* of demeanor; *sobriety* in dress. **Abstinence** usually implies voluntary deprivation. "Their poor ancestors, whose life was passed in melancholy *abstinence* from the joys of this beautiful earth" (Arnold). "The Cynic preached *abstinence* from all common ambitions, rank, possessions, power, the things which clog man's feet" (Buchan). **Abstemiousness** now suggests habitual self-restraint, or moderation or frugality, especially in eating or drinking. "Instances of longevity are chiefly among the *abstemious*" (Arbuthnot). "The meal of the Saracen was *abstemious*" (Scott). **Continence** emphasizes self-restraint in regard to one's impulses or desires. "He knew what to say, so he knows also when to leave off, a *continence* which is practised by few writers" (Dryden). In its specific sense it stresses self-restraint in sexual indulgence. Sometimes it implies chastity or complete abstention; often, when referred to husband and wife, it implies avoidance of undue indulgence. "Chastity is either *abstinence* or *continence*. *Abstinence* is that of virgins or widows; *continence*, of married persons" (Jer. Taylor).

Ana. Forgoing, forbearing or forbearance, sacrificing or sacrifice, eschewal (see corresponding verbs at FORGO): frugality, sparingness, thriftiness (see corresponding adjectives at SPARING): restrained, curbed, checked (see RESTRAIN).

temperate. 1 *Moderate.

Ana. Mild, gentle, lenient, *soft: *steady, even, equable, constant: restrained, curbed, checked (see RESTRAIN).

Ant. Intemperate: inordinate.

2 *Sober, continent, unimpassioned.

Ana. *Sparing, frugal, economical: abstaining, refraining, forbearing (see REFRAIN): dispassionate, just, equitable, *fair.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

temporal. 1 *Temporary.

Ana. *Earthly, mundane, worldly, mortal; transitory, *transient, ephemeral, passing.

Ant. Eternal.

2 *Profane, secular, lay.

Ana. *Material, objective, physical, corporeal.

Ant. Spiritual.

temporary. 1 Temporary, temporal are sometimes confused in the sense of existing or enduring for a limited time only. Temporary (see also TEMPORARY, 2) is the commoner of these terms. It is opposed in meaning to permanent and lasting and applies equally well to that which serves only an immediate need and to that which endures over a very long space of time but is bound to come to an end; as, a scaffolding is a temporary structure; "Like the planet Mercury surrounded by the lustre of sunset, her permanent brilliancy passed without much notice in the temporary glory of the situation" (Hardy). "But, unfortunately, owing to a recent though quite temporary coldness between the Chaplain-General and the Potter press, Mr. Potter's wire-pulling was ineffectual" (R. Macaulay). "Where such deep-rooted tendencies as fetishism are concerned, all that reformers can hope to abolish is the temporary form, not the biding substance" (A. Huxley). Temporal, in its stricter use, implies an opposition to eternal: it is chiefly used when there is a reference to the difference between things of this life and things of eternity and is found chiefly in idiomatic expressions; thus, temporal matters refer to those which are related to life on earth as opposed to those which are related to the future life; "the temporal punishment due to sin" usually refers to the punishment for sin endured in one's life and, in Roman Catholic use, also in Purgatory, as opposed to the eternal punishment suffered in Hell. Consequently, temporal often implies an opposition to immaterial or spiritual as well as to eternal; as, "we may, therefore, whenever we wish, treat the temporal as if it were potentially the eternal" (W. James); "it is the only way in which I can think of the relation of the world of becoming to the world of being, of the temporal to the eternal" (Inge). Often, temporal (for this sense, see PROFANE, 1) is used in the sense of being concerned with temporal, or worldly, as opposed to spiritual, or eternal, affairs, matters, or concerns, and is applied to sovereigns, rulers, or others who deal with these affairs, in opposition to those whose concerns are mostly spiritual; as, temporal lords (or lords temporal); "His sceptre shows the force of temporal power. The attribute to awe and majesty" (Shak.). Consequently, temporal is often used in the sense of secular, lay, or civil as distinguished from clerical or ecclesiastical, sometimes with little reference to the time element. "If such temporal pride is ridiculous, surely the spiritual is odious and detestable" (Fielding). "The court of Madrid, unlike that of Vienna, would have thought more of temporal aims than of ecclesiastical" (Belloc).

Ana. Transitory, *transient, ephemeral, passing; *brief, short.

Ant. Permanent, lasting.

2 Temporary, provisional, ad interim, acting, supply are here compared as applied to a person holding a post for a limited time, to the post held by that person, or to his appointment. Temporary merely implies that the post is not held on tenure but may be terminated at the will of those having the appointive power. It is interchangeable with many of the other words but is not so explicit; as, a temporary position; temporary clerks; a temporary appointment. Provisional is applied chiefly to a government or to the head (or leading officials) of a government that is set up in a new state, or after a revolution, until

a permanent government can be established; as, following the revolution of September, 1930, the provisional president of Argentina was José F. Uriburu. Ad interim definitely suggests appointment for an intervening period, as between the death or resignation of an incumbent and the appointment or election of his successor; as, an ad interim pastor. In the United States it is also applied to an appointment made by the president when the Senate is not in session and confirmation is not possible until after the recess; as, an ad interim appointment as ambassador. Acting is applied to the person who during a vacancy in an office, or during the absence of the incumbent, assumes temporarily by appointment or by fixed procedure the powers given the person regularly appointed or elected; as, the president of the common council becomes acting mayor when the mayor is on vacation. Supply implies the performance of duties of another or service as a locum tenens; as, a supply pastor; a supply teacher.

Ant. Permanent.

tempt. Entice, inveigle, *lure, decoy, seduce.

Ana. Allure, *attract; *invite, solicit, court, woo; *induce, persuade, prevail on or upon.

tenacious. Tough, stout, *strong, sturdy, stalwart.

Ana. Dogged, pertinacious, *obstinate, stubborn; resolute, stanch, steadfast, leal, true (see FAITHFUL); persevering, persisting (see PERSEVERE).

tenacity. Resolution, spirit, mettle, *courage.

Ana. Pluck, grit, guts, sand, *fortitude, backbone; *decision, determination; hardihood, audacity, nerve (see TEMERITY).

tend. Tend, attend, mind, watch are here compared only as meaning to take charge of or look after someone or something, especially as a duty or in return for a wage, fee, or other remuneration. In general, tend is not only more colloquial than attend, but it usually suggests a more menial employment and takes for its object something that requires routine or unskilled care as in looking out for accidents, mishaps, signs of danger, or the like, or merely mechanical operation; thus, one who tends a lock is employed to work the devices adjusting the level of the water in the canal when a boat approaches; a shepherd is one who tends a flock of sheep; a stoker is one who tends a furnace (especially on a ship) and supplies it with fuel when needed. "Standard-roses tended by her hands" (Meredith). Tend is used in reference to the care of persons only when a menial or a ministering rather than a professional relationship is implied; as, to employ a girl to tend to the children for a few hours each day; sacrificing her leisure to tend the sick and helpless poor in their homes. Attend, since it seldom loses its earliest implication of turning the mind to, is the appropriate word when the services given are of a professional character, or are the prerogatives of a post that one holds as a mark of honor or merit; as, Dr. White attended the governor in his last illness; ladies-in-waiting are ladies of high degree who as members of the royal household attend a queen or princess. Attend to (tend to is dialectal in this sense) often carries not only the idea of looking after or taking charge of, but also the idea either of disposing of the work that is entailed (as, he has attended to [not tended to] all the letters awaiting answer) or of giving one's full attention to the matter or person concerned; as, attend strictly to (not tend strictly to) business; he asked his assistant to attend to (not tend to) patients coming in between three and four. Mind is closer to tend than to attend, but it usually implies more casual looking after or less close attention to duties; as, a kind neighbor minds the children when their mother is away. "The men... were gone to dinner: I stayed to

mind the furnace" (Edgeworth). **Watch** (in its earliest sense, to be or keep awake), as here compared (see also SEE, 2), implies the charge of something or of someone that may be in danger, such as a factory in danger of fire or of burglary or a sick person in danger of a sudden relapse or change for the worse. The term, therefore, always implies need of vigilance and usually suggests the intention of forestalling danger; as, three men were needed to *watch* the factory when the machines were idle; he was so ill that a night nurse was needed to *watch* him as well as care for him. "Wilt thou receive this weighty trust when I am o'er the sea? To *watch* and ward my castle strong, and to protect my land" (Scott).

Ana. *Defend, protect, shield, guard, safeguard: *nurse, nurture, foster, cherish, cultivate.

tendency. **Tendency, trend, drift, tenor, current** come into comparison chiefly when they mean a movement or course having a particular direction and character, or the direction and character which such a movement or course takes. **Tendency** usually implies an inherent, or acquired, or given (supplied) inclination in a person or thing that causes him or it to move in a definite direction so long as no one or nothing interferes. Often when used in reference to persons, the word means little more than *leaning, propensity, or disposition* (as, "My *tendency* is to unite extremes rather than to go between them"—H. Ellis; "he worked to destroy the *tendency* to dreams in himself"—S. Anderson) but, even more often, especially when used in reference to groups or communities or their activities, or the course or direction they take with or without consciousness or intent, the term implies a great driving force behind the direction or course taken and an insusceptibility to its being controlled or changed (as, to ask whether the *tendency* of civilization is upward or downward; "the fissiparous *tendency* of Protestantism"—Inge; "the whole *tendency* of evolution is towards a diminishing birth-rate"—H. Ellis; "the *tendencies* which Lycurgus had endeavoured to repress by external regulation reasserted themselves"—G. L. Dickinson). **Trend** is used in its literal sense chiefly in reference to something that follows an irregular or winding course and often means little more than general direction maintained in spite of these irregularities; as, the *trend* of the stream at this point is northerly; the general *trend* of the Atlantic coast line of the United States is from the southwest to the northeast. As here especially considered, *trend* differs from *tendency* in implying a direction subject to change through the interposition of any sufficiently strong force or agency, or a course taken at a given time by something subject to change and fluctuation, or the general direction followed by a changing or fluctuating thing throughout its entire course or within given limits of space or of time; as, to give a talk on the *trend* (or *trends*) of current fiction; the general *trend* of democracy has been from decentralization of power to centralization; he could observe no clear *trend* in the market for securities during the last six weeks. "Aristotle, the most balanced of all the Greek thinkers and the best exponent of the normal *trend* of their ideas" (G. L. Dickinson). **Drift** may apply to a tendency the direction or course of which is determined by external influences such as a wind or the movement of flowing water (figuratively more often than literally), a fashion, a state of feeling, or the like (as, "The whole drift of their institution is contrary to that of the wise legislators of all countries"—Burke; "programme music... shows most clearly the *drift* of music along with the other arts toward impressionism"—Babbitt; "the whole *drift* of our law is toward the absolute prohibition of all ideas that diverge in the slightest from the accepted platitudes"—Mencken), but it also may

apply to the direction or course taken by something such as speech, writing, teaching, and the like, that has a meaning, a purpose, or an objective which is not definitely stated or made clear but which is to be gathered or inferred by auditors, readers, observers, or the like: in this sense, the word often means *intention, purport, or import*; as, "For the *drift* of the Maker is dark, an Isis hid by a veil" (Tennyson); few readers failed to catch the *drift* of the new book on the American Revolution; "I see the whole *drift* of your argument" (Goldsmith); the *drift* of the book, though not expressly stated, was Communistic. **Tenor** is a very close synonym of *drift* in this latter sense, but it more often refers to utterances or documents, and carries a much stronger implication of clearness of meaning or purport; as, "According to the *tenor* of the charter... the trustees might, without impropriety, appoint a president and other professors from their own body" (Ch. Just. Marshall). Both in this sense and in its more common sense of a course or movement having a particular clearly observable direction, *tenor* carries a strong implication of continuity in that course and of absence of fluctuation in its direction; therefore it frequently suggests unaltered, often unalterable, procedure. "Along the cool sequester'd vale of life They kept the noiseless *tenor* of their way" (Gray). "Not keep a journal! How are your absent cousins to understand the *tenour* of your life in Bath without one?" (Austen). **Current** (literally, the movement or direction of flowing water; as, to row against the *current*) carries a stronger implication than the other words of a movement or course that is clearly defined, though not necessarily unalterable, in its direction and that has the distinct identity as well as the substantial quality of any natural course of running water such as a river; as, "the kind of genius... that makes its way there [in France]... against the *current* of opinion and the whole *drift* of feeling" (Brownell); "those who have isolated themselves from all the *currents* of modern thought" (Inge); "When... fifteen, he... had an adventure that changed the whole *current* of his life" (S. Anderson).

Ana. *Leaning, propensity, penchant, proclivity: inclination, disposition, predisposition (see corresponding verbs at INCLINE): bent, turn, genius, aptitude (see GIFT).

tender, v. *Offer, proffer, present, prefer.

Ana. Propose, purpose, design (see INTEND): *suggest, intimate.

tender, n. *Overture, approach, advance, bid.

tender, adj. **Tender, compassionate, sympathetic, warm, warmhearted, responsive** are here compared in the sense of expressing or expressive of feeling that reveals affectionate interest in another, especially in his joys, sorrows, welfare, or the like. **Tender** implies a sensitiveness to influences that awaken one's softer emotions, such as love (sometimes called, though now chiefly humorously, "the *tender* passion"), affection, pity, or kindness, and, often, a capacity for expressing such emotions with a delicacy and gentleness that are especially grateful to the person concerned; as, "His mother was very *tender* with him... she saw the effort it was costing" (D. H. Lawrence); "there always remained with me, long after I outgrew his [Longfellow's] poems, a *tender* memory for that first friend of wistful and pensive puberty" (H. Ellis); "The inflections of their voices, when they were talking to each other very privately, were often *tender*, and these sudden surprising *tendernesses* secretly thrilled both of them" (Bennett). **Compassionate** implies a temperament or a disposition that is either easily moved by the sufferings or hardships of another or is quick to show pity with tenderness or

mercy; as, "He was quite incapable of any *compassionate* feeling about the boy, or about his fate" (*Dickens*); "Out of the hardships of his boyhood... he had preserved a clean sense of honour and a *compassionate* heart" (*Cather*); "To wax *compassionate* over a bird, and remain hard as flint to a beast, is possible only to humanity" (*A. Repplier*). *Sympathetic* is a much more comprehensive term than *compassionate* for it implies a temperament or a disposition that enables one to enter into the life of another and share not only his sorrows but his joys and his interests, as well as his antipathies, and the like, and to give the other the impression that he is not alone or that he is being fairly and justly understood. "Maud was very *sympathetic*. That was what made Tony like her so much—that she was always interested in what he had to tell her" (*Arch. Marshall*). "Thus a tête-à-tête with a man of similar tastes, who is just and yet *sympathetic*, critical yet appreciative... is a high intellectual pleasure" (*A. C. Benson*). *Sympathetic* is also applicable to attitudes, treatments, and the like, that reveal not only an ability to enter into the lives of others and share their emotions but a capacity for appraising or treating men and their experiences with great fairness and understanding; as, "a penetrating and profoundly *sympathetic* portrayal of the shifting, fluctuating impulses of a woman yielding both against and with her will" (*Loves*). *Warm* implies a capacity for feeling and expressing love, affection, interest, or the like, with depth, ardor, or fervency: it suggests less softness of feeling or compassion than *tender*, but more heartiness, cordiality, or force. "Captain Harville, though not equalling Captain Wentworth in manners, was a perfect gentleman, unaffected, *warm*, and obliging" (*Austen*). "We common people are all one way or the other—*warm* or cold, passionate or frigid" (*Hardy*). "A wave of genial friendliness flowed from the *warm* silly hearts of Britons towards the conquered foe" (*R. Macaulay*). *Warmhearted* differs little from *warm* in meaning, but it usually carries a stronger implication of generosity, unselfishness, and, often, compassionateness; as, a kind, *warmhearted* woman; "He's of a rash, *warm-hearted* nature, like Esau" (*G. Eliot*); "That's the way I've gone through life. Experience has never put a chill upon my *warm-heartedness*" (*Dickens*). *Responsive* differs from the preceding terms in usually suggesting sensitiveness to another's display of tenderness, compassion, sympathy, warmth, or the like, and a capacity for responding to that emotion: it, therefore, stresses impressionableness, and suggests a reaction, rather than a taking of the initiative; as, the child is always *responsive* to affection; "She took up life, and became alert to the world again, *responsive*, like a ship in full sail, to every wind that blew" (*R. Macaulay*). *Ana.* Gentle, lenient, mild, *soft: humane, benevolent, *charitable, altruistic: *pitiful, piteous.

Ant. Callous: severe.

tenement. *Rooms, lodgings, chambers, quarters, apartment, flat, diggings, digs.

tenet. *Doctrine, dogma.

Ana. Belief, conviction, persuasion, view (see *OPINION*): *principle, fundamental, axiom: *creed, confession.

tenor. Drift, current, trend, *tendency.

Ana. Movement, *motion, move: procedure, proceeding (see *PROCESS*): *meaning, significance, import.

tense, adj. 1 *Tight, taut.

Ana. Strained (see corresponding noun at *STRAIN*): nervous, unquiet, uneasy, jittery (see *IMPATIENT*).

2 *Stiff, rigid, inflexible, stark, wooden.

Ana. Tough, tenacious, stout (see *STRONG*): *firm, hard.

Imp. Expansive. — *Con.* *Loose, relaxed, lax, slack: *limp, flaccid, flabby.

tension. 1 *Stress, strain, pressure, shear, thrust, torsion.

2 Equilibrium, equipoise, *balance, poise.

tentative. *Provisional.

Ana. *Temporary, ad interim, acting: testing, trying, demonstrating, proving (see *PROVE*).

Ant. Definitive.

tenuous. *Thin, rare, slender, slim, slight.

Ana. *Subtle, subtle: ethereal, aerial, *airy.

Ant. Dense.

tergiversation. *Ambiguity, equivocation, amphibology, amphibologism, double-entendre.

term, n. 1 End, confine, bound, *limit, bourn.

2 *Word, vocable.

termagant. *Virago, scold, shrew, vixen, barge, amazon.

terminal, adj. Final, concluding, *last, latest, eventual, ultimate, extreme.

Ana. Closing, ending, terminating, concluding (see *CLOSE*).

Ant. Initial.

terminate. End, *close, conclude, finish, complete.

Ana. *Abolish, extinguish, abate: dissolve, prorogue, *adjourn: *stop, cease, discontinue.

termination. *End, ending, terminus.

Ana. Result, issue, outcome (see *EFFECT*): concluding or conclusion, completion, closing or close (see corresponding verbs at *CLOSE*).

Ant. Inception: source.

terminus. *End, termination, ending.

Ant. Starting-point.

terrace. 1 Embankment, bank, *mound, dune, tumulus, barrow.

2 Avenue, boulevard, drive, parkway, *road, roadway, highway, highroad, street, thoroughfare, byway, lane, alley, alleyway.

terrestrial. Also *terrene*. *Earthly, carthy, mundane, worldly, mortal, sublunary.

Ant. Celestial.

terrible. Terrific, frightful, dreadful, *fearful, awful, horrible, horrific, shocking, appalling.

Ana. Frightening, alarming, startling (see *FRIGHTEN*): agitating, upsetting, disturbing, perturbing (see *DISCOMPOSE*).

terrific. Terrible, frightful, dreadful, *fearful, horrible, horrific, awful, shocking, appalling.

Ana. Frightening, alarming, terrorizing (see *FRIGHTEN*): *formidable, redoubtable: agitating, upsetting, disquieting (see *DISCOMPOSE*).

terrify. *Frighten, fright, scare, alarm, terrorize, startle, affray, affright.

Ana. Agitate, upset, perturb, disquiet (see *DISCOMPOSE*): *dismay, appall, horrify, daunt: cow, *intimidate, browbeat, bulldoze.

territory. 1 Colony, dependency, *possession, dominion, protectorate, mandate.

2 Domain, province, *field, sphere, bailiwick.

Ana. Region, tract, *area, zone, belt: limits, confines, bounds (see singular nouns at *LIMIT*).

terror. Panic, consternation, *fear, dread, fright, alarm, dismay, horror, trepidation.

Ana. Apprehensiveness, fearfulness (see corresponding adjectives at *FEARFUL*): agitation, disquiet, perturbation, upsetting or upset (see corresponding verbs at *DISCOMPOSE*): appalling, daunting, dismaying (see *DISMAY*).

terrorize. Terrify, *frighten, fright, alarm, scare, startle, affray, affright.

Ana. *Intimidate, cow, bulldoze, browbeat: coerce, compel, *force: drive, impel, *move: agitate, upset (see *DISCOMPOSE*).

terse. *Concise, succinct, laconic, summary, pithy, compendious.

Ana. *Brief, short: *compact, close: *expressive, sententious, meaningful: *incisive, crisp, clear-cut.

test, n. Trial, proof, demonstration. See under PROVE.

Ana. Experiment. *experience: examination, inspection, scrutiny (see under SCRUTINIZE): verification, substantiation, corroboration, confirmation (see corresponding verbs at CONFIRM).

test, v. Try, *prove, demonstrate.

Ana. Assay, essay (see ATTEMPT, v.): examine, inspect. *scrutinize: experiment, experience (see corresponding nouns at EXPERIENCE): verify, substantiate, *confirm.

testify. *Swear, affirm, asseverate, depose, depone.

Ana. *Certify, attest, witness, vouch for.

testimony. *Evidence, deposition, affidavit.

Ana. Trial, test, proof, demonstration (see under PROVE): witnessing or witness, attesting or attestation, certifying or certification, vouching for (see corresponding verbs at CERTIFY).

testy. *Irrascible, choleric, splenetic, techy, touchy, cranky, cross.

Ana. *Irritable, peevish, snappish, waspish: hasty, sudden, impetuous (see PRECIPITATE): captious, carping, caviling, faultfinding (see CRITICAL).

techy. Variant of TECHY.

text. Topic, argument, theme, *subject, matter, subject matter, motive, leitmotiv.

thalassic. *Aquatic, marine, oceanic, neritic, pelagic, abyssal, bathysmal, bathybic.

thankful. *Grateful.

Ana. Appreciating or appreciative, valuing, prizing, cherishing, treasuring (see corresponding verbs at APPRECIATE): satisfied, content (see under SATISFY).

Ant. Thankless.

that. *Who, which.

thaumaturgy. *Magic, sorcery, witchcraft, witchery, wizardry, alchemy.

thaw, v. Melt, dissolve, *liquefy, deliquesce, fuse.

Ant. Freeze.

theatrical, adj. *Dramatic, dramaturgic, melodramatic, histrionic.

Ana. *Artificial, factitious: formal, conventional, *ceremonial, ceremonious: affecting, pretending, assuming, simulating, feigning (see ASSUME): *showy, pretentious, pompous, ostentatious.

theft. **Theft, larceny, robbery, burglary** come into comparison as meaning the act or crime of stealing, especially as differentiated in legal use. The same differences in implications and applications are observable in the agent nouns **thief, larcener** (now extremely rare), **robber, burglar**, denoting one who steals. **Theft and thief** are the most general and the least technical of these terms: they imply the taking and removing of another's property, usually by stealth or without his knowledge, and always without his consent. The terms are often so broad in current use (even in legal use) that they may include reference to any form of taking another's property without his consent, such as pilfering, purloining, swindling, embezzling, or plagiarizing; as, the *theft* of a fellow-employee's purse; the *theft* of the city's money by grafters; a *thief* removed his watch from his pocket; *thieves* of good plots from recent plays. **Larceny** especially, and **larcener**, when now used, are strict legal terms implying theft in the usual sense but excluding swindling, embezzlement, plagiarizing, etc. The terms always connote an unlawful or felonious act, a removal of another's property from the place where it belongs, and complete possession, even for a moment, by the

thief; as, she was seen shoplifting but was not apprehended until she had left the store, so that there would be proof of *larceny*; the servant was found guilty of *larceny*. *Grand larceny* and *petty*, or *petit*, *larceny*, though now rare in legal use, are common in ordinary use as indicating respectively a theft of an appreciable (formerly a stated) amount, and a theft of a negligible amount. **Robbery and robber** in their strict legal use imply the taking of another's property from his person or in his presence by means of violence or intimidation; as, highway *robbery*; the paymaster was attacked and deprived of his payroll money by armed *robbers*. **Burglary and burglar** in all legal use imply a breaking and entering with an intent to commit a felony, usually but not invariably (though almost always in popular use), that of larceny or robbery. In the laws of different states and nations the other details vary, such as the time of occurrence (nighttime often being stipulated) or the actual commission of the felony (the accomplishment of the intent usually being regarded as not relevant); as, the *burglary* of their home was committed during their absence for the evening; she lived in constant fear of *burglars*.

the Lord's Day. See *Lord's Day*, at SUNDAY.

theme. 1 Text, topic, argument, *subject, matter, subject matter, motive, leitmotiv.

2 Composition, paper, *essay, article.

then. *Therefore, hence, consequently, accordingly, so.

theorem. *Principle, axiom, fundamental, law.

☞ Do not confuse theorem with theory.

theoretical. **Theoretical (or theoretic), speculative, academic** are here compared as applied to minds, types of reasoning or philosophizing, branches of learning, and the like, and as meaning concerned principally with abstractions and theories, sometimes at the expense of their practical basis or application. **Theoretical** (or, less often, **theoretic**), in its most usual and nonderogatory sense, applies to sciences or other branches of learning which deal with the inferences drawn from observed facts and from the results of experiments and with the laws or theories that explain them. In this sense, the term is often opposed to *applied*, which describes sciences or branches of learning which have to do with the putting of these laws and theories into use, as in mechanics, in industry, or in social reform; as, *theoretical* versus *applied* chemistry; *theoretical* physics has contributed more to modern invention than human ingenuity; *applied* ethics is grounded upon *theoretical* ethics. "A purely *theoretical* definition would be that a person is emotionally sensitive when many stimuli produce emotions in him" (*B. Russell*). But *theoretical* often implies a divorce from actuality or reality that either makes one unable to see things as they are or to see them only in the terms of one's ideas or theories about them. In this sense it is opposed to *practical*. "My *theoretical* and his practical knowledge together could not have failed. He should have worked upon my plans" (*Austen*). "Life demands from us that we should be prepossessed in favour of goodness and her sisters. But we must study these practical prepossessions without *theoretical* prepossession" (*S. Alexander*). "Things that had seemed drearily *theoretical*, dry, axiomatic, platitudinal, showed themselves to be great generalisations from a torrent of human effort and mortal endeavour" (*A. C. Benson*). **Speculative** (as here considered: see also THOUGHTFUL, 1) goes further than *theoretical* in suggesting a deep interest in theorizing or in forming theories or hypotheses, and often additionally implies a daring use of the imagination; as, "He is too *speculative* a writer to awaken confidence in his results" (*Sir H. Davy*). Oftentimes, however,

there is very little difference evident in the use of these terms. "He [the Roman] was a great inventor and builder, but in the *speculative* and theoretic side of science he had little interest" (*Buchan*). "This is about as far as *speculative* chemistry will take one in this field; and the rest of the subject is experimental" (*C. C. Furnas*). **Academic** (as here considered: see also **PEDANTIC**) carries a much stronger implication of a habit of looking at a thing, or things in general, abstractly and without reference to real life or practical concerns. "The *academic* philosophers of ethics, had they possessed virility enough to enter the field of real life, would have realised... that the slavery to rigid formulas which they preached was the death of all high moral responsibility" (*H. Ellis*). "Apart from its *academic* tendency to divorce form from matter, I cannot believe that any such theory of poetry, built on a neurosis, is admirable or adequate" (*Day Lewis*).

Ana. Conjectural, hypothetical (see **SUPPOSED**): postulated, premised, presupposed (see **PRESUPPOSE**).

theory. *Hypothesis, law.

Ana. Judgment, conclusion, deduction, inference (see under **INFER**): postulate, presumption, assumption, presupposition (see under **PRESUPPOSE**).

Ant. Practice.

☞ Do not confuse theory with theorem.

there. *Thither.

therefore. **Therefore, hence, consequently, then, accordingly, so** are here compared as adverbs used as connectives to indicate logical or causal sequence or both. They vary in the degree of closeness of connection suggested, as well as in the kind of sequence implied. **Therefore** and **hence** are employed chiefly in strict reasoning to indicate that what follows is a necessary deduction from what has preceded. **Therefore** commonly introduces a conclusion; as, all men are rational beings, John Jones is a man, *therefore* John Jones is a rational being. **Hence**, though often interchangeable with *therefore*, stresses the importance of that which precedes; as, both statements may be false, but both cannot be true since they are contradictory; *hence*, if A be true, B is false, or if B be true, A is false. **Consequently**, though often used to introduce a deduction, does not always imply necessity in the inference. Rather it suggests good grounds for the conclusion or implies a strong antecedent probability; as, he said he would come; *consequently*, I expect him. It also may indicate that what follows is a result of what precedes; as, he was injured in an accident; *consequently* he has not been at his office in months. **Then**, when used to indicate logical sequence, is employed chiefly in the consequent clause or conclusion in a conditional sentence; as, if A is true, *then* B is false. **Accordingly** usually indicates logical or causal sequence, but connotes naturalness or usualness in that which follows as a consequence rather than necessity or inevitability; as, he said he was hungry; *accordingly* they shared their meager lunch with him. **So** is largely colloquial and often indefinite in its suggestion of which kind of sequence is indicated; as, the day was fine and so we set out. The use of *so* (by itself) as a connective rather than as an adverb is discountenanced by good writers.

thesaurus. 1 Treasury, archives, *museum, library, gallery.

2 Treasury, garland, *anthology, florilegium, corpus, chrestomathy, chapbook.

Thespian. *Actor, player, impersonator, trouper, performer, mummer, mime.

thick. 1 Thick, thickset, squat, stocky, chunky, stubby,

dummy vary widely in their range of application but they come into comparison as meaning having, as a three-dimensional thing, a measurement relatively large from one side to another. **Thick**, the most general word of this group, implies an opposition to *thin* and a clear distinction from *long*: since it is never employed in reference to plane figures or to surfaces, it may sometimes be used in place of *deep* or *broad* or *wide* when these terms refer to one of the three dimensions of a more or less solid body, substance, or mass; thus, a *thick* board, a *thick* layer, a *thick* covering of snow, suggest reference to the measurement from the top to the bottom or from the outside to the inside (but, one says a *deep* [not *thick*] body of water; a *thick* [not *deep*] icing; a *deep* [not *thick*] box): a *thick* trunk (of a tree), a *thick* pole, a *thick* body (of a man) suggest a relatively wide diameter for a thing of its height or length. **Thick**, and not *thin*, is used in phrases indicating measurements of this dimension or diameter without imputing thickness or thinness to that which is measured; thus, paper 1/20 of a millimeter *thick* is actually very thin paper; flooring four inches *thick* was used in the factory. The remaining terms of the group apply chiefly to persons, animals, trees, plants, figures, etc., which are describable as *thick* in relation to their height. **Thickset** applies chiefly to human bodies that suggest a square in their proportions and straightness of lines and in compactness of build: it usually implies shortness out of proportion to girth, though *short* is often added to *thickset* in descriptions; as, "he was *thick-set* of figure" (*Wilde*); "too *thickset* For jockeying" (*Masefield*). **Squat** applies more generally than *thickset* and is commonly depreciative: it also definitely implies both extreme shortness and thickness suggestive of a squatting person or animal; as, he was *squat* as an image of Buddha; "the *squat* misshapen figure" (*Wilde*); "the round *squat* turret" (*Browning*). **Stocky** applies to men, animals, plants, and the like: it differs little from *thickset* in its suggestions of a square and compact build, but it carries a strong implication of sturdiness or of capacity for work; as, *stocky* horses fitted for hard work on the farms; *stocky* young trees; "they had no titles of honour among them, but such as denoted some bodily strength or perfection, as such an one the Tall, such an one the *Stocky*" (*Addison*). **Chunky, stubby, and dummy** are colloquial synonyms of *squat* that suggest slightly different images; *chunky* connoting a resemblance to a chunk of something (as, a *chunky* child), *stubby* a resemblance to a stub, as of a tree cut off near the roots or of a pencil worn down to two or three inches and, therefore, often implying an appearance of stunted development in height (as, a *stubby* middle-aged woman), *dummy* a resemblance to a dump—an English term denoting a thick shapeless piece—and, therefore, often implying bulging outlines (as, a *dummy* figure).

Ana. *Broad, wide, deep.

Ant. Thin. — **Con.** Slender, slim, slight, tenuous, rare (see **THIN**, *adj.*): *lean, spare.

2 Compact, *close, dense.

Ana. Condensed, compressed, contracted (see **CONTRACT**, *v.*): concentrated, compacted (see **COMPACT**, *v.*).

3 Close, confidential, chummy, *familiar, intimate.

thickset. Stocky, *thick, squat, chunky, stubby, dummy.

Ana. Bulky, *massive, massy: *fleshy, stout, portly, plump.

thief. Robber, burglar, larcener. See under **THEFT**.

thieve, v. *Rob, plunder, rifle, loot, burglarize.

Ana. Despoil, spoliage, sack, pillage, *ravage: *steal, purloin, pilfer, filch: embezzle, *defalcate, peculate.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

thin, *adj.* **Thin**, **slender**, **slim**, **slight**, **tenuous**, **rare** come into comparison as a group of adjectives of wide range of application (cf. **LEAN**, **MEAGER**) that are in general referable not only to measure in width or amount, but also to quantity or quality, and that agree in meaning not broad, or thick, or abundant, or dense. **Thin** basically implies comparatively little extension between two surfaces of a thing (as, a *thin* layer of cement; a *thin* stratum of rock; a *thin* coin) or the comparatively small diameter of a cylindrical or nearly cylindrical thing in proportion to its height or length (as, a *thin* body; a *thin* trunk of a tree; a *thin* wire). In its extended senses, the term usually implies the lack of flesh or substance or something comparable to flesh and substance that fills out a thing to its normal or usual extent, and gives it fullness, richness, substantiality, compactness, density, or the like; as, a *thin* face; *thin* wine; a *thin* argument; a *thin* forest; *thin* hair; "*thin*, pebbly earth, which was merely the rock pulverized by weather" (*Cather*); "like the air of a mountain top—*thin*, but pure and bracing" (*Inge*); "Would make a sound as *thin* and sweet As trees in country lanes" (*Millay*). **Slender** in the earliest of its senses (and still its leading sense) applies to the bodies of men and of animals, implying leanness or spareness without, however, a suggestion of gauntness or lankiness: in fact, in present usage, it carries also a connotation of gracefulness and, usually, of good proportions; as, a *slender* girl; a *slender* dog; "*Slender* white hands" (*S. Anderson*). **Slender** is preferred to *thin* in describing things of narrow extension when the thinness is an element of beauty; as, a *slender* vase; the *slender* legs of a Sheraton chair; "the pure *slender* lines [in a painting] of water falling from the abrupt wooded crag" (*Binyon*). In its extended use, *slender* is often employed with little distinction from *thin*, but it is often preferred by good writers when quantity or amount rather than quality is stressed; as, "A few attempts had been made... with *slender* success" (*Macaulay*); "being a discreet woman... when her pupils went... [she] packed up her *slender* belongings and sought for employment afresh" (*Kipling*); "With *slender* forces he [Octavian] had to face the formidable Sextus" (*Buchan*); "such a vision [of life] as might come as the result of few or *slender* experiences" (*T. S. Eliot*). **Slim** differs little, or in some use not at all, from *slender* when applied to the figures of persons or animals; it tends, however, to suggest fragility or gauntness rather than grace, and lack of flesh rather than excellent proportions; as, their children are too *slim*. In its extended senses, however, *slim* usually carries a clearer implication of meagerness or scantiness than *slender*, which though it suggests smallness in amount or quantity, implies less commonly than *slim* a falling short of adequacy or sufficiency; thus, *slim* resources are by suggestion more meager than *slender* resources; so, he has a *slim* chance of recovery; his hopes for success are *slim*; there was a *slim* attendance at the meeting. **Slight**, through most of its variations in meaning, carries a more obvious implication of smallness than of thinness: when applied to persons, it seldom suggests height or length, as *slender* usually does or *slim* sometimes does (as, *slight* in figure; a *slight*, middle-aged man); when applied to things, it is often derogatory and usually implies mere appreciableness or a failure to come up to a level of that which is commensurate, adequate, or the like; as, "Away, *slight* man!" (*Shak.*); "a *slight* and transient fancy" (*Arnold*); a *slight* difference; his success was *slight*; "There is... ground to recognise a *slight* intellectual superiority in the upper social class" (*H. Ellis*); "he liked the folksong, because it was a *slight* thing, born of immediate impulse" (*A. Huxley*). **Tenuous** basically implies extreme thinness

or absence of perceptible thickness: the term in its literal senses is applied to lines, cords, wires, and other things of great length or height and of minute diameter (as, the most *tenuous* of threads; as *tenuous* as the filament of a spider's web) or to fabrics, textiles, and the like, which are exceedingly sheer or gauzy (as, a *tenuous* film covered the scalded milk; the *tenuous* web of a spider; *tenuous* fabrics such as tulle and chiffon). In its now more common extended senses, *tenuous* often describes something which covers an expanse but lacks density, compactness, solidity, or the like (as, "Some [stars] are extremely dense and compact, others extremely *tenuous*"—*Eddington*; "*tenuous* evening mists"—*Karl K. Darrow*), or something which is so finespun or so fine-drawn as to be exceedingly subtle, abstruse, visionary, or the like (as, "a *tenuous* idealism"—*Binyon*; "poetry... so *tenuous* in thought and feeling that only the most exquisite diction can justify its perpetuation in cold print"—*Grandgent*; "I did not despise the golden, *tenuous* imaginings... starting in my own spirit"—*Galsworthy*). **Rare**, in the sense here compared (see also **INFREQUENT**, **CHOICE**), is now uncommon except in reference to air and gases. This is, however, the earliest and basic sense of the term, originally implying a loose arrangement or wide separation of the component particles or units. As applied to air, gases, and the like, it suggests tenuity, or lack of density or compactness; as, he was unaccustomed to the *rare* atmosphere of the high mountains; "Nova Pictoris, which brightened and faded several times... may have encountered now a dense and now a *rare* mass of such dark matter as it plunged on" (*W. Kaempfer*). **Ara.** *Lean, spare, lank, lanky, gaunt: *meager, exiguous, scanty: cadaverous, pinched, wasted, *haggard: attenuated, extenuated, diluted (see **THIN**, **v.**). **Ant.** Thick.

thin, *v.* **Thin**, **attenuate**, **extenuate**, **dilute**, **rarefy**. **Thin** is the most inclusive of these terms and is interchangeable with any of the others, though not without loss of precision or of specific connotations. Literally, it implies reduction in thickness or in density; figuratively, it implies a diminution of strength, depth, intensity, or the like; thus, a diet of foods which are not flesh or fat builders *thins* the body; one *thins* a forest by removing surplus trees; one *thins* wine by adding water; one's voice *thins* when one raises its pitch; to *thin* paint; constant use *thins* silver; *thinned* ranks of soldiers. **Attenuate**, in literal use, implies thinning by mechanical, chemical, or other processes, such as drawing out, spinning fine, culturing repeatedly (as a strain of bacteria), or the like, or as the effect of conditions which emaciate, such as disease or starvation; as, to *attenuate* wire by drawing it through successively smaller holes; to hammer brass in order to *attenuate* it; a wave of potential or current *attenuates* in magnitude and phase as it travels along a transmission line; to *attenuate* a virus by heating it. "The powerful frame *attenuated* by spare living" (*Dickens*). In figurative use, which is very common, *attenuate* implies the loss of properties that are necessary to a thing's strength, richness, effectiveness, vitality, or the like, and it often connotes overrefining, over-subtilizing, or overemphasis on the opposite. "We may reject and reject till we *attenuate* history into sapless meagerness" (*F. Palgrave*). "If she had had a little more self-control she would have *attenuated* the emotion to nothing by sheer reasoning" (*Hardy*). "Illusions which science can *attenuate* or destroy, but which it is powerless to enrich" (*J. W. Krulich*). **Extenuate**, as here considered (see also **PALLIATE**), originally meant and still occasionally means to emaciate and exhaust. "Peasants... so *extenuated* by hunger that they could scarcely hold the

spade" (*Lecky*). Later it acquired several of the denotations of *thin*, but in its present limited and somewhat learned use it usually suggests a thinning or abridgment in numbers or detail, or a diminution of a thing's importance or significance. "The whole tendency of modern thought... opinion and... manners is to *extenuate* the responsibility of human nature, not merely on the moral side, but equally on the spiritual side" (*C. Mackenzie*). *Dilute*, both in literal and in figurative use, implies a thinning of that which is concentrated by the addition (in figurative use, sometimes, by the influence) of that which weakens it, neutralizes it, or destroys its vigor or intensity; as, to *dilute* peppermint oil with alcohol; to *dilute* hydrochloric acid with water; the *diluted* romanticism of Leigh Hunt; the pioneer spirit of the early Americans has been *diluted* in their descendants, sometimes manifesting itself as a passion for thrills. "The rough, spontaneous conversation of men they [clergymen] do not hear, but only a mincing and *diluted* speech" (*Emerson*). *Rarefy* implies a thinning in density and usually an expansion in volume or a decrease in weight or pressure; thus, the *rarefied* air of mountainous regions is trying to some persons; water *rarefies* into steam when subjected to high heat; infected tissue at the base of a tooth becomes *rarefied* and translucent. The word occurs frequently in figurative use, chiefly with reference to ideas, emotions, intellectual powers, and the like, sometimes suggesting their spiritualization or refinement and the elimination of all grossness and impurity and sometimes imputing to them a vaporous or tenuous quality. "Plain truths lose much of their weight when they are *rarefied* into subtleties" (*Cudworth*). "Love is a gentle flame that *rarefies* and expands her whole being" (*Hazlitt*).

Ana. Reduce, lessen, diminish, *decrease: *liquefy, melt, dissolve.

Ant. Thicken.

thing. 1 Matter, concern, business, *affair.

2 **Thing, object, article** are all, as here compared, comprehensive terms applicable to whatever is apprehended as having actual, distinct, and demonstrable existence. They vary, however, in their range of application. **Thing** is the term of widest reference. In its most inclusive sense it does not necessarily imply direct knowledge through the senses and is applicable as well to anything the existence of which is inferred from its signs, its effects, or the like; thus, one thinks of the state, the church, literature, the law as *things* rather than as ideas or abstractions; a friend's affection is a real *thing*; one distinguishes a word from the *thing* it names. More often, however, *thing* refers to whatever is directly apprehended through the senses, especially through the senses of sight and touch; as, name the *things* that are on this table; get rid of all the useless *things* in this house; a blind person recognizes *things* through their shape, texture, smell, taste, sound, and the like. Occasionally, *thing* implies a distinction from *person* (often also animals, sometimes plants); as, to be more interested in *things* than in human beings. Consequently, it may be used in reference to persons when contempt is expressed or derogation intended; as, do you call that *thing* a man? **Object** has for its primary implication externality to the mind (that is, it is outside the subject). In philosophic and scientific use it is applied to something that is put before one as a thing to be seen, observed, contemplated, or the like; thus, a thinker may make an abstraction, such as love, art, or justice, an *object* of thought; a mystic may make the humility of Jesus an *object* of contemplation; modern physicists are concentrating on the atom as an *object* of study. This basic implication of *object* is its chief dis-

tinction from *thing* when either word is used to denote something that can be seen or touched, or, less often, tasted, heard, or smelled. For *object* in this, its ordinary sense, is applied chiefly to that which has body, usually substance and shape; as, he groped his way in the darkness with hands outstretched to detect any *objects* in his path; in the glare of the torch they saw moving *objects* in the distance; a skeleton is an unpleasant *object*; the children were allowed to draw only *objects*, not imaginary things. **Article** is by far the most limited in its range of application, being used only of objects that are thought of as members of a group, kind, or class; as, meat is an important *article* of food; *articles* of merchandise are for sale; a chair is an *article* of furniture; *articles* of apparel. **Ana.** *Item, detail, particular.

think. 1 **Think, conceive, imagine, fancy, realize, envisage, envision** are here compared as meaning to form an idea or notion of something in the mind. **Think** (as here considered), the most general and least explicit word of this group, may imply nothing more than the entrance of an idea or notion into one's mind (as, please do not *think* of it) but usually it suggests some consideration or reflection (as, to *think* base thoughts; to *think* one plot better than another; to *think* that a change in occupation is desirable) and often, it implies a conscious mental act such as a recalling or recollection (as, try to *think* how the accident happened), or a bringing of a definite picture or a clear idea into one's mind (as, one cannot *think* infinity; *think* what a sacrifice he has made), or the framing of a purpose or intention (as, to *think* harm to one's enemies; "He...*thought* he would send for his mother; and then he *thought* he would not"—*Hardy*). **Conceive** implies a bringing forth in the mind (in a manner suggestive of conception in the womb) of an idea, a plan, a project, a design, or the like: often, but not invariably, the term suggests the growth and development of that idea as the mind dwells upon it and brings it into being; as, "It was among the ruins of the Capitol that I first *conceived* the idea of a work which has amused and exercised near twenty years of my life" (*Gibbon*); "Naturalism... was in its origin a protest, not against the supernatural in itself, but against a supernatural *conceived* as arbitrary, incoherent, and chaotic" (*Inge*); "When we try to *conceive* the state of mind of primitive man, the first thing that occurs to us is the bewilderment and terror he must have felt in the presence of the powers of nature" (*G. L. Dickinson*). **Imagine** carries a far stronger implication than *conceive* does of visualization, or of definitely imaging a thing; as, one can *conceive*, but scarcely *imagine*, a world of four dimensions; "My main desire has been to make them *conceive*, and, if possible, reproduce sympathetically in their *imagination*, the mental life of their pupil" (*W. James*); "I could *imagine* easily original plots for stories or plays, but never received any impulse to write them" (*G. W. Russell*). **Fancy** (as here compared: see also **LIKE**) may differ little from *imagine*, but it commonly suggests unreality or a degree of untruth in the idea conceived or the image developed: sometimes it even implies a tendency to cut oneself off from facts and to be governed by one's dreams, desires, or the like; as, "Fancy being cooped up in a horrid ship, with... a black wind blowing the masts down, and tearing the sails into long screaming ribbonds" (*Wilde*); "She is almost beautiful... and not in any way what you have been led to *fancy*" (*Meredith*). **Realize** (as here compared: see also **REALIZE**, 1) implies a very vivid conception or imagination of something that does exist or has existed or may exist, but which is not known through the senses or through experience: the term suggests such vividness that the thing conceived

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

seems actual or true. "As Father Vaillant remarked, at Rome they did not seem to *realize* that it was no easy matter for two missionaries on horseback to keep up with the march of history" (*Cather*). "People say that they cannot *realize* these big numbers. But that is the last thing anyone wants to do with big numbers [of miles in astronomical distances]—to *realize* them" (*Eddington*). *Envisage*, and the much more recent *envision*, imply a conception or imagination actually or potentially so clear or so detailed that one does or can contemplate it as though it were before one; as, "the radicals . . . demanded changes which they did not clearly *envisage*" (*Buchan*); "*envisaging* the future without fear" (*Bennett*); "His blackest hypochondria had never *envisioned* quite so miserable a catastrophe" (*L. Strachey*). *Ana.* *Consider, weigh, revolve, study, contemplate: *understand, comprehend, appreciate: surmise, *conjecture, guess.

2 Think, cogitate, reflect, reason, speculate, deliberate come into comparison chiefly as intransitive verbs meaning to use one's powers of conception, judgment, or inference in regard to any matter or subject which concerns one or interests one. **Think** (as here considered) is the general term implying mental activity for the sake of forming ideas or of reaching conclusions: the term may or may not suggest closeness of application, clearness in the ideas formed, or correctness in the conclusions reached, though when used without qualification it often does suggest the attainment or approximation of these; as, "When I was a child, I spake as a child, I understood as a child, I *thought* as a child: but when I became a man, I put away childish things" (*1 Corinthians* xiii. 11); "colleges are places where at least some men learn to *think*" (*Lippmann*); "I am even prepared to be told that when you paid the price of this book you were paying me to *think* for you" (*Shaw*). **Cogitate** places more stress on the process than upon the results of thinking: it is often used, somewhat humorously or ironically, to suggest the appearance or the atmosphere of profound, but not necessarily valid, thinking. "Still *cogitating* and looking for an explanation in the fire" (*Dickens*). "Mrs. Berry had not *cogitated* long ere she pronounced distinctly and without a shadow of dubiosity: 'My opinion is . . .'" (*Meredith*). **Reflect** usually implies a turning of one's thoughts back upon or back to something that exists, has occurred, is without explanation, or the like: it implies quiet and serious consideration or study; as, "[he] stood *reflecting* on the circumstances of the preceding hours" (*Hardy*); "All the most important things in his life, [he] sometimes *reflected*, had been determined by chance" (*Cather*); "When . . . on a calm night I look up at the stars, I *reflect* on the wonders of creation, the unimportance of this planet, and the possible existence of other worlds like ours" (*L. P. Smith*). **Reason** implies consecutive logical thought, beginning with a postulate or postulates, a premise or premises, or definite data or evidence and proceeding through inferences drawn from these to a conclusion or judgment; as, to *reason* about the nature of matter; few can *reason* clearly or consecutively for any length of time; "since, where all is uncertain, we must *reason* from what is probable of human nature" (*Quiller-Couch*); "No man as near death as I was feeling, could, I *reasoned*, be absorbed by such trifles" (*Lucas*). **Speculate** implies the processes of reasoning, but stresses either the uncertainty of the premises or the incompleteness of the data and, therefore, usually imputes a hypothetical or theoretical character to the conclusions reached; "[Tiberius's retirement] was a strange incident in a life of vigorous action, and Rome *speculated* assiduously on the cause" (*Buchan*); "It is

interesting to *speculate* whether it is not a misfortune that two of the greatest masters of diction in our language, Milton and Dryden, triumph with a dazzling disregard of the soul" (*T. S. Eliot*). **Deliberate** suggests slow and careful thought or reasoning on the part of an individual or group, especially before announcing a conclusion or decision; as, "Please you, *deliberate* a day or two" (*Shak.*); "The future relations of the two countries could now be *deliberated* on with a hope of settlement" (*Froude*).

Ana. *Ponder, meditate, muse, ruminate: *infer, deduce, conclude, judge.

thirst, v. Hunger, pine, yearn. *long, hanker.

Ana. Covet, crave, *desire, wish, want.

thither. **Thither, there** indicate a point or place away from the one where the speaker or writer is. **Thither** was formerly in common use with verbs of motion (such as *come, bring, send*, etc.); **there** with verbs of rest (such as *be, live, stay*, etc.). In modern usage *there* has displaced *thither* except in poetic or elevated style and is now employed after verbs of motion as well as of rest.

thoroughfare. Highway, highroad, *road, roadway, street, avenue, boulevard, terrace, drive, parkway, byway, lane, alley, alleyway.

though. **Though, although, albeit** introduce subordinate clauses stating something that is, or may be, true in spite of what is asserted in the main clause. **Though**, the most widely used of these words, is less formal than **although**, which comes close to it in meaning; the clause it introduces may state an established fact or a supposition (either a hypothesis or an admission of possibility or probability); in the former case, the conjunction is usually followed by a verb in the indicative mood, in the latter by one in the subjunctive mood; as, *though* the work has many good points, it is open to severe criticism; let us not defer our trip, *though* it rain tomorrow. "*Though* he slay me, yet will I trust in him" (*Job* xiii. 15). In modern formal writing, **although** is usually preferred to **though** when it introduces an assertion of fact, when the subordinate clause precedes the main clause, and when there is no ellipsis; as, *although* his policy has not yet been fully declared, we have reason to believe that it will be acceptable to all. "*Although* the necessity of renunciation is evidence of the existence of evil, yet Christianity, in preaching it, has shown . . . wisdom . . ." The belief that what must be renounced is bad, *though* sometimes false, is far less often false than untamed passion supposes" (*B. Russell*). **Albeit**, though widely regarded as archaic, is often used in good modern prose when the idea of admission of that which seems a contradiction is expressed. "A worthy fellow, *Albeit* he comes on angry purpose now" (*Shak.*).

thought. *Idea, concept, conception, notion, impression.

Ana. *Opinion, view, sentiment, belief, conviction, persuasion.

thoughtful. **1 Thoughtful, reflective, speculative, contemplative, meditative, pensive** are here compared as applied to persons, their moods, attitudes, expressions, utterances, and the like, and as meaning characterized by or manifesting the power to engage in thought, especially in concentrated thinking. **Thoughtful** may imply either the act of thinking concentratedly or the disposition to apply oneself to the careful and serious consideration of problems or questions at issue; as, he has a shrewd rather than a *thoughtful* face; "Marlowe—not excepting Shakespeare or Chapman, the most *thoughtful* and philosophical mind, though immature, among the Elizabethan dramatists" (*T. S. Eliot*); "So now you

know...why it [socialism] is advocated so widely by *thoughtful* and experienced people in all classes" (Shaw). **Reflective** differs from *thoughtful* in its stronger implication of orderly processes of thought, such as analysis, logical reasoning, or the like, and in its suggestion of a definite aim, such as the understanding of a thing's nature or of its relation to other things, or the reaching of a definite conclusion. "Men of *reflective* and analytical habit, eager to rationalize its [plutocracy's] instincts and to bring it into some sort of relationship to the main streams of human thought" (Mencken). **Speculative** (etymologically, spying out) implies a tendency or inclination to think about things direct knowledge of which is either impossible or so extremely limited that any conclusions are bound to be uncertain; as, economics is regarded by many persons as a *speculative* science; "speculative writing about the state" (Frankfurter). Hence, the term often implies theorizing or conjecturing, without consideration of the evidence or with little attention to the evidence; as, "About a thousand practical and positive topics the Frenchman, who speaks from experience and examination, finds our views *speculative* and immature" (Brounell). "The philosophical background of Chinese culture has always tended to create *reflective* rather than *speculative* thinkers" (H. H. Hart). **Contemplative** carries a much stronger implication than the other words of an attention fixed on the object of one's thoughts: it also may imply as its object something perceivable by the senses, or something abstract yet comprehensible by the human reason (such as the ideas of love, beauty, the state, or the like), or something beyond the power of the unaided human mind to know or comprehend (such as God, the Absolute, the future life); as, "The women were the crowning joy of his *contemplative* mind...Dear demonstrative creatures!" (Meredith). "Practical curiosity becomes *contemplative* and examines things for their own sake when...man...having arrived at the stage of ideas and thought, applies them to the data presented by sensible experience" (S. Alexander). **Contemplative**, as opposed to *active*, is also applied to a type of life, to religious orders, to the members of such orders, or to other persons or institutions that have for their chief aims the consideration of that which is abstract, ideal, spiritual, or the like, or reflection upon ideas beyond the range of sensible perception. "The *contemplative* life which is concerned with human feeling and thought and beauty...the *contemplative* life which has God's person and love in Christ for its object" (Ruskin). **Meditative** (except in religious use, where it comes very close to *contemplative*, though it there stresses reflection more than fixity of attention) usually implies a tendency to ponder or muse over something, without necessarily implying any intellectual purpose such as understanding a thing or reaching a conclusion regarding it. The term therefore often comes close to *thoughtful*, though it usually implies some consecutive reasoning and sometimes suggests pleasure rather than seriousness in the exercise of thought; as, to indulge in many a *meditative* walk; a *meditative* temperament. "Sympathies... That steal upon the *meditative* mind, And grow with thought" (Wordsworth). **Pensive** is not always clearly distinguishable from *meditative*, though at times it carries a far stronger suggestion of dreaminess, of wistfulness, or of melancholy; as, "For oft, when on my couch I lie In vacant or in *pensive* mood" (Wordsworth); "silent and *pensive*, idle, restless, slow" (Byron); "There always remained with me, long after I outgrew his [Longfellow's] poems, a tender memory for that first friend of wistful and *pensive* puberty" (H. Ellis).

Ana. *Serious, earnest, grave, sober: engrossed, absorbed, *intent: *abstracted, preoccupied.

2 Thoughtful, considerate, attentive, as here compared, are applied to persons and their acts in the sense of mindful of the comfort or happiness of another or of others. **Thoughtful** usually implies unselfish concern for others or the capacity for anticipating another's needs; as, an affectionate but not *thoughtful* daughter. "In his *thoughtful* wish of escorting them through the streets of the rough, riotous town" (Gaskell). **Considerate** stresses concern for the feeling of others, or thoughtfulness in preventing or in relieving pain, suffering, or the like. "The people try as much as they can do to compensate for our discomforts by their kindness. The French poor people are very *considerate* where they see suffering" (Meredith). "They are...not kind, only sentimental; not social, only gregarious; not *considerate*, only polite" (Shaw). **Attentive** emphasizes continuous thoughtfulness, or implies repeated acts of kindness or courtesy. "I was never more surprised than by his behaviour to us. It was more than civil; it was really *attentive*" (Austen). "There was a very tender feeling between David and Aunt Marian, as he called her. He was almost more *attentive* to her than her own children" (M. Austin).

Ana. Solicitous, concerned, careful, anxious (see under CARE); courteous, polite, gallant, chivalrous (see CIVIL).

Ant. Thoughtless.

thoughtless. *Careless, heedless, inadvertent.

Ana. Rash, reckless, foolhardy (see ADVENTUROUS);

*indifferent, unconcerned, incurious, aloof: lax, remiss, *negligent.

Ant. Thoughtful.

thrall. *Serf, vassal, slave, bondslave, bondman, bondman, peon, Helot.

thrash, v. 1 Thresh, *beat, pound, pummel, buffet, baate, belabor.

Ana. *Strike, smite, slug, slap: winnow (see SIFT).

2 Flourish, brandish, *swing, wave.

Ana. Wield, manipulate, swing, play, *handle.

threadbare. Shopworn, *trite, hackneyed, stereotyped.

Ana. Antiquated, obsolete, archaic (see OLD): exhausted, depleted, drained, impoverished (see DEplete).

threaten. **Threaten, menace** agree in meaning to forecast by word, look, or other means, an evil, an injury, or other infliction likely to be visited upon one. **Threaten** basically implies an attempt to dissuade or influence by promising punishment or the infliction of reprisals upon those who disobey an injunction or perform acts objectionable to the speaker. "The magistrates... Solicited, commanded, *threatened*, urged" (Milton). "Another form of lying, which is extremely bad for the young, is to *threaten* punishments you do not mean to inflict" (B. Russell). However, the term has been so extended in its meaning that it is now often used without reference to persons who issue such warnings or who promise such penalties and with reference to things, such as events, conditions, or symptoms, which presage or otherwise indicate something, often, but not necessarily, something dire or disturbing, to happen; as, overcast skies that *threaten* rain; disputes which *threaten* a rupture. "The recollection of the forty tons of dynamite in the body of the 'Ferndale'; not the sort of cargo one thinks of with equanimity in connexion with a *threatened* collision" (Conrad). "Without invoking the rule of strict construction I think that 'so near as to obstruct' means so near as actually to obstruct—and not merely near enough to *threaten* a possible obstruction" (Justice Holmes). **Menace** is a somewhat more literary term than *threaten*: also, it carries a much weaker implication of an attempt to dissuade or influence and a much stronger suggestion of

an alarming or a definitely hostile character or aspect; as, he did not actually *threaten* me but his tone was *menacing*; conditions that *menace* our liberty. "Is it not experience which renders a dog apprehensive of pain, when you *menace* him?" (Locke). "Her subjects were incited to rebellion; her life was *menaced*" (Macaulay).

Ana. *Intimidate, bulldoze, cow, browbeat: forebode, portend, presage, augur (see FORETELL): *warn, forewarn, caution.

thresh, v. Thrash, *beat, pound, pummel, buffet, baste, belabor.

Ana. Winnow (see SIFT): *strike, smite.

thrifty. Economical, *sparing, frugal.

Ana. Provident, prudent, foresighted (see under PRUDENCE): saving, preserving, conserving (see SAVE).

Ant. Wasteful.

thrill, v. Thrill, electrify, enthuse are here compared as meaning to fill a person with emotions that stir or excite one physically and mentally or, less often, to be stirred by such emotions. Thrill (etymologically, to pierce) suggests pervasion by emotions that set one's nerves tingling or quivering with pleasure, horror, or the like: commonly it implies an agreeable sensation even when the exciting cause is painful; as, a *thrilling* detective story; he *thrilled* his audience with his stirring appeal for action; I *thrilled* in response to his appeal; "Me mightier transports move and *thrill*" (Tennyson); "Why should not mind be able to pass on to mind its *thrilled* sense of a storm or a flower. . . ?" (C. E. Montague). Electrify differs from *thrill* in suggesting effects comparable to those produced by an electric current that shocks rather than stuns: it implies a sudden, startling, and violent stimulation of the nerves or the mind by a power that for the time being holds one obedient to its will or under its sway; as, "Those heights of courage which *electrify* an army and ensure victory" (Burke). "She was not eating anything, she was using up all her vitality to *electrify* these heavy lids into speech" (Cather). Enthuse, a back formation from *enthusiasm*, has not been accepted by careful writers and speakers: it is often used carelessly or by indiscriminating writers and speakers to imply a stirring of or a being stirred by strong emotions such as ardor, fervor, zeal, and the like; as, to *enthuse* an audience with his suggestions for home defense; the people were not *enthused* over the prospect of war; he was always *enthusing* about the latest play he had seen.

Ana. Excite, stimulate, galvanize, quicken (see PROVOKE): *stir, arouse, rouse, rally: penetrate, pierce, probe (see ENTER): quiver, tremble, shiver (see SHAKE).

throb, v. Beat, *pulsate, pulse, palpitate.

throb, n. Beat, pulsation, pulse, palpitation. See under PULSATE.

throe. *Pain, ache, pang, twinge, stitch.

throng, n. *Crowd, press, crush, mob, rout, horde.

Ana. *Multitude, army, host, legion: assembly, congregation, gathering, collection (see under GATHER).

through. *By, with.

throw, v. Throw, cast, fling, hurl, pitch, toss, sling are synonymous terms when they mean to cause to move swiftly forward, sideways, upward, or downward by a propulsive movement as of the arm, or by means of a propelling instrument or agency. Throw, now the general word, is often, but not always, followed by an adverb such as *off*, *away*, *down*, *up*, etc., to indicate not only the direction of that which is being propelled, but sometimes, especially in idiomatic phrases, its destination or disposal; as, "people who live in glass houses should not *throw* stones" (Proverb); "Throw physic to the dogs; I'll none of it" (Shak.); the fire engine *throws* a long stream

of water; this gun *throws* a huge shell; to *throw* away food; to *throw* off one's coat. "The sceptic cannot *throw* his opponent if his own feet are in the air" (Inge). Cast is often interchangeable with *throw* but in current use it seems somewhat archaic unless that which is thrown is light (as, to *cast* a net; to *cast* dice), and is either directly aimed (as, to *cast* one's line in angling), or scattered more or less carefully (as, to *cast* seed), or is thrown only in a figurative sense (as, to *cast* a black look). "He that is without sin among you, let him first *cast* a stone at her" (John viii. 7). "Every tree therefore which bringeth not forth good fruit is hewn down, and *cast* into the fire" (Luke iii. 9). Fling implies much more violence in throwing or propulsion than either of the preceding words; commonly, it also implies a force gained from strong emotion such as anger, contempt, or enthusiasm. "I would sooner take Empedocles's leap, and *fling* myself into Mount Etna" (Cowper). "Then he loathed his own beauty, and, *flinging* the mirror on the floor, crushed it into silver splinters beneath his heel" (Wilde). "It's no use!" cried Constance, *flinging* away her work" (Bennett). Hurl stresses driving and impetuous force that makes for speed and distance; as, to *hurl* quoits. "Him the Almighty Power *Hurled* headlong flaming from the ethereal sky" (Milton). Pitch more than any of the preceding words implies a sense of direction and of a definite aim in throwing; it is the preferred term in some competitive games such as baseball where skill in determining what course the thrown thing will take is important and in some employments, such as farming, where things are thrown to a definite spot; as, to *pitch* a spear; to *pitch* a ball; to *pitch* hay. Toss implies light, careless, or more or less aimless throwing; as, "he . . . *tossed* me some pieces of money" (Dickens); "she rested on a log and *tossed* the fresh chips" (Frost); the angry bull *tossed* the boy over the wall; to *toss* a coin to decide which should go. The term often also suggests a throwing to and fro or up and down (as, an hour's play in *tossing* a ball; "They . . . discuss'd a doubt and *lost* it to and fro"—Tennyson). Sling does not as often, as in earlier English, imply the use of a sling, or an instrument for throwing or hurling missiles such as stones or shot. When it does not, however, it retains its implication of a sudden, violent propulsion and of directness of aim; as, to *sling* snowballs.

Ana. Drive, impel (see MOVE, v.): propel, thrust, shove, *push: heave, raise, *lift, boost.

throwback. *Reversion, atavism.

thrust, v. *Push, shove, propel.

Ana. *Throw, cast, fling: drive, impel, *move: *enter, penetrate, pierce.

thrust, n. *Stress, strain, pressure, tension, shear, torsion.

thug. *Ruffian, desperado, gangster, Mohock, apache.

thwart. Foil, *frustrate, baffle, balk, circumvent, outwit

Ana. *Hinder, impede, obstruct, block, bar: defeat, overcome, surmount (see CONQUER): check, curb, *restrain: *prevent, forestall, anticipate.

tickle. *Please, regale, arride, gratify, delight, rejoice, gladden.

Ana. Divert, *amuse, entertain: *thrill, electrify.

tide, n. 1 Time, *opportunity, occasion, chance, break, hint.

Ana. *Juncture, emergency, exigency, contingency.

2 Flood, *flow, stream, current, flux.

tidings. *News, intelligence, advice.

tidy. *Neat, trim, trig, snug, shipshape, spick-and-span.

Ana. *Orderly, methodical, systematic.

Ant. Untidy. — **Con.** *Slipshod, slovenly, sloppy, unkempt.

tie, v. **Tie, bind** agree in meaning to make fast or secure. They are often used interchangeably without marked loss, but since in both their literal and figurative senses they carry fundamentally distinct connotations, greater precision in their use is often possible. **Tie** in its literal sense implies the use of a cord or rope which can be knotted, and the attachment of one thing that may wander or move, by that cord or rope, to another that is stable. "I'll tie them [our horses] in the wood" (*Shak.*). **Bind**, on the other hand, implies the use of a band or bond (see **BOND, n.**) and the attachment of two or more things together by means of this band or bond with the result that they are held together firmly or brought into union. "Gather ye together first the tares, and bind them in bundles" (*Matthew* xiii. 30). Even when the idea of attachment is not connoted or is very weak, **tie** still implies knotting and **bind** the use of an encircling band (such as a bandage or bandeau) or a bond (such as a chain, manacle, or fetter); as, to tie a sash or cravat; to bind a sprained ankle; "a fillet binds her hair" (*Pope*); to bind a person hand and foot. In figurative use, especially when that which is tied or bound is a person, both terms imply a deprivation of liberty and an imposed restraint. **Tie**, however, specifically suggests a being held down by something stronger than oneself and an inability to get away or free oneself; as, to be tied to a job; he is tied to his bed. **Bind**, on the other hand, either suggests a being held together in a close union, for the sake of strength or mutual support (as, the common danger bound all classes together; "And vows of faith each to the other bind"—*Shelley*), or a being held down by a bond, such as a pledge, a compact, a duty, an obligation, or by a bond of blood, marriage, or friendship; as, "And vows, that bind the will, in silence made" (*Wordsworth*); "That love, which none may bind, be free to fill The world" (*Shelley*).

Ana. *Fasten, attach: *secure, rivet, anchor, moor: *join, connect, link.

Ant. Untie.

tie, n. *Bond, band.

tiff, n. *Quarrel, bickering, spat, squabble, wrangle, altercation.

Ana. Scrap, rumpus, row, *brawl, broil: variance, dissension, contention, *discord.

tiff, v. Spat, bicker, quarrel, squabble, wrangle, altercate. See under **QUARREL, n.**

Ana. Dispute, argue (see **DISCUSS**): differ from, *differ with: *contend, fight.

tight. 1 **Tight, taut, tense** come into comparison especially in their literal senses when they mean drawn or stretched to the point where there is no looseness or slackness. They are often not closely synonymous terms in their extended senses. **Tight** comes closer etymologically to **compact** and **close** than it does to the senses in which it is here chiefly considered, but even in the latter senses it often implies a drawing around or about something in a way that constricts or binds it or a drawing of the edges of something firmly together; as, a tight belt; a tight coat; tight lips; "Tom has eaten... and imbibed coffee, till his little skin is as tight as a drum" (*T. Hughes*); "Law should be regarded as an elastic tissue which clothes a growing body. That tissue, that garment, must fit exactly; if it is too tight it will split and there will be lawlessness; if it is too loose, it will impede movement" (*Buchan*). When applied to a structure, **tight** more often suggests a drawing together of all parts so that nothing can enter or escape (as, a ship as tight [often *watertight*] as a bottle; a tightly built house; "if the granary be not tight, the grain will leak out almost as fast as it is shoveled in"—*Grandgent*); when applied to a person,

it may imply either secretiveness (as, "'and loose lips sometimes appear to be rather tight talkers'" — *R. Macaulay*) or stinginess (see **tight** under **STINGY**); when applied to a situation, it suggests that those involved in it are cornered or squeezed unmercifully (as, "those who take refuge in gaps find themselves in a tight place when the gaps begin to close"—*Inge*). When the emphasis is upon pulling or stretching a cord, a rope, a fabric, or the like, to the point where it can be stretched no more without breaking or without putting undue strain upon its supports, **tight** is often used but **taut** is strictly the more explicit word and therefore to be preferred in this sense; thus, a tight cord may be one which ties up a bundle closely and firmly or is stretched to the limit between two points but a taut cord is one which is tight only in the second of these senses; so, taut as a drumhead; "he is taut as one of the hawsers of his own boat" (*Van W. Brooks*); "Her sails are loose, Her tackles hanging, waiting men to seize And haul them taut" (*Amy Lowell*). However, **tight** is usually preferred to **taut** in the compound **tightrope** (as, to dance on a tightrope). In other than nautical or mechanical use, **taut** often carries a suggestion of strain, especially of nervous strain; as, "the full lips thrust out and taut, like the flesh of animals distended by fear or desire" (*Cather*); "in exchanging Wordsworth for Taylor and Johnson, we have relaxed something with the metre, something that the metre kept taut; and this something we discover to be the emotional pitch" (*Quiller-Couch*). When there is an implication of tightness or tautness that involves severe physical or, more often, nervous strain or that manifests itself in signs of such strain, **tense** is the preferred term; as, a cat crouched for a spring, with muscles tense; "Help him to unbend his too tense thought" (*Arnold*); "faces... delicately tinted... under the tense silk of parasols" (*H. James*); "Just as a bicycle chain may be too tight, so may one's carefulness and conscientiousness be so tense as to hinder the running of one's mind" (*W. James*); "Day after day I searched among the ruins and viewed with a tense anxiety the hundreds of corpses constantly being carried to the morgues" (*V. Heiser*).

Ana. Strict, stringent (see **RIGID**): *close, compact: constricted, contracted, compressed, condensed, shrunken (see **CONTRACT, v.**): snug, shipshape (see **NEAT**).

Ant. Loose.

2 Also **tightfisted**. *Stingy, close, closefisted, niggardly, parsimonious, penurious, miserly, curmudgeonly, cheeseparring, penny-pinching.

Ana. *Mean, ignoble, sordid, abject.

3 Tipsy, intoxicated, *drunk, drunken, inebriate, inebriated.

tight-lipped. *Silent, uncommunicative, taciturn, close, close-lipped, closemouthed, reticent, reserved, secretive.

tilt, v. *Tip, cant, careen, heel, list.

Ana. Incline, *slant, slope, lean.

time, n. Tide, *opportunity, occasion, chance, break, hint.

Ana. *Juncture, contingency, emergency, exigency.

timely. Well-timed, opportune, *seasonable, pat.

Ana. Appropriate, fitting, meet, proper, suitable (see **FIT**): fortunate, *lucky, happy, providential.

Ant. Untimely.

timetable. *Program, schedule, agenda.

timid. Timid, timorous agree in meaning so fearful and apprehensive as to hesitate or hold back. **Timid** stresses lack of courage and daring and, therefore, usually implies extreme cautiousness and fearfulness of change or of venture into the unknown or uncertain; as, a timid investor; timid as a deer; "timid about making decisions"

(*Cather*); "A *timid* person would rather remain miserable than do anything unusual" (*B. Russell*). **Timorous**, on the other hand, stresses domination by fears and apprehensions: it implies a temporary or habitual frame of mind which causes one to shrink from any action or activity which requires independence, decision, self-assertiveness, or the like; it, therefore, suggests terror rather than extreme caution; as, "Murray, the most *timorous*, as Byron called him, of all God's booksellers" (*Scott*); "in another moment she seemed to have descended from her womanly eminence to helpless and *timorous* girlhood" (*E. Wharton*); "*timorous* and fearful of challenge" (*Mencken*).

Ana. *Fearful, apprehensive, afraid: *cautious, circumspect, calculating, wary, chary: *cowardly, pusillanimous.

Ant. Valiant.

timorous. *Timid.

Ana. *Fearful, apprehensive, afraid: recoiling, shrinking, quailing, blenching (see RECOL): trembling, quivering, shivering, shuddering (see SHAKE).

Ant. Assured.

tincture, n. *Touch, suggestion, tinge, suspicion, soupçon, shade, smack, spice, dash, vein, strain, streak.

tinge, n. 1 Tint, shade, hue, *color, chroma.

2 Tinge, *touch, suggestion, shade, suspicion, soupçon, smack, spice, dash, vein, strain, streak.

tint, n. Hue, shade, *color, chroma, tinge.

tiny. Minute, miniature, diminutive, wee, *small, little, teeny, weeny.

tip, v. *Tip, tilt, cant, careen, heel, list* agree in meaning to cause something to incline from a vertical or horizontal position or to suffer such an inclination. **Tip** now often depends on a succeeding adverb or adverbial phrase to indicate how far this inclination goes or what direction it takes; as, to *tip* over a vase, or a chair; the boat is *tippling* over; to *tip* dirt out of a cart; to *tip* up a mattress; to *tip* one's chair backward. When used without such a word or phrase, the term usually implies either any possible direction or the conventional direction; as, you will *tip* the boat if you all stand on this side; to *tip* one's hat in saluting. **Tilt** etymologically carries a stronger implication of unsteadiness or of tottering than *tip*, but it has lost this connotation in all but one of its senses when it suggests swaying or pitching, as of a ship in rough seas. "The floating vessel . . . with beaked prow Rode *tilting* o'er the waves" (*Milton*). Otherwise, *tilt* suggests a distinct, and often a permanent, slope or slant; for this reason, although the terms are interchangeable, careful writers and speakers show a preference for *tip* when the reference is to things that are not stationary, and for *tilt* when the reference is to things that are fixed in position; as, the board *tips* slightly; the tree *tilts* to the south. "That *tilted* cobble street, winding down a hill" (*Cather*). **Cant** is also often used in place of *tip* or *tilt*, but it is preferred to either when that which is tipped or tilted is inclined at or near an angle of 90°; thus, a *tipped-over* boat by implication overturns; a *canted* (or *canted-over*) boat by implication (unless corrected by the context) lies on its side. **Cant** sometimes carries so strong a suggestion of throwing or tossing that the term carries little or no implication of tipping or inclining. "What if the wave ebbed with me? Whereas it *cants* you to another crest" (*Browning*). **Careen** and **heel** as transitive verbs are chiefly used in reference to ships that are turned on one side, especially for cleaning and repairing the parts below the water line. Consequently, both verbs, but especially *careen*, often also imply cleaning, caulking, and the like. "Finding a convenient harbor . . . he un-

loaded and *careened* his vessels" (*Irving*). As intransitive verbs, they are chiefly used in reference to ships, especially sailing vessels that cant obviously or dangerously because of a strong wind or unbalanced loading. "*Careening* as if never more to right" (*W. Falconer*). "Eight hundred of the brave . . . Had made the vessel *heel*, And laid her on her side" (*Cowper*). **List**, which is commonly but not exclusively an intransitive verb, also is a nautical term. It differs from *careen* and *heel* chiefly in suggesting a dangerous loss of balance owing to the shifting of the cargo to one side, the entrance of water into the hold, or the like; as, it was not until they noticed the *listing* of the ship that they discovered that the emergency bulkheads had not been closed.

Ana. Incline, *slant, slope, lean.

tippler. *Drunkard, inebriate, alcoholic, dipsomaniac, sot, soak, toper, tosspot.

tipsy. Intoxicated, inebriate, inebriated, *drunk, drunken, tight.

tire, v. *Tire, weary, fatigue, exhaust, jade, fag, tucker* agree in meaning to make, or in some cases to become, disinclined or unable to continue because of loss of strength or endurance. **Tire** is the general and ordinary word and usually implies the draining of one's strength or patience: it may suggest any of several causes, such as overexertion, long continuance at a task, boredom, a sense of futility, or the like, and usually it requires textual amplification to indicate the cause and the degree of the effect. "It *tires* me to death to read how many ways the warrior is like the moon, or the sun, or a rock, or a lion, or the ocean" (*Walpole*). "Music that gentlier on the spirit lies, Than *tired* eyelids upon *tired* eyes" (*Tennyson*). "Then, to the visible embarrassment of his young associates, he suddenly *tired* of it all [fashionable society] and joined the Anglo-Catholic persuasion" (*Day Lewis*); "We shall not fail or falter; we shall not weaken or *tire*" (*Winston S. Churchill*). **Weary** as often suggests an incapacity for enduring more of the same thing or an unwillingness to continue one's effort, one's interest, or the like, as a depletion of that strength or that interest. "The others would never even raise their eyes when this happened, as men too well aware of the futility of their fellows' attempts and *wearyed* with their useless repetition" (*Kipling*). "Ah, I am worn out—I am *wearyed* out— It is too much—I am but flesh and blood, And I must sleep" (*Millay*). "The Muses are vindictive virgins, and avenge themselves without mercy on those who *weary* of their charms" (*L. P. Smith*). "It did not last, the Crofts' marriage. In the spring of '95, Stanley *wearyed* of her husband's infidelities, and could not bear them any more" (*R. Macaulay*). **Fatigue** is stronger than *tire* and implies great lassitude brought on by overstrain or undue effort. It usually implies an incapacity for further strain or effort without untoward effects; as, his physician ordered him to avoid *fatiguing* himself until he had regained his strength. "[My head] is so *fatigued* by breakfast time . . . I am utterly incapable of sitting down to my desk again" (*Cowper*). "She flung herself upon a sofa, protesting . . . that she was *fatigued* to death" (*Burney*). **Exhaust** (as here considered: see also DEplete) heightens *fatigue*'s implications of drained strength or a worn-out condition of mind or of body; as, she is too *exhausted* to sleep; "I am so *exhausted* as not to be able to write" (*Cowper*). **Jade** (etymologically from *jade*, a worn-out horse) implies weariness or fatigue that makes a person (sometimes a thing) lose all freshness and spirit and become dull and languid. The term seldom carries as clear a suggestion of physical or mental overexertion as *fatigue* and often implies even more satiety than *weary*; it is especially useful when the implication of overindul-

gence in something or the overworking of some power is to be conveyed; as, "*faded* and restless from the dissipations of the day" (*Smollett*); "To the *faded* . . . eye it is all dead and common . . . flatness and disgust" (*W. James*). "I felt a wreck when I met Percy at an early breakfast next morning. He, too, looked *faded* and strained, and ate hardly any breakfast" (*R. Macaulay*). *Fag*, a familiar and colloquial term, implies work until one droops with weariness or fatigue. "I worked . . . at correcting manuscript, which *fags* me excessively" (*Scott*). "And man to man with a gasp for breath Said, 'Lord, what a run. I'm *fagged* to death'" (*Masefield*). *Tucker*, usually with *out*, is an American colloquialism that closely approaches *fatigue* or *exhaust* in meaning but usually carries the additional implication of loss of breath; as, the house cleaning *tuckered* her *out*; all *tuckered out* from the long climb.

Ana. *Irk, vex, *annoy, bother: *deplete, drain, exhaust, impoverish, bankrupt.*

tire, v. *Attire, *clothe, dress, apparel, array, robe, vest, invest.*

Ana., Ant., & Con. See those at **ATTIRE**.

tire, n. *Attire, *clothes, clothing, dress, apparel, raiment, vesture, array.*

tireless. **Indefatigable, weariless, untiring, unwearying, unwearied, unflagging.*

Ana. *Assiduous, sedulous, diligent, industrious, *busy: energetic, strenuous, *vigorous.*

tiresome. **Irk some, wearisome, tedious, humdrum.*

Ana. *Oppressive, burdensome, *onerous, exacting: fatiguing, exhausting, jading, fagging (see **TIRE, v.**): arduous, *hard, difficult.*

tiro. Variant of **TYRO**.

titanic. **Enormous, immense, huge, vast, gigantic, giant, gigantean, colossal, mammoth, elephantine, herculean, Cyclopean, Antaeon, Gargantuan, Brobdignagian.*

tithe, n. **Tax, levy, assessment, rate, excise, impost, customs, duty, toll, tariff, tribute, teind, cess.*

title, n. 1 **Claim, pretension, pretense.*

Ana. **Right, privilege, prerogative, birthright: *reason, ground, argument, proof: *due, desert, merit.*

2 **Name, designation, denomination, appellation, style.*

titlle. **Particle, bit, mite, smitch, smidgen, whit, atom, iota, jot.*

toady, n. **Parasite, sycophant, favorite, lickspit, hanger-on, leech, sponge.*

toady, v. **Fawn, truckle, cringe, cower.*

Ana. *Ingratiate, insinuate (see corresponding adjectives at **DISARMING**): *follow, tag, trail, tail: blandish, cajole, wheedle (see **COAX**).*

toboggan, v. *Coast, *slide, slip, glide, skid, glissade, alither.*

tocsin. **Alarm, alarum, alert.*

Ana. *Signal, *sign.*

toff. **Fop, dandy, beau, coxcomb, exquisite, élégant, dude, macaroni, buck, spark, swell, nob.*

toffish or toffy. **Stylish, fashionable, modish, smart, chic, dapper, dashing, spruce, brave, braw, natty, nifty, nobby, posh.*

toll, n. *Labor, *work, travail, swink, drudgery, grind.*

Ana. **Effort, exertion, pains, trouble: employment, occupation, calling, pursuit, business, métier (see **WORK**).*

Ant. *Leisure.*

token. 1 **Sign, mark, symptom, badge, note.*

Ana. **Symbol, emblem, attribute: *evidence, testimony: indication, proving or proof, betokening (see corresponding verbs at **INDICATE**).*

2 **Pledge, earnest, pawn, hostage, gage.*

Ana. **Guarantee, guaranty, security, surety.*

tolerance. *Forbearance, leniency, indulgence, clemency, mercifulness. See under **FORBEARING**.*

Ana. **Mercy, charity, grace, lenity: *patience, long-suffering, longanimity.*

Ant. *Intolerance: loathing.*

tolerant. **Forbearing, lenient, indulgent, clement, merciful.*

Ana. **Charitable, benevolent, humane: forgiving, excusing, condoning (see **EXCUSE, v.**).*

Ant. *Intolerant: severe.*

tolerate. *Endure, abide, *bear, suffer, stand, brook.*

Ana. *Accept, *receive: submit, *yield, bow, succumb.*

toll, n. **Tax, levy, assessment, rate, excise, impost, customs, duty, tariff, tribute, tithe, teind, cess.*

tone. **Atmosphere, feeling, feel, savor, aura.*

Ana. *Peculiarity, individuality, characteristic (see corresponding adjectives at **CHARACTERISTIC**): *quality, property, character.*

tongue. **Language, dialect, speech, idiom.*

tonguelash, v. *Upbraid, rate, berate, *scold, jaw, bawl out, wig, rail, revile, vituperate.*

tonic. **Restorative, alterative.*

too. **Also, likewise, besides, moreover, furthermore.*

tool. **Implement, instrument, appliance, utensil.*

Ana. **Device, contrivance, contraption, gadget: *machine, engine, apparatus, appliance: *means, instrument, instrumentality, agent, agency.*

tooth, n. *Tooth, tusk, fang* literally mean a hard bony appendage, or one of such appendages, borne on the jaws, or in some cases on the wall of the mouth or of the pharynx, of vertebrates and used chiefly in the grasping, the biting, and the mastication of food. **Tooth** is the general term, but it is used so frequently with reference to the appendages on the jaws of human beings and many of the higher vertebrates that it is rarely employed in general colloquial use to designate what is strictly called a *tusk* or *fang*. But it occurs in poetry in this sense; as, "How sharper than a serpent's *tooth* it is To have a thankless child!" (*Shak.*); "Nature, red in *tooth* and claw With ravine" (*Tennyson*). **Tusk** is an elongated and greatly enlarged tooth which is found in certain animals such as the elephant, the walrus, the narwhal, and the wild boar, and which typically projects from the mouth, even when the mouth is closed, and serves as a means of digging up food, or as a weapon or the like. **Fang** is a long, sharp tooth characteristic of carnivorous animals with strong jaws, such as large dogs and wolves, and used chiefly in seizing and rending prey. The term also designates a similarly pointed hollow tooth of some venomous snakes which is folded back in the mouth and erected only when striking. Hence, in extended use, *tooth* usually suggests a thing which eats or destroys (as, the *tooth* of time; "Fell sorrow's *tooth*"—*Shak.*) or denotes a taste or appetite for food such as is described (as, a sweet *tooth*); *tusk* is used contemptuously of abnormally large projecting human teeth (as, when he opened his mouth, he showed two rows of yellow *tusks*); *fang* suggests power to cut, pierce, or poison (as, "the icy *fang* . . . of the winter's wind"—*Shak.*; "an equivocation which now turned venomously upon him with the full-grown *fang* of a discerned lie"—*G. Eliot*).

toothsome. **Palatable, appetizing, savory, sapid, saporous, tasty, flavorful, relishing.*

toper. **Drunkard, inebriate, alcoholic, dipsomaniac, sot, soak, tosspot, tippler.*

topic. **Subject, matter, subject matter, argument, text, theme, motive, leitmotiv.*

torment, v. *Torture, rack, grill, *afflict, try.*

Ana. **Worry, annoy, harry, harass, plague, pester:*

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

distress, *trouble: *bait, badger, hector: agonize, *writhe.

tornado. *Wind, gale, hurricane, whirlwind, cyclone, typhoon, waterspout, twister, gust, blast, flaw, zephyr.

torpid. *Lethargic, sluggish, comatose, stuporous.

Ana. Inert, *inactive, idle, passive: phlegmatic, *impassive, stolid.

Ant. Agile.

torpidity. Torpor, stupor, *lethargy, languor, lassitude.

Ana. Inertness, inactivity, idleness, passiveness (see corresponding adjectives at INACTIVE).

torpor. Torpidity, stupor, *lethargy, languor, lassitude.

Ana. Apathy, phlegm, impassivity, stolidity (see under IMPASSIVE): inertness or inertia, passiveness, inactivity (see corresponding adjectives at INACTIVE).

Ant. Animation.

torsion. *Stress, strain, pressure, tension, shear, thrust.

tort. Injury, wrong, grievance, *injustice.

tortuous. *Winding, anfractuous, sinuous, serpentine, flexuous.

Ana. *Crooked, devious: labyrinthine, mazy (see corresponding nouns at LABYRINTH): roundabout, circuitous, *indirect.

☞ *Do not confuse tortuous with torturous.*

torture, v. Rack, torment, grill, *afflict, try.

Ana. *Writhe, agonize: persecute, oppress, *wrong: distress, trouble: *worry, annoy, harry, harass: *maim, mutilate, mangle.

toss, v. Pitch, sling, *throw, cast, fling, hurl.

Ana. Impel, drive (see MOVE, v.): thrust, propel (see PUSH, v.).

tosspot. *Drunkard, inebriate, alcoholic, dipsomaniac, sot, soak, toper, tippler.

total, adj. *Whole, entire, all, gross.

Ana. Complete, *full, plenary: including or inclusive, comprehending or comprehensive (see corresponding verbs at INCLUDE).

total, n. *Sum, aggregate, whole, amount, number, quantity.

total, v. *Add, sum, figure, cast, foot.

totalitarian, adj. **Totalitarian, authoritarian**, as applied to a government or state, require discrimination, for, although applicable in current use to the same states, they actually carry a different emphasis. **Totalitarian** implies as an objective an undivided state in which all power (political, economic, commercial, cultural, religious, etc.) is vested in the government, and in which the people as a unit sanction and support this government and obey its orders. Practically, it implies toleration of but one political party, the one which supports the government, and the concentration of authority in the hands of one person or group, theoretically the mouthpiece of the people. **Authoritarian** implies a type of governmental organization in which professedly as well as actually all political power is ultimately concentrated in the hands of a leader, or dictator, and not as in democratic countries, in the people or in a representative body. No matter how the various powers vested in the government may be distributed for practical purposes, an **authoritarian** state is so organized that the final and determining authority is its head. Practically, an **authoritarian** government, though professing political power, often extends its control over the economic and cultural life of the people; thus, Italy, with the rise of Mussolini and the Fascists to power in 1922, became an **authoritarian** state; Germany, with the election of Hitler as Chancellor in 1933, became a **totalitarian** state.

totter. *Shake, tremble, quake, quaver, quiver, shiver, shudder, wobble, teeter, shimmy, didder, dither.

Ana. Rock, agitate, *shake, convulse: sway, *swing, fluctuate, oscillate, waver.

touch, v. 1 *Affect, influence, impress, strike, sway.

Ana. Arouse, *stir: excite, stimulate, quicken (see PROVOKE): *injure, harm, damage, hurt, impair.

2 Approach, rival, *match, equal.

touch, n. Touch, suggestion, suspicion, soupçon, tincture, tinge, shade, smack, spice, dash, vein, strain, streak come into comparison not in their literal senses, where they exhibit great divergence in meaning, but in their extended senses when they mean a perceptible trace of something foreign, extraneous, peculiar, or the like.

Touch often suggests an impression left on someone or something by or as if by contact with another, but in general, it does not hold close to its literal sense and may imply little more than an appreciable trace; as, "In the air was a *touch* of frost" (*Galsworthy*); "He was a very active lad, fair-haired, with a *touch* of the Dane or Norwegian about him" (*D. H. Lawrence*); "heard in Mrs. Hetherington's voice that acid *touch*" (*M. Austin*).

Suggestion implies an outward sign that is just enough to give one a hint or an inkling of the presence or existence of something; as, his voice conveyed a *suggestion* of fear; blue with a mere *suggestion* of green. **Suspicion** and the French word *soupçon* differ little from *suggestion*, but they tend to imply a fainter trace requiring even more delicate powers of perception or evoking even less certainty; as, tea with a *suspicion* (or *soupçon*) of brandy; add but a *soupçon* of red pepper; "Just a *suspicion*... of saturnine or sarcastic humor" (*A. W. Ward*). **Tincture, tinge, and shade** come from the vocabulary of color.

Tincture and **tinge** usually imply an admixture with something that gives the thing affected a faint cast or appearance suggestive of a lightly suffused coloring; as, "All manners take a *tincture* from our own" (*Pope*); there was not a *tincture* of overconfidence in his bearing; "Endowed them with that Cymric *tinge* to their habits" (*Meredith*); "a subjective *tinge* entered into the nineteenth-century description of nature" (*Jeans*); "Imagist poetry... is right in veering away from any *tinge* of archaism in its diction" (*Lowes*). **Shade** implies enough of a trace to suggest the smallest possible degree of something: it usually derives its implications from the meaning of *shade* as a gradation in the darkening of a color; as, "He smiled; in that smile there was a *shade* of patronage" (*Galsworthy*); "I simply couldn't help myself," he said with a *shade* of sulkiness" (*Arch. Marshall*); "I known my Ellen—haughty, intractable; shall I say, just a *shade* unforgiving?" (*E. Wharton*). **Smack and spice** come from the vocabulary of the gustatory sense.

Smack suggests a trace which is pronounced enough or decided enough for one to savor it; as, "the Saxon names of places, with the pleasant, wholesome *smack* of the soil in them" (*Arnold*). Not only *spice*, but also *dash*, suggests a slight admixture or infusion, especially such as gives zest, relish, or pungency; as, "There was a *spice* of obstinacy about Miss Dale" (*Trollope*); "A king of England should have a *spice* of the devil in his composition" (*Smollett*); "Séigné... lover of Montaigne and with a *spice* of his free thought and speech" (*FitzGerald*); "He is a man with a *dash* of genius in him" (*Arnold*); "Godwin... has a *dash* of affectation" (*Lamb*). **Vein** applies to a trace that runs through a person or thing in the manner of a vein (sometimes a blood vessel, sometimes a vein of ore) so that it lies below the substance or character of the thing as a whole and occasionally shows on the surface or crops out; as, "thy humorous *vein*" (*Prior*); "In Swift he discovered an inimitable *vein* of irony" (*Johnson*); "He had always had a *vein* of childish obstinacy" (*M. Wilkins*). **Strain** sometimes denotes an inherited

characteristic or group of characteristics, especially one that contrasts sharply with the rest of one's qualities; as, "the balanced play within me of the Oliver *strain*, Wheatley *strain*, Ellis *strain*, Gray *strain*" (H. Ellis); "a *strain* of eccentricity, amounting in some cases almost to insanity" (L. P. Smith). **Streak**, like *strain*, is applied chiefly to one's character, but it less often implies inheritance and heightens *strain*'s suggestion of unexpectedness; as, when you know him better you will find the yellow *streak* in him; "Sometimes I think [she]... has a common *streak* in her" (Winston Churchill [Amer. novelist]).

Ana. *Trace, vestige: contamination, pollution, defilement, tainting (see corresponding verbs at CONTAMINATE): *impression, impress, imprint, stamp, print.

touching. Affecting, *moving, impressive, poignant, pathetic.

Ana. *Tender, responsive, sympathetic, compassionate: *pitiful, piteous, pitiable.

touchstone. Criterion, *standard, gauge, yardstick.

Ana. Test, proof, trial, demonstration (see under PROVE).

touchy. *Irrascible, choleric, splenetic, testy, techy, cranky, cross.

Ana. *Irritable, fractious, snappish, waspish, peevish: captious, caviling, faultfinding, carping (see CRITICAL).

Ant. Imperturbable.

tough. Tenacious, stout, sturdy, *strong, stalwart.

Ana. Resisting or resistant, withstanding, opposing (see corresponding verbs at OPPOSE): *firm, hard: intractable, refractory, recalcitrant, headstrong (see UNRULY): dogged, pertinacious, *obstinate, stubborn.

Ant. Fragile.

tour, n. *Journey, voyage, trip, cruise, expedition, jaunt, excursion, pilgrimage.

tow, v. Tug, haul, hale, *pull, draw, drag.

tower, v. Mount, ascend, soar, rocket, *rise, arise, levitate, surge.

toxic or toxic. *Poisonous, venomous, virulent, mephitic, pestilent, pestilential, miasmatic, miasmatic, miasmal.

toxin. *Poison, venom, virus, bane.

toy, v. *Trifle, dally, flirt, coquet.

Ana. *Play, sport, disport, frolic: fondle, *caress, pet, cuddle, dandle.

trace, n. Trace, vestige, track, rack come into comparison as meaning a visible or otherwise sensible sign left by something that has passed or has taken place. **Trace** literally applies (sometimes in the plural, sometimes in the singular) to a line as of footprints or a rut made by someone or something that has left marks of its passage; as, to follow the *traces* of a deer through the snow; the clear *trace* of a sleigh; "When the hounds of spring are on winter's *traces*" (Swinburne); "it was the Indian's way to pass through a country...and leave no *trace*" (Cather); "the *trace* Of higher tides along the beach" (Millay). But the term is more often used without reference to a line, to suggest any mark, material or immaterial, that shows something that has happened or has influenced a person or thing; as, the child carefully removed the *traces* of jam from his mouth; "faint *traces* of the Norfolk dialect...still lingered about her speech" (Arch. Marshall); "the stimulation of violent emotions may leave permanent *traces* on the mind" (Inge). **Vestige** (etymologically, a footprint) is now practically obsolete in its earliest sense. In extended use, it is preferred to *trace* when the reference is to something that remains or still exists to give evidence of or testimony to the existence of something in the past: it often therefore applies

to remains, such as a fragment, a remnant, a relic, or other tangible or sensible reminder of what has gone before; as, "Of this ancient custom no *vestige* remained" (Gibbon); "The *vestiges* of some knowledge of Latin still appear...in his sentences" (The Nation). "There is, to be sure, keen zest in retracing the *vestiges* of primitive poetry, and in reconstructing, ex pede Herculem, primitive poetry itself" (Lowes). "But this space between the stars, which I have called a desert of emptiness, is not entirely empty. There are *vestiges* of matter everywhere" (Eddington). **Track** is now used more often than *trace* in the sense of a line of perceptible marks, especially in hunting (when it often means the scent followed by the hounds) and in geology (when it usually means a line of fossilized footprints); as, the hounds are on the *track* of the fox; the *track* of a dinosaur. "He could just discern the marks made by the little feet on the virgin snow, and he followed their *track* to the furze bushes" (G. Eliot). **Rack**, as here considered, owes its sense of a faint trace largely to Shakespeare's use in the passage from *The Tempest* (iv. 1, ll. 152-156): "The cloud-capp'd towers, the gorgeous palaces, The solemn temples, the great globe itself, Yea, all which it inherit, shall dissolve And, like this insubstantial pageant faded, Leave not a *rack* behind." Whether Shakespeare referred to *rack* in the sense of a driving mist, or in the dialectal sense of a track, or in the sense of wreckage (as in *rack* and ruin) has not been definitely established, but the term still occurs in the sense of a faint trace and in a phrase very similar to his; as, not a *rack* was left behind by the primitive race known to have lived in that section of the country.

Ana. *Sign, mark, token.

trace, v. *Sketch, outline, diagram, delineate, draft, plot, blueprint.

Ana. Copy, duplicate, reproduce (see corresponding nouns at REPRODUCTION): map, *chart, graph.

tracing, n. Sketch, outline, diagram, delineation, draft, plot, blueprint. See under SKETCH, v.

Ana. *Reproduction, copy, duplicate: *plan, project, scheme, plot, design.

track, n. *Trace, vestige, rack.

Ana. Print, stamp, imprint (see IMPRESSION): *sign, mark, token.

tract. *Area, region, zone, belt.

Ana. *Expanse, stretch, spread, amplitude: *locality, district, vicinity: section, sector, *part, portion.

tractable. Amenable, biddable, docile, *obedient.

Ana. Pliant, pliable, *plastic: submissive, subdued (see TAME): *compliant, acquiescent.

Ant. Intractable: unruly. — **Con.** Ungovernable, refractory, headstrong, willful (see UNRULY): stubborn, *obstinate.

trade, n. 1 Trade, craft, handicraft, art, profession are here compared as general terms which designate a type of pursuit followed as an occupation or means of livelihood and requiring technical knowledge and skill. Not all pursuits of this description fall under one of these headings, especially pursuits that belong to fields of endeavor such as commerce, mercantile business, agriculture, and the like. **Trade**, as here compared, is applied chiefly to pursuits involving skilled manual or mechanical labor and the management of machinery or tools; as, the *trade* of a carpenter, of a bricklayer, of a blacksmith; he is a plumber, or a tinsmith, or a machinist by *trade*. **Craft** is not always clearly distinguished from *trade*, but it tends to be used of those pursuits that involve not only manual or mechanical labor but allow more or less freedom for the exercise of taste, skill, ingenuity, and the like: many of the crafts were once or are still carried on inde-

pendently, as in the home; thus, weaving, tailoring, shoemaking are often spoken of as *crafts*; the *craft* of a goldsmith, of a potter, of a cabinetmaker. **Handicraft** differs from *craft* chiefly in excluding all implication of machine work; it not only implies handwork but usually suggests dexterity in manipulation of instruments or of materials; thus, basketmaking, embroidery, lacemaking, bookbinding, and the like, are *handicrafts* when machinery is not employed. **Art** is the least definitely or consistently used of these words; it is found in such phrases as the manual *arts*; the industrial *arts*; the mechanic *arts*; the household *arts*; the decorative *arts*; the fine *arts*; *arts* and crafts; the practical *arts*, in which it refers sometimes to pursuits (as, workers employed in the industrial *arts*), sometimes to fields of endeavor (as, a school of practical *arts*), and sometimes to the things that are produced by art in any one of the senses considered at ART, 1 (as, an *arts* and crafts exhibition). As a term denoting a pursuit, *art*, when unqualified, usually designates painting (as, his energies are devoted to *art*), but it sometimes is more comprehensive, including sculpture, etching, illustration, and the like. When qualified, *art* is applied usually only to such pursuits as involve an elaborate technique, great skill, definite ends to be achieved, and the exercise of personal judgment or taste; it is often difficult, however, apart from the context, to determine whether the word denotes a pursuit or a technique; as, the *art* of navigation; the *art* of interior decorating; "dancing as an *art*, a profession, an amusement" (*H. Ellis*); "proficient in the *art* of self-defence" (*Shaw*); "literature is an *art* and therefore not to be pondered only, but practiced" (*Quiller-Couch*). **Profession** is, in general, applied only to a pursuit that requires years of study and training before one is ready to follow it as a means of livelihood; the term also often implies that one has undergone certain tests of one's fitness and has won a degree or has given proof of one's qualifications and has been licensed to practice; it often also implies devotion to a higher end than that of personal profit or the earning of a livelihood; as, the *professions* of law, medicine, architecture, and teaching; a clergyman, a nurse, a civil engineer, a dentist by *profession*.

Ana. *Work, employment, occupation, pursuit, métier: job, *position, place, situation.

2 *Business, traffic.

Ana. Selling, bartering, vending (see **SELL**): buying, purchasing (see **BUY**): exchanging or exchange, interchanging or interchange (see corresponding verbs at **EXCHANGE**).

3 Commerce, *business, industry.

trade, v. Barter, *sell, vend, auction.

Ana. *Exchange, interchange, swap, bandy.

traditional. **Traditional, legendary** are often used as though they both implied a lack of historical foundation. Basically, however, **traditional** does not necessarily imply a lack of authenticity, for it stresses the point that the thing so described has been handed down from generation to generation chiefly by word of mouth, without support of original documents or primary sources; as, *traditional* (i.e., unwritten) history; the *traditional* successors of Peter as bishop of Rome; "the unspoiled *traditional* ballad" (*F. J. Child*); "[Augustus's] preservation throughout the provinces of *traditional* worship" (*Buchan*). But since this method of survival usually implies an absence of documentary support, the term now often implies historical uncertainty or even unreliability; as, the *traditional* birthplace of a great poet; "the *traditional* region of the forty days temptation" (*S. C. Bartlett*); "the *traditional* luck of fools for once protected the wise man" (*Karl K. Darrow*). **Legendary** (for further

treatment, see **FICTITIOUS**) etymologically implies reference to a story (a legend) that has been written so that one may read (*L. legere*, to read) it by himself or to others. Since legends were written largely for edification or entertainment, or both, and often dealt with reputed miracles of saints or fabulous exploits of heroes, the authentic character of the incidents was not a matter of concern when legends were a popular form of literature. Consequently, the term has acquired connotations of fabulousness and of mythical basis; as, "Is it [*Beowulf*] entirely mythical and *legendary*, or is there any actual history contained in it?" (*S. Brooke*).

traduce. *Malign, asperse, vilify, calumniate, defame, slander, libel.

Ana. *Decry, detract from, derogate from, depreciate, disparage: revile, vituperate (see **SCOLD, v.**).

traffic, n. **1** *Business, commerce, trade, industry.

Ana. Transportation, conveyance, carrying (see corresponding verbs at **CARRY**).

2 *Business, trade.

Ana. Selling, vending, bartering, trading (see **SELL**): buying, purchasing (see **BUY**).

3 *Intercourse, commerce, dealings, communication, communion, commune, conversation, converse, correspondence.

Ana. Familiarity, intimacy, closeness (see corresponding adjectives at **FAMILIAR**).

trail, v. *Follow, pursue, chase, tag, tail.

train, n. *Succession, progression, series, sequence, set, suit, suite, chain, string.

train, v. **1** *Teach, discipline, school, instruct, educate.

Ana. *Practice, exercise, drill: *habituate, accustom, familiarize: *harden, inure, season.

2 Aim, *direct, point, level, lay.

Ana. *Turn, divert, deflect.

traipse. *Wander, stray, roam, ramble, rove, range, prowl, gad, gallivant, meander.

traitorous. Treacherous, perfidious, *faithless, false, disloyal.

Ana. Recreant, renegade, apostate (see corresponding nouns at **RENEGADE**): seditious, mutinous, rebellious (see **INSUBORDINATE**): disaffected, estranged, alienated (see **ESTRANGE**).

trammel. *Hamper, fetter, shackle, clog, manacle, hog-tie.

Ana. *Hinder, impede, obstruct, block, bar: *restrain, curb, check, inhibit: *limit, restrict, circumscribe, confine.

tramp, trumper. *Vagabond, vagrant, hobo, truant, bum, stiff, swagman, sundowner.

tranquil. Serene, placid, *calm, peaceful, halcyon.

Ana. Quiet, *still, silent, noiseless: *soft, gentle, mild: restful, reposeful, *comfortable: *cool, composed, collected.

Ant. Troubled.

transcend. Surpass, *exceed, excel, outdo, outstrip.

Ana. Surmount, overcome (see **CONQUER**).

transcendent. **1** Surpassing, superlative, *supreme, peerless, pre-eminent, incomparable, banner.

Ana. *Consume, finished, accomplished: *perfect, entire, whole, intact.

2 Transcendental, ideal, *abstract.

Ana. Absolute, *ultimate, categorical: *infinite, boundless, eternal.

transcendental. Transcendent, ideal, *abstract.

Ana. *Supernatural, supranatural: categorical, *ultimate.

transcript. Copy, carbon copy, duplicate, *reproduction, facsimile, replica.

transfer, *v.* 1 *Move, remove, shift.

Ana. *Carry, convey, transport, transmit: *commit, consign.

2 Transfer, convey, alienate, alien, deed are here compared chiefly as legal terms meaning to make over property from one owner to another. **Transfer** is the general term; it is applicable when the property is real or personal, and when it is passed from one owner to another by sale, gift, foreclosure, or the like. **Convey** stresses the legalistic aspects of the transfer; it is the precise term when a sealed writing, or deed, plays an essential part in the transfer. It is therefore used chiefly of the transfer of real property and of ships. **Alienate** and the less used **alien** are not always clearly distinguished from **transfer** or **convey**; in strict legal use, however, they imply the passing of a title by the act of the owner as distinguished from its passing by the operation of the law, as in the case of inheritance by descent; thus, entailed property cannot be **alienated**. **Alienate**, however, may be used when the sale of property is not voluntary but is ordered or enforced by a court, as in foreclosure or in condemnation proceedings. In nonlegal use, **alienate** often implies diversion as by force, or by a sovereign power, an imperative need, or the like. "He pleaded for the resumption by clerics of Church revenues **alienated** into lay hands" (*Belloc*). **Deed** is a popular rather than a legal term, but it is equivalent to **convey**.

transfiguration. Transformation, metamorphosis, transmutation, conversion, transmogrification. See under **TRANSFORM**.

Ana. Exaltation, magnification (see corresponding verbs at **EXALT**): enhancing, heightening, intensifying (see **INTENSIFY**).

transfigure. *Transform, metamorphose, transmute, convert, transmogrify.

Ana. *Exalt, magnify: heighten, enhance, *intensify.

transform. Transform, metamorphose, transmute, convert, transmogrify, transfigure agree in meaning to turn or change one thing into another or different thing. In general, the same differences in implications and connotations are observable in the corresponding nouns **transformation, metamorphosis, transmutation, conversion, transmogrification, transfiguration** (or, rarely, **transfigurement**). **Transform** etymologically implies a change in outward form or shape but in its extended use often implies (additionally or singly) a change in character, in nature, in function, or the like; as, to **transform** electrical energy into light or heat; "To Samarcand ... we owe the art of **transforming** linen into paper" (*Newman*); "The placid sunshine ... seems to have been **transformed** in a moment into imperious angry fire" (*Paier*); "the task of **transforming** a heterogeneous selection of mankind into a homogeneous nation" (*B. Russell*). "Every phenomenon of nature, night and 'rosy-fingered' dawn, earth and sun, winds, rivers, and seas, sleep and death—all have been **transformed** [by ancient Greek religion] into Divine and conscious agents" (*G. I. Dickinson*). **Metamorphose** is etymologically akin in meaning to **transform**. Actually, however, it carries implications not often present in **transform** such as that of a supernaturally or magically induced change (as, "**metamorphosed** from seemingly shape to birds and ugly beasts"—*Gascoigne*; men **metamorphosed** by Circe into swine), or of a change in structure and habits that marks a stage of the development of some forms of animal life (as, the caterpillar is a larva which is finally **metamorphosed** into a butterfly or moth), or of a transformation induced by chemical or other natural agencies (as, rocks **metamorphosed** by heat). In general use, the term carries a much stronger implication than **transform** of an abrupt,

startling, or violent change; as, "this kind of passive, plastic nature, where the whole man is **metamorphosed** into an impersonal poetic instrument, is, I believe, rare" (*Day Lewis*); "the friendliness she had formerly evidenced to the United States had been **metamorphosed** into hostility" (*V. Heiser*). "The nerves may be compared to a number of telephone wires transmitting electric currents into a prison-cell, which suitable instruments subsequently **metamorphose** into messages of sound, television, etc." (*Jeans*). **Transmute**, originally not clearly distinguishable from **transform**, was early affected by its use in alchemy in the sense of to turn a base metal (such as lead) into a precious metal (such as gold). Consequently, the term usually suggests an elemental change, especially one involving a metamorphosis of a lower element or thing into a higher one. "If there was an element in her which religion could not perfectly reach, perfectly **transmute**, she groaned over this element in her, she chid it, she made it bow" (*Arnold*). "A simple romantic narrative **transmuted** by sheer glow or beauty into a prose poem" (*Galsworthy*). "Shakespeare, too, was occupied with the struggle—which alone constitutes life for a poet—to **transmute** his personal and private agonies into something rich and strange, something universal and impersonal" (*T. S. Eliot*). "Once people had tasted of Mrs. Struthers's easy Sunday hospitality they were not likely to sit at home remembering that her champagne was **transmuted** Shoe-Polish" (*E. Wharton*). **Convert** carries a slighter suggestion of change in kind, nature, or structure than the preceding terms, but a stronger one of a change in details which fit it for a given use or function or for a new use or function, or in properties or the like; as, to **convert** a passenger liner into an auxiliary cruiser; to **convert** iron into steel; nature **converts** the fallen trunks of trees into coal; "Having conducted their lame guest to a room in the Georgian corridor hastily **converted** to a bedroom" (*Galsworthy*); "any error of judgment upon his part might have **converted** his profit into a loss" (*J. A. Hobson*); "that a new seam of richest material has been opened up and that poets are learning how to **convert** that raw material to their own uses" (*Day Lewis*). **Transmogrify** implies a thoroughgoing metamorphosis; often, a grotesque, bewildering, or sometimes, preposterous one: the term is often used humorously but is increasingly employed without intent to amuse; as, "See Social life and Glee sit down, All joyous and unthinking, Till, quite **transmugrify'd**, they're grown Debauchery and Drinking" (*Burns*). "Shakespeare was a much finer instrument for transformations than any of his contemporaries. . . . The element of Seneca is the most completely absorbed and **transmogrified**, because it was already the most diffused throughout Shakespeare's world" (*T. S. Eliot*). "The classical heroes and heroines were **transmogrified** into mediaeval knights and ladies" (*Lowes*). **Transfigure**, which is strongly influenced by Biblical usage, suggests an exaltation or glorification of the outward appearance; as, "Jesus . . . was **transfigured** before them: and his face did shine as the sun" (*Matthew* xvii. 1-2); "If she be guilty, 'twill **transform** her To manifest deformity. . . If innocent, she will become **transfigured** Into an angel" (*Shelley*).

Ana. *Change, alter, modify, vary.

transformation. Metamorphosis, transmutation, conversion, transmogrification, transfiguration. See under **TRANSFORM**.

Ana. Change, alteration, modification, variation (see under **CHANGE**, *v.*): evolution, *development.

transgression. Trespass, violation, infraction, *breach, infringement, contravention.

Ana. Encroachment, invasion, entrenchment (see **cor-**

responding verbs at TRESPASS): slip, lapse, *error: *offense, sin, vice, crime.

transient, *adj.* Transient, transitory, passing, ephemeral, momentary, fugitive, fleeting, evanescent, short-lived come into comparison as meaning lasting or staying only for a short time. *Transient* and *transitory* are often used as if they were interchangeable; but *transient* more frequently applies to that which is actually short in its duration or stay (as, the summer hotel does not take *transient* guests; "*transient* sorrows"—Wordsworth; "With one of these friends he had fallen in love,—a slight and *transient* fancy, but which had already called his poetical powers into exercise"—Arnold), and *transitory*, like its close synonym *passing*, to that which is by its nature or essence bound to pass or come to an end, sometimes soon, sometimes inevitably (as, "this *transitory* life"—Bk. of Com. Prayer; "Wise men will apply their remedies to... the causes of evil which are permanent, not to... the *transitory* modes in which they appear"—Burke; a *passing* fancy; "The confounding of the *Passing* with the Permanent"—A. Austin). **Ephemeral** etymologically implies existence for a day: in this strict sense it is applied to certain living things; as, *ephemeral* insects; *ephemeral* flowers. In extended use, it implies marked shortness of life or duration, as of influence or appeal; as, many slang expressions are of their very nature *ephemeral*; "the swarm of *ephemeral* sermons which issue from the press" (Sydney Smith); "*ephemeral* successes" (J. R. Lowell). **Momentary** literally implies the duration of a moment or of an almost incredibly short time; as, "a *momentary* bliss" (Gray); "a *momentary* irritation" (Hardy). **Fugitive** and **fleeting** apply to that which passes swiftly, and is gone; but *fugitive* carries a stronger implication of a momentary catching or fixing (as, "Oh joy!... That nature yet remembers What was so *fugitive*!"—Wordsworth; "All the forms are *fugitive*, but the substances survive"—Emerson) and *fleeting*, of the impossibility of holding back or restraining from flight (as, "not merely some *fleeting* fancy of the day, but a constant longing"—J. R. Lowell; "[It] clothes our *fleeting* days with an eternal beauty"—B. F. Westcott). **Evanescent** implies momentariness, but it stresses quick and complete vanishing, and it usually connotes an extremely delicate, fragile, or intangible quality; as, "*evanescent* visitations of thought and feeling... arising unforeseen and departing unbidden" (Shelley); "All was unstable; quivering as leaves, *evanescent* as lightning" (Hardy); "It is poetry of the most *evanescent* type, so tenuous in thought and feeling that only the most exquisite diction can justify its perpetuation in cold print" (Grandgent). **Short-lived** implies extreme brevity of life or existence; as, *short-lived* fame; their satisfaction was *short-lived*; a *short-lived* plant; a *short-lived* controversy.

Ant. Perpetual. — **Con.** *Lasting, permanent, perdurable, stable, durable.

transitory. *Transient, passing, ephemeral, momentary, fugitive, fleeting, evanescent, short-lived.

Ant. Everlasting: perpetual.

translation. Translation, version, paraphrase, metaphor, construe are here compared only as denoting a rendering in intelligible language the meaning or sense of a passage or work, or the passage or work that is the product of such a rendering. Translation implies a turning from one language into another, or in its extended use, from one medium, or form of expression, into another; as, English translations of the Bible; a literal translation of the Odyssey is likely to lose the charm of the original; a free translation that catches the spirit of the original; "[Great writers'] music is the audible translation of emotion" (H. Ellis). **Version**, as here compared

(see also ACCOUNT, 3), may be used in place of translation (as, "The year 1632 saw a complete version of the Aeneid by Vicars"—J. Conington), but it is much more often used to denote one of the translations of a given work, especially (if without further identification) of the Bible; as, the Authorized, or King James, Version; the Douay Version is used by English-speaking Roman Catholics; to compare the Butcher-Lang and the George Herbert Palmer versions of the Odyssey. **Paraphrase** may apply to a very free translation, the purpose of which is to present clearly the meaning rather than the phrasing of a passage or work (as, "a translation must be a paraphrase to be readable"—FitzGerald); it also may apply to an imitation with enough changes to obscure its indebtedness to an original in another tongue (as, "[Latin] plays which were not paraphrases from the Greek"—Buchan); commonly, however, the term denotes a free, amplified, and often, interpretative rendering of the sense of a difficult passage in the same language (as, to write a paraphrase of Milton's Lycidas; paraphrases of the Psalms in the Authorized Version). **Metaphrase** is occasionally used by learned writers to denote a translation that is almost slavishly faithful to the original (what is now often called a literal translation) to distinguish it from a paraphrase, or free translation; as, "The way I have taken [in a translation of the Aeneid] is not so straight as metaphrase, nor so loose as paraphrase" (Dryden). **Construe** is chiefly an academic term for an exercise in translation which emphasizes close adherence to the grammatical construction of the original and its word-for-word arrangement.

translucent. Lucid, pellucid, diaphanous, limpid, *clear, transparent.

Ana. Luminous, radiant, brilliant, effulgent, *bright: iridescent, opalescent, *prismatic.

transmit. *Carry, bear, convey, transport.

Ana. *Move, remove, shift, transfer: *communicate, impart: propagate, breed, engender, *generate.

transmogrification. Transformation, metamorphosis, transmutation, conversion, transfiguration. See under TRANSFORM.

transmogrify. *Transform, metamorphose, transmute, convert, transfigure.

transmutation. Transformation, metamorphosis, conversion, transmogrification, transfiguration. See under TRANSFORM.

transmute. *Transform, metamorphose, convert, transmogrify, transfigure.

transparent. *Clear, lucid, pellucid, diaphanous, translucent, limpid.

Ant. Opaque. — **Con.** *Turbid, muddy, roiled, roily.

transpire. *Happen, hap, occur, chance, befall, betide.

transport, *v.* 1 *Carry, bear, convey, transmit.

Ana. *Move, remove, shift, transfer: *bring, fetch, take.

2 Deport, *banish, exile, expatriate, ostracize, extradite.

Ana. Expel, *eject, oust.

transport, *n.* *Ecstasy, rapture.

Ana. Enthusiasm, *passion, fervor, ardor: *inspiration, fury, frenzy: bliss, beatitude, blessedness, felicity, *happiness.

transpose. *Reverse, invert.

Ana. *Exchange, interchange, swap: transfer, shift (see MOVE).

trap, *n.* *Lure, bait, decoy, snare.

Ana. Stratagem, ruse, *trick, maneuver, artifice, wile, feint: *ambush, ambushade: intrigue, machination, *plot, conspiracy.

trap, *v.* Entrap, snare, ensnare, bag, *catch, capture, nab, cop.

Ana. Seize, *take, clutch, grasp: betray, beguile, delude (see DECEIVE).

travail. 1 Labor, *work, swink, toil, drudgery, grind.

Ana. *Effort, exertion, pains, trouble.

2 Labor, *childbirth, parturition, delivery, accouchement.

traverse. *Deny, gainsay, contradict, negative, impugn, contravene.

Ana. Controvert, confute, refute, *disprove, rebut.

Ant. Allege.

travesty, n. *Caricature, parody, burlesque.

travesty, v. Caricature, parody, burlesque. See under CARICATURE, *n.*

Ana. *Copy, mimic, ape, mock, imitate.

treacherous. Perfidious, traitorous, *faithless, false, disloyal.

Ana. Betraying, deceiving, misleading, double-crossing (see DECEIVE): recreant, dastardly (see COWARDLY): seditious, mutinous, rebellious (see INSUBORDINATE): *dangerous, perilous, jeopardous.

treason. *Sedition.

Ana. Revolution, revolt, *rebellion, uprising, insurrection: betrayal, deceiving or deception, double-crossing (see corresponding verbs at DECEIVE): overthrowing or overthrow, subverting or subversion (see corresponding verbs at OVERTURN).

Ant. Allegiance (sense 2).

treasure, v. Prize, value, *appreciate, cherish.

Ana. Esteem, respect, regard, admire (see under REGARD, *n.*): *revere, reverence, venerate: *save, preserve, conserve.

treasury. 1 Thesaurus, *museum, library, gallery, archives.

2 *Anthology, garland, *florilegium, thesaurus, corpus, chrestomathy, chapbook.

treat, v. Parley, negotiate, *confer, commune, consult, advise.

Ana. *Discuss, dispute, argue, debate: *consider, weigh, revolve, study: *think, reason, deliberate.

treaty. *Contract, bargain, compact, pact, entente, convention, cartel, covenant, concordat, indenture, mise.

tremble. *Shake, quake, quiver, shiver, shudder, quaver, totter, wobble, teeter, shimmy, didder, dither.

Ana. *Thrill, electrify: falter, waver (see HESITATE): quail, shrink, wince (see RECOIL).

tremendous. Stupendous, monumental, prodigious, *monstrous.

Ana. *Enormous, immense, huge, vast, gigantic, colossal: astounding, amazing, flabbergasting (see SURPRISE): terrifying, alarming, startling, frightening (see FRIGHTEN).

trench, v. Entrench, encroach, invade, *trespass, infringe.

Ana. See those at ENTRENCH.

trenchant. *Incisive, clear-cut, cutting, biting, crisp.

Ana. Piercing, penetrating, probing (see ENTER): *sharp, keen, acute: *sarcastic, satirical, ironical, sardonic: *caustic, mordant, acrid, scathing: poignant, *pungent, piquant.

trend. *Tendency, drift, tenor, current.

Ana. Movement, *motion, move: inclination, disposition, predisposition (see corresponding verbs at INCLINE): progression, *progress.

trepidation. Horror, terror, panic, consternation, *fear, dread, fright, alarm, dismay.

Ana. Apprehensiveness, fearfulness (see corresponding adjectives at FEARFUL): anxiety, worry, concern, solicitude, *care: awe, *reverence, fear.

trespass, v. Trespass, encroach, trench, entrench (or intrinch), infringe, invade are not close synonyms, for

some are intransitive and usually require a preposition such as *on* or *upon*, whereas the others may be used both transitively and intransitively. Nevertheless they come into comparison because they all mean to make inroads upon the property, territory, or rights of another. **Trespass**, which is now almost always an intransitive verb, implies an intrusion, often one that is either an unwarranted and unpardonable or an unlawful and offensive intrusion: it is usually, but not necessarily, followed by *on* or *upon*; as, to warn hunters against *trespassing* on his land; "shall probably *trespass* on your hospitality till the Saturday se'nnight following" (*Austen*); "what is the difference between the legitimate music of verse and the music it attains by *trespassing* on the domain of a sister art?" (*Babbitt*); "It is essential that...an artist should consciously or unconsciously draw a circle beyond which he does not *trespass*" (*T. S. Eliot*). **Encroach** usually implies gradual or stealthy entrance upon another's territory or assumption of another's rights or possessions: the term may imply either the act of persons or the agency of things which by their nature cannot remain within bounds; as, "Impertinence...ever *encroaches* when it is tolerated" (*Burney*); "an ancient manor, deserted as the sea *encroached*" (*Pater*); "There were clumps of perennials in the borders, upon which each year the grass *encroached* more and more" (*Deland*); "The motive of simplicity is to prevent frivolities of fashion from *encroaching* upon our time" (*Inge*); "By excessive demands upon certain incomes or forms of property, a State may injuriously *encroach* upon the true costs of pecuniary incentives necessary to make capital, ability, or labour function with full efficiency" (*J. A. Hobson*). The once more common **trench** and the currently more commonly **entrench** throw less emphasis upon unlawful intrusion and more upon cutting into or digging one's way into what belongs to another, or should be used in another way, or is outside one's sphere, than do the preceding words; as, demands that *entrench* too much upon one's time; questions *trenching* on rudeness; "it does not appear that he *entrenched* upon his own or his mother's private fortune; from now onwards he never seems to have suffered from financial embarrassment" (*Buchan*). **Infringe** implies an encroachment that is a clear breach of the law or violation of the rights of another: the term is used both transitively and intransitively; as, to *infringe* a patent or a copyright; "He was *infringing* upon the liberties of a man who had never done him any injury" (*Edgeworth*); "the physicians whose exclusive distinction seemed *infringed* on" (*G. Eliot*); the statute proposed would *infringe* fundamental principles as they have been understood by the traditions of our people and our law" (*Justice Holmes*). **Invade**, which is more often a transitive than an intransitive verb, implies a definite entrance into the territory or rights of another, usually (but not now always) with hostile intent and with injurious effect; as, to *invade* the enemy's country; the gangrene has *invaded* healthy tissues; "where there is a legal right, there is also a legal remedy by suit, or action at law, whenever that right is *invaded*" (*Blackstone*); a crowd of tourists *invade* the town each week end.

Ana. *Intrude, obtrude, interlope, butt in: interfere, intervene, *interpose.

trespass, n. Transgression, violation, infraction, *breach, infringement, contravention.

Ana. Invading or invasion, entrenchment, encroachment (see corresponding verbs at TRESPASS): intrusion, obtrusion (see corresponding verbs at INTRUDE): *offense, sin, vice, crime.

trial. 1 Test, proof, demonstration. See under PROVE.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. Experiment, *experience: inspection, examination, scanning, scrutiny (see under SCRUTINIZE): *process, proceeding, procedure.

2 Trial, tribulation, affliction, visitation, cross are comparable only when they denote suffering, misery, or unhappiness regarded as an infliction which cannot be escaped or avoided. **Trial** implies a test of one's patience, self-control, courage, or of one's power to resist temptation. The word is applicable not only to distressing situations or conditions but to persons or things that cause distress or annoyance; as, the *trials* of the colonists are recorded in history; a life free from *trials*, small or great; characters purified and strengthened by *trial*; he has always been a *trial* to his parents. **Tribulation** heightens the emphasis on the suffering or anguish involved in *trial*; even more often than the latter it connotes divinely permitted suffering as a test of virtue. "The just shall... after all their *tribulations* long. See golden days" (*Milton*). **Affliction** stresses the implication of imposed suffering that challenges one's powers of endurance; it may, but more often does not, suggest a relation between one's suffering and one's deserts. "If severe *afflictions* borne With patience merit the reward of peace, Peace ye deserve" (*Wordsworth*). **Visitation** bears to *affliction* the same relation as *tribulation* to *trial*; the former heightens the implications of the latter by stressing the severity of suffering and by suggesting an ordeal; distinctively, however, it often connotes retribution or retributive justice; as, many people regarded the disastrous flood as a *visitation*. "Woe unto them! for their day is come, the time of their *visitation*" (*Jeremiah* 1, 27). **Cross** in its applications closely parallels *trial* and *tribulation*, but it differs from them in its implications of suffering accepted and borne for the sake of a larger good rather than as a test of character. "Leaving her... solemnly elate at the recognition of the *cross* on which she must agonize for the happiness of some other soul" (*Deland*). The word often directly alludes to the words of Jesus to the rich young man: "Come, take up the *cross*, and follow me" (*Mark* x, 21), or to his own carrying of the cross up the Mount of Calvary.

Ana. *Distress, suffering, misery, agony: *sorrow, grief, anguish, woe: *misfortune, adversity: *difficulty, hardship, vicissitude, rigor.

tribe, n. **Tribe, sib, clan, horde, sept** are here compared both in their general and technical senses as denoting a division of a race or people having a more or less primitive form of government. **Tribe** in its most common sense applies to an aggregate of persons believed to be or believing themselves to be of a common stock and governed more or less strictly by a chief, chieftain, or headman; often, but not invariably, the term suggests a nomadic life or a barbarous rather than a savage or civilized state. Originally, however, *tribe* was applied to one of the definite divisions of a people, such as the twelve *tribes* of Israel, each of which was believed to have been descended from one of the twelve sons of Jacob, or as the divisions of the ancient Romans varying from three to thirty-five in number at different times in the history of ancient Rome. In anthropology *tribe* usually denotes a social group that has been, by tradition, brought together because of their common ancestry, that is united under a chief or headman, and that marries only within the group. In theory, such a group comprises several smaller divisions, each one technically and specifically called a *sib*, or group consisting of all the people who trace their descent unilaterally (i.e., in the male line, or in the female line, only) from a real or supposed ancestor. Both the tribe as a whole and each of the sibs may have a distinct and characteristic form of worship. **Clan** was

originally and still is most commonly applied to any of several groups comparable to a tribe in organization or to a sib in its membership, found in the Highlands, and to some extent in the Lowlands, of Scotland. Strictly, a *clan* consists of several families with the same surname that claim descent from a common ancestor, but it may include bondsmen, adopted foreigners, and members of families or subclans bearing different surnames. The head of the clan and the clan itself were usually designated by the surname; as, "the MacGregor" (i.e., the chief) of the MacGregors or of the *clan* MacGregor: cf. "MacGregor of that ilk" (see *ilk*, under TYPE). In sociology and anthropology a clan is closely related to a sib, in that a common name is characteristic, descent is traced in the male or in the female line only, and inbreeding by marriage is not demanded; also, a *clan*, in this sense, designates a division of a tribe, having its own political, religious, and social character and traditions. **Horde** (see also CROWD) suggests even less advance in civilization than *tribe* and, often, a looser organization. It was originally and is still often applied to one of the groups of nomads from Tatar or other parts of Asia that lived an unsettled life moving as a group from one place to another in search of pasturage for their flocks or for purposes of war or plunder; as, the "Golden Horde" of Mongol Tatars that overran eastern Europe in the thirteenth century. In sociology and anthropology, the term denotes one of the social groups comparable to a sib or clan that existed before the organization of tribes. **Sept** applies to the Irish equivalent of a clan in ancient and medieval times when Ireland was divided into small states or tribes, each governed by a king. Under their own lords or chiefs, the septs lived a community life, owned territory, and gave allegiance to the tribal king. **tribulation.** *Trial, affliction, visitation, cross.

Ana. Oppression, persecution, wronging or wrong (see corresponding verbs at WRONG): *sorrow, grief, anguish, woe: *distress, suffering, misery, agony.

Ant. Consolation.

tributary, adj. *Subordinate, secondary, dependent, subject, succursal, collateral.

Ana. Conquered, vanquished, subjugated, subdued (see CONQUER): *auxiliary, subsidiary, ancillary, adjuvant, contributory.

tribute, n. 1 *Tax, levy, assessment, rate, excise, impost, customs, duty, toll, tariff, tithe, teind, cess.

2 *Encomium, eulogy, panegyric, citation.

trice, n. *Instant, moment, minute, second, flash, jiffy, twinkling, twinkle, split second.

trick, n. **Trick, ruse, stratagem, maneuver (or manoeuvre), artifice, wile, feint** agree in meaning an act or an expedient whereby one seeks to gain one's ends by indirection and ingenuity and, often, by cunning. **Trick** originally, and still frequently, implies cheating or deceiving and often, base ends. "When love begins to sicken and decay, It useth an enforced ceremony. There are no *tricks* in plain and simple faith" (*Shak.*). "She could not be entirely sure that... he was not after all merely using a *trick* to get rid of her" (*Bennett*). The word may, however, imply nothing more than roguishness or playfulness and be used to designate an antic, a prank, a practical joke, or a harmless hoax; as, the brothers were fond of playing *tricks* on their sisters; the *tricks* of the clowns in a circus. It may also be applied to any dexterous device or contrivance (not necessarily fraudulent) that pleases, persuades, deludes, or evokes surprise or wonder; as, an auctioneer who knows all the *tricks* of his trade; illusion in the theater is often accomplished by *tricks* of lighting. "That idle *trick* of making words jingle which men of Nuffo's class in my country so greatly

admire" (*Hudson*). **Ruse** always implies an attempt to give a false impression, as by diverting others' attention from one's real purposes or by making what is untrue seem true. "That story to her mother about having been attacked by ruffians... had been an invention, a *ruse* to account plausibly for his presence on her mother's doorstep!" (*Bennett*). "A favorite *ruse* of the opium smugglers was to insert a hypodermic needle into an egg, withdraw carefully all the albumen and then refill the cavity with opium... the hole was expertly sealed" (*V. Heiser*). **Stratagem** etymologically implies generalship [Greek *stratēgos*, a general]; though commonly applied to a ruse by which an advantage is gained over an enemy as by outwitting or surprising him, it is not restricted to military operations; in extended use, it usually implies a clear objective such as entrapping or circumventing and a more or less elaborate plan for achieving one's end. "A prudent chief not always must display His pow'rs.... But with th' occasion and the place comply. Conceal his force, nay seem sometimes to fly. Those oft are *stratagems* which error seem" (*Pope*). "Some women... are driven to every possible *trick* and *stratagem* to entrap some man into marriage" (*Shaw*). **Maneuver** is also a military term, but it usually suggests tactics or handling and moving of troops or ships for the accomplishment of definite ends (as, peacetime *maneuvers*, or exercises), rather than strategy, the employment of military or naval forces in such a way as to get an advantage over the enemy. In extended use, it commonly implies adroit or dexterous manipulation of persons or things for one's own ends. "The Longbourn party were the last of all the company to depart, and, by a *manoeuvre* of Mrs. Bennet, had to wait for their carriage a quarter of an hour after everybody else was gone" (*Austen*). It may, however, be applied to a single strategic move comparable to one in a game of chess. "Unless indeed, all her talk of flight had been a blind, and her departure no more than a *manoeuvre*" (*E. Wharton*). **Artifice** suggests the employment of invented, manufactured, or mechanical devices or contrivances; it usually connotes ingenuity, but it may or may not connote an intent to deceive or overreach. "The memory of such men [the old bards] must have needed every *artifice* to help it; and the chief *artifice* to their hand was one which also delighted the ears of their listeners. They sang or intoned to the harp" (*Quiller-Couch*). "The *artifices* by which friends endeavor to spare one another's feelings are pretty disloyalties" (*Shaw*). **Wile** usually suggests sorcery, or an attempt to entrap or ensnare by allurements or by false and deceptive appearances. In earliest use, it always connoted slyness and imposture; now it often suggests coquetry or an attempt to charm. "Put on the whole armour of God, that ye may be able to stand against the *wiles* of the devil" (*Ephesians* vi. 11). "He was no longer a mild old man to be worked on by the *wiles* of engaging youth, but a stern-spoken person in high authority" (*Arch. Marshall*). **Feint** literally applies to a fencer's thrust, a boxer's blow, or the like, seemingly directed at one part of the opponent's body, but actually designed to divert his attention and his guards away from the part at which it is really aimed. In extended use, the term commonly implies the employment of a stratagem or maneuver which distracts attention from one's real end thereby leaving another person or other persons unaware of one's actual intention until it is accomplished; as, "I love to think The leaving us was just a *feint*" (*Browning*); his withdrawal from candidacy was actually a *feint* intended to accentuate the demand for his nomination; the regiment's movement toward A— was a *feint* that caused the removal of a large part of the

enemy's forces from B— where the successful attack was launched.

Ana. *Imposture, deceit, deception, counterfeit, humbug, fake, cheat, fraud; *fun, jest, sport, game, play. **trick**, *v.* Gull, befool, hoax, *dupe, hoodwink, bamboozle.

Ana. *Deceive, delude, beguile, mislead: outwit, circumvent (see **FRUSTRATE**): cajole, wheedle, blandish, *coax.

trickery. *Deception, double-dealing, chicanery, chicanes, subterfuge, fraud.

Ana. *Deceit, dissimulation, guile, cunning, duplicity: *imposture, cheat, fraud, sham, fake, humbug, counterfeit.

tricky. Crafty, foxy, cunning, *sly, wily, artful.

Ana. *Crooked, devious, oblique: deceptive, delusive, *misleading, delusory: deceitful, *dishonest.

tried. *Reliable, dependable, trustworthy, trusty.

Ana. Stanch, steadfast, constant, *faithful: proved, demonstrated, tested (see **PROVE**).

trifle, *v.* **Trifle**, **toy**, **dally**, **flirt**, **coquet** come into comparison as meaning to deal with a person or thing without seriousness, earnestness, close attention, or purpose. **Trifle** is the most comprehensive term of the group, for it may be used interchangeably with any of the others, implying any of several attitudes such as playfulness, unconcern, indulgent contempt, light amorousness, or the like; as, "To *trifle* agreeably is a secret which schools cannot impart" (*Johnson*); "o'er cold coffee *trifle* with the spoon" (*Pope*); "I must go instantly to my mother," she cried; "I would not on any account *trifle* with her affectionate solicitude" (*Austen*); "You see what's to be done, and you hear what I say, and you know I'm not going to be *trifled* with any longer" (*Hardy*); "she began to *trifle* with plans of retirement, of playing in Paris, of taking a theatre in London, and other whims" (*Shaw*); "Niel sat writing in the back office, at the long table where he usually worked or *trifled*" (*Cather*). **Toy** implies a dealing with a person or thing in a way that keeps one pleasantly occupied but does not engage one's full attention or evoke any serious intention; as, to *toy* with a young girl's affections; when his mind is concentrated on a problem, his fingers *toy* with his watch chain; he was not hungry and only *toyed* with his food; "There is evidence that Augustus, like Julius, *toyed* with the idea of giving the Assemblies greater power and making them representative of the whole body of citizens in Italy" (*Buchan*). **Dally** (see also **DELAY**, 2) stresses indulgence in thoughts, plans, or the like, as a pastime or amusement rather than as leading to something definite or serious; as, "For so, to interpose a little ease. Let our frail thoughts *dally* with false surmise" (*Milton*); "I *dally* with my subject because, to myself, the remembrance of these times is profoundly interesting" (*De Quincey*); "Why should my Soul so rejoice in the crimes placarded by the evening papers, and never weary, in the streets of this cathedral city, of *dallying* with images of wrong?" (*L. P. Smith*). **Flirt**, which etymologically implies quick jerky movement, in this, its chief current sense, implies an interest or attention that exists only for the moment and passes quickly to another person or thing; as, she *flirts* with every handsome man she meets; "If he [a poet] is excited by a railway engine, well and good: if he is not, let him leave it alone and stop *flirting* with fashion by faking an emotion" (*Day Lewis*). **Coquet** usually implies a *trifling* in love, such as is characteristic of a flirtatious yet hard-to-catch young woman, but it is also used in reference to things which catch one's interest but with which one will not come fairly to terms; as, "After Gustavus' death there had been formed a new Protestant

League called that of Heilebron. Richelieu was *coquetting* with it" (*Belloc*); "Some of the Modernists have *coquetted* with this philosophy [pragmatism]" (*Inge*).

Ana. Palter, fib, equivocate, prevaricate, *lie: waver, vacillate, falter, *hesitate: dawdle, dillydally (see *DELAY*).

trifling. Trivial, *petty, puny, paltry, measly, picayunish, picayune.

Ana. Inane, wishy-washy, banal, jejune, vapid, *insipid: *vain, idle, otiose, nugatory, empty, hollow: *venial, pardonable.

trig. Trim, *neat, tidy, spick-and-span, snug, shipshape.

Ana. *Orderly, methodical: spruce, dapper (see *STYLISH*): *debonair, jaunty.

trigger man. Gunman, assassin, finger man, cutthroat, bravo.

trim, v. *Stabilize, steady, poise, balance, ballast.

Ana. *Adjust, regulate, fix: counterbalance, counterpoise, offset, *compensate.

trim, adj. *Neat, tidy, trig, snug, shipshape, spick-and-span.

Ana. *Clean, cleanly: compact, *close: *debonair, jaunty, perky, chipper.

Ant. Frowzy.

trip, n. *Journey, voyage, tour, excursion, cruise, expedition, jaunt, pilgrimage.

trite. Trite, hackneyed, stereotyped, threadbare, shopworn come into comparison when they mean being without freshness or power to evoke attention and interest. That is *trite* (literally, worn by rubbing) which has been spoiled for use by one's long familiarity with it: the term, therefore, imputes lack of novelty, commonplaceness, and often, loss of vital force or power to impress; as, "It is a *trite* but true observation, that examples work more forcibly on the mind than precepts" (*Fielding*); "a dreary expanse of *trite* sentiments and languid words" (*Sydney Smith*); "our most permanent aesthetic satisfaction arises as a rule from things familiar enough to give the pleasure of recognition, yet not so *trite* as to rob us of the other pleasure of surprise" (*Loves*). That is *hackneyed* (literally worn out in service, as an overworked horse) which has been used so much and so constantly that all its significance has been dulled or all its spirit has been taken out of it. *Hackneyed* is applied especially to words and phrases that once were impressive and full of meaning, but have become vulgarized and almost meaningless in the service of ordinary writers and speakers (cf. *cliché* under *COMMONPLACE*); as, *hackneyed* expressions such as "the cruel waves," "a clinging vine" (as applied to a woman), "honeyed kisses"; "the *hackneyed* comparison betwixt blank verse and rhyme" (*Smollett*); "language... worn and *hackneyed* out of all sense and meaning" (*Austen*); "the *hackneyed* melancholy of street-music" (*L. P. Smith*). That is *stereotyped* (literally, produced from a stereotype) which falls invariably into the same pattern or form as though made by a mechanical impression rather than invented or contrived for the occasion. The word suggests lack of originality, initiative, or creativeness; as, "the use of old *stereotyped* phrases... to save the trouble of making a new living phrase to suit our meaning" (*H. Ellis*); "The contemporary 'thriller' is in danger of becoming *stereotyped*" (*T. S. Eliot*); "Their [spiders'] cold intelligence, their *stereotyped*, unremitting industry repel me" (*L. P. Smith*). That is *threadbare* (literally, worn, as the fabric of much-used garments, rugs, etc., until the nap or pile is wholly or partly removed) which has been so frequently used or dealt with that all its possibilities have been exhausted and there is no likeli-

hood of awakening further interest in it; as, *threadbare* plots; a *threadbare* theme or subject. That is *shopworn* which is worn and marred by constant handling, as goods in a shop or as things comparable to them: the term suggests a loss of qualities that are necessary to make an appeal to those who can be stimulated only by what is bright, fresh, and new; as, *shopworn* methods of advertising; *shopworn* ideas of decoration.

Ana. *Old, antiquated, archaic, obsolete: banal, flat, jejune, *insipid, vapid: depleted, exhausted, drained, impoverished (see *DEplete*).

Ant. Original: fresh.

triumph, n. *Victory, conquest.

Ana. Vanquishing, subjugation, surmounting, overthrowing, routing (see corresponding verbs at *CONquer*).

trivial. Trifling, *petty, puny, paltry, measly, picayunish, picayune.

Ana. *Small, little, diminutive: *futile, vain, fruitless, bootless: slight, slim, slender, *thin, tenuous.

Ant. Weighty: momentous.

troop, n. Band, troupe, *company, party.

Ana. *Crowd, throng, press: assembly, gathering, collection (see under *GATHER*): legion, host, army, *multitude.

trot, v. Pace, single-foot, walk, gallop, run, canter, lope, rack, amble. See under *TROT*, *n.*

trot, n. Trot, pace, single-foot, walk, gallop, run, canter, lope, rack, amble all denote gaits, especially or only of the horse, and are used as nouns or verbs. In the *trot* the legs move in diagonal pairs, and the feet are typically on the ground in the following order: right fore; right fore, left hind; left hind; all feet off ground; left fore; left fore, right hind; right hind; all feet off ground. In the *pace* the legs move in lateral pairs, and the feet are typically on the ground in the following order: right hind; right hind, right fore; all feet off ground; left hind; left hind, left fore; all feet off ground. In the *single-foot* each foot strikes singly, and there are alternately two feet and one foot on the ground, thus: right hind, right fore; right fore; right fore, left hind; left hind; left hind, left fore; left fore; left fore, right hind; right hind. In the *walk* there are alternately three and two feet on the ground, thus: left hind, left fore, right hind; left fore, right hind; left fore, right hind, right fore; right hind, right fore; right hind, left hind; right fore, left hind; right fore, left hind, left fore; left hind, left fore. The *gallop* is a rapid, springing gait in which the feet are typically on the ground in the following order: left hind; left hind, right hind; right hind; right hind, left fore; left fore; left fore, right fore; right fore; all feet off ground. The *run* is a much-quickenened gallop. The *canter* is a galloplike gait in which the bounds or leaps are moderate and easy. The feet are typically on the ground in the following order: right hind; right hind, right fore; right hind, right fore, left hind; right fore, left hind; right fore, left hind, left fore; left hind, left fore; left fore, all feet off ground. The *lope* is an easy canter. The terms *rack* and *amble* are sometimes used interchangeably with *single-foot*, sometimes with *pace*.

troubadour. Trouvère, *poet, versifier, rhymester, rhymester, poetaster, bard, minstrel, scop, gleeman, jongleur, minnesinger, scald.

trouble, v. 1 Trouble, distress, ail come into comparison when they mean to cause one to be uneasy or upset. *Trouble* suggests loss of tranquillity or serenity and implies disturbance of any sort that interferes with one's convenience, comfort, health of body, or peace of mind; as, I shall not *trouble* you to move; the silence *troubled* him. "'Tis not my speeches that you do mislike, But 'tis my presence that doth *trouble* ye" (*Shak.*). "Let not

your heart be *troubled*: ye believe in God, believe also in me" (John xiv. 1). *Distress* implies subjection to strain or pressure that causes tension, pain, worry, grief, or the like; thus, a cough *distresses* one when it is tight and phlegm is ejected by straining; the formation of gas in the stomach *distresses* one; one is *distressed* in mind when anxiety distracts or crushes one; a person is financially *distressed* when he is in circumstances so straitened that he cannot pay his debts or satisfy his needs. *All* implies nothing more than that something has gone wrong, or is the matter, with one. It is found only in impersonal constructions; as, something *ails* the child for he looks feverish; What *ails* him: is he sick or is he worried? Thus, a cough may be said to *trouble* or *distress* a person, but never to *ail* him; a friend's plight may *trouble* or *distress*, but never *ail*, one. However, in colloquial usage, "What *ails* you?" (that is, "What is the matter with you?" or "What troubles you?") often occurs.

Ana. *Discompose, disquiet, disturb, perturb, upset, agitate: vex, irk, *annoy, bother.

2 *Inconvenience, incommode, discommode, molest.

Ana. *Embarrass, discomfit, disconcert, abash: *worry, annoy, plague, pester: perplex, *puzzle, distract.

trouble, n. *Effort, exertion, pains.

Ana. Flurry, fuss, ado, *stir, bustle, pother: labor, toil, *work: *difficulty, rigor, vicissitude, hardship.

troupe. Troop, band, *company, party.

trouper. *Actor, player, performer, mummer, mime, Thespian, impersonator.

trouver. Troubadour, *poet, versifier, rhymester, poetaster, bard, minstrel, scop, gleeman, jongleur, minnesinger, scald.

truant, n. *Vagabond, vagrant, tramp, hobo, bum, stiff, swagman, sundowner.

truce, n. *Truce, armistice* agree in meaning a suspension of hostilities or an agreement to suspend hostilities. *Truce* is more widely applicable than *armistice*, which definitely suggests laying down of arms, and therefore is the technical term for a suspension of fighting between armed forces. *Truce* may be used in reference not only to warfare, but also to a feud, a strike, or a dispute of any kind. *Truce* often suggests the desire for rest or a hope of settlement by parley rather than by combat: as a rule, it connotes a lull in activities or temporary cessation of fighting. "It is not to say that Arnold's work [the fight against Philistinism] was vain if we say that it is to be done again... the combat may have *truces* but never a peace" (T. S. Eliot). *Armistice* may or may not imply complete cessation of fighting. According to article 36 of the Hague Peace Convention, an armistice requires mutual agreement of the belligerents to lay down arms, and permits resumption of activities at any time provided the enemy is given warning prescribed by the terms of the agreement; thus, four *armistices* were signed by belligerents in the World War in 1918 (one each with Bulgaria, Turkey, Austria, and Germany), thereby paving the way for the Versailles Treaty which became effective in 1920.

truckle. *Fawn, toady, cringe, cower.

Ana. Defer, succumb, bow, cave in, *yield, submit: *follow, tag, trail, tail.

truculent. *Fierce, ferocious, barbarous, savage, inhuman, cruel, fell.

Ana. Intimidating, cowering, bulldozing, browbeating, bullying (see INTIMIDATE): terrorizing, terrifying, frightening (see FRIGHTEN): threatening, menacing (see THREATEN).

true. 1 *Faithful, loyal, leal, constant, stanch, steadfast, resolute.

Ana. *Reliable, dependable, trustworthy, tried: persevering, persisting (see PERSEVERE): *sincere, wholehearted, whole-souled, unfeigned.

Ant. False (sense 2): fickle.

2 *Real, actual.

Ana. Genuine, *authentic, veritable, bona fide: exact, precise, *correct, right: typical, natural, *regular.

Ant. False.

truism. *Commonplace, platitude, bromide, cliché.

Ana. Triteness, threadbareness (see corresponding adjectives at TRITE): banality, jejuneness, inanity (see corresponding adjectives at INSIPID).

trust, n. 1 *Trust, confidence, reliance, dependence, faith* come into comparison when they mean the fact of feeling sure or the state of mind of one who feels sure that a person or thing will not fail him. *Trust* implies an absolute and assured resting on that which is its object: it often suggests a basis upon other (not necessarily weaker) grounds than experience or sensible proofs. It is the most frequent term in religious use (as, "O God... in thee is my *trust*"—Psalms cxli. 8) but it occurs also in secular use, especially when an intimate knowledge of, or a deep affection for, the person or persons of whom one is assured is implied (as, "He was a gentleman on whom I built An absolute *trust*"—Shak.) or when there has been no cause for changing an instinctive or intuitive judgment respecting a person's or thing's reliability (as, he has always gained the *trust* of his associates; he takes every word of his father on *trust*).

Confidence may or may not imply definite grounds for one's assurances, such as the support of experience or of convincing evidence: when it does, it carries less suggestion of emotional factors than *trust* and a stronger implication of an assurance based upon the evidence of one's senses; as, "those in whom we had no *confidence*, and who reposed no *confidence* in us" (Burke); "the note of easy *confidence* that our London had become what Rome had been, the Capital city" (Quiller-Couch). When it does not imply such grounds, it usually suggests even less reliable grounds for that feeling than does *trust*; as, "But several expressions in Darwin's writings leave us in no doubt that he shared the *confidence* in progress which, arising from very unscientific sources, dominated the minds of his generation" (Inge). *Reliance* implies not only an attitude or feeling, but also an objective expression of it in an act or action; as, he had such *reliance* on the doctor's skill that he allowed himself to be operated upon at once; "His diffidence had prevented his depending on his own judgment in so anxious a case, but his *reliance* on mine made everything easy" (Austen); "Mark had written out his Christmas sermon with a good deal of care and an excessive *reliance* on what other preachers had said before him" (C. Mackenzie). *Dependence* differs from *reliance* chiefly in suggesting greater subordination of self; as, her *dependence* on her husband must sometimes be an annoyance to him; "Affectionate *dependence* on the Creator" (T. Erskine). *Faith* (as here compared: for most common sense, see BELIEF, 1) implies confidence, but it often suggests a degree of credulity or the acceptance of something capable of being proved without considering the evidence or seeking the facts: it, therefore, is often used when the person or thing in which one has faith is open to question or suspicion; as, he has great *faith* in a popular patent medicine; he takes everything the newspapers say on *faith*; it was a long time before he lost *faith* in his doctor's powers.

Ana. Assurance, conviction, certitude, *certainty: *belief, faith, credence, credit.

Ant. Mistrust.

2 *Monopoly, corner, pool, syndicate, cartel.

trust, *v.* *Rely, depend, count, reckon, bank.

Ana. Confide, entrust, *commit, consign: hope, *expect, look.

trustworthy. *Reliable, dependable, trusty, tried.

Ana. *Safe, secure: veracious, truthful (see corresponding nouns at **TRUTH**): stanch, constant, steadfast, *faithful: honest, *upright, scrupulous.

Ant. Deceitful: dubious.

trusty. Trustworthy, tried, *reliable, dependable.

Ana. *Faithful, stanch, steadfast, constant: *reliant, self-reliant.

truth. Truth, veracity, verity, verisimilitude come into comparison as terms denoting an abstraction, often a quality or property of a person or thing that keeps close to the facts or to things as they are, and avoids lies, fictions, misrepresentation, and the like. Truth is, in general, such conformity to facts or reality. It may, however, denote an abstraction that is purely an ideal construction (as, to seek the *truth*; to implant the love of *truth*) or is regarded as the final goal of the individual's intellectual endeavor (as, "ye shall know the *truth*, and the *truth* shall make you free"—*John* viii. 32), or it may denote utterances, statements, acts, or feelings (either singly or collectively) that manifest this conformity (as, he always tells the *truth*; since his actions belied his words, they said there was no *truth* in him; "every heart that loves with *truth* is equal to endure"—*Tennyson*). **Veracity** denotes a quality of persons as manifested chiefly in their utterances, or of the utterances themselves: the term implies a rigid respect for truth and accuracy and, also, either habitual adherence to truth or a willingness to face the truth, whatever the cost; as, "to vindicate [Geoffrey's] *veracity* as an historian" (*Pope*); "a man of perfect *veracity* in thought, word, and deed" (*Carlyle*); "It [Tennyson's charm] lay in a great *veracity* of soul" (*Watts-Dunton*); "But his passion for *veracity* always kept him from taking any unfair rhetorical advantages of an opponent" (*A. Huxley*). **Verity**, as here considered, denotes the quality of a thing that is truly what it purports to be or is in full accordance with the facts; as, "I could almost as soon doubt the Gospel *verity* as his *veracity*" (*Coleridge*); "the great seal...attests...the *verity* of the presidential signature" (*Ch. Just. Marshall*). **Verisimilitude** denotes a quality of representations as in art or in literature that convince one of their truth to life either in detail or in their suggestion of universal conditions: often the term implies a conformity not to things as they are actually or momentarily but to things as they are universally and eternally; as, "There is no *verisimilitude* in the characters, but there is *verisimilitude* in the thoughts; they are true to life, and are always passing through our minds" (*Jowett*); "Scott...satisfied himself with seeking *verisimilitude* rather than antiquarian accuracy" (*Sir W. Raleigh* [d. 1922]); "the mathematical picture [of nature] shows a distinct pre-eminence over the others in that, so far as we know, it depicts the phenomena of nature with complete *verisimilitude*" (*Jeans*); "the more one knows of seventeenth-century England, the more one marvels at its [*Pilgrim's Progress*] *verisimilitude*" (*Lowes*).

Ana. Exactness, precision, correctness, rightness (see corresponding adjectives at **CORRECT**): authenticity, genuineness, veritableness (see corresponding adjectives at **AUTHENTIC**).

Ant. Untruth: lie, falsehood.

try, *v.* 1 Test, *prove, demonstrate.

Ana. *Judge, adjudge, adjudicate: inspect, examine, *scrutinize.

2 *Afflict, torment, torture, rack, grill.

Ana. *Worry, harass, harry, plague, pester: *trouble, distress: irk, vex, bother, *annoy.

3 *Attempt, endeavor, essay, assay, strive, struggle.

Ana. *Aim, aspire: *intend, mean, propose, purpose, design.

try, *n.* Attempt, endeavor, essay, assay, striving, struggle. See under **ATTEMPT**, *v.*

Ana. *Effort, exertion, trouble, pains: test, trial, proof (see under **PROVE**).

tryst. Rendezvous, assignation, *engagement, appointment, date.

tucker. Fatigue, exhaust, jade, fag, *tire, weary.

Ana. *Deplete, drain, exhaust, impoverish, bankrupt.

tug, *v.* Tow, hale, haul, drag, *pull, draw.

tumid. *Inflated, flatulent, turgid.

Ana. *Expanded, distended, swollen, dilated: pompous, pretentious, *showy, ostentatious: bombastic, grandiloquent, magniloquent, *rhetorical.

tumor. Tumor, cancer. *Tumor* and *cancer* are mutually exclusive terms only in strict medical use. **Tumor** often designates any morbid swelling or mass of tissue, of which there are two kinds: benign (popularly designated simply as a *tumor*) and malignant (formerly designated simply as a *cancer*). In the strict medical sense, a *tumor* is an abnormal growth of tissue that serves no useful purpose in the body. It does not spread to other parts and usually causes difficulty only by pressure or obstruction. Common forms of benign tumors are *adenoma* (of glandlike structure or of glandular origin), *fibroma* (consisting of fibrous tissue), *chondroma* (consisting of cartilage), *lipoma* (consisting of fatty tissue), *myoma* (consisting of muscular tissue), *osteoma* (consisting of bone). A *cancer* is a malignant growth of tissue, usually ulcerating, tending to spread to other parts of the body, and associated with general ill health and progressive emaciation. The term *cancer* is often applied to either of the two forms of malignant growth more specifically denoted by *carcinoma* (a malignant growth originating in epithelial tissue, as in the skin or in the lining of the stomach) or *sarcoma* (a malignant growth derived from nonepithelial tissue, as lymphoid tissue, cartilage, bone, etc.).

tumulus. *Mound, bank, dunc, embankment, terrace, barrow.

tune, *n.* *Melody, air.

tune, *v.* *Harmonize, attune.

Ana. *Adjust, regulate, fix: *adapt, accommodate, reconcile, conform.

turbid. Turbid, muddy, roiled (or riled), roily (or riley, rily) agree in meaning not clear or translucent but clouded with sediment or with something like sediment. That is *turbid*, either literally or figuratively, which is stirred up and disturbed so that it is darkened, obscured, confused, or the like; as, the *turbid* water of a river on a stormy day; careless handling of a bottle makes wine *turbid*; "the *turbid* ebb and flow of human misery" (*Arnold*); "the air without had the *turbid* yellow light of sand-storms" (*Cather*); "for already the phrases at least of Nietzsche were trickling into the...*turbid* current of British thought" (*H. G. Wells*). That is *muddy* which is turbid or opaque as a result of being mixed with mud, or with something similarly slimy or heavy, or which is merely mud-colored (as, *muddy* coffee; a *muddy* pond): in figurative use, the term carries a stronger suggestion than *turbid* of a dull, heavy, or muddled character; as, a *muddy* complexion; a *muddy* style; "Dost think I am so *muddy*, so unsettled?" (*Shak.*); "'Turbid ecstasy' is surely not...good....*Turbid* rather suits the *muddy* kind of inspiration which London porter confers"

(*Lamb*). That is **roiled** or **roily** (or in colloquial use in the United States, **riled** or **riley**) which is turbid and agitated; as, "that which bubbles from a **roiled** mind" (*J. Beaumont*); the motorboat left behind it a wake of **roily** water.

Ana. Obscure, *dark, murky, opaque: *dirty, foul, nasty.

Antf. Clear: limpid.

turgid. Tumid, *inflated, flatulent.

Ana. Expanded, distended, amplified, swollen (see EXPAND): magniloquent, grandiloquent, *rhetorical, bombastic.

turn, v. 1 Turn, revolve, rotate, gyrate, circle, spin, whirl, twirl, wheel, eddy, swirl, pirouette come into comparison when they mean to go or move or, less often, cause to go or move in a circle or circles. **Turn**, the most general of these words, may imply movement in circle after circle or merely in a complete circle or part of a circle: like many other of the verbs in English which have acquired a multitude of senses, it often is followed by an adverb or adverbial phrase; in this instance, by *round*, *round and round*, *around*, and the like, but in some contexts these motions are implied by the word itself; as, the wheel *turns* rapidly when the car is going at high speed; to *turn* a spinning wheel; he *turned* when he heard his name; the dressmaker asked her to *turn* slowly so that she could see if the hem was even; the door *turns* on its hinges. **Revolve** always implies a turning either round and round something as a center or upon a pivot; as, the planets *revolve* around the sun; at the entrance is a *revolving* door. Both *turn* and *revolve* may also imply immaterial as well as material movement, but *turn* usually suggests a relation of dependence upon the thing around which the mind or the course of something goes (as, "that task of reconciling the individual and the class with the whole, about which the political history of the world *turns*"—*G. L. Dickinson*; "[Richelieu's] foreign policy...*turned*...upon...the encirclement of France by Spain"—*Belloc*), and *revolve* usually implies either a consideration of it from every angle or an acceptance of it as the center that guides or determines one's course (as, "Only by...experience does it [speculation] find any center to *revolve* round, and so fashion itself into a system"—*Carlyle*; "it is around the *mélange des genres* and allied topics that my main argument *revolves*"—*Babbitt*). **Rotate** (see also ROTATE, 2) implies a revolving but it carries, as *revolve* does not, the suggestion of turning on or as if on an axis; thus, when one says of the earth that it *rotates* one refers to its movement on an axis, but when one says that it *revolves*, unless one adds "on an axis," one suggests its movement around the sun. "The moon presents always the same side to the earth because it *rotates* on its axis and *revolves* round the earth at the same angular rate" (*Webster's New Int. Dict., 2d Ed.*). **Gyrate** may take the place of *revolve* or *rotate* when the stress is upon the optical or other sensible effect rather than upon the character of the movement as a whole, for the term, even when it implies a relation to a center or axis, throws the emphasis upon the circles, spirals, or convolutions described; as, a moth *gyrating* around a flame; "a low cloud of dust raised by the dog *gyrating* madly about" (*Conrad*); a tornado, a whirlwind, and the like, are characterized by winds that *gyrate*. **Circle** is a somewhat less technical term than *gyrate*; it agrees with it in emphasizing the visible aspects, but often differs from it in carrying a weaker or less obvious suggestion of continuity or speed of movement; as, "thrice the equinoctial line He *circled*" (*Milton*); "other planets *circle* other suns" (*Pope*). **Spin** and **whirl** stress the continuance and the speed of gyrations or revolutions: they are often

used transitively as well as intransitively and are commonly the preferred terms when the motion is induced by a human agent; as, to *spin* a top; to *whirl* one's arms; to *whirl* a stick. "For bodies which *revolve* or *whirl* or *turn* or *spin*, angular momentum is quite as important as ordinary momentum is for particles which simply shoot along or fly or fall" (*Karl K. Darrow*). "A thick brown fog, *whirled* into eddies by the wind" (*A. Huxley*). **Twirl** may imply a whirling or spinning, especially of something that moves with great lightness and rapidity or turns or twists through many gyrations: often, in transitive use, it implies the use of the fingers; as, drum majors *twirling* their batons; "whirligigs *twirl'd* round by skilful swain" (*Pope*); *twirling* the ends of his mustache. **Wheel** may imply movement in a circle or circles and so come close to *revolve*, *rotate* or *gyrate*, differing from them only in suggesting a description of a wheel's motion; as, "When the whirlwind's gusts are *wheeling*" (*Scott*); "play Ixion's part...chained and *wheeled*" (*Browning*). But the term also often suggests, especially when applied to flying birds or to a moving army, a turn, often a sudden turn, in a wide sweep; as, the troops, at his command, *wheeled* to the right; "the starlings *wheeled* in a sudden sheer" (*Masefield*). **Eddy** implies rapid gyratory movements, especially of air, wind, and flowing water, or of something in a whirlpool or an eddy of wind: it often specifically suggests movement contrary to the main current; as, "*Eddying* round and round they sink" (*Wordsworth*); "The vapour...*eddy* wildly in the air" (*J. Tyndall*). **Swirl** is often used in place of *eddy* or *whirl*, especially when the force or grace of the circular motion is suggested; as, the *swirling* currents of a river in flood; the *swirling* skirts of a dancer; "Further than ever comet flared or vagrant star-dust *swirled*" (*Kipling*). **Pirouette** in literal use always implies the whirling of a dancer poised on one or both toes: in extended use, it suggests a whirling or rotating on a similarly precarious support; as, a group of *pirouetting* dancers is a lovely sight; "To...*pirouette* at the apex of his loftiest elocution" (*Baring-Gould*).

Ana. *Swing, oscillate, vibrate, fluctuate, pendulate, undulate.

2 Turn, divert, deflect, avert, sheer agree in meaning to change or cause to change course or direction. **Turn** is not only the most comprehensive of these words, but also the widest in its range of application. It may be used in reference to any change in course or direction of something movable, no matter how small or how large an arc is traversed, but it usually requires qualification; as, here the river *turns* slightly to the north; he *turned* the car just in time to avoid a collision; the force of the impact *turned* the boat completely around; she *turned* her head in order to see better. It may also be used in reference to that which figuratively follows a course or proceeds in a definite direction, such as things that manifest a drift, a bent, a tendency, or the like, or persons or things that can respond to an influence; as, to *turn* the conversation to livelier topics; to *turn* public opinion against a person; to *turn* an enemy into a friend. "For the sake of saying something that might *turn* her mother's thoughts" (*Austen*). "In his need his thoughts *turned* to the sea which had given him so much...congenial solitude" (*Conrad*). **Divert**, in discriminating use, is preferred to *turn* when there is an implication of a change in a fixed (but not necessarily straight) or natural course or direction; as, to *divert* a river by providing a new channel; the unfounded belief that a lightning rod is capable of *diverting* lightning from a building it is about to strike. "The Army was so grateful that a line was *diverted* to his tent from the main cable, through which all the news of the

world came to him" (*V. Heiser*). When used in reference to a person's thoughts, interests, attention, intentions, and the like, it often presupposes mental concentration, fixity of attention, or resoluteness of purpose; therefore, when an attempt to distract, to dissuade, to sidetrack, or the like, is to be suggested, *divert* is the appropriate word; as, it is hard to *divert* his attention when he is engrossed in study. "Had I spoke with her, I could have well *diverted* her intents" (*Shak.*). "Could France or Rome *divert* our brave designs, With all their brandies or with all their wines?" (*Pope*). **Deflect**, in contrast to *divert*, implies a turning from a straight course or a fixed direction; it is therefore the preferred word when that which turns or is turned normally or rightly follows such a course or keeps such a direction; as, to *deflect* a ray of light by passing it through a prism; to *deflect* a magnetic needle. In its extended use, it is chiefly referred to thoughts, purposes, interests, that pursue a rigid or clearly defined course or direction; consequently the word sometimes connotes deviation, aberration, or the like. "He underwent all those things—but none of them *deflected* his purpose" (*Belloc*). "After all, she had perhaps purposely *deflected* the conversation from her own affairs" (*E. Wharton*). **Avert** implies a turning away from that which is before one physically or mentally; it is used chiefly in reference to something at which one has been looking or of which one has been thinking, and carries commonly a strong implication of avoidance, and often a further suggestion of repugnance; as, to *avert* one's glance from the sight before one. "She avoided looking that way as much as possible, but it was hardly in human nature to keep the eyes *averted* when the door slammed" (*Hardy*). "The last drop of her magnanimity had been spent, and she tried to *avert* her shuddering mind from Charlotte" (*E. Wharton*). **Sheer** was originally, and still is, used in reference to the turning of a boat or ship from its course, especially under the guidance of the helm and in an emergency. It is usually followed by an adverb such as *to*, *off*, *away*, *alongside*, and *up* which indicates the direction of the turn with reference to another vessel, the shore, or the like; as, the yachts *sheered* to so that their captains could speak to each other; to *sheer off* the boat just in time to avoid collision with a rock. In its extended use, the word commonly implies a sudden or conspicuous divergence from a path or course that has been followed. "An age when the interests of popular liberty and of intellectual freedom had *sheered off* from the church" (*J. R. Green*). "They [men] often were interested in me, but I was never in the least conscious of what drew them or caused them to *sheer away*" (*M. Austin*).

Ana. *Swerve, veer, deviate, diverge, digress, depart: *move, shift.

3 *Curve, bend, twist.

Ana. *Swerve, veer: incline, *slant, slope, lean: *reverse, invert, transpose.

4 *Resort, refer, apply, go.

5 In form **turn out**. *Bear, produce, yield.

Ana. *Make, form, fashion, shape, manufacture, fabricate: propagate, breed, *generate, engender.

turn, n. *Gift, bent, faculty, aptitude, genius, talent, knack.

Ana. *Inclination, disposition, predisposition, bias: propensity, proclivity, penchant, *leaning, flair.

turncoat. *Renegade, apostate, recreant, backslider, pervert.

Ana. Deserter, forsaker, abandoner (see corresponding verbs at **ABANDON**).

tusk. *Tooth, fang.

twinge, n. *Pain, ache, pang, throe, stitch.

twinkle, v. *Flash, gleam, glance, glint, sparkle, glitter,

glisten, scintillate, coruscate, glimmer, shimmer, glister, spark.

twinkling, twinkle. *Instant, moment, minute, second, flash, trice, jiffy, split second.

twirl, v. *Turn, revolve, rotate, gyrate, circle, spin, whirl, wheel, eddy, swirl, pirouette.

twist, v. Turn, bend, *curve.

Ana. Spin, twirl, whirl (see **TURN, v.**): contort, distort, gnarl (see **DEFORM**).

twister. *Wind, breeze, gale, hurricane, whirlwind, cyclone, typhoon, tornado, waterspout, gust, blast, flaw, zephyr.

twit, v. *Ridicule, deride, mock, taunt, rally.

Ana. Reproach, chide, *reprove: reprehend, blame, censure (see **CRITICIZE**): *scoff, jeer, gibe.

type, n. 1 *Symbol, emblem, attribute.

Ana. *Sign, mark, token: intimation, suggestion (see corresponding verbs at **SUGGEST, 1**): adumbration, shadowing (see corresponding verbs at **SUGGEST, 2**).

Ant. Antitype.

2 Type, kind, sort, nature, description, character, stripe, kidney, ilk come into comparison when they denote a number or group of persons or of things thought of as a class or category because of the close resemblance of the individuals in some particular way or ways. **Type** is usually the preferred term for such a group when the resemblances are so strong, clearly marked, or obvious that the distinction between that group and related groups cannot be questioned; as, there are at least four *types* of literary prose—narration, description, exposition, and argument; the seedless *type* of orange; the disappearance of the *type* of poem now known as "the popular ballad"; "that most dangerous *type* of critic" (*T. S. Eliot*). **Kind** may be very explicit or very vague in its reference. When explicit, the term usually implies likenesses that are the result of the fact that all the individuals belong to the same genus or species, often the same biological species (as, "He knew no class in flesh and blood. He loved his *kind* [i.e., all men]"—*Masefield*; the dog shunned all save his master and his own *kind* [i.e., either other dogs or dogs of the same species]), sometimes merely the same scientific genus or species (as, rubies, emeralds, sapphires are all minerals of the same *kind* [i.e., corundum]); a rock of this *kind* is rare in this part of the world), sometimes the same logical or other classification (as, "the Auden-Garrett anthology . . . is outstanding of its *kind*"—*Day Lewis*; "logic works by predicating of the single instance what is true of all its *kind*"—*W. James*). **Sort** is probably more often used than *kind* when the reference is vague, but frequently the two words are coupled or interchanged as if indistinguishable in meaning; as, men of all *sorts* and *kinds*; what *sort* (or *kind*) of mind has he?; I do not like books of this *kind* (or *sort*). *Sort*, however, is preferred when there is a distinct suggestion of disparagement or contempt; as, "Lewd fellows of the baser *sort*" (*Acts* xvii. 5); one does not enjoy that *sort* of person. The other words in this group are all more or less loosely used in place of *kind* and *sort*. In discriminating use, however, **nature** implies inherent or innate rather than superficial likenesses (as, adventures of this *nature*; sins of the same *nature*), **description** implies agreement in all details that may be regarded as part of the description or definition of the type (as, "all embargoes are not of this *description*"—*Ch. Just. Marshall*; "any class or *description* of persons"—*Ch. Just. Taney*), and **character** suggests likenesses in peculiar or distinctive features or qualities (as, few books of this *character* have come to my attention). **Stripe** and **kidney** are somewhat colloquial and usually humorous substitutes for *kind* or *sort*, *stripe* often carry-

ing a reference to affiliations (as, men of the same political [or religious] *stripe*), and *kidney* suggesting resemblances in character or in quality (as, "With persons of his *kidney* a direct question is never very discreet"—*Maugham*). *Ilk*, originally an adjective meaning *same*, derives its substantive sense from its idiomatic and chiefly Scottish use in the phrase of *that ilk*, meaning of the same name, surname, place, or territorial designation. Hence, in loose use, *ilk* is often employed as a loose substitute for any of the words of this group or for more specific terms such as *class*, *breed*, and *family*; as, "bushwhackers of Daws Dillon's *ilk*" (*John Fox, Jr.*).

Ana. Exemplar, example, *model, pattern.

typhoon. *Wind, gale, hurricane, whirlwind, cyclone,

tornado, waterspout, twister, breeze, gust, blast, flaw, zephyr.

typical. *Regular, natural, normal.

Ana. Generic, general, *universal, common: specific (see **SPECIAL**).

Ant. Atypical: distinctive.

typist. Stenographer, *secretary, amanuensis, scribe, scrivener.

tyrannical. Also **tyrannous.** Despotic, arbitrary, *absolute, autocratic.

Ana. *Dictatorial, authoritarian, magisterial: *totalitarian, authoritarian: domineering, imperious, *masterful.

tyro or tiro. *Amateur, dilettante, dabbler.

Ana. *Novice, apprentice, probationer, neophyte.

U

ubiquitous. Less often **ubiquitary.** *Omnipresent.

uitlander. Variant of **OUTLANDER**.

ulcer. *Abscess, canker, canker sore.

ultimate. 1 Extreme, *last, latest, final, terminal, concluding, eventual.

2 **Ultimate, absolute, categorical** are here compared mainly in their philosophical senses, where, despite great differences in implications, they have in common the meaning: so fundamental as to represent the extreme limit of actual or possible knowledge. That is **ultimate** which represents the utmost limit attained or attainable either by analysis or by synthesis; as, the *ultimate* constituent of matter is not the atom but a particle of electricity. "That lofty musing on the *ultimate* nature of things which constitutes, for Pascal 'the whole dignity and business of man'" (*A. Huxley*). That is **absolute** (see also **PURE**, 1; **ABSOLUTE**, 2) which has the character of being above all imperfection because it is not derived but original, not partial but complete, not subject to qualification because unlimited, not dependent on anything else because self-sufficient. That which is *absolute* has, as a rule, ideal existence and always implies an opposite in actuality lacking the marks of absoluteness; as, *absolute* reality as opposed to reality as known; *absolute*, as opposed to finite, knowledge; *absolute*, as opposed to human, justice. *The* (or *an*) *absolute*, therefore, usually designates that one thing which incorporates (or is believed to incorporate) in itself all the marks of absoluteness. "Luther... was led to set up the text of the Bible as a sort of visible *absolute*, a true and perfect touchstone in matters religious" (*Babbitt*). That is **categorical** (see also **EXPLICIT**) which is so fundamental that human reason cannot go beyond it in a search for generality or universality and which has, therefore, an affirmative, undeniable character. The "categorical imperative" of Kant was offered by him as the inescapable moral law (or "imperative") which is undeniable by reason and universal in its application. The *categorical* concepts, or the *categories*, as they are usually called, are the few concepts, such as quantity, quality, and relation, to which all human knowledge can be reduced, for no more general conceptions can be found to include them.

umbra. Penumbra, *shade, shadow, umbrage, adumbration.

umbrage. 1 Shadow, *shade, umbra, penumbra, adumbration.

2 *Offense, resentment, pique, dudgeon, huff.

Ana. Annoyance, vexation, irking (see corresponding verbs at **ANNOY**): irritation, exasperation, provocation, nettling (see corresponding verbs at **IRRITATE**): indignation, rage, fury, wrath, *anger, ire.

umpire, n. Referee, *judge, arbiter, arbitrator.

un-. **Un-, in-, non-, a-** are the common negative prefixes in English. **Un-** is not only the most frequent, but it is also the freest in use, because it may be prefixed to any English noun, adjective, or adverb capable of having a negative. As a rule, but not without a multitude of exceptions, **un-** suggests mere negation and the compound of which it is a part means nothing more than not that which is expressed by the second element; as, *unsweetened* equals not sweetened; *unladylike* equals not ladylike. **In-** (or one of its phonetic variations: *il-* before *l*; *im-* before *b, p, m*; *ir-* before *r*) is akin to **un-** etymologically, but it is found commonly in hosts of long-established compounds (often derived directly from the Latin) and is not subject to free use. Few of these compounds are merely negatives of the affirmative element. A very large (if not the larger) number imply diametrical opposition, or contrariness, as well; thus, *incautious* is far more restricted and pointed in meaning than *uncautious* (or not cautious), for the latter implies merely the failure to use caution and the former implies the presence of caution's extreme opposite—recklessness. Oftentimes, the *in-* compound is the contrary of the second element in a restricted and meaningful sense, the mere negative of the word in any sense being expressed by an **un-** compound; as, *inartistic* (tasteless, banal), *unartistic* (not artistic); *irreligious* (ungodly, profane), *unreligious* (not religious). There are times when both the *in-* and the *un-* compounds have acquired a specific meaning and a mere negative is needed. It is in such cases that the **non-** compound adjectives often originate. *Unchristian* has so long meant that which is the contrary of *Christian* in its richer sense that the compound *non-Christian* was formed to distinguish persons and activities that cannot be designated as *Christian* in its most inclusive sense. **Non-** is also used in forming nouns naming all not included, under the second element; as, *non-Turks*. **A-** (or **an-** before a vowel or *h*) is combinable only with root words of Greek origin. As a separable prefix, **a-** is freely used in forming negatives only in the sciences, particularly biology, chemistry, and medicine. It is occa-

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

sionally used to form new general words when there is a feeling that the existent *un-*, *in-*, and *non-* forms are too specific in meaning and do not strongly enough indicate privation, or the absence of all the characters or qualities implied by the affirmative element. Amoral (see *IMMORAL*) was coined when it was discovered that *immoral*, *unmoral*, and *nonmoral* did not explicitly deny the presence of all characteristics that would make a person or thing describable as *moral*. Asocial suggests, in contrast with *unsocial* and *nonsocial*, the privation of all those qualities included under the meaning of *social*.

unalienable. Variant of *INALIENABLE*.

unassailable. Impregnable, inexpugnable, invulnerable, *invincible, unconquerable, indomitable.

Ana. Stout, sturdy, tenacious, tough, *strong, stalwart.

unavoidable. *Inevitable, ineluctable, inescapable.

Ana. Certain, positive, *sure.

unbecoming. *Indecorous, improper, unseemly, indecent, indelicate.

Ana. Unfitting, inappropriate, unmeet, unsuitable (see *UNFIT*): inept, *awkward, maladroit, gauche, clumsy.

unbelief. Unbelief, disbelief, incredulity come into comparison as meaning the attitude or state of mind of one who does not believe. Unbelief stresses the lack or absence of belief, especially, but not always, in religion or in revelation; as, "he...upbraided them with their unbelief" (*Mark* xvi. 14); "If thou canst believe, all things are possible to him that believeth. And straightway the father of the child cried out...Lord, I believe; help thou mine unbelief" (*Mark* ix. 23-24); "The second of these books would be condemned for heresy, and the first for unbelief" (*J. Martineau*). Disbelief implies a positive rejection of what is stated or asserted; as, an attitude of general unbelief, with reference to a given rumor, may be changed by evidence to one of absolute disbelief; "A disbelief in ghosts and witches was one of the most prominent characteristics of scepticism in the seventeenth century" (*Lecky*); "Although the latter [Rousseau] was a disbeliever in aristocracy, he never perceived the implications of his disbelief where education was concerned" (*B. Russell*). Incredulity implies indisposition to believe or, more often, a skeptical frame of mind; as, "the stare of petulant incredulity" (*Johnson*); "there is a vulgar incredulity, which...finds it easier to doubt than to examine" (*Scott*).

Ana. *Uncertainty, doubt, dubiety, dubiousity, skepticism: agnosticism, skepticism (see under *SKEPTIC*).

Ant. Belief.

unbeliever. Freethinker, *atheist, agnostic, infidel, deist.

Ana. *Skeptic, agnostic: *pagan, heathen.

unbiased. Impartial, dispassionate, *fair, just, equitable, uncolored, objective.

Ana. *Disinterested, uninterested: detached, aloof (see *INDIFFERENT*).

Ant. Biased.

uncalled-for. Gratuitous, wanton, *supererogatory.

Ana. *Impertinent, intrusive, officious: *foolish, silly, absurd, preposterous.

uncanny. *Weird, eerie.

Ana. *Strange, singular, erratic, eccentric, odd, queer: *mysterious, inscrutable.

unceasing. *Everlasting, endless, interminable, never-ending.

uncertainty. Uncertainty, doubt, dubiety, dubiousity, skepticism (or scepticism), suspicion, mistrust are synonymous terms only when they mean a feeling or a state of mind governed by the feeling that one is not sure about someone or something. Uncertainty stresses the

lack of certainty or certitude, and may, on the one hand, imply a mere falling short of these, or it may, on the other hand, imply so far a removal from them that one is aware that one has grounds only for guessing or surmising; it may imply that one has no conviction regarding the reality, truth, or rightness of something or that one cannot predict the action, the course, or the outcome of someone or something; as, to suffer from uncertainty concerning his son's fate; "she drove without any uncertainty or hesitation as to her route" (*Deland*); "Unsuccessful propaganda verse...is the result of the poet trying to convince others without having experienced either uncertainty or conviction himself" (*Day Lewis*); "Man's uncertainties in regard to all the major issues of life" (*A. Huxley*). Doubt implies both an uncertainty about the truth or reality of something and an inability to make a decision, often even after study or investigation: frequently, the term implies such a feeling or state of mind in respect to religious beliefs or doctrines formerly accepted without question; as, he never felt a doubt of God's existence; "Ten thousand difficulties do not make one doubt" (*Newman*); "There lives more faith in honest doubt, Believe me, than in half the creeds" (*Tennyson*); "No man likes to have his intelligence or good faith questioned, especially if he has doubts about it himself" (*H. Adams*). Dubiety comes closer to uncertainty than to doubt, for it stresses a lack of sureness rather than an inability to reach a decision as to where the truth lies. But it regularly carries, as uncertainty does not, a strong implication of wavering or of fluctuations between one conclusion and another; as, faith free from all dubiety; "The twilight of dubiety never falls upon him" (*Lamb*); "Chilled Martini... Transfixing all dubiety within" (*W. R. Benét*). Dubiosity is not always clearly distinguishable from dubiety: sometimes, however, it suggests not uncertainty, but vagueness, indistinctness, or mental confusion. "Mrs. Berry had not cogitated long ere she pronounced distinctly and without a shadow of dubiousity: 'My opinion is...'" (*Meredith*). Scepticism suggests in this, its general sense (see also under *SKEPTIC*), an unwillingness to believe without demonstration, or an incredulity while any plausible evidence to the contrary exists: it usually refers to a habitual or temperamental state of mind or to a customary reaction to something proposed for belief. "St. Thomas was perhaps of all the apostles the one most easily imaginable in the present, and his sturdy scepticism must have been the consolation of many Christian souls" (*C. Mackenzie*). "An easy and elegant scepticism was the attitude expected of an educated adult; anything might be discussed, but it was a trifle vulgar to reach very positive conclusions" (*B. Russell*). "[The scientist's] boasted power to foretell and control upon the basis of his hypotheses has been too often vindicated to permit a skepticism" (*J. W. Krutch*). Suspicion stresses conjecture or apprehension that someone or something is not true, real, or right in any one of the senses of those words or that he or it has worked or is working evil or injury; however, since the term also implies that the conjecture or apprehension is accompanied by uncertainty or doubt, it comes into comparison with the other words of this group. In fact, when it implies a lack of faith in the truth, reality, or rightness of someone or something, it often comes close to doubt; as, "seized with unwonted suspicion of his own wisdom" (*Meredith*); "if the spiritual faculty is given fair play, and suffered to develop normally, suspicion...of it must disappear" (*Inge*); "a stranger...regarded with suspicion, if not actual hostility" (*Hudson*). When, on the other hand, it implies a possible but not as yet well-grounded charge or accusation of wrongdoing, the terms have little in com-

mon except an implied uncertainty; as, he had a horrible *suspicion* that the thief was a member of his own family; he felt that he had grounds for his *suspicion* of the company's cashier. **Mistrust** (as here compared: see also **DISTRUST**) implies doubt that is based upon suspicion and that therefore precludes the possibility of one's having faith, or confidence, or trust in a person or thing; as, "*Mistrust of good success hath done this deed*" (*Shak.*); "*Man is only weak through his mistrust And want of hope*" (*Wordsworth*).

Ant. Certainty. — **Con.** Certitude, conviction, assurance (see **CERTAINTY**).

uncircumscribed. Boundless, illimitable, *infinite, sempiternal, eternal.

Ant. Circumscribed.

uncivil. *Rude, ill-mannered, impolite, discourteous, ungracious.

Ana. Boorish, loutish, churlish (see under **BOOR**): brusque, blunt, gruff, crusty (see **BLUFF**).

Ant. Civil.

uncolored. 1 *Colorless, achromatic.

2 Dispassionate, impartial, objective, unbiased, *fair, just, equitable.

uncommon. *Infrequent, scarce, rare, occasional, sporadic.

Ana. *Strange, singular, unique: *exceptional: *choice, exquisite.

Ant. Common.

uncommunicative. *Silent, taciturn, reticent, reserved, secretive, close, close-lipped, closemouthed, tight-lipped.

Ant. Communicative.

unconcerned. *Indifferent, incurious, aloof, detached, disinterested.

Ana. *Cool, collected, composed, nonchalant: apathetic, *impassive, stolid, phlegmatic.

Ant. Concerned. — **Con.** Solicitous, anxious, worried, careful (see under **CARE**).

uncongenial. Unsympathetic, incompatible, *inconsonant, inconsistent, incongruous, discordant, discrepant.

Ana. *Antipathetic, unsympathetic, averse: *repugnant, repellent, abhorrent, obnoxious.

Ant. Congenial. — **Con.** Companionable, co-operative, *social: pleasing, *pleasant, agreeable.

unconquerable. *Invincible, indomitable, impregnable, inexpugnable, unassailable, invulnerable.

Ant. Conquerable.

unconstraint. **Unconstraint, abandon, spontaneity** come into comparison when they denote the free and uninhibited expression of one's thoughts or feelings or the quality of mood or style resulting from a free yielding to impulse. **Unconstraint** is the most general term and may be used in place of either of the others, though not without loss of precision in statement. "The old red blood and stainless gentility of great poets will be proved by their *unconstraint*. A heroic person walks at his ease through and out of that custom or precedent or authority that suits him not" (*Whitman*). **Abandon** adds to *unconstraint* the implication either of entire loss of self-control (as, to weep with *abandon*) or of the absence or impotence of any influence hampering free, full, or natural expression of feeling (as, gaiety and *abandon* mark her style). **Spontaneity**, on the other hand, suggests an unstudied naturalness and agreeable freshness of expression or manner; sometimes it connotes lack of deliberation and obedience to the impulse of the moment. "Keats' letters... have a deceptive *spontaneity* which invites the mind to pass over them... without pausing to penetrate below the surface" (*J. M. Murry*).

Ana. Spontaneousness, impulsiveness, instinctiveness

(see corresponding adjectives at **SPONTANEOUS**): naturalness, simplicity, unsophistication, ingenuousness, naïveté (see corresponding adjectives at **NATURAL**).

uncritical. *Superficial, shallow, cursory.

Ant. Critical. — **Con.** Discerning, discriminating, penetrating (see corresponding nouns at **DISCERNMENT**): comprehending, understanding, appreciating (see **UNDERSTAND**).

unctuous. *Fulsome, oily, oleaginous, sleek, soapy.

Ana. Ingratiating, insinuating (see **DISARMING**): bland, politic, smooth, diplomatic (see **SUAVE**): obsequious (see **SUBSERVIENT**).

Ant. Brusque.

undaunted. Dauntless, intrepid, *brave, courageous, bold, audacious, valiant, valorous, doughty.

Ana. Resolute, stanch, steadfast (see **FAITHFUL**): *confident, assured, sanguine, sure.

Ant. Afraid. — **Con.** *Fearful, apprehensive: cowed, browbeaten, bullied (see **INTIMIDATE**).

undefeasible. Variant of **INDEFEASIBLE**.

under. *Below, beneath, underneath.

underhand, underhanded. *Secret, covert, stealthy, furtive, clandestine, surreptitious, privy, backstairs.

Ana. Deceitful, *dishonest: *crooked, devious, oblique: *sly, cunning, crafty, tricky, wily.

Ant. Aboveboard. — **Con.** *Straightforward, forthright: open, plain, *frank, candid.

underlying. Basic, *fundamental, basal, substratal, substrative, radical.

Ana. *Essential, cardinal, vital, fundamental: requisite, indispensable, necessary, *needful.

undermine. *Weaken, enfeeble, debilitate, sap, cripple, disable.

Ana. *Ruin, wreck: *injure, damage, impair: thwart, foil, *frustrate.

Ant. Reinforce.

underneath. *Below, under, beneath.

understand. **Understand, comprehend, appreciate** are synonyms when they mean to have a clear and true idea or conception, or full and exact knowledge, of something. They (especially the first two) are often used interchangeably and seemingly without loss; nevertheless, they are distinguishable by fine sharp differences in meaning in precise use. In general, it may be said that **understand** refers to the result of a mental process or processes (a clear and exact idea or notion, or full knowledge), **comprehend** to the mental process of arriving at such a result; thus, one may come to *understand* a person although one has had difficulty in *comprehending* his motives and his peculiarities; one may be unable to *comprehend* a poem, no matter how clearly one *understands* every sentence in it. "You begin to *comprehend* me, do you?" cried he, turning towards her. "Oh! Yes—I *understand* you perfectly!" (*Austen*). Sometimes the difference is more subtle; *comprehend* implies the mental act of grasping or seizing clearly and fully; *understand*, the power to receive and register a clear and true impression. "That ye, being rooted and grounded in love, may be able to *comprehend* with all saints what is the breadth, and length, and depth, and height; and to know the love of Christ, which passeth knowledge" (*Ephesians* iii. 17-19). "Some men can think of thousands of dollars, others have to think of hundreds. It's all their minds are big enough to *comprehend*" (*S. Anderson*). "And the peace of God, which passeth all *understanding*, shall keep your hearts and minds through Christ Jesus" (*Philippians* iv. 7). "Chartres is so crowded that one must be content to feel what one can, and let the rest go. *Understand*, we cannot!" (*H. Adams*). **Appreciate**, as here considered (see also **APPRECIATE**, 2), implies a just judg-

ment or the estimation of a thing's true or exact value; therefore, the word is used in reference to persons or things which may be misjudged, as by underestimating or overestimating, or by undervaluing or overvaluing. "You are of an age now to *appreciate* his character" (*Meredith*). "We do not reproach him [Gilbert Murray] for preferring, apparently, Euripides to Aeschylus. But ... he should at least *appreciate* Euripides" (*T. S. Eliot*). "The public opinion which thus magnifies patriotism into a religion is a force of which it is difficult to *appreciate*... the strength" (*Brownell*). "To *appreciate* the gulf... between the ideal and the fact, we have only to contrast such a scheme as that set forth in the 'Republic' of Plato with the following description... of the state of Greece during the Peloponnesian War" (*G. L. Dickinson*). **Ana.** Conceive, realize, envision, envisage (see **THINK**): interpret, elucidate, construe (see **EXPLAIN**): penetrate, pierce, probe (see **ENTER**).

understanding. 1 *Reason, intuition.

Ana. Comprehension, apprehension (see under **APPREHEND**): *discernment, discrimination, insight, penetration: *universal, general, generic.

2 *Agreement, accord.

understudy, *n.* *Substitute, supply, locum tenens, alternate, pinch hitter, double, stand-in.

undulate. Waver, *swing, sway, oscillate, vibrate, fluctuate, pendulate.

Ana. *Pulsate, pulse, beat, throb, palpitate.

undulation. *Wave, ripple, billow, roller, breaker, comber, beachcomber, surge.

undying. *Immortal, deathless, unfading, fadeless, amaranthine.

Ana. *Everlasting, endless, unceasing, never-ending, interminable.

unearth. *Discover, ascertain, determine, learn.

Ana. Exhume, disinter, *dig, delve: expose, exhibit, *show: *reveal, disclose, discover.

uneasy. *Impatient, nervous, unquiet, restless, restive, fidgety, skittish, feverish, hectic, jumpy, jittery.

Ana. Anxious, worried, solicitous, concerned, careful (see under **CARE**): disturbed, perturbed, agitated, disquieted (see **DISCOMPOSE**).

uneducated. *Ignorant, illiterate, unlettered, untaught, untutored, unlearned, nescient.

Ana. *Rude, crude, rough, raw, callow, green.

Ant. Educated.

unerring. *Infallible, inerrable, inerrant.

Ana. *Reliable, dependable, trustworthy: *exact, accurate, precise, *correct.

unescapable. Variant of **INESCAPABLE**.

uneven. *Rough, harsh, rugged, scabrous.

Ant. Even. — **Con.** *Level, flat, plane, smooth: equable, even, uniform, *steady, constant.

unfading. *Immortal, deathless, undying, fadeless, amaranthine.

Ana. *Everlasting, never-ending, endless: *lasting, perdurable, perpetual.

unfeigned. *Sincere, wholehearted, whole-souled, heartfelt, hearty.

Ana. Genuine, veritable, bona fide, *authentic: *natural, simple, naïve: *spontaneous, impulsive.

unfit, *adj.* **Unfit, unsuitable, unmeet, improper, inappropriate, unfitting, inapt, unhappy, infelicitous** come into comparison when they mean not right with respect to what is required or expected under the circumstances or is demanded by the thing's end, use, or function. Except for this denial of rightness, the terms otherwise correspond in applications and in implications to the affirmative adjectives as discriminated at **FIT**.

Ant. **Fit.** — **Con.** Adaptable, pliable, malleable (see **PLASTIC**): *able, capable, competent, qualified.

unfitting. Inappropriate, improper, unmeet, unsuitable, *unfit, inapt, unhappy, infelicitous.

Ana. Unbecoming, unseemly, *indecorous.

Ant. Fitting.

unflagging. Unwearing, unwearied, tireless, untiring, *indefatigable, weariless.

Ana. Persevering, persisting or persistent (see corresponding verbs at **PERSEVERE**): *steady, constant.

Con. Indolent, faint, faint, slothful, *lazy.

unfledged. *Immature, unmaturing, unripe, unmellow.

Ana. Crude, callow, raw, green, *rude.

Ant. Full-fledged.

unformed. *Formless, shapeless, chaotic, amorphous, inchoate.

Ant. Formed. — **Con.** *Definite, definitive: developed, matured (see **MATURE**): fashioned, fabricated, manufactured, made (see **MAKE**).

unfruitful. Barren, *sterile, infertile, impotent.

Ant. Fruitful, prolific. — **Con.** *Fertile, fecund.

ungodly. *Irreligious, godless, unreligious, nonreligious.

Ana. Wicked, evil, ill, *bad: reprobate, *abandoned, profligate: *impious, blasphemous, profane.

ungovernable. *Unruly, intractable, refractory, recalcitrant, willful, headstrong.

Ana. *Contrary, perverse, froward, wayward: contumacious, *insubordinate, rebellious, factious.

Ant. Governable: docile. — **Con.** Submissive, subdued, *tame: tractable, amenable, *obedient.

ungracious. *Rude, ill-mannered, impolite, discourteous, uncivil.

Ana. Churlish, boorish (see under **BOOR**): brusque, gruff, blunt, curt (see **BLUFF**).

Ant. Gracious.

unhappy. Infelicitous, inapt, unsuitable, unmeet, improper, inappropriate, unfitting, *unfit.

Ana. Inept, maladroit, gauche, *awkward.

Ant. Happy.

uniform, *adj.* 1 Parallel, homogeneous, *similar, like, alike, identical, akin, analogous, comparable.

Ana. *Same, equivalent, equal.

Ant. Various.

2 *Steady, constant, even, equable.

Ana. Consistent, *consonant, compatible: regular, *orderly.

Ant. Multiform.

unify. Consolidate, concentrate, *compact.

Ana. Integrate, articulate, concatenate: organize, systematize (see **ORDER**, *v.*): *unite, combine, conjoin.

unimpassioned. *Sober, temperate, continent.

Ana. *Cool, composed, collected, imperturbable: *calm, serene, placid, tranquil: *impassive, stolid, stoic, phlegmatic.

Ant. Impassioned.

uninterested. *Disinterested.

Ana. *Indifferent, unconcerned, incurious: *forgetful, unmindful, oblivious.

Ant. Interested: curious.

union. *Unity, solidarity, integrity.

Ana. Integration, articulation, concatenation (see under **INTEGRATE**): *harmony, consonance, accord, concord.

unique. 1 *Single, sole, lone, solitary, separate, particular.

Ana. *Only, alone.

2 Singular, *strange, peculiar, eccentric, erratic, odd, queer, quaint, outlandish, curious.

Ana. *Exceptional: uncommon, rare, *infrequent.

unite. 1 Combine, *join, connect, link, associate, relate.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

Ana. *Mix, blend, merge, amalgamate: *weave, knit: *integrate, concatenate, articulate.

Ant. Divide: alienate.

2 Unite, combine, conjoin, co-operate, concur come into comparison when they mean to join forces so as to act together or to form a larger unit. **Unite** may suggest either of these ends (as, the thirteen colonies *united* to form what is now known as the United States of America; all parties *united* in signing the petition), but it more commonly suggests the formation of a new or larger unit, as by merging (as, the three churches *united*), or by blending or coalescence (as, "Rise various wreaths [of smoke] that into one *unite*"—*Wordsworth*), or by growing together (as, the inserted bud and the stock *unite* to form a plant which produces a beautiful and hardy rose), or by adhesion or solidification (as, the mixed sand, gravel, and mortar *unite* to form a substance resembling stone). **Combine** is often used interchangeably with *unite*, but it is usually the preferred term when a somewhat looser or more temporary association is to be suggested, or when the distinctness of the parts or their harmonious relations are connoted; as, "So sweet did harp and voice *combine*" (*Dryden*); several citizens *combined* to lead the campaign for the adoption of the city-manager form of government; "Innumerable factors *combine* in the inextricable complexity of our general story" (*Belloc*). **Conjoin**, a much rarer word than the other terms of this group, differs from them either in implying a uniting or combining at a given point in space or time, or in being used especially of things that have come together at a particular point or moment; as, streams which *conjoin* in the valley to form a river; "He may trace the course of these many causes until they *conjoin* in the great revolt of to-day" (*Manchester Examiner*). **Co-operate** implies a combining for the sake of action or mutual support or assistance; as, "It is... difficult to induce a number of free beings to *co-operate* for their mutual benefit" (*Goldsmith*); "Reasonable people are not such a few—let them *co-operate*, if only by recognizing each other's existence" (*Times Lit. Sup.*). **Concur**, as here considered, is used chiefly of things that combine or co-operate by their convergence or coincidence, rather than by intention; as, "All things *concur* to give it a perfection" (*Herbert*); "Two opposite forces *concur* in bringing about the Council of Nicaea" (*Dean Stanley*); "all these powerful influences *concur* in warning us" (*T. H. Huxley*).

Ana. Mingle, commingle, coalesce, fuse (see **MIX**): adhere, cohere, *stick, cling, cleave.

Ant. Part.

unity, solidarity, integrity, union are synonyms only when they denote a combining of all the parts, elements, or individuals into an effective whole, or the property or character of the whole achieved by such a blending. **Unity** is the comprehensive term applicable to wholes formed either of persons or of things: it may, for example, characterize a people, a nation, a church, or any association, or any natural or artificial structure, such as the human body or a cathedral, or any work of art, such as a drama, an epic, a painting, or a bas-relief. In every case, it implies oneness (especially a oneness of that which is varied or diverse rather than uniform in its elements) that is gained by the interdependence of parts or individuals and by the co-operation of all so that each within its proper limits helps in effecting the end of the whole; as, "the indispensable *unity* of a beautiful design" (*S. Alexander*); "[In Korin's] famous picture of the Thirty-six Poets... There is no building up round a centre; *unity* is maintained by a subtle balance of relations" (*Binyon*). *Unity* often implies a oneness of spirit

that results in a group of persons when there is harmony and concord; as, "how good... it is for brethren to dwell together in *unity*!" (*Psalms cxxxiii. 1*); "What he [Augustus] sought was *unity* of sentiment, not an unfeatured uniformity, and he attained it" (*Buchan*). **Solidarity** denotes a kind of unity in a group, a class, a community, or the like, which enables it to manifest its strength, express its opinion, or exert its influence both through individuals and through the whole with the force of an undivided mass: it implies unwillingness in individuals or in smaller groups to go counter to the interests, aspirations, or will of the group as a whole; as, "One secret of their power is their mutual good understanding... They have *solidarity*, or responsibility, and trust in each other" (*Emerson*); "Instead of national *solidarity* following the war, we have only a revival of Know-Nothingism; one faction of hyphenates tries to exterminate another faction" (*Mencken*). "The Mingotts had not proclaimed their disapproval aloud: their sense of *solidarity* was too strong" (*E. Wharton*). **Integrity** is used chiefly in reference to wholes that have been built up so that each stands as a thing marked by completeness and a unity dependent on the perfection of its parts and their mutual interdependence: the term usually stresses soundness, undividedness, or freedom from impairment of any sort; as, to preserve the *integrity* of the British Empire; a change in the last act of the original play to satisfy those who wish a happy ending has destroyed the drama's *integrity*. **Union** is now found less often in the sense here considered, because of its being the preferred general term for the act of uniting several things to form a whole or for the body or organization which results from such a uniting (as, the *union* of thirteen states to form the United States; the American Civil War was fought to preserve the *Union*). However, the term does, at times, carry the deeper implications of a thorough integration of parts and of their harmonious co-operation; as, "such harmony alone Could hold all Heaven and Earth in happier *union*" (*Milton*); "The *union*, peace and plenty of the kingdom" (*Clarendon*); "thanks to... God, who has restored *union* to my family" (*Scott*).

Ana. Identification, incorporation, embodiment, assimilation (see corresponding verbs at **IDENTIFY**): co-operation, concurrence, uniting, combining (see corresponding verbs at **UNITE**): integration, concatenation, articulation (see under **INTEGRATE**).

universal. 1 Universal, ecumenical (or oecumenical), catholic, cosmopolitan, cosmic come into comparison when they mean world-wide, or in looser use, extremely widespread in extent, range, influence, appeal, use, or the like. **Universal** etymologically implies reference to the whole of some system or body as distinct from the individuals that constitute it; as here compared, it implies reference to the universe visualized either as the entire system of created things (as, "*universal Nature*"—*Milton*; "*universal as the air*"—*S. Rogers*; "Science has become too complex to affirm the existence of *universal truths*"—*H. Adams*) or, more narrowly and far more frequently, as the world, whether that be the earth as a whole or the totality of men, especially civilized men (as, "this *universal human art*"—*H. Ellis*; a *universal language*; "The qualities which produce a man of great eminence in some one direction are often such as might be undesirable if they were *universal*"—*B. Russell*), or merely that portion of either which may loosely be described as the world which the speaker or writer knows or has in mind (as, "no other theory... has won *universal acceptance*"—*Binyon*; "One of those people... whose *universal* popularity always creates a prejudice against him beforehand"—*C. Mackenzie*). **Ecumenical**

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

etymologically implies a relationship to the inhabited world; it is therefore sometimes used in place of *universal* as more definite and more fixed in its implications; as, "our *oecumenical* commerce" (*W. H. Mallock*); Augustus imposed an *oecumenical* tax. However, *oecumenical* has been used chiefly as a descriptive title of councils which have been convoked from the entire church; thus, of the twenty councils from 325-1870, which are called *oecumenical* councils by the Roman Catholic Church, only the first seven are accepted as *oecumenical* by the Orthodox Church and the first four (without hesitation) by the Anglican Church. The term is used not only by Roman Catholics but by others with reference to persons, councils, and the like, that represent or govern the entire church; as, the patriarch of Constantinople is the *oecumenical* patriarch of all Orthodox churches. *Catholic*, like *universal*, implies a relation to a whole, but unlike the latter term, it has consistently implied a relationship to all men, especially to those who belong to the body of civilized men, or often, of cultivated men. More often in the past than at present, it has stressed universal prevalence (as, a *catholic* law) or universal applicability or usefulness (as, a *catholic* remedy). Its chief implication in current use is lack of exclusiveness as shown in a true comprehensiveness, as in interests, tastes, sympathies, and the like. "Those writers who in every nation go by the name of Classics have [so far] a *catholic* and *oecumenical* character, that what they express is common to the whole race of man" (*Newman*). "[The] tastes and fashions [of the nineteenth century] had no place for Dryden; yet Dryden is one of the tests of a *catholic* appreciation of poetry" (*T. S. Eliot*). *Cosmopolitan* (etymologically, being a citizen of the world) stresses a lack of provincialism with reference not only to locality, section, nation, or the like, but to profession or other sphere of activity. When applied to individuals, their acts, utterances, and the like, it usually connotes opportunities for travel far and wide over the world and often more or less familiarity with many places, many peoples, and many cultures. "The softened *cosmopolitan* teaching of the prophets of the captivity and the rigid national teaching of the instructors of Israel's youth" (*Arnold*). When used, however, in reference to groups, it commonly suggests a mixture of all or of a wide variety of races and carries few suggestions of cultivation, breadth of mind, or the like. "That queer, *cosmopolitan*, rather sinister crowd that is to be found around the Marseilles docks" (*R. Macaulay*). *Cosmic* now usually takes the place of *universal* when the reference is to the universe as opposed to or distinguished from the earth; as, *cosmic* order; "of what astral periods and *cosmic* processes am I not the crown, the wonder?" (*L. P. Smith*); "Natural, *cosmic* time, as it is measured out by sun and moon" (*A. Huxley*).

In ecclesiastical usage, both *Catholic* (usually capitalized) and *universal* (as, the *Catholic* Church; the *universal* church) refer to a church conceived of as the church founded by Jesus Christ and established by his apostles and as having for its mission the Christianization of all nations. In general Protestant usage, this church consists of all Christian denominations; in some Anglican and in Orthodox usage, it consists of all churches guided by an episcopate that traces its succession from the Apostles. *Catholic* is the official designation of the church commonly called the Roman Catholic Church in England and in America, which holds itself to be the ancient undivided church. Because of these differences in the application of *Catholic*, *universal* is often used in its place by those who wish to describe the whole body of Christians, or by those who wish to affirm the world-wide spread of their teachings.

Ana. *Earthly, terrestrial, worldly, mundane: *whole, entire, all, total.

2 Universal, general, generic, common are here compared as meaning characteristic of, belonging or relating to, comprehending, or affecting all or the whole. Because the implication of what constitutes all or the whole varies in each word, these terms are seldom used interchangeably by very precise writers and speakers. *Universal*, as here compared, is used chiefly in logic and philosophy; it implies reference to each one of a whole (such as a class, a category, a genus, or the like) without exception; thus, "All men are animals" is a *universal* affirmative proposition, and "no man is omniscient" is a *universal* negative proposition; color is a *universal* attribute of visible objects, but chroma (that is, hue and degree of saturation) is not; the great dramatist deals with particular men in particular situations but in such a way as to suggest *universal* truth; "if we [writers] want to get at the permanent and *universal* we tend to express ourselves in verse" (*T. S. Eliot*). *General* also implies reference to all, not only of a class, category, type, or species, but of a group, section, division, or other more or less loosely combined or associated number of persons or things. *Universal* tends to be used with great strictness in the particular sense here considered (see, however, *UNIVERSAL*, 1), but *general* often is used to imply reference to nearly all or to most of the group, even though it may be applied more strictly; as, "ethylene has come into *general* but not yet *universal* favor with surgeons" (*A. C. Morrison*); "the ideal of *general* cultivation has been one of the standards in education" (*C. W. Eliot*). As applied to words or terms, *general* strictly implies the word's or term's inclusiveness of every member of the class or group indicated; thus, "man" is a *general* term; "Under the *general* name of 'Egdon Heath' [in *The Return of the Native*] . . . are united or typified heaths of various real names" (*Hardy*). Oftentimes, however, *general* is more loosely applied to words, language, ideas, notions, and the like, and suggests lack of precision in significance, more or less loose generalization, or a vague range of application; as, "[Swinburne] uses the most *general* word, because his emotion is never particular" (*T. S. Eliot*); "Nothing could change Sophia." And at the back of that notion was a more *general* notion: 'Nothing could change a Baines' " (*Bennett*); "some rather weak cases must fall within any law which is couched in *general* words" (*Justice Holmes*). *Generic* is now used with increasing frequency in place of *general* when a term implying reference to every member of a genus (sometimes, in looser use, of any other scientific or logical category) and the exclusion of all individuating characteristics is needed; thus, a *general* likeness between certain insects may be a likeness that is observable but not clearly distinguished, whereas a *generic* likeness is one that offers proof that they belong to the same genus or that enables a student to assign a hitherto unknown insect to its proper genus; so, "absolute *generic* unity would obtain if there were one summum genus under which all things without exception could be eventually subsumed" (*W. James*); "only that is good . . . which pleases the typical or normal or *generic* man" (*S. Alexander*). "The women were the crowning joy of his contemplative mind . . . Dyspepsia would not weaken their poignant outcries, or self-interest check their fainting fits. On the *generic* woman one could calculate" (*Meredith*). *Common*, as here compared (see also *COMMON*, 3; *RECIPROCAL*, 1), differs from *general* in implying participation, use, a sharing, or the like, by all members of the class, group, or community of persons (rarely of things) under consideration; as, "a thing . . . practiced

for two hundred years by *common consent*" (*Justice Holmes*); "crowds . . . swept along by a *common animating impulse*" (*Binyon*); "our *common tongue*" (*Lowes*).

Ant. Particular.

universe. Cosmos, macrocosm, *earth, world.

unkempt. Slovenly, sloppy, *slipshod.

Ana. Frowzy, *slatternly, blowzy, dowdy: *negligent, neglectful, lax, slack, remiss.

unlearned. *Ignorant, illiterate, unlettered, uneducated, untaught, untutored, nescient.

Ana. Crude, *rude, rough, raw, callow, green.

unlettered. Illiterate, *ignorant, uneducated, untaught, untutored, unlearned, nescient.

unlikeness. *Dissimilarity, difference, divergence, distinction.

Ana. Diversity, *variety: disparity, variousness (see corresponding adjectives at **DIFFERENT**): discrepancy, discordance, incongruousness, incompatibility, inconsistency, inconsonance (see corresponding adjectives at **INCONSONANT**).

Ant. Likeness.

unman. *Unnerve, emasculate, enervate.

Ana. Sap, undermine, *weaken, enfeeble, debilitate: *abase, degrade: *deplete, drain, exhaust, impoverish, bankrupt.

unmatured. *Immature, unripe, unmellow, unfledged.

Ant. Matured. — **Con.** *Mature, adult, grown-up.

unmeet. Unsuitable, *unfit, improper, inappropriate, unfitting, inapt, unhappy, infelicitous.

Ana. Unbecoming, unseemly, *indecorous.

Ant. Meet.

unmellow, unmellowed. *Immature, unmatured, unripe, unfledged.

Ant. Mellow, mellowed. — **Con.** Developed, ripened, matured (see **MATURE**, *v.*).

unmindful. *Forgetful, oblivious.

Ana. Heedless, thoughtless, *careless, inadvertent: *negligent, neglectful, remiss.

Ant. Mindful: solicitous. — **Con.** Careful, concerned, anxious, worried (see under **CARE**): *thoughtful, considerate, attentive.

unmitigated. *Outright, out-and-out, arrant.

unmoral. *Immoral, amoral, nonmoral.

unmovable. Variant of **IMMOVABLE**.

unnatural. Anomalous, *irregular.

Ana. *Abnormal, aberrant, atypic: *monstrous, prodigious: *fantastic, grotesque, bizarre.

Ant. Natural.

unnerve. **Unnerve**, **enervate**, **unman**, **emasculate** come into comparison when they mean to deprive of strength or vigor and of the capacity for endurance, overcoming difficulties, or making progress. **Unnerve** implies marked loss of courage, steadiness, self-control, or of power to act or fight, usually, but far from invariably, as a result of some calamity or sudden shock; as, "Government was *unnerved*, confounded, and in a manner suspended" (*Burke*); "That beloved name *unnerved* my arm" (*Arnold*); he was completely *unnerved* by the accident; "The narcotic and *unnerving* property of these stimulants has been thoroughly established" (*Day Lewis*). **Enervate** implies a much more gradual weakening or dissipation of one's strength until one is too feeble to make effort; usually, but not without exceptions, the term implies relaxation, especially of moral fiber, under the influence of luxury, indolence, effeminacy, and the like; as, "those unhappy people whose tender minds a long course of felicity has *enervated*" (*Bolingbroke*); "The people sink into sloth, and luxury, and prostitution. . . . [the kingdom] is *enervated* at home—becomes contempt-

ible abroad" (*Fielding*); "Plato asserts that a life of drudgery disfigures the body and . . . *enervates* the soul" (*G. L. Dickinson*). **Unman** implies loss of manly fortitude or spirit: it often suggests a shameful reduction to tears, tremors, extreme timidity, or other state regarded as womanish; as, "What, quite *unmann'd* in folly? . . . Fie, for shame!" (*Shak.*); "For a moment the overwhelming conviction of it *unmanned* him" (*Prescott*). **Emasculate** (see also **STERILIZE**, 1) implies a loss of essential or effective power, especially by the removal of something, such as a factor or a condition, which has made for the strength of a person, a group, or the like. "Hellenism . . . was not destroyed, though it was *emasculated*, by the loss of political freedom" (*Inge*).

Ana. Upset, agitate, perturb (see **DISCOMPOSE**): bewilder, distract, confound (see **PUZZLE**, *v.*): *weaken, enfeeble, sap, undermine.

unpremeditated. *Extemporaneous, extempore, extemporary, improvised, impromptu, offhand.

Ant. Premeditated. — **Con.** *Deliberate, considered, designed, studied.

unpropitious. *Ominous, portentous, fateful, inauspicious.

Ana. *Sinister, baleful, malign, malefic: threatening, menacing (see **THREATEN**): *adverse, antagonistic, counter.

Ant. Propitious.

unqualified. Incompetent, *incapable.

Ana. Disabled, crippled, weakened, debilitated (see **WEAKEN**): *unfit, unsuitable.

Ant. Qualified. — **Con.** *Able, capable, competent.

unquiet. *Impatient, nervous, restless, restive, uneasy, fidgety, skittish, feverish, hectic, jumpy, jittery.

Ana. Agitated, upset, perturbed, disquieted, disturbed (see **DISCOMPOSE**): worried, anxious, solicitous, concerned, careful (see under **CARE**).

Ant. Quiet.

unreasonable. *Irrational.

Ana. Absurd, preposterous, *foolish, silly: *simple, fatuous, asinine: *excessive, immoderate, inordinate.

Ant. Reasonable.

unrelenting. *Grim, implacable, relentless, merciless.

Ana. Inexorable, obdurate, *inflexible, adamant: *stiff, rigid: *severe, stern.

Ant. Forbearing.

unreligious. *Irreligious, ungodly, godless, nonreligious.

unripe. *Immature, unmatured, unmellow, unfledged.

Ana. Crude, raw, green, callow, *rude: *premature, untimely, forward, precocious.

Ant. Ripe. — **Con.** Matured, ripened, developed (see **MATURE**, *v.*).

unruffled. Imperturbable, nonchalant, *cool, composed, collected.

Ana. *Calm, placid, peaceful, serene, tranquil: poised, balanced (see **STABILIZE**).

Ant. Ruffled: excited.

unruly. **Unruly**, **ungovernable**, **intractable**, **refractory**, **recalcitrant**, **willful** (or **wilful**), **headstrong** come into comparison as meaning not submissive to government or control. **Unruly** stresses a lack of discipline or an incapacity for discipline: in addition it often connotes turbulence, disorderliness, waywardness, obstreperousness, or the like; as, *unruly* children; "Whatever my *unruly* tongue may say" (*J. R. Green*); "the *unruly* passions" (*T. S. Eliot*). **Ungovernable** implies either an incapacity for, or an escape from, guidance or control. When applied directly or indirectly to persons, it usually suggests either no previous subjection to restrictions or a state of being unsubdued (as, "The fiercest and most *ungovernable* part

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

of the . . . population"—*Macaulay*) or the loss of all power to control oneself or to be controlled by others (as, he fell into an *ungovernable* rage; he knew that if he gave rein to his passion, it would become *ungovernable*). When used in reference to things, it usually suggests their incapacity for human direction or control; as, "That . . . *ungovernable* wonder the wind" (*N. Hawthorne*); "We palpitate between relief when our *ungovernable* vehicle blunders into a happy valley, and despair when we hear the growl of the waves at the foot of the cliffs" (*Shaw*). **Intractable** and **refractory** both imply resistance to all attempts to bring under one's control, management, or direction. When applied to persons, *intractable* suggests an indisposition to guidance or a disposition to resist (as, an *intractable* child; an *intractable* temper; "his rough, *intractable* spirit"—*J. Wesley*; "We were now dealing with the *intractable* Sinhalese rather than the stupid but amenable Tamils"—*V. Heiser*); when applied to things, it suggests a more or less marked incapacity for working, manipulation, treatment, or the like (as, *intractable* soil; an *intractable* metal; "Shakespeare was unable to impose this motive successfully upon the '*intractable*' material of the old play"—*T. S. Eliot*). **Refractory**, on the other hand, often implies active resistance as indicated by manifest disobedience, open protest, or rebelliousness (as, "It becomes my duty to struggle against my *refractory* feelings"—*Burney*; "There is no use in making the *refractory* child feel guilty; it is much more to the purpose to make him feel that he is missing pleasures which the others are enjoying"—*B. Russell*) or, when the reference is to an inanimate thing, a degree of intractability that offers especially great resistance or presents unusual difficulties (as, bricks and other *refractory* [i.e., heat-resistant] substances are used to line furnaces; "Cheerfulness is in ethics what fluorspar is in metallurgy. It is a flux absolutely necessary in dealing with *refractory* moral elements"—*S. M. Crothers*). **Recalcitrant** (etymologically, kicking back) carries an even stronger implication of active and violent resistance or of obstinate rebellion: it usually suggests defiance of another's will, order, authority, or the like; as, "his father became *recalcitrant* and cut off the supplies" (*Stevenson*); "In Russia a minority of devoted Marxists maintain by sheer force such government as is possible in the teeth of an intensely *recalcitrant* peasantry" (*Shaw*). The term is less often applied to things (other than personal traits, feelings, dispositions, etc.) than *intractable* and *refractory* but there is some use when seemingly insuperable difficulties are implied; as, "The atomicity of nature, supposed to be as yet *recalcitrant* to mind" (*S. Alexander*); "He discovers poetry in the most unlikely places and wrings it out of the most *recalcitrant* material" (*Day Lewis*). **Willful** usually implies intractability because of an overweening desire or an obstinate determination to have one's own way and an unwillingness to be guided by those who are wise or experienced; as, "To *willful* men, the injuries that they themselves procure must be their schoolmasters" (*Shak.*); "to confound [will] with its irritable and purposeless counterfeit, *willfulness*" (*J. R. Lowell*); "her bright audacity, her ardor and her *willfulness*" (*Hewlett*); "We know we haven't finality, and so we are open and receptive, rather than *willful*" (*H. G. Wells*). **Headstrong** implies violent self-will that makes for refractoriness or recalcitrance; as, "a *headstrong*, moody, murmuring race" (*Dryden*); "the *headstrong* passions of Benvenuto Cellini" (*Gibbon*); "They are testy and *headstrong* through an excess of will and bias" (*Emerson*).

Ana. *Insubordinate, rebellious, contumacious: ob-

streperous, boisterous, strident (see **VOCIFEROUS**): *contrary, perverse, froward, wayward: fractious, *irritable, snappish, waspish.

Ant. Tractable, docile.

unseemly. *Indecorous, improper, unbecoming, indecent, indelicate.

Ana. Unfitting, unsuitable, inappropriate, unmeet (see **UNFIT**): incongruous, incompatible, inconsistent, *inconsonant.

Ant. Seemly.

unsettle. *Disorder, derange, disarrange, disorganize, disturb.

Ana. Discommode, incommode, trouble, molest (see **INCONVENIENCE**): upset, agitate, perturb, *discompose, disquiet.

Ant. Settle.

unsocial. **Unsocial**, **asocial**, **antisocial**, **nonsocial** agree in meaning not social and therefore, in a sense, opposed to that which is social. **Unsocial** is applied chiefly to persons, their temperaments, acts, motives, etc., and implies a distaste for the society of others or an aversion to companionship or fraternization; as, he is a most *unsocial* person; an *unsocial* disposition. **Asocial** is also applied to persons, but especially to their behavior, their thoughts, their acts, and the like, regarded objectively, as from the psychologist's point of view; it implies a lack of all the qualities which are suggested by the word *social*, especially as opposed to *individual*. In its most frequent sense, that which is *asocial* has no reference to or significance for others, and is therefore, by implication, individualistic, self-centered, egocentric, egoistic, or the like; as, *asocial* types of persons; *asocial* interests; dreaming is an *asocial* act. **Antisocial** is applied chiefly to ideas, movements, acts, books, and the like, which are regarded as harmful to or destructive of society or the social order or institutions such as the state and church; as, anarchists are both *asocial* in their thinking and *antisocial* in their propaganda; *antisocial* theories; *antisocial* conduct. **Nonsocial** is applied only to things which cannot be described as *social* in any sense of the word; as, *nonsocial* questions; *nonsocial* activities; a *nonsocial* club; *nonsocial* diseases.

Ant. Social.

unsophisticated. *Natural, simple, ingenuous, naïve, artless.

Ana. Candid, *frank, open, plain: genuine, bona fide, *authentic: crude, callow, green (see **RUDE**).

Ant. Sophisticated.

unspeakable. *Unutterable, inexpressible, ineffable, inenarrable, indescribable.

Ana. *Offensive, loathsome, repulsive, revolting: *repugnant, repellent, obnoxious, distasteful: abominable, odious, *hateful, detestable.

unstable. *Inconstant, fickle, capricious, mercurial.

Ana. *Changeable, variable, mutable, protean: volatile, effervescent, buoyant, resilient, *elastic.

Ant. Stable.

unsuitable. *Unfit, unmeet, improper, inappropriate, unfitting, inapt, unhappy, infelicitous.

Ana. Unbecoming, unseemly, *indecorous, indecent: inept, maladroit, *awkward, clumsy, gauche.

Ant. Suitable.

unsympathetic. 1 Uncongenial, discordant, incongruous, incompatible, *inconsonant, inconsistent, discrepant.

Ant. Sympathetic. — **Con.** Harmonizing or harmonious, accordant, correspondent (see verbs at **AGREE**).

2 *Antipathetic, averse.

Ana. *Indifferent, unconcerned, incurious, aloof: *hardened, callous, indurated.

Ant. Sympathetic.

untangle. Disentangle, *extricate, disencumber, dis-embarrass.

Ana. *Free, release, liberate.

Con. *Hamper, fetter, manacle, shackle, trammel.

untaught. *Ignorant, illiterate, unlettered, uneducated, untutored, unlearned, nescient.

Ant. Taught.

untimely. *Premature, forward, advanced, precocious.

Ana. *Immature, unmatured, unripe, unmellow, unfledged.

Ant. Timely. — **Con.** *Seasonable, opportune, well-timed, pat.

untiring. *Indefatigable, tireless, weariless, unwear-ying, unwearied, unflagging.

Ana. Unceasing, never-ending, interminable, *ever-lasting; assiduous, sedulous, diligent (see BUSY): persevering, persisting (see PERSEVERE).

untruth. *Lie, falsehood, fib, misrepresentation, story.

Ana. Mendaciousness or mendacity, dishonesty, deceitfulness (see corresponding adjectives at DISHONEST): equivocation, tergiversation (see AMBIGUITY).

Ant. Truth. — **Con.** Veracity, verity (see TRUTH): *honesty, integrity, probity, honor.

untruthful. Lying, mendacious, *dishonest, deceitful.

Ana. *False, wrong; *misleading, deceptive, delusive, delusory.

Ant. Truthful. — **Con.** Honest, *upright, scrupulous: veracious (see corresponding noun at TRUTH).

untutored. *Ignorant, illiterate, unlettered, uneducated, untaught, unlearned, nescient.

Ant. Tutored.

unutterable. Unutterable, inexpressible, unspeakable, ineffable, inenarrable, indescribable agree in meaning incapable of being told or described. All, with the possible exception of *inenarrable*, are often nothing more than intensives implying an extreme that goes beyond the power of words to express. In their more explicit denotations, *unutterable* implies any of various reasons why the thing so qualified cannot be voiced or spoken, such as the greatness of one's awe (as, "My tongue... Attempts th' *unutterable* Name, But faints"—*J. Watts*), or one's inability to pronounce correctly (as, to find the French word "roi" *unutterable*), or one's aversion to that which is immodest or obscene (as, I cannot repeat what he said, for his language was *unutterable*). *Inexpressible*, on the other hand, usually applies to that which is so delicate, so immaterial, so subtle, or the like, that there are no words to reveal its true or exact nature; as, "speech able to express subtleties... that before seemed *inexpressible*" (*H. Ellis*). *Unspeakable* differs little from *unutterable* in its etymological and explicit meaning; as, "joy *unspeakable* and full of glory" (*1 Peter* i. 8); "a thousand memories... *Unspeakable* for sadness" (*Tennyson*); "the bawdy thoughts that come into one's head—the *unspeakable* words" (*L. P. Smith*). More often, however, especially in current use, *unspeakable* means too unpleasant, disgusting, horrible, or the like, to describe in detail; as, "My nights were *unspeakable*" (*Jane W. Carlyle*); "twisted shapes of lust, *unspeakable*, Abominable" (*Tennyson*); "Twice... in my public transferences from one prison to another have I been shown under conditions of *unspeakable* humiliation to the gaze and mockery of men" (*Wilde*). *Ineffable*, although it is etymologically closer in meaning to *unutterable* than to *inexpressible*, in actual use is a near synonym of the latter word. It carries, however, a stronger suggestion of a character that transcends expression because of its otherworldliness, its spirituality, its ideality, or other similarly elusive quality; as, "*ineffable* tenderness"

(*Meredith*); "the eyes remained distant and serious, as if bent on some *ineffable* vision" (*E. Wharton*); "The mystic sees the *ineffable*, and the psycho-pathologist the *unspeakable*" (*Maugham*). "Who shall say that in this silence, in this hovering wan light, in this air bereft of wings, and of all scent save freshness, there is less of the *ineffable*, less of that before which words are dumb?" (*Galsworthy*). *Inenarrable* (now practically obsolete) and *indescribable* strongly suggest the inability of the writer or speaker to narrate, or describe, or explain the thing so qualified; they therefore usually fail to ascribe a definite quality to the thing itself and are, by comparison with the other terms, vaguer and less effective; as, "That sacred...mystery of the Holy Trinity is...*inenarrable* by any creature" (*M. Davies*); "Various sacred *inde-scribable* articles were scattered around" (*H. Martineau*).

unwearied. *Indefatigable, tireless, weariless, untiring, unwearied, unflagging.

Ana. Persevering, persisting or persistent (see corresponding verbs at PERSEVERE): unceasing, never-ending, interminable (see EVERLASTING): constant, *steady.

unwearying. *Indefatigable, tireless, weariless, untiring, unwearied, unflagging.

Ana. See those at UNTIRING.

upbraid. *Scold, rate, berate, tongue-lash, revile, vituperate, jaw, bawl out, wig, rail.

Ana. Reprehend, reprobate, blame, censure, denounce (see CRITICIZE): reproach, reprimand, rebuke, *reprove.

uphold. *Support, advocate, back, champion.

Ana. *Help, aid, assist: defend, vindicate, justify, *maintain: sanction, *approve, endorse.

Ant. Contravene: subvert.

upholder. Supporter, advocate, backer, champion. See under SUPPORT, *v*.

upright, adj. Upright, honest, just, conscientious, scrupulous, honorable (or honourable) come into comparison when they are applied to men, their acts, and words and mean having or exhibiting a strict regard for what is morally right. Upright implies manifest rectitude and an uncompromising adherence to high moral principles. "So *upright* Quakers please both man and God" (*Pope*). "We shall exult, if they who rule the land, Be men... Wise, *upright*, valiant; not a servile band" (*Wordsworth*). **Honest**, in its current prevailing sense, implies a recognition of and strict adherence to virtues such as truthfulness, candor, respect for others' possessions, sincerity, fairness, and the like; it is far more widely applicable than *upright* which often implies independence of spirit and self-mastery and which is therefore referable chiefly to thoughtful and highly disciplined men. **Honest**, on the other hand, may be used in reference to the ignorant as well as the learned, and to the simple as well as the wise. "The *honest* heart that's free frae a' Intended fraud or guile" (*Burns*). "If we be *honest* with ourselves, we shall be *honest* with each other" (*G. Macdonald*). **Just**, in early English use, described the man who by his faith and works justified himself in the sight of God, or by his strict adherence to moral principles won the admiration of men; the word now occurs in this sense chiefly as a Biblical archaism. "For he maketh his sun to rise on the evil and on the good, and sendeth rain on the *just* and on the *unjust*" (*Matthew* v. 45). "Cornelius the centurion, a *just* man, and one that feareth God, and of good report among all the nation of the Jews" (*Acts* x. 22). "Some lead a life un-blameable and *just*" (*Cowper*). **Conscientious** and **scrupulous** both imply an active moral sense which governs all one's actions. **Conscientious**, however, stresses painstaking efforts to follow that guide at all costs, especially in one's observance of the moral law, or in the

performance of one's duty. "His [Ben Jonson's] whole character... was far too sturdily *conscientious* to allow of any suspicion being cast upon his rectitude" (A. W. Ward). "The skillful, *conscientious* schoolmistresses whose lives were spent in trying to inculcate real knowledge" (*Grandgent*). *Scrupulous* (see also CAREFUL, 2), on the other hand, implies either anxiety lest one should not obey strictly the dictates of conscience, or meticulous attention to the morality of the details of conduct, as well as to the morality of one's ends. "He is so very strict and *scrupulous* in his notions. . . . Do not you think it is quite a mistaken point of conscience, when a clergyman sacrifices his health for the sake of duties which may be just as well performed by another person?" (*Austen*). *Honorable* (see also HONORABLE, 1) implies the guidance of a high sense of honor, or of a sense of what one should do in obedience not only to the dictates of conscience but to the demands made upon one by one's social position or one's office, by the code of one's profession, or by the esteem in which one is held. "What do you think of me?" "As of a man faithful and *honourable*" (Shak.). "Did this vile world show many such as thee, Thou perfect, just, and *honourable* man!" (*Shelley*).

Ana. *Moral, ethical, virtuous, righteous: *fair, equitable, impartial: *straightforward, aboveboard.

uprising. *Rebellion, revolution, revolt, insurrection, mutiny, Putsch.

Ana. Fight, combat, conflict, fray (see CONTEST): strife, contention, dissension (see DISCORD): aggression, *attack.

uproar. *Din, pandemonium, hullabaloo, babel, hubbub, racket.

Ana. Strife, contention, dissension, *discord, conflict, variance: *confusion, disorder, chaos: fracas, *brawl, broil, melee.

uproot. Eradicate, deracinate, extirpate, *exterminate, wipe out.

Ana. *Abolish, extinguish, annihilate, abate: supplant, displace, *replace, supersede: subvert, overthrow, *overturn: *destroy, demolish.

Ant. Establish: insemminate.

upset, v. 1 *Overturn, overset, capsize, overthrow, subvert.

Ana. Invert, *reverse: *tip, tilt, cant, career: turn, bend (see CURVE, v.).

2 Agitate, perturb, disturb, disquiet, *discompose, fluster, flurry.

Ana. Bewilder, distract, confound (see PUZZLE, v.): discomfit, rattle, faze, *embarrass: *unnerve, unman.

upshot. Outcome, issue, result, consequence, *effect, aftereffect, event, aftermath, sequel.

Ana. *End, termination, ending: climax, culmination (see SUMMIT): concluding or conclusion, finishing or finish, completion (see corresponding verbs at CLOSE).

urbane. *Suave, smooth, diplomatic, bland, politic.

Ana. Courteous, polite, courtly, *civil: poised, balanced (see STABILIZE): cultured, cultivated, refined (see corresponding nouns at CULTURE).

Ant. Rude: clownish: bucolic.

urge, n. *Desire, lust, concupiscence, passion, appetite, appetite, yen.

Ana. *Motive, spring, spur, goad, incentive: longing, yearning, pining (see LONG): craving, coveting, desiring (see DESIRE, v.).

usage. 1 Practice, custom, consuetude, use, *habit, habitude, wont.

Ana. *Method, mode, manner, way, fashion: procedure, proceeding, *process: guiding or guidance, leading or lead (see corresponding verbs at GUIDE): *choice, preference.

2 *Form, convention, convenience.

Ana. Formality, ceremony, *form.

use, v. **Use, employ, utilize, apply, avail oneself of** as here compared, agree in meaning to deal with something so as to give it a practical value or to make it serviceable to oneself or others. One **uses** a thing (a person only when regarded as a passive object) as a means or instrument to the accomplishment of a purpose or as an aid to the attainment of one's end; the thing may be concrete (as, to **use** a hoe in cultivating; to **use** a dictionary to build up one's vocabulary; to **use** a person as a tool), or it may be abstract (as, to **use** patience in dealing with children; to **use** one's discretion in the investment of a trust fund. "The way to learn to **use** words is to read some good literature often and carefully"—B. Russell; "His sense of being **used** rose suddenly above the treacherous sympathy he had begun to feel for her"—Tarkington). One **employs** a person or thing that is idle, inactive, not in use, and the like, when one puts him or it to work or finds a profitable use for him or it; as, "She had . . . **employed** her leisure in reading every book that came in her way" (Shaw); "the student crammed full of knowledge which he cannot **employ**" (*Grandgent*). "The life of a man of business who **employs** his own capital, and **employs** it nearly always in the same way, is by no means fully **employed**" (Quiller-Couch). Although **use** and **employ** are often interchanged, there is usually, in precise writing, a perceptible difference in meaning: wherever the idea of serving as the means or instrument is uppermost, **use** is the preferred term; wherever the idea of engaging or selecting, of keeping occupied or busy, or of turning to account is uppermost, **employ** is the desirable and often the necessary choice; thus, a writer **uses** words effectively who knows what ones he should **employ** in a given context; a teacher often **uses** his pupils as monitors when he should keep them **employed** in study. One **utilizes** something when one finds a profitable use for it or discovers how to employ it for a practical purpose; as, "he even tried to figure out a way to **utilize** the small limbs cut from the tops of the trees" (S. Anderson); "progress is possible only through **utilization** of experience" (*Grandgent*). One **applies** something when one brings it into contact or into relation with something else where it will prove its usefulness or acquire practical value. This implication of making a connection or bringing into contact is strong in all senses of **apply**; it not only affects the construction (thus, one **uses** a gift of money to pay a debt, but one **applies** that money to the payment of a debt), but it often obscures the implication of usefulness (thus, one **uses** a mustard plaster to relieve a chest pain, but one **applies** a mustard plaster to the chest). This implication also distinguishes **apply** from the other words when the idea of usefulness is stressed; thus, one knows how to **employ** words when one reveals his ability to select those words that express his exact meaning, no more and no less; one knows how to **apply** words when one reveals his ability to use them relevantly, that is, in reference to the things or ideas with which they are idiomatically associated; thus, foreigners learning English find difficulty in **applying** certain words and phrases such as "evening dress" and "nightdress," "tool" and "instrument," "bad" and "naughty," and the like. "Our own word 'virtue' is **applied** only to moral qualities; but the Greek word which we so translate should properly be rendered 'excellence,' and includes a reference to the body as well as to the soul" (G. L. Dickinson). The implication of a useful or definite end is strongest in **apply** when the word carries the further suggestion of relating that which is general or theoretical to that which is particular, or

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

concrete, for some practical purpose such as identification (as, we can discover if this fabric is woolen by *applying* certain tests such as burning a portion to see if it has a peculiar odor), or clarification of a problem (as, before forming an opinion, the judges must know what laws *apply* to the particular case), or invention (as, rayon, hard rubber, aniline dyes, wireless telegraphy, the radio, the airplane, and other recent inventions and discoveries are all the result of the *application* of the laws of physics and chemistry). Hence, a science when it is concerned chiefly with theory is called a *pure* science, and when it is concerned with the practical application of that theory is called an *applied* science; as, *applied* chemistry; *applied* sociology. "The law does all that is needed when it does all that it can, indicates a policy, *applies* it to all within the lines, and seeks to bring within the lines all similarly situated" (*Justice Holmes*). "It is a test which we may *apply* to all figure-painters—a test which will often discover the secret of unsatisfactory design—if we ask whether the figures are really occupied by what they are doing" (*Binyon*). One *avails oneself* of something (or someone) that is at hand, is offered, is at one's disposal, or the like, when one uses it or him to one's own benefit, advantage, or the like. "I doubt if I should *avail* the permission. It is a hundred to one if I should *avail myself* of it four times in a year" (*Dickens*). "Far from resenting such tutelage I am only too glad to *avail myself* of it" (*Shaw*).

Ana. *Handle, manipulate, ply, wield: *practice, exercise.

USE, n. 1 Use, service, advantage, profit, account, avail are synonymous when they agree in meaning a useful or valuable end, result, or purpose. Only the first four are used freely, but even they often, as the last two invariably, occur in idiomatic phrases such as, to put or turn to *use*, *service*, *advantage*, etc.; of no *use*, *advantage*, *account*, *avail*. **Use** stresses either employment for some purpose or end of practical value (as, to turn every scrap of material to *use*) or the practical value of the end promoted or attained (as, the findings in the investigation were of little *use*). "The vehicles [balloons] can serve no *use* till we can guide them" (*Johnson*). "Sweet are the *uses* of adversity" (*Shak.*). **Service**, though often interchangeable with *use*, is preferable when the reference is to persons or animals or their work or actions; as, "the horse was unfit for *service*" (*Scott*); to render a *service* to a friend. *Service* often implies that the result of one's act or works is beneficial. "I have done the state some *service*, and they know't" (*Shak.*). "To fret myself would have done me no *service*" (*Smollett*). **Advantage** adds to *use* the implication of improvement or enhancement as in value, position, or the like; as, he uses every penny to *advantage*; her beauty proved to be of great *advantage* to her in her stage career. "Constance had never before seen him to such heroic *advantage*" (*Bennett*). "True Wit is Nature to *advantage* dress'd" (*Pope*). **Profit** distinctively implies reward or the rewarding character of that which is attained; only in its extended use does it imply pecuniary gain; as, to work hard but to no *profit*. "He found moral *profit* also in this self-study; for how, he asked, can we correct our vices if we do not know them" (*L. P. Smith*). **Account** is used chiefly in phrases; as, to turn to *account*; of much, little, or no *account*. In loose use, it is interchangeable with *use*, *advantage*, or *profit*; in discriminating use, however, it suggests calculable value. "A book that turns to *account* the conclusions of other recent German theorists" (*Babbitt*). Sometimes, it is nearly equivalent to *importance*. "Our family . . . whose honour is of so much *account* to both of us" (*Dickens*). **Avail** so strongly suggests

effectualness or effectiveness in the end attained that the negative idiomatic phrases in which it is often found are equivalent to *ineffectual* or *ineffectually*; as, the search was of no *avail*; he labored unceasingly without *avail* to move the rock; he studied hard but to no *avail*.

Ana. Benefit, profit (see corresponding verbs at **BENEFIT**): value, *worth: *function, office, duty: purpose, *intention, object.

2 Use, usefulness, utility come into comparison when they mean the character or the quality of serving or of being able to serve one's end or purpose. **Use** (as here compared: see also **USE, 1**; **HABIT**) is the most general or least explicit of these terms: it usually implies little more than suitability for employment, sometimes for an implied or stated purpose, but often merely for any conceivable purpose; as, she said she would have saved the pieces had they been of any *use*; there is no *use* in becoming angry; I am sure your conclusions will prove to be of great *use*. **Usefulness**, on the other hand, is employed chiefly with reference to definite concrete things that serve or are capable of serving a practical purpose; as, he demonstrated the *usefulness* of his device for stabilizing airplanes; the gadget has no real *usefulness* so far as I can see. **Utility** is preferred to *use* and *usefulness* in scientific, philosophical, and other formal speech or writing. It is, therefore, often regarded as a property or quality that can be measured, decreased and increased, or the like, or that can be viewed as an abstraction; "Does any sound measure either of the *utility* or the needs of various classes of wage-earners determine that a compositor or a plasterer shall receive . . . [a weekly wage] three times that of a skilled farm labourer?" (*J. A. Hobson*). "Universities exist for two purposes; on the one hand, to train men and women for certain professions; on the other hand, to pursue learning and research without regard to immediate *utility*" (*B. Russell*).

Ana. Applicability, relevance, pertinence (see corresponding adjectives at **RELEVANT**): suitability, fitness, appropriateness (see corresponding adjectives at **FIT**).

3 Wont, practice, usage, custom, consuetude, *habit, habitude.

Ana. *Form, usage: rite, ceremony, formality (see **FORM, n.**).

usefulness. *Use, utility.

Ana. Value, *worth: *excellence, merit.

USUAL. Usual, customary, habitual, wonted, accustomed are synonymous when they mean familiar through frequent or regular repetition. **Usual** stresses the absence of strangeness, and is applied to whatever is normally expected or happens in the ordinary course of events; as, they paid the *usual* fee; the *usual* meeting of the trustees; open for business as *usual*. "It appeared to him to be the *usual* castle, and he saw nothing unusual in the manner of his reception by the *usual* old lord" (*H. Adams*). "It's *usual* for a woman to find her life in her husband's" (*M. Austin*). **Customary** often implies characteristic or distinguishing quality, and is applied to that which is according to the usual or prevailing practices, conventions, usages, and the like, of a particular individual or, especially, of a particular community. "The *customary* rule on most lines was dinner jackets in the evening" (*V. Heiser*). "We had no idea how men behave when their *customary* way of life is disrupted" (*Lippmann*). Sometimes, invariable or fixed quality is implied. "The assumption that whatever has been *customary* must be bad, and that anything which is or seems novel must be good" (*Grandgent*). **Habitual** implies settled or established practice, and is commonly applied to the acts or qualities of an individual confirmed in a habit; as, his

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

habitual energy; a *habitual* smile. "A trace of acidity which began, before he left college, to flavour his comments on human affairs, and has since become *habitual* to him" (*Quiller-Couch*). *Wonted*, now regarded as a bookish word, stresses habituation, and is applied to that which is the result of habit or which represents a custom; as, he preserved his *wonted* demeanor; they returned at their *wonted* hour. *Accustomed* is often interchangeable with *wonted* and *customary*, but it is a more familiar word than the first and is weaker in its suggestions of custom and fixity than the second; as, to work with *accustomed* diligence. "Pausing to fling out an arm with some familiar *accustomed* gesture" (*Quiller-Couch*).
Ana. *Regular, natural, normal, typical: *common, ordinary, familiar: prevalent, *prevailing, rife, current.
usurp. *Arrogate, pre-empt, appropriate, confiscate.
Ana. Seize, *take, grab, grasp: *take, assume.
Ant. Abdicate.

utensil. *Implement, tool, instrument, appliance.

Ana. *Device, contrivance, contraption, gadget.

utility. *Use, usefulness.

Ana. Suitability, fitness, appropriateness (see corresponding adjectives at *FIT*): value, *worth.

utilize. *Use, employ, apply, avail oneself of.

Ana. *Benefit, profit: *handle, manipulate, ply, wield: forward, further, promote, *advance.

utopian. *Ambitious, pretentious.

Ana. Impracticable, unfeasible, impossible (see affirmative adjectives at *POSSIBLE*): visionary, quixotic, chimerical (see *IMAGINARY*): ideal, transcendental, *abstract.

utter. *Express, vent, voice, broach, air, ventilate.

Ana. Enunciate, articulate, *pronounce: *reveal, disclose, discover, divulge: *declare, announce, publish, advertise.

V

vacant. *Empty, blank, void, vacuous.

Ana. *Bare, barren: destitute, void, *devoid: idiotic, imbecilic, foolish (see corresponding nouns at *FOOL*).

Con. *Full, complete, replete.

vacate. *Annul, abrogate, void, avoid, quash.

vacillate. *Hesitate, waver, falter.

Ana. Fluctuate, sway, oscillate (see *SWING*): *demur, scruple, boggle.

vacuous. *Empty, vacant, blank, void.

Ana. Barren, *bare: inane, wishy-washy, *insipid.

Con. *Full, replete.

vacuum, n. Void, cavity, *hole, hollow, pocket.

vagabond, n. *Vagabond, vagrant, truant, tramp, trumper, hobo, bum, stiff, swagman (or swagsman), sundowner* are here considered as meaning one given to wandering at will or as a habit. *Vagabond* and *vagrant* came into use in English in the 15th century as terms denoting a person without fixed home or settled occupation, who wandered from place to place, depending for a livelihood on begging or other disreputable and even dishonest practices. Both were derogatory, sometimes abusive, terms. *Vagabond*, the far commoner term in current literary and general use, though still usually derogatory, now often, because of its emphasis (even stronger in the verb than in the noun) on the mere fact of wandering, implies merely a carefree fondness for a roaming life; as, "That young *vagabond* of genius [Rousseau]" (*L. P. Smith*); spending several happy years as a *vagabond* in the capitals of Europe before settling down to a business career in New York; cf. *vagabonding* about the world. From the first, *vagrant* appears to have been the preferred inclusive legal term; as, "If it shall appear . . . such man . . . to have been a *vagrant* and *vagabond* or idle person" (*Laws of England: 1 Edward VI*); "idle and disorderly persons, rogues and *vagabonds*, incorrigible rogues and other *vagrants*" (*5 George IV*). Though still in general use, it is now chiefly a legal term, especially in Great Britain and various states of the United States, applying to a person without fixed or known residence whose habits or acts are such that he or she is likely to become a public menace or a public charge; as, to be arrested as a *vagrant*; the jail is the winter home of many *vagrants*. Even in general use, the term now carries much stronger implications of disreputableness and

waywardness than *vagabond*. *Truant*, an older word than the preceding terms, originally carried a weaker suggestion of vagabondage, or roving, but as strong an implication of laziness, idleness, and beggary. In later times, it came to carry as its strongest implication the habit of wandering away from where one ought to be or of loitering when one ought to be elsewhere, especially and now almost exclusively, at school; as, an officer detailed to capture boys who are *truants* from school. "The village master . . . A man severe he was . . . I knew him well, and every *truant* knew" (*Goldsmith*). *Tramp* (or the now rare *tramp*) is the ordinary colloquial term for *vagabond* or *vagrant* in the early sense of either word: in general use it applies to any such person whether he moves about in search of work, especially seasonal work, or whether he lives by beggary and thievery. "Whoever, not being under seventeen, a blind person or a person asking charity within his own town, roves about from place to place begging, or living without labor or visible means of support, shall be deemed a *tramp*" (*General Laws of Massachusetts*). *Hobo* and *bum* are slang terms of U. S. origin. The latter applies to a lazy, idle, and often drunken, good-for-nothing, who will not work but habitually sponges on others. The former has not yet acquired fixed meaning. It has been variously distinguished from *tramp*, sometimes in terms of willingness to work, sometimes in terms of methods of travel, the *tramp* being then taken as one who typically tramps the roads, the *hobo* as one who typically rides surreptitiously on freight trains. Perhaps the commonest application of *hobo* is to the migratory worker who roves about following seasonal occupations such as harvesting and crop picking. The following quotations illustrate the lack of general agreement: "The difference between *hoboes*, *tramps* and '*bums*' was defined at a meeting of the International Brotherhood Welfare Association . . . *hoboes* are traveling workers, *tramps* are traveling shirkers and *bums* are stationary shirkers" (*Cleveland Plain Dealer*); "the first strict definition [of *hobo*] . . . was that given by Josiah Flynt . . . who declared that '*hobo*' is the distinctive name for such a tramp as will not in any case work . . . Now you are promulgating a directly opposite limitation for '*hobo*.' My conclusion is that '*hobo*' has as yet all the indefiniteness of slang" (*The Nation*); "The

word *hobo*... in its more general... sense... is the name now given... to all the human flotsam and jetsam that floats on the outer fringes of society" (*American Mercury*). "In Western parlance a *hobo* is not a *tramp*. A *hobo* is a migratory laborer, who carries his blankets on his back, looking for work. A picturesque Western synonym more accurately describes him—he is often known as a 'blanket *stiff*'" (*World's Work*). The slang term *stiff*, used generically to denote a person, especially a man, has sometimes the implications of *bum* (as, "there are a large number of '*stiffs*' in this town, getting help from all sorts of charities, who... should be made to work"—*Rand Daily Mail*), but, as here considered, applies chiefly to migratory workers and to roustabouts, especially on cattle ships. The term is often qualified; as, *cattle stiff*; *harvest stiff*; *working stiff*; *blanket or bindle stiff* (one who carries with him his own roll of bedding). In Australian slang, the migratory worker who tramps the "bush" looking for work is termed a *swagman* from the fact that he carries on his back or shoulder a long roll of clothing and bedding, variously termed a *swag*, *drum*, or *bluey* (hence, to "hump bluey," i.e., to carry a swag; to tramp about seeking work). The swagman making a practice of arriving at sundown at a station and asking for food and shelter is called a *sundowner*, a term used also in South Africa with similar application. "*Swagsmen* too, genuine, or only '*sundowners*,'—men who loaf about till sunset, and then come in with the demand for the unrefusable 'rations'" (*F. W. L. Adams*).

Ana. Wanderer, roamer, rover (see corresponding verbs at *WANDER*).

vagary. *Caprice, freak, whim, whimsey, crotchet.

Ana. *Mood, humor, temper, vein: *fancy, fantasy, dream, daydream: notion, *idea.

vagrant, n. *Vagabond, truant, tramp, hobo, bum, stiff, swagman, sundowner.

Ana. Wanderer, roamer, rover (see corresponding verbs at *WANDER*).

vagrant, adj. *Itinerant, peripatetic, ambulatory, ambulant, nomadic.

Ana. Moving, shifting (see *MOVE, v.*): wandering, roaming, roving, rambling, straying, ranging (see *WANDER*). strolling, sauntering (see *SAUNTER*).

vague. *Obscure, dark, enigmatic, cryptic, ambiguous, equivocal.

Ana. *Formless, unformed, inchoate, amorphous: *doubtful, dubious: abstruse, *recondite.

Ant. Definite: specific: lucid. — **Con.** *Clear, perspicuous: express, *explicit.

vain. 1 *Vain, nugatory, otiose, idle, empty, hollow* come into comparison when they mean devoid of worth or significance. That is *vain* (see also *FUTILE*) which is devoid of all value, either absolutely, because worthless, superfluous, or unprofitable, or relatively, because there are other things which are of infinitely greater value, greater necessity, or greater profitability; as, "Let no man deceive you with *vain* words" (*Ephesians* v. 6); "*Vain* pleasures of luxurious life. For ever with yourselves at strife" (*Wordsworth*); "Yet... how *vain* it was! All my bitterness and hatred and defiance were... no more than the whisper of a leaf, the light whirr of an insect's wing" (*Hudson*). That is *nugatory* which is trifling or insignificant, or (often) inoperative; as, "representing all titles... as *nugatory* and superfluous" (*Southey*); "limiting the right to pass laws for the execution of the granted powers, to such as are indispensable, and without which the power would be *nugatory*" (*Ch. Just. Marshall*); "The book is so one-sided that as a constructive contribution it is *nugatory*" (*Times Lit.*

Supplement). That is *otiose* which has no excuse for being, or serves no purpose, and which, therefore, is usually an encumbrance or a superfluity; as, "mummified customs that have long outlasted their usefulness, and *otiose* dogmas that have long lost their vitality" (*Inge*); "it ought to be comparatively easy to decide... what kinds of criticism are useful and what are *otiose*" (*T. S. Eliot*); "How far Sir Austen Chamberlain would have risen without his father is... an unanswerable and *otiose* question" (*Times Lit. Supplement*). That is *idle* which has no solidity, either being baseless or groundless or being incapable of having any worthwhile effects or result; as, *idle* theorizing; *idle* dreams. "He had often said to me: 'I am not long for this world,' and I had thought his words *idle*. Now I knew they were true" (*Joyce*). "It is *idle* to illustrate further, because to those who agree with me I am uttering commonplaces and to those who disagree I am ignoring the necessary foundations of thought" (*Justice Holmes*). That is *empty* or *hollow* that is destitute of substance or reality and is therefore only apparently or deceptively sound, real, worthwhile, genuine, sincere, or the like; as, *empty* pleasures; *empty* threats; *empty* promises; a *hollow* victory; *hollow* reasoning; a *hollow* friend.

Ana. Worthless, valueless (see affirmative nouns at *WORTH*): ineffectual, *ineffective, inefficacious: fruitless, bootless, *futile, abortive.

Con. Effectual, *effective, efficacious.

2 *Futile, fruitless, bootless, abortive.

Ana. *Ineffective, ineffectual, inefficacious: trivial, trifling, puny, *petty, paltry: delusive, delusory, *misleading.

3 Proud, vainglorious. See under *PRIDE, n.*

Ana. Self-satisfied, self-complacent, *complacent, prigish, smug: conceited, egoistic, egotistic (see corresponding nouns at *CONCEIT*).

Con. *Humble, meek, modest: diffident, *shy, bashful.

vainglorious. Proud, vain. See under *PRIDE, n.*

Ana. Arrogant, haughty, supercilious, disdainful, insolent, *proud: boasting or boastful, bragging, vaunting, gasconading (see corresponding verbs at *BOAST*).

vainglory. *Pride, vanity.

Ana. Pomp, *display, parade: flaunting, parading, exhibition (see corresponding verbs at *SHOW*): rhapsody, rodomontade, rant, *bombast.

valediction, n. *Valediction, valedictory* agree in meaning a farewell, especially a formal farewell. *Valediction* has always been a learned word; as, "Their last *valediction*, thrice uttered by the attendants, was also very solemn" (*Browne*); "A *Valediction* forbidding Mourning" (*Donne*). *Valedictory*, also a learned term, has come into common use in the United States, where it is ordinarily applied to a commencement farewell oration, usually written and delivered by the highest-ranking student of the graduating class; as, to deliver the *valedictory* at a college commencement.

valedictory, n. *Valediction.

valiant. Valorous, doughty, *brave, courageous, bold, audacious, dauntless, undaunted, intrepid.

Ana. *Formidable, redoubtable: stout, sturdy, tenacious, stalwart (see *STRONG*): indomitable, unconquerable, *invincible.

Ant. Timid: dastardly.

valid. Valid, sound, cogent, convincing, telling come into comparison especially when applied directly or indirectly to arguments, reasons, principles, processes of thought, or the like, or the presentation of arguments, principles, ideas, etc., and mean having or manifesting the power to impress themselves on others as right and well-grounded. That is *valid*, in the most general sense of the word,

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

against which no objections can be maintained, because it conforms strictly to the law or regulations, as of the state or the church (as, to hold a *valid* title to a piece of property; a *valid* ordination; a *valid* marriage), or because it is supported or justified by facts and correct reasoning (as, a *valid* argument; *valid* evidence; "universally *valid* principles"—Inge; "You might have had to decline that berth for some very *valid* reason. From sheer necessity perhaps"—Conrad), or, less often, because it is fully in accordance with claims or promises made for it and is entirely effectual or efficacious (as, a *valid* method of testing intelligence; "'art for art's sake' is still *valid* in so far as it can be taken as an exhortation to the artist to stick to his job; it never was and never can be *valid* for the spectator, reader or auditor"—T. S. Eliot). A person or a thing is *sound* that is free from error or fault in his or its processes of thought and that avoids fallacies, insufficient evidence, hasty conclusions, superficiality, or the like. The term not only suggests flawlessness in reasoning but solidity in the grounds upon which it is based; as, a *sound* thinker; "his assurance that he had never used an argument which he did not believe to be *sound*" (Inge); "To admit... that reason cannot extend into the religious sphere is absolutely *sound* so long as we realise that reason has a coordinate right to lay down the rules in its own sphere of intelligence" (H. Ellis). That is *cogent* or *convincing* which compels mental assent. But *cogent* stresses a power or force resident in the argument, reasoning, or the like, such as validity or soundness, that makes it conclusive (cf. CONCLUSIVE) and *convincing* suggests a power to overcome doubt, opposition, reluctance to accept, or the like; as, "the remarks of Gibbon [on universities and their degrees] are still... *cogent*" (R. Aldington); "there are other ways of making a thing... *convincing*... besides merely appealing to one's logic and sense of fact" (Babbitt); "So expressed, the argument does not sound strongly *convincing*; but it is really *cogent*, and the conclusion is *sound*" (Karl K. Darrow). That is *telling* which produces at once the desired effect: frequently the term implies the compelling of assent but it seldom suggests soundness or cogency though, in general, it does not deny the existence of these qualities (as, the first speaker for the affirmative used far more *telling* arguments than the second speaker; every point made by the prosecuting attorney was *telling*): as often, however, the term is applied to words, phrases, tones of expression, methods, and the like, which convince, persuade, win admiration, or the like, because of their pertinency, their suitability, or their forcibleness (as, "a *telling* illustration of what Darwin unintentionally did to the minds of his disciples"—Shaw; "such *telling* effects of contrast as the Japanese [artists] produced by an empty space"—Binyon).

Ana. *Conclusive, determinative, definitive, decisive: *effective, effectual: legal, *lawful, licit: *logical, analytical, subtle.

Ant. Fallacious, sophistical.

validate. *Confirm, authenticate, substantiate, verify, corroborate.

Ana. *Certify, attest, witness, vouch for.

Ant. Invalidate.

valor or valour. *Heroism, prowess, gallantry.

Ana. *Courage, mettle, tenacity, spirit, resolution: indomitableness, unconquerableness, invincibility (see corresponding adjectives at INVINCIBLE): *fortitude, guts, sand, backbone.

valorous. Valiant, intrepid, *brave, courageous, dauntless, undaunted, bold, audacious, doughty.

Ana. Venturous, venturesome, daring (see ADVENTUROUS): stout, sturdy, tenacious, stalwart, tough, *strong.

valuable, adj. Precious, invaluable, priceless, *costly, expensive, dear.

Ana. Estimated, appraised, evaluated (see ESTIMATE): valued, appreciated, prized, treasured (see APPRECIATE): esteemed, admired, respected (see corresponding verbs under REGARD, n.).

value, n. *Worth.

Ana. *Price, charge, cost, expense: *importance, consequence, significance, weight: *use, usefulness, utility.

value, v. 1 *Estimate, appraise, evaluate, rate, assess, assay.

Ana. *Calculate, compute, reckon: *judge, adjudge, adjudicate.

2 Prize, treasure, *appreciate, cherish.

Ana. Esteem, respect, admire (see under REGARD, n.): love, enjoy (see LIKE): *revere, reverence, venerate.

vanity. *Pride, vainglory.

Ana. Self-esteem, self-love, *conceit, egotism, egoism, amour-propre: complacency, self-complacency, self-satisfaction, smugishness, priggishness (see corresponding adjectives at COMPLACENT): show, ostentation, pomp, pretense (see corresponding adjectives at SHOWY).

vanquish. *Conquer, defeat, beat, lick, subdue, subjugate, reduce, overcome, surmount, overthrow, rout.

Ana. *Frustrate, foil, outwit, circumvent: *overturn, subvert.

Con. Surrender, submit, capitulate (see corresponding nouns at SURRENDER): *yield, succumb.

vanquisher. *Victor, conqueror, winner, champion.

vapid. *Inspid, flat, jejune, banal, wishy-washy, inane.

Ana. *Soft, bland, gentle, mild: *tame, subdued, submissive: mawkish, maudlin, soppy, slushy, mushy, *sentimental.

Con. Racy, spicy, *pungent, piquant: trenchant, crisp, *incisive: *expressive, significant, pregnant, meaningful.

vapors or vapours. *Sadness, depression, melancholy, melancholia, dejection, gloom, blues, dumps.

variable, adj. *Changeable, protean, changeful, mutable.

Ana. *Fitful, spasmodic: fickle, mercurial, unstable, *inconstant, capricious: mobile, *movable.

Ant. Constant: equitable.

variance. *Discord, contention, dissension, strife, conflict.

Ana. Difference, diversity, divergency, disparateness (see corresponding adjectives at DIFFERENT): separation, division, severing, sundering (see corresponding verbs at SEPARATE): incongruousness, uncongeniality, incompatibility, discordance, discrepancy (see corresponding adjectives at INCONSONANT).

variation. 1 Change, alteration, modification. See under CHANGE, v.

Ana. *Variety, diversity: difference, divergence, *dis-similarity: *deviation, deflection, aberration.

2 **Variation, adaptation, mutation, modification** as used in biology are terms of overlapping meanings and are therefore frequently confused in their applications.

Variation, the most inclusive of these terms, denotes any divergence in structural or physiological features or peculiarities from those typical of individuals of the same species or from those of parents. **Adaptation** is applied to the process whereby a change or changes in structural or physiological features or peculiarities occur in an organism fitting it for existence under the conditions of its environment. The term suggests both fitness for making and ability to make adjustments. Thus, the thick epidermis and waxy coating of desert plants diminish transpiration and are therefore the results of

adaptation to a dry environment; the tanning of the skin in human beings is the result of *adaptation* to bright sunlight. *Mutation* designates a sudden variation in which the offspring differs from its parents in some well-marked feature or features that it may in turn transmit to offspring. The cause of such a variation is usually obscure. *Modification* in strict use applies only to a noninheritable variation in an organism that is caused by the influence of its environment, such as the highly developed muscles of an athlete.

variety. *Variety, diversity* come into comparison when they are used in reference to a group, class, or complex whole and denote the state or quality of being composed of different parts, elements, individuals, or the like. *Variety* often implies that the things which differ are fundamentally alike and belong to the same class or category, their differences representing distinctions in individuals or kinds (as, in that family there is great *variety* as well as great similarity in the individuals; there is more *variety* in some species of plants than in others) but it may imply that the things which differ are very far apart in form, character, location, and the like, yet are related because they contribute to the same end or play a part in the formation of the same whole (as, "as the world... Where order in *variety* we see, And where, tho' all things differ, all agree"—*Pope*; "Most workers would prefer some *variety* in their work, but they cannot get it"—*J. A. Hobson*). *Diversity*, on the other hand, though often used interchangeably with *variety*, distinctively stresses the marked difference or divergence of the individuals, parts, or elements, and seldom suggests even a class or categorical likeness; as, the great *diversity* among human beings; *Montaigne* has said that "the most universal quality is *diversity*"; "when Babel was confounded, and the great confederacy... was split into *diversity* of tongues" (*Cowper*).

Ana. *Dissimilarity, unlikeness, difference, divergence: multifariousness, variousness (see corresponding adjectives at **MANY**): miscellaneousness or miscellany, heterogeneousness or heterogeneity, assortedness or assortment (see corresponding adjectives at **MISCELLANEOUS**).

various. 1 *Different, diverse, divergent, disparate.

Ana. *Distinct, separate: distinctive, peculiar, individual (see **CHARACTERISTIC**): varying, changing (see **CHANGE, v.**).

Ant. Uniform: cognate.

2 *Many, several, sundry, divers, numerous, manifold, multifold, multifarious.

Ana. *Miscellaneous, heterogeneous, assorted.

Con. *Same, identical, equivalent, equal: *similar, alike, like.

vary. *Change, alter, modify.

Ana. Deviate, diverge, digress, depart (see **SWERVE**): differ with, differ from (see **DIFFER**): *transform, metamorphose, convert.

vassal. Thrall, *serf, villain, slave, bondslave, bondsman, bondman, peon, Helot.

vast. Immense, *enormous, huge, gigantic, giant, gigantic, colossal, mammoth, elephantine, titanic, herculean, Cyclopean, Antaeus, Gargantuan, Brobdingnagian.

Ana. Stupendous, tremendous, prodigious, *monstrous: *large, big, great: *spacious, capacious.

vaunt, v. *Boast, brag, crow, gasconade.

Ana. Parade, flaunt, exhibit, display, *show: magnify, aggrandize, *exalt.

veer. *Swerve, deviate, depart, digress, diverge.

Ana. Shift, transfer, *move: *turn, divert, deflect, sheer.

vehement. *Intense.

Ana. *Fierce, truculent, ferocious: furious, frenzied (see corresponding nouns at **INSPIRATION**): fervid, perfervid, fervent, ardent, *impassioned, passionate: forcible, forceful, *powerful, potent.

vehicle. *Means, instrument, instrumentality, agent, agency, medium, organ, channel.

vein. 1 *Mood, humor, temper.

Ana. *Disposition, temper, complexion, temperament.

2 Strain, streak, *touch, suggestion, suspicion, soupçon, tincture, tinge, shade, smack, spice, dash.

velocity. *Speed, momentum, impetus, pace, headway.

Ana. *Celerity, legerity, alacrity: *haste, hurry, expedition, dispatch.

velvety, velvet. Silken, satiny, glossy, slick, *sleek, glabrous.

venal. *Mercenary, hireling, hack, hackney.

Ana. Corrupt, nefarious, iniquitous, *vicious, infamous, flagitious: sordid, ignoble (see **MEAN, adj.**): purchasable, *vendible, salable.

vend. *Sell, barter, trade, auction.

vendible. *Vendible, purchasable, salable, marketable* come into comparison as meaning such as may be bought or sold. *Vendible*, though the least common, is the most comprehensive of these terms, for it may apply not only to commodities but also to persons, their talents, their honor, and the like, or to offices, privileges, rights, etc. Therefore, according to its application *vendible* may imply a fit condition for sale or of offering for sale (as, all the *vendible* coal produced by a mine; the berries will not be *vendible* for another two weeks), or a venal or corrupt character or use (as, *vendible* votes; *vendible* magistrates; *vendible* women such as prostitutes), or a being put up for sale (often venally or underhandedly) to the highest bidder (as, *vendible* titles; *vendible* honors). *Purchasable* applies only to that which may be bought or purchased: it is often used in reference to things which are rarely offered for sale or of whose existence one is not certain (as, he found to his delight that a first folio of Shakespeare's dramas was *purchasable*; defense needs will soon make some now common articles *unpurchasable*; such a tool as you describe is no longer *purchasable*). In another sense, it applies to things which are not offered for sale, yet may be bought (as, all goods on exhibition are *purchasable*; he admired the duke's pictures and guessed that some might be *purchasable*. In this sense, the term sometimes imputes a corrupt means of gaining what the purchaser desires; as, a *purchasable* office; a *purchasable* contract; *purchasable* privileges. *Salable* now rarely, and *marketable* practically never, implies corruption or venality. Both stress fitness for the market or the satisfaction of the conditions that will render the thing so described as ready for sale or as ready to find a buyer; as, each night the fruit dealer discarded all fruits which were not *salable*; *marketable* securities; a *salable* house; a useful and *marketable* product.

Ana. *Mercenary, hireling, hack, hackney, venal.

venerable. *Old, ancient, antique, antiquated, archaic, obsolete, antediluvian.

Ana. Venerated, revered, revered (see **REVERE**): *aged, old: *secular, agelong, centuried.

venerate. *Revere, reverence, worship, adore.

Ana. Esteem, respect, admire, regard (see under **REGARD, n.**): cherish, prize, treasure, value, *appreciate.

veneration. Reverence, worship, adoration. See under **REVERE, v.**

Ana. Deference, homage, obeisance, *honor.

vengeance. Revenge, retribution, *retaliation, reprisal.

Ana. Punishment, disciplining or discipline, castigation (see corresponding verbs at **PUNISH**): avenging, reveng-

ing (see AVENGE): requital, recompensing or recompense, repayment (see corresponding verbs at PAY).

vengeful. *Vindictive, revengeful.

Ana. Rancorous, inimical, hostile, antagonistic (see corresponding nouns at ENMITY): malevolent, spiteful, spiteful, *malicious, malignant.

venial. Venial, pardonable come into comparison when applied to faults, sins, errors, and the like, and mean of such a character as not to warrant punishment or the imposition of a penalty. Venial, which etymologically comes close to *forgivable*, in most use implies an opposition to *grave*, *serious*, *grievous*, and, in theological use, to *mortal* (see *mortal* under DEADLY): consequently, it often means *trifling*, or *not willful*, or *harmless*; as, "those who imagine that the sins, of which a deep sense was upon his mind, were merely such little *venial* trifles as pouring milk into his tea on Good Friday" (*Boswell*); "the *venial* indiscretions of youth" (*Southey*); "because what is therefore *venial* with them is sometimes grave with us and *vice versa*, it by no means follows that the French notion of what is right and what is wrong is any the less strict, precise, and universally binding than our own" (*Brownell*). Pardonable implies that such excuse or justification may be offered for the fault or error that it is not worthy of consideration; as, it is a *pardonable* error in a foreigner but not in a native; *pardonable* pride in his son; "her heart innocent of the most *pardonable* guile" (*Conrad*).

Ana. Heinous: mortal (*in R. C. theology*).

venom. *Poison, toxin, virus, bane.

venomous. *Poisonous, virulent, toxic, mephitic, pestilent, pestilential, miasmatic, miasmatic, miasmal.

Ana. Malignant, malign, malevolent (see MALICIOUS): baleful, malefic (see SINISTER): *pernicious, baneful, noxious, deleterious, detrimental.

vent, v. *Express, utter, voice, broach, air, ventilate.

Ana. *Reveal, disclose, discover, divulge: *assert, declare, aver, avow.

Ant. Bridle (sense 1). — **Con.** *Restrain, inhibit, check, curb: *suppress, repress.

ventilate. 1 *Aerate, oxygenate, carbonate.

2 *Express, vent, air, utter, voice, broach.

Ana. Expose, exhibit, display, *show: disclose, divulge, discover, *reveal: publish, advertise, broadcast (see DECLARE).

ventral. *Abdominal, anterior.

venturesome. *Adventurous, venturous, daring, daredevil, rash, reckless, temerarious, foolhardy.

Ana. Bold, audacious, intrepid, *brave: stout, sturdy, stalwart (see STRONG).

Con. *Timid, timorous: *cowardly, pusillanimous: *fearful, apprehensive, afraid.

venturous. *Adventurous, venturesome, daring, daredevil, rash, reckless, temerarious, foolhardy.

Ana. & **Con.** See those at VENTURESOME.

veracity. *Truth, verity, verisimilitude.

Ana. Integrity, probity, *honesty, honor.

veranda or verandah. Porch, piazza, portico, stoop, *balcony, gallery, loggia.

verbal. *Oral.

verbiage. Verbiage, redundancy, tautology, pleonasm, circumlocution, periphrasis are here considered chiefly as technical terms of rhetoric denoting a fault of style or a form or mode of expression involving the use of too many words. Verbiage may imply delight in words for their own sake, as for their sound, their color, their suggestions, and overindulgence in their use for these reasons: the term, however, more often suggests nothing more than a wordiness that tends to make what is written

pointless, meaningless, obscure, or unduly heavy reading; as, "A whole poem of that quality Burns cannot make; the rest, in the *Farewell to Nancy*, is *verbiage*" (*Arnold*); "the almost luscious richness of Aunt Phoebe's imagination, her florid *verbiage*, her note of sensuous defiance" (*H. G. Wells*). Redundancy does not in general carry the implications of expansiveness, floridity, or heaviness so often apparent in *verbiage*, because the term strictly implies merely the use of more words than are strictly needed, and therefore usually suggests a fault of style rather than a mode of expression. "You cannot call them [some lines of Jonson's] '*verbiage*'; they do not exhibit prolixity or redundancy or the other vices in the rhetoric books" (*T. S. Eliot*); "passages in which you might accuse them of almost infantine redundancy" (*C. E. Montague*). All the other terms name particular forms of redundancy, or an example illustrative of the particular fault. Tautology is needless or useless repetition of the same idea in different words; as, "Boldly dare" is *tautology*" (*Gray*); he cautioned his students to beware of such *tautologies* as "visible to the eye" or "audible to the ear." Pleonasm denotes a mode of expression in which syntactically unnecessary words are employed (such as "I saw it *with my own eyes*") omission of which would leave one's meaning intact: such expressions are sometimes regarded as pardonable from the point of view of emphasis and are often thought of as figures of speech; as, "It is a *pleonasm*, a figure usual in Scripture, by a multiplicity of expressions to signify one notable thing" (*South*). Circumlocution and periphrasis (the more bookish term) denote a roundabout or indirect way of saying a thing; as, "Somehow I can't relish that word Hockey. Can't you supply it by a *circumlocution*?" (*Lamb*); "This was not however a question to be asked point-blank, and I could not think of any effective *circumlocution*" (*Conrad*); "He was one of those anomalous practitioners in lower departments of the law who... on prudential reasons... deny themselves all indulgence in the luxury of too delicate a conscience (a *periphrasis* which might be abridged considerably)" (*De Quincey*). **Ana.** Wordiness, verboseness, prolixity, diffuseness (see corresponding adjectives at WORDY).

verbose. *Wordy, prolix, diffuse, redundant.

Ana. Grandiloquent, magniloquent, flowery, bombastic (see RHETORICAL): loquacious, voluble, garrulous, *talkative.

Ant. Laconic. — **Con.** *Concise, terse, succinct: compact, *close.

verge, n. Edge, rim, brim, brink, *border, margin.

Ana. Bound, *limit, end, confine: *circumference, perimeter, compass.

verify. Corroborate, substantiate, *confirm, authenticate, validate.

Ana. *Prove, test, try, demonstrate: *certify, attest, witness, vouch for: establish, settle (see SET, v.).

verisimilitude. *Truth, veracity, verity.

Ana. Agreement, accordance, harmonizing or harmony, correspondence (see corresponding verbs at AGREE): *likeness, similitude, resemblance.

veritable. *Authentic, genuine, bona fide.

Ana. Actual, *real, true.

Ant. Factitious.

verity. *Truth, veracity, verisimilitude.

vernacular. *Dialect, patois, lingo, jargon, cant, argot, patter, slang.

versatile. Versatile, many-sided, all-round (or all-around) are synonymous when they mean manifesting skill and ability in many different directions. Versatile stresses not only aptitude for many employments but facility in each or in turning from one to another; it

therefore usually implies a wide variety of interests or of skills. "Stevenson's spiritual and intellectual virtues have been partly frustrated by one additional virtue—that of artistic dexterity.... He suffered from his *versatility*" (*Chesterton*). **Many-sided** is rarely applied to a person or his work except at or after the culmination of his development; it stresses breadth of interests, as well as variety of gifts; as, the *many-sided* genius of Shakespeare. **All-round** implies completeness and symmetry of development as a human being and as an individual; it does not necessarily imply special gifts, nor great attainments, but ability to do oneself credit in every sphere of life, as in business, social life, public life, and the like. The word is also applied to persons who do not specialize in one branch of their chosen trade, profession, or the like; as, an *all-round* athlete.

Ana. Gifted, talented (see corresponding nouns at GIFT): accomplished, finished, *consummate: ready, apt, *quick, prompt.

verse, n. 1 **Verse, stanza** are frequently used interchangeably as designating a group of lines forming one of the divisions of a poem and typically, but far from invariably, following a fixed metrical (sometimes rhythmical) pattern. The use of *verse* in this sense is often derided not only because the term's earliest meaning in English is one of the metrical or rhythmical lines that comprise a stanza or an otherwise undivided poem, but also because the confusion of terms often makes for ambiguity. In careful technical use, *verse* is invariably employed in the sense of *line*; as, a stanza of eight *verses*; there are fourteen *verses* in a sonnet; the iambic pentameter is the most common *verse* in English poetry. However, there are certain reasons why the use of *verse* in the sense of *stanza* is allowable: this meaning is long established, having been acquired around 1300 from the Old French *vers* which carried the dual denotation: the use of it in reference to a stanza of a song, a ballad, and especially a hymn, is so widespread that *stanza* seems to many persons unduly formal or technical. However, when the construction of a poetic work is under consideration or prosody is the subject of discussion, the technical sense of *verse* is not only preferable but is practically obligatory.

2 *Paragraph, article, clause, plank, count.

versed. *Conversant.

Ana. *Learned, erudite, polymathic: informed, acquainted (see INFORM): intimate, *familiar.

versifier. *Poet, rhymmer, rhymester, poetaster, bard, minstrel, scop, gleeman, jongleur, troubadour, trouvère, minnesinger, scald.

version. 1 *Translation, paraphrase, metaphor, construe.

2 *Account, report, story, chronicle.

versus. *Against, con.

vertebrae. *Spine, backbone, chine.

vertex. *Apex.

vertical. **Vertical, perpendicular, plumb** agree in meaning situated at right angles to the plane of the horizon, or extending from that plane at such an angle. **Vertical** is applicable in geometry to lines, planes, circles, angles, and the like, irrespective of whether they rise above the horizon or fall below it. However, since the word etymologically suggests a relation to the vertex, or topmost point (see APEX, 1), it is used far more often when the thing so described actually extends upward from the plane of the horizon or from its base or support in such a direction that if its direction line were produced, it would reach the zenith; as, the *vertical* threads in a tapestry; the *vertical* rays of the sun; a *vertical* piston; the *vertical* walls of a room. **Vertical** is, of these terms, the most frequently

applied to abstractions and the most common in figurative use; as, *vertical* motion; *vertical* structure (i.e., in music, the structure of a composition in which two or more voices are viewed in respect to their harmonic relations rather than as independent melodies). **Perpendicular** (etymologically, hanging exactly straight, like a plumb line [Lat. *perpendicularum*]) is used as often, if not more often, of lines or planes that are at right angles to a plane that may be described as *horizontal*: in this sense it is often the preferred term in geometry where figures and drawings have little relation in position to the horizon or zenith. Otherwise, *perpendicular* differs from *vertical* in being normally applied to things that are concrete and extend upward or downward from the horizontal or both upward and downward; thus, one looks up or down the *perpendicular* face of a cliff; a *perpendicular* fall of water. Consequently, *perpendicular* is more often used loosely than *vertical* to suggest little more than precipitousness or extreme steepness or, humorously, in the case of human beings, stiffness and straightness of the line of one's back; as, a *perpendicular* ascent or descent; "a stiff *perpendicular* old maid" (*M. R. Milford*). **Plumb** is largely an artisan's (especially a carpenter's or mason's) term, used particularly in judging the exact verticality or perpendicularity of something by its conformity to the direction of a "plumb line"; as, they found no indication that the wall was not *plumb* (more often, colloquially, *out of plumb*).

Ant. Horizontal.

very. Selfsame, *same, identical, identic, equivalent, equal, tantamount.

vessel. Ship, *boat, craft, argosy.

vest, v. Robe, invest, array, apparel, *clothe, attire, tire, dress.

Ant. Divest.

vestibule. *Entry, entryway, hall, narthex, foyer, lobby, anteroom, antechamber.

vestige. *Trace, track, rack.

Ana. Print, imprint, *impression, stamp.

vesture. Apparel, raiment, array, *clothes, clothing, dress, attire, tire.

vex. Irk, *annoy, bother.

Ana. Chafe, fret, gall (see ABRABE): *irritate, exasperate, nettle, provoke.

Ant. Please, regale. — **Con.** *Pacify, appease, mollify, propitiate.

vials. Provisions, comestibles, *food, victuals, provender, fodder, forage, grub, eats, chow.

vibrate. *Swing, sway, oscillate, fluctuate, pendulate, waver, undulate.

Ana. *Pulsate, pulse, beat, throb, palpitate: quiver, quaver, tremble, *shake.

vice. 1 *Fault, failing, frailty, foible.

Ana. Defect, flaw, *blemish: infirmity, weakness (see corresponding adjectives at WEAK).

2 *Offense, sin, crime, scandal.

Ana. Transgression, trespass, violation, *breach, infraction: immorality (see corresponding adjective at IMMORAL): *evil, ill.

Ant. Virtue.

vicinage. Vicinity, neighborhood, district, *locality.

Ana. Section, sector (see PART, n.): region, *area.

vicinity. Neighborhood, vicinage, district, *locality.

Ana. Region, *area: section, sector (see PART, n.).

vicious. Vicious, villainous, iniquitous, nefarious, flagitious, infamous, corrupt, degenerate are here compared as meaning highly reprehensible or offensive in character, nature, or conduct. **Vicious** in its earliest and still most common sense implies an addition to or a

connection with vice or immorality: usually it suggests moral depravity and is the diametrical opposite of *virtuous*; as, to form *vicious* habits; a set of *vicious* women; "We cannot afford to have poor people anyhow, whether they be lazy or busy, drunken or sober, virtuous or *vicious*" (*Shaw*). Often, however, the word implies a particular highly reprehensible quality such as ugliness or violence of temper or deliberate cruelty (as, "The horseman delivered one last *vicious* cut with his whip"—*Kipling*; "He looked at the piece of meat and crust, and suddenly, in a *vicious* spurt of temper, flung it into the fire"—*D. H. Lawrence*), or a debasing (as, "the multiplication of critical books and essays may create . . . a *vicious* taste for reading about works of art instead of reading the works themselves"—*T. S. Eliot*), or complete vitiation by faults, defects, irremediable conditions, or the like (as, a *vicious* system of financing; a *vicious* style of writing; a *vicious* circle [i.e., a chain of circumstances, or of arguments, or of processes in an illness, in which one thing is logically or necessarily succeeded by a worse or equally bad thing, either in a continuous unending process or with the result of getting back to the point where the succession began and must start again]). *Villainous* is a more condemnatory term than *vicious*: it may suggest any of a number of qualities which can be associated with a villain, a rascal, or a knave, but usually, it is little more than an intensive of *vicious*; as, a *villainous* assault; a *villainous* practice; a *villainous* temper. *Iniquitous* is more fixed in its meaning than the preceding terms for, in discriminating use, it commonly implies the absence of all signs of justice or fairness or a complete indifference to the standards or principles which govern the conduct of civilized or law-abiding men; as, the *iniquitous* disregard of the rights of small nations; the *iniquitous* practices of slave traders; "These . . . precedents, they produce as authorities . . . to justify the most *iniquitous* opinions" (*Swift*). *Nefarious* is often used in place of *iniquitous* when one wishes an even more censorious form of expression. In very strict use, the word implies impiety in its deepest sense, or a breach of laws and traditions which have immemorially been honored, but in ordinary use, it commonly means inconceivably wicked; as, the *nefarious* neglect of their aged parents; "It [love for children] is still far too weak, or our politicians would not dare to sacrifice the life and happiness of innumerable children to their *nefarious* schemes" (*B. Russell*). *Flagitious* and *infamous* both imply shameful and scandalous badness or wickedness, but the former is somewhat less rhetorical and more closely descriptive than the latter; as, "Most people sell their souls, and live with a good conscience on the proceeds. To sell one's soul and not be paid for it . . . is perhaps in Heaven's eyes a less *flagitious* bargain" (*L. P. Smith*); "forced and *flagitious* bombast" (*T. S. Eliot*); "else, perhaps, I might have been entangled among deeds, Which, now, as *infamous*, I should abhor" (*Wordsworth*); "Alice . . . would have scouted as *infamous* any suggestion that her parent was more selfish than saintly" (*Shaw*). *Corrupt* (as here considered: see also *DEBASE*, 1) is applied chiefly to persons in an official capacity or to their acts, then implying a loss or lack of moral integrity or probity that makes one accessible to bribes, or other inducements to go contrary to their sworn duties or obligations; as, *corrupt* judges; a *corrupt* government; "bent only on turning each to his own personal advantage the now *corrupt* machinery of administration and law" (*G. L. Dickinson*). Frequently, however, the term is more generally applied, and suggests degradation or depravity; as, "Charles II came back . . . with tastes as *corrupt* as his morals" (*H. Reed*);

"humanity they knew to be *corrupt* and incompetent" (*H. Adams*). *Degenerate* stresses a descent and deterioration from an original or earlier high type or condition to one that is very low in the scale morally, intellectually, physically, artistically, or the like. However, it additionally carries so strong an implication of corruption, and so often suggests extreme viciousness that it is generally used to describe that which is especially reprehensible and offensive from the historical point of view or in comparison to other members of its class or other instances of the type; as, a family stock *degenerate* through generations of inbreeding; "What wise and valiant man would seek to free These, thus *degenerate*, by themselves enslaved . . . ?" (*Milton*); "What he has to say is inspired by revolt against the *degenerate* practice of his times" (*Binyon*); "we are solemnly warned that in the hands of modern writers language has fallen into a morbid state. It has become *degenerate*" (*H. Ellis*).

Ana. Debased, depraved, debauched, perverted (see *DEBASE*): dissolute, profligate, *abandoned, reprobate: lewd, lascivious, wanton, lecherous, libidinous (see *LICENTIOUS*).

Ant. Virtuous.

vicissitude. 1 *Change, alternation, mutation, permutation.

Ana. Turning, rotation, revolving or revolution (see corresponding verbs at *TURN*): reversal, transposition (see corresponding verbs at *REVERSE*): *succession, progression, sequence, series: *variety, diversity.

2 *Difficulty, hardship, rigor.

Ana. *Misfortune, mischance, adversity: *trial, tribulation, affliction.

victim. Victim, prey, quarry, ravin (or raven or ravine) come into comparison when they denote a person or animal killed or injured for the ends of the one who kills or injures. *Victim*, in its earliest sense (which is still found in religious and historical use), applies to a living creature, usually an animal, sometimes a man, that is killed and offered as a sacrifice to God or a god; as, "And thou shalt offer a calf for sin every day for expiation. And thou shalt cleanse the altar when thou hast offered the *victim* of expiation" (*Exodus* xxix. 36 [*Douay Version*]); "Unto the Paschal *Victim* [i.e., Christ] bring, Christians, your thankful offering" (*transl. of Easter Sequence at Mass, Manual of Prayers*). In general use, it applies to one who has been destroyed, ruined, seriously injured, or the like, by some ruthless person or power before which he has been helpless; as, the *victims* of war; the *victims* of a pestilence; "by persistently attacking an institution authors hope to persuade either its supporters or its *victims* to reform it" (*A. Huxley*); "Was the girl born to be a *victim*; to be always disliked and crushed as if she were too fine for this world?" (*Conrad*); "All are *victims* of circumstances; all have had characters warped in infancy and intelligence stunted at school" (*B. Russell*). *Prey* was originally applied to the spoils or booty taken in war or by violence: in current literal use it applies only to animals hunted and killed for food by more powerful carnivorous animals (the beasts of *prey* include lions, tigers, wolves, etc.; birds of *prey* include eagles, hawks, vultures, etc.); as, "The hungry family flew like vultures on their *prey*" (*Johnson*). In its extended sense *prey* applies to a victim of something that seizes or captures or fells in a manner suggestive of the action of a beast or bird of prey; as, "she was a *prey* to shoddy, facile emotions and moods, none of which had power to impel her to any action" (*R. Macaulay*); "people who make solemn talk about art and are the natural *prey* of the artists of *Punch*" (*C. E. Montague*). *Quarry*, in its most common current sense, is a hunting term referable to the victim

of a chase, especially, but not exclusively, by hounds or hawks, and may be applied to the animal as pursued as well as the animal as taken and destroyed after pursuit; as, "The startled quarry bounds amain. As fast the gallant greyhounds strain" (Scott); "With grain in their store-rooms, and mountain sheep and deer for their quarry, they rose gradually from the condition of savagery" (Cather). In extended use, *quarry* usually applies to a person or thing determined upon as a victim and vigorously and relentlessly pursued. "You think that you are Ann's suitor; that you are the pursuer and she the pursued. . . Fool: it is you who are the pursued, the marked-down quarry, the destined prey" (Shaw). *Ravin*, in the sense here considered, is now a poetic synonym of *prey*, suggesting more violence in the method of seizure and more cruelty and voracity in the destroying; as, "his deep devouring jaws Wide gaped . . . Through which into his dark abyss all ravin fell" (Spenser); "Nature, red in tooth and claw With ravine" (Tennyson).

victor. *Victor, winner, conqueror, champion, vanquisher* agree in denoting a person who gains the mastery in a contest, conflict, or competition. *Victor*, the more formal term, and *winner*, the ordinary term, usually stress the fact of defeating one's opponents: *victor* sometimes specifically connotes a triumph or a glorious proof of one's powers. The terms are applicable when the test is one of strength, strategy, skill, or endurance; as, he was the *winner* in the oratorical contest; "[He] march'd a *victor* from the verdant field" (Pope); "ever . . . *victor* at the tilt and tournament" (Tennyson); "And he who battles on her [Justice's] side, God, though he were ten times slain, Crowns him *victor* glorified, *Victor* over death and pain" (Emerson). *Conqueror* stresses the defeat or subjugation of an enemy or opposing force: the term is seldom used appropriately in friendly competitions such as in baseball, football, debating, or the like (where *winner* is the regular term), for it usually presupposes a warlike struggle or an attempt to crush by getting the upper hand; as, "England never did, nor never shall, Lie at the proud foot of a *conqueror*" (Shak.); "In all these things we are more than *conquerors* through him that loved us" (Romans viii. 37); "a savage *conqueror* stained in . . . blood" (Shelley). *Champion* (as here compared: see also under *SUPPORT*, *v.*) applies to the one who gains acknowledged supremacy through a contest or in a field of competition, as in an athletic contest or in a given sport. The term does not apply to a winner of any test, but only of a test in which one meets all of those of highest rank in the field or meets the one who holds the title of champion or one who challenges one's own right to hold that title; as, the *champion* of prizefighters; the World Series each year determines the baseball team which should bear the title of *champion*; world *champions* in various sports are discovered through the Olympic games. *Vanquisher* is often used in place of *conqueror* and, often humorously or somewhat hyperbolically, in place of *victor* or *winner*, when there is an intent to imply an overpowering or an overwhelming or crushing defeat; as, "Sleep, the universal *vanquisher*" (Sir G. Young); "But I shall rise victorious, and subdue My *vanquisher*" (Milton).

victory. *Victory, conquest, triumph* come into comparison as meaning the result achieved by one who gains the mastery in a contest or struggle. *Victory*, like *victor* (see *VICTOR*), implies the winning of a contest or struggle of any sort: it therefore clearly suggests the defeat of one's opponent but nothing more. *Conquest*, on the other hand, like *conqueror* (see under *VICTOR*), implies not only a victory over enemies, but the subjugation of one's opponents; as, "that dishonest *victory* At Chaeronea"

(Milton); "'Victory,' said Nelson, 'is not a name strong enough for such a scene'; he called it a *conquest*" (Southeby). Also, *conquest* may be used in reference to things, both material and immaterial, which are brought under one's control so that they may be used in the achievement of one's end or ends; as, "art is essentially a *conquest* of matter by the spirit" (Binyon). *Triumph*, in the special sense in which it is here considered, may apply either to a victory or a conquest, but only when that victory is a brilliant or decisive one, or the conquest is overwhelming; as, "His [Wellington's] *triumph* will be sung . . . far on in summers that we shall not see" (Tennyson); "He finds that 'honest and conscientious men are fully justified in hoping that *victory* will be with France and Britain.' But this logical conclusion he develops a step further than we like to go: 'non-combatants should desire the *triumph* of France and England.' *Victory* and *triumph* are not necessarily synonymous. . . *triumph* [suggests] a degree of success that clearly implies the full accomplishment of all their ends, good and bad" (The Commonwealth).

Ana. Winning, gaining (see GET): ascendancy, *supremacy: control, sway, dominion, command, *power, authority.

Ant. Defeat.

virtuals. *Food, viands, provisions, comestibles, provender, fodder, forage, grub, eats, chow.

view, n. 1 *Look, sight, glance, glimpse, peep, peek, coup d'oeil.

Ana. Scrutiny, scanning, inspection, examination (see under SCRUTINIZE).

2 *Opinion, belief, conviction, persuasion, sentiment.

Ana. *Idea, thought, concept, conception: inference, deduction, conclusion, judgment (see under INFER).

view, v. Survey, contemplate, observe, note, remark, notice, perceive, discern, *see, behold, descry, espy.

Ana. Scan, *scrutinize, inspect, examine: *consider, regard, account.

vle with. *Rival, compete with, emulate.

Ana. Cope, *contend, fight: strive, struggle, essay, endeavor (see ATTEMPT, *v.*).

viewpoint. *Point of view, standpoint, angle, slant.

Ana. *Position, stand, attitude: ground, *reason.

vigilant. Alert, wide-awake, *watchful.

Ana. Anxious, agog, keen, avid, *eager: circumspect, wary, chary, *cautious: *quick, ready, prompt: *sharp, keen, acute.

Con. *Negligent, neglectful, lax, slack, remiss: *forgetful, unmindful, oblivious.

vigorous. *Vigorous, energetic, strenuous, lusty, nervous* come into comparison when they mean having or manifesting great vitality and force. A person or thing is *vigorous* that has or manifests active strength or force and exhibits no signs of a depletion of the powers associated with freshness or robustness of body or mind; as, he was as *vigorous*, seemingly, as a youth half his age; a *vigorous*, fast-growing tree; the *vigorous* mother of a large family; "The remainder [of the poem] is *vigorous*, direct, and enthusiastic" (Landor); "Kate was a bold, *vigorous* thinker" (S. Anderson). A person or thing is *energetic* that displays abundant force or a capacity for great activity: the term does not necessarily connote the reserve vitality and force that *vigorous* implies and it sometimes even suggests an exertion of effort or a bustling activity that has little to do with inherent physical or mental strength; therefore, the term may be used to suggest compliment or, less often, slight depreciation; as, "to be counted among the strong, and not the merely *energetic*" (J. R. Lowell); "this gives employment to able and *energetic* men" (Shaw); "received by bustling male

assistants very *energetic* and rapid" (Bennett); "a less *energetic* expulsion of air from the lungs" (Grandgent). A person is *strenuous* that is continuously and zealously energetic: a thing is *strenuous* that makes constant demands on one's vigor, energy, and zeal: in both cases the term implies no flagging of ardor or no avoidance of the arduous; as, Theodore Roosevelt, the exponent of the *strenuous* life, was himself *strenuous*, both in work and play; "to love bondage more than liberty—Bondage with ease than *strenuous* liberty" (Milton); "the spirit of our religion calls for *strenuous* opposition to the current principles and practice of the world" (Inge). A person or thing is *lusty* that exhibits exuberant vigor or energy; as, "Therefore my age is as a *lusty* winter, Frosty, but kindly" (Shak.); "Pete Gurney was a *lusty* cock Turned sixty-three, but bright and hale" (Masefield); a *lusty* appetite; "lusty disputation" (Caine). A person or a thing (such as style or utterance) is *nervous* (in the sense here considered) that displays forcibleness, compactness, and strength that are the results of mental vigor and energy; as, "Miss Brontë? A good and *nervous* tho' coarse describer of a narrow landscape" (H. Kingsley). "Nervous, idiomatic English" (W. D. Whitney); "Tyndale's own diction was singularly simple, energetic, *nervous*, and yet restrained" (Lower).

Ana. Virile, manly, manful (see MALE): *muscular, athletic, sinewy, husky: stout, sturdy, stalwart, *strong, tough.

Ant. Languorous: lethargic.

vile. *Base, low.

Ana. Depraved, corrupted, perverted, debased, debauched (see DEBASE): *coarse, vulgar, obscene, gross: foul, filthy, nasty, *dirty: *mean, abject, sordid. *offensive, repulsive, revolting, loathsome.

vilify. *Malign, traduce, asperse, calumniate, delame, slander, libel.

Ana. Abuse, outrage, mistreat, misuse: assail, *attack: revile, vituperate, berate (see SCOLD).

Ant. Eulogize.

villainous. *Vicious, iniquitous, nefarious, flagitious, infamous, corrupt, degenerate.

Ana. Debased, depraved, perverted (see DEBASE): atrocious, *outrageous, heinous: dissolute, profligate, *abandoned.

vilain. *Serf, thrall, vassal, slave, bondslave, bondsman, bondman, peon, Helot.

vindicate. 1 Justify, defend, *maintain, assert.

Ana. *Support, uphold, advocate: *avenge, revenge: resist, *oppose, combat.

2 Exonerate, *exculpate, absolve, acquit.

Ana. *Disprove, refute, confute: *defend, protect, shield, guard.

Ant. Calumniate.

vindictive. *Vindictive*, *revengeful*, *vengeful* are often used interchangeably, for they are close synonyms meaning having or manifesting a disposition to pay one back for a real or fancied wrong. *Vindictive*, however, in good use, commonly places more stress upon the unforgiving nature or temper of the persons involved than upon their actions, and may, therefore, be applied to those who have not, at the moment, any cause for revenge: occasionally, it is little more than an intensive of *spiteful*, *malicious*, *malevolent*, and the like; as, "You have *vindictive* people to deal with, and you have gone too far to be forgiven" (Burke); "There was nothing *vindictive* in his nature; but, if revenge came his way, it might as well be good" (Stevenson); "The Muses are *vindictive* virgins, and avenge themselves without mercy on those who weary of their charms" (L. P. Smith). *Revengeful* and *vengeful*, though applicable to a man's nature, carry a far

stronger reference to him as provoked to action or as about to act: *vengeful*, especially, may apply to his hand or arm, his sword, or any agent or weapon used in inflicting vengeance; as, "You know his nature, That he's *revengeful*, and I know his sword Hath a sharp edge" (Shak.); "the downcast look of dark and *revengeful* resolve" (Coleridge); "The queen incens'd, his services forgot, Leaves him a victim to the *vengeful* Scot" (Swift); "The proud oppressors fly the *vengeful* sword" (Pope).

Ana. Implacable, unrelenting, relentless, merciless, *grim: spiteful, despitful, *malicious, malignant, malign.

violation. *Breach, infraction, transgression, trespass, infringement, contravention.

Ana. *Offense, sin, vice, crime, scandal: desecration, *profanation, sacrilege, blasphemy: invading or invasion, encroachment, entrenchment (see corresponding verbs at TRESPASS).

violence. *Force, compulsion, coercion, duress, constraint, restraint.

Ana. Vehemence, intensity (see corresponding adjectives at INTENSE): *effort, exertion, pains, trouble: *attack, assault, onslaught, onset.

virago. *Virago*, *amazon*, *termagant*, *scold*, *shrew*, *vixen*, *barge* agree in meaning a woman of pugnacious temperament. *Virago* and *amazon* both suggest masculine or heroic stature and vigor; in earlier use both designated a female warrior. At present *virago* seldom implies heroic qualities, but rather fierceness of temper and a domineering nature. "To arms, to arms! the fierce *Virago* cries, And swift as lightning to the combat flies" (Pope). "The lust of power turned some of them into unsexed *viragos*, like Antony's wife Fulvia" (Buchan). *Amazon*, though still applied to one of a mythical race of women warriors, also designates an abnormally large and virile woman; it rarely suggests violence of temper. *Termagant*, though now seldom applied to any but a woman, carries over from its original application to a stock character of the medieval drama, a brawling violent Saracen deity, the implications of turbulence, boisterousness, and an uncontrollable temper.

The last four words are all designations of women who inflict their bad temper on others. *Scold* usually implies vulgarity and habitual abusiveness; as, "I know she is an irksome brawling *scold*" (Shak.); *shrew*, a bitter tongue and a nagging disposition; as, "those men... who are under the discipline of *shrews* at home" (Irving); *vixen*, a quick fiery temper and snappishness or considerable asperity; as, "A woman tropical, intense... She blended in a like degree The *vixen* and the devotee" (Whittier); *barge* (an Anglo-Irish word), frequent indulgence in scolding or faultfinding.

virgin, virginal. Maiden, boyish, *youthful, juvenile, puerile.

Ana. *Chaste, pure, modest, decent: fresh, *new.

Ant. Anile, senile.

virile. Manful, manly, *male, masculine, manlike, mannish.

Ant. Effeminate: impotent (sense 2).

virtual. *Implicit, constructive.

Ant. Actual.

virtually. *Virtually*, *practically*, *morally* are very close synonyms meaning not absolutely or actually, yet so nearly so that the difference is negligible. So close are these words in meaning that they (especially the first two) are often interchanged in ordinary use; discriminating writers, however, retain their historical implications and employ them, therefore, with better effect. *Virtually* implies that the difference is merely that between what a thing is in name or outward seeming and what it is in

fact, in essence, in effect, or, sometimes, in potentiality; as, the prime minister is *virtually* the ruler of his country; their father's request is *virtually* a command; the British contended that the American colonies were *virtually* represented. **Practically** implies a difference between what is enough for practical purposes, or from the point of view of use, value, effectiveness, and the like, and what satisfies the requirements formally or absolutely; as, badly spotted fruit is *practically* worthless; the Democratic nomination to a senatorship in some southern states is *practically* an election; a road is *practically* finished when traffic can pass over it freely and without interruptions. **Morally**, although it is less often used than *virtually* and *practically* in phrases such as "*morally* (virtually or practically) certain," and "*morally* (virtually or practically) impossible," is the best selection in such collocations. For *morally* implies a difference between what satisfies one's judgment and what is required for proof by law or by logic; as, the jurors were *morally* certain of the defendant's guilt, but owing to a lack of evidence, they were compelled to render a verdict of "not guilty." When *morally* qualifies words such as "impossible," it occurs in a statement of a conviction and is slightly less positive than "absolutely"; as, it is *morally* impossible to accomplish more under the circumstances.

virtue. 1 *Goodness, morality, rectitude.

Ana. Honor, *honesty, integrity, probity: *fidelity, piety, fealty, loyalty: righteousness, nobility, virtuousness (see corresponding adjectives at MORAL).

Ant. Vice.

2 *Excellence, merit, perfection.

Ana. *Worth, value: effectiveness, efficacy, effectualness (see corresponding adjectives at EFFECTIVE): strength, might, *power, force.

virtuoso. 1 Connoisseur, *aesthete, dilettante.

2 *Expert, adept, artist, dab, dabster, artiste, wizard.

virtuous. *Moral, ethical, righteous, noble.

Ana. Pure, *chaste, modest, decent: *upright, just, honorable.

Ant. Vicious.

virulent. *Poisonous, venomous, toxic, mephitic, pestilent, pestilential, miasmatic, miasmatic, miasmal.

Ana. *Deadly, mortal, fatal, lethal: *pernicious, noxious, baneful, deleterious: malignant, malign (see MALICIOUS).

virus. 1 *Poison, venom, toxin, bane.

2 *Germ, microbe, bacterium, bacillus, pathogen.

visage. *Face, countenance, physiognomy, mug, puss.

vision. 1 *Revelation, prophecy, apocalypse.

2 *Fancy, fantasy, phantasy, phantasm, dream, day-dream, nightmare.

Ana. Illusion, *delusion, hallucination, mirage: *imagination, fancy, fantasy.

visionary, adj. *Imaginary, fanciful, fantastic, chimerical, quixotic.

Ana. Romantic, *sentimental, maudlin: utopian, *ambitious, pretentious: ideal, transcendent, transcendental (see ABSTRACT): illusory, seeming, *apparent.

visit, n. Visit, visitation, call agree in meaning a coming to stay with another, usually for a brief time, as a courtesy, an act of friendship, or a business or professional duty. Visit applies not only to any such stay with another for any of the enumerated reasons (as, to pay a *visit* to a friend; to devote an afternoon weekly to *visits*; a physician's bill for *visits*; a welfare worker's *visit*) but also, to a more prolonged stay as a house guest, or in a place where one goes for purposes of rest, entertainment, sightseeing, or the like (as, a week's *visit* in a friend's summer home; to be off for a *visit* to Washington). **Visita-**

tion (as here compared: see also TRIAL, 2) is now chiefly in formal and official use where it is employed in reference to a visit such as to a church, a college, or a ship, made by one who is the superior, the superintendent, the supervisor, the legal inspector, or the like; as, the parochial *visitations* of a bishop; a *visitation* and search of a merchant ship can be made only by an authorized official. Consequently, the term may also be applied to anything that visits one, often by or as by the will of a superior power (as, "Ye gentle *visitations* of calm thought"—Shelley), or that is visited upon one and that is, usually, regarded as an affliction (as, "That going to see people may have different effects is shown in our use of the words '*visit*' and '*visitation*.' Whether a *visit* shall seem like a *visitation* depends a good deal on the visitor"—S. M. Crothers). Call applies only to the briefest possible visit, such as is made upon a person who is not a friend, but with whom one has social or official relations (as, a society woman must give a portion of her time to formal *calls*) or by a person in quest of business or of a business order (as, the morning *call* of the grocer's boy; a baker's *call*). The term, however, may be used in place of *visit* for a short social visit.

visitant. *Visitor, guest, caller.

visitation. 1 *Visit, call.

2 *Trial, tribulation, affliction, cross.

Ana. *Misfortune, mischance, adversity: calamity, catastrophe, *disaster: hardship, vicissitude (see DIFFICULTY).

visitor. Visitor, visitant, guest, caller come into comparison as meaning one who visits another or comes to pay a visit. Visitor is the general word applicable to anyone who comes under this description (as, there are *visitors* in the drawing room; summer *visitors*). It is, however, specifically applied to one who makes a friendly visit or one who comes in the cause of charity, social service, investigation, and the like; as, to entertain *visitors*; a frequent *visitor* at his friend's house; the *visitor* from the charitable organization found no one at home. **Visitant** now rarely applies to a human visitor. Some ornithologists and others use it in preference to *visitor*, which is also employed in this sense, of a migratory bird that comes only for a short stay in a given region; as, certain warblers are rare *visitants* in this locality. In general, however, the term is applied to a visitor who is or seems to be from another sphere such as heaven or hell; as, a supernatural *visitant*; "At the sound of this the *visitant* returned. . . . Markheim . . . thought he bore a likeness to himself: and always, like a lump of living terror, there lay in his bosom the conviction that this thing was not of the earth" (Stevenson). As compared with *visitor*, *guest* emphasizes the idea of hospitable entertainment: it applies therefore chiefly, but not invariably, to one who comes as a result of an invitation; as, they had ten *guests* at dinner; house *guests* (i.e., persons to whom one is host for at least overnight, but often longer); we shall have no *guests* until the children are perfectly well. The term "paying *guest*," or even *guest* alone, is now often used euphemistically in place of *lodger* or *boarder*, especially when social equality, social relations, or the like, is implied; as, the *guests* at a summer hotel. **Caller** is applicable not only to one who comes for a social or business call (see under VISIT) but to anyone regardless of his intentions who seeks entrance to one's home, office, or the like; as, she told her maid that she would not be at home to *callers* that day.

vital. 1 *Living, alive, quick, animate, animated.

Ana. *Vigorous, energetic, lusty: *active, live, dynamic.

2 Fundamental, *essential, cardinal.

Ana. Important, significant, consequential, weighty.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

momentous (see corresponding nouns at IMPORTANCE): indispensable, requisite, necessary, *needful.

vitalize. **Vitalize, energize, activate** agree in meaning to arouse to activity or to life something inert, latent, or arrested in its development. **Vitalize** implies restoration of vigor, freshness, or health, and is used chiefly in reference to persons or their powers and to the arts or their subject matter. "The other sisters were interested in Paul too, but the atrophy of years cannot be easily *vitalized*" (*Deland*). "Greek poetry [as translated by Gilbert Murray] will never have the slightest *vitalizing* effect upon English poetry" (*T. S. Eliot*). **Energize** implies the imparting of force, heat, electricity, or of any power that increases capacity for work; as, certain foods such as butter or chocolate have greater *energizing* power than others, such as lean meat; an electro-magnet is *energized* or *de-energized* by simply establishing or stopping the current in the coil. **Activate** stresses the influence of an external agent or influence. It is much used in the applied sciences with reference to any of several processes differing greatly in character but having in common for their aim or effect the production of beneficial activity not inherent in a thing, or undeveloped in it, or inert and requiring contact with some other substance or source of energy; as, to *activate* cod liver oil by exposure to sunlight so that it may have the desired physiological effect; certain enzymes are *activated* only when other enzymes are present. "[Osler] the *activating* spirit of the... Society" (*H. Cushing*).

Ana. Animate, *quicken, enliven, vivify: stimulate, galvanize, excite, *provoke.

Ant. Atrophy.

vitiate. *Debase, deprave, corrupt, pervert, debauch.

Ana. Pollute, defile, taint, *contaminate: degrade, demean, *abase: impair, spoil, *injure, damage: annul, invalidate, *nullify.

vitiated. Debased, depraved, corrupted, debauched, perverted. See under DEBASE.

Ana. Defiled, polluted, contaminated, taint (see CONTAMINATE): impaired, spoiled, injured (see INJURE): invalidated, annulled (see NULLIFY).

vituperate. Revile, berate, rate, upbraid, *scold, tongue-lash, jaw, bawl out, wig, rail.

Ana. Condemn, denounce, censure, blame, reprehend, reprobate (see CRITICIZE): vilify, asperse, traduce, *malign, calumniate: *execrate, objugate.

Con. *Commend, applaud, compliment: *praise, extol, eulogize.

vituperation. *Abuse, invective, obloquy, scurrility, billingsgate.

Ana. *Animadversion, aspersion, stricture, reflection: *attack, assault, onslaught, onset: condemnation, denunciation, censuring or censure (see corresponding verbs at CRITICIZE): vilifying or vilification, maligning, calumny (see corresponding verbs at MALIGN).

Ant. Acclaim, praise.

vituperative. *Abusive, opprobrious, contumelious, scurrilous, scurrile, scurril.

Ana. *Coarse, vulgar, gross, obscene: insulting, offending, outraging (see OFFEND): condemning or denunciatory, denouncing or denunciatory (see corresponding verbs at CRITICIZE).

vivacious. *Lively, animated, gay, sprightly.

Ana. Buoyant, effervescent, volatile (see ELASTIC): *merry, blithe, jocund: frolicsome, sportive, *playful.

Ant. Languid.

vivid. *Graphic, picturesque, pictorial.

Ana. *Sharp, keen, acute: *dramatic, dramaturgic, theatrical: *expressive, eloquent, meaningful: nervous, lusty, *vigorous: *clear, lucid, perspicuous.

Con. *Obscure, vague, enigmatic.

vivify. *Quicken, animate, enliven.

Ana. *Vitalize, energize, activate: *renew, restore, refresh: *stir, rouse, arouse: stimulate, galvanize, excite (see PROVOKE).

vixen. Shrew, scold, termagant, *virago, amazon, barge.

vocable, n. *Word, term.

vocabulary. *Language, phraseology, diction, phrasing, style.

vocal. 1 Vocal, articulate, oral agree in meaning uttered or having to do with utterance. **Vocal** implies the use of voice, but not necessarily of speech or language; thus, *vocal* sounds are sounds produced by any creature that has *vocal* organs; *vocal* music is contrasted with instrumental music because the musical tones are produced by the voice rather than evoked from a musical instrument. **Articulate** implies the use of distinct intelligible language; thus, speech is the faculty of uttering *articulate* sounds; *articulate* cries are those that are expressed in meaningful words rather than in meaningless sounds; the *articulate* fine arts are often called *belles-lettres*. "Constance nodded her head in thorough agreement. She did not trouble to go into *articulate* apologies" (*Bennett*). **Oral** implies the use of the mouth rather than the hand (as in writing, typing, or the like) in communicating one's thoughts, wishes, orders, questions, answers, or the like; as, an *oral* examination; an *oral* command; the tradition was handed down *orally*.

2 Vocal, articulate, fluent, eloquent, voluble, glib are here considered chiefly as applied to persons or to the expression of their thoughts and feelings, but in some cases as applied to those thoughts and feelings with reference to their capacity for expression. All of these words mean able to express oneself clearly or easily, or manifesting that ability; some of them also mean (when qualifying a thought or feeling) finding an outlet in expression. **Vocal** usually implies responsiveness to a stimulus to expression or freedom and spontaneity in voicing one's ideas or feelings. "Earth's millions daily fed, a world employed In gathering plenty yet to be enjoyed, Till gratitude grew *vocal* in the praise Of God" (*Cowper*). "This instantaneous indignation of the most impulsive and *vocal* of men was diligently concealed for at least six weeks, with reporters camped upon his doorstep day and night" (*Mencken*). **Articulate** is as often applied to thoughts and emotions with reference to their capacity for expression as to persons or their utterances. In either case, it implies the use of language (in speech or writing) which exactly and distinctly reveals or conveys whatever seeks expression; thus, deeply felt emotion is often not *articulate*; only highly *articulate* persons express their deepest emotions. "The deepest intuitions of a race are deposited in its art; no criticism can make these wholly *articulate*" (*Binyon*). "The primitive poet... was used by the community to make its spiritual needs *articulate*" (*Day Lewis*). **Fluent** stresses facility in utterance or in writing, and copiousness in the flow of words; unlike *vocal* and *articulate*, it refers to the manner of the expression, rather than to the matter seeking expression; as, a *fluent* writer or speaker. "It was his gift to be *fluent* on anything or nothing" (*Stevenson*). The word is often used in depreciation or contempt. "She went on a little less *fluently*, of which I was glad. *Fluency* and accuracy are a bad pair. I would rather people stumbled and stammered out their stories than pour them" (*R. Macaulay*). "Politically at the mercy of every bumptious adventurer and *fluent* charlatan" (*Shaw*). **Eloquent** usually implies fluency, but it also suggests the stimulus of powerful emotion and its expression in fervent and moving language; it is rightly applied not only to speakers, but to

writers, poets, and even, by extension, to things; as, to be *eloquent* in one's own behalf. "Of all the attempts to describe such [mystical] experiences these barely *articulate*, incoherent exclamations of Pascal—the intellectual, the philosopher, the master of language and style—are, for me, beyond all compare the most *eloquent* and the most realistic" (*Dom. C. Butler*). "Tully [that is, Cicero] was not so *eloquent* as thou, Thou nameless column with the buried base" (*Byron*). *Voluble*, was once not so derogatory in its connotations as it is now; in earlier use it implied not only fluency but an orotund or oratorical style marked by richness and smoothness of utterance. "Aged ears play truant at his tales... So sweet and *voluble* is his discourse" (*Shak.*). "The style of which is certainly not so melodious and *voluble* as that of Dryden's enchanting prose" (*J. Warton*). In current use, *voluble* and *glib* both imply loquacity. *Voluble* suggests a flow of language that is not easily stemmed; as, to indulge in *voluble* explanations; he grew *voluble* when he saw that he was not in danger of arrest. *Glib* implies such facility in utterance as to suggest superficiality or emptiness in that which is said, or slipperiness or untrustworthiness in the speaker; as, a *glib* reply; he has a *glib* tongue. "Only by forgetting their history is it possible to talk *glibly* of the French as unfitted by nature for self-government" (*Brownell*).

Ana. Expressing, voicing, venting (see *EXPRESS*, *v.*): *expressive, sententious, eloquent.

vocation. *Vocation*, *avocation* are often confused. *Vocation* denotes one's occupation or the work in which one is regularly employed or engaged, as a business, a profession, or a trade; as, to make an early choice of one's *vocation*. An *avocation* is an occupation in which one engages in one's leisure time or as subsidiary to one's vocation; as, he is a lawyer by *vocation*, but he has found time for *avocations* such as farming and lecturing. In its strict etymological meaning, an *avocation* is something which calls one away from one's ordinary pursuits; as, "interrupted eternally with these petty *avocations*" (*Scott*). This usage, however, is now rare.

vociferous. *Vociferous*, *clamorous*, *blatant*, *strident*, *boisterous*, *obstreperous* agree in meaning so loud and noisy, especially vocally, as to compel attention, often unwilling attention. *Vociferous* implies both loud and vehement cries or shouts: it often also suggests a deafening quality; as, "watermen, fishwomen, oysterwomen, and...all the *vociferous* inhabitants of both shores" (*Fielding*); "*vociferous* vindications of their innocence" (*Irving*); *vociferous* protests. *Clamorous* implies insistence as well as *vociferousness*: it usually suggests a determination to force acceptance of one's ideas, plans, policies, or the like; as, "I will be...more *clamorous* than a parrot against rain" (*Shak.*); "Sleep not, my country: though night is here, afar Your children of the morning are *clamorous* for war" (*J. E. Flecker*); "It was impossible to yield to her *clamorous* demands" (*A. Repplier*). *Blatant* implies a tendency to bellow or be conspicuously, offensively, or vulgarly noisy or clamorous; as, "They were heretics of the *blatant* sort, loud-mouthed and shallow-minded" (*Expositor*); "*Blatant* he bids the world bow down" (*Kipling*); "Building against our *blatant*, restless time An unseen, skillful, medieval wall" (*V. Lindsay*). *Strident* basically implies a harsh and discordant quality characteristic of some noises that are peculiarly disturbing to the auditory nerves: it has, however, so long been applied especially to loud, harsh voices or vocal sounds, that it now applies to anything which, like them, irresistibly and against one's will, forces itself upon one's attention; as, the colors are too *strident*; a *strident* protest against war; "There was no *strident* old voice to bid him do this or that; no orders to obey, no fierce and insane

fault-finding" (*Deland*). *Boisterous* in its common current sense retains its etymological implication of roughness and its acquired implication of violence, but it applies usually to persons or things that are also extremely noisy and turbulent, as though let loose from all restraint; as, *boisterous* children; *boisterous* revellers; *boisterous* merriment; "*boisterous* spring winds" (*Calder*). *Obstreperous* in its earliest and still not uncommon sense is closer to *vociferous* and *clamorous* than to *boisterous*, which is now, frequently, its nearer synonym. Its chief distinctive implication is resistance to or defiance of any power or any efforts that have restraint as their aim; as, "the most careless and *obstreperous* merriment" (*Johnson*); to allow children such freedom that they become *obstreperous* at play; "*obstreperous* in her praise" (*Milay*).

Ana. Noisy, sounding (see corresponding nouns at *SOUND*): vehement, *intense: bewildering, distracting (see *PUZZLE*, *v.*).

vogue. Mode, *fashion, style, fad, rage, craze, dernier cri, cry.

voice, v. *Express, utter, vent, broach, air, ventilate.

Ana. *Reveal, disclose, tell, discover, divulge: *communicate, impart: *speak, talk.

void, adj. 1 *Empty, vacant, blank, vacuous.

Ana. Exhausted, depleted, drained (see *DEplete*): *bare, barren: hollow, empty, nugatory, *vain.

2 *Devoid, destitute.

void, n. Vacuum, *hole, hollow, cavity, pocket.

Ana. Emptiness, vacancy, vacuity (see corresponding adjectives at *EMPTY*): abyss, *gulf, abysm.

void, v. Avoid, vacate, *annul, abrogate, quash.

volatile. Effervescent, buoyant, expansive, resilient, *elastic.

Ana. Unstable, mercurial, *inconstant, fickle, capricious: light-minded, frivolous, flippant, flighty (see corresponding nouns at *LIGHTNESS*): variable, *changeable, protean.

volatility. *Lightness, light-mindedness, levity, frivolity, flippancy, flightiness.

Ana. Vivaciousness or vivacity, gaiety, liveliness, animation, sprightliness (see corresponding adjectives at *LIVELY*): unstableness or instability, mercurialness, inconstancy (see corresponding adjectives at *INconstant*): variability, changeableness (see corresponding adjectives at *CHANGEable*).

volcano. *Mountain, mount, peak, alp, mesa.

volition. *Will, conation.

Ana. *Choice, election, option: *decision, determination.

Con. *Force, coercion, compulsion, duress.

volubility. Garrulity, loquacity, talkativeness. See under *TALKATIVE*.

Ana. Fluency, glibness, eloquence, articulateness (see corresponding adjectives at *VOCAL*).

voluble. 1 Fluent, glib, eloquent, *vocal, articulate.

Ana. Copious, abundant, *plentiful: *easy, facile, effortless, smooth.

Ant. Stuttering, stammering.

2 Garrulous, loquacious, *talkative.

Ant. Curt.

volume. 1 Magnitude, *size, extent, dimensions, area.

2 *Bulk, mass.

voluntary. *Voluntary*, *intentional*, *deliberate*, *willful* (or *wilful*), *willing* are here compared as meaning done, made, brought about, given, or the like, of one's own free will, and not by compulsion or coercion. *Voluntary*, which is the most widely applicable of these terms, often implies not only freedom from constraint, but freedom from the control of any influence that might suggest,

prompt, or incite action: it does not necessarily imply that these influences have not been operative, but it usually suggests that the decision is the result of one's free choice; as, a *voluntary* renunciation of one's inheritance; a *voluntary* confession. Often, the term carries another, sometimes a different, implication, such as that of spontaneity (as, *voluntary* contributions; "our *voluntary* service he requires not"—*Millon*), or, especially when the opposition is to *involuntary*, that of subjection to or regulation by the will (as, *voluntary* movements; *voluntary* muscles), or that of prior consideration and clear choice (as, *voluntary* manslaughter), or, in law, that of absence of any legal obligation or compulsion to do, make, etc. (as, *voluntary* bankruptcy), or of any valuable consideration in return for doing, making, etc. (as, a *voluntary* conveyance of property). *Intentional* applies chiefly to acts or processes entered into in order to achieve a desired end or purpose or to the end or purpose so willed or effected: the use of the word eliminates every suggestion of the possibility of accident or inadvertence; as, an *intentional* insult; a characteristic, such as a keen scent, evolved in a dog by *intentional* selection and breeding; "Not one in a thousand... perpetrates any *intentional* damage to fish, fowl, or flowers" (*Jefferies*). *Deliberate* (as here considered: see also *DELIBERATE*, 2; *SLOW*) adds the implication of full knowledge or full consciousness of the nature of one's intended act and a decision to go ahead in spite of such knowledge or consciousness; as, a *deliberate* falsehood; a *deliberate* sin; *deliberate* murder; a *deliberate* attempt to ruin a person's good name. *Willful* (as here considered: see also *UNRULY*) adds to *deliberate* the implications of a refusal to be taught, counseled, or commanded, and of an obstinate determination to follow one's own will or choice in full consciousness of the influences or arguments opposed to the attitude adopted or the action or deed contemplated; as, a *willful* murder; *willful* ignorance; his *willful* abuse of his children; a sin committed *willfully*; "To such perseverance in *willful* self-deception Elizabeth would make no reply" (*Austen*); "*willful* blindness to ascertained truth" (*Inge*). *Willing* carries, on the other hand, an implication of one or more characteristics such as agreeableness, openness of mind, absence of reluctance, or the like, that makes one ready or eager, without suggestion or without coercion, to accede to the wishes or instructions of others, or to do something or effect some end pleasing to them; as, "How curious is that instinct which makes each sex, in different ways, the *willing* slave of the other!" (*Jefferies*); *willing* service; a *willing* servant; "Where ears are *willing*, talk tends to be loud and long" (*A. Huxley*). *Ana.* Chosen, elected, opted (see *CHOOSE*): *free, independent, autonomous.

Ant. Involuntary: instinctive (sense 2). — *Con.* Compelled, coerced, forced (see *FORCE*, v.).

voluptuous. Luxurious, sybaritic, epicurean, *sensual, sensual.

Ana. Indulging or indulgent, pampering (see *correspond-*

ing verbs at *INDULGE*): *luxurious, opulent, sumptuous. *Ant.* Ascetic.

voracious. *Voracious, gluttonous, ravenous, ravening, rapacious* agree in meaning excessively greedy. *Voracious* implies the habit of gorging oneself with food or drink, or with anything that satisfies an excessive appetite of any sort; as, a *voracious* eater; the shark is one of the most *voracious* of fishes; a *voracious* reader; "*voracious* birds, that hotly bill and breed, and largely drink" (*Dryden*). *Gluttonous* differs from *voracious* chiefly in its emphasis on greediness in eating and in its common suggestions of delight in food and of eating past need to the point of satiety; as, *gluttonous* persons often are obese; "Though a Norman was not *gluttonous*, he was epicurean" (*Lyttton*). *Ravenous* implies excessive hunger and suggests violent or grasping methods of dealing with food or with whatever satisfies one's appetite; as, "He [Dr. Johnson] contracted a habit of eating with *ravenous* greediness... The sight of food affected him as it affects wild beasts and birds of prey" (*Macaulay*); "He had mad hungers that grew more *ravenous* as he fed them" (*Wilde*). *Ravening*, though sometimes employed in place of *ravenous*, often comes closer to *rapacious* in suggesting a violent tendency to seize or appropriate to oneself in the manner of a bird of prey or a predatory animal; as, "Beware of false prophets, which come to you in sheep's clothing, but inwardly they are *ravening* wolves" (*Matthew* vii. 15). *Rapacious* may imply the seizure of food (as, "*Rapacious* animals we hate: Kites, hawks, and wolves, deserve their fate"—*Gay*), but more often it suggests excessive and utterly selfish acquisitiveness or cupidity; as, "the Indians, who, though often *rapacious*, are devoid of avarice" (*Parkman*); "the European nations, arrogant, domineering, and *rapacious*, have done little to recommend the name of Christianity in Asia and Africa" (*Inge*).

Ana. Greedy, grasping, acquisitive, *covetous: satiating, sating, surfeiting, gorging (see *SATIATE*).

votary. *Addict, devotee, habitué, fiend, fan.

Ana. *Enthusiast, fanatic, zealot, bigot.

vote, n. *Suffrage, franchise, ballot.

vouch for. *Certify, attest, witness.

Ana. *Support, uphold: *confirm, substantiate, verify, corroborate.

vouchsafe. *Grant, accord, concede, award.

Ana. *Give, bestow, confer, present: condescend, deign, *stoop: *oblige, accommodate, favor.

voyage, n. *Journey, tour, trip, excursion, cruise, expedition, jaunt, pilgrimage.

vulgar. 1 *Common, ordinary, familiar, popular.

Ana. *Universal, general: *prevailing, prevalent, current, rife: *usual, customary: crude, *rude, rough: sordid, ignoble, *mean.

2 *Coarse, gross, obscene, ribald.

Ana. Low, *base, vile: *offensive, loathsome, repulsive, revolting: indelicate, indecent, *indecorous.

Ana. analogous words. *Ant.* antonyms. *Con.* contrasted words. See also explanatory notes facing page 1.

W

wabble. Variant of **WOBBLE**.

wage or wages. **Wage** or **wages**, **salary**, **stipend**, **fee**, **pay**, **hire**, **emolument**, **screw** are here compared as meaning the price paid a person for his labor or services.

Wage or **wages** applies chiefly to the amount paid daily or weekly for labor, especially labor that involves more physical than mental effort; as, a gardener's *wages*; a laundress's daily *wage*; the servant was promised good *wages*. **Salary** and **stipend** usually apply to the fixed compensation, commonly paid at longer intervals than wages, for services (often professional) which require training or ability: in general, *stipend* is less common in the United States than *salary* (as, teachers' *salaries*; the *salary* of a bank president) but it is the usual term in England (as, a teacher's *stipend*; "Many a parson has brought up a family on a *stipend* of seventy pounds a year"—*Shaw*). *Stipend*, however, is sometimes used in the United States in place of *salary* for the remuneration of a teacher, especially in a college, of a clergyman, or a magistrate; in Scotland it is used only of the salary of a clergyman. **Fee** applies to the price asked or paid for the services of a physician, lawyer, musician, artist, or the like, when such services are requested or required; as, to pay the surgeon's *fee* for a major operation; a lawyer's retaining *fee*; a pianist's *fee*. **Pay**, which is often general in its sense, may be equivalent especially to *wages* (as in *payday*, *pay roll*, etc.); more specifically, it is used with reference to soldiers; as, an officer on half *pay*. **Hire** is now archaic in the sense of remuneration for services (as, "The labourer is worthy of his *hire*"—*Luke* x. 7), although it still sometimes applies to the price paid for the use of another's property, money, or the like (as, the house will be let at a *hire* of fifty dollars a month; "[The writer] of promise lends his pen for small *hires*"—*Meredith*). **Emolument** is now chiefly bookish or humorous except in the plural, when it often means the financial reward of one's work or office; as, "the *emoluments* of a profession" (*Gibbon*); "A worthier successor wears his dignity and pockets his *emoluments*" (*N. Hawthorne*). **Screw** is British slang for wages or salary, especially the weekly wage of a clerk or shop employee.

Ana. Remuneration, recompensing or recompense (see corresponding verbs at **PAY**).

wager. *Bet, stake, pot, ante, blind.

waggish. Sportive, frolicsome, *playful, impish, mischievous, roguish, wanton.

Ana. Facetious, jocose, jocular, humorous, *witty: jovial, jolly (see **MERRY**): comic, comical, *laughable, droll, ludicrous, funny.

Con. *Serious, earnest, sober, grave, sedate, staid.

wail, v. Weep, *cry, whimper, blubber, keen.

Ana. Mourn, *grieve: lament, bewail, bemoan, *deplore: moan, sob, *sigh, groan.

wait. *Stay, remain, abide, tarry, linger.

Ana. *Delay, loiter.

Con. Depart, leave, *go, withdraw, retire.

waive. Cede, yield, resign, abandon, surrender, *relinquish, leave.

Ana. *Forgo, forbear, sacrifice: concede, *grant, allow.

Con. *Demand, claim, require, exact: assert, *maintain, defend.

wake, v. **Wake**, **awake**, **waken**, **awaken** cause difficulty because the principles of choice as indicated by current good use are not widely known or, in all cases, definitely accepted. All four are both transitive and intransitive verbs meaning to come out of or to cause to come out of

sleep or, by extension, a condition resembling sleep. The tendency at present is to prefer **wake** and **awake** for the literal sense in intransitive use, especially in speech and in ordinary prose (as, he *awoke* this morning at three; he *wakes* each morning at six o'clock) and **waken** and **awaken** or sometimes *wake up* in transitive use (as, the porter went through the car *awakening* the sleepers; noises loud enough to *waken* or *wake up* the soundest sleeper). In poetry and literary prose, where the choice is often determined by the rhythm, more freedom is exercised. In both their literal and extended use, *awake* often emphasizes the fact of coming to full consciousness, *wake* the process of throwing off sleep or lethargy; thus, one finds it difficult to *wake* (better than *awake*) when one is unduly fatigued; she *awoke* (better than *woke*) suddenly; when her mind *awakes* to the true situation, she will be crushed; the national spirit *woke* slowly but surely. In both literal and extended use, when a rousing or stirring rather than a reviving is implied, *awaken* and *waken* are definitely preferred by good writers (see treatment of these words under **STIR**).

Ana. Rouse, arouse, *stir.

waken. 1 *Wake, awake, awaken.

Ana. Rouse, arouse, *stir.

2 Awaken, arouse, rouse, *stir, rally.

Ana. Excite, stimulate, quicken, galvanize, *provoke: inflame, enkindle, fire, kindle (see **LIGHT**): impel, *move, actuate, drive.

Ant. Subdue. — **Con.** *Pacify, mollify, placate.

walk, n. *Trot, pace, single-foot, rack, amble, canter, lope, gallop, run.

walk, v. Trot, pace, single-foot, rack, amble, canter, lope, gallop, run. See under **TROT, n.**

wallow, v. **Wallow**, **welter**, **flounder**, **grovel** are not close synonyms in either their literal or figurative senses, but they come into comparison as implying heavy clumsy movement and, when the reference is to man, a debased, pitiable, or ignoble condition. **Wallow** literally implies a rolling to and fro, as of a pig in the mire or a ship in the trough of a wave; as, "Whenever the animals grew hot and tired, they would lie down and *wallow*" (*V. Heiser*); the boat pitched and rolled and *wallowed* as she slowly made her way. In extended use the term often implies sensual enjoyment and indifference to the defilement or degradation that the condition suggests; as, "The godly . . . shall not *wallow* in their sins" (*Ecclesiasticus* xxiii. 12); "Little knots of houses where drunken men and women were positively *wallowing* in filth" (*Dickens*). **Welter** is often employed in place of *wallow*, but in precise use it frequently carries a stronger implication of rolling or tossing helplessly or confusedly or at the mercy of the elements or other external forces than the latter term; as, "He must not float upon his watery bier Unwept, and *welter* to the parching wind" (*Milton*); "beneath the *weltering* of the restless tide" (*Shelley*); "The mass of the people were *weltering* in shocking poverty whilst a handful of owners *wallowed* in millions" (*Shaw*). **Welter**, however, may not imply movement when it suggests the position of one who has been killed and lies soaked in blood; as, "They lie—the fifty corpses—*weltering* in their blood" (*D. G. Mitchell*). **Flounder** stresses stumbling or struggling rather than rolling and usually, but not invariably, implies an effort to proceed when one is out of one's element, as a fish out of water, a horse in the mire, or when one does not know the road or the way; as, "they mashed their way through the thick

mud, *floundering* and *stumbling*" (*Dickens*); "they *floundered* on foot some eight miles to a squatter's cabin, rented horses, and completed their journey by starlight" (*Cather*). In its extended use, *flounder* usually implies the confusion of mind and the uncertainty of one who is completely muddled or at a loss but nevertheless proceeds; as, he *floundered* through his speech; "Nature has been *floundering* along for a great many millions of years to get things as they are" (*C. C. Furnas*). *Grovel* (etymologically, to lie flat on one's face) now implies a crawling or wriggling with face close to the ground, as in abject fear, awe, or self-abasement, or as a sign of one's complete humiliation or degradation; as, the terrified slaves *groveled* before their master; "Upon thy belly *groveling* thou shalt go, And dust shalt eat all the days of thy life" (*Milton*); "Am I to *grovel* in the dust for him to walk over?" (*Dickens*).

Ana. Crawl, *creep: defile, pollute, *contaminate, taint: *debase, debauch, corrupt, deprave, pervert.
Con. Soar, mount, ascend, *rise.

wan. Pallid, *pale, ashen, ashy, livid.

Ana. Blanched, whitened, decolorized (see *WHITEN*): *languid, languishing, languorous: *haggard, cadaverous, worn.

wander. *Wander*, *stray*, *roam*, *ramble*, *rove*, *range*, *prowl*, *gad*, *gallivant*, *traipse*, *meander* come into comparison as meaning to move about more or less aimlessly or without a plan from place to place or from point to point. Most of these verbs may imply walking, but very few of them are restricted in their reference to human beings or to any particular means of locomotion. *Wander* implies the absence of a fixed course or more or less indifference to a course that has been fixed or otherwise indicated: the term may imply the movement of a walker (either a human being or an animal) or of any traveler, but it may be used of anything dirigible which is permitted to move aimlessly; as, "wand'ring thoughtful in the silent wood" (*Pope*); two months spent *wandering* in Europe; his eyes *wandered* over the landscape; his thoughts *wander*; she *wandered* frequently from her subject. *Stray* carries an even stronger suggestion of deviation from a fixed, true, or proper course: it therefore often connotes a being lost or a danger of being lost; as, "fallows grey, Where the nibbling flocks do *stray*" (*Milton*); "We have erred, and *strayed* from thy ways like lost sheep" (*Bk. of Com. Prayer*); "Though we stumbled and we *strayed*, We were led by evil counselors—the Lord shall deal with them!" (*Kipling*). *Roam* carries a stronger suggestion of freedom and of scope than *wander*: it usually carries no implication of a definite object or goal, but it seldom, if ever, suggests futility or fruitlessness and it often connotes delight or enjoyment; as, "Mid pleasures and palaces though we may *roam*, Be it ever so humble, there's no place like home" (*J. H. Payne*); "Like us, the Libyan wind delights to *roam* at large" (*Arnold*); "Let the winged Fancy *roam*" (*Keats*); "type of the wise who soar, but never *roam*" (*Wordsworth*); "the charm of a quiet watch on deck when one may let one's thoughts *roam* in space and time" (*Conrad*). *Ramble*, in contrast, suggests carelessness in wandering and more or less indifference to one's path or goal: therefore it often specifically implies a straying beyond bounds, or an inattention to details that ought to serve as guides, or especially in extended use, an inability to proceed directly or under proper restrictions; as, children so uncared-for that they were allowed to *ramble* through the city's streets for hours at a time; "A vine, remarkable for its tendency, not to spread and *ramble*, but to mass and mount" (*Cather*); speakers who *ramble* are almost inevitably bores. *Rove* comes close to *roam* in its im-

plication of wandering over extensive territory, but it usually carries a suggestion of zest in the activity, and does not preclude the possibility of a definite end or purpose; as, the invaders *roved* through the country burning and pillaging homes in their pathway; "ravenous beasts freely *roving* up and down the country" (*Fuller*); "To seek thee did I often *rove* Through woods and on the green; And thou wert still a hope, a love; Still longed for, never seen" (*Wordsworth*). *Range* is often used in place of *rove* without loss: it is, however, the preferred term when literal wandering is not implied or when the stress is on the sweep of territory covered rather than on the form of locomotion involved; as, cattle *-ranging* the western plains; "Through Nature and through Art she *ranged*" (*Swift*); "Talk... *-ranging* the widest horizons" (*Mrs. H. Ward*); "his thoughts always *ranged* far afield" (*Mencken*). *Prowl* implies a stealthy or furtive roving, especially in search of prey or booty. It is used not only of animals but often also of human beings intent on marauding (as, "Now goes the nightly thief *prowling* abroad"—*Cowper*; "Jackals *prowl* around his campfire"—*Mrs. H. Ward*), but it is also applied, usually humorously and with little or no connotation of an evil intention, to persons, especially those of a restless or vagabond temperament, who rove, often singly, through the streets or the fields in a quiet and leisurely manner (as, "If I should *prowl* about the streets a long time, don't be uneasy"—*Dickens*). *Gad*, *gallivant*, *traipse*, all colloquial or dialectal terms, imply a wandering or roving by those who ought to be under restrictions, such as servants, boys and girls, persons who have not much strength or money, or the like. *Gad* implies little more than this; as, "her upper house-maid and laundry-maid, instead of being in their business, are *gadding* about the village all day long" (*Austen*); "He disapproved of her *gadding* about by herself" (*Galsworthy*). *Gallivant* adds to *gad* the implication of a search for pleasure or amusement or the use of an opportunity to display one's finery; as, her father refused to allow her to go *gallivanting* around with any of her suitors; young girls dressed in their Sunday best *gallivanting* along the highways. *Traipse* often adds to *gad* the implication of a fatiguing or tiresome or wearing experience; as, a desire for antiques that gives one an excuse for *traipsing* over the country; "sleeping in the kitchen so as not to have to *traipse* downstairs when the raid-warning goes" (*Jan Struther*). *Meander* (etymologically from the name of a Phrygian river, famous for its windings) may be used in reference to persons and animals but it is even more often used in reference to things such as streams, paths, roads, and the like, that follow a course (usually a winding or intricate course) in such a way as to suggest aimless or listless wandering; as, "Rivers that... *meandered* across the vast plains" (*Haggard*); "Across the ceiling *meandered* a long crack" (*Galsworthy*); "the gray gelding *meandered* along through the hills" (*S. Anderson*).

wane. *Abate, subside, ebb.

Ana. *Decrease, dwindle, lessen, diminish.

Ant. Wax. — **Con.** *Increase, augment: mount, soar, tower, surge, *rise.

want, v. 1 *Lack, need, require.

Ana. *Demand, claim, exact.

Con. *Have, hold, own, possess, enjoy.

2 *Desire, wish, crave, covet.

Ana. *Long, yearn, hanker, pine, hunger, thirst: aspire, pant, *aim.

Con. Refuse, *decline, reject, repudiate, spurn.

want, n. 1 *Lack, absence, privation, defect.

Ana. *Need, necessity, exigency: deficiency (see corresponding adjective at *DEFICIENT*).

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

Con. Plentifulness or plenty, abundance, copiousness (see corresponding adjectives at **PLENTIFUL**): sufficiency, adequacy (see corresponding adjectives at **SUFFICIENT**).

2 Destitution, *poverty, indigence, privation, penury.
Ana. Pinch, strait or straits, pass, exigency (see **JUNCTURE**): meagerness, scantiness, exiguousness (see corresponding adjectives at **MEAGER**).

Con. Affluence, opulence, riches, wealth (see corresponding adjectives at **RICH**).

wanton. 1 Sportive, impish, mischievous, *playful, roguish, waggish, frolicsome.

Ana. *Unruly, ungovernable, intractable: daring, reckless, foolhardy (see **ADVENTUROUS**): gay, *lively, animated, vivacious, sprightly.

Con. Restrained, checked, bridled, inhibited (see **RESTRAIN**): *serious, grave, sober.

2 *Licentious, libertine, lewd, lustful, lascivious, libidinous, lecherous.

Ana. *Immoral, unmoral, amoral: *abandoned, profligate, dissolute, reprobate.

Ant. Chaste. — **Con.** Pure, modest, decent (see **CHASTE**): virtuous, *moral.

3 *Supererogatory, uncalled-for, gratuitous.

Ana. *Malicious, malevolent, spiteful: wayward, *contrary, perverse.

war, v. Battle, *contend, cope, fight.

Ana. Resist, withstand, combat, *oppose: strive, struggle, endeavor, essay, *attempt.

ward off. Avert, *prevent, preclude, obviate.

Ana. Block, bar, obstruct, impede, *hinder: forestall, anticipate (see **PREVENT**): *frustrate, balk, thwart, foil.

Ant. Conduce to.

wariness. Chariness, caution, circumspection, calculation. See under **CAUTIOUS**.

Ana. Alertness, watchfulness (see corresponding adjectives at **WATCHFUL**): *prudence, discretion, foresight, forethought, providence.

Ant. Foolhardiness: brashness (*of persons*). — **Con.** Carelessness, heedlessness, thoughtlessness, inadvertence (see corresponding adjectives at **CARELESS**): recklessness, rashness (see corresponding adjectives at **ADVENTUROUS**).

warlike. *Martial, military.

Ana. Bellicose, *belligerent, pugnacious, contentious: fighting, warring, contending, battling (see **CONTEND**).

Con. *Pacific, peaceable, peaceful.

warm, adj. Warmhearted, sympathetic, *tender, compassionate, responsive.

Ana. *Loving, affectionate: cordial, *gracious, affable: ardent, fervent, passionate (see **IMPASSIONED**): *sincere, heartfelt, hearty, wholehearted.

Ant. Cool: austere.

warmhearted. Warm, sympathetic, *tender, compassionate, responsive.

Ana. *Loving, affectionate: *kind, kindly, benign, benignant: heartfelt, hearty, wholehearted, *sincere.

Ant. Coldhearted. — **Con.** Austere, *severe, stern: *cold, cool, frosty, frigid.

warn, v. Warn, forewarn, caution agree in meaning to let one know of approaching or possible danger, risk, or the like. Warn is the most comprehensive of these terms; in all of its senses it stresses a timely notification that makes possible the avoidance of any situation whether it be literally dangerous or merely inconvenient to oneself or others; as, to warn ships of an approaching hurricane; five minutes before the end of the class period, a bell rings to warn teachers and pupils; the steamship company warned those who had taken tickets of the advanced sailing. Nevertheless, the word often carries in addition at least one other implication, such as of

admonition (as, to warn one of the consequences of his folly), or of exhortation (as, "The priestly brotherhood... Prompt to persuade, expostulate, and warn"—Cowper), or of threats of punishment, reprisal, or the like (as, "I shall not take him at his word about fishing, as he might change his mind another day, and warn me off his grounds"—Austen). Forewarn carries a far stronger implication of advance notification than warn; commonly also, it suggests impending, although not imminent danger or peril. "I will arm me, being thus forewarn'd" (Shak.). "He knew not one forewarning pain" (Wordsworth). Caution commonly emphasizes advice that puts one on one's guard or that suggests precautions; as, to caution one against unwarranted expectations; the doctor cautioned him against overindulgence in strenuous exercise. "We... while experience cautions us in vain, Grasp seeming happiness, and find it pain" (Cowper).

Ana. Apprise, *inform, advise, notify: admonish (see **REPROVE**): advise, counsel (see under **ADVISE**).

warp, v. Distort, contort, *deform, gnarl.

Ana. Twist, bend, turn (see **CURVE, v.**): *injure, damage, impair, mar: *stunt, stultify, atrophy.

warrant, v. 1 *Assert, declare, affirm, aver, protest, avouch, avow, predicate.

Ana. State (see **RELATE**): *maintain, assert: assure, *ensure, insure.

2 *Justify.

Ana. Vindicate, justify (see **MAINTAIN**): sanction, *approve, endorse: *authorize.

wary. Chary, *cautious, circumspect, calculating.

Ana. Alert, *watchful: prudent, discreet, foresighted, forethoughted, provident (see under **PRUDENCE**).

Ant. Foolhardy: brash (*of persons*). — **Con.** *Careless, heedless, thoughtless, inadvertent: reckless, rash, venturesome, venturesome (see **ADVENTUROUS**).

wash, n. Wash, drift, diluvium, alluvium, alluvion, silt agree in denoting a deposit of rock material (sand, gravel, etc.) or soil that has been transported by running water or moving ice. Wash is the most general of these terms, denoting any material transported or deposited by water, but in its specific use in geology, it denotes loose surface material of the earth, especially gravel and other rock debris. Drift, a more scientific term, denotes wash whose constituent particles may vary in size from particles of soil to boulders, and is often used in phrases that indicate the means by which the material has been transported; as, river drift; fluvioglacial drift. Diluvium was formerly applied in geology to both glacial and fluvioglacial drift because the material was supposed to have been transported by the waters of a deluge. Alluvium usually denotes finer material than wash, including soil, and often signifies the deposit left by the flooding of land that is not permanently submerged, as on flood plains and deltas. Alluvium is deposited also where streams issue from mountains and lose velocity. Alluvion is equivalent in meaning to alluvium, but in legal use alluvion denotes the material gradually added to land by repeated flooding, the material becoming the property of the owner of the land to which it is added. Silt implies wash whose constituent particles are very fine, such as constitutes deposits on river bottoms and beaches. Particles of silt sometimes are so fine that they remain suspended in standing water and are hard to distinguish from particles of clay.

wasplish. Snappish, *irritable, fractious, peevish, petulant, pettish, huffy, huffish, fretful, querulous.

Ana. Testy, touchy, cranky, cross, *irascible: *impatient: *contrary, perverse: spiteful, *malicious.

waste, v. Devastate, *ravage, sack, pillage, despoil, spoliage.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

Ana. Plunder, loot, *rob, rifle: *destroy, demolish: *ruin, wreck.

Ant. Conserve, save.

waste, n. Waste, desert, badlands, wilderness agree in meaning a tract or region of land not usable for cultivation or, in general, for habitation. **Waste** is the general term applicable to any tract or region which because of the nature of its soil, its topographical features (such as abrupt elevations, continuous swamps or marshes), or its being covered with rocks, thorny vegetation, or the like, defies or repels human attempts to use it for cultivation or habitation; as, "At this . . . point of its nightly roll into darkness the great and particular glory of the Egdon waste began" (*Hardy*); "*Wastes of sand and thorns*" (*C. E. Montague*). **Desert**, etymologically a deserted, uninhabited tract of land, applies especially to a particularly arid region where areas of shifting sand prevail and there is little or no vegetation; as, the desert of Sahara; "yon far desert dead and brown" (*Joaquin Miller*); the arid region of the southwestern United States is often described as a desert. **Badlands** (a plural noun) applies to any barren waste where soft rocks that suffer from continual erosion prevail and hills are steep, furrowed, and often fantastic in form, drainage is labyrinthine, and watercourses are normally dry; as, extensive tracts in southwest South Dakota and northwest Nebraska are *badlands* (geographically, this region is called the *Bad Lands*). **Wilderness** applies to any waste which human beings find not only incapable of cultivation or habitation, but difficult to make their way through for lack of actual or even possible paths or trails. Commonly, however, *wilderness* specifically implies a pathless region thickly covered with trees and underbrush and inhabited only by wild animals; as, "Oh for a lodge in some vast wilderness, Some boundless contiguity of shade" (*Cowper*). "O my poor kingdom . . . thou wilt be a wilderness again, Peopled with wolves" (*Shak.*).

wasted. Pinched, cadaverous, *haggard, worn, careworn. **Ana.** Gaunt, scrawny, skinny, angular, rawboned (see *LEAN, adj.*).

Con. Sturdy, *strong, stout, stalwart: robust, *healthy.

watch, v. 1 *Tend, mind, attend.

Ana. Guard, protect, shield, safeguard (see *DEFEND*).

2 Look, *see.

Ana. *Gaze, gape, stare, glare: *scrutinize, scan, inspect, examine.

watchful. Watchful, vigilant, wide-awake, alert agree in meaning on the lookout especially for danger or for opportunities. **Watchful** is the general word; as, "the five watchful senses" (*Milton*); "like a lion that unheeded lay, Dissembling sleep, and watchful to betray" (*Dryden*). **Vigilant** implies keen, courageous, often wary, watchfulness, especially in the cause of the right. "Be sober, be vigilant; because your adversary the devil, as a roaring lion, walketh about, seeking whom he may devour" (*1 Peter v. 8*). "We should be eternally vigilant against attempts to check the expression of opinions that we loathe" (*Justice Holmes*). **Wide-awake** stresses awareness of opportunities more often than of dangers and implies knowledge of all events or factors affecting the situation. "Merchants who . . . were . . . wide awake and full of energy" (*H. W. van Loon*). **Alert** stresses readiness or promptness in apprehending and meeting a danger, an opportunity, or an emergency. "Not only watchful in the night, but alert in the drowsy afternoon" (*Pater*). "Our wits are much more alert when engaged in wrong-doing . . . than in a righteous occupation" (*Conrad*).

Ana. *Cautious, wary, chary, circumspect: *quick, ready, prompt.

Con. *Careless, heedless, thoughtless, inadvertent.

waterlog. *Soak, drench, saturate, steep, impregnate, sog, sop, ret.

waterspout. *Wind, gale, hurricane, gust, blast, whirlwind, cyclone, typhoon, tornado, twister, flaw, breeze, zephyr.

wave, v. *Swing, flourish, brandish, thrash.

Ana. Wield, swing, manipulate, *handle, ply: undulate, sway, *swing, fluctuate: *shake, quiver, quaver.

wave, n. Wave, undulation, ripple, billow, roller, breaker, comber, beachcomber, surge come into comparison when they mean one of the ridges or swells that form on the surface of the ocean or other body of water, or something similar in formation. **Wave** is the general word applicable to any such ridge or swell which has a perceptible crest and trough; as, there is not a wave on the lake; the wind whipped up the surface into high waves; her hair rises and falls in natural waves. The term is also used in the physical sciences in reference to each pulse of the advance of something such as light or sound through a medium such as the air; as, light waves; heat waves. **Undulation** also applies to any wave or wavelike formation wherever found: the term, however, carries a less vivid picture than wave for it either denotes an abstraction or tends to suggest a more or less conventionalized pattern; as, "They roamed at large on the undulations of Edgon [Heath]" (*Hardy*); "The stream arranges the sand in the shallow in . . . minute fixed undulations" (*Jefferies*). **Ripple** applies to a small wave such as one of those which cover the surface of water passing over shallows or disturbed by a light wind. "A breeze stirred about them and the bay broke up into long oily undulations, then into ripples tipped with spray" (*E. Wharton*). **Billow** is sometimes used poetically for wave, but in careful, nonrhetorical use it applies chiefly to a high upheaving wave such as one of those that often rise on the surface of the deepest parts of the ocean. "Strongly it [the dactylic hexameter] bears us along in swelling and limitless billows; Nothing before and nothing behind but the sky and the ocean" (*Coleridge*). "Where the prairies, like seas where the billows have rolled, Are broad as the kingdoms and empires of old" (*C. Mackay*). **Roller** applies to one of a series of long heavy waves which are produced by a storm and which hold their shape over a long course to the shore where they usually break with great force and noise; as, "The league-long roller thundering on the reef" (*Tennyson*). **Breaker** applies to a heavy wave which breaks into foam or flying spume when the wave dashes against a rock, reef, or the like. "I have loved thee, Ocean! . . . from a boy I wanted with thy breakers . . . And trusted to thy billows far and near" (*Byron*). **Comber** and **beachcomber** (both Americanisms) apply to a long curling wave or, especially, breaker. The latter term, as its name implies, applies to one breaking near the shore or beach: the former may imply this or a breaking over the side of a ship, on a reef or shoal, or the like; as, a thundering comber struck the rail of the ship. **Surge**, which is chiefly poetic or rhetorical in this sense, usually suggests a high-rising billow or roller; as, "All this time the sea was rolling in immense surges" (*R. H. Dana, jr.*).

waver, v. 1 Fluctuate, oscillate, pendulate, vibrate, *swing, sway, undulate.

Ana. Flicker, flutter, hover, *flit, flitter: quiver, quaver, tremble, *shake.

2 Falter, *hesitate, vacillate.

Ana. Balk, boggle, stickle, scruple, *demur, shy: fluctuate, oscillate (see *SWING*).

wax, n. *Oil, fat, grease.

way, n. 1 Way, route, course, passage, pass, artery agree in meaning the track or path traversed in going

from one place to another. **Way** was originally applied to a road, especially one for riders or conveyances as well as for pedestrians and animals; it now occurs rarely in this specific sense except in combinations such as *highway*, *wayside*, and in some idiomatic phrases; as, he lives across the *way*; the parting of the *ways* (that is, the crossroads). The word is now so general and inclusive in meaning that its specific application must be gathered from the context; as, I know the *way* through the forest; this is the *way* to the market; what is the best *way* to Chicago by train? It is also used in combination with words that make its application clear; as, *driveway*, *railway*, *seaway*, *subway*. **Route** originally denoted a path taken or trodden by men or animals. Now it is applied to a way, often a circuitous way covering many roads, paths, tracks, or the like, regularly followed by a person in his business or employment (as, a delivery *route*; a postman's *route*) or laid out as the path to be followed by a marching army, a tourist, a vehicle, or the like (as, the *route* to the battlefield; a bus *route*; U. S. *route* 20). **Course**, in its earliest pertinent sense, denoted the line or track followed by someone or something running or advancing, and was used especially of the path followed by a planet through the heavens, or by a ship at sea. The term may imply straightness and directness (as, to keep to one's *course*) but it does not necessarily imply unchangeableness (as, to turn or bend one's *course*): it may suggest a beginning and end (as, he must run his *course*; the *course* of a missile), but sometimes it connotes circular or unending progress, especially in figurative use (as, the *course* of the seasons): it nearly always, especially in its extended senses, implies progress from point to point (as, a *course* of study; the *course* of a plot). As a modern designation, *course* is applied chiefly to a track for racing by men, horses, automobiles, etc. (a race-*course*), to the natural or artificial channel of a stream (a water-*course*), and to a tract of ground laid out for playing golf (a golf *course*). **Passage** stresses crossing or transit; when specifically applied to a track or path, it denotes one followed in getting from one point to another and involving passing through or over something; as, the search for a Northwest *Passage* to India. "I'll drink to her as long as there is a *passage* in my throat and drink in Illyria" (*Shak.*). "A bridge... a *passage* broad, Smooth, easy, inoffensive, down to Hell" (*Milton*). In current use, however, *passage* is chiefly found in concrete applications; sometimes it designates a narrow lane for pedestrians (as, St. Helen's *Passage* in Oxford); more often, it names a space (such as a corridor or vestibule), forming a common pathway to a particular room, apartment, or office in a building (see article at **PASSAGE**, 2). "There her women in a mournful throng Stood in the *passage* whispering" (*Keats*). **Pass** is chiefly applied to a passage through or over something that presents an obstacle or serious difficulty, such as a river (specifically a ford, ferry, or bridge; as, the *passes* of the Rhine), or a sand-choked river mouth (specifically, a narrow navigable channel), or, especially, a mountain range (specifically, a notch or defile; as, the Khyber *Pass* between Afghanistan and India). **Artery**, which is literally applied to one of the tubular branching blood vessels which carry blood from the heart to the various parts or organs of the body, is now also applied to one of the great continuous channels of traffic from which branch off many smaller or shorter channels; it is applied sometimes to a great railroad which traverses a continent or goes directly from one large city to another that is far distant as from New York to Chicago, or Chicago to San Francisco; it is also applied to a through highway from which branch other routes (or roads connecting with them) and which per-

mits swift and unimpeded passage over a great distance; as, the northern *artery* out of Boston.

2 *Method, mode, manner, fashion, system.

Ana. Procedure, *process, proceeding: *plan, design, scheme: practice, *habit, habitude, custom, use, usage, wont.

waylay. *Surprise, ambush.

Ana. *Attack, assault, assail: *prevent, forestall.

wayward. Perverse, froward, restive, *contrary, balky.

Ana. *Insubordinate, contumacious, rebellious: refractory, recalcitrant, intractable, headstrong, *unruly: capricious, *inconstant, fickle, unstable.

Con. Amenable, tractable, *obedient: *compliant, acquiescent.

weak. **Weak, feeble, frail, fragile, infirm, decrepit** agree in meaning not strong enough to bear, resist, or endure strain, pressure, or the like. **Weak** is by far the widest in its range of application, not only being interchangeable with all of the succeeding words, but also capable of being applied where they are not. Fundamentally, it implies deficiency or inferiority in strength; in this case, it may apply not only to the body, but to the will, the mind, the spirit; as, a *weak* man; *weak* woman; a *weak* army; a *weak* plant; a *weak* character; the *weaker* brethren. "The spirit indeed is willing, but the flesh is *weak*" (*Matthew* xxvi. 41). "Thou, though strong in love, art all too *weak* In reason" (*Wordsworth*). Often it implies a lack of power, skill, efficiency, ability to control, or the like; as, a *weak* government; a *weak* team; a *weak* governor; *weak* nerves; a *weak* influence. It may also suggest a defect, a fault, a dilution, or other sign of impairment of a thing's strength; as, *weak* spots in a mechanism; a *weak* tread in a stairway; *weak* tea; *weak* weapons; a *weak* argument. **Feeble** is not only more restricted than *weak* in its range of application, but it also carries a stronger implication of lamentableness or pitiableableness in that weakness. It is chiefly, though far from exclusively, applied to human beings and their acts and utterances, then usually implying a manifest lack or impairment of physical, mental, or moral strength; as, a *feeble*, tottering old man; a *feeble* attempt to resist the enemy's advance. "Rigid principles often do for *feeble* minds what stays do for *feeble* bodies" (*Macaulay*). As applied to things, *feeble* implies faintness, indistinctness, impotency, or inadequacy; as, a *feeble* light; a *feeble* sound; a *feeble* stem; "a *feeble* approximation is accepted" (*Grandgent*). **Frail**, when it implies physical (especially human) weakness, suggests not so much the impairment of strength as natural delicacy of constitution or slowness of build; it may even be used without hint of mental or moral weakness. "Steer Harpit came from Rowell Hill, A small, *frail* man, all heart and will" (*Masefield*). "It was marvellous that... the energy of her spirit could carry through so triumphantly her *frail* nervous system and her delicate constitution" (*H. Ellis*). As applied to things, however, the term usually implies liability to failure or destruction if the thing has physical existence (as, to shoot the rapids in a *frail* canoe), or, if immaterial, an incapacity for dealing with forces or powers opposed to it, or tending to destroy it (as, "Beauty, *frail* flow'r that ev'ry season fears"—*Pope*). When *frail* is applied to the will, the conscience, the moral nature of man, it carries an even stronger implication of lack of power to resist than *weak*. "Or, if he prove unkind, (as who can say But being man, and therefore *frail*, he may)" (*Cowper*). **Fragile** (see also **FRAGILE**, 1) is frequently used in place of *frail*, but it usually carries even a stronger suggestion of certainty or assurance of destruction or of the strength of the powers or forces opposing. "Shaftesbury was, moreover, a man of *fragile*

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

physical constitution, as Kant was; but, unlike Kant, he was... a man in the world, heroically seeking to live a complete and harmonious life" (*H. Ellis*). "She was passionately realising the moment, its fleeting exquisiteness, its still, fragile beauty" (*R. Macaulay*). **Infirm** usually implies a loss of strength, especially of physical strength, with consequent instability, unsoundness, or insecurity. As referred to human beings, it often implies illness, or more often, old age; as, "a poor, *infirm*, weak, and despised old man" (*Shak.*). As referred, however, to the tempers, the designs, or the intentions of men, it often implies wavering or serious vacillation. "*Infirm* of purpose! Give me the daggers" (*Shak.*). **Decrepit** is as applicable to things as to persons that are worn out or broken down by use or age. "Such is its misery and wretchedness, that it resembles a man in the last *decrepit* stages of life" (*Fielding*). "Two or three wooden-bottom chairs, exceedingly *decrepit* and *infirm*" (*N. Hawthorne*). **Ana.** Debilitated, weakened, enfeebled (see **WEAKEN**): doddering, *senile, anile, doting: *powerless, impotent, impuissant.

Ant. Strong. — **Con.** Stout, sturdy, tough, stalwart, tenacious (see **STRONG**).

weaken. **Weaken, enfeeble, debilitate, undermine, sap, cripple, disable** come into comparison when they mean to lose or, commonly, cause to lose, strength, vigor, or energy. **Weaken**, the most general term of this group, most frequently implies loss of the physical strength characteristic of a healthy living thing or any of its organs or the loss of the soundness or stability characteristic of a strong material structure (as, overexercise has *weakened* his heart; unfertilized plants *weaken* and die; the illness has *weakened* him considerably; decay has *weakened* the wooden supports of the bridge), but it may imply a loss of strength in quality or in effective power in anything material or immaterial, as by a natural or forced reduction in resources, numbers, means of support, and the like (as, the regiment was greatly *weakened* by heavy casualties in battle; the growing power of Parliament *weakened* the authority of the sovereign; his losses in the market have noticeably *weakened* his credit), or by a reduction in intensity by dilution, attenuation, or the like (as, to *weaken* wine or tea with water; frequent quarreling has *weakened* their friendship). **Enfeeble** implies a more obvious and a more pitiable condition than **weaken**: it suggests the state of a person greatly weakened by old age or severe or prolonged illness or a state comparable to it, and therefore usually implies helplessness or powerlessness more strongly than **weaken** does; as, he has been so *enfeebled* by illness that he will probably never walk again; a country crushed and *enfeebled* by war. **Debilitate** may be used in place of **enfeeble** but commonly it suggests a somewhat less marked or less prolonged impairment of strength or vitality: the word occurs commonly, but not exclusively, in the participial forms; as, a life of dissipation has *debilitated* him physically and mentally; "her frail nervous system and her delicate constitution, still further *debilitated* by the slow progress of disease" (*H. Ellis*); a *debilitating* climate. **Undermine** and **sap** both literally mean to dig a trench, tunnel, or the like, under a wall, foundation, or area. In the extended sense in which they are here considered, they imply a weakening by something or someone working surreptitiously or insidiously: **sap**, however, has been so colored by the meaning of another word **sap**—meaning to drain a plant or tree of sap, or vital juice—that it may suggest a draining of strength or a caving in or breaking down, or neither exactly the one nor the other; as, her health has been *undermined* by lack of rest and proper food; his strength has been *sapped* by his fierce struggle

for success. "Some of the new philosophies *undermine* the authority of science, as some of the older systems *undermined* the authority of religion" (*Inge*). "But sloth had *sapped* the prophet's strength" (*Neuman*). "His moral energy is *sapped* by a kind of scepticism" (*E. Dowden*). **Cripple** literally means to maim or mutilate: as here compared, it suggests a deprivation of something comparable to a limb, organ, or other part essential to the retention of one's strength or efficiency; as, "This injury to the ordinary capitalist quite evidently *cripples* business enterprise" (*J. A. Hobson*); "the poet draws life... from the community... and to cut himself off from this source of life is... likely to *cripple*... him" (*Day Lewis*). **Disable** literally means to make unable, but present usage commonly adds to this meaning implications of a crippling or maiming, or of debilitation or enfeeblement that unfits one for all work or for the work for which one has been trained; as, *disabled* soldiers; "Do not let your mind be *disabled* by excessive sympathy" (*Shaw*).

Ana. Enervate, emascuate, *unnerve, unman: impair, *injure, damage: dilute, *thin, attenuate, extenuate. **Ant.** Strengthen. — **Con.** Energize, *vitalize, activate: *improve, better.

wealthy. *Rich, affluent, opulent.

Ant. Indigent.

wean. *Estrange, alienate, disaffect.

Ana. *Separate, part, divide, sunder, sever, divorce.

Ant. Addict.

weapon. **Weapon, arm** agree in denoting something used in combat as an instrument of attack or defense. **Weapon** is very general in application for it is applicable to anything that may be used in injuring, destroying, or defeating an enemy or opponent; it may be used in reference to animals as well as to persons, and sometimes even to things; as, a choice of *weapons* for a duel; the cat's main *weapon* is its claws; a display of primitive *weapons* in a museum. "Fight such a fire by rubbing, not by beating. A board is the best *weapon* if you have it" (*Frost*). **Arm** (chiefly in the plural form **arms**) is historically as general in its application as **weapon** when used literally of an instrument of fighting; thus, the call "To *arms*!" was a call to assume all the weapons, including armor, sword, shield, and the like, necessary for warfare, and to fall in line. In modern use, however, **arms** is applied generally to the class of instruments wielded by the arm, such as swords, daggers, bayonets, rifles, carbines, pistols, etc. Of these instruments, swords, daggers, bayonets, and sometimes revolvers and pistols, are also known as *side arms*, because commonly worn at the side or in a belt. Rifles, carbines, and pistols are often distinguished as *firearms*. This latter term, however, is often used more inclusively to comprehend cannon. When it is desired to distinguish rifles, carbines, revolvers, pistols, and all guns of less than one inch in diameter, from heavy firearms, the term *small arms* is used.

wearless. Unwearying, unwearied, tireless, *indefatigable, untiring, unflagging.

Ana. Dogged, pertinacious (see **OBSTINATE**): assiduous, sedulous, diligent (see **BUSY**).

Con. Laggard, dawdling, procrastinating (see **DELAY**): indolent, fainéant, slothful, *lazy.

wearisome. Tiresome, tedious, humdrum, *irksome.

Ana. Fatiguing, exhausting, fagging, tiring (see **TIRE, v.**): dull, *stupid.

Con. Exciting, stimulating, quickening (see **PROVOKE**).

weary, v. *Tire, fatigue, exhaust, jade, fag, tucker.

Ana. Debilitate, enfeeble, *weaken: *depress, oppress, weigh (down).

Con. Energize, *vitalize: animate, *quicken, enliven, vivify.

weave, v. Weave, knit, crochet, braid, plait (or pleat, plat), tat are here compared as used in reference to the making of fabrics, textiles, wearing apparel, and the like. In this sense they agree in meaning to make such a fabric or textile, or to form such a garment or other article, by interlacing filaments or strands of material. **Weave** usually implies crossing rows of filaments, strands, etc., interlaced into a web, irrespective of method, material, or pattern; as, to *weave* straw; to *weave* baskets; cf., the spider *weaves* its web. Specifically, the term means to interlace warp and weft yarns, by means of a loom, into a textile fabric, the yarns being passed over and under each other according to a predetermined pattern. **Knit** implies the use of a single strand, commonly of yarn, and, in its specific sense, the use of two smooth-pointed needles alternately holding the material and forming a new row of interlacing loops; as, to *knit* a sweater; to *knit* stockings; *knitted* fabrics. **Crochet** specifically differs from *knit* (which covers it as a general term) by implying the use of a single hooked needle and in not necessarily suggesting a building up by successive rows; as, to *crochet* an afghan; to *crochet* lace. **Braid** implies the entwining of three or more strands, as of hair, cord, or cloth strips, by passing one strand over another in such a manner that each strand winds a sinuous course through the ribbonlike or ropelike texture that is thus produced; as, to *braid* strands of material to make a *braided* rug (that is, a rug made from a lengthy strip that is so braided and then twisted and sewed together to form the shape desired). **Plait** is sometimes identical in meaning with *braid*, but the tendency now is to restrict it to the interlacing of straw or the like, as in hatmaking or basketmaking, whether the method approaches that of braiding or weaving. **Tat** implies the use of a single thread and of one or more shuttles by means of which a series of sliding knots and, usually, loops, is formed in that thread. The drawing up of the thread and the fastening of it in a circle or ring are done by hand.

wedding. *Marriage, matrimony, nuptials, spousal, espousals, wedlock.

wedlock. *Marriage, matrimony, nuptials, spousal, espousals, wedding.

wee. Diminutive, tiny, teeny, weeny, *small, little, minute, microscopic, miniature, petite.

weeny. Tiny, teeny, wee, diminutive, minute, microscopic, miniature, little, *small.

weep. *Cry, wail, keen, whimper, blubber.

Ana. Bemoan, bemoan, lament, *deplore: sob, moan, *sigh, groan.

weigh. 1 *Consider, study, contemplate, revolve, excogitate.

Ana. *Ponder, meditate, ruminate, muse: *think, reflect, cogitate, reason, speculate.

2 In form **weigh down, on, or upon.** *Depress, oppress.

Ana. *Worry, annoy, harass, harry: torment, torture, *afflict, try, rack.

Con. Lighten, *relieve, alleviate, assuage, mitigate, allay.

weight, n. 1 Significance, *importance, moment, consequence, import.

Ana. *Worth, value: magnitude, *size, extent: seriousness, gravity (see corresponding adjectives at **SERIOUS**). 2 *Influence, authority, prestige, credit.

Ana. Effectiveness, efficacy (see corresponding adjectives at **EFFECTIVE**): *emphasis, stress: powerfulness, potency, forcefulness, forcibleness (see corresponding adjectives at **POWERFUL**).

weight, v. Load, *adulterate, sophisticate, doctor, deacon.

weighty. *Heavy, ponderous, cumbrous, cumbersome, hefty.

Ana. *Onerous, burdensome, oppressive, exacting.

weird. **Weird, eerie (or eery), uncanny** are synonyms only in their derived sense of fearfully and mysteriously strange or fantastic. **Weird**, originally an old English noun meaning fate or destiny, was later applied to one of the Fates, and then to a witch, wizard, or the like, who had powers of divining future events. The transition to an adjective in "the *Weird Sisters*" (in early use the Fates, and in later use, following Shakespeare, witches such as those who warned Macbeth of future events) led to the later sense of unearthly or preternaturally mysterious; as, "When night makes a *weird* sound of its own stillness" (*Shelley*); "*Weird* whispers, bells that rang without a hand" (*Tennyson*). In still more modern use, the term often means little more than strangely or absurdly queer; as, *weird* remarks; "The government sends out *weird* civilians now and again; but McGoggin was the queerest exported for a long time" (*Kipling*). **Eerie**, a word of Scottish origin, does not connote ordinary justifiable or explainable fear, but rather a vague consciousness that unearthly or mysterious, and often malign, powers or influences are at work: the term is chiefly used to create atmosphere rather than to define the character of the thing so described; as, "I there w/ Something did forgather, That pat [put] me in an *erie* swither [fluster]" (*Burns*); "My people too were scared with *erie* sounds" (*Tennyson*). **Uncanny**, originally and still a Scottish and North of England term meaning careless or unreliable, has developed in general use an implication of uncomfortable strangeness or of unpleasant mysteriousness that makes it applicable not only to persons or concrete things but to sensations, feelings, thoughts, and the like; as, "to give you the same *uncanny* sensation as when, alone in a room, you think you see something move which ought not to move" (*Bennett*). "The ordinary reader . . . becomes chilled and daunted in the *erie* regions to which Poe carries him . . . Now, the effective vindication of Poe . . . is that, *weird* and bizarre and abnormal as are the themes he affected, he is essentially a realist in his method . . . 'The Telltale Heart' and . . . 'The Cask of Amontillado' have had a psychological basis in the perversities of a disturbed imagination; hence the *uncanny* fascination of these and other stories of his in a similar taste" (*J. M. Robertson*). **Ana.** *Mysterious, inscrutable: *fearful, awful, dreadful, horrific: *strange, odd, queer, curious, peculiar.

welcome, adj. *Pleasant, pleasing, agreeable, grateful, gratifying.

Ana. Satisfying, contenting (see **SATISFY**): congenial, sympathetic (see **CONSONANT**).

Ant. Unwelcome. — **Con.** Distasteful, *repugnant, repellent, obnoxious.

well, adj. *Healthy, sound, wholesome, robust, hale.

Ant. Unwell, ill. — **Con.** Infirm, frail, feeble, *weak.

well-nigh. *Nearly, almost, approximately.

well-timed. Timely, *seasonable, opportune, pat.

Ana. Apt, happy, felicitous, appropriate, fitting (see **FIT, Adj.**).

Con. *Premature, untimely: *late, tardy, behindhand.

welter. *Wallow, flounder, grovel.

Ana. Struggle, strive (see **ATTEMPT, v.**).

wench, n. **Wench, hussy (or huzzy), minx, baggage** come into comparison when they are used in place of *girl* or *young woman* and with playful or derogatory insinuations. **Wench** is now dialectal in naïve use or archaic in sophisticated use. It is sometimes employed in endearment and sometimes contemptuously (then often implying *harlotry*) but, commonly in current use, and

sometimes in historical use, it suggests the vulgarity and low station of the speaker or imputes them to the person who is so designated. "I am a gentil womman and no *wenche*" (*Chaucer*). "She was both illiterate and vulgar, but the little *wench* had an instinctive knowledge of art and the artist" (*L. Lewisohn*). **Hussy** (etymologically, housewife) was in earliest use applied to a woman or girl not of gentle birth and so acquired various connotations such as rusticity, strength, thrift, rudeness of behavior, and (especially when qualified by *light*, *bold*, *brassy*, etc.) questionable morals. In current use, both naive and sophisticated, it is applied to young women and usually implies rudeness, boldness, impudence, or the like. "A more...impudent *hussy*, is not to be found in the United States" (*Washington*). "She was a handsome, insolent *hussy*, who mocked at the youth, and yet flushed if he walked along to the station with her as she went home" (*D. H. Lawrence*). **Minx** stresses pertness, sauciness, and mischievousness; it occasionally implies loose morals but more commonly suggests artfulness under the guise of artlessness. "A little saucy rose-bud *minx* can strike Death-damp into the breast of doughty king" (*Browning*). **Baggage** was in earliest use highly derogatory, being applied chiefly to strumpets or prostitutes, especially to those who were camp followers; in more recent use it frequently approaches *minx* in its connotations, though it less often suggests artfulness and sometimes even carries a hint of qualities foreign to *minx*, such as girlishness or loveliness. "A disreputable, daring, laughing, painted French *baggage*" (*Thackeray*). "She has an orphan niece, a pretty, soft-hearted *baggage*" (*Irving*). "Thompson, the solicitor's daughter!...A pretty little *baggage*" (*Meredith*).

wet, *adj.* **Wet**, **damp**, **dank**, **moist**, **humid** agree in meaning covered or more or less soaked with water or other liquid. **Wet** may be used with no further implications, but it more often specifically implies saturation; as, *wet* clothes; a *wet* sponge; the rain lies in puddles on the *wet* ground. Often, however, the term refers to a surface covered with water or other liquid; as, *wet* pavements; *wet* hands; cheeks *wet* with tears; "grass...*wet* with dew" (*Hemingway*). But *wet* often means merely not dry, or not yet dry, especially when used in reference to paint, ink, or the like, which has been applied to or used on a surface. **Damp** differs from *wet* chiefly in implying a slight or moderate absorption or covering and often in connoting the presence of unpleasant or disagreeable wetness; as, *damp* shoes; the sheets on the bed are *damp*; a *damp* house. However, *damp* usually implies less wetness than that which is commonly suggested by the adjective *wet*; as, give me a *damp* sponge; sheets should be *damp* when they are ironed. **Dank** unequivocally applies only to that which is disagreeably, penetratingly or, from the point of view of health or comfort, dangerously, wet; as, a cold *dank* mist; *dank* forests; *dank* marshes; a *dank* bed; a *dank* cellar. **Moist** often suggests little more than the absence of dryness or a not unpleasant dampness; as, hands *moist* with perspiration; *moist* eyes; *moist* air; *moist* heat. **Humid** is now chiefly used to imply the presence of sensible moisture in the air; as, the *humid* atmosphere of early August; "the *humid* prairie heat, so nourishing to wheat and corn, so exhausting to human beings" (*Cather*); "a firefly...on a *humid* summer's night" (*C. C. Furnas*). It now appears rarely in medical use, *moist* usually being the preferred term; thus, what was once called a *humid* gangrene (as opposed to a *dry* gangrene) is now commonly called a *moist* gangrene.

Soak, *v.* Soaked, saturated, drenched, waterlogged (see **SOAK**, *v.*).

Ant. Dry.

wheedle. Blandish, cajole, *coax.

Ana. Entice, inveigle, *lure, seduce, decoy: ingratiate, insinuate (see corresponding adjectives at **DISARMING**).

Con. Bully, browbeat, bulldoze, cow, *intimidate.

wheel, *v.* *Turn, revolve, rotate, gyrate, circle, spin, whirl, twirl, swirl, pirouette, eddy.

where. *Whither.

which. *Who, that.

while, *v.* **While**, **wile**, **beguile**, **flee** come into comparison when they mean to pass time, especially leisure time, without being bored. One **whiles**, or (by confusion with it) **wiles**, *away* a space of time when one causes it to be filled by something pleasant, diverting, or amusing. "They can *while* away an hour very agreeably at a card table" (*Lamb*). "He had tamed every newt and snake and toad... And each one... *Wiled*... his silent time away" (*Shelley*). One **beguiles** not only a space of leisure time but also its tedium or irksomeness when one occupies that time with some agreeable, but not necessarily time-wasting, employment. "And, skilled in legendary lore, the lingering hours *beguiled*" (*Goldsmith*); "Others...*beguiled* the little tedium of the way with penny papers" (*Hawthorne*). "To *beguile* his enforced leisure, I tried to teach him sundry little tricks" (*Grandgent*). One **fleets** the time when one causes it to pass quickly or imperceptibly: the term, which is comparatively rare in this use, may or may not imply an effort to while time away. "Many young gentlemen...*fleet* the time carelessly" (*Shak.*). "*Fleeting* the quiet hour in observation of his pets" (*G. H. Lewes*).

Ana. Divert, *amuse, entertain.

whim. Freak, *caprice, whimsey, vagary, crotchet.

Ana. Inclination, disposition (see corresponding verbs at **INCLINE**): *fancy, fantasy, vision, dream: notion, *idea.

whimper, *v.* Weep, *cry, blubber, wall, keen.

whimsey or **whimsey**. *Caprice, freak, whim, vagary, crotchet.

Ana. See those at **WHIM**.

whirl, *v.* Twirl, spin, wheel, swirl, *turn, revolve, rotate, gyrate, circle, pirouette, eddy.

whirlwind. *Wind, gale, hurricane, cyclone, typhoon, tornado, waterspout, twister, breeze, gust, blast, flaw, zephyr.

whit. Mite, smitch, jot, iota, bit, *particle, smidgen, titlle, atom.

whiten, *v.* 1 **Whiten**, **blanch**, **bleach**, **decolorize** (or **decolorate**), **etiolate** agree in meaning to change from its original color to white or a near approach to white. To **whiten** is to make white, commonly, though not necessarily, by the application or addition of something from without (as, to *whiten* shoes with pipe clay); to **blanch** is to whiten as by the removal or withdrawal of color or that which gives or develops color (as, to *blanch* almonds by scalding which removes the brown skin; to *blanch* celery by covering the stalks with earth, so as to exclude the sunlight); to **bleach** is to whiten or lighten in color, especially by exposure to sun and air, or by chemical processes (as, to *bleach* linen by spreading it on the grass in the sun; to *bleach* hair by use of peroxide). "The walls...are *whitened* with lime" (*W. Dampier*); "the moon-blanch'd land" (*Arnold*); "a splintered stump *bleached* to a snowy white" (*Cowper*); "There they lay till their bones were *bleached*" (*Tennyson*). **Decolorize** and the rarer **decolorate** imply the deprivation of color as by processes of bleaching or blanching, but they do not carry as strong an implication of whitening as do the previous two words; as, to *decolorize* a colored fabric by

the use of chloride of lime. **Etiolate** is a scientific term used in reference chiefly to plants from which sunlight has been excluded, with the result that the natural coloring, or chlorophyll, is not formed; as, *etiolated* plants look sickly; to *blanch* celery is, in scientific language, to *etiolate* it.

Ant. Blacken.

2 Whitewash, gloze, gloss, *palliate, extenuate.

Ana. See those at WHITEWASH.

whitewash, v. Whiten, gloze, gloss, *palliate, extenuate. **Ana.** *Disguise, cloak, mask, dissemble: condone, *excuse.

whither. **Whither, where** come into comparison only when they mean the point to which one is moving.

Whither was formerly the correct adverb to use in this sense, **where** being used with verbs of rest; as, *whither* are you going?; *where* are you staying? *Where* is now used preferably after verbs of motion, except in poetical, elevated, or archaic style.

who. Who, which, that are here compared as relative pronouns. In modern usage **who** refers to persons (less commonly to animals); **which**, to animals or things, but not (in educated use) to persons; **that** may be used of persons, animals, or things. If a relative clause merely conveys an additional or parenthetical idea, *who* or *which* (preceded by a comma) is usually employed: if the relative clause is restrictive or defining, *who* or *which* or *that* may be used, without a preceding comma; as, this gentleman, *who* (not *that*) was here yesterday, desires to see you; the gentleman *who* (or *that*) was here yesterday desires to see you; knock at the first door, *which* you will find open; knock at the first door *that* (or *which*) you find open. In the restrictive use most authorities on grammar and composition prefer *that*, instead of *which* or *who*, except when the relative pronoun follows immediately the demonstrative *that* or is object of a preposition or in the possessive case; but among contemporary writers consistent discrimination between the restrictive *that* and the nonrestrictive *which* or *who* is not common. The preference of some grammatical authorities for *that* instead of *who*, for persons in restrictive clauses, is in present usage mostly unobserved because of the strong tendency to use *who* to express personality.

whole, adj. 1 Entire, *perfect, intact.

Ana. Sound, well, *healthy, robust, wholesome: complete, plenary, *full.

Con. *Deficient, defective: impaired, damaged, injured, marred (see INJURE).

2 **Whole, entire, total, all, gross** are here compared as meaning including each and every part, particle, individual, instance, etc., of, without exception. **Whole** implies that nothing has been omitted, ignored, abated, or the like; as, he devoted his *whole* energy to the task; the *whole* congregation approved the pastor's policy; the *whole* army will be mobilized; the *whole* country was affected. **Entire** may be used in place of *whole* in any of these illustrations; it, however, can, as *whole* cannot, imply actual completeness or perfection from which not only nothing has been taken but to which nothing can be added. "Whom to obey is happiness *entire*" (Milton). "He knows that God demands his heart *entire*" (Cowper). "Granting *entire* liberty of conscience" (Macaulay). **Total** implies that everything without exception has been counted, measured, weighed, or the like; as, the *total* amount gathered in a community-chest campaign; the *total* output of a factory for a particular year. Sometimes, especially when applied to something that is often incomplete, *total* is used as an indication that no reservation is made; as, a *total* eclipse; *total* blindness; a *total* silence. **All**, as here compared, is usually followed by *the*

or a possessive pronoun. Sometimes it equals *whole*; as, *all* the city (the *whole* city) was in an uproar: sometimes it comes closer to *entire*; as, *all* their affection (or their *entire* affection) was centered on their children: sometimes it equals *total*; as, *all* their earnings (their *total* or combined earnings) were insufficient for their needs. **Gross** is used, especially in financial statements, in place of *total*, to indicate that deductions, as for costs or expenses, have not yet been made; as, *gross* earnings; *gross* receipts.

Ant. Partial.

whole, n. Total, aggregate, *sum, amount, number, quantity.

Ant. Part: constituent: particular. — **Con.** Portion, piece, detail (see PART, *n.*): *item, detail: component, *element, integrant.

wholehearted. Whole-souled, heartfelt, hearty, unfeigned, *sincere.

Ana. Ardent, fervent, *impassioned, passionate: genuine, bona fide, *authentic: earnest, *serious.

wholesale. *Indiscriminate, sweeping.

wholesome. 1 *Healthful, healthy, salubrious, salutary, hygienic, sanitary.

Ant. Noxious. — **Con.** Deleterious, detrimental, *pernicious.

2 Sound, *healthy, robust, hale, well.

Ana. *Strong, sturdy, stalwart, stout.

whole-souled. Wholehearted, heartfelt, hearty, unfeigned, *sincere.

Ana. See those at WHOLEHEARTED.

wicked. Evil, *bad, ill, naughty.

Ana. *Immoral, unmoral, amoral: iniquitous, *vicious, villainous: *abandoned, reprobate, profligate, dissolute.

Con. *Moral, virtuous, righteous, ethical, noble.

wide. *Broad, deep.

Ana. *Spacious, capacious, ample: extended or extensive (see corresponding verb at EXTEND).

Ant. Strait. — **Con.** *Narrow: limited, restricted, confined (see LIMIT, *v.*).

wide-awake. *Watchful, vigilant, alert.

Ana. *Aware, alive, awake, conscious, sensible.

wield. Swing, *handle, manipulate, ply.

Ana. *Swing, flourish, brandish, wave: control, direct, manage, *conduct: exercise, drill, *practice.

wig, v. Tonguelash, jaw, bawl out, berate, *scold, upbraid, rate, rail, revile, vituperate.

Ana. Reprimand, reproach, rebuke, *reprove, chide.

wilderness. *Waste, desert, badlands.

wile, n. Artifice, feint, ruse, maneuver, *trick, stratagem.

Ana. *Deception, fraud, subterfuge, trickery, chicanery, chicane: cunning, *deceit, duplicity, dissimulation, guile.

wile, v. *While, beguile, fleet.

Ana. See those at WHILE, *v.*

will, n. Will, volition, conation are not often interchangeable because they vary greatly in their range of application and because the last two terms are frequently used to designate different steps in the process that is often denoted by *will*. Nevertheless, the terms are frequently confused when they refer to the power or act of making or effecting a choice or decision. **Will** applies not only to this power or act, but also to a psychological entity (once, but now less frequently, called a "faculty") that is the agent of this power, and to the process by which one makes his choice, resolves it into an intention, and puts that intention into effect. In all of these senses *will* may vary greatly in its specific meaning: it may, for example, denote a dominant desire or inclination which determines one's choice (as, "when he was confronted by

accidental extinction, he had felt no *will* to resist"—*Cather*), or it may denote a power that derives from one's conception of what is good or right and that tests and accepts or rejects one's desires or inclinations (as, "appetite is the *will's* solicitor, and the *will* is appetite's controller; what we covet according to the one, by the other, we often reject"—*Hooker*). Also, *will* often denotes mainly the determination that is inseparable from action or the effecting of one's decisions (as, "In the government of self, Bismarck's *will* broke down from time to time, as Richelieu's never did; and, after all, the government of self is the supreme test of *will*"—*Belloc*), but it may still be used when frustration or impossibility of action is suggested (as, "spirits disillusioned, who still pathetically preserve the *will* to conquer, even when life no longer presents them with anything worth winning"—*Binyon*). Further, *will* may designate a subjective power, act, process, or the like (as, "luxurious feeling and pathetic imagination, which make no severe call upon . . . the *will*"—*Inge*), or an objective force which must be encountered, challenged, obeyed, or the like (as, to submit oneself to the *will* of God; "this method of consulting the popular *will*"—*Bryce*). *Volition*, in contrast to *will*, is a comparatively simple term. In its ordinary and most sharply distinguished sense, it designates merely the act of making a choice or decision: it usually carries an implication of deliberation, but it rarely suggests struggle or determination to put one's decision or choice into effect. Therefore, it is the preferred term when no other implications are desirable or important; as, to surrender one's authority of one's own *volition*; "Our children do not seek school of their own *volition*" (*Grandgent*); "the primal necessity for the faithful is that by an act of the *will*,—not necessarily an emotional act, but an act of pure and definite *volition*,—they should associate themselves with the true and perfect sacrifice" (*A. C. Benson*). *Conation*, which is a technical and not always consistently defined term of psychology, usually implies a striving to get or achieve what is desired or willed. The term may or may not imply a conscious goal: it may suggest clearly directed striving or it may connote the restless aimless strivings which the mind cannot interpret or explain, but it always implies effort rather than choice. "Religion or the desire for the salvation of our souls, 'Art' or the desire for beautification, Science or the search for the reasons of things—these *conations* of the mind . . . are really three aspects of the same profound impulse" (*H. Ellis*).

Ana. Determination, *decision: *intention, intent, purpose, design: *choice, election, preference: character, *disposition, temper, temperament.

willful or wilful. 1 Deliberate, intentional, *voluntary, willing.

Ana. Determined, decided, resolved (see *DECIDE*): intended, purposed (see *INTEND*): *obstinate, stubborn, dogged, pertinacious.

Con. Acquiescent, *compliant: submissive, *tame.

2 Headstrong, intractable, refractory, recalcitrant, *unruly, ungovernable.

Ana. Rebellious, contumacious, factious, *insubordinate: *obstinate, mulish, bullheaded, pigheaded.

Ant. Biddable. — **Con.** Tractable, docile, amenable, *obedient.

willing. *Voluntary, intentional, deliberate, willful.

Ana. Prone, open (see *LIABLE*): inclined, predisposed, disposed (see *INCLINE*, *v.*).

Ant. Unwilling. — **Con.** Reluctant, loath, *disinclined, indisposed, averse.

wily. *Sly, cunning, crafty, tricky, foxy, artful.

Ana. Astute, sagacious, *shrewd: *subtle, subtle:

deceitful, cunning (see corresponding nouns at *DECEIT*).

win. Gain, earn, acquire, *get, obtain, procure, secure. **Ana.** Achieve, accomplish, effect (see *PERFORM*): attain, *reach, compass: *induce, persuade, prevail on or upon.

Ant. Lose.

wince. *Recoil, flinch, shrink, blench, quail.

Ana. Cringe, cower (see *PAWN*): balk, shy, stick, stickle (see *DEMUR*): squirm, *writhe.

wind, n. Wind, breeze, gale, hurricane, gust, blast, flaw, zephyr, whirlwind, cyclone, typhoon, tornado, waterspout, twister come into comparison as meaning air naturally in motion. Wind is the general term referable to any phenomenon of this sort, whatever its degree of velocity or of force; as, a strong wind; there is no wind tonight. Breeze in general nontechnical use is applied to a relatively light, but fresh wind; as, "The fair breeze blew, the white foam flew, The furrow followed free" (*Coleridge*). In meteorology, however, a breeze is defined as a wind with a velocity of from 7 to 38 miles an hour. Breezes are sometimes further described as gentle (8-12 miles an hour), moderate (13-18), fresh (19-24), strong or stiff (25-38). Gale in ordinary use is applied to a high, destructive wind of considerable velocity and force; technically, the term is sometimes used to cover a strong or stiff breeze, but it is more specifically applied to a wind between 39 and 75 miles an hour. A whole gale is described as one having a velocity of 55 to 75 miles an hour. Hurricane is popularly applied to any exceedingly violent or devastating windstorm. Its wind velocity in meteorology is usually between 75 and 100 miles an hour (see also under *cyclone*, below). The remaining terms are distinguished on other grounds than those of velocity and force. Gust, blast, flaw denote sudden winds of short duration. Gust and blast, however, may also be applied to one of the bursts or rushes which in alternation with lulls mark the course of many winds. Gust suggests a sudden puff of wind; blast, a lashing, driving current of wind. "An angry gust of wind Puff'd out his torch" (*Tennyson*). "Blasts that blow the poplar white, And lash with storm the streaming pane" (*Tennyson*). Flaw, which is now rarely used, is applied chiefly to a sudden and quickly passing windstorm; unlike gust and blast, it never suggests alternation of violence and quiet. Zephyr is a poetical term for any very light gentle breeze that delicately touches objects. "Fair laughs the morn, and soft the zephyr blows" (*Gray*). The last six terms all imply a rotatory motion of the wind. Whirlwind is applied by some meteorologists to any such wind; by others, however, it is restricted in its application to one of limited extent which begins with an inward and upward spiral motion of the lower air and is followed by an outward and upward spiral motion until, usually, there is a progressive motion at all levels. Cyclone, on the other hand, is a highly technical term, applicable chiefly to a system of winds that rotate (clockwise in the Southern Hemisphere, counterclockwise in the Northern Hemisphere) about a center of low barometric pressure, and which has in tropical countries a diameter of from 90 to 500 miles and in the temperate zones a diameter that is often as high as 1500 miles. In the tropics, the winds often rotate as rapidly as from 90 to 150 miles an hour and are highly destructive; in temperate regions, their rotation is often as low as from 9 to 15 miles an hour. In the West Indies and in the China Sea, where these cyclones are usually accompanied by rain, thunder, and lightning, and occur in greatest frequency between August and October, they are called hurricanes; in the Philippines and also in the China Sea, such a storm is often called a typhoon. In the United States, especially

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

in the central Mississippi valley, *cyclone* is often incorrectly used in place of *tornado* for a violent whirling wind which is accompanied by a funnel-shaped cloud and which moves with immeasurable speed in a narrow path over a stretch of territory, often sweeping away everything before it. A *waterspout* is a rapidly rotating funnel-shaped or tubular column of wind, enclosing fresh water, which extends from the under side of an ordinary cumulus or cumulo-nimbus cloud down to a cloud of spray torn up from the surface of the sea or of a large lake. *Twister* is a colloquial term often applied to a tornado, waterspout, or similar windstorm.

winding. *Winding, sinuous, serpentine, tortuous, flexuous, anfractuous* agree in meaning curving first one way and then another. *Winding*, the general and the ordinary term, often implies spiral ascent; as, *winding* stairs; a *winding* mountain road. When applied to things in a horizontal plane, it implies little more than weaving from side to side or in and out through some length, often without apparent plan; as, a *winding* path through a forest; a *winding* cave. "Following the serpent lightning's *winding* track" (*Shelley*). *Sinuous* fundamentally suggests frequent departures from a straight or direct line by curving. "Streams... *Sinuous* or straight, now rapid and now slow" (*Cowper*). In its figurative sense, where it implies moral deviation, this implication remains strong, but in literal use, the word tends to stress the presence of curves in every line, bend, and movement, and the absence of angularity, awkwardness, and the like; as, "the stealthy terror of the *sinuous* pard" (*F. Thompson*); the *sinuous* movements of the leading lady; "gardens bright with *sinuous* rills" (*Coleridge*). *Serpentine* implies curving in a pattern suggested by the smooth and flowing curves of a moving snake; it may or may not imply regularity in the size and shape of the inward and outward curves. "Up the heathy waste, [the road] Mounts, as you see, in mazes *serpentine*" (*Wordsworth*). As applied to a type of compound curve (*serpentine*, as opposed to *oxbow*, *curve*) or to the front of a bureau or sideboard having such a curve, the word implies that the bulging or convex curve is in the center. *Tortuous*, like *sinuous*, suggests lack of straightness and directness, but in contrast, it stresses the number and intricacy of bendings, twistings, and turnings rather than the constant flow of curves; as, the course of the river became more *tortuous* as we neared its source; "there remained but a *tortuous* defile for carriages down the centre of the street" (*Hardy*). *Flexuous*, a fairly uncommon word except in literary and some scientific use, comes close to *sinuous* in its implications but it stresses the capacity for bending and turning easily and with grace which gives *sinuosity* of line or movement. "Her lithe body undulating with *flexuous* grace" (*Holmes*). "Man cannot express love... by external signs, so plainly as does a dog, when with... *flexuous* body... he meets his beloved master" (*Darwin*). *Anfractuous*, a learned word, is applied chiefly to passages, crevices, channels, cavities, and the like, which are exceedingly tortuous and complicated; as, *anfractuous* cavities in the ear bone. Figuratively as well as literally, it connotes difficulty in following because of involutions, contortions, and the like; as, "so intricate, so *anfractuous*, so unsearchable are the ways of Providence" (*Henry More*); "among the *anfractuosit*ies of the human mind... is a superstitious reluctance to sit for a picture" (*Johnson*).

Ana. Curving, bending, turning, twisting (see *CURVE*, *v.*): circuitous, *indirect, roundabout: *crooked, devious.

Ant. Straight.

window, n. *Window, casement, dormer, oriel* agree in meaning an opening in the wall of a building that is

usually covered with glass and serves to admit light and air. *Window* is the ordinary general term for the entire structure, including both its framework and the glass or the movable sashes which that framework encloses. "Come to the *window*, sweet is the night air" (*Arnold*). *Casement* properly denotes a window sash attached to one of the upright sides of the frame by hinges; in ordinary use, however, the term is applied to a window or a series of windows (sometimes called *casement* window) with sashes of this character. Oftentimes, however, the word is less definite than this and is poetical in its associations. "Magic *casements*, opening on the foam Of perilous seas, in faery lands forlorn" (*Keats*). *Dormer* (or *dormer window*) denotes a window or a series of windows which stands out from a sloping roof and is typically enclosed by a gable-topped structure. An *oriel* differs from a dormer in projecting from a wall of a building (rather than from a roof) in being at least three-sided (usually either semi-hexagonal or semisquare in shape), and in being supported by a corbel or bracket (rather than by a rafter as in the case of a dormer). *Oriels* are often very ornate in design.

wing. *Ell, extension, *annex, dependence.*

wink, v. *Wink, blink* agree in meaning to move one's eyelids. Originally, to *wink* meant to close one's eyes; now it more often means to close and open the eyelids rapidly and usually involuntarily (as, "houses so white that it makes one *wink* to look at them"—*Dickens*) or to close one eye part way as a hint or a command (as, "Asiatics do not *wink* when they have out-manoeuvred the enemy, but... Mahbub Ali... came very near it"—*Kipling*). To *blink* is to wink involuntarily and with eyes nearly shut as if dazzled, or partly blind, or half asleep, or suddenly startled; as, to *blink* when roused from a sound sleep; to *blink* at the report of a gun. "He was... hauled up... *blinking* and tottering... into the blessed sun" (*Stevenson*). Figuratively, *wink* implies connivance, deriving this connotation from the original sense; *blink* (then properly a transitive verb), evasion or shirking; as, to *wink* at neglect of duty; to *blink* the issue.

winner. *Victor, conqueror, champion, vanquisher.

Ant. Loser.

winnow. *Sift, sieve, riddle, screen, bolt.

Ana. *Assort, sort, classify: *separate, divide: select, *choose, single out.

wipe out. *Exterminate, extirpate, eradicate, uproot, deracinate.

Ana. Obliterate, *erase, efface, expunge, blot out: *abolish, extinguish, annihilate: *destroy, demolish.

wisdom. Judgment, *sense, gumption.

Ana. Discretion, *prudence, foresight: judiciousness, sageness, saneness, sapience (see corresponding adjectives at *WISE*): sagacity, perspicacity, shrewdness (see corresponding adjectives at *SHREWD*).

Ant. Folly: injudiciousness.

wise, adj. *Wise, sage, sapient, judicious, prudent, sensible, sane* come into comparison when they mean having or manifesting the power to recognize the best ends and the best means to attain those ends. One is *wise* who is so discerning in his understanding of persons, conditions, or situations that he knows how to deal with them so as to correct what is wrong in them, how to get the best out of them considering their limitations or difficulties, or how to estimate them fairly and accurately: often also the term implies a wide range of experience or of knowledge or learning, but these implications are found less often in colloquial than in literary English; as, a *wise* teacher never pushes little children too far; "men... temperate, calm, and *wise*" (*Pope*); "knowing himself

wise in a mad world" (*Meredith*); "it is *wise* to be cautious in condemning views and systems which are now out of fashion" (*Inge*); "a *wiser* and more generous-hearted way to improve the shining hours" (*L. P. Smith*). One is *sage* who is eminently wise, being a philosopher by temperament and experience. The term commonly suggests a habit of profound reflection upon men and events and an ability to reach conclusions of universal as well as immediate value, and has been applied chiefly to persons and utterances that are venerated for their wisdom and good counsel. "What the *sage* poets, taught by the heavenly Muse, Storied of old in high immortal verse" (*Millon*). "For I, who hold *sage* Homer's rule the best" (*Pope*). "The natural crown that *sage* Experience wears" (*Wordsworth*). In somewhat looser use, *sage* often suggests the affectation or the appearance of great wisdom or knowledge, whether the matters concerned be of significance or not; as, "her *sage* plan to make the family feel her worth" (*Meredith*); "the older women seemed to have a kind of secret among themselves, a reason for *sage* smiles and glances" (*V. Sackville-West*). One is *sapient* who (in older and learned use) is *sage*, in the high sense of the term, or who (in current ironical use) gives the appearance of such sageship; as, "a *sapient*, instructed, shrewdly ascertaining ignorance" (*Pater*). One is *judicious* who is capable of arriving at wise decisions or just conclusions: the term usually suggests the ability to distinguish fact from falsehood and to eliminate all bias, with the result that one's judgments are fair, well-balanced, and levelheaded, as well as sound; as, "I am perfectly indifferent to the judgment of all, except the few who are indeed *judicious*" (*Cowper*); "I really think that, for *wise* men, this is not *judicious*" (*Burke*). "The love of knowledge is not perhaps as insatiable as with us, but it is infinitely more *judicious*" (*Brownell*). One is *prudent* (in the sense here compared: see also under *PRUDENCE*; *PRUDENT*, 3) who is so rich in practical wisdom that he is able to keep himself, his passions, and his actions under control and obedient to that which he knows as right and necessary. In this, the earlier and stricter sense of the term, *prudent* implies the use of one's reason in the attainment of the moral virtue that leads to right living, as distinguished from its use in the attainment of knowledge of things which transcend experience; as, "The *prudent* man looketh well to his going" (*Proverbs* xiv. 15); "The *wise* in heart shall be called *prudent*" (*Proverbs* xvi. 21). "Alas! what boots the long laborious quest Of moral *prudence*, sought through good and ill; Or pains abstruse—to elevate the will, And lead us on to that transcendent rest Where every passion shall the sway attest Of Reason" (*Wordsworth*). One is *sensible*, as here compared (see also *AWARE*, *PERCEPTIBLE*, *MATERIAL*), who in word or act does not exceed the dictates of common sense or of good sense: the term suggests a display of intelligence rather than of wisdom, and of natural reasonableness rather than the exercise of the reason; as, "Mr. Collins was not a *sensible* man, and the deficiency of Nature had been but little assisted by education or society" (*Austen*); "To discuss the ultimate career of a child nine years old would not be the act of a *sensible* parent" (*Bennett*); "Whatever he took up he did in the same matter-of-fact *sensible* way; without a touch of imagination, without a spark of brilliancy" (*V. Woolf*). One is *sane* who reveals his healthy-mindedness and levelheadedness in prudent, judicious, or sensible acts and words; as, "*Sane*... persons who are so well balanced that they can adjust themselves to the conditions of every civilization" (*H. Ellis*); "Thankful in his heart and soul that he had his mother, so *sane* and wholesome" (*D. H. Lawrence*).

Ana. Discreet, prudent, foresighted (see under *PRUDENCE*): *cautious, circumspect, calculating; sagacious, perspicacious, *shrewd, astute: knowing, *intelligent, alert, bright, smart.

Ant. Simple.

wisecrack, *n.* Crack, gag, *jest, joke, jape, quip, witticism.

wish, *v.* *Desire, want, crave, covet.

Ana. *Long, yearn, hanker, pine, hunger, thirst: aspire, pant, *aim: hope, *expect, look for.

Con. Spurn, refuse, *decline, reject, repudiate: scorn, *despise, disdain.

wishy-washy. *Inapud, vapid, flat, jejune, banal, inane.

Ana. Spiritless, enervated, *languid, listless: *weak, feeble: diluted, attenuated, thinned (see *THIN*, *v.*).

Con. *Spirited, high-spirited, mettlesome, spunky, fiery, peppery, gingery: stimulating, exciting, piquing, provoking (see *PROVOKE*).

wit, *n.* 1 Wit, intelligence, brain, brains, *mind, intellect, soul, psyche.

Ana. *Reason, intuition, understanding: comprehension, apprehension (see under *APPREHEND*): sagaciousness or sagacity, perspicaciousness or perspicacity (see corresponding adjectives at *SHREWD*).

2 *Wit, humor (or humour), irony, sarcasm, satire, repartee* are here compared not as close synonyms but as terms designating either a mode of expression or a quality of mind that manifests itself in what one writes or says and that has for its aim (when a mode of expression) or for its effect (when a quality of mind) the arousing of sudden sharp interest that is accompanied by amusement or laughter. *Wit* (etymologically, the power by which one knows, thinks, learns) from the sixteenth century to the eighteenth century denoted intellectual brilliancy and quickness in perception combined with the talent for expressing one's ideas in a sparkling effective manner. In this sense, *wit* may or may not imply the evocation of laughter, but it always suggests a delighting and entertaining; as, "They never meet but there's a skirmish of *wit* between them" (*Shak.*); "Brevity is the soul of *wit*" (*Shak.*); "True *wit* is nature to advantage dress'd. What oft was thought, but ne'er so well express'd" (*Pope*). Gradually, however, the implication of a power to evoke laughter or smiles became definitely associated with the term without any loss of its earlier suggestions of mental acuteness, of swift perception, especially of the incongruous, of verbal felicity, especially as shown in the expression's unexpectedness of turn, and of aptness of application; as, "He is always laughing, for he has an infinite deal of *wit*" (*Addison*); "The sprightly *wit*... the gaiety, That laugh'd down many a summer sun, And kept you up so oft till one" (*Pope*); "If thou hast *wit*, and fun, and fire, And ne'er gude wine did tear" (*Burns*). *Humor* since the early eighteenth century has been contrasted with *wit*, especially as one of two similar yet strikingly different modes of expression manifest in literature. Etymologically, *humor* denotes a fluid; in earliest English use, the term specifically applied to one of the fluids of the body (blood, bile, black bile, phlegm) which in medieval physiology were held to determine by their relative proportions the individual's temperament (as sanguine, choleric, melancholic, or phlegmatic); in later and still current use, *humor* denotes a particular disposition or inclination, especially one marked by eccentricity, oddity, whimsicalness, capriciousness, or the like. It is from this sense that the one here considered derives, for *humor* as a quality expressed in one's written or spoken words seems originally to have been associated with a

Ana. analogous words. *Ant.* antonyms. *Con.* contrasted words. See also explanatory notes facing page 1.

peculiar disposition that leads one to perceive the ludicrous, the comical, the ridiculous, and to express one's perceptions so as to make others see or feel the same thing. This meaning still prevails; as, he has the gift of *humor*; "she was always saved by her crisp sense of *humour*, her shrewd and mischievous *wit*" (*H. Ellis*). Partly as a result of a revolt against the brittle, unfeeling, often affected, wit of the eighteenth century, but even more as a result of the frequent eighteenth- and nineteenth-century contrasts of the two qualities, wit and humor, especially as evidenced in literary works, *humor* came to imply more human sympathy, more tolerance, more kindness than *wit*, a deeper sense of the inherent incongruities in human nature and human life, a feeling for the not readily perceived pathos as well as for the not readily perceived absurdness of characters, of situations, of consequences, and the like; hence, writers distinguished the *humor* of Chaucer and Shakespeare from the *wit* of Dryden and Pope; the *wit* of Molière's comedies from the *humor* of Don Quixote. "You expect *wit* from every man of any eminence in the eighteenth century. But of that sympathetic enjoyment of all the manifold contrasts and incongruities of life which we call *humor*, I think Wesley had very little" (*C. T. Winchester*). *Irony* (etymologically, dissimulation) applies chiefly to a way of speaking or writing in which the meaning intended is contrary to that seemingly expressed; as, "Of course Constance is always right," observed Sophia, with . . . *irony*" (*Bennett*); "She was assisted by an impetuous girl called Caroline . . . who by the *irony* of language 'waited' at table" (*C. Mackenzie*). In a more profound use, *irony* applies both to the quality of mind of a person, such as a poet, dramatist, or philosopher, who perceives discrepancies in life and in character (as between the appearance and the reality, or between what is promised and what is fulfilled, or between what is attempted and what is accomplished) and to the form of humor or wit which has for its aim that person's revelation of the mockery implicit in these contradictions; as, "There must be some meaning beneath all this terrible *irony*" (*Shaw*); "The second type [of memorable lines from the poetry of Wilfrid Owen] is . . . often witty in the seventeenth-century sense, always ironical: it works through a kind of understatement which recalls to us at once the grim and conscious *irony* of those who knew that 'their feet had come to the end of the world'" (*Day Lewis*). *Sarcasm* (derived from a Greek verb meaning to tear flesh like dogs) applies chiefly to a savage, bitter form of humor intended to cut or wound. *Sarcasm* may or may not imply the use of verbal irony (sometimes, in fact, it suggests plain speaking), but it always implies as its aim the intent to make the victim an object of ridicule; as, "In the intercourse of familiar life, he [Swift] indulged his disposition to petulance and *sarcasm*" (*Johnson*); "The arrows of *sarcasm* are barbed with contempt" (*W. Gladden*). *Satire* primarily designates a type of writing the object of which is to hold up vices or follies (especially those of a people, an age, or the like) for ridicule and reprobation. "Jonson's drama is only incidentally *satire*, because it is only incidentally a criticism upon the actual world. It is not *satire* in the way in which the work of Swift or the work of Molière may be called *satire*: that is, it does not find its source in any precise emotional attitude or precise intellectual criticism of the actual world" (*T. S. Eliot*). Only secondarily does the term apply to a quality of mind or a way of looking at men and conditions. "Stamm adores Remson because he [Remson] has no *satire* at all. You have no conception of the terror of such souls in the presence of the barbed glance and the hyena laughter of the humorist" (*Wm.*

McFee). *Repartee*, once applied to a witty or clever retort, now applies chiefly to the power or art of answering quickly, pointedly, skillfully, and with wit or humor or, less often, irony or sarcasm. "As for *repartee* in particular, as it is the very soul of conversation, so it is the greatest grace of comedy" (*Dryden*). "I hadn't known Jane spoke so well. She has a clever, coherent way of making her points, and is concise in reply if questioned, quick at *repartee* if heckled" (*R. Macaulay*).

Ana. Quick-wittedness, alertness, brightness, brilliancy, cleverness, smartness, intelligence (see corresponding adjectives at INTELLIGENT): raillery, *badinage, persiflage: pungency, piquancy, poignancy (see corresponding adjectives at PUNGENT).

witchcraft. Wizardry, witchery, sorcery, *magic, alchemy, thaumaturgy.

witchery. *Magic, sorcery, witchcraft, wizardry, alchemy, thaumaturgy.

with. *By, through.

withdraw. 1 *Remove, draw.

Ana. *Separate, part, sever, sunder.

Ant. Introduce: bring.

2 *Go, leave, depart, quit, withdraw, retire, scam, clear out.

Ana. Abscond, decamp, *escape, flee, fly: retreat, *recede.

Con. Arrive, *come.

wither. *Wither*, shrivel, rivel, wizen come into comparison as meaning to lose or cause to lose freshness and smoothness of appearance. *Wither* implies a loss of vital moisture, such as sap or body fluids, with consequent fading or drying up and ultimate decay or death (as, *withered* leaves, flowers; "[blossoms] which fall before they *wither*"—*Binyon*): the term is often used in an extended sense implying a similar loss of vitality, vigor, animation, or the like; as, "a man, old, wrinkled, faded, *wither'd*" (*Shak.*); "Age cannot *wither* her, nor custom stale Her infinite variety" (*Shak.*); "Art, he [D. H. Lawrence] thought, should flower from an immediate impulse towards self-expression or communication, and should *wither* with the passing of the impulse" (*A. Huxley*). *Shrivel* carries a stronger implication of becoming wrinkled or crinkled or shrunken in size than *wither*: usually also it implies a cause such as a blasting or blighting by or as if by intense heat, or a lack of invigorating influences such as rain or, in extended use, lack of encouragement, stimulation, variety of employments, or the like; as, the leaves *shrivel* in the hot sun; age has *shriveled* her skin; "[The cow's] udder *shrivels* and the milk goes dry" (*Frost*); "When the soul of a youth can be heated above common heat, the vices of passion *shrivel* up" (*Meredith*); "The man whose . . . practical life [is] *shrivelled* to an insignificant routine" (*H. Ellis*). *Rivel* (which is now rare), like *shrivel*, implies a wrinkling, shrinking, and a blighting, especially by age; as, the peaches are *riveling*; a *riveted* skin. *Wizen*, especially in the past participle, is often preferred to *wither* or *shrivel* when the ideas of shrinking in size, and the wrinkling of the face or other surface, especially through age, lack of nourishment, or the like, are especially stressed; as, a *wizened* old man; the *wizened* face of a poorly nourished boy; "Was there a *wizened* shrub, a starveling bough" (*Browning*).

Ana. *Dry, parch, desiccate: shrink, *contract, constrict.

withhold. Detain, keep back, retain, hold back, reserve, *keep.

Ana. *Restrain, curb, check, bridle, inhibit: refuse, *decline.

Con. Accord, *grant, concede, award, vouchsafe.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

withstand. Resist, *oppose, combat, antagonize.

Ana. *Bear, endure, stand, tolerate, suffer: thwart, baffle, balk, foil, *frustrate: assail, *attack, assault.

Con. Submit, *yield, capitulate.

witness, n. *Spectator, observer, beholder, looker-on, onlooker, eyewitness, bystander, kibitzer.

witness, v. *Certify, attest, witness, vouch for.

Ana. Testify, affirm, *swear, asseverate: subscribe (see **ASSENT**).

wits. Wit, intelligence, brain, brains, *mind, intellect, soul, psyche.

Ana. See those at **WIT, n., 1.**

witticism. *Jest, joke, jape, quip, wisecrack, crack, gag.

Ana. *Wit, humor, sarcasm, satire, irony, repartee.

witty, adj. Witty, humorous, facetious, jocular, jocose come into comparison when they are applied especially to persons and their utterances and mean provoking or intended to provoke laughter, smiles, or the like. **Witty** (cf. **WIT**) suggests a high degree of cleverness, and quickness in discerning amusing congruities or incongruities; it may connote sparkling pleasantry (especially in repartee), but it often suggests sarcasm or causticity. "A *witty* thing never excited laughter; it pleases only the mind, and never distorts the countenance" (*Chesterfield*). "There's no possibility of being *witty* without a little ill-nature; the malice of a good thing is the barb that makes it stick" (*Sheridan*). "Alan of Lille in the thirteenth century *wittily* said 'Authority has a nose of wax; it can be twisted either way'" (*Inge*). **Humorous** is now a generic term applied to anyone or anything that provokes laughter; as, a *humorous* account of a picnic; a *humorous* lecture; the *humorous* characters of Shakespeare's plays. As opposed to *witty*, however, *humorous* often suggests sensibility rather than intellect, sympathy rather than aloofness in criticism, and sometimes, whimsicality rather than direct insight; thus, Pope is often described as a *witty*, Burns as a *humorous*, poet. "Whose *humorous* vein, strong sense, and simple style May teach the gayest, make the gravest smile" (*Cowper*). "The genius of the Italians is acute. . . but not subtle; hence, what they think to be *humorous* is merely *witty*" (*Coleridge*). **Facetious**, though originally used without the derogatory connotations it now commonly carries, has always implied mirthfulness or merriment. It now suggests a kind of attempt at witiness or humorlessness that pleases its maker more than others. "Probably the most tedious bore on earth is the man who feels it incumbent upon him always to be *facetious* and to turn everything into a joke" (*J. Fiske*). "A sort of human stratification of which. . . the body of the orchestra [was] high-brow, the first balcony sentimental and virtuous, the gallery *facetious*" (*M. Austin*). "Curates, mothers-in-law, British workmen, shopwalkers all recognized as fair sport for the *facetious*" (*C. Mackenzie*). **Jocular** also implies a fondness for jesting and joking, but suggests as its motive the desire to make others laugh or to keep them amused. It may or may not imply loquaciousness; it usually suggests a jolly mood or disposition. "His more solemn and stately brother, at whom he laughed in his *jocular* way" (*Thackeray*). "The water-colour lesson enlivened by the *jocular* conversation of the kindly, *humorous* old man was always great fun" (*Conrad*). **Jocose** always suggests waggishness or sportiveness in jesting and joking; it often also carries a strong implication of facetiousness. "Sundry *jocose* proposals that the ladies should sit in the gentlemen's laps" (*Dickens*).

Ana. Amusing, diverting, entertaining (see **AMUSE**): sparkling, scintillating (see **FLASH, v.**): *caustic, mordant, acrid, scathing: penetrating, piercing, probing (see **ENTER**).

wizard. *Expert, adept, artist, artiste, virtuoso, dab, dabster.

wizardry. Witchcraft, witchery, sorcery, *magic, alchemy, thaumaturgy.

wizen. *Wither, shrivel, rivel, wizen.

Ana. Shrink, *contract: dwindle, diminish, reduce, *decrease.

wobble or wabble. Teeter, totter, shimmy, quiver, shiver, shudder, quaver, quake, *shake, tremble, didder, dither.

woe. Grief, anguish, heartache, *sorrow, dole, regret.

Ana. *Distress, suffering, misery, agony, dolor: lamenting, bewailing, hemoaning, deploring (see **DEPLORE**).

Con. Elation, exultation (see corresponding adjectives at **ELATED**): *happiness, bliss, felicity.

woman. *Female, lady.

womanish. Womanlike, womanly, ladylike, feminine, *female, effeminate.

Ant. Mannish.

womanlike. Womanly, womanish, ladylike, feminine, *female, effeminate.

Ant. Manlike.

womanly. Womanlike, ladylike, womanish, feminine, *female, effeminate.

Ant. Manly.

wonder, wonderment. Wonder, wonderment, **amaze, amazement, admiration** are synonymous when they denote the complex emotion aroused by that which is inexplicable, or incomprehensible, and, often, awe-inspiring. **Wonder** and **wonderment** commonly suggest novelty or strangeness in that which excites the emotion, and astonishment or perplexity in the person affected. "And still the *wonder* grew That one small head could carry all he knew" (*Goldsmith*). In its richest use, as in poetry and in criticism, *wonder* often implies rapturous awe. "Nor any power above or under Ever made us mute with *wonder*" (*Shelley*). **Amaze** (chiefly in poetry) and **amazement** stress bewilderment or loss of power to collect one's thoughts; they rarely give any indication of like or dislike for the object exciting the emotion. "Then from *amaze* into delight he fell" (*Keats*). "We seemed stuck to the ground for some time, as if actually petrified with *amazement*" (*Goldsmith*). **Admiration**, which is etymologically close to *wonder*, usually adds the implication of absorbed or ecstatic attention; as, they were lost in *admiration*. "A Kioto painter. . . who burnt a hole in his roof to admire a moonlight effect, and in his rapt *admiration* omitted to notice that he had set a whole quarter of the city on fire" (*Binyon*).

Ana. Awe, *reverence, fear: astonishment, amazement (see corresponding verbs at **SURPRISE**): perplexity, puzzlement, bewilderment (see corresponding verbs at **PUZZLE**).

wont, n. *Habit, habitude, practice, usage, custom, consuetude, use.

Ana. Way, manner, fashion (see **METHOD**).

wonted. Accustomed, customary, habitual, *usual.

Ana. Familiar, *common, ordinary: natural, *regular, normal, typical.

woo, v. Court, solicit, *invite, bid.

Ana. Allure, *attract: *lure, entice, seduce: blandish, *coax, cajole, wheedle: pursue, chase, *follow, trail.

wood, adj. *Insane, mad, crazy, crazed, demented, deranged, lunatic, maniac, non compos mentis.

wooden. *Stiff, rigid, inflexible, tense, stark.

Ana. *Firm, hard, solid: *heavy, weighty, ponderous: clumsy, *awkward.

Con. Pliant, pliable, *plastic: *supple, limber.

word, n. Word, **vocabulary, term** agree in meaning any

combination of letters capable of being pronounced or written to express the single idea that is by tradition or common consent associated with that combination. **Word** is not only the most commonly used but is the widest in its application and richest in its implications of the units of this group. Its one limitation is that it applies only to a combination of letters or sounds that forms an indivisible whole and that constitutes one of the ultimate units of language. Otherwise it may suggest a concept, designate a person or thing, assert being, mode of being, or a specific action, express a relation or connection, or the like; as, "the law of the land" is a phrase of five *words*; he knew no *words* to express so subtle an idea; purity of style depends on the choice of *words*. **Vocable** denotes a word, but it throws the emphasis upon the word as pronounced or spelled rather than upon its denotation or meaning. "The word *star* therefore has, in our r-slighting speech, two pronunciations, *stah* and *star*, according to what comes after it. So it is, potentially, with every r-tailed *vocable*" (*Grandgent*). "A flat denial of poetic possibilities, in the case of any *vocable*, is liable to disastrous refutation by a triumphant instance of the 'poetizing' (as Goldsmith calls it) of that very *word*" (*Lowe*). **Term** differs from *word* in being applicable not only to words as units of language but to phrases that express a single idea and form therefore one of the units of expression; as, legal *terms* such as "right of way" or "cease and desist." **Term** further differs from *word* in applying only to such words and phrases as have a precisely limited, often technical, use or meaning. It therefore usually implies need of clear definition and of strict adherence to this definition. "As adopted by Augustus, it [the word *princeps*] was a popular appellation, not a *term* of constitutional art, defining a status rather than an office" (*Buchan*). "This *term* ['moral sense'] was long a stumbling-block in the eyes of innocent philosophic critics, too easily befooled by *words*" (*H. Ellis*). "The outlook, domestic and international, was still what those who think in *terms* of colour call black. The Irish question, the Russian question, the Italian-Adriatic question, all the Asiatic questions, remained what those who think in *terms* of angles call acute" (*R. Macaulay*).

Ana. Expression, idiom, *phrase, collocation, locution.

wordbook. *Dictionary, lexicon, glossary, onomasticon, gazetteer, synonymicon.

wordy. **Wordy, verbose, prolix, diffuse, redundant** come into comparison when they are applied to a person's style in writing or speaking, or to a discourse or part of a discourse, and mean using or manifesting the use of more words than are necessary to express the thought. **Wordy** often carries no further implications, though it may suggest garrulousness or loquacity when the reference is to that which is spoken; as, *wordy* arguments; a *wordy* discussion about nothing important; a *wordy* essay. The term is also applicable directly or indirectly to persons as well as to their utterances; as, "a *wordy*, prolegomenous babbler" (*Stevenson*). **Verbose** suggests overabundance of words as a literary fault characteristic especially of a writer or public speaker or of an entire work or speech: it often implies resulting dullness or obscurity of expression, or the author's lack of incisiveness, confusion of ideas, or grandiloquence; as, a *verbose* style; a dull *verbose* narrative; his letters are full of interesting details but they are never *verbose*. **Prolix** implies such attention to minute details as to extend what is written or told beyond all due bounds: the term carries a far stronger implication of tediousness or wearisomeness than *verbose*; as, "these enormously *prolix* harangues" (*Coleridge*); "This, then, was Nuflo's story,

told not in Nuflo's manner, which was infinitely *prolix*" (*Hudson*). **Diffuse** usually implies verbosity, but it throws the emphasis upon the lack of compactness and condensation needed for pointedness and for strength of style: consequently it often attributes flabbiness, looseness, or desultoriness to that which is written. "The one can be profuse on occasion; the other is *diffuse* whether he will or no" (*J. R. Lowell*). "Though Seneca is long-winded, he is not *diffuse*; he is capable of great concision" (*T. S. Eliot*). **Redundant** applies chiefly to anything which is superfluous, but as here considered it applies especially to words or phrases which are superfluous because repetitious or unnecessary (as, to cut out all *redundant* words in a poem) or to writers, speakers, and utterances that manifest a tendency to indulge in redundancies (see *redundancy* under **VERBIAGE**). "The naturally copious and flowing style of the author is generally *redundant*" (*J. Mackintosh*). "She had been, like nearly all very young writers, superfluous of phrase, *redundant*" (*R. Macaulay*).

Ana. *Inflated, turgid, tumid, flatulent: bombastic, *rhetorical: loquacious, garrulous, voluble, *talkative.

Con. Laconic, *concise, terse, succinct, summary, pithy, compendious.

work, n. 1 Work, labor (or labour), travail, swink, toil, drudgery, grind agree in meaning effort or exertion directed to the accomplishment of an end, or the employment or activity which involves such expenditure of effort or exertion. **Work** is the most comprehensive of these terms, for it may imply activity of body, or of mind, or of a machine, or, in its largest sense, of any natural force. It is applicable not only to the exertion, and to the employment which involves such exertion (as, "[to the inspired artist] *work* is what alcohol is to the dipsomaniac"—*C. E. Montague*; to take up one's *work*) but also to that which is accomplished or produced by such exertion (as, this statue is the *work* of a gifted but unknown sculptor; you have done a day's *work* in three hours) and to the material upon which one is employed (as, put your *work* away). **Labor** (see also **CHILDBIRTH**) differs from *work* not so much in its specific denotations as in its implications: as a rule, it implies human work, and therefore suggests physical or intellectual exertion only: it may suggest more strenuousness than *work*, but this difference is not as common as generally believed; as, "*Labour* is doing what we must; leisure is doing what we like; rest is doing nothing whilst our bodies and minds are recovering from their fatigue" (*Shaw*); "the larger part of the *labour* of an author in composing his work is critical *labour*; the *labour* of sifting, combining, constructing, expunging, correcting, testing" (*T. S. Eliot*); "Sir William Meredith, anticipating the *labors* of Romilly, protested against the barbarity and the inefficacy of a criminal code" (*G. O. Trevelyan*). **Travail** (see also **CHILDBIRTH**), now largely a bookish or literary word, carries a stronger implication of painful effort or exertion than does *labor*: in fact, that connotation is often so strong that the term tends to denote suffering rather than labor; as, "The sentimentalist escapes the stern *travail* of thought" (*Lowe*); "It breaks his heart... That all his hours of *travail* here for men Seem yet in vain" (*V. Lindsay*). **Swink**, an Old and Middle English term, now archaic or dialectal, is used chiefly when the idea of heavy physical labor is to be suggested: it is now replaced largely by *toil*, when labor that is prolonged and highly fatiguing, but not necessarily physical, is implied. "His thythes payed he ful faire and wel, Bothe of his propre *swink* and his catel" (*Chaucer*); "Who reckes of summer sweat and *swink*...?" (*A. Austin*). "Ye stopped your ears to the warning—ye would neither look

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

nor heed— Ye set your leisure before their *toil* and your lusts above their need" (*Kipling*); "For years he led a life of unremitting physical *toil*" (*Buchan*). *Drudgery* implies dull, irksome, and distasteful labor; as, "[Johnson] relieved the *drudgery* of his Dictionary . . . by taking an active part in the composition of the *Adventurer*" (*Boswell*) [cf. Johnson's definition of a lexicographer as "... a harmless *drudge*"]; "*labor* of the hands . . . pursued to the verge of *drudgery*" (*Thoreau*). *Grind* applies to labor that one finds *toil* or *drudgery* and, also, trying to the nerves or exhausting to mind or body; as, "The long *grind* of teaching the promiscuous and preoccupied young" (*H. James*).

Ana. Exertion, *effort, pains, trouble: *task, duty, job, chore.

Ant. Play.

2 Work, employment, occupation, calling, pursuit, métier, business come into comparison only when they denote the specific kind of labor or activity in which a person engages seriously, especially (but not invariably) as a means of earning a livelihood. *Work* is the most general of these terms, being applicable to any kind of labor, whether physical or intellectual, whether carried on by the hour, day, week, month, or longer period, and whether done for pay or not, and, if the former, whether compensated for by an employer or out of one's fees for services or the profits of one's business; as, to seek *work*; to be out of *work*; his *work* is that of a railroad engineer; he is at *work* on his book or in his office or in his garden. *Employment* may denote the work (or other activity) in which one employs or uses one's time. "She sat quietly down to her book after breakfast, resolving to remain in the same place and the same *employment* till the clock struck one" (*Austen*). As here compared, however, it implies work for which one has been engaged and is being paid for by an employer or master; as, he is unable to find *employment*; his *employment* is that of a book-binder (or a reporter, or a chauffeur). "I . . . went from town to town, working when I could get *employment*" (*Goldsmith*). *Occupation*, as here compared, though often used interchangeably with *employment*, is actually more inclusive for it does not necessarily connote service under an employer or master, and may be referred to the work of any kind in which one engages habitually or for which one has been trained; as, he is by *occupation* a teacher (or an editor, or an architect, or a motorman, or a book-binder, or a shoemaker); she is a stenographer by *occupation*, but is at present unemployed; one loses one's *employment* (not one's *occupation*) but one follows an *occupation* (not an *employment*). "These are the chief questions which a man would ask . . . whom circumstances allowed to choose his *occupation*" (*Inge*). *Calling* is sometimes used in place of *occupation*, often somewhat euphemistically, with the implication that one has been called to it by God, or by one's nature or special tastes; as, his *calling* is that of a preacher; the learned *callings*; to make one's choice of a *calling*. "Miss Jekyll had received that luckiest of fairy-gifts, a *calling* . . . something that she loved to do" (*L. P. Smith*). *Pursuit* may also be used in place of *occupation*, but it is still more often found in the sense of the trade, craft, profession, business, or art that is followed, often, but far from exclusively, as a means of earning one's living. "They never have to learn to adjust themselves to people whose tastes and *pursuits* are different from their own" (*B. Russell*). "Though it was supposed to be proper for them to have an *occupation*, the crude fact of money-making was still regarded as derogatory, and the law, being a profession, was accounted a more gentlemanly *pursuit* than business" (*E. Wharton*). *Métier*, originally

a French term for trade or craft, or, more generally, work, is much used in English with some of the connotations of the words *calling* and *pursuit*; as, he believed that writing novels was his *métier*. In careful use, however, it often follows its French significance; as, this hairdresser knows his *métier*. *Business* is often used in the sense of *work* or, sometimes, of *occupation*; as, "the *business* of keeping a lunatic asylum" (*Baron Denman*); "I hated, and still hate, the awful *business* of research" (*Bennett*).

Ana. *Trade, craft, handicraft, art, profession.

3 Work, product, production, opus, artifact (or artefact) come into comparison only when they denote a concrete thing that is made or brought into being by the exertion of effort and the exercise of skill. *Work* is now applied to anything that comes under this general definition, such as something that is manufactured or that is constructed or built, only when used without reference to a particular concrete thing (as, the *work* reveals the workman) or when used with a possessive (as, the cabinet-maker is proud of his *work*; to preserve from destruction every church that is known as Christopher Wren's *work*) or in certain combinations (as, fireworks, waxworks). Otherwise it is applied to a thing that results from mental labor, especially, but not always, one involving composition and artistry in execution (in the latter case sometimes specifically called a *work of art*); thus, the *works* of Keats include his poems and, usually, his prefaces; the *works* of Beethoven are his musical compositions; "The Thinker" [a statue] is one of Rodin's *works*; the new history of literature promises to be a monumental *work*. *Product*, as here narrowly considered (for its applications and specific implications see *PRODUCT*, 2), is applied chiefly to articles of manufacture, whether they are made by hand or with the aid of machinery; as, the factory seeks a market for its *products*; she was unwilling to part with the embroideries and laces that were the *products* of her handiwork. "Synthetic materials impart their special properties to perfumes and flavors and when properly used, increase rather than diminish the value of the *product*" (*A. C. Morrison*). When, as sometimes happens, *product* rather than *work* is used of a poem, novel, statue, or the like, it is often either depreciative in its connotations or definitely non-committal. "This dull *product* of a scoffer's pen" (*Wordsworth*). "Shall a literary *product* reveal the spirit of its age and be silent as to the spirit of its author?" (*G. Matheson*). *Production* is sometimes used where *work* would be the commoner and the idiomatic term, but it is avoided by many writers or speakers who look upon it as a formal or slightly bombastic word; others, however, prefer it when it is qualified by a superlative; as, the noblest *productions* of literary genius; the finest *productions* of Michelangelo. "So one [Pygmalion] whose story serves at least to show Men loved their own *productions* long ago, Wooded an unfeeling statue [Galatea] for his wife" (*Cowper*). In current use, it is applied to a theatrical or similar performance viewed as the work of a producer or director who is responsible for all the details; as, the recent "Hamlet" was a magnificent *production*. *Opus* (the Latin term for *work*) is applied almost exclusively (except in humorous use) to a musical composition or group of compositions; it is commonly followed by a number designating the order of its publication or, sometimes, execution; as, Beethoven's *opus* 27. *Artifact* is restricted in its application to an artificial as distinguished from a natural product. It usually implies human workmanship, but it is seldom applied to any product except that of primitive men. The term is used largely by archaeologists as a general designation for primitive

weapons and implements as well as works of art; as, flints, arrowheads, and other *artifacts* of stone.

Art. Article, object, *thing; accomplishment, achievement, performance (see corresponding verbs at **PERFORM**).

work, *v.* Operate, function, *act, behave, react.

worked. **Worked**, **wrought** come into comparison as past participles of the verb *work*. They are especially distinguished when used adjectivally in the sense of subjected to some treatment or process. **Worked** now applies chiefly to fabrics or materials which are embellished with needlework, engraving, or the like, or to things made from such fabrics or materials: in this sense, the term is often equivalent to *embroidered*, *chased*, *engraved*, etc.; as, *worked* canvas for chair seats; *worked* napkins; *worked* initials on a handkerchief; the *worked* case of a watch. **Wrought** is preferred to *worked* when molding or fashioning into shape is implied, though it is often used when any more or less laborious method of refining, polishing, decorating, carving, or the like, is implied; as, "cups of *wrought*...gold" (*Shelley*); "The screen... of gilt Spanish leather, stamped and *wrought* with a rather florid Louis-Quatorze pattern" (*Wilde*); "first drafts [of poems]... *wrought*... down by long labour into their final structure" (*J. W. Mackail*). **Wrought** is also used in opposition to *raw*, or *unprocessed*, and implies that the material so described has been subjected to some process that fits it for industrial or other use; thus, *wrought* silk is silk that has been spun; *wrought* iron (usually contrasted with *cast* iron) is iron that has been so processed that it is tough, yet relatively soft, and therefore malleable.

worker. **Worker**, **workman**, **workingman**, **laborer**, **navvy**, **craftsman**, **handicraftsman**, **mechanic**, **artisan**, **hand**, **operative**, **roustabout** come into comparison because they mean, or have meant, or have come to mean, one who earns his living by labor, especially by manual labor. **Worker**, by far the most comprehensive and least specific of these terms, applies to anyone who earns his living by work of hand or brain; as, *office workers*; *factory workers*; unions for all types of *workers*. **Workman** does not, in any of its senses, imply any specific kind of work, but in all but its extended senses it commonly implies manual labor. It may be applied to one engaged to do a specified piece of work or to help in the construction of something requiring many workers: it may also be applied to a skilled or to an unskilled worker. Usually, it has implied opposition to *employer*, or *manager*, or *foreman*, or the like; as, there were 50 *workmen* on the job; he is the most competent *workman* in our employ; they are about to add 200 *workmen* to their force. In extended use, the term is applicable to a worker in any field, whether he works with his hands or with his mind, provided he makes, constructs, invents, or creates something. "High-minded and untiring *workmen*, they have spared no pains to produce a poetry finer than that of any other country in our time" (*Amy Lowell*). **Workingman** is far more restricted in its range of application than *workman*, and is, in spite of varying legal definitions, applied commonly to a wage-earner such as one who at an hourly, daily, or weekly rate pursues a trade (carpentry, masonry, plumbing, etc.), or is employed in a mercantile, manufacturing, or industrial establishment. Consequently, the plural of the term usually applies to a class as distinguished from industrialists, merchants, professional men, and the like. **Laborer**, and its British synonym **navvy**, like the preceding terms, are not always fixed in their application, but they commonly designate one on a construction or excavation job whose work demands strength and physical exertion rather than skill; thus, a bricklayer's *laborer* (usually called *helper* in

the United States) carries bricks and mortar and mixes mortar; "the wages of the *navvy* who swings a sledgehammer" (*Shaw*). In general, in American use, loaders, carriers, wheelers, cleaners, diggers, and the like, are classified as *laborers*; as, *day laborers*; *farm laborers*. **Craftsman** and **handicraftsman** strictly apply to one who is a skilled workman in a craft or handicraft (for these terms see **TRADE**, 1). The terms are now as common in general as in technical use. **Craftsman**, in current use, often applies to a worker who is a competent technician or who is versed in the technique of his art, profession, trade, or the like. It is especially used of artists, writers, playwrights, skilled artificers, and the like; as, "Pope... one of the most consummate *craftsmen* who ever dealt in words" (*Lowes*); "The good *craftsman* constructs his product as perfectly as he can... He becomes an artist in so far as he treats his materials also for themselves" (*S. Alexander*). **Mechanic** and **artisan** in their earliest English senses applied to one of a class of workmen. **Mechanic**, in its older sense, usually applied to one of the class now called *workingmen*, but first suggested employment in manual work and later in a factory or industry requiring operation of machines; as, "An English *mechanic*... instead of slaving like a native of Bengal for a piece of copper, exacted a shilling a day" (*Macaulay*). In current use, *mechanic* applies specifically to a workman skilled in the repair or adjustment of machines or engines; as, an automobile *mechanic*; an aviator's *mechanic*. **Artisan** is now more often opposed to *artist* (for this sense, see under **ARTIST**, 1) than employed as a designation of a particular type of workman. When the term is used in the latter sense, however, it commonly applies to one who is skilled in his trade, such as a carpenter, a weaver, a bootmaker, or the like; as, "We pass from the weavers of cloth to a different class of *artisans*" (*Macaulay*). **Hand** is a colloquial term, usually applied to one of a crew, a force, a gang, or the like, of workmen, but sometimes to an owner's or proprietor's helper or assistant; as, a deck *hand*; a farm *hand*; mill *hands*; "My son has lately lost his principal *hand* by death" (*Franklin*). **Operative**, a general term suggestive of modern industrial conditions, applies to any workman employed in a mill, a manufactory, or any industry utilizing machines: it has now nearly displaced the older terms *mill hand*, *factory hand*, etc.; as, the steel works employ as many as 2000 *operatives*. **Roustabout** (chiefly United States) is often merely another term for *laborer*, but it carries distinguishing implications such as muscular fitness for exceedingly heavy work, roughness, and, often, migratory habits; as, longshoremen and other *roustabouts*.

Ant. Idler.

workingman. **Workman**, **laborer**, ***worker**, **navvy**, **craftsman**, **handicraftsman**, **mechanic**, **artisan**, **operative**, **hand**, **roustabout**.

workman. ***Worker**, **workingman**, **laborer**, **navvy**, **craftsman**, **handicraftsman**, **mechanic**, **artisan**, **operative**, **hand**, **roustabout**.

world. **Universe**, ***earth**, **cosmos**, **macrocosm**.

worldly. **Mundane**, ***earthly**, **terrestrial**, **terrene**, **earthy**, **mortal**, **sublunary**.

Art. Temporal, ***profane**, **secular**: ***material**, **physical**, **corporeal**: ***carnal**, **fleshy**, **sensual**.

Con. ***Celestial**, **heavenly**, **empyrean**: **sacred**, ***holy**, **spiritual**, **divine**, **religious**.

worn. ***Haggard**, **careworn**, **pinched**, **wasted**, **cadaverous**.

Art. Exhausted, ***tired**, **wearied**, **fatigued**, **fagged**, **jaded** (see **TIRE**, *v.*): **gaunt**, **scrawny**, **skinny**, ***lean**.

Con. Refreshed, restored, rejuvenated (see **RENEW**):

***vigorous**, **lusty**, **energetic**, **strenuous**.

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

worried. Anxious, concerned, careful, solicitous. See under CARE, *n*.

Ana. Apprehensive, afraid, *fearful: troubled, distressed (see TROUBLE, *v*.): harassed, harried (see WORRY, *v*.).

Con. Comforted, solaced, consoled (see COMFORT, *v*.).

worry, *v*. Worry, annoy, harass, harry, plague, pester, tease, tantalize come into comparison when they mean to torment so as to destroy one's peace of mind or to disturb one acutely. **Worry**, in the sense here considered, retains implications derived from an earlier meaning, to attack repeatedly and savagely by biting or shaking, as a hound killing its quarry. "That dog, that had his teeth before his eyes, To worry lambs and lap their gentle blood" (*Shak.*). For it stresses incessant attacking or goading and an intention (sometimes an effect) of driving the victim to desperation or defeat; as, to pursue a policy of *worrying* the enemy. "Worry him out till he gives his consent" (*Swift*). "Brother should not war with brother, And worry and devour each other" (*Cowper*). The sense of **annoy** here considered is not always clearly distinguishable from its other sense (see ANNOY, 1), the word being sometimes so used that the emphasis is both on the agent's acts or intentions and on the victim's subjective reactions; when, however, the former is stressed, it implies molestation, interference, intrusion, or the like, to the point of becoming a nuisance. "Therefore has he [the father] closely mew'd her up, Because she will not be annoy'd with suitors" (*Shak.*). "Wilt thou [Samson] then serve the Philistines with that gift Which was expressly given thee to annoy them?" (*Milton*). "Clouds of flies... annoyed our horses" (*Borrow*). **Harass** usually implies persecution, especially continued petty persecutions, or burdensome demands, or exactions that drive one to distraction or exhaust one's nervous or mental power. "It is good for boys and girls to know that their father can be harassed by worries and their mother worn out by a multiplicity of details" (*B. Russell*). **Harry**, though often used interchangeably with **harass**, more vividly suggests maltreatment and oppression. "In 1903 throughout the Islands death was the one event in a harassed life that brought tranquility and peace to its victims" (*V. Heiser*). "How on earth can you rack and harry and post a man for his losings, when you... live in the same Station with him?" (*Kipling*). **Plague** implies an affliction or infliction comparable to that of a devastating epidemic disease. Though greatly weakened in its implications in modern use, it still suggests a tormentor and an agonized or suffering victim. "The gods are just, and of our pleasant vices Make instruments to plague us" (*Shak.*). "He went away to his regiment two days ago, and I trust I shall never be plagued with him again. He is the greatest coxcomb I ever saw" (*Austen*). **Pester** implies the power to annoy past endurance, as by numbers or by repetition of attacks suggestive of the discomforts of an infestation of vermin; as, to be *pestered* by beggars, to *pester* the authorities with complaints. "Adrian... would accept him entirely as he seemed, and not pester him... by trying to unlock his heart" (*Meredith*). **Tease** derives its implications from either of two of its earlier literal senses. When it implies repeated attempts to break down one's resistance, by successive appeals, or importunities, it derives its implications from *teasing*, or breaking down the tangles in fibers, as in the combing of wool or flax. "I have not been to the Rooms this age... except... last night with the Hodges's...: they teased me into it" (*Austen*). When it implies an attempt to provoke or "get a rise out of one" by raillery or tormenting, it derives its implications from *teasing*, or scratching the surface of cloth by a teasel, to raise a nap.

Ana. analogous words. **Ant.** antonyms. **Con.** contrasted words. See also explanatory notes facing page 1.

"Not soon provoked, however stung and teased, And, if perhaps made angry, soon appeased" (*Cowper*). **Tantalize** stresses the awakening of expectation and then (often wantonly) its frustration. "The mirage... which so *tantalized* the French soldiers in Egypt" (*J. Tyndall*). "Merciful love that *tantalizes* not, One-thoughted, never-wandering, guileless love" (*Keats*).

Ana. Disquiet, disturb, *discompose, perturb, agitate, upset: torment, try, torture (see AFFLICT): oppress, persecute, *wrong, aggrieve.

Con. *Comfort, solace, console.

worry, *n*. Anxiety, concern, *care, solicitude.

Ana. *Apprehension, foreboding, misgiving, presentiment: anguish, woe, heartache (see SORROW): *uncertainty, doubt, mistrust.

Con. *Equanimity, composure, sang-froid: *certainty, assurance, certitude.

worship, *n*. Adoration, veneration, reverence. See under REVERE, *v*.

Ana. *Honor, homage, obeisance: respect, *regard, esteem, admiration.

Con. *Profanation, desecration, sacrilege: execration, cursing (see corresponding verbs at EXECRATE).

worship, *v*. 1 Adore, venerate, *revere, reverence.

Ana. *Exalt, magnify: respect, esteem (see under REGARD, *n*.).

Con. *Execrate, curse: *despise, scorn, disdain, condemn.

2 *Adore, idolize.

Ana. Love, dote on or upon (see LIKE): admire, regard (see under REGARD, *n*.).

Con. *Hate, abhor, detest.

worth, *n*. **Worth, value** are close synonyms in more than one of their senses. Both **worth** (originally an Anglo-Saxon word) and **value** (derived from Latin, through Old French) in their earliest and still current senses denote the equivalent, especially in money, but also in goods, services, or the like, that is or may be given or asked in exchange for another thing such as goods, services, money, or the like; as, to determine the *worth* or *value* of a diamond bracelet (or of a tract of land, a building, a stand of timber, or one's services); the *value*, or *worth*, of these gold coins with reference to their purchasing power is greater than their *value*, or *worth*, as bullion; the present *value*, or *worth*, of the dollar in francs; he always gets his money's *worth*, or gets full *value* for his money; to promise to pay in three months one hundred dollars for *value* received (*value* being the idiomatic term in this phrase). When, however, *worth* and *value* mean the quality of being useful, important, excellent in its kind, or highly desirable or meritorious, they do not always come so closely together. For *worth*, far more often than *value*, applies to that which is excellent intrinsically, as by being superior morally, spiritually, intellectually, aesthetically, or the like; as, "Of ancient race by birth, but nobler yet In his own *worth*" (*Dryden*); "*Worth* makes the man, and want of it, the fellow" (*Pope*). "Archer's... coherent thinking, his sense of the *worth* of order and workmanship" (*C. E. Montague*). *Value*, often influenced by *valuation*, applies more frequently than *worth* to the excellence, usefulness, importance, and the like, imputed to a person or thing or to the degree in which that person or thing is regarded as excellent, useful, important, etc., especially in its relation to other things; thus, one gives an inflated *value* (not *worth*) to a certain poem; "there is always a gap between their appreciation of a man's *value* [far better than *worth*] at any moment and his real weight" (*Belloc*). "Nothing in the [church] service was slighted, every phrase and gesture had its full *value*" (*Cather*). *Value*

therefore is in current use applied, as *worth* is not, to something, such as a principle, a quality, a condition, a substance, or the like, which is regarded as important, useful, desirable, or of value in any way, sometimes in its relation to other things, sometimes in the degree which seems proper or fitting to it, and sometimes absolutely. "We may call food a *value* for the animal... not because it is pleasant to him, but because it is nutritious and fills his need of life" (S. Alexander). "The opinion... widely held, that while science... contemplates a world of facts without *values*, religion contemplates *values* apart from facts" (Inge).

Ana. *Excellence, merit, virtue, perfection: *use, usefulness, utility.

wrack or rack, v. *Ruin, wreck, dilapidate.

Ana. *Destroy, demolish, raze: *abolish, extinguish, annihilate.

Con. *Save, preserve, conserve.

wraith. *Apparition, phantasm, phantom, fetch, ghost, spirit, specter, shade, revenant, spook, haunt.

wrangle, v. Quarrel, altercation, squabble, bicker, spat, tiff. See under QUARREL, *n*.

Ana. Argue, dispute, debate (see DISCUSS): fight, cope, *contend.

Con. *Agree, concur, coincide.

wrangle, n. *Quarrel, altercation, squabble, bickering, spat, tiff.

Ana. *Argument, dispute, controversy: *discord, contention, dissension, conflict.

wrath. Rage, indignation, ire, fury, *anger.

Ana. Resentment, dudgeon, *offense: *acrimony, acerbity, asperity.

wrathful. Irate, indignant, *angry, mad, acrimonious.

Ana. Infuriated, incensed, enraged (see ANGER, *v*).

Con. *Forbearing, tolerant, clement, lenient, indulgent, merciful.

wreck, v. *Ruin, wrack, dilapidate.

Ana. *Destroy, demolish, raze: *injure, damage, impair.

Con. *Save, preserve, conserve.

wretched. *Miserable.

Ana. *Despondent, forlorn, hopeless, despairing: doleful, dolorous, *melancholy: abject, sordid, *mean: pitiable, piteous, *pitiful.

writer. Writer, author, composer come into comparison in their concrete applications to one who gives expression to his ideas or feelings, but they are not, as a rule, synonyms. **Writer** is a comprehensive term applied to anyone whose occupation or chief employment is that of expressing his ideas in words, especially for others to read. As an occupational designation, it implies that one's profession is writing for publication, and it covers novelists, essayists, poets, dramatists, editors, journalists, and the like; as, a free-lance *writer*; news *writers*; a *writers'* club. **Author**, in its comprehensive sense (see MAKER), may be applied to anyone who is known as the producer of a given painting, a given statue, a given musical composition, or the like; as here considered, it is applied only to a person who has written for publication. It differs from *writer* in placing less stress upon the profession and more upon the fact of having written and published a book, an article, or the like, under one's own name or a pen name; thus, one may decide to become a *writer* (better than *author*); the *authors* (better than *writers*) of some well-known books, such as *David Harum*, were not *writers* by profession. *Author*, in this sense, is also distinguished from *reviser*, *adapter*, *editor*, *dramatizer*, and the like, for it always retains its basic implication of originator, or source. **Composer**, like *author*, may be used

generally and specifically. But because it emphasizes the bringing together of a number of things so as to form a whole (a composition), it is applied most frequently to those expressions of ideas or feelings achieved by bringing together musical tones, words, colors, etc., so as to form an artistic pattern. It is the specific term for the author of a musical composition (as, the *composer* of the Peer Gynt suite) but, although this is its commonest application, it is also applicable to poets, painters, designers, and others when composition, rather than creation or representation, is the end; as, Shakespeare was not only a dramatist but a *composer* of lyrics.

writhe. **Writhe**, **agonize**, **squirm** are comparable when they mean to twist or turn in physical or mental distress. **Writhe** always carries vivid suggestions of convulsive contortions, as of those of one in the throes of death, in a paroxysm, in an instrument of torture, or in a trap and fruitlessly struggling to escape. When used in reference to physical distress, it commonly also implies excruciating pain. "Childhood and youth and age *writhing* in savage pains" (Shelley). When used figuratively, in reference to mental distress, it usually implies a torturing sense of shame, of bafflement, or the like; as, he *writhed* under the questioning of the cross-examiner. "Thus, at every march, the hidden enemy became bolder and the regiment *writhed*... under attacks it could not avenge" (Kipling). **Agonize**, a word derived from two sources, sometimes evokes the image of one in the pangs of death, struggling and in anguish; sometimes it evokes the picture of one wrestling, or straining, with might and main to achieve the difficult victory. "Bled, groaned, and *agonized*, and died in vain" (Cowper). "Old Chester children were prayed for, and *agonized* over" (Deland). As a rule, however, no matter which implication is the stronger, that of anguish or of straining, the one not stressed is at least connoted. "For you doubt, you hope, O men, You fear, you *agonise*, die" (Browning). "Pages which cost a week of unremitting and *agonising* labour" (A. Huxley). **Squirm** evokes images of a less dignified or a more familiar character; it suggests wriggling or turning as of a worm prodded by a stick. When used of human beings, therefore, it usually does not imply profound distress, but great unease, as in aversion to restraint or discipline, or a shrinking or wincing, as under sarcasm, criticism, or the like. "Sleek-haired subalterns who *squirmed* painfully in their chairs when they came to call" (Kipling).

Ana. Twist, bend, turn (see CURVE, *v*): distort, contort (see DEFORM): wince, blench, flinch, *recoil.

wrong, adj. 1 *False.

Ana. Fallacious, sophistical (see under FALLACY): *misleading, deceptive, delusive, delusory.

Ant. Right. — **Con.** *Correct, exact, accurate, precise.

2 *Bad, poor.

Ana. Improper, *unfit, inappropriate, unmeet, unfitting, unsuitable, inapt, unhappy, infelicitous.

Con. Proper, *fit, appropriate, suitable, fitting: *awry, askew: *amiss, astray.

wrong, n. *Injustice, injury, tort, grievance.

Ana. Damage, *injury, harm, mischief: violation, infraction, *breach, trespass, transgression: hardship, *difficulty.

wrong, v. **Wrong**, **oppress**, **persecute**, **aggrieve** are comparable when they mean to inflict injury upon a person without just cause or in an outrageous manner. One **wrongs** another who injures him by unjustifiably depriving him of his property, his good name, or the like, or by violating something he holds sacred. "Receive us; we have *wronged* no man, we have corrupted no man, we have defrauded no man" (2 Corinthians vii. 2).

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

“Forgivel forgivel much-wrong’d Montrose!” (*Burns*). One **oppresses** another who inhumanely lays upon him burdens too heavy to be endured or exacts of him more than he can possibly perform. “How reviving To the spirits of just men long *oppressed*, When God into the hands of their deliverer Puts invincible might” (*Milton*). “The *oppression* of a tyrannous control” (*Cowper*). One **persecutes** another who relentlessly or unremittently subjects him to annoyance or suffering. “A boy... [with] abnormal mental powers in some direction, combined with poor physique and great nervousness...

may be so *persecuted* [by normal boys] as to be driven mad” (*B. Russell*). One **aggrieves** another or, more often, causes him to be (or to feel) *aggrieved*, who by wronging, oppressing, or persecuting him gives him ground for remonstrance; as, several nations were *aggrieved* by the terms of the Treaty of Versailles. “So the bargain stood: They broke it, and he felt himself *aggrieved*” (*Browning*).

Ana. *Abuse, mistreat, maltreat, ill-treat, outrage: *injure, harm, hurt.
wrought. *Worked.

Y

yardstick. *Standard, criterion, gauge, touchstone.

yarn. Tale, *story, narrative, anecdote.

yearly. *Annual, anniversary.

yearn. *Long, pine, hanker, hunger, thirst.

Ana. Crave, *desire, wish, want, covet: aspire, pant, *aim.

yeast. *Foam, froth, spume, scum, lather, suds.

yen. Urge, *desire, appetite, appetence, passion, lust, concupiscence.

yet. *But, however, still, nevertheless.

yield, v. 1 Produce, turn out, *bear.

Ana. *Generate, engender, breed, propagate: create, *invent: form, shape, *make, fabricate, fashion.

2 *Relinquish, surrender, cede, abandon, leave, resign, waive.

Ana. *Forgo, forbear, abnegate, eschew, sacrifice: *abdicate, renounce, resign, demit.

Con. *Keep, retain, withhold: appropriate, *arrogate, confiscate.

3 **Yield, submit, capitulate, succumb, relent, defer, bow, cave in** are synonyms only when they mean to give way to someone or something that one cannot further resist. **Yield** (as here considered, see also RELINQUISH; BEAR, 2) may be used both of persons and of things. When the reference is to a person or persons, the term implies being overcome by force, by argument, by entreaty, or the like (as, to *yield* to persuasion; to *yield* to temptation; he never *yields* except when the matter under discussion is of no significance to him; “The great principle in a contest with a child is: do not *yield* but do not punish”—*B. Russell*); when the reference is to a thing, the word implies elasticity, or lack of firmness, strength, or endurance (sometimes duration) in the thing that gives way (as, “the door suddenly *yielded* to her hand”—*Austen*; “he passed between them [*stalks*], and they *yielded* on either side”—*Jefferies*). **Submit** carries an even more definite implication of contention or conflict than *yield* and, therefore, suggests more strongly a surrender after resistance to another’s will, or because of another thing’s strength or inevitableness; as, “All is not lost—the unconquerable will... And courage never to *submit* or *yield*” (*Milton*); “Catherine... having no power of getting away, was obliged to give up the point and *submit*” (*Austen*); “the Indian Summer of her heart, which was slow to *submit* to age” (*Stevenson*); “a long diatribe against Pitt for having tamely *submitted* to the rebuffs of the French Directory” (*Quiller-Couch*); “To this strange force within him [D. H. Lawrence], to this power that created his works of art, there was nothing to do but *submit*” (*A. Huxley*). **Capitulate** literally means to surrender on terms definitely agreed upon, but it is

often used without reference to opposing military forces: in extended use, it implies submission to a force or power that one has not the strength, or the skill, or the will to overcome; as, “I still pursued, and, about two o’clock this afternoon, she thought fit to *capitulate*” (*Spectator*, 1714); “If... all the proletarians were for Socialism and all the capitalists for Capitalism, Capitalism would have had to *capitulate* to overwhelming numbers long ago” (*Shaw*). **Succumb** carries a stronger implication than any of the preceding terms of weakness or helplessness in the person or thing that gives way, or of strength or irresistibility in the person or, more often, the thing that causes the giving way. The suggestion of sinking under that force or power is usually so strong in *succumb* that the word frequently implies a disastrous outcome such as death, destruction, or subjugation; as, to *succumb* to pneumonia; he does not easily *succumb* to temptation; “‘true passion... must be crushed before it will *succumb*’” (*Meredith*). All of the preceding terms usually imply a giving way on the part of a person (sometimes, a thing) that has not or cannot maintain the upper hand: they, therefore, often imply a weakening of the one that gives way. **Relent**, by contrast, implies a yielding on the part of the one who has the upper hand and who has been exceedingly severe or harsh in his attitude to another person or fixed in his determination to punish, to interfere, to frustrate, or the like. The term, therefore, implies a softening or mollifying that turns him from his previous course; as, “can you hear a good man groan, And not *relent*?” (*Shak.*); “Stern Proserpine *relented*, And gave him back the fair” (*Pope*); “[Had he seen] his sweetheart... crying and shivering... He might have *relented*” (*Deland*). **Defer** implies a yielding or submitting to because of respect or reverence for another or in recognition of another’s authority, superior knowledge, or the like; as, “the house, *deferring* to legal right, acquiesced” (*G. Bancroft*); “Everybody must *defer*... a nation must wait upon her decision, a Dean and Chapter truckle to her wishes” (*V. Sackville-West*). **Bow** is a picturesque word, sometimes a close synonym of *defer*, and at other times of *submit*: it usually suggests a yielding through courtesy or through subjugation; as, to *bow* to the inevitable; to *bow* to established authority; “He admired the tribal discipline which made May *bow* to this decision” (*E. Wharton*). **Cave in**, in its figurative sense, is a close synonym of *succumb*, but it often suggests resistance to pressure to the point of exhaustion and collapse; as, “In the end Government *caved in*, and unconditionally agreed to inquiry” (*Punch*).

Ana. Surrender, cede, waive (see RELINQUISH): concede, accord, award, *grant.

yoke. *Couple, pair, brace.

youth. *Youth, adolescence, puberty, pubescence* are sometimes used interchangeably to denote the period in life when one passes from childhood to maturity. **Youth** is the most general of these terms, being applied sometimes to the whole early part of life from childhood or infancy to maturity; as, *youth, maturity, senility*. More often, however, *youth* is applied to the period between the maturing of the sexual organs and the attaining of maturity. *Youth* often connotes the freshness, vigor, inexperience, or impetuosity characteristic of the young. **Adolescence** designates the same period as *youth* in the restricted sense, but it carries a stronger connotation of immaturity. *Adolescence* suggests the awkwardness resulting from the rapid growth during this period and also the mental and emotional instability resulting from the physiological changes. In education, *adolescence* denotes the period from the end of the elementary course to the end of the high-school course. In legal use, *adolescence* designates the period extending from puberty to the attainment of full legal age or majority. (By extension, *youth* and *adolescence* have come to designate an early stage in the development of anything; as, in physical geography, topographic *adolescence* or *youth* is the condition of a district soon after the beginning of erosion by streams.) Strictly, **puberty** designates the age at which the symptoms of the maturing of the sexual organs appear, such as the beard and changed voice in boys and the development of the breasts in girls. In law this age is commonly fixed at fourteen for boys and twelve for girls. In looser use, *puberty* often designates the period covering the earlier years of adolescence. **Pubescence** is sometimes used as equivalent to *puberty* but it is applied only to boys.

Ant. Age (sense 1).

youthful. *Youthful, juvenile, puerile, boyish, virgin, virginal, maiden* come into comparison only when they mean of, pertaining to, or characteristic of, one who is between childhood and adulthood. They are, however, not synonyms; for, although their basic meaning is the same, they are seldom interchangeable, because of widely differing implications and applications. **Youthful** sug-

gests the possession or the appearance of youth, or of a youngness appropriate to youth: it is commonly employed either in a good sense, or in extenuation; as, *youthful* aspirations, *youthful* indiscretions. **Juvenile** often suggests immaturity of mind or body or lack of experience; it is therefore applied especially (but not exclusively) to that which pertains to, or is suited to or designed for, boys and girls in their teens; as, *juvenile* dances; *juvenile* fiction; a *juvenile* performance. **Puerile** is almost exclusively applied to acts, utterances, and the like, which are excusable in a boy or girl or are characteristic of immaturity, but are unpardonable or out of character in an adult: the word is now used chiefly in contemptuous reference to acts or utterances of the mature. "It [vanity] stimulates cowardice in the face of ridicule, and leads infallibly to *puerile* confusions of shadow and substance" (*Brownell*). "What is one to think of a man so asinine that he looks for gratitude in this world, or so *puerilely* egotistical that he enjoys it when found?" (*Mencken*). **Boyish**, though referred commonly to boys, is sometimes used in reference to girls, or their clothes, appearance, qualities, or the like. The term often suggests some of the engaging qualities or the physical attractiveness of normal, vigorous boys; as, a *boyish* smile; *boyish* charm; *boyish* enthusiasm; *boyish* spirit. **Virgin** and **virginal**, though referable usually to girls are, in the extended sense in which they are here compared, applicable also to boys, because they suggest the freshness, the innocence, the purity, and the inexperience that are associated with youthful virginity. "That beautiful mixture of manly courage and *virginal* modesty" (*F. W. Farrar*). "He smiled like a girl. Or like clear winter skies, A *virginal* light Making stars of his eyes" (*V. Lindsay*). **Maiden**, as here compared in its extended sense, carries an even stronger suggestion than *virgin* or *virginal* of youthful lack of experience: it also implies that one's virtue, worth, competence, strength, or the like, has not been tried or tested; as, a maiden speech; his *maiden* effort at authorship.

Ana. *Immature, unmaturing, unfledged.

Ant. Aged. — **Con.** *Mature, matured, grown-up, full-fledged.

Z

zany. *Fool, jester, clown, antic, buffoon, merry-andrew, pantaloone, harlequin, comedian, comic, stooge.

zone. Belt, *area, tract, region.

Ana. *Locality, district: section, sector, segment (see **PART, n.**).

A colon (:) groups words discriminated in this book. An asterisk (*) indicates place of treatment of each group.

LIST OF AUTHORS QUOTED

The entries in italic type in the left-hand column are the actual forms used in citations in the *Vocabulary* of this Dictionary. These entries are arranged in the alphabetical order of surnames or titles. The right-hand column supplies a full identification of each author or source cited. Only readily understood abbreviations (such as Amer. for American and Eng. for English) are used in this column.

Alternative names (such as the pseudonyms of authors cited by their real names or, conversely, the real names of authors cited by their pseudonyms) are cross-entered in the list below wherever their inclusion is of likely value to the consultant. At such cross-entries the name in the left-hand column is enclosed in square brackets and printed in roman type.

As the names of books of the Bible are given in full wherever cited in the *Vocabulary*, these names are omitted from the list below. Unless otherwise stated at the citation itself in the *Vocabulary*, all Biblical quotations are from the Authorized Version (or King James Bible). Quotations from other versions are indicated by the addition of the abbreviations *R. V.* for Revised Version (of 1885), *D. V.* for Douay Version (or Douay Bible).

- | | | |
|---|--|--|
| <i>L. Abbott</i> . . . Lyman Abbott (1835-1922). Amer. clergyman. | <i>Arbuthnot</i> . . . John Arbuthnot (1687-1735). Scot. author and physician. | <i>M. Baring</i> . . . Maurice Baring (1874-). Eng. journalist and author. |

Companion Volumes, created by the same famous editorial staff that made this book

Webster's New International Dictionary, *Second Edition*

The Greatest Single Volume Ever Published.

Prepared at the tremendous cost of \$1,300,000 and edited by 207 specialists in every field, Webster's New International Dictionary, *Second Edition*, is a reliable source of information on every subject—the most complete dictionary ever published.

600,000 Entries — 122,000 more than any other dictionary; the greatest amount of information ever put into one volume.

12,000 Terms Illustrated — Magnificent plates in color and half tone; 13,000 biographical entries, providing facts on noteworthy persons from classical times to the present; 35,000 geographical subjects, including modern place names, latest population figures and useful geographical information; thousands of encyclopedic articles; 3,350 pages.

An Up-to-date Reference — the only unabridged dictionary completely revised and rewritten in 25 years, to serve as the great question answerer, "the Supreme Authority," for home, office, library, or school.

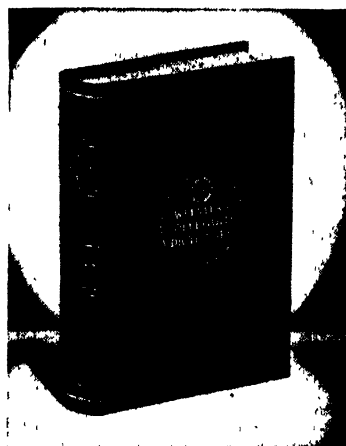

Webster's Collegiate Dictionary *Fifth Edition*

THE BEST HANDY-SIZED DICTIONARY

The Best — because it is the largest abridgment of Webster's New International, *Second Edition*, and is edited with the same careful scholarship.

The Best — because it includes all the words most commonly used in speaking, reading, and writing.

110,000 Entries — including an up-to-the-minute vocabulary; pronouncing biographical dictionary; pronouncing gazetteer; rules for spelling; synonyms and antonyms; vocabulary of rhymes. 1,300 pages, 1,800 illustrations.

Look for the circular seal on the front cover of every Merriam-Webster. This trade-mark identifies the genuine series of Webster Dictionaries. Get the latest and the best.
